Presidential Search and Screen Committee is being established

A University Presidential Search and Screen Committee is being established to help in the search for a successor to President Oswald who will retire June 30, 1983.

Quentin E. Wood, president of the Board of Trustees and chairman of the Trustee Presidential Selection Committee, has asked groups within the University community to nominate Search and Screen Committee members.

Mr. Wood asked that names of nominees be submitted to him by Oct. 15. From those nominees, the Trustee Presidential Selection Committee will appoint the 15 members of the University Presidential Search and Screen Committee. All members will be asked to serve until a new president assumes office.

According to approved guidelines, the Search and Screen Committee will be composed of:

- Eight faculty members. Four will be officers of the University Faculty Senate—its chairperson, chairperson elect, past chairperson and secretary.

- The four Senate officers will submit to the Trustee Presidential Selection Committee names of eight additional faculty nominees. Four will be from the University Park Campus, two from other campuses and two from Penn State's Graduate Council.

In selecting the eight nominees, the guidelines specify, the Senate officers will be responsible for ensuring representation and involvement of the appropriate members of the University faculty community.

From this list of nominees, the Trustee Presidential Selection Committee will name two faculty members from University Park, one from another campus and one from the Graduate Council to the Search and Screen Committee.

- Two deans, to be selected from all University deans, including those of Admissions and The Milton S. Hershhey Medical Center, Libraries, Graduate School, Behrend College and Capitol Campus.

One will be the chairperson of the Council of Academic Deans. In addition, the Council will nominate two deans from which the Trustee Presidential Selection Committee will select one.

- One member of the President's administrative staff, to be selected from

two individuals nominated by the staff.

- One Commonwealth Campus director, to be selected from two nominated by the Council of Commonwealth Campus directors.

- Two students, one undergraduate and one graduate. The Undergraduate Student Government and the Graduate Student Association will nominate, by procedures they determine to be appropriate, two undergraduate and two graduate students. The Trustee Presidential Selection Committee will select one undergraduate and one graduate student.

- And one alumnus, the president of the Alumni Association.

The chairperson and vice chairperson of the Search and Screen Committee will be named by Mr. Wood.

The committee's duties will be:

- To work with the executive secretary of the Trustee Presidential Selection Committee, Dr. Richard E. Grubb, senior vice president for administration, in announcement of the position.

"This shall be accomplished," the guidelines state, "through appropriately placed advertisements and through various communications."

The Search and Screen Committee "shall seek out applications and nominations for the position and will make known the criteria and qualifications set forth by the Trustee Presidential Selection Committee."

- To screen, review and evaluate all applications and nominations on the basis of the information received from the candidate or from the nominator. The committee "may also seek additional information as is available about the individuals but will not intervene or be in contact with individual applicants or nominees at this stage."

"References shall not be contacted. After the closing of the nominations, the committee shall then prepare, unranked, for the Trustee Presidential Selection Committee a list of five to ten individuals deemed to be most qualified from those nominated or who applied." That list will be submitted by May 31, 1982.

- To provide additional information when it is requested by the Trustee Presidential Selection Committee, as it begins its analysis of those identified and recommended by the Search and Screen Committee.

Happiness at Summer Term Commencement

Policy on evaluating academic administrators revised, retitled

President Oswald has issued a slightly revised policy AD-14 which provides for review of the operations of academic administrative offices.

The revised policy was developed and approved after discussions with the Faculty Advisory Committee, Council of Academic Deans, and the President's Administrative Policy Council.

The new AD-14 replaces a 1976 directive and has been retitled, "Academic Administrative Evaluation."

"The revisions," Dr. Oswald said, "are designed to interpret and clarify the previous policy and to assure that the evaluations provide an assessment of the strengths and weaknesses of academic administrative offices with the purpose of improving the functioning of those offices."

Spelled out in the revised policy are the specific offices which are subject to the evaluations.

It further defines the academic administrative offices to be reviewed as those that report directly or indirectly to the Provost of the University.

"In addition to vice presidents', academic deans', and Commonwealth Campus directors' offices," the policy states, "such offices shall include the offices of assistant and associate vice presidents; assistant and associate deans; department or division heads; directors of research units, and assistant and associate Commonwealth Campus directors."

The revised policy also provides for assurance of communication regarding initiation and completion of the reviews.

President states views on television football contracts issue

Editor's note: To help clarify Penn State's position on the television football contracts issue between the NCAA and the College Football Association, President Oswald stated his views in a letter to presidents of institutions with membership in the College Football Association, PAC 10, Big 10, and to commissioners of the major football conferences. The content of his letter, mailed last Friday, follows:

I am certain that you are giving careful consideration to the question of the College Football Association's (CFA) plan to contract with the National Broadcasting Company to televise football games in 1982 through 1985. I have been a strong supporter of the objectives and activities of the CFA even though I had hoped that the NCAA would have established its own Division to meet the needs of our schools with comparable football programs. It is essential to ensure that institutions such as ours with major

football programs are absolutely certain that they function under carefully considered rules and regulations as an overall part of the educational program, and with maximum inter-institutional trust. The CFA schools have provided a forum in which schools with comparable football programs have worked together to improve the sport and to develop such trust.

The one personal concern I had in joining the CFA was that the new organization might possibly be interpreted as anti-NCAA in nature. I am absolutely convinced that this is not, or ever has been, one of the goals of the CFA. Indeed, in my judgment the CFA has developed some worthwhile potential improvements in the conduct of football, and I am pleased that Penn State's Head Coach, Mr. Joseph Paterno, has been one of the active participants in these considerations. In its short history, the CFA has dealt with matters such as reducing the

number of coaches, strengthening recruiting regulations, pushing for an academic progress requirement for student athletes, supporting an increase in the grade point average required for admission, etc. All of these moves, I believe, are in the direction of keeping our football programs in proper perspective. Some of the recommendations of CFA have become NCAA policy and I am hopeful that many others will at subsequent conventions.

The CFA has been a worthwhile instrument for major school football programs. It is therefore most unfortunate that a potential divisiveness between institutions now seems to cloud the proposed CFA television program. I have heard of no CFA school talking about leaving the NCAA. Indeed, the CFA contract would provide the

Nancy M. Tischler

Senate chairman previews plans for this year's Faculty Senate

Dr. Nancy M. Tischler's inclination for solving problems through simple, informal conversation may have its effect on a University Faculty Senate that has grown increasingly complex and procedural over the years.

As Senate chairman for 1981-82, Dr. Tischler hopes to streamline the Senate system — which includes the manner in which the faculty governance body approaches its work and the frequency of its meetings.

"As the Senate has accumulated procedures in an effort to be fair and uniform, we have often become impossibly complex," she says. "We need to step back and look for ways to decentralize and simplify. We can do this to a large extent by simple conversation — by putting fewer things on paper. Often, it's best just to talk to the people involved and solve the problem informally."

"In addition," she notes, "I think the Senate is getting too involved with administrative work. We can escape from that easily enough by saying some things are not our job. Clearly, our central concerns are academic standards and curriculum. We can encourage better advising, better teacher-training, better integration of knowledge, but others must see that our wishes become reality."

She's also concerned with the once-a-month frequency of Senate meetings. "I'm going to ask the Senate Council to look at the agenda each time and ask if it is significant enough to warrant bringing hundreds of people thousands of miles — which involves a great deal of expense," she points out. "If we don't have enough for a productive session, I don't think a meeting is justified."

"If they need meetings of their committees, our Senate committee chairpersons could request that we instead have extended committee sessions. When we stop having perfunctory assemblies, we might find our meetings better attended, more efficient, more exciting."

Over the summer, Dr. Tischler has been talking with senators and administrators to learn about their concerns for the impending academic year.

"A major and complex issue that concerns the entire committee is student evaluation of teaching," she says. "We need to divide judgment of courses, improvement of teaching, and tenure decisions into separate questions. The Senate has at least three committees involved with teaching evaluation, and the deans have one. They should get together to analyze the problem. I think this is one area where decentralization makes a lot of sense. No one knows how good a faculty member is as well as the

local people — those in the teacher's department or at his or her campus. It may prove wiser to trust summary statements from local committees indicating the professors' teaching ability rather than put our faith in forms and numbers."

The calendar conversion effort also is generating issues. "One of them is the length of the sabbatical — will it be shortened? Will it consequently be available more frequently? Another concerns the 'at-home' sabbatical, which has been referred to as the 'paint-the-house' sabbatical and is rarely allowed," Dr. Tischler says.

But such a policy works especial hardship on women faculty members who have families and on dual career families with little flexibility. The Faculty Affairs Committee has almost completed a report on the entire history of sabbaticals, and the Senate will use this as a point of reference for discussion of the issue."

In addition, the calendar conversion has created concern over the proposed summer sessions, she says.

"There are some interesting problems here. One proposal advocates putting faculty members on something similar to the Continuing Education salary structure for the summer. But if the salary schedule isn't appealing, the University won't get a very wide range of course offerings. Senior faculty members won't want to teach during the summer, and that fact may pose problems in attracting graduate students. The proposal that the summer sessions be a self-supporting, stand-alone operation is generating many questions that faculty should consider."

Besides faculty evaluation and calendar conversion, the Senate agenda for the year will deal with a critique of the implementation of Baccalaureate Degree Requirements (BDR III).

Dr. Tischler also wants the Senate to refocus its sights on enriching the intellectual atmosphere of the University.

"We must turn our attention to the life of the intellect. I don't think other junior or senior faculty members want to spend their lives talking about promotion and tenure, although the subject is terribly important to the community. Surely we chose this profession for more idealistic reasons than the job security it offers."

"It's been said that bright students at Penn State find little support or comradeship, and many of us want to correct that situation. We, as the Senate, need to turn our attention to recreating the community of scholars who are not preoccupied with the terms of our contract. We cannot escape our role as the watchdog for faculty rights, but we can perform that chore with more dispatch. Then we can get back to the real life of the professor — learning and teaching."

PS-23 to head Faculty Senate's agenda at first meeting, Sept. 8

Several legislative and informational reports highlight the agenda awaiting the University Faculty Senate when it convenes for the 1981-82 academic year at 2:10 p.m. Tuesday, Sept. 8, in Room 112 Kern Bldg.

Heading the legislative reports is that of the Faculty Affairs Committee, which will ask the Senate to take action on two proposed changes to PS-23, the University's policy document on promotion and tenure.

The first proposal will focus on revamping the promotion and tenure review process so that college review committees may override their deans' decisions and forward promotion and tenure cases to the University review level. The second proposal will deal with modifying administrative guidelines to provide a clearer statement of the appropriate procedures for evaluating teaching effectiveness as related to promotion and tenure. The committee proposes that procedures and methods of evaluation shall be selected by faculty members of individual academic units.

The Committee on Academic and Athletic Standards will ask the Senate to act on proposed changes in its "Academic Policies and Procedures for Undergraduate Students," published annually in the *Penn State Student Handbook*. The changes are needed to make student rules conform with the early semester calendar.

A special committee on Computer and Informational Systems will ask the Senate to take action on its report, which recommends several means by which the University's computer and informational systems could be more fully utilized and unified.

Heading the informational reports is that of a special committee on the Freshman Year Experience. The

committee will detail its findings and suggest specific administrative remedies to problematic matters which affect freshmen.

The Senate also will hear an informational report from the Promotion and Tenure Committee, which will be presented by Dr. Richard G. Cunningham, committee chairman and University vice president for research and graduate studies.

Other informational reports will be presented by the Calendar Conversion Council, the Senate Committee on Academic and Physical Planning, and the Committee on Undergraduate Instruction.

This year's Senate officers are: Nancy M. Tischler, professor of English and humanities at Capitol Campus, chairman (see related story, this page); Joseph A. Dixon, professor and head of chemistry, chairman-elect; Carol A. Cartwright, professor of education and acting associate dean for academic affairs in the Commonwealth Educational System, secretary; and George W. Franz, assistant professor of history at Delaware County Campus, immediate past chairman.

Of the Senate's some 210 members, 80 percent are elected faculty members representing all colleges and Commonwealth Campuses, as well as the Reserve Officers Training Corps' three programs. Another 10 percent of the Senate's members are undergraduate and graduate students, and the final 10 percent are appointed administrative and ex-officio members.

In addition to its Sept. 8 meeting, the University Faculty Senate will meet on the following dates, all Tuesdays: Oct. 6, Nov. 10, Dec. 15, Feb. 2, March 9, April 6, May 4 and May 25. There will be no meeting in January and the June meeting has been moved to the second date in May.

United Way approved for payroll deductions

United Way, for the 10th consecutive year, has been recognized as the University's only charitable fund raising effort for which payroll deductions are made.

In making the announcement, President Oswald said, "I'm pleased to announce the University's official endorsement since United Way is a charitable organization designed to aid people in a particular community. With Penn State campuses in 22 different

locations, it offers a unique opportunity to the University, often a prime employer, to help its neighbors."

"Personally, I've always participated in the United Way," Dr. Oswald added. "Its volunteer focus, so much an American idea, has reinforced my optimism in our country. Last year's record contributions at University Park alone strengthen my faith in United Way and the Penn State family."

United Way campaigns are conducted each fall at all campuses in conjunction with local United Way offices.

Committee to assess admissions policies

Ten faculty members, administrators, and students have been appointed to a Provost's Admissions Review Committee for 1982 to assess admissions policies and procedures at the University.

"We need to review several of our fundamental admissions processes," says Provost Eddy, noting that the last major review of admissions procedures at Penn State took place in 1978.

Donald G. Dickason, dean of admissions, is chairman of the committee which is expected to complete its work by Oct. 1.

The ability of the University to predict enrollments, especially for Fall Term, will be reviewed along with the impact of the pending switch to the semester system on the admission of students during the summer.

The desired proportion of out-of-state students in the University's student population will be discussed also.

The committee's members include Janet Atwood, associate professor of physical education; Paul D. Bell, an undergraduate

with dual majors in marketing and art; Dr. Richard P. Chait, associate provost; Dr. Robert E. Dunham, vice president for undergraduate studies; Loren M. Furtado, director of the Office of Budget and Planning; Dr. Charles L. Hosler, dean of the College of Earth and Mineral Sciences; Philip C. Jacobson, an undergraduate pre-law major; Dr. Stanley F. Paulson, dean of the College of the Liberal Arts; and Dr. Robert J. Scannell, vice president and dean of the Commonwealth Educational System.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Associate dean named at Behrend

Dr. Jack D. Burke has been named to the new position of associate dean at Behrend College. He also will serve as associate professor of geography.

Dr. Burke previously was associate dean and associate professor at the State University of New York, Empire State College, at the Niagara Frontier Regional Learning Center in Buffalo.

At Behrend he will be responsible for

academic support and services, as well as other special projects and programs. He will work closely with the heads of the college's Divisions of Natural Sciences and Engineering, Arts and Humanities Studies, and Social and Behavioral Sciences.

A specialist on industrial location, regional economic growth, and international trade, Dr. Burke has lectured and written extensively on the subjects.

He is the recipient of several grants and honors, including the SUNY Chancellor's Award for Excellence in Teaching, presented in 1976.

Computer committee adopts new policy

The University Advisory Committee on Instructional Uses of the Computer has adopted a policy statement to aid in the allocation of interactive computer services for 1 account authorizations by the Computer Center.

Under the policy, faculty members at University Park desiring to have interactive system connections authorized for students in their 400 or 500 level courses should file the usual 1 account application for computer use in Room 229, Computer Center.

A special request for interactive connections for the Fall Term should be submitted no later than Wednesday, Sept.

9, to E. R. Melander, chairman, University Advisory Committee for Instructional Uses of the Computer, 117 Old Main. Requests will be served on a first-in basis; the total number of 1 account connections will be limited.

The special request should identify the course, estimate the number of students; specify whether RJE, APL, CMS or INTERACT connections are desired; provide a special justification to connect students to more than one system; estimate the average weekly connection time per student and the total term connection time per student that will be required for students to complete course assignments.

A copy of the Committee's complete policy statement may be obtained by contacting Dr. Melander.

Report developed on government regulation

President Oswald was one of several panelists from business and education who provided information for a recent American Council on Education special report on government regulation in the United States.

The report, which has been endorsed by U. S. Rep. John P. Murtha, recommends self regulation, in which informal government negotiations would allow laws to be carried out without burdensome regulations, and performance standards — setting health standards, for example, and allowing industry meet them the best way possible without government interference unless the standards were not met.

"The Council's recommendations were both practical and enlightening," Mr. Murtha says in the weekly column he distributes to Pennsylvania newspapers, noting that the report recommends the use of impact statements providing detailed analysis of the economic impact of proposed regulations before they become laws.

"The report urges Congress to endorse these principles, and also puts the burden on the other side, noting that 'the regulated must consider their

responsibilities' to the public and the Nation," Mr. Murtha writes.

"These factors together, according to the report, 'have it within their power to change regulation into a more positive, enlightened force in American life. For the sake of the Nation, that power must be exercised.'"

Library tours scheduled

Tours of Patten Library will be offered through Friday, Sept. 4, and Sept. 8 and 9, at 9 and 11 a.m. and 1 and 3 p.m. An evening tour will be given at 7 p.m. Sept. 9. All tours will begin in the main lobby of Patten.

Tours of the branch libraries will be offered on the same dates. Tours for undergraduates will begin at 10 a.m.; graduate tours begin at 2 p.m. The branch libraries are: Architecture Reading Room (207 Engineering Unit C), Earth & Mineral Sciences (105 Deike), Engineering (325 Hammond), Life Sciences (E210 Patten), Mathematics (110 McAllister) and Physical Sciences (230 Davey).

Patten and its branches will be closed Saturday and Sunday, Sept. 5 and 6, during term break and on Monday, Sept. 7, Labor Day. Regular Fall Term hours will begin Tuesday, Sept. 8.

Summer enrollment increases by 250

Summer term enrollment at the University totaled 14,072 resident instruction students, an increase of 250 over last year, according to Dr. Robert E. Dunham, vice-president of Undergraduate Studies.

The final enrollment breakdown shows 10,460 students at University Park; 2,293 at the Commonwealth Campus; 894 at the Capital Campus; 277 at the Milton S. Hershey Medical Center; and 148 at the

Radnor Center for Graduate Study.

All the figures are increases over Summer Term, 1980, with the exception of Radnor, which enrolled seven fewer resident instruction students.

Continuing education credit enrollments also rose with 7,944 students listed this summer, an increase of 1,686 over last year. All campuses with continuing education credit enrollment showed increases over last year.

Total credit enrollments throughout the University, including resident instruction, continuing education and non-resident credit students, numbered 25,394, an increase of 2,215 over last summer.

Health exposition set for next month

Numerous topics of health interest will be examined during Health Expo 81, scheduled for Oct. 5, 6, and 7 in the Hetzel Union Bldg.

The event, co-sponsored by University Health Services and the Undergraduate Student Government, also will feature

exhibits, demonstrations and health screenings.

Faculty and staff members interested in becoming part of the program either as a lecturer, discussion leader or panel organizer to deal with a specific health issue or topic should notify the Health Exposition Office, 234 Ritenour, by letter, or call Robert Wrag, director of the Office of Health Promotion and Education, at 863-0461.

Nominations sought for teaching award

The College of Education is seeking nominations for its annual Outstanding Teaching Award. According to an announcement from the award committee, nominations will be accepted until Oct. 19.

The award, which includes a cash prize, is presented to a College of Education faculty member who has a distinguished record in teaching and advising and who exhibits outstanding performance in developing quality instructional techniques and in inspiring students.

Nominations will be accepted from undergraduate and graduate students, as well as former students, from all of the University's campuses. The recipient will be selected by a committee of faculty members and students.

Criteria used in judging nominees include: excellence in knowledge of the subject taught, clear and interesting communication with students,

Chain letter violations

In view of reports of chain letters being circulated on campus, employees are reminded that use of University time, equipment, supplies, and the interdepartmental mail system for such purposes is in violation of University policies. Violators are subject to disciplinary action.

Persons having information on such violations are urged to report it to Mailing Services at 865-9171.

accessibility as an adviser, ability to adapt instruction for particular classes or students, and credibility as a model of professional competence.

Nomination blanks, a complete list of criteria and a set of procedures may be requested from: The College of Education, Outstanding Teaching Award Committee, 165 Chambers Bldg., University Park, Pa., 16802.

Policy on evaluating revised, retired

(Continued from page 1)

"The processes shall, without exception, include mechanisms whereby faculty of the pertinent unit shall be informed when the review is started, when the review is completed, and that the next highest academic administrative office has been informed of the results of the review."

Under guidelines of the newly-instituted policy, academic administrative offices are to be reviewed at intervals of approximately five years, with no more than 20 percent of the offices being reviewed each year.

The offices of deans and their associate or assistant deans, as well as Commonwealth Campus directors and their assistant or associate directors, may be scheduled for simultaneous or separate reviews. Such five-year reviews, however, are to be conducted in addition to conventional annual evaluations.

President states views on television football contracts issue

(Continued from page 1)

same revenue sharing with NCAA that its current and prospective contracts contain. The only key discussion centers on television property rights of the CFA schools and later rights over cable casting and other electronic outlets. Since most of the major football schools have been meeting fairly regularly as the CFA, it is not surprising that there has developed a move among the schools for a separate contract for televised CFA football games. This is not dissimilar from many other TV contracts that have developed outside the NCAA in many areas of the country during the regular basketball season.

The primary question that is before each of us is whether or not we support a separate CFA television contract. The question is not whether we intend to stay in the NCAA, but whether our property rights on television, cable, casting and like media are going to be protected. I have supported the television plan from the beginning and in particular was pleased to note the provision that each institution during the four-year contract would appear in at least two televised games. This is very important, for there are some institutions in our group that have not

been on television for a number of years and this participation provides a means for strengthening such programs.

I used above the word "divisiveness" because I fear that, as we approach the voting date of September 10, individual presidents might be pushed into pitting one institution against another institution — and in most cases institutions that have strong and traditional educational ties far beyond any athletic ties. For one am sorry that the Big 10 and PAC 10 Presidents, without any prior dialogue on the issues, intimate that those of us supporting the CFA television program are somehow less interested in keeping the proper controls over football and are attempting to disrupt, not unify the system. It is hard to believe that, although two schools may differ as to the wisdom of a particular television arrangement, therefore one is somehow more interested in keeping football in its proper role in a university. I also feel the hints and innuendos from the NCAA about "sanctions," "expulsions," "penalties," etc. are unfortunate — particularly when the NCAA is dealing with a large

number of its strongest members, each of which presumably desires to remain a member.

I write this letter to reinforce my vote of last week and my intention to continue to vote in the affirmative on September 10. Nevertheless, until that vote is cast, I am willing to listen, and I hope to hear possible ways or alternate time-schedules suggested in which this problem can be resolved. Each of us as institutional leaders owe nothing less than to try to understand the views of others and ultimately all work together toward developing a sound intercollegiate athletics program at all major institutions.

Thank you for your attention to this letter from a concerned president.

Sincerely,

John W. Oswald, President

University Park Calendar

FALL TERM 1981

Thursday, Sept. 3

Registration for Fall Term, 8 a.m.-5:30 p.m., IM Bldg.
Continuing Education, registration, noon-8 p.m., Room 101 Kern; English and math placement exams, 6:30 p.m., Keller Bldg.
Tours of Pattee Library, 9 and 11 a.m.; 1 and 3 p.m.
HUB Craft Center registration, noon-5 p.m., Room 312 HUB, through September 17.
Nursing Consultation Center, walk-in clinic for blood pressure screening (free), 1:30-4:30 p.m., Consultation Center. Continues every Thursday afternoon during Fall Term.

Friday, Sept. 4

Registration for Fall Term, 8 a.m.-5:30 p.m., IM Bldg.
Preregistration for Winter Term, Room 112 Shields, through Sept. 28.
Continuing Education, registration, 9 a.m.-5 p.m., Room 101 Kern.
Tours of Pattee Library, 9 and 11 a.m.; 1 and 3 p.m.
Sports: soccer vs. West Virginia Wesleyan, 7:15 p.m.

Saturday, Sept. 5

Sports: field hockey, Lady Lion Invitational Preseason Tournament. Also Sept. 6.

Week of Sept. 7

Monday, Sept. 7

Labor Day recess
Sports: soccer vs. St. Johns, 7:15 p.m.

Tuesday, Sept. 8

Fall Term classes begin, 8 a.m.
University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.
Tours of Pattee Library, 8 and 11 a.m.; 1 and 3 p.m.
Cooperative Art Assoc., print sale, through Sept. 11, Kern Commons.

HUB Craft Center Open House, 7:30-9:30 p.m., Room 312 HUB.
Penn State Internationale Dancers, first meeting of old and new (interested) members, 7 p.m., Room 132 White Bldg. Meetings continue throughout term every Tuesday and Thursday from 7-9 p.m.

Wednesday, Sept. 9

Tours of Pattee Library, 9 and 11 a.m.; 1, 3 and 7 p.m.
CSA Orientation Film, *Carnal Knowledge*, dusk, Fisher Plaza.
Retired Faculty/Staff Club, picnic at Stone Valley, 3:30-8 p.m. Nature walk "Geology of the Region" — Dr. Carl Keener.

Thursday, Sept. 10

Board of Trustees meeting, Faculty Bldg.
Meteorology Seminar, 4 p.m., Walker Bldg. Auditorium. Dr. Sam C. Colbeck, Cold Regions Research and Engineering Laboratory, Hanover, N.H., on "Snow, Ice and Glaciers."
Lecture to open Josef Svoboda exhibit, 8 p.m., 105 Forum. Dr. Jarka Burian, professor of dramatic arts, SUNY/Albany, on Svoboda's work.
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Friday, Sept. 11

Board of Trustees meeting, Faculty Bldg.
Commonsplace Theatre, *Fame*, 7 and 9:15 p.m., Room 112 Kern.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Charles L. Hosler, professor of meteorology and dean, College of Earth and Mineral Sciences, on "Meteorology from the User's Point of View."
Robeson Cultural Center, Rufus Harkey and his Combo — jazz bagpipes, 8 p.m., Schwab Auditorium.
CSA Resource Day, 11:30 a.m., Kern Lobby.
Sports: soccer vs. Loyola (MD), 7:15 p.m.

Saturday, Sept. 12

World Premiere, *The Mafia Company, An Offer You Can't Refuse*, 8 p.m., Eisenhower Auditorium.
France-Cinema, Molinaro, *La Cage aux folles*, 7 and 9 p.m., Room 112 Kern.
Sports: football vs. Cincinnati, 1:30 p.m.

Sunday, Sept. 13

HUB Craft Center classes begin.

Week of Sept. 14

Monday, Sept. 14

France-Cinema, Molinaro, *La Cage aux folles*, 7 and 9 p.m., Room 112 Kern.
English Colloquium, 8 p.m., Room 101 Kern.
Jonathan D. Culler, professor of English and comparative literature, Cornell, on "The Reader in Contemporary Criticism."
Nursing Consultation Center, "Families with Mental Health Concerns" support group, 7-8:30 p.m., Consultation Center. Continues each Monday during the term.

Wednesday, Sept. 16

Commons Concert, Buffalo Chipkickers, noon, Kern Lobby.
Nursing Consultation Center, "Coping with Multiple Sclerosis," 3-4:30 p.m., Consultation Center.
Alard String Quartet Concert, 8 p.m., Music Bldg. Recital Hall.
Sports: baseball vs. Juniata, 3 p.m.; soccer vs. West Chester, 7:15 p.m.

Thursday, Sept. 17

Late registration deadline.
Add deadline.
Graduate Commons Plant Sale, 10 a.m., Kern Lobby, through Sept. 18.

Friday, Sept. 18

Commonsplace Theatre, *Ordinary People*, 7 and 9 p.m., Room 112 Kern.
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Pierce Lewis, professor of geography, on "Images of the American Landscape: Art as a Reflection of National Personality."
Sports: women's volleyball vs. Georgetown, 8 p.m.

Saturday, Sept. 19

France-Cinema, Beresford, *Breaker Morant*, 7 and 9 p.m., Room 112 Kern.
Sports: women's volleyball, Penn State Invitational; women's tennis vs. Syracuse, 10 a.m.; men's cross country vs. Alumni, 10:30 a.m.; women's cross country, Lady Lion Invitational, 11 a.m.

Sunday, Sept. 20

Commonsplace Theatre, *Ordinary People*, 7 and 9 p.m., Room 112 Kern.
Sports: women's tennis vs. Colgate, 10 a.m.; baseball vs. Mansfield (OH), 1 p.m.

Week of Sept. 21

Monday, Sept. 21

Deadline for November graduates to pay thesis fee at Bursar's Office and to activate diploma cards in Records Office.

Penn Staters

Dr. Robert A. Bernheim, professor of chemistry, has been appointed to the Board of Editors of *The Journal of Chemical Physics*. He also will serve as a member of the Advisory Board of the Regional Laser Laboratory in Philadelphia.

Dr. Robert O. Blanchard, director of the School of Journalism, has been elected president of the American Association of Schools and Departments of Journalism. It is made up of deans, directors and department heads of the 81 accredited journalism and mass communication programs in colleges and universities in the United States.

Dr. Blanchard also was named to the executive committee of the Association for Education in Journalism, the organization of university and college faculty in journalism and mass communications.

Dr. Paul A. Games, professor of educational psychology, presented a talk on the ANOVA series computer programs to the Japanese National Institute of Vocational Research in Tokyo. The Institute is implementing the programs on

their FACOM computer. Dr. Games also gave two talks at Omiya City, Japan.

Dr. Thomas A. Hale, associate professor of French and comparative literature, has been appointed by the Council for International Exchange of Scholars to a three-year term on the Advisory Screening Committee for senior Fulbright awards in African literature.

Dr. Warren W. Hassler, professor of history, has been awarded the "Outstanding Civilian Service Medal" by the United States Military Academy for his work as visiting professor of military history at West Point during the 1979-80 academic year.

"Professor Hassler made a substantial contribution to academic excellence at the Military Academy by actively participating in the instruction of cadets, stimulating the faculty and providing wise counsel to the Department of History and other agencies and activities at the Military Academy," noted Lt. General A. J. Goodpaster, academy superintendent. "His commitment to excellence in

teaching and his high personal standards of scholarship have made a lasting impression on the Department of History, the United States Corps of Cadets and the United States Military Academy."

Dr. David A. Long, associate professor of civil engineering, has been named president elect of the Water Works Operators' Association of Pennsylvania. The Association is concerned with the advancement and dissemination of the knowledge of water works and exchange of information of design, construction, operation, and management of water works.

Dr. Arnulf Muan, professor of mineral sciences and associate dean for research in the College of Earth and Mineral Sciences, was one of four world authorities on applied mineralogy to give plenary lectures at ICAM 81, International Conference on Applied Mineralogy in the Mineral Industry, at Johannesburg, South Africa.

Title of his talk was "Equilibria in Metal and Oxide Systems at High Temperatures." While in South Africa, he also lectured at the National Institute for Metallurgy and Rand Afrikaans University, both in Johannesburg, and attended an international platinum symposium in Pretoria.

Forrest J. Remick

Dr. Forrest J. Remick, professor of nuclear engineering, has been appointed director of the Office of Policy Evaluation at the Nuclear Regulatory Commission. In his new post, he will report to all five NRC commissioners, evaluating NRC policy directions.

Dr. Remick, who is assistant vice president for research and graduate studies and director of Intercollege Research Programs, joins the NRC under the Intergovernmental Personnel Act. That act authorizes temporary exchange of personnel among federal executive agencies and states, local governments and institutions of higher education, as a means of sharing expertise.

A member of the Governor's Energy Council, Dr. Remick formerly was chief of training for the International Atomic Energy Agency's Department of Technical Assistance. He has been a consultant to numerous federal agencies, laboratories and industries on energy-related research and policy.

During Dr. Remick's absence, **Dr. Harry D. Zook** will serve as acting director of the Intercollege Research Program. Dr. Zook is a former assistant vice president for research and former director of the IRP.

Promotions

Faculty

Stephen A. Wodbury to assistant professor of economics.

Staff Exempt

Holly K. Blalock to coordinator, Child Life Program at Hershey.

John J. Golesh to coordinator, Patient Monitoring Services at Hershey.

Samuel T. Miller to assistant to the dean of student affairs at Altoona.

Sheila K. Moore to programmer in Management Services.

W. Glenn Mulberger to supervisor of Family Housing Apartments in Housing and Food Services.

Kathleen Nagy to critical care staff development instructor at Hershey.

Lynn M. Schaub to resident associate manager, graduate student in housing in Housing and Food Services.

Virginia K. Shorts to nursing supervisor at Hershey.

Staff Non-Exempt

Nancy J. Cake to supervisor, ECU at Hershey.

Patricia S. Callahan to library assistant at

Shenango Valley.

Marianne R. Devlin to senior staff nurse at Hershey.

Vicki L. McNamara to research technician at Hershey.

Cheryl Norman to administrative aide in Health, Physical Education and Recreation.

Ruth Ann Pettit to auditing assistant in Controller's Office.

Susan K. Yagel to research technician at Hershey.

Clerical

Pamela M. Aikey to secretary A in Art Services.

Gladys R. Brown to technical secretary C at Behrend.

Patricia A. Gering to senior manuscript typist at Hershey.

Donna Jean Greendonor to correspondence secretary B in Health, Physical Education and Recreation.

Norma J. Hartner to technical secretary C at Behrend.

Barbara A. Hendershot to records clerk in Liberal Arts.

Georgeanna Hillard to secretary A in Liberal Arts.

Sheila L. Ishler to clerk stenographer A in Engineering.

Dee L. Kunst to secretary C in Libraries.

Valerie L. Lanager to secretary C in Human Development.

Betty L. Layton to conference secretary in Continuing Education.

Jeffrey Lucas to auxiliary machine operator in Management Services.

Anne A. Macomber to budget clerk at Hershey.

Barbara Merritt to secretary C in President's Office.

Lori Shaffer to secretary C in Planning and Budget.

Patricia A. Snyder to secretary B in Engineering.

Beverly A. Watson to accounting clerk in Controller's Office.

Tammy D. Yarnell to clerk stenographer A in Engineering.

Technical Service

Beverly A. Dunkle to patient service aide at Hershey.

Floyd A. Maines to mechanic, experimental and maintenance in Engineering.

John A. Morone to laboratory worker in Agriculture.

Carroll L. Olinger to central processing aide at Hershey.

Donald J. Tressler

Federal Reserve Bank of Philadelphia.

Ravindra N. Sharma as head librarian at Beaver. B.A., M.A., U. of Delhi; M.L.S., North Texas State U.; Ph.D., State U. of New York-Buffalo. Reference librarian, Colgate U.

Sтивен H. Sherman as assistant professor of surgery at Hershey. B.A., Boston U.; M.D., U. of Vermont.

William Williams as associate professor of agriculture and extension education at University Park. B.S., M.S., D. Ed., PSU. President, MFS Consultants, Millburg, Pa.

Lloyd D. Worley as assistant professor of English at DuBois. B.A., M.A., U. of Southwestern Louisiana; Ph.D., Southern Illinois U. Visiting assistant professor, Southern Illinois U.

Appointments

Alfred A. Actor as associate professor of physics at Allentown. B.S., Stanford U.; M.S., Ph.D., UCLA.

Stanley J. Becker as assistant professor of mechanical engineering at Berks. B.M.E., Cooper Union School of Engineering; M.S., Polytechnic Institute of Brooklyn; Ph.D., U. of Pittsburgh.

Bowling team needed

The University Men's Bowling League is seeking another team for the upcoming league season. The league bowls at 6:30 p.m. Wednesdays at the University Lanes. Employees interested in entering a team should contact Ralph Hosterman, league secretary, at 237-7980.

New network number

Effective immediately, the Shenango Valley Campus has a new network telephone number. The new number is 641-5155.

Eric W. Bond as assistant professor of economics at University Park. B.S., Lehigh U.; M.A., Ph.D., U. of Rochester. Assistant professor, Temple U.

Jeffrey K. Harris as assistant professor of surgery at Hershey. A.B., Colgate U.; M.D., U. of Colorado. Fellowship, Park Ridge Hospital, Rochester, N.Y.

Roberta Kevelson as assistant professor of philosophy at Berks. B.S., Bryant College; B.A., M.A., Goddard College; Ph.D., Brown U.

Daniel T. Lichter as assistant professor of sociology at University Park. B.S., South Dakota State U.; M.S., Iowa State U.; Ph.D., U. of Wisconsin-Madison. Research assistant, U. of Wisconsin-Madison.

Thomas H. Oswald as associate professor of biology at McKeessport. B.A., M.S., Ph.D., U. of Missouri.

Robert J. Rossana as assistant professor of economics at University Park. B.S., St. Joseph's U.; M.A., U. of Delaware; Ph.D., Johns Hopkins U. Senior economist,

Carpooler

Pam Kifer would like to share driving from Huntingdon. She works from 8 a.m. to 5 p.m. in Steidle Building. Call either 863-1776 or 627-3958.

Retirements

Roger B. Saylor

Dr. Roger B. Saylor, professor of economics and statistics at the Capital Campus and founder of the Saylor scholastic football rating system, will retire Sept. 5 after 34 years of service with the University. He will be conferred the rank of professor emeritus.

Dr. Saylor joined the Penn State faculty in 1947 as assistant professor of economics. He was named associate professor of economics in 1951 and professor of business statistics in 1954.

In 1967, Dr. Saylor was appointed as the first head of the new business administration program at the Capital Campus. He served in that capacity until 1972 before returning to full-time teaching and research.

Most of Dr. Saylor's research has centered on the Pennsylvania economy. He is the author of numerous monographs concerning economic and business conditions in the state.

Dr. Saylor is well known throughout the state for his Saylor Ratings, a scholastic football rating system he developed in the mid-50's, which is widely in use today throughout the Commonwealth. From his statistical ratings work have come four books: *Scholastic Football in South Central Pennsylvania, 1887-1978*; *Scholastic Football in Southeastern Pennsylvania, 1887-1979*; *Scholastic Football in the South Antietam and Middle Susquehanna Valley Area, 1893-1979*,

and *Inter-scholastic Football in Pennsylvania's Allegheny Mountains, 1898-1980*.

A native of Reading, Dr. Saylor received his B.S. in mathematics from Lebanon Valley College. He received his master's and his doctor's degrees, both in economics, from the University of Illinois.

He and his wife, the former Jean M. Stoffer, plan to divide their time between the Harrisburg area and Florida. He plans to continue producing his Saylor Ratings of scholastic football teams and research in scholastic football history.

He is the father of two children: Richard, now of Winter Haven, Fla., and Barbara of Chadds Ford.

Charles Smitley, research associate-technical services at the Applied Research Laboratory, retired July 1. He transferred from the Harvard Underwater Sound Laboratory to the ARL in 1945.

Before retiring, Mr. Smitley's tasks included working as a group leader in charge of the Electronic Construction and Supply Transducer Construction and the Instrument Repairs and Printed Circuit Facility. He assisted in projects involving the design of electronic assemblies, training engineering aides in electronic construction, advising and training minority undergraduates, and designing and constructing special alarm and control systems.

Over the years, Mr. Smitley became known for his excellent leadership qualities, pleasant nature, ingenuity and expert capabilities with hand-tools.

Dorothy Tindal, technical secretary at the Applied Research Laboratory, retired July 1.

She began her career at ARL in 1959 and ended it with a retirement party she said she received the secretarial chair she used for many years. One of her most fulfilling tasks, she says, was helping countless graduate students with their theses.

Mrs. Tindal has six children and plans to spend much of her retirement visiting with them and her grandchildren. She also plans to spend time gardening and doing needlework.

Adjusting to retirement will be no problem for **Evelyn R. Dry**. After almost 21 years of University service and a total of about 38 years in the job market, she's

'ready and really interested' in taking on the position of "domesticated housewife."

With her new "retirement job," Mrs. Dry is "doing everything there is to do" — crocheting, working in her garden, camping and boating. It also gives her a chance to use that newly acquired spare time to go to flea markets, garage sales and auctions where she can look for the antique dishes she collects.

Evening, an accounting clerk for Findlay Dining Hall, worked for Penn State since 1960. She began as a clerk receptionist in Housing and during the late 1960's she transferred to her current position where she was involved with employee payroll and student meal tickets. "I always felt my job was very interesting," notes Mrs. Dry. "That's why you stay with it for 13 years."

One of the things Mrs. Dry enjoyed most about her job was the student contact. "I really enjoyed the students who worked in the dining hall." Many of the students have kept in touch with Mrs. Dry after they've graduated and some who are still in the area are often dinner guests at her home.

Mrs. Dry's husband, James, retired as a console operator in ARL last year. They have three children — Richard, Sandra and Cynthia — and seven grandchildren.

"If there's one thing that really stood out about **Isabell Frantz**," notes Diane

Sublisky, assistant food supervisor for Waring Hall, "it was her excellent relationship with the students. Most of all they knew her by name. . . . They really loved her!"

Mrs. Frantz's presence will be missed not only by the students at Waring Dining Hall, but by co-workers and staff as well. She recently retired after 32 years of service with the University.

Isabell Frantz began her Penn State career as a food service worker at Nittany Halls in 1949 and transferred to her most recent position as a food service worker at Waring Dining Hall in 1969.

Mrs. Frantz and her husband, John, a retired University construction worker, reside on a farm in Port Matilda. They have one son, Harold, one daughter, Lucretia, six grandchildren and five great grandchildren.

Mary E. Kettering, lab attendant at the Hershey Medical Center since Oct. 10, 1970, retired Aug. 22.

Mary Ellen Smith, food service worker in Housing and Food Services, retired Aug. 21 after serving with the University since March 28, 1968.

John J. Hunt, maintenance worker, utility, in the Office of Physical Plant, retired on Aug. 15. He had been a University employee since April 5, 1971.

Staff Vacancies

The following vacancies for positions classified as staff except or staff associate have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (exterior), 865-1387. Applications for these staff vacancies will be accepted until 5 p.m. Sept. 10, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam area veteran.

PROGRAM ASSISTANT, COMMONWEALTH EDUCATIONAL SYSTEM, UNIVERSITY PARK — Task assigned to the Conference Center in planning, organizing, promoting, implementing and administering programs at University Park, responsible for supervising office procedures, exercising fiscal controls and maintaining related records, some evening and weekend work required, summer vacation generally not possible. The minimum qualification requirements are a bachelor's degree plus one to two years' related experience. THIS IS A FIXED TERM 1 POSITION.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, COMMONWEALTH EDUCATIONAL SYSTEM, WILKES BARRE — Coordinate student orientation activities, cultural and social events within the purview of the Student Affairs Office of the Wilkes-Barre Campus. Assist in the planning and coordination of Student Affairs programs. Services to include secondary school relations and career development and placement. Master's degree or equivalent in counseling or in student personnel related field plus at least six months of effective experience in a student personnel activity; or bachelor's degree with one to two years of related experience.

CHILD LIFE SPECIALIST, COLLEGE OF MEDICINE, HERSHEY — Responsible to the coordinator, Child Life Program, for assisting in providing therapeutic, education and recreational activities for pediatric inpatients and clinic patients. Bachelor's degree in child development, elementary education or a related field and one to two years effective experience.

BOOKSTORE MANAGER, PENN STATE BOOKSTORE, YORK CAMPUS — Responsible to the director, Penn State Bookstore-System, for various functions within the York Campus Bookstore, including purchasing, financial records, and retail operation. Determine the quantity of textbooks, associated retail materials, supply items and equipment items for each student registration period and assure that necessary items are available at the proper time. Responsible for controlling the preparation of report of cash receipts and periodic financial reports. Approve advances for payment. Supervise one to two part-time employees. High school education plus one to two years of retail selling experience. Knowledge of retailing principles and experience essential. Management experience preferred.

ASSISTANT WRITER/EDITOR, COMMONWEALTH EDUCATIONAL SYSTEM, UNIVERSITY PARK — Responsible for editing and writing duties required in the production of written

visual or audio instructional material. Requires extensive editing and writing skills and one to two years of effective experience. Bachelor's degree in English or journalism preferred. THIS IS A FIXED TERM 1 POSITION FUNDED THROUGH JULY 1, 1982.

ASSISTANT BUDGET PLANNING ANALYST, OFFICE OF PLANNING AND BUDGET, UNIVERSITY PARK — Assist in preparation of the University's annual appropriation and capital program. Conduct cost analysis, develop and analyze and development of projections of cost and other resource implications of proposed academic or support programs and changes in programs. Assist in preparation of comparative and historical analyses of appropriate indicator data in support of the University's annual five-year planning and budget process. Bachelor's degree or equivalent in business or public administration, accounting, economics or related field plus one to two years of effective experience is required.

JANITOR FOREMAN, OFFICE OF PHYSICAL PLANT, UNIVERSITY PARK — Responsible for the coordination of activities and the first line supervision of assigned employees to accomplish janitorial cleaning, general maintenance, building move activities, and other assignments. Responsible for the quantity and quality of work performed by assigned employees and for the security of buildings and other assigned work areas. High school education or equivalent in experience and training required, plus one to four years of effective experience. Must have supervisory experience or other demonstrated leadership ability. Shift: 5 p.m. to 1:30 a.m. or 11 p.m. to 7:30 a.m.

BUDGET PLANNING ANALYST, OFFICE OF PLANNING AND BUDGET, UNIVERSITY PARK — Conduct assigned research for and assist in the preparation of data analyses, and position papers, review and analyze program budget planning (PBP) submission in preparation for publishing the annual University-wide PBP analyses, prepare comparative and historical analyses of appropriate indicator data in support of the University's annual five-year planning and budget process; assist budget administrators and their staff to interpret and explain procedures, forms and formal definitions, and other requirements for the annual preparation and submission of the program budget planning and related reports. Bachelor's degree or equivalent in business or public administration, accounting, economics or related field and two to three years of effective experience are required. A master's degree or equivalent in any of the above fields may be substituted for one year of effective experience.

FIELD SUPERVISOR, DHIA, COLLEGE OF AGRICULTURE, UNIVERSITY PARK — Responsible to the dean associated for the training and data reporting capacity of the Dairy Herd Improvement Association (DHIA) supervisor. Conduct field training and monitor the work of DHIA supervisors; instruct new supervisors in methods of weighing, and sampling milk; train collection procedures on feed, prices, breeding, etc. Check the accuracy of the scales used for weighing and sampling milk, make corrections to incorrectly reported data. Provide interpretation of DHIA rules and regulations to supervisors and farmers. Provide advice and counsel to DHIA local directors on the conduct of their program; report on supervisor's performance; provide recommendations regarding hiring, or firing, or requiring. Associate degree or equivalent in an agricultural program, preferably dairy science, plus one to two years of effective experience. Knowledge of milk sampling procedures, feed management and data collection techniques related to dairy operations desirable.

Obituaries

Dr. Henry W. Sams, professor emeritus of English and associate dean emeritus of the Graduate School, died Aug. 21 at his home in Boalsburg. He was 69.

Dr. Sams came to Penn State in 1959 as professor of English and head of the English Department. In 1972 he became associate dean of the Graduate School but continued to teach in the English Department. He retired in 1977.

For several years he edited the *Journal of General Education*, published by the Penn State Press. He was the author of numerous papers published in professional journals and a book, *An Autobiography of Brook Farm*.

Dr. Sams received his bachelor of arts and master of arts degrees from Oberlin College and his doctor of philosophy degree from the University of North Carolina. He was a member of the National Council of Teachers of English; the College English Association, of which he was a former national president, and the Modern Language Association.

Dr. George D. Whitfield, associate professor of physics, died Aug. 21 at his home in Linden Hall. He was 80.

Dr. Whitfield, who joined the University faculty in 1965, was internationally known for his research on polaron theory. Since 1973, he spent time at the Middle East Technical University in Ankara, where he collaborated on research in solid state physics.

A graduate of City College of New York, he received a doctor of philosophy degree

in physics from Columbia University. He was co-editor of a book on polarons and excitons, author and co-author of numerous papers in solid state physics, and recently had been working on a book on polaron physics.

Frances E. Fogle, secretary and administrative aide in the College of Science since Sept. 1, 1952, died Aug. 21 at the age of 61.

Andrew O. Myers, truck driver in Applied Research Lab from 1945 to 1971, died Aug. 19 at the age of 72.

Royal F. Overlock, who retired in May 1970, died Aug. 16 at the age of 73. He was assistant manager of the Nittany Lion Inn from 1934 to 1958 and served as office manager from 1958 until his retirement.

Ralph W. Sweeney, group leader and greenhouse worker in the College of Agriculture from 1926 until his retirement in 1962, died Aug. 14 at the age of 84.

Linda B. Hulslander, Bradford County associate Extension agent, died Aug. 13 at the age of 33. She had been employed by the University since June 16, 1969.

Dorothy Emerly, secretary and budget clerk in the College of Education from 1961 to 1976, died Aug. 7 at the age of 67.

Joseph Moslak, janitor in Physical Plant from 1962 to 1975, died Aug. 5. He was 68.

Gallu, Borgnine discuss 'An Offer' Penn State couldn't refuse

Sam Gallu is a big-time playwright.

As the author of the mid-'70s smash, *Give 'Em Hell, Harry*, he could have had his pick of places to open his new one-man drama, *An Offer You Can't Refuse*, which stars Ernest Borgnine.

An offer to stage the play for the first time would have been difficult, indeed, for most theaters to refuse.

They never had a chance.

The show makes its world debut here, in Eisenhower Auditorium, at 8 p.m., Saturday, Sept. 12.

"It's marvelous to bring professional people here so these students — who live in an ivory tower, if you'll excuse the expression — can really and truly come into contact with people who are out there doing it," Mr. Gallu says.

He means it, too: In addition to assisting with the Penn State debut production, a group of University students will travel with the show during a nine-month, all-across America tour.

Mr. Gallu is a Penn State alumnus, Class of '40, who enjoys sharing a little of himself with his alma mater.

For that reason, the Penn State production of *An Offer You Can't Refuse* will benefit more than just those students directly involved and those who go to see it. Proceeds from the show will support the Simeon and Elizabeth Gallu Scholarship Fund, established by the playwright in 1976 to assist University arts majors.

Mr. Borgnine, for whom Mr. Gallu expressly created the play, shares the playwright's enthusiasm for sharing experience with aspiring Penn State students.

He also is impressed with Penn State's theater facilities.

"When I saw the facilities here, all the buildings that comprise this great University, I was most pleasantly surprised," Mr. Borgnine says. "I never expected a theater like Eisenhower — and not only that, but the Playhouse and the Pavilion."

Joking about the University's somewhat isolated location, Mr. Gallu recalls that

"Ernie didn't know where in the world I was bringing him, but I told him Penn

Sam Gallu '40 and Ernest Borgnine take a rehearsal break in Eisenhower Auditorium, scene of the Sept. 12 world premiere of Mr. Gallu's new one-man drama starring Mr. Borgnine.

State has all these theaters, all these fabulous facilities."

"I'll tell you, it's the end of America," Mr. Borgnine says, "but if this is what the end of America is like, I love it."

"It's a boon, a godsend for us," the actor continues. "Not only do we get to work in a tremendous theater like Eisenhower, we also get to use the facilities of the Playhouse and the Pavilion so we can be knowledgeable of what we're going to do on a thrust-out stage and in theater-in-the-round."

"This is important," adds Mr. Gallu, "because in Chicago we play in the round — and, Chicago is a very important date for us, a two-week run in a beautiful theater."

But whether in Eisenhower, the Playhouse or the Pavilion, Messrs. Gallu and Borgnine are committed to achieving one end: a powerful, thought-provoking debut production, followed by a tour of the same ilk.

"The play is a dissertation on life in these United States, as seen through the eyes of a capo mafioso," Mr. Borgnine says.

He explains that during the play, he plays three characters — a Mafia don, the son's father (in a flashback) and the don's son — all of whom vividly depict, from the perspective of the Mafia, aspects of American society.

"Things that are said in the play are true — there's no fiction," Mr. Gallu notes. "For me, the key phrase in the play is when Ernie says, *Society works against itself and as long as it does it works for me. Show me a man who lives by the Ten Commandments and I'll show you a man who lives a life he despises.*"

Mr. Gallu says that Mr. Borgnine's characters show how people are unwittingly "used by the establishment," including life insurance companies, savings and loan associations, lawyers, doctors and oil companies.

"I wrote the play as sort of an editorial piece, about the things that are bothering me and bothering a lot of other people in this world," the playwright adds.

"This play, in my estimation, is a great piece of literature," Mr. Borgnine says. "I've only had one other script that was so

well written it just flowed, just gave off itself, and that was in a picture called *Marty*."

Mr. Borgnine, in referring to *Marty*, recalls that it was this script by Paddy Chayefsky — about a fat, lonely butcher named Marty Piletti — that in the mid-'50s won him an Academy Award and launched him to stardom.

"*An Offer You Can't Refuse* is only the second script I've ever had that is so easy to work with, understand and appreciate," adds the actor.

Mr. Borgnine's comments are well taken: Since his graduation from Penn State — where he was active in the Glee Club, the Varsity Quartet, Thespians and choir — Mr. Gallu has written, produced and directed many top-rated films and television shows.

He headed Gallu Productions, Inc., based in Hollywood, which produced a total of some 275 programs for the networks, including *Navy Log*, *Behind Closed Doors*, *Border Patrol* and *Blue Angels*.

Give 'Em Hell, Harry, based on the life of President Truman, was Mr. Gallu's first drama, and in 1978, he launched a revival of the play at Penn State. He has, in recent years, maintained a close working relationship with the College of Arts and Architecture and its Department of Theatre and Film.

Appreciative of his efforts in behalf of the University, Penn State has honored Mr. Gallu as an Alumni Fellow and as a Distinguished Alumnus.

But as it's Mr. Gallu's love for Penn State that brings him back.

"It's an exciting environment," he says. "I've bought some land up here in the mountains, overlooking the whole valley. Whether I'm going to build there or not, I'm not sure."

"But as I was telling Ernie, I don't want to go to a senior citizens home; I'd like to be around a university, where I can see kids and use the library and go to an Artists Series and feel like I'm part of something that's exciting and growing and real."

As Mr. Borgnine says, "If this is what the end of America is like, I love it."

Listening system in Eisenhower enhances live performances for hearing impaired

The hearing impaired can now enjoy live performances in Eisenhower Auditorium — thanks to the installation of a new Infrared Listening System.

The project was first proposed by William E. Crocken, director of auditorium management, who encountered the system in a New York theater last year. The University's Office of Gifts and Endowments agreed to underwrite costs of the project using undesignated funds.

Registration open for Saturday art classes

Registration for the Saturday Morning Art School classes at the University is underway and will continue until classes are filled. Art classes for children, teenagers and adults will be held from 9 to 11 a.m. Saturday, Sept. 19, and continue every Saturday throughout the Fall Term.

Classes are given in the studio and art classrooms of the School of Visual Arts in three locations, with special classes in the art galleries and museums on campus. Since classes are limited in size, early registration is advised.

Tuition for all courses is \$10 per child and \$12 per adult, which covers the costs of art materials. For information on the courses being offered and registration, contact Ruth Barner at 865-6579 daily.

The Infrared Listening System was developed by Senneheiser Electronics in Germany. Users wear headsets which pick up invisible infrared sound broadcast from emitters located in the auditorium or theater. Some headset models are designed for use with one or two hearing aids, and users can hear well no matter where they are sitting in the house.

The Senneheiser outfit will be tied into Eisenhower's regular sound system — the same signal that goes through the dressing rooms and other areas in the Auditorium feeds the emitters.

In the past, some theaters have provided FM-wired aids to patrons with hearing difficulties. However, these require jacks and plugs, are often unreliable, and are located only in a specific seating section of the theater. In addition, listeners often were subjected to interference from CB radios and security vehicles. Infrared sound differs from broadcast frequencies, so there is no chance of outside interference.

Eisenhower's system was installed by Richard Fitzgerald, president of Sound Associates, Inc., of New York, which introduced the same unit into several Broadway theaters, the Vivian Beaumont Theatre at Lincoln Center, the Eisenhower Theatre at the John F. Kennedy Center in Washington, and the Dallas Theatre Center.

The initial order for Eisenhower Auditorium consists of 20 headsets, including one for use with one hearing aid

Diane Bloom, accounting aide in Eisenhower Auditorium, models an Infrared Listening System headset.

and one for use with two. Headset rental will be 50 cents per performance.

Mr. Crocken believes that the Infrared Listening System will bring another dimension to the Eisenhower experience, but he doesn't plan to stop with the University's largest auditorium. Eventually, he'd like to see the system installed in Schwab Auditorium, the Pavilion and Playhouse Theatres and the Music Building Recital Hall.

"We'd like to make all the University's performing arts facilities accessible to the hearing impaired," he says.

Josef Svoboda show is coming to Zoller

An exhibit of representative work by Josef Svoboda, chief designer and technical director of the National Theatre in Prague, Czechoslovakia, will be on display here Sept. 8-26 in the Zoller Gallery of the Visual Arts Bldg. and the Theatre Arts Gallery, Room 132 Arts Bldg.

The exhibit has been selected from a collection of 137 photomurals and seven models on loan from Czechoslovakia by arrangement with the Center for Russian and East European Studies of the University of Michigan.

It is being presented by the School of Visual Arts and the Department of Theatre and Film in collaboration with the Institute for the Arts and Humanistic Studies.

Described by *Tune* magazine as "the most imaginative stage designer working anywhere today," Svoboda has dazzled the theatre world with his mastery of sophisticated modern technology sensitively applied to theatre design.

The exhibit will officially open with a lecture by Dr. Jarka Bunian, professor of dramatic art at the State University of New York at Albany, at 8 p.m. Thursday, Sept. 10, in Room 105 Forum Bldg.

Dr. Bunian is the author of two books on Svoboda's work, the latter of which, based on Svoboda's designs for the operas of Richard Wagner, is to be published early next year. He will speak on "Josef Svoboda — Theatre Artist in an Age of Science."

Penn State Intercom

Former President Eisenhower addresses annual Encampment

A former Penn State president returned to the University last week to speak to students, faculty members and administrators at the annual fall Encampment at Stone Valley.

Dr. Milton S. Eisenhower, who was Penn State president from 1950 to 1956, told the gathering that higher education faces two challenges in the 1980s.

Chiding university faculties for being too "theoretical" to effectively lend their expertise to the problems of our time, he called for a reversal of that trend.

Dr. Eisenhower, whose brother, Dwight, was U.S. president from 1952 to

1960, also said it was necessary for colleges and universities to develop in their students a "philosophic framework" that will lead to a desire for life-long learning.

Turning to government, he said U.S. presidents should be limited to one six-year term in office and that the tenure of Congressmen should be limited by law.

"The problems we face are so complex and the solutions often so unpopular politically," he said, "that solutions will not come from those who make a career of government elected service."

"Often, the only way to succeed in elective careers is to stand for what is popular rather than for what is right."

Dr. Eisenhower argued that limited terms of public service would allow representatives to free themselves of the influences of the 2,500 full-time lobbyists who he said "haunt the halls of Congress."

After leaving Penn State in 1956, Dr. Eisenhower served as president of Johns Hopkins University through 1971. He previously had been president of Kansas State University.

In a governmental career that included service to eight presidents, he was special ambassador to Latin America for eight years and served on a dozen presidential commissions, five of them as chairman. Among these was the President's Commission on the Causes and Prevention of Violence in 1968-69.

His books have included the best seller *The Wine is Bitter and The President is Calling*, an assessment of the eight presidents he served, published in 1974.

It's possible that this 150-year-old white ash tree at Rock Springs Agriculture Research Farm is the largest ash in Central Pennsylvania. Horticulture worker Albert L. Summers is shown leaning against a branch that runs parallel to the ground for 60 feet.

Professor's research focuses on 'travelling in problem space'

Editor's note: This article is one in an on-going series in which a faculty member describes work in progress.

By Peter Gould
Professor of Geography

Why would someone in that oxymoron of the human sciences, with an unabashed passion for methodology, have such a deep concern for certain aspects of contemporary philosophy and

mathematics? Not so surprising, really, if you think of the way these old fields of human inquiry have traditionally asked questions of very general concern. And perhaps even less surprising if you think of the way the human sciences lie, almost by definition, between the areas of inquiry we have traditionally partitioned into the *humanities* and the *sciences*. What intellectual problems does such an "in-between" position pose? Are the human sciences to be stretched and racked

between the two? Or are they bridges that can make the two pieces whole again?

One of the deep and subtle problems facing the human sciences is that they have borrowed most of their mathematics from classical areas of the physical and biological sciences. The calculus, linear algebra, and statistics form the bulk of the mathematical approaches in the human sciences today. But what we forget, or simply ignore out of ignorance, is that these formal descriptive languages originally arose out of the subject matter — the actual problems — of these older scientific fields.

For most of the past three hundred years, the "natural philosophers" — the people we now split up into physicists, chemists, and so on — were in close touch with the mathematicians, or were often highly creative mathematicians themselves. Newton, Leibnitz, Gauss, Hamilton . . . many, in a long and distinguished list, created mathematics to describe, to structure, and to give coherence to the physical world observed in their day. The last thing they did was to borrow an existing mathematical structure, and then force their rich observations about the world into such a constrained, *a priori* mold.

Yet this is precisely what the human sciences do. Instead of reflecting carefully upon their own descriptive, and often qualitative, problems that arise out of rich human materials, they unthinkingly grab

great chunks of classical mathematics that described the physical world of the nineteenth century, and then force their human observations onto these highly constrained, and usually quantitative, structures. Far from being generated by the human materials themselves, the classical forms of mathematics often act as filters that destroy important information about the human world.

As for statistics, many human scientists, and perhaps even some statisticians, appear to believe that these approaches embody the "scientific method" itself, ignoring the fact that quite extraordinary progress was made for three hundred years before statistical methods even appeared on the scene. Add such a conceptual aberration to libraries of seductive computer programs, and you have a major problem on your hands — particularly if you are trying to teach!

If science — any science, physical, biological or human — is the telling of a good story to gain the temporary assent of the reader (although a special sort of a story-telling that is always contingent and open to revision), then many of the stories in the human sciences are essentially *structural*. It is extraordinary how all fields of human inquiry use the world *structure*: we speak intuitively about the structure of a molecule, a novel, a bridge, a university, a region, a Supreme Court, an economic system, a sonnet, a system of health

Penn Staters

Two faculty members have received Fulbright Awards under the Mutual Educational and Cultural Exchange Program, according to an announcement from the U.S. International Communication Agency (USICA) and the Board of Foreign Scholarships.

Dr. Rodney A. Erickson, associate professor of geography, will conduct research on employment in the United Kingdom and the United States within a metropolitan context at the University of Manchester, United Kingdom.

Dr. Keith E. Nelson, associate professor of psychology, will conduct research on input effects on first and second language acquisition at Stockholm University, Sweden.

The awards were among more than 500 Fulbright grants for university teaching and advanced research in more than 100 countries for 1981-82.

Dr. John D. Martz, head of the Department of Political Science, spent 12 days last month lecturing and giving seminars in Lima, Peru; Bogota and Barranquilla, Colombia; Maracaibo and Caracas, Venezuela.

He was invited by the U.S. International Communications Agency to discuss various aspects of U.S. policy toward Latin America, especially as it pertains to the Reagan administration, to scholars and students, diplomats, and military officers in the three countries.

George L. Mauner

Dr. George L. Mauner, professor of art history, and **Dr. William R. Schmalstieg**, head of the Department of Slavic Languages, have been named Fellows of the Institute for the Arts and Humanistic Studies.

Dr. Mauner has been graduate officer of his department since 1967. His work on the *Nabis* and on the *Giacometti/Amiet* family are the major sources of information on both subjects. His book on Manet is a significant contribution to the study of a major painter.

Dr. Mauner has prepared and initiated exhibitions of the *Giacometti/Amiet* family

William R. Schmalstieg

in the United States, and of *Cuna Amiet* and the *Die Brücke* expressionist group in Zurich and Berlin.

Dr. Schmalstieg, head of the Department of Slavic Languages since 1969, has continued research and publication in Baltic and Slavic linguistics. The high point of his scholarship is *Indo-European Linguistics: A New Synthesis* (1980).

One of two leading specialists in the Prussian language, Dr. Schmalstieg is president-elect of the Association for the Advancement of Baltic Studies.

Promotions

Staff Exempt

Michael J. Breslin to director of campus relations at Capitol.

Alan J. Grill to assistant to the dean, personnel and administrative services in Education.

James H. Schmidt to senior medical illustrator at Hershey.

Mary Ann Solic to conference coordinator in Continuing Education.

Staff Non-Exempt

Andrew J. Lewis to research technician at Hershey.

Stephen J. Ressel to research technician at Hershey.

Philip G. Stark to critical care monitoring technician at Hershey.

Clerical

Donna K. Case to clerk, receptionist in Undergraduate Admissions.

Karen L. Gimbir to secretary B at Hershey.

Dorothy J. McClintock to insurance clerk in Controller's Office.

Marian J. Reed to secretary A in Earth and Mineral Sciences.

Technical Service

Thomas R. Carr to maintenance worker, utility at Delaware County.

Beth L. Pugh to animal caretaker A at Hershey.

Appointments

Elizabeth R. Baker as assistant professor of obstetrics and gynecology at Hershey. A.B., M.D., Duke U. Clinical instructor in obstetrics and gynecology, Medical U. of South Carolina.

Christine H. Comstock as assistant professor of obstetrics and gynecology at Hershey. B.S., U. of Michigan; M.D., U. of Chicago. Resident in obstetrics and gynecology, Hershey.

Bernard Gordon III as assistant professor of polymer science at University Park.

B.S., California Polytechnic State U.; Ph.D., U. of Arizona. Chemist, Ethicon, Inc.

Michael Udow as assistant professor of percussion at University Park. B.Mus., M.Mus., D.M.A., U. of Illinois. Assistant professor, Conservatory of Music at the U. of Missouri at Kansas City.

Charles W. Whitney as assistant professor of obstetrics and gynecology at Hershey. B.A., Alfred U.; M.D., Cornell U. Medical School. Resident, fellow in gynecologic oncology, Hershey.

Staff Development

Twelve previous graduates of the Basic Supervisory Management Course recently completed the eight sessions which comprise the Supervisory Management II Course. They were:

Bruce Adams, producer-director, Continuing Education; **Donald Bettleyon**, foreman, electronic services, Physical Plant; **Anthony Ciccarelli**, foreman, electronic services, Physical Plant; **Diana Dean**, executive producer-adult instruction, Continuing Education; **Erma Hamilton**, assistant housekeeping supervisor, Housing & Food Services; **Patricia Meyer**, data entry assistant programmer, Management Services;

Rose Miller, associate housekeeping supervisor, Housing & Food Services; **William Miller**, Jr., assistant director of broadcasting for the arts, Continuing Education; **Jean Selvaige**, secretary A, Planning & Budget; **Howard Sharpless**, supervisor of maintenance, Housing & Food Services; **Margaret Shaw**, housekeeping supervisor, Housing & Food Services; **Nancy Watson**, assistant housekeeping supervisor, Housing & Food Services.

The 30 employees who completed the eight-week Writing Skills for Secretaries/Clericals program were:

Carol Barner, clerk, data processing A, Physical Plant; **Vera Carson**, clerk typist A, Earth & Mineral Sciences; **Linda Cartright**, secretary C, Education; **Rebecca Dreibelbis**, accounting clerk, Controller's Office; **Lisa Fayewicz**, clerk, records A, Engineering; **Irene Ferguson**, secretary B, Liberal Arts; **Lisa Harris**, clerk, stock control A, Physical Plant; **Harriet Hillard**, senior clerk, College Work Study Program, Student Administrative Services; **Diane Hower**, secretary C, Health, Physical Education & Recreation; **Deborah Hoy**, secretary C, Liberal Arts;

Kathy Jones, clerk typist A, Physical Plant; **Beverly Keen**, secretary C, Agriculture; **Stacey Kelley**, secretary C, Health, Physical Education & Recreation; **Mary Kling**, clerk typist A, Physical Plant; **Karen Knisely**, clerk typist A, Agriculture; **Bonnie Moffatt**, secretary B, Continuing Education; **Janet Neff**, senior clerk, Management Services; **Mildred Poage**, student records examiner, Education; **Connie Putnam**, head clerk, service desk, Physical Plant; **Kathy Silver**, secretary C, Continuing Education;

Mary Jo Spicer, data processing clerk, Physical Plant; **Linda Stephens**, secretary B, Physical Plant; **Anna Strouse**, secretary B, Health, Physical Education & Recreation; **Paula Tutokey**, clerk, production A, Housing & Food Services;

(Continued on page 4)

Retirements

Steve P. Pastir Sr., a maintenance worker with Physical Plant, retired Sept. 5. He had been employed by the University since Dec. 1, 1966.

Emily Diehl, budget clerk at Hershey, retired Sept. 1 after serving with the University since June 17, 1968.

Caroline B. Corage, food preparer in

Housing and Food Services since Feb. 27, 1962, retired Sept. 1.

Rita M. Sanker, secretary in Earth and Mineral Sciences, retired Sept. 1 after being employed by the University since Sept. 16, 1963.

Leroy M. Siebenrock, maintenance supervisor in Housing and Food Services, retired Sept. 1 after serving the University since May 21, 1971.

Partings

Daniel M. Poore, associate professor of health and public administration at the Capitol Campus, left the University Sept. 1. He had been a member of the staff since July 1, 1970.

Dr. Richard A. Anthes, professor of meteorology, left the University Sept. 1 after serving since Aug. 1, 1971.

Theresa M. Houser, secretary in Arts and Architecture, left the University Sept. 1. She had been a member of the staff since Dec. 1, 1968.

Sarah A. Thompson, assistant professor of physical education, left the University Sept. 1 after serving since Sept. 1, 1971.

Michael A. Ondik, Jr., assistant herdsman, left the University Aug. 1. He had been on the staff since May 16, 1965.

Donald P. Wharton, acting head librarian and assistant professor at Altoona, left the University Aug. 1 after serving since Sept. 1, 1970.

Patricia A. McTarnsey, assistant professor in Health, Physical Education and Recreation, left the University June 1 after serving as a faculty member since Sept. 1, 1961.

Obituaries

William H. Reiber, former director of operational services in Housing and Food Services, died Aug. 31.

He joined the University staff in 1949 as a food cost and analysis clerk. He then became supervisor and in 1961 manager of the business operations for Housing and Food Services.

Mr. Reiber was named assistant director of housing in 1971 and was appointed director of operational services in 1975. He retired April 1, 1980.

He attended Temple University. For 20 years he served on the emergency first aid squad for the Penn State home football games.

R. Marian Dillman, secretary in the College of Education, died Sept. 1 at the age of 53. She had been a member of the University staff since April 1, 1974.

Carpooler

David B. Keller Jr. would like to share driving from Lewistown. He works from 7:30 a.m. to 4 p.m. Call either (717) 248-4610 or 863-0781 (ask for David Keller Sr.).

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Sept. 11-20 Special Events

Friday, Sept. 11

Board of Trustees meeting, Faculty Bldg. Commonsplace Theatre, 7 a.m. and 9:15 p.m., Room 112 Kern.

Robeson Cultural Center, Rufus Harley and his Combo — jazz bagpipes, 8 p.m., Schwab Auditorium.

GSA Resource Day, 11:30 a.m., Kern Lobby.

Sports: soccer vs. Loyola (MD), 7:15 p.m.

Saturday, Sept. 12

World Premiere, *The Mafia Company, An Offer You Can't Refuse*, by Sam Gallo, starring Ernest Borgnine, 8 p.m., Eisenhower Auditorium.

France-Cinema, Molinaro, *La Cage aux folles*, 7 and 9 p.m., Room 112 Kern.

68th Annual Horticulture Show, 10 a.m.-8 p.m., flower gardens along University Drive.

Free Admission.

Sports: football vs. Cincinnati, 1:30 p.m.

Sunday, Sept. 13

HUB Craft Center classes begin.

68th Annual Horticulture Show, 9 a.m.-4 p.m., flower gardens along University Drive.

Free Admission.

Monday, Sept. 14

France-Cinema, Molinaro, *La Cage aux folles*, 7 and 9 p.m., Room 112 Kern.

Nursing Consultation Center, "Families with Mental Health Concerns" support group, 7:30 p.m., Consultation Center. Continues each Monday during the term.

Tuesday, Sept. 15

Penn State Internationale Dancers meeting, 7-9 p.m., Room 132 White Bldg.

Wednesday, Sept. 16

Commons Concert, Buffalo Chipkickers, noon.

Kern Lobby.

Nursing Consultation Center, "Coping with Multiple Sclerosis," 3:40 p.m., Consultation Center.

Campus Colleagues social hour for women faculty and staff members, 4:30-6:30 p.m., Colonial Room, Nittany Lion Inn.

Alard String Quartet Concert, 8:30 p.m., Music Bldg. Recital Hall.

Sports: baseball vs. Juniata, 3 p.m.; soccer vs. West Chester, 7:15 p.m.

Thursday, Sept. 17

Late registration deadline.

Add deadline.

Graduate Commons Plant Sale, 10 a.m., Kern Lobby, through Sept. 18.

Penn State Internationale Dancers meeting, 7-9 p.m., Room 132 White Bldg.

Friday, Sept. 18

Commonsplace Theatre, *Ordinary People*, 7 and 9 p.m., Room 112 Kern.

Sports: women's volleyball vs. Georgetown, 8 p.m.

Saturday, Sept. 19

France-Cinema, Beresford, *Breaker Morant*, 7 and 9 p.m., Room 112 Kern.

Saturday morning art classes begin, 9 a.m., Room 101 Arts Bldg.

Josef Svoboda's photomurals and models are exhibited in Zoller Gallery through Sept. 26

Basic sailing course begins, 9:30-11:30 a.m., Stone Valley Recreation Area. Class continues Saturday mornings through Nov. 7.

Information and registration, 863-0762.

Sports: women's volleyball, Penn State Invitational; women's tennis vs. Syracuse, 10 a.m.; men's cross country vs. Alumnus, 10:30 a.m.; women's cross country, Lady Lion Invitational, 11 a.m.

Sunday, Sept. 20

Commonsplace Theatre, *Ordinary People*, 7 and 9 p.m., Room 112 Kern.

Basic sailing course begins, 9:30 a.m.-12:30 p.m., Stone Valley Recreation Area. Course continues Sundays through Nov. 8.

Information and registration, 863-0762.

Sports: women's tennis vs. Colgate, 10 a.m.; baseball vs. Mansfield (DH), 1 p.m.

Seminars

Friday, Sept. 11

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Laboratory. Dr. Joe Campagna, Naval Research Lab. Chemistry Division, Washington, D.C., on "High Performance SIMS."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Charles L. Hosler, professor of meteorology and dean, College of Earth and Mineral Sciences, on "Meteorology from the User's Point of View."

Monday, Sept. 14

English Colloquium, 8 p.m., Room 101 Kern. Jonathan D. Culler, professor of English and comparative literature, Cornell, on "The Reader in Contemporary Criticism."

Thursday, Sept. 17

Ceramic Science 500 Seminar Series, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. W. B. White, professor of geochemistry, on "Sulfide Ceramics for Optical Window Applications."

Economics Seminar, 3 p.m., Room 101 Kern. Mordechai E. Kreinin, professor of economics, Michigan State, on "International Competitiveness of the U.S. Auto and Steel Industries."

Physics Colloquium, 3:50 p.m., Room 445 Davey Lab. D. Edwards, Ohio State University, on "Spin-Polarized Hydrogen."

Friday, Sept. 18

Seminar sponsored by the Center for the Study of Higher Education, German and Political Science Departments, 10:30 a.m., Room 101 Kern. Professor Gerd Gressner, M.D., president, University of Kiel, Germany, on "German Universities Today."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Pierce Lewis, professor of geography, on "Images of the American Landscape: Art as a Reflection of National Personality."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m.

Slavic Art Exhibition: Dorothy Behringer, eggery, Jim Dupree, paintings, Print Exhibition and Sale, through Sept. 11; Janis Mershon, weavings, opens Sept. 14.

Museum of Art, open 11 a.m.-4:30 p.m.

Closed Mondays: Tours, Sundays, 1:30 p.m. Hemline, Neckline, Streamline: Women's Fashions 1890-1940 from the collection of Beverly Birks. African Sculpture from the Museum's collection. An Overview of the Permanent Collection.

Pattee Library: A Commonwealth Campus: Yesterday, Today, and Tomorrow, East Corridor Gallery. Naomi Gallagher, paintings, through Sept. 18; Travels in Greece: Ink Wash Drawings by Wendy Snetsinger, opens Sept. 18; Lending Services Lobby. Bess Ganglewski, relief sculpture, opens Sept. 16. Second Floor, East. Exhibition of contributions by new Fellows, Institute for the Arts and Humanities.

Success, through Sept. 15. Highlights from the Allison-Sheley Collection, opens Sept. 11.

Rare Books Room.

Visual Arts Gallery: open 9 a.m.-5 p.m., Monday through Friday. Saturdays and Sundays, noon-5 p.m.

Josef Svoboda, work in theatre design, through Sept. 26.

The Alard Quartet in New Zealand during summer residency

Alard Quartet opens season Sept. 16

The Alard String Quartet will open its 1981-82 campus season with a concert at 8:30 p.m. Wednesday, Sept. 16, in the Music Bldg. recital hall.

Mozart's String Quartet in E-Flat Major, K. 428, will open the group's program. The piece is one of six quartets the composer wrote between 1782 and 1785 in homage to his friend Haydn. The six quartets are often considered some of the best examples of Mozart's genius.

The First String Quartet by Czech-born composer Karol Husa, a Pulitzer Prize winner in music and Kappa Alpha Professor at Cornell University, has been selected for the program's second piece. Mr. Husa studied at the Prague Conservatory, the Paris National Conservatory and the Ecole Normale de Musique, where his teachers included Arthur Honegger and Nadia Boulanger.

His First String Quartet was composed for the Smetana Quartet when Husa was in Paris in 1947, and the piece was premiered by that group in Prague one

year later. The Alard Quartet will be recording the Husa piece for Leonardo Records this fall.

The Alard Quartet will close its concert with Maurice Ravel's String Quartet in F Major, the only string quartet Ravel wrote. Since being published in 1910, it has become one of the most highly praised works in quartet literature.

The Alard String Quartet, composed of violinists Joanne Zagst Feldman and Donald Hopkins, violist Raymond Page and cellist Leonard Feldman, spent the summer as the quartet-in-residence at the University of Canterbury in New Zealand. The group was received with enthusiasm in the area, and a reviewer in the Christchurch newspaper "The Press" states that the musicians "have collectively perfected the art of ensemble playing; theirs is a flawless melding of four sounds."

The School of Music is sponsoring the free Wednesday night concert, and the public is welcome.

Professor's research

(Continued from page 1)

administration, a chess game . . . the lists literally endless. Yet making such an intuitive notion well-defined and operational is often a very difficult and intellectually demanding task.

Many of our structures are not quantitative at all, but consist of sets of words with specific and well-defined meanings linked and connected together in complex, qualitative, and actually multidimensional, ways. There are bodies of modern mathematics — algebras and topologies, and mixtures of the two — that describe connections between elements of sets, and give us a geometrical picture of the things we are trying to describe.

But these geometric descriptions are our own creations, resting on clear, and above all shared, definitions in language — definitions of the sets of things themselves, and definitions of the relations between these sets and their elements.

These are tasks that the philosopher Jürgen Habermas would say are characteristic of the *technical* perspective. But the real question is what do they *mean*? And here the interpretive task begins, the perspective Habermas has termed the *hermeneutic*.

The interpretation of structures, the ascription of meaning to them, is not something generally settled in the human sciences by the critical experiment, but by reasoned discourse on the evidence. Yet

because the structures are human, are defined by humans, and have meaning for humans, an interpretation may always be informed by the values and particular ideology of the interpreter — *ideology* defined in the careful sense of "unexamined discourse". And so a third perspective is raised, the *emancipatory*.

If we live in a time when it is possible to "get on the outside looking in," we can raise questions of changing the structures, changing the multidimensional geometries in which we live our lives. The human scientist does not deal with the apparently stable and invariable spaces of the physical scientist, but in spaces and geometries whose *structure* can be changed.

After all, just think of changing the structure of a university. What is it but altering relations between elements of sets to let things happen better according to certain sets of values!

And so the unabashed methodologist talks to colleagues in physical education about the structure of team games, to people in art history about "color relations", to students in health administration about the structure of health care delivery systems, and to friends in geosciences about the structure of foraminifera classifications — and in his spare time he investigates the structure of Portuguese agriculture, rural communication, international TV programs, and the tales of Italo Calvino. Travelling in problem space tends to be more exciting these days than journeys in geographic space.

Those who successfully complete the course will receive a Stone Valley Skipper's Card.

A second class will meet each Sunday from 9:30 a.m. to 12:30 p.m. Sept. 20 through Nov. 8. Enrollment also will be limited to 16 persons. The course fee is \$40 per person. Persons who successfully complete the course will receive an American Red Cross Basic Sailing Certification and a Stone Valley Skipper's Card.

Channel 3 are: 7:30 p.m. Sunday, Sept. 20; 10:30 p.m. Saturday, Sept. 26, and 10:30 a.m. Sunday, Sept. 27.

"Teaching America to Sing" was taped last summer. It follows students through demanding sessions with the 80-year-old song leader and long hours of singing and dancing which culminate in a public concert with "Rhythm of Life" and other Waring songs. The documentary was produced by Bruce Adams.

Jazz artist Rufus Harley presents Schwab concert

Accomplished jazz saxophonist Rufus Harley, probably better known as the first professional jazz bagpiper player, will be in concert at 8 tonight in Schwab Auditorium.

Mr. Harley and his trio are sponsored by the Paul Robeson Cultural Center as part of its fall term activities to welcome new and returning students. Tickets for the concert are on sale for \$2 at the Hetzel Union Building and the Paul Robeson Cultural Center.

The manager of the Employment Division is responsible for reviewing the wording of all help wanted advertisements, so that such advertisements are in compliance with State and Federal legislation and a standard of public relations is maintained (See PS-33, Help Wanted Advertising in the University Policy Manual).

Anyone wishing to place classified advertisements for faculty or staff vacancies should contact Robert L. Kidder, manager, Employment Division, 865-1387 (Network number 475-1387) before taking any formal action.

Housing and Food Services has new restaurant complex in HUB

Housing and Food Services has opened its new restaurant complex, located in the southwestern corner of the Hetzel Union Building formerly occupied by the Lion's Den.

"We're very pleased with the excellent quality of work and the high level of cooperation on the part of the Physical Plant staff and our staff in making the transition," says Richard Allan, assistant director of Food Service.

The "transition," he explains, included closing the Lion's Den, constructing the new complex, and transferring equipment to the new facility from the Terrace Room, which has been closed.

"Everything has gone very smoothly; we opened on schedule (Aug. 31) and are anticipating being in full operation by the middle of October," he adds.

The new complex consists of four distinctive areas separated by half walls and full walls, but sharing one general space illuminated by full "window walls." Open now are the Fast Break, Food for Thought and the Greenhouse; the Founders Room is in the final stages of construction.

"We integrated each area's dining decor with the theme of the serving area," Mr.

Allan notes. Hence, the Fast Break area — for quick breakfasts and lunches — has a sports, "snack-bar" motif; the Greenhouse Area reflects its soup and salad bar menu with potted plants and a garden, patio motif; and the Food for Thought area reflects its hot food menu with a quiet, carpeted motif highlighted by natural burlwood paneling and butcher block tables.

The Founders Room features the most elegant decor — wood paneling, all natural wood furniture and a parquet floor.

Hours of the three restaurants now open, Monday through Friday, are:

— The Fast Break, breakfast from 7:30 to 9:30 a.m.; lunch from 10:30 a.m. to 2:30 p.m.

— Food for Thought, lunch from 11:30 a.m. to 1:15 p.m.; dinner from 5 to 6 p.m.

— The Greenhouse, lunch from 11 a.m. to 1:30 p.m.; dinner from 5 to 6:30 p.m.

The Founders Room — the more formal atmosphere of which will include table service for entrees, beverages and desserts, and self-service for the soup and salad bar — will initially serve from 11:30 a.m. to 1:15 p.m. when it opens.

Trustee's slides show 'The Faces of Tibet'

"The Faces of Tibet," a color slide show of the photography of H. Thomas Hollowell, will be presented at 7:30 p.m. Monday, Sept. 21, in the Auditorium of the Materials Research Laboratory.

Mr. Hollowell, a member of the University's Board of Trustees and chairman of the board of Standard Pressed Steel Co., Jenkintown, will show slides taken on a trip to Lhasa, Tibet, in November, 1980.

An avid photographer, Mr. Hollowell has taken several trips to various parts of the world on photographic safaris.

The Tibet trip, long delayed by China's closed door policy, fulfilled the third and last leg of Mr. Hollowell's lifetime ambition: to photograph Mount Everest,

the Taj Mahal, and the Potala, palace and Buddhist monastery of the exiled Dalai Lama.

The slide presentation, open free to all interested persons, is being presented at a meeting of the State College Color Slide Club.

Staff development

(Continued from page 2)

Beverly Watson, clerk, billing A, Physical Plant; Shirley Wegener, secretary C, Continuing Education; Janet White, secretary C, Business Administration; Nancy Winnett, secretary C, Undergraduate Admissions; Devra Wolfe, employee benefits clerk, Personnel Administration; Margaret Zimmerman, secretary C, Health, Physical Education & Recreation.

Staff Vacancies

The following vacancies for positions classified as staff employee or staff nonemployee have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotional apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. Sept. 17, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PUBLIC INFORMATION OFFICER, WILKES-BARRE CAMPUS Responsible for establishing and coordinating a total external relations program including relationships with newspaper, radio, television, advisory board, alumni, community leaders and organizations. Bachelor's degree in journalism, English or communications or equivalent and at least two years of experience in journalistic writing or public relations are required.

SYSTEMS AND APPLICATIONS PROGRAMMER, COLLEGE OF MEDICINE, HERSHEY Responsible to the manager of Programming and Systems for translating systems analysts' designs and instructions into computer programs which control the processing of data within the computer. Bachelor's degree and two to three years of effective programming experience or associate degree plus four to six years' programming experience is required.

COORDINATOR OF CAREER DEVELOPMENT AND PLACEMENT, STUDENT AFFAIRS, WORTHINGTON SCRANTON CAMPUS Plan and conduct career research programs designed to meet the needs of all students in adult and

returning students. Assist with community-related educational programs such as high school visits, career days, and college nights. Coordinate full-time, part-time, and summer employment. Manage, update and maintain the career resource center. Provide academic, financial and general adjustment counseling to students enrolled in the Educational Opportunity Program. Assist in the recruiting of students for the Educational Opportunity Program. Master's degree in counseling, student personnel or related fields plus one year of effective experience required.

ASSISTANT MANAGER, HOUSING AND FOOD SERVICES, HAZLETON CAMPUS Responsible to manager, Housing and Food Services — Commonwealth Campuses for assisting in supervising the overall operation of the Housing and Food Service units. Associate degree in institutional management or equivalent, plus two years' related experience in food supervision.

Funding Sources

For further information, call 865-1375

1065-1 The National Research Council will sponsor military-related doctoral fellowships in technical fields in demand by the military. About 75 to 100 are expected in FY 1982, 250 in FY 1983, and 300-400 in FY 1984. The program will start in October 1981 with monies becoming available to universities by early 1982. Specialties named at this early stage (applied research) are: computer sciences, advanced materials research, vertical-lift technology, and vacuum-tube research. Stipends are expected to range from \$10,000 to \$12,000 per year plus tuition and fees. This new program is also expected to add NSF's graduate fellowship program (basic research), which is now scheduled to be retained and expanded. The current NSF stipend is \$4,800. (Ref. Chronicle 9/28/81)

Stone Valley offers basic sailing courses

Two public basic sailing courses will be conducted at Stone Valley Recreation Area during the Fall Term.

One class will meet from 9:30 to 11:30 a.m. on Saturdays, Sept. 19 through Nov. 7. Enrollment is limited to 16 persons and there is a course fee of \$35 per person.

Fred Waring workshop highlighted on WPXS

A 30-minute WPXS documentary about Fred Waring's choral music workshops, "Teaching America to Sing," is being distributed nationally this month.

The Public Broadcasting Service will feed the program at 6:30 p.m. Saturday, Sept. 19. Local broadcast times on

Copier key reported lost

An IBM Copier II meter key is missing. Anyone having unaccounted-for copies charged to their department or any knowledge of an extra meter key being used should contact Police Services.

Pattee provides tours

Pattee Library will be offering tours for new faculty members, administrators and faculty-equivalent personnel Monday, Sept. 14, through Fri. Sept. 18. Tours will begin in the Reference Section, 105 East Pattee, at 9:30 a.m. and 1:15 p.m.

Faculty/Staff Alerts

Policy reminder on help wanted advertising

The Office of Personnel Administration would like to remind faculty and staff members of the University policy regarding the placement of help wanted advertising.

Appropriation '82-83:

Trustees approve proposal for modest increase of 7.6 percent

Trustees of the University have approved submission of a state appropriation request for 1982-83 labelled modest in the light of continued inflation.

A \$16 million increase over the 1981-82 appropriation is sought in the preliminary request submitted to the Pennsylvania Department of Education. It is based on a 7.6 percent increase in the University's general funds budget, which supports basic educational programs such as teaching, research and public services.

"This proposed budget is a tightly fashioned one," President Oswald told the Trustees, "particularly with the prospect of continued inflation in the 8-to-10 percent range."

Dr. Oswald said that financial problems discussed by the Trustees when they approved the 1981-82 operating budget in

July have not changed significantly.

"While inflation has increased by 93 percent since 1972-73, our appropriations from the Commonwealth have increased by only 62 percent," he added. "The 5.3 percent increase in state appropriations for 1981-82, while greatly appreciated, covered only a part of the University's increased costs of operation."

To help meet rising costs, he noted, Penn State has continued its program of internal budget reductions and reallocations to areas of greater priority or need.

"The \$2.2 million in budget reallocations in 1981-82 brings the 10-year total to \$25.6 million, or nearly 10 percent of our current general funds operating budget. This demonstrates that the University continues to make effective use

of its available resources."

Dr. Oswald said the University's general funds budget of approximately \$275 million is being increased by 7.6 percent, including funding for the Milton S. Eisenhower Medical Center. The increase is based on several general principles, including anticipation that enrollment will be generally stable for the 1982-83 academic year.

"The emphasis of the proposed budget is placed on provisions to cope with increased costs of operation," Dr. Oswald noted. "The budget seeks to provide for essential salary adjustments for employees."

"It also is aimed at keeping up with mandated fringe benefits cost increases, including Social Security base and rate changes, the rapidly escalating costs of

group insurances and fringe benefits related to salary adjustments."

Increases in the costs of supplies, services, fuel, utilities, library books and materials, instruction and research equipment, and the increased costs of "critically needed maintenance to the University's physical facilities" also are addressed.

The 1982-83 budget continues the policy begun two years ago of including an average 5 percent increase in tuition. This is in recognition of the need to share increased costs.

Dr. Oswald reminded the Board that "students have been paying a disproportionate share of the increased costs and this budget is based on the state's contribution being in better balance

Penn State Intercom

Board approves seeking loan for apartments

An application for a low-interest loan for funds to construct new student apartments has been authorized by Trustees.

The application, for approximately \$3.48 million, was filed with the U.S. Department of Education under its College Housing Program, which makes loans available to colleges and universities.

"The University is consulting students and others on the possible construction of student apartment units on the site presently occupied by the Theatre Arts Production Studio on the University Park Campus," said Robert A. Patterson, senior vice president for finance and operations.

"This site will become available when current plans to relocate the theatre arts production facility are carried out."

No state or tuition funds could be used on construction of this housing unit.

One version being reviewed is the construction of a three-story apartment complex containing 36 individual apartments that would house a total of 144 students. Four students would reside in each apartment. Each living unit would contain four bedrooms, a living room, bath and kitchen-dining area.

"For several years the University has faced a situation in which the demand for on-campus housing has been heavy, particularly during Fall Term," Mr. Patterson noted. "This move is an attempt to alleviate part of that problem. It would also enable us to market-test new types of student housing on a limited scale."

The Theatre Arts Production Studio is located in the middle of the Nittany Residence Hall area. For a time, during World War II, it served as a dining hall. Tentative plans are for the production facility to be located in a new structure that would be built near the Land and Water Resources Bldg.

Diners enjoy the new restaurant complex in the HUB.

Board receives schedule for presidential search

Quentin E. Wood, president of the Board of Trustees, has given the Board a tentative timetable for selection of a successor to University President Oswald, who will retire June 30, 1983.

"As planned now, our schedule calls for the appointment of a new president at the November, 1982, Board meeting," Mr. Wood said. "That would give the President-elect several months in which to become familiar with the University before assuming office the following July."

After Dr. Oswald announced his intention to retire, Mr. Wood appointed eight Board members to serve on a Trustee Presidential Selection Committee. Mr. Wood, who is chairman of the Trustee Presidential Selection Committee, appointed Walter J. Conti, vice president of the Board of Trustees, as vice chairman. That committee, which will guide the University's search for a new president, held its first meeting Aug. 1.

"At that meeting, the committee discussed its own role in the search process and outlined a tentative schedule," Mr. Wood said.

It also authorized establishment of, and

outlined the membership makeup for, a University Presidential Search and Screen Committee, to help in the search for a new president. That committee is to be

Statement

AS INTERCOM went to press on Tuesday, Gov. Thornburgh urged the Legislature to cut state spending by one percent across the board to absorb the loss of \$267 million resulting from federal action. President Oswald responded in the following statement:

"We have just been made aware of the financial steps the Governor is taking at the state level to accommodate the actions taken by the Federal government which have impacted on the financial structure of the Commonwealth. To Penn State this represents a difficult financial problem in that a one-percent reduction is over 1.3 million dollars. At the same time, we recognize the need for such action and, if it is approved by the legislature, we will effect necessary cutbacks throughout the University."

composed of faculty members, students and representatives of other University groups.

"Following the Aug. 1 meeting, letters were sent to the various University representatives asking them to submit to the Trustee Presidential Selection Committee, by Oct. 15, the names of nominees for the Search and Screen Committee," Mr. Wood said.

Members of the Search and Screen Committee, to be selected from among the nominees by the Trustee Presidential Selection Committee, are expected to be named in November.

From November, 1981, through May, 1982, Mr. Wood told the Trustees, the University Presidential Search and Screen Committee will advertise the position, receive and screen nominations and applications, and submit to the Trustee Presidential Selection Committee a list of five to ten top candidates.

From June, 1982, through October, 1982, the Trustee Presidential Selection Committee will further narrow the list of candidates. That committee will submit a final recommendation to the Board of Trustees at its November, 1982, meeting.

Faculty Senate discusses PS-23, progress on calendar conversion

The University Faculty Senate, at its Sept. 8 meeting, began the current academic year with a focus on one of its major concerns of last year: completing its in-depth review of PS-23, the University's policy document on promotion and tenure.

President Oswald, in his opening-meeting remarks, noted that "the administrative guidelines and the amended PS-23 — recommended by this Senate and approved by me — both have been issued."

He also expressed his appreciation for work of the 1980-81 University Promotion and Tenure Committee, chaired by Richard G. Cunningham, vice president for research and graduate studies.

In addition, Dr. Oswald reported the results of the past year's PS-23 evaluations for promotion and tenure.

Turning to the other major topic of his remarks, Dr. Oswald observed that the process of calendar conversion to the early semester system is on schedule.

"Even so," he said, "it is somewhat disturbing that so many departments

appear to be foregoing the opportunity for potential significant program change. While curriculum revision is not dependent on a calendar change, it will probably be many years before a new calendar conversion offers this particular opportunity again."

The President added that he recently sent a letter to the members of the President's Staff, the Council of Academic Deans and the Council of Commonwealth Campus Directors emphasizing the importance of the Calendar Conversion Council.

One of the major risks of a calendar conversion in an institution as large and complex as ours is that the many decisions and discussion will not be coordinated," he said. "My recent letter emphasizes that the Calendar Conversion Council must be kept informed and that any questions of procedure or policy should be directed to the Council."

In its report on PS-23, the Senate's Faculty Affairs Committee proposed two legislative items calling for recommendations to the President for

revision to the policy. Senate response to both was mixed and both were carried over for action at the Oct. 6 meeting.

The first proposal, dealing with the section of the policy popularly referred to as the "dean's veto," calls for revamping the promotion and tenure process so that college review committees may override their deans' decisions and forward promotion and tenure cases to the University review level.

The second proposal deals with modifying administrative guidelines to provide a clearer statement of the appropriate procedures for evaluating teaching effectiveness as related to promotion and tenure. The committee's proposal calls for procedures and methods of evaluation to be selected by faculty members of individual academic units.

Any proposal for revision that is passed by the Senate becomes a recommendation from that body to the President and must be acted upon by him before it becomes policy.

Dr. Cunningham also presented an oral informational report, the edited text of

which appears below.

In other action, the Senate approved proposals submitted by its Committee on Academic and Athletic Standards to adopt several new definitions in its "Academic Policies for Undergraduate Students," published annually in the *Penn State Student Handbook*.

The new definitions — which pertain to full-time students and drop add periods — form the basis for many additional changes, all necessitated by the impending conversion to the early semester calendar system. During the current academic year, the Senate will revise the entire set of policies.

According to the new definition, "a full-time student is . . . one scheduling course credits at the rate of 12 or more per semester in any mode of instruction as defined by Section 42-23 (in the *Student Handbook*)."

Further, "the typical load for a full-time student is defined to be from 12 to 19 course credits per semester," and, "normal progress toward fulfilling the

(Continued on page 2)

University Promotion and Tenure Committee's functions outlined

Editor's note: Dr. Richard G. Cunningham, vice president for research and graduate studies and chairman of the University Promotion and Tenure Committee, outlined the Committee's functions at the Sept. 8 Faculty Senate meeting and also offered suggestions for improving dossiers as a means of assisting candidates for promotion and tenure. His remarks follow:

I would summarize the usefulness and purposes of the Committee's function as follows:

1. Our "being there" encourages careful attention to proper documentation and handling of each tenure or promotion case.

2. The University Committee provides an overview of policy and procedure across campuses, departments, and colleges which identifies any irregularities in the system or within an academic unit. Annually the Committee recommends changes to improve the process. One example is the divider sheets for the dossier listing the kinds of information appropriate for each section. As a result of this feedback, the quality of dossiers has improved significantly.

3. Finally, we advise the President and the Provost by reporting our votes on each candidate, accompanied by explanations for the Committee's recommendations.

Each promotion or tenure candidate is assigned to a two-person subcommittee for a detailed review of his or her dossier. Every committee member is expected to have read and cast with the secretary a preliminary vote on each case before coming to each meeting. At the meeting, the two-person subcommittee present each case and make specific initial recommendations. Following discussion, the Committee votes.

In the case of tenure, and promotion to full professors, deans are invited to meet with the Committee, (a) if information appears to be missing or contradictory in the documentation or (b) if the initial balloting indicates a probable negative recommendation by the Committee. Any new information or interpretation resulting from these interviews with the deans is attached to the dossier when it is forwarded to the President and Provost for the final decision.

Here are six observations which may help you understand how the Committee goes about its task:

1. The University Committee is keenly aware of the importance of effective teaching on the one hand and the difficulty of measuring teaching quality, on the other hand. 2. "Local criteria" are important and are kept in mind, including the variability of importance of research and publications as we compare faculty at Commonwealth Campuses to those at

Behrend and Capitol Campuses and at University Park and Hershey. 3. Correct procedures and fairness to each candidate are of paramount importance.

4. Security is maintained. Members are expected not to discuss promotion and tenure committee discussions or votes.

5. We avoid surprises for the previous review level. Deans are advised of tentative negative recommendations and are invited to meet with the Committee. 6. In each case the Committee tries to reach a unanimous or near unanimous recommendation to the Provost and President. But this is impossible with several cases each year. Badly split votes, for example, six yes and five no, or conversely, do occur. Such votes do serve a useful purpose, since these cases are thus identified for particularly careful review by the President and Provost.

As I indicated earlier, the University Committee has observed during the past three years significant improvements in the quality of PS-23 dossiers. However, there are several recurring problems I'd like to bring to your attention prior to the 1981-82 cycle.

In the evaluation of teaching effectiveness major problems exist. It is realized that at least part of the confusion can be attributed to the as yet unclear University Faculty Senate policy statements on teaching evaluation. These statements involve the obtaining of student evaluations (1) for use by the instructor to improve his or her performance and (2) Evaluations for use in recommending promotion and tenure. Note that a third process is involved if a course is to be evaluated. Student questionnaires tend to blur together two or all three of these processes.

Many dossiers reaching the University Committee reflect a lack of understanding of the distinction between IEF's (and other forms collected by the instructor) and a PS-23 evaluation of teaching which should be designed, administered, and controlled by an administrative entity or a faculty committee.

I am pleased to note that the Senate is taking steps to clarify its policy statements on teaching evaluation for PS-23 purposes. Early implementation is doubly important because of the lead time necessary to bring about the needed improvements. The PS-23 evaluations should be based on five to six years of accumulated evidence. Thus new processes will produce meaningful results only after several years of use.

The best PS-23 teaching evaluations exhibit the following characteristics, listed in the hope they will be helpful to dossiers written in 1981-82. These are:

- Brevity. Six pages, not sixty pages.
- A summary statement of evaluation

plus an explanation of the significance of the findings (student and peer inputs) in terms of expectations and norms of performances in that area, i.e., explain the local yardstick.

— Findings are based on factual information using an established departmental — or campus-administered — process to gather periodically evaluations not subject to control by the candidate.

— An assurance that all input from students and peers has been reported or at least summarized, that evaluations are not "selected" to eliminate negative or neutral results.

Evaluation memos from peers that uniformly praise and extol the candidate's teaching virtues — without a hint of criticism of the candidate — lose impact. And some of the least convincing peer memos appear in cases in which no student evaluations were obtained. The absence of any observed defects and even mild constructive criticism produces low credibility.

For PS-23 purposes, student evaluation forms should be simplified and streamlined. A few questions will produce more valid results than pages of questions, and save time for everyone concerned. Some key questions that should be addressed are (a) did the student find that the instructor helped him or her to understand and learn the material? (b) How does this instructor rate in comparison with other faculty teaching similar material to similar students, i.e., lower division, upper division, or graduate?

When applicable, indicate the initial deficiencies pointed out to the candidate, and his/her response to constructive criticisms.

Numerical rating scales are used in most student evaluation procedures. A common numerical scale across all colleges and campuses would be very helpful, and it is suggested for future attention. The University committee in 1980-81 received dossiers with evaluations based on numerical scales of 1-4, 1-5, 1-7, and 1-10. This makes interpretation difficult, particularly when the dossier fails to identify the scale.

Turning now to other aspects of the documentation for PS-23, recognize that the preparation of a well organized, informative and persuasive dossier is hard and time-consuming work. There are no shortcuts. In preparing dossiers:

- Obtain and use information from the candidate, but the PS-23 input should be rephrased by the department head or an assignee, identified in either case.
- Plan ahead — avoid the 11th hour flurry of information collecting and

dossier preparation. Filling gaps in the process with generalized statements rarely persuades. The last-minute solicitation of testimonial letters from a few undergraduate or graduate students should be avoided. Such letters cause one to wonder: How many students were asked to write letters and how many responded? If others did respond, were they also favorable?

— The thoroughness of all inputs to the dossier (committee reports, summary statements, etc.) should be identified, and dated.

— The "Service to . . ." sections tend to be enlarged with inappropriate material. Normal duties expected of the candidate in his/her teaching, research and scholarly activities are frequently cited as "Service." If service to the University and the profession is lacking, say so by leaving the section lean, or even blank. (Candidates are rarely, if ever, turned down solely on the basis of a service record, if teaching, research and scholarly activities are strong plus factors.)

— Letters — internal and external — are effective and helpful if objectively written by references in a position to be knowledgeable about the candidate. *But more is not better.* The University committee has encountered dossiers containing well over a dozen letters. Reading, say 13 letters of recommendation, leads one to wonder: Is this a collection of all the favorable letters? What happened to the others? Although letters are not required for promotion to associate professor — unless concurrent with tenure — they frequently do appear, and often for weak cases. If letters are used, take care to inform the reader how the letters were solicited, how many were received, and that all replies received are included. The qualifications of the letter writers to serve as authorities in evaluating the candidate should be stated.

In summary, first I urge you to strive for brevity. The strongest cases arrive as lean dossiers. The converse is often true: Thick is often a tip-off to a weak case. Despite the good intentions, documentation overload usually hurts more than helps the candidate. And one-hundred-page dossiers are an imposition on the faculty committees and administrators who participate in the PS-23 procedures. The eloquence and power of understatement are rarely encountered in PS-23 land! Second, the integrity of the process should be evident. Dispel all doubts concerning "selecting" letters. Assure the reader that the teaching evaluations used were carefully and fairly obtained by the department or campus and that the process was free of bias or influence by the candidate.

From the Trustee Docket

Appropriation

(Continued from page 1)

with that of the students." From 1972-73 the tuition has increased 116 percent, inflation 93 percent and the state's appropriation 62 percent.

"In requesting a \$1,918,000 increase in state funds for medical education," Dr. Oswald noted, "appropriation support for medical education has not increased since 1971-72 and the burden of increased educational costs has fallen largely on the medical students."

Tuition for medical students has gone up 483 percent in that time from \$1,000 to \$5,829 per year — making the College of Medicine's tuition among the highest for

public universities in the United States. "No tuition increase is proposed for medical students," Dr. Oswald added.

The proposed budget assumes that new program initiatives "essential to the University's vitality" principally will be provided through internal resource reallocation, or from non-state sources, he added.

The total appropriation request of \$149,806,000 is an increase of 12 percent over the 1981-82 appropriation and includes \$4,814,000 for the Milton S. Hershey Medical Center, an increase of \$1,918,000 in state funds. The per capita allotment for medical students would increase to \$12,407 from \$7,465.

Dr. Oswald emphasized that a potential problem with funding the State

Employees' Retirement System (SERS) may affect Penn State's appropriation request in a most serious way and calls for some special actions to resolve.

"A recent actuarial study of SERS indicates that a significant increase in the employer's contribution rate may be essential to maintain the fiscal integrity of SERS," Dr. Oswald noted, adding: "An increase of as much as 25 percent, from 14.41 to 18.02 percent in the University's contribution, is being considered for 1982-83. The impact of such a single-year increase in our general funds budget would be \$5.4 million.

"If such were to occur, an increase in State appropriations of 4 percent would be needed just to offset the increased retirement costs. In a period of severe

fiscal stringency, the magnitude of such an increase in retirement costs would be beyond our ability to accommodate.

"If this possible increase materializes, it will be necessary to request more urgently that special consideration of this problem be given by the State as the budget for 1982-83 is prepared."

The Trustees also approved a Capital Program Request to the state for expenditure of \$29,627,000 in 1982-83, the first year of a five-year capital improvement program.

The 1982-83 program includes requests for major renovation of three existing facilities, for some new construction needed for basic services at the various campuses, for construction of a multi-purpose building at Mont Alto Campus, and for major repairs and minor capital improvements necessary to extend the life of existing university facilities, as well as improvements to utility and support systems.

Private giving to University increases over previous year

Private giving to the University increased by more than 19 percent over last year as private contributions for the 1981 fiscal year totaled \$11,438,182, compared to \$9,562,685 contributed in the previous year.

"It's especially gratifying to note that the number of individual gifts increased by nearly 6,000 over last year," Dr. Richard E. Grubb, senior vice president for administration, said. "We've been stressing to our alumni and friends that gifts of all sizes are needed to attain the level of private support required to keep Penn State vital in all respects."

Total gifts numbered 49,951 compared to 44,081 last year.

Gifts by alumni and friends of the University totaled \$3,956,508, up by more than \$800,000 over last year. Corporations and business contributed \$4,055,508, an increase of more than \$550,000 over 1980 levels.

Foundations gave \$1,429,404, approximately \$170,000 above last year's contributions. Deferred gifts accounted for \$515,709, a boost of nearly \$55,000.

Other organizations gave \$1,481,053, an increase of \$265,000.

More than 95 percent of all gifts are used for special purposes specified by the donor. Student aid and enrichment of education programs are two major areas receiving support.

The University's 10 academic colleges, Behrend College, Capitol Campus and the College of Medicine were recipients of \$7,137,667 of the gift monies. Student aid accounted for \$2,479,145 in private giving.

The 17 Commonwealth Campuses received \$244,746 in gifts while intercollege research programs and facilities received \$309,159. Continuing Education received \$229,552, while the University Libraries were given \$36,964. Religious activities were given \$18,956. Miscellaneous other units and activities within the University received \$325,792 in donations.

Unrestricted gifts that may be allocated by the president of the University to areas of high priority where other fund sources are not available totalled \$407,838.

Administration studies sites for new radio transmission towers

Trustees have approved, for purposes of designation on the FCC application, a location for three transmission towers that would be used for the University's proposed public radio station, if the station receives Federal Communications Commission approval.

The towers would be constructed on Farm 106 at the University's Rock Springs Agricultural Research Center, some nine miles west of State College.

Further studies will be made to determine other sites that could be used for the transmission towers.

The University is awaiting a decision by the FCC on an application filed in January requesting a construction permit for the station.

The proposed broadcast facility would operate at a frequency of 820 kilohertz on the AM radio band. Its power would be 50,000 watts during daylight hours and 5,000 watts at night. The coverage area of the station would range from the New York to Maryland borders, east to

Wilkes-Barre and west to Johnstown.

Trustees first authorized establishment of a public radio station in July, 1980, noting that Central Pennsylvania is the only area of the state not reached by National Public Radio (NPR) signals. Erie, Hershey, Philadelphia, Pittsburgh and Scranton all have NPR affiliates.

The station would operate within the Broadcasting Services Division of Continuing Education which also includes WPSX-TV. It would be totally separate from WDFM, the student-oriented radio station, but would cooperate with WDFM in such efforts as programming.

Programming plans are varied. The station would offer credit and informal courses as well as cultural programs and public affairs. In-school services to complement the in-school programming of WPSX-TV would also be offered.

No new University general funds are committed to the proposed station. Funds are to come from private and public sources.

Livestock sale will benefit proposed Agricultural Arena

The fund drive for the proposed Agricultural Arena at the University will take a major step toward a successful finish with a benefit livestock sale Dec. 11 at the Farm Show Building in Harrisburg.

"The major breeding associations in the state are sponsoring this sale, with at least 50 percent of the proceeds designated for the Agricultural Arena project," Richard E. Grubb, senior vice president for administration, said in a report to Trustees on private fund-raising efforts at Penn State.

President Oswald has invited Governor Thornburgh to attend the sale, he added.

"With the able leadership of Trustee Obie Snider and Dean Sam Smith, this project is receiving major attention and support by agriculture statewide," Dr. Grubb added.

The Agricultural Arena is planned as a facility that will host student resident instruction activities in the University's College of Agriculture, such as the annual horticulture show and various animal shows. It also will be available for some use by the general agricultural community in Pennsylvania.

In other fund-raising matters, the newly expanded Penn State Fund Council will hold what Dr. Grubb called a "critical" meeting at University Park Oct. 2 and 3 to

address development efforts needed to help Penn State attain its goals of quality, selectivity and flexibility in the 1980s.

"We need the active support and involvement of council members in identifying potential donors for specific projects, in providing information on special interests of prospective donors and in introducing members of the University administration and faculty to potential donors," Dr. Grubb said.

The Trustees also were told that the Board would receive a recommendation on appointment of a vice president for development later this year. "The search is coming along well, and we hope to recommend a candidate to the Board no later than January," Dr. Grubb said.

He also noted that the University's Office of Gifts and Endowments is planning new emphases and approaches in its efforts to increase private giving to Penn State.

"There is a growing need to increase the University's endowment, and endowments traditionally are funded primarily through deferred gifts," he noted. "Fund-raising firms estimate that 85 percent of endowment monies are from deferred gifts. In summary, 1981-82 will be a busy and I am certain a productive year in fund raising."

United Way

UPDATE

Luncheon to kick off United Way campaign

The 1981 United Way campaign will kick off Thursday, Sept. 24, with a luncheon for University Park campus volunteers.

Keynoting the noon luncheon, to be held at Gatsby's in State College, will be President Oswald and University Park Chairman Charles M. Hosler, dean of the College of Earth and Mineral Sciences. Results of the University's advanced gifts campaign will be announced and

campaign details will be discussed.

Centre County's 28 United Way agencies who benefit from the annual fund raising drive will be represented by Diane Marshall, executive director, Strawberry Fields, and Nada Ottenstein, coordinator, Big Brother-Big Sister Program, Youth Services Bureau. More than 200 campaign associate chairpersons and volunteers are expected to attend. Reservations for the luncheon should be made with the Campus Relations Office, 301 Old Main, Phone: 865-2501, by Sept. 18.

Teacher examinations set

The National Teacher Examinations (NTE) will be administered Nov. 14 in Room 102 Forum Bldg. The scores from the examinations are used by some states for certification of teachers and by some school systems in the selection and hiring of teachers.

Prospective teachers are reminded that registration forms must be mailed to the Educational Testing Service prior to Oct. 19. Information bulletins describing the examination and registration procedures may be obtained in Room 181 Chambers Bldg.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

From the Trustee Docket

Number of new scholarships, awards, loan funds are established

Establishment of a number of scholarships, awards and loan funds has been reported to the Board of Trustees. They include:

A Charles W. Borgerding Scholarship will provide financial assistance to outstanding undergraduate students who have a demonstrated financial need.

The initial principal of the scholarship fund has been received as a gift from Mrs. John F. Hardy, of Alberta, Canada, in honor of her brother, Mr. Borgerding, a 1924 Penn State graduate who lives in Pittsburgh. Mr. Borgerding for many years has been a strong supporter of Penn State.

A Capitol Campus Faculty Women's Club Loan Fund will provide financial assistance in the form of loans to full-time Capitol students who need it.

The initial principal of the fund has been received as gifts from members of the Club. The fund will provide for both long and short-term loans.

A Carpenter Technology Corporation Metallurgical Scholarship recognizes outstanding undergraduate students enrolled in the metallurgy curriculum of the College of Earth and Mineral Sciences.

The initial principal of the scholarship fund has been received from the Carpenter Technology Corporation. Initially, two scholarships will be funded with two additional scholarships being funded for each of the next two years. Thereafter, six scholarships will be funded annually.

The Edith Pitt Chance Award recognizes, on the basis of outstanding scholarship and leadership, undergraduate students

enrolled in the College of Human Development.

Besides the original principal of the award, the fund includes a gift from the College of Human Development Alumni Society. The award was established in honor of the late Mrs. Chace, director of the University's School of Home Economics from 1918 to 1937.

The Palmer Post-Doctoral Fellowship in Molecular Biology has been established to support a post-doctoral fellow in performing original research in molecular biology.

Funding will be made available by a private donor in the form of an annual stipend. The appointment will be made by the dean of the College of Science with the approval of the dean of the Graduate School. The recipient of the fellowship will have earned the degree of doctor of philosophy in biochemistry, biophysics, molecular biology, parasitology or other appropriate related field.

A Penn State Club of Greater Los Angeles Award recognizes outstanding undergraduate students, preferably from the Los Angeles area, who are enrolled or planning to enroll at the University. The initial principal of the award fund has been received as a gift from the Penn State Club of Greater Los Angeles.

First consideration for the award will be given to dependents of members of Penn State's Los Angeles Alumni Club who are enrolled or planning to enroll at the University. Second and third preferences will be given to dependents of Penn State alumni residing anywhere in California and to students whose home addresses of record are in California, respectively.

Scholarships established by the

Pennsylvania Power and Light Company and by the Philadelphia Electric Company will recognize academically superior students enrolled, or planning to enroll full-time in the nuclear engineering, technology curriculum.

Consideration for the scholarships will be given to all such students who have achieved superior academic records or who show promise of outstanding academic success.

A Robert Miklos Memorial Award has been established to recognize annually an outstanding member of the Beaver Campus basketball team. The principal of the award fund has been received as a gift from friends and classmates in memory of Robert Miklos, a 1980 Beaver Campus graduate.

A resident of Hopewell Township, and a 1976 graduate of Hopewell High School, Mr. Miklos earned varsity letters in basketball while a business management major at Beaver. His untimely death occurred as a result of an automobile accident last December.

The Abram W. VanderMeer Loan Fund will aid full-time students enrolled in the College of Education who need financial assistance while student teaching.

Dr. VanderMeer served as dean of the College of Education from 1962 to 1973. The initial principal of the fund has been received as a gift from the College of Education Alumni Association.

Loans will be made to full-time undergraduate students enrolled in the College of Education and working toward teacher certification. Eligibility will be limited to the term in which the student is engaged in student teaching.

Changes in policy approved for scholarships and grants

Trustees have approved changes in policies for establishing scholarship funds and grants-in-aid at the University and revised regulations governing several specific scholarships.

"As the University's private fund-raising program grows, we wanted to develop some umbrella guidelines to help contributors and the University focus on several important priorities," said Richard E. Grubb, senior vice president for administration.

Among the new guidelines are:

— The Trustees approved changing the amount of capital needed to establish an endowed fund scholarship from \$5,000 to \$15,000.

— A sum of \$10,000 or more will allow the donor to establish, in one of several University endowed scholarship programs, a scholarship in the name of a person, organization or program.

— Sums of less than \$10,000 will be accepted for placement without specific designation in existing University scholarship funds.

— Endowed graduate fellowships may be established for contributions of \$20,000 or more.

— Any sum of \$1,000 or more will be

accepted for an annual scholarship or grant-in-aid in the name of an individual, organization or program for as long as the sponsor provides the funds.

Revisions in the criteria governing six specific scholarships also were approved. The six are the Alumni Memorial, the Penn State National Merit, the Penn State National Achievement, the Penn State Scholars and the Renaissance scholarships and the University's General Scholarship Fund.

"The thrust of these revisions is to allow potential donors to provide contributions in the names of individuals and organizations while reducing the need to create additional special interest scholarships," Dr. Grubb explained.

The Trustees' action follows a report submitted by a University Scholarship Study Committee charged with looking at the University's scholarship needs and priorities in the next 10 years.

One of the committee's recommendations is for a \$9 million, five-year fund-raising effort to provide additional scholarship monies to attract twice the present number of incoming freshmen predicted to be dean's list achievers to come to Penn State.

Trustees approve purchase of land

Trustees have authorized the purchase of approximately 18 acres of land adjacent to Penn State's Southeastern Field Research Laboratory at Landville.

"Purchase of the property will make available to the University badly needed additional research land," said Robert A. Patterson, senior vice president for

finance and operations. Moreover, he said, an adjoining stream will provide irrigation water for crop research.

The 18 acres are to be purchased from Garry L. and Mary E. Longenecker of Rapho Township, Lancaster County, at a cost of not less than \$15,000. Federal agriculture funds will be available for the purchase.

Mr. Patterson said the University also will be able to lease an adjoining eight acres temporarily.

Enrollment is reported higher in Fall Term

Preliminary enrollment figures for Fall Term, 1981, show an increase of 984 over the same period last year, according to a report issued to Trustees.

Total enrollment as of Sept. 8 was 51,162, including 32,717 at University Park, 16,723 at the Commonwealth Campuses, and 1,722 at Behrend College. Figures for the same period last year showed a total of 50,178, with 31,807 at University Park, 16,677 at Commonwealth Campuses, and 1,694 at Behrend.

Baccalaureate degree enrollment at University Park was 27,658, an increase of 1,034 over 1980. Graduate enrollment showed a slight decline from 4,610 to 4,572.

Commonwealth Campus baccalaureate enrollments increased 119 from 9,051 to 9,170. Associate degree enrollments jumped by 392 to a total of 4,045.

The report does not include figures from Capital, Hershey and Radnor where registrations were not yet completed.

Sean Kuklewski, a 13th term architectural engineering student, places a sticker over a thermostat in the Liberal Arts Tower that reminds people of the authorized temperature settings in University buildings. The Executive Energy Conservation Committee authorized placing 2,000 of the stickers near thermostats at University Park that control both air conditioning and heating in rooms.

From the Trustee Docket

Majors in health education and sociology added to curriculum

Two new majors have been added to the University's academic curriculum.

Provost Eddy told Trustees the additions are designed to meet student needs and will require no additional University funds.

The first is a major in health education leading to a bachelor of science degree. It is designed to blend a liberal arts education with the professional courses needed to certify students as teachers of health education.

"Recent shifts in national health policy toward prevention of disease and promotion of health have resulted in a need for highly trained school health educators," Dr. Eddy noted.

The program, he added, will allow students with a specific interest in health education, but not physical education, to pursue goals in this direction. As such, it will complement the existing major in health and physical education.

The program has been reviewed and endorsed by the College of Education and

meets the needs for teacher certification in Pennsylvania.

The second, a major in sociology leading to a bachelor of science degree, is designed to provide opportunities for developing analytical and technical knowledge and skills necessary for employment in private and public organizations and agencies.

"The existing major in sociology leading to a bachelor of arts degree accommodates a wide range of student interests. The B.S. degree program is offered specifically for students who want to become social research analysts in organizations doing work in applied sociology," Dr. Eddy observed.

With the emergence of several applied fields in sociology — including demography, gerontology, criminology, juvenile delinquency, industrial sociology, urban problems and health — the need for graduates with quantitative skills has increased, he said.

Messrs. Feldstein and Peters join Penn State Fund Council

Jay H. Feldstein and Ralph E. Peters have been appointed to three-year terms on the Penn State Fund Council.

The Council advises the Trustees and the President of the University on all matters related to private fund-raising. Private contributions to Penn State are used to enrich those areas of the University that do not receive state support.

"The addition of these two active Penn State alumni is important to the Council," said Richard E. Grubb, senior vice president for administration. "This brings the Council's membership to 48, the largest it has been since its founding in 1974."

Mr. Feldstein is president of the

Pittsburgh law firm of Feldstein, Grinberg, Stein and McKee. A 1959 Penn State graduate, he served as student government president.

He has just completed a term as president of the 50,000-member Penn State Alumni Association. Part of his duties in that position involved serving on the fund council as an ex-officio member.

Mr. Peters, a 1948 Penn State graduate, is president of Berger Associates, Inc., a firm of architects, engineers, economists and planners headquartered in Camp Hill.

He is chairman of the University's Capitol Campus Board of Advisors and was named an Alumni Fellow by Penn State's College of Business Administration in 1979.

Academic changes noted for Capitol

Several changes and additions to the academic curriculum at the Capitol Campus have been reported to the Trustees.

Provost Eddy said the changes were due to a recent reorganization of the academic divisions at the campus, which he said has resulted in a more efficient structure while retaining all previously existing academic programs.

The largest change to the curriculum is the development of a new major in behavioral sciences from the former major

in social sciences.

A new major in public policy — to prepare students for formulating and implementing such policy — has replaced the option in public policy previously included in the major in social science.

A new management option has been added to the major in business administration. It is designed for students who desire a concentration in various aspects of business management.

Also changed was the former business administration option which is now the major in business administration. The name was changed at the request of the program faculty members to reflect better the nature of the program.

Buildings are renamed at Ogontz Campus

The renaming of two buildings at the Ogontz Campus has been approved by the Board of Trustees.

The Science Building now will be called the Conference Center. The name change reflects the nearly-completed renovation

of the building which will be used as a conference center for continuing education and other activities.

The Military Science Building will be called the Spring House. The oldest building on campus, it was constructed in 1919 as a spring house for storing food. Presently unoccupied, it is scheduled for renovation and will provide space for offices, a galley and meeting space.

McKeesport gets parking

Trustees have approved a plan to construct 80 additional parking spaces at the McKeesport Campus. The cost of construction is not to exceed \$189,000, and

will be covered by user fees.

The project, undertaken to enable the campus to increase its Continuing Education program offerings, also will relieve a shortage of student parking areas.

Scholars Program grows, marks successes during first year

The University Scholars Program, launched last fall to enhance academic opportunities for outstanding students, has grown to include some 800 students.

"In a very real sense, the success of the program is reflected in the large number of students who accepted our invitation to participate," Paul Aust, program director and professor of mathematics, told Trustees.

"The success of the program indicates clearly that Penn State's best students want special challenges and do not shy away from high level, demanding academic work."

The University Scholars Program is intended to enable the University's top students to enrich and broaden their general educations and to deepen and accelerate their specialized preparations for graduate study or a profession. It is —

or soon will be — available at all of the Commonwealth Campuses.

The program, approved by the University Faculty Senate after considerable study, offers qualified students the opportunity to do honors-level work in general courses in their first two years and highly specialized honors-level work during their junior and senior years.

In addition to providing Penn State's outstanding students with the University-wide opportunity to do honors-level work in any department, Dr. Aust said the program offers benefits to all University students.

"The University Scholars serve as an active influence and model for other students, thereby helping, in time, to raise the level of intellectual life and to improve the intellectual climate among all undergraduates."

Trustees approve proposals for changes in University property

Trustees have approved three proposals for changes to University property.

Approved was construction of an addition to the First Aid Building at Beaver Stadium. Robert A. Patterson, senior vice president for finance and operations, said four additional patient stations will be built for use during football games and other events. The addition was required, he said, because of recent stadium expansions, which increased the seating capacity by more than 14,000.

Approval also was given for construction of a pre-fabricated, timber-column building near the University's beef and sheep barns for the use of the Joseph Valentine Turfgrass Research Center. The building will provide storage and maintenance space for the heavy machinery used in turf research.

In other action, Trustees approved the return of a 91.5-acre tract of land in the

Rothrock State Forest of Huntingdon County to the Commonwealth of Pennsylvania.

Known as Beaver Dam, the land was deeded to the University in 1953 by the then-Department of Forests and Waters for a joint venture by what were then the Schools of Agriculture, Education, Home Economics and Physical Education.

These schools were to have constructed a model camp for use in instructing students in camp administration, dietetics and outdoor education. Because the plans for the camp did not come to fruition and because similar functions now are served by the University's Stone Valley Recreation Area, Penn State is returning the Beaver Dam property to the state as required by the original deed.

Specifically, the land is being returned to the Bureau of Forestry in the Pennsylvania Department of Environmental Resources.

Behrend College has three new majors

Three new majors, including one created through revisions to an existing program, have been added to the academic curriculum at Behrend College.

Provost Eddy told Trustees the new majors lead to bachelor of science degrees in communications, history and physical science.

The first new major, leading to a B.S. degree in communications, emphasizes

study of science and professional writing. It will prepare students for careers in the rapidly expanding field of technical writing.

The second new major leads to a B.S. degree in history. It will provide a combination of traditional history courses with training in statistical and computer-assisted analytic techniques.

The third new major leads to a B.S. degree in physical science. It offers a solid background in physics, chemistry, geosciences and mathematical science, and is an extensive redesign of Behrend's existing major in applied science.

Advisory search group named for Shenango

An Advisory Search Committee has been appointed by President Oswald to assist in identifying candidates for director of the Shenango Valley Campus.

Four persons from Shenango Valley will serve on the committee. They are John C. Tamplin, instructor of English,

chairperson; Shirley Snyder, senior assistant librarian; W. Murray Small, assistant professor of metallurgy, and Diana Thomas, president of the Shenango Valley Campus Student Government Association.

Other committee members are: Peter D. Bennett, professor of marketing; Caroline D. Eckhardt, associate professor of English and comparative literature; Daniel T. Hopkins, assistant vice president of the Commonwealth Educational System, and Jacqueline L. Schoch, director, DuBois Campus.

Announcements of the reopened search have been advertised nationally through the summer. Faculty and staff interested in submitting nominations or applying for the position should do so by Sept. 30. Applications and letters of nomination should be directed to Dr. Robert J. Scannell, Commonwealth Educational System, 111 Old Main, University Park, PA.

'Literature option' is new name for major

The literature option is the new name for what was called the language and literature option in the English major at the University.

Provost Eddy said the change has been made to correct a "long-standing discrepancy" in the option's title and its actual focus.

Penn Staters

Dr. Paul H. Cutler, professor of physics, and **Dr. Nicholas M. Miskovsky**, assistant professor of physics at Altoona, are co-authors of two papers presented at international meetings.

In July, they presented a paper, "Space Charge Effects in Liquid Metal Ion Sources of Different Geometries," at the 28th International Field Emission Symposium at the Oregon Graduate Center for Study and Research in Portland, Oregon.

Last month, they presented another paper, "Responsivity and I-V Characteristics of MVM and MOM Point-Contact Infrared Detectors," at the Open Symposium on Millimeter and Submillimeter Waves held at the 20th General Assembly of the International Union of Radio Science in Washington, D.C.

Dr. Greg N. Frederickson, assistant professor of computer science, presented an invited talk, "Probabilistic Analysis of the LPT Processor Scheduling Heuristic," at the NATO Advanced Research Institute in Durham, England. He also presented seminars at the University of Edinburgh and the University of Warwick on his work on implicit data structures for the dictionary problem.

Dr. Dorothy V. Harris, professor of health and physical education and director of the Center for Women and Sport, has been re-elected to the managing council and as

treasurer of the International Society of Sports Psychology.

Dr. Ralph T. Heimer, professor of education, presented a paper on "Basic Principles for the Design and Development of Courses to be Delivered by Computers" at the 3rd World Conference on Computers in Education, held in Lausanne, Switzerland. Prior to the conference, Dr. Heimer visited the Free University of Berlin, where he gave an invited lecture and demonstrations dealing with uses of microcomputers in instruction.

Dr. James P. Ignizio, professor of industrial and management systems engineering, is author of a textbook, *Linear Programming in Single and Multiple Objective Systems*, published this month by Prentice-Hall. The 525-page book addresses the conventional methods of linear optimization and the newer and highly flexible techniques of multiple objective mathematical programming.

Dr. Robert G. Jenkins, assistant professor of fuel science, has been appointed director of the University's Fuels and Combustion Laboratory. He had been serving as acting director.

Dr. Jenkins has a B.Sc. and a Ph.D. in fuel science from the University of Leeds, Leeds, England. He first worked for Penn

State as a research associate from 1970 to 1973 and then returned to England where he was a research assistant at the Imperial College of Science in London. He returned to the University staff as a senior research associate in fuel science in 1975. In 1978, he was named assistant professor of fuel science.

The Fuels and Combustion Laboratory is the site of extensive sponsored research into the efficient and economical combustion of coals and liquid and gaseous fuels. Included is work on the gasification and liquefaction of coal.

Dr. Jaan Kiusalaas, professor of engineering mechanics, has been honored by the National Aeronautics and Space Administration for work done jointly with the George C. Marshall Space Flight Center in Huntsville, Ala.

Dr. Kiusalaas received a certificate and cash award from NASA for a finite element computer program that both analyzes and does structural design. The program, prepared with the help of graduate student G. B. Reddy, permits the designer to find in his design version, evaluates the design and produces a better one, lighter in weight but equally strong. The completed program has been released by NASA through COSMIC, the Computer Software Management and Information Center.

Dr. Robert E. Newnham, professor of solid state science, has been elected to a three-year term as vice chairman of the U.S. National Committee on Crystallography, sponsored by the National Academy of Sciences.

Dr. Newnham also gave one of the

primary lectures at the International Union of Crystallography Congress in Ottawa, Ontario, Canada, speaking on "Crystallographic Engineering — the Design and Construction of Non-equilibrium Crystal Structures for Engineering Applications."

Dr. Howard B. Palmer, professor of energy science and associate dean of the Graduate School, has been appointed by the National Research Council to its Evaluation Panel for Chemical Engineering.

The panel is responsible for an annual appraisal of the National Bureau of Standards' Center for Chemical Engineering.

Dr. G. P. Patil, professor of mathematical statistics, was an invited speaker at a session on Dynamics of Exploited Populations at the annual meeting of the American Statistical Association.

He presented his ongoing joint research with Dr. Charles Taillie on the "Statistical Analysis of Recruitment Data for Eighteen Marine Fish Stocks." Dr. Taillie is research associate in the Department of Statistics on a continuing project sponsored by the National Marine Fisheries Service of the U.S. Department of Commerce.

Dr. Wilbur Zelinsky, professor of geography, was one of four planetary speakers at the 14th International Congress on Onomastic Sciences at the University of Michigan.

Onomastics is the study of names. Title of his talk was "By Their Names You Shall Know Them: An Onomastic Approach to the American Land and Ethos."

Faculty workshop series scheduled

A workshop series for faculty on the theme, "Communication: The Faculty-Student Connection," is being sponsored by the Instructional Development Program.

During Fall Term, the series will focus on Classroom Communication Skills for Teachers. The first workshop is scheduled at three different times — 1-2:30 p.m. Sept. 22; 3-4:30 p.m. Sept. 23, and 1-2:30 p.m. Sept. 24 in Room 305 Hetzel Union Bldg.

It will feature a presentation by Dr. Douglas J. Pedersen, associate professor of speech communication, and Maryellen Gleason, of the Instructional Development Program. A one-hour reaction session will be held following the workshop. In addition, the services and activities available through the recently reorganized Instructional Development Program will be previewed.

A brochure which describes the workshop series and provides subsequent dates and locations for sessions at University Park and the Commonwealth Campus is available in the Instructional Development Program office, 307 Grange Bldg. Faculty members interested in attending the first workshop should contact the program office, 863-2599.

Trustee's slide show scheduled in Keller

"The Faces of Tibet," a color slide show of the photography of H. Thomas Halliwell, will be presented at 7:30 p.m. Monday, Sept. 21, in Keller Auditorium. The presentation previously had been scheduled for the Materials Research Laboratory Auditorium.

Mr. Halliwell, a member of the University's Board of Trustees and chairman of the board of Standard Pressed Steel Co., Jenkintown, will show slides taken on a trip to Lhasa, Tibet, in 1980.

Promotions

Staff Exempt

Sharon Sefchick to administrative assistant in Intercollege Research Programs.

Staff Non-Exempt

Jeffrey C. Sanders to senior research technician.

Clerical

Pamala A. Kennedy to secretary C in Human Development.

M. Elaine Moore to secretary B in Business Administration.

Sandra S. Wallish to secretary B at Hershey.

Patricia E. Yoderto secretary B in Health, Physical Education and Recreation.

Technical Service

Kirk Barger to maintenance worker, trees and shrubs in Physical Plant.

Charles Boonie to maintenance worker utility in Physical Plant.

Terry Brungart to maintenance worker utility in Physical Plant.

Chester Butler to maintenance worker utility in Physical Plant.

Carlton Lucas to stock truck driver in Physical Plant.

Joseph E. Martin to dining hall worker A in Housing and Food Services.

George Shouney to maintenance worker utility in Physical Plant.

Daniel Williams to maintenance worker general C in Physical Plant.

Parting

Anthony M. Miranda, instructor in German at McKeesport, left the University Sept. 1. He had been a member of the faculty since April 1, 1969.

Obituaries

Oliver D. Burke, who retired July 1, 1963, as professor of plant pathology Extension, died Sept. 9 at the age of 83. He joined the faculty Dec. 1, 1935, as assistant professor of plant pathology Extension. He was promoted to associate professor in 1943 and to professor in 1946.

Lawrence E. Harman, biological aide in the College of Agriculture, died Sept. 8 at the age of 60. He joined the University staff Dec. 1, 1966, and retired July 1, 1978.

Carpooler

Debra Lauder would like to share the driving from the Warriors Mark-Seven Stars area to the University. She works from 8 a.m. to 5 p.m. She can be contacted at either 865-0465 or (814) 632-8562.

President Oswald to speak at building dedication

The new Library-Learning Center at the Delaware County Campus will be dedicated in formal ceremonies at 2 p.m. Sunday, Sept. 27.

Featured speaker will be President Oswald. The program will be followed by an open house, featuring tours, exhibits, refreshments and musical entertainment by the Darlington Chamber Quartet.

The \$2.5 million structure, constructed by the Department of General Services, is the second major building at the campus. It was completed in November, 1980, and occupied in January, 1981.

The building has a seating capacity of 690 persons and can accommodate approximately 50,000 volumes. Besides reading and stack areas, it contains special collection rooms, offices, student activities area, classrooms, seminar rooms, and an audiovisual center.

Delaware County Campus Library-Learning Center.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

September 17-27

Special Events

Thursday, Sept. 17
Late registration deadline.
Add deadline.
Graduate Commons Plant Sale, 10 a.m., Kern Lobby, through Sept. 18.
Penn State Internationale Dancers meeting, 7-9 p.m., Room 132 White Bldg.

Friday, Sept. 18
Commonsplace Theatre, *Ordinary People*, 7 and 9 p.m., Room 112 Kern.
GSA Coffeehouse, 8 p.m., Room 102 Kern.
Sports: women's volleyball vs. Georgetown, 8 p.m.

Saturday, Sept. 19
France-Cinema, Beresford, *Breaker Morant*, 7 and 9 p.m., Room 112 Kern.
Saturday morning art classes begin, 9 a.m., Room 101 Chambers Bldg.
Basic sailing course begins, 9:30-11:30 a.m., Stone Valley Recreation Area. Course continues Saturday mornings through Nov. 7. Information and registration, 863-0762.
Sports: women's volleyball, Penn State Invitational; women's tennis vs. Syracuse, 10 a.m.; men's cross country vs. Alumni, 10:30 a.m.; women's cross country, Lady Lion Invitational, 11 a.m.

Sunday, Sept. 20
Commonsplace Theatre, *Ordinary People*, 7 and 9 p.m., Room 112 Kern.
Basic sailing course begins, 9:30 a.m.-12:30 p.m., Stone Valley Recreation Area. Course continues Sundays through Nov. 8. Information and registration, 863-0762.
Sports: women's tennis vs. Colgate, 10 a.m.; baseball vs. Mansfield (DH), 1 p.m.

Monday, Sept. 21
Deadline for November graduates to pay thesis fee at Bursar's Office and to activate diploma cards in Records Office.
LAHS research fellowship applications, 5 p.m., Ihlseng Cottage.
France-Cinema, Beresford, *Breaker Morant*, 7 and 9 p.m., Room 112 Kern.

Color Slide Club, 7:30 p.m., Keller Auditorium.
H. Thomas Hollowell, Jr., slide presentation of a trip to Tibet.

Tuesday, Sept. 22
Instructional Development Program workshop for faculty, "Classroom Communication Skills for Teachers," 1-2:30 p.m., Room 305 HUB.
Artist Series, The Juilliard String Quartet, 8:30 p.m., Schwab Auditorium.
Electro-Optics Laboratory Open House, noon-8 p.m., Room 18 Electrical Engineering East. Demonstrations of holograms, interferometry, lasers and optical processors.
Sports: soccer vs. Lock Haven, 3 p.m.

Wednesday, Sept. 23
Commons Concert, Stan Shepherd, noon, Kern Lobby.
Instructional Development Program workshop for faculty, "Classroom Communication Skills for Teachers," 3-4:30 p.m., Room 305 HUB.
Nursing Consultation Center, "Coping with Multiple Sclerosis," 3-4:30 p.m., Consultation Center.
Artist Series, Mark Medoff, *Children of a Lesser God*, 8:30 p.m., Eisenhower Auditorium.
Sports: baseball vs. Lock Haven, 3 p.m.

Thursday, Sept. 24
Pass-Fail.
Fixed date for meetings involving Commonwealth Campus faculty.
Instructional Development Program workshop for faculty, "Classroom Communication Skills for Teachers," 1-2:30 p.m., Room 305 HUB.
Commons Film Series, *Planet of the Apes*, 7 and 9 p.m., Room 112 Kern.
Sports: field hockey vs. Lock Haven, 3:30 p.m.

Friday, Sept. 25
Pass-Fail.
Fixed date for meetings involving Commonwealth Campus faculty.
Craft Demonstration, 11:30 a.m., Kern Lobby.
Commonsplace Theatre, *Stunt Man*, 7 and 9 p.m., Room 112 Kern.
Sports: soccer vs. West Virginia, 7:15 p.m.

Saturday, Sept. 26
Fixed date for meetings involving Commonwealth Campus faculty.

France-Cinema, Bunsel, *The Discreet Charm of the Bourgeoisie*, 7 and 9 p.m., Room 112 Kern.
Sports: field hockey vs. Connecticut, 1 p.m.

Sunday, Sept. 27
Commonsplace Theatre, *Stunt Man*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Sept. 17
Ceramic Science 500 Seminar Series, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. W. B. White, professor of geochemistry, on "Sulfide Ceramics for Optical Window Applications."
Economic Seminar, 3 p.m., Room 101 Kern.
Mordechai E. Kravner, professor of economics, Michigan State, on "International Competitiveness of the U.S. Auto and Steel Industries."
Physics Colloquium, 3:50 p.m., Room 117 Osmond Laboratory. D. Edwards, Ohio State University, on "Spin-Polarized Hydrogen."
Fuel Science Seminar, 4p.m., Room 301 Steidle Bldg. Dr. Ralph Yang, SUNY-Buffalo, on "Electron Microscopy Studies of the Carbon-Oxygen Reaction."

Friday, Sept. 18
Seminar sponsored by the Center for the Study of Higher Education, German and Political Science Departments, 10:30 a.m., Room 101 Kern. Professor Gerd Grieser, M.D., president University of Kiel, Germany, on "German Universities Today."
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Peirce Lewis, professor of geography, on "Images of the American Landscape: Art as a Reflection of National Personality."

Wednesday, Sept. 23
James Kollias Memorial Lecture, 2:30 p.m., Room 121 Noll Laboratory. Albert B. Craig, Jr., M.D., professor of physiology, University of Rochester School of Medicine, on "World Records: What Do They Tell Us?"

Thursday, Sept. 24
Ceramic Science 500 Seminar Series, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. A. Badzian, UNITRA, Warsaw, Poland, on "Synthesis and Crystal Chemistry of Diamond-like Materials."

Physics Colloquium, 3:50 p.m., Room 117 Osmond Laboratory. W. Plummer, University of Pennsylvania, on "Photoemission from a Nearly Free Electron Metal."
Fuel Science Seminar, 4p.m., Room 301 Steidle Bldg. Dr. Douglas McKee, General Electric Co., on "Catalysis of Carbon Gasification."

Friday, Sept. 25
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. John L. Frantz, associate professor of American history, on "Religion in the Middle Colonies: Model for a Nation."
Electrical Engineering Seminar, 4 p.m., Room 123 Electrical Engineering East. Dr. D. J. DiMaria, IBM Yorktown Heights, on "Electrically Alterable Memory — Insulator-Poly Silicon Physics and Performance."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m.
Slavic Art Exhibition, through Sept. 23.
Dorothy Behringer, eggery, through Sept. 24.
Jim Dupree, paintings, Janis Mershon, weavings; Linda Newby, leather jewelry, opens Sept. 24; Ziggy Coyle, clay, opens Sept. 25.

Museum of Art: open 11 a.m.-4:30 p.m.
Closed Mondays. Tours, Sundays, 1:30 p.m.
Hemline, Neckline, Streamline: Women's Fashions 1890-1940 from the collection of Beverly Birks. African Sculpture from the Museum's collection, through Sept. 20. An Overview of the Permanent Collection, through Sept. 27. Oriental Works from the Museum's Collection, opens Sept. 27.

Pattee Library: Charles Helligsworth, paintings, East Corridor Gallery. Naomi Gallagher, paintings, through Sept. 18. Travels in Greece: Ink Wash Drawings by Wendy Snetsinger, opens Sept. 18. Lending Services Lobby. Bess Gompkowski, relief sculpture, Second Floor East. Highlights from the Allison-Sheley Collection, Rare Books Room.

Visual Arts Bldg. Zoller Gallery
Gallery Hours: 9 a.m.-5 p.m., Monday through Friday. Saturdays and Sundays, noon-5 p.m.
Josef Svoboda, work in theatre design, through Sept. 26.

It's not Spiderman snaking his way up a building, but a workman making repairs to the University's outdoor swimming pool.

Safety manager directs emergency readiness at Beaver Stadium

Darkness brings a frosty chill to Beaver Stadium on autumn evenings. It also brings an eerie silence.

But on football Saturdays, Howard O. Triebold Jr. and several other volunteers patrol the grounds and surrounding open fields long after the other fans have gone home.

"We come early and stay late," says Mr. Triebold, Penn State's safety manager and chief of the University's 90-member emergency squad.

With 83,000 fans on hand for the average home game, Beaver Stadium becomes a medium-sized community, with all the individual dramas that might occur in any town of that size on a given afternoon. The emergency squad, made up of trained volunteers, offers medical help and other services at football games and other Penn State events.

"In September, we treat heat exhaustion; in November, frostbite," Mr. Triebold says. "Our job is to make certain that fans in need of help receive it promptly."

The stadium's emergency room has six beds. During the average game, from 20 to 25 people are treated. Last year, one woman became very ill after eating a piece of cake that contained vegetable oil, to which she was allergic.

"She was really in bad shape at first," says David Lindstrom, a supervisor on the squad, "but following emergency treatment, she was able to return to her seat and watch the rest of the game."

The squad is often busiest on Homecoming Saturdays. Those games draw an older crowd. There is more excitement. And more people overindulge in alcoholic drinks.

"No matter how good our emergency squad is, it can't provide an antidote to alcohol abuse," says William Eck, associate professor of health education. Dr. Eck serves on the board of directors of

the National Council on Alcoholism and is co-director of Penn State's Total Alcohol Awareness Program. He also is chairman of a committee that deals with alcohol-related problems at Beaver Stadium games.

A significant number of the accidents and illnesses that occur at each game are related to alcohol use. With the support of football coach Joe Paterno, Dr. Eck and his associates sent a letter this year to all season ticket holders, urging them to support the University regulation that prohibits alcoholic beverages in the stadium. A similar letter was mailed last year.

In addition, the committee placed a coupon for fans to fill out, to identify problem areas in the stands, in last year's football program. A similar coupon is in use this year.

"It's just a small minority of people who are causing the problem," Dr. Eck says. "They think alcohol will keep them warm on a cold day, which isn't true, or that it won't affect their perception of the game. People who drink too much ruin the game for themselves and for others around them. The activities of our committee are all part of the goal of making the games more enjoyable for everyone."

"We've seen a lot of sad experiences that could have been avoided if somebody hadn't been drinking," Mr. Triebold adds. "It's really frustrating for us to see these things happen so needlessly."

"Because there are people watching out for others," adds Mr. Lindstrom, "a lot of would-be tragedies don't happen at the stadium."

Heart-related problems are one of the most serious problems the emergency squad encounters. There are usually several coronaries in a season, some serious.

"We wish we didn't have any, of course," Mr. Triebold says, "but actually we can provide care to these victims in

John Grove scans Beaver Stadium for potential problems.

Photo: Scott Johnson

Beaver Stadium probably more quickly than they could receive it anywhere else."

Everyone who serves on the emergency squad has had medical training that is regularly updated. The squad includes first aid personnel, emergency medical technicians, paramedics and three physicians from the Hershey Medical Center.

In addition, there are three cardiac care stations, with equipment for serious emergencies, and three ambulances standing by. ROTC personnel man walkie-talkie radios to call for help when it is needed. Some volunteers on the squad are Penn State students or faculty or staff

members. Others have no University connection.

"We have one group that comes all the way from Selinsgrove," Mr. Triebold notes. "And there's a paramedic, a former student, who comes from Pittsburgh."

Wearing white helmets so fans will know where they are, squad members divide into pairs and scan the stands for signs of trouble.

"You can always tell when something has happened," Mr. Lindstrom says. "First, all the heads in the area turn toward the person who needs help. Then they turn — almost in unison — to look for a white helmet."

Faculty Senate

(Continued from page 2)

In addition, the Senate agreed to retain the present 10-day add period and the present 21-day drop period.

The Calendar Conversion Council, represented by its chairman, James B. Bartoo, dean of the Graduate School, reported that it has had nine meetings, each of which involved from 15 to 20 people and lasted for approximately three hours.

Noting that the Council has thus far dealt with eight major issues, Dean Bartoo referred the Senators to the July 9 edition of INTERCOM, which includes all the topics discussed and a centerfold timetable for the conversion process.

He further observed that three topics — summer sessions, faculty contracts and sabbaticals — continue to be of major concern and that committees have been appointed and are at work. Chairmen of the committees, to whom questions and input should be directed, are: summer sessions, Henry J. Hermanowicz; faculty contracts, Richard L. McCarri; and sabbaticals, Wendell V. Harris.

In other business, the Senate heard a legislative report from a special committee on Computer and Informational Systems, which proposed several means by which the University could more efficiently and with more unity utilize its computer and informational systems. Action on the report was deferred until the next meeting.

The Senate also heard informational reports from a special committee on the Freshman Year Experience, its Committee on Academic and Physical Planning and the Committee on Undergraduate Instruction's annual report on the Division of Undergraduate Studies.

Senator replacements announced during the meeting are: College of Business Administration, G. Edward Phillips for John E. Shendan; Behrend College, Roland E. Larson for Chester L. Wolford, Jr.; Capitol Campus, Sandra Prince-Embury for Jacob DeRooy; College of Engineering, William J. Ross for Nunzio J. Palladino; College of Human Development, Arthur H. Patterson for Michael A. Smyer; and College of Liberal Arts, Robert O'Connor for Philip A. Klein.

Funds reported for '80-81 renovations

Improvements and renovations to the University environment and facilities received the largest amount of undesignated funds allocated this past year within the University.

"A total of \$322,542 in undesignated funds was allocated during the 1980-81 fiscal year," Richard E. Grubb, senior vice president for administration, told Trustees.

"Undesignated funds contributed by alumni and friends of the University are allocated by the president of the University to high priority needs when other sources of funds are not available or not appropriate for meeting those needs," he said.

Improvements and renovations of campus environment and facilities were allocated \$88,800 in undesignated funds. Another \$73,679 was marked for equipment purchases. A total of \$63,600 went for support of scholarships and fellowships, while support of academic programs accounted for \$54,463. Enrichment of campus life and culture accounted for \$42,000.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed since the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotions may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Sept. 24, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (FES-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

EMPLOYMENT SPECIALIST, OFFICE OF PERSONNEL ADMINISTRATION, UNIVERSITY PARK Outlets include recruitment, interviewing and placement of applicants with a wide variety of backgrounds and experiences. Assist in filling job vacancies through internal programs of promotion. Assist in determining salaries. Provide information regarding employment policies, procedures and regulations to applicants, employers and supervisors. Prepare reports and records reflecting the activity of the Division. Involves interaction with many levels of administrative, academic and professional staff members. Bachelor's degree, or equivalent, preferably in personnel administration or related fields, plus a minimum of two years related administrative experience.

BOOKSTORE MANAGER, PENN STATE BOOKSTORE, ALLENTOWN CAMPUS Responsible to the director, Penn State Bookstore System, for various functions within the Bookstore, to include purchasing, financial records, and retail operation of the Allentown Campus Bookstore. Determines the quantity of textbooks, associated test materials, supply items and equipment items for each student registration period and assures that necessary items are available at the proper time. Responsible for control of cash, preparation of report of cash receipts. Prepare periodic financial reports. Approve invoices for payment. Supervise one to two part-time employees. High school education plus one

to two years of retail experience. Management experience preferred. Knowledge of retailing principles and experience essential.

ELECTRONIC DESIGNER, COLLEGE OF ENGINEERING, UNIVERSITY PARK Responsible to director, Electronic Design Services, for designing and selecting components for electronic apparatus, establishing calibration facilities, and advising and consulting with electronic users. Associate degree or equivalent in electrical or electronic technology, or military electronics training, plus three to four years of effective experience in electronic design, layout, performance testing and calibration.

COORDINATOR OF FINANCIAL AID, GRADUATE SCHOOL, UNIVERSITY PARK Responsible to the dean of the Graduate School for the overall administration of the Graduate School financial aid program, counseling graduate students, and the development and coordination of financial aid awards within federal, state, private and institutional provisions. Master's degree (or equivalent) in student personnel, higher education, business or public administration, plus two to three years of effective financial aid experience including experience and knowledge of data processing routines as applies to information systems. This was previously advertised as a Fixed Term 1 appointment.

Funding Sources

For further information, call 865-1375

066-1) The Oeefene Department plans to sharply increase its spending in basic research in fiscal 1982 (beginning Oct. 1, 1981). Research spending will not be subject to current budget cuts. A 17 percent increase in research spending at universities is expected, totaling \$519.5 million in fiscal 1982. An additional 12.5 percent increase is anticipated in fiscal 1983. The military plans to move from 40% to 50% the amount of its research done at universities to take advantage of the availability of scientists. Areas of interest include: oceanography, materials research, biological and medical sciences, mechanics and energy conservation, and atmospheric science. (Ref. Chronicle 9/9/81).

Penn State Intercom

University reorganizes UDIS and MLR into new single Division

The University Division of Instructional Services (UDIS) and the Division of Media and Learning Resources (MLR) have been reorganized, to trim administrative costs and expand service to faculty members.

The action was partly the result of an external program review initiated last winter by Dr. Robert E. Dunham, vice president for undergraduate studies. The reorganization was designed chiefly by Dr. Dunham and Dr. Robert J. Scannell, vice president and dean of the Commonwealth Educational System.

"We think this is precisely the sort of thing the University should be doing at this point in time," Dr. Dunham said, in describing the changes. "We've streamlined the operations, but made them better in the process."

"We had two general goals," Dr. Scannell added. "We wanted to provide service more efficiently and to create a situation in which Penn State might become a leader in the rapidly evolving instructional technologies."

The reorganization, Dr. Dunham and Dr. Scannell believe, will eliminate duplication of service in some areas.

Instructional services will be offered to faculty members through three administrative units. They are:

- An Instructional Development Program,
- A University Testing Services and
- A University Division of Learning and Telecommunications Services.

No additional University funding has been provided for the new units.

The Instructional Development Program, Dr. Dunham said, "will serve as a catalyst, providing information on the quality of teaching and learning at Penn State, and offering consultation to faculty members." Its offices are located on the

third floor of Grange Building.

Donald W. Johnson, who will head the program, has been named assistant to the vice president for undergraduate studies. He was formerly director of UDIS.

Among other things, staff members will:

- Maintain up-to-date information on funding opportunities for instructional improvement;
- Publish a monthly newsletter for faculty members;
- Develop activities, such as workshops and discussion sessions, for faculty members;

— Prepare and disseminate a packet of information for new faculty members, alerting them to available services and resources and stressing the importance of quality teaching;

— Identify and put into contact with each other faculty members with similar instructional interests;

— Establish a Faculty Associates Program for faculty members who would work part-time on instructional improvement projects;

— Manage and catalog resource materials in the field;

— Provide, on request, confidential

consultation on teaching topics to faculty members.

Edmonds Marks, formerly head of Undergraduate Studies Research Support, will direct the new University

(Continued on page 3)

Faculty sought for search group

Elected members of the University Faculty Senate Council, at their last meeting on Sept. 22, recommended faculty members to serve on the Presidential Search and Screen Committee.

"From the list suggested by this group, the Senate Committee on Committees and Rules and the Graduate Council, the officers of the Senate will choose a balanced slate of nominees to present to the Trustees," says Nancy M. Tischler, Senate chairman.

She explains that any faculty member who wishes to recommend additional faculty members from University Park or from campuses other than University Park should provide their Senate Council representative with the person's name and a brief description of his or her qualifications before the Senate's next regular meeting on Oct. 6.

"It's important to note that the nominees need not be Senators," Dr. Tischler adds.

The Senate officers will be nominating: two (2) members of the Graduate Council; two (2) faculty members from campuses other than University Park; and four (4) faculty members from University Park.

President takes steps to protect football games' property rights

The University has taken further steps to protect property rights in the broadcasting, telecasting and cablecasting of its football games.

In a letter to Dr. James Frank, president of the National Collegiate Athletic Association (NCAA), President Oswald noted that the NCAA "is without authority as it relates to Penn State at this time to make any contractual commitment for 1982 and subsequent years with any television network to telecast Penn State football games."

Dr. Oswald also wrote to Charles M. Neimas, executive director of the College Football Association (CFA), noting that Penn State elects not to be bound at this time to CFA's agreement with the National Broadcasting Company.

Both the NCAA and the CFA were

notified that they may not, without the written consent of Penn State, "act as agent on behalf of the University with respect to the sale, transfer or other disposition of the property rights of Penn State to broadcast, telecast or cablecast its football games."

"Penn State is taking this action," wrote Dr. Oswald, "so as to have a reasonable opportunity to review carefully the action on amendments at the special convention called by the NCAA in early December."

In an announcement earlier this month, the NCAA said it would hold a special convention Dec. 3-4 to consider

reorganizing the NCAA Division I-A.

Under consideration will be a plan to divide the 137-member division into separate divisions, according to the size and quality of their football programs.

Chairman says Council of Academic Deans is 'one of strongest'

Dean Forth

As dean of the University Libraries, Stuart Forth is well-versed in the sharing of information and ideas.

This year as chairman of the Council of Academic Deans, he intends to facilitate the group's exchange of information and ideas, while maintaining a focus on the Council's primary role: advising the President and Provost about matters regarding University-wide academic policy and matters relating to it.

Based on his experience at three other large public universities, Dr. Forth notes that Penn State's "is one of the strongest group of academic deans" he has known.

"Perhaps the only unique personal trait I bring to the chair of the Council is that I constantly work with all colleges and all Commonwealth Campuses through my administration of the University Libraries," he says.

"This, I hope, gives me a perspective on how the University might best meet the needs and concerns of individual academic units while still meeting University-wide priorities and goals."

Dr. Forth was elected to a one-year term as chairman of the Council by its members, who include the University Provost, the deans of the University's colleges, Commonwealth Campuses, the Graduate School, Behrend College, Capitol Campus and the University Libraries.

The Council, which meets bi-weekly,

normally conducts its business without taking formal votes on issues discussed. Rather, its recommendations are generally arrived at by consensus, with a quorum of nine members required.

"While one of the Council's major functions is to share ideas and discuss issues and policies — which is very important at a University of this size and complexity — the Council does have a clear service function as well," Dr. Forth notes.

That function, he says, is to assist — through its advice — in both establishing and meeting University-wide goals and priorities.

"The Council needs to be kept abreast of the President's views on policy matters and of the various pressures and problems confronting the University so it may initiate, on occasion, recommendations to other units of this complex institution."

"In short, the Council wants to be helpful to the Administration, and to the University Faculty Senate, in any way it can, but especially through creating a positive climate for taking action on important issues," he explains.

One of the most important issues, he says, centers on maintaining and increasing the quality of a Penn State education.

"This is not to say that the University is facing a crisis in educational quality," Dr.

(Continued on page 6)

Speech Communication starts new English language center

The Department of Speech Communication is launching its new Center for English as a Second Language this fall.

Situated in 305 Sparks Bldg., the center is the successor to the former Language Testing Center, whose function ceased in 1979, when the Graduate School adopted the Test of English as a Foreign Language as a requirement for admission and graduation of international students.

The Center for English as a Second Language was proposed by a committee which included representatives of the Graduate School and language departments. It is responsible "for providing English language instruction primarily for international graduate students," says Dr. John Hinds, the new director. "We do this by providing a series of programs."

The Center currently offers three sections of English as a Second Language (ESL): speaking and listening, reading and writing, and a new section — in response to a University Faculty Senate recommendation for international students who intend to become teaching assistants.

Approximately 50 students are enrolled in the three ESL sections this fall. The ESL staff includes one full-time instructor, Gale Duque, and several part-time instructors.

The center also offers the Intensive English Communication Program (IECP), a non-credit, nine-week course for which students spend 25 hours per week in class.

The IECP offers classes on four levels of ability, with a fifth level being planned, Dr. Hinds says.

Another feature of the center is the Conversant Program, in which American students are paired with international students to participate in, and talk about, a wide range of shared activities. The program is operated by work-study students, but the American volunteers come from all parts of the University.

Dr. Hinds says that the Center plans to increase its scope of activity.

"We will be involved in the development of new courses for a master of arts degree in speech communication, with an emphasis in teaching English as a second language (TESL). We'll also be involved in a certification program in TESL for students in other departments."

"In addition, we would like to find ways of serving visiting scholars and faculty members who come to Penn State on exchange programs and want to improve their English proficiency. We also would like to set up innovative, perhaps non-credit, courses for students who cannot take our normal courses for credit."

The Center will try to develop programs similar to the "Intensive English Communication Program for Japanese Teachers" for other nationalities. Now in its 12th year at Penn State, the month-long program immerses Japanese teachers in American culture and prepares them to deal — in English — with various aspects of American life.

United Way

AT WORK

Campaign will begin Sept. 29, end Oct. 2

University Park's 1981 United Way campaign begins Sept. 29 and continues through Oct. 2.

More than 300 University employees have volunteered their time to personally contact the nearly 7,000 employees on behalf of the 28 member agencies of Centre County United Way.

The personal solicitation campaign, initiated in 1980 and resulting in a record contribution of more than \$103,000, is designed to give all employees an opportunity to contribute to the Centre County campaign or the United Way in the area where they live. Contributions can be made by direct payment or payroll deduction.

Each employee will receive a contribution card and brochure describing the Centre County United Way agencies. Completed cards are to be returned to the United Way volunteer in sealed envelopes to safeguard confidentiality of response. Volunteers can supply code numbers for other United Way agencies in the state to

which the money can be directed and answer questions about the United Way program.

In Centre County, Easter Seals is included as one of the member agencies for the first time. The admittance of Easter Seals, a major health agency, is seen as a way to benefit both the agency and United Way by offering a wider range of services funded by one annual campaign.

Other agencies funded in Centre County include Red Cross, Centre County Home Health Service, Association for Retarded Children, Centre Crest Auxiliary, Youth Services Bureau and the Big Brother-Big Sister Program, Community International Hospitality Council, Childbirth Education Association, Rape/Abuse Crisis Center, Skills of Central Pennsylvania.

Centre County Library, Boy and Girl Scouts, Mid-State Literacy Council, Community Alternatives in Criminal Justice, Voluntary Action Center, Society of Crippled Children, Counseling Service, Associated Charities, Transient Fund, On Drugs, Inc., Strawberry Fields Day Camp and the Community Nursing Service of Philipsburg.

Honor society seeks to identify members

The local chapter of Phi Beta Kappa is seeking to identify faculty and staff who were elected to the national honor society as undergraduate or graduate students. They are eligible for membership in Lambda chapter.

Phi Beta Kappa members among the faculty and staff are invited to add their

names to the mailing list of Lambda chapter by contacting one of the secretaries or other members of the Executive Committee: Al Triolo, Italian, president; Roland Good, Physics, and Martha Kolln, English, secretaries; M. Thomas Pigott, Applied Research Lab, treasurer; Catherine Carter, Library, historian; Donald G. Dickson, Admissions, and William Riesser, Industrial Engineering, members-at-large; and Philip Klein, Economics, past president.

Male subjects sought for research project

Neil Vroman, a doctoral student in the Interdepartmental Research Program in Physiology, is seeking subjects to participate in a research project.

The study, part of the PHS-Obesity Grant under the direction of Dr. E. R. Buskirk, director of the Noll Laboratory

for Human Performance Research, will investigate the possible differences between lean and obese men with respect to their physiological responses to physical exercise in the heat.

Criteria for the male subjects include either being *overweight* or *of average weight*, and *physically inactive* (not presently engaged in any form of regular physical activity). Interested persons may contact Mr. Vroman at Noll Lab, phone 865-2432.

From the Trustee Docket

Trustees approve lease renewal at UP airport

Trustees have approved renewal of a three-year lease of land at the University Park Airport to the Centre County Airport Authority.

The land, approximately three acres, is used for the Authority's temporary terminal facilities, including the ticket office, waiting room and vehicle parking lot.

The University first leased the land to the airport authority in 1978. Under the terms approved by the Trustees, the lease renewal is effective through June 30, 1984.

\$25,000 or more to the project has been approved by Trustees.

Construction of the Sports Complex, a project of the Penn State Fund Council, is being supported entirely by private contributions.

The Complex includes a year-round skating rink, a small practice rink and a support building housing meeting rooms, offices, showers and locker rooms.

Trustees approve land purchase at Schuylkill

Purchase of an 0.6-acre tract of land and the house upon it from the Schuylkill County Commissioners has been approved by Trustees.

The property, which adjoins the University's Schuylkill Campus, has been offered at its appraised value of \$17,500.

A safer, more convenient access to the campus from Pennsylvania Route 61 will be built on the property, University officials explained.

Calendar Council approves design of workload study

The Calendar Conversion Council has approved the design of a study to provide information on instructional workload of faculty. Data are to be available this fall.

A joint memorandum has been sent from the Council and the Faculty Senate Curricular Affairs Committee to academic program officers clarifying the procedure for submission of program changes in conjunction with the calendar change.

The Council also is studying the possibility of recommending that courses be renumbered in the semester schedule.

In other business at its Aug. 27 and Sept. 10 meetings, Council:

— Adopted and circulated to the University community principles on which the class schedule for University Park should be based.

— Discussed the problem of the appropriate procedure for learning as soon as possible whether the course offerings planned in 1983-84 will meet programmatic needs of students, can be housed in facilities available, and can be delivered by the existing faculty.

— Heard the Standing Summer Session Committee report it expects to make final recommendations by December. The

committee has been divided into three subcommittees to consider academic programs, budget and fiscal matters, and administrative and management

arrangements of the new summer session. — Received a report from the Faculty Contracts Committee indicating the basic issue is whether a new contractual system for faculty is appropriate. Council was reminded of the University commitment that no faculty salary will be reduced as a function of the calendar change.

— Heard a brief report on the continuing question of adaptation of University data systems to accommodate the semester schedule.

At the invitation of the Council chairman, several committees of the University Faculty Senate have regular representation at Council meetings. Committees normally represented include Academic and Athletic Standards, Academic and Physical Planning, Commonwealth Campuses and Continuing Education, Curricular Affairs, Faculty Affairs, Research, and Undergraduate Instruction.

The Calendar Conversion Council again invites communication from any individual or group within the University community. Council offices are in 304 Old Main, phone 865-0491.

University leads nation in technology degrees

For the tenth consecutive year, the University conferred the most engineering technology associate degrees in the nation last year. According to the Engineering Manpower Commission of the American Association of Engineering Societies, 699 students graduated in 1980 from Penn State's two-year engineering technology programs.

To date this year, there have been 852 graduates of such programs.

The two-year associate degree programs in engineering technology provide training for careers in product design and operations, solar testing and air pollution control, as well as testing, chemical, electrical, highway, mechanical, nuclear, surveying, telecommunications and railway technology.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

New Division

(Continued from page 1)

Testing Services. He will report to Dr. Dunham.

He and his associates will offer help to faculty and staff members in three general areas: the design, production, processing and administration of tests; the design and processing of machine-read documents and forms; and research and data analysis related to undergraduate studies.

"In particular, help will be offered in such areas as test item writing and editing," Dr. Dunham noted.

UTS also will handle the computerized production of tests for faculty members, and machine-scoring and other forms of

test processing. Staff members will administer, to individuals and groups, selected proficiency and placement tests.

Other services to be offered include:

- Maintaining a Testing Information and Materials Resource Center;

- Analyzing tests used in the Division of Undergraduate Studies' Freshman Testing, Counseling and Advising Program;

- Providing staff support to the University Proficiency and Placement Testing Committee, which reviews proposals for the tests given to all new freshmen.

In addition, University Testing Services will assist with the machine-scanning of student admissions applications, course scheduling forms and other documents.

Its offices are located on the second floor of Mitchell Building.

The University Division of Learning and Telecommunications Services combines the media resources of WPFX-TV and Broadcasting Services with those of the former UDIS, Listening and Learning Services, Audio-Visual Services and Independent Study by Correspondence.

Its director and general manager will be Marlowe Froke, formerly director of the Division of Media and Learning Resources. It will be administered through the Commonwealth Educational System.

The new division is composed of:

- University Graphics Services, directed by Richard S. Rosenfield;
- University Photographic Services, John P. Mertz;

— A Department of

Telecommunications, combining all television and audio production facilities and the programming of WPFX-TV and PENNARAMA, David L. Phillips;

- Independent Study by Correspondence, David Mercer.

(See below for descriptions of the services available to faculty members and students through the University Division of Learning and Telecommunications Services.)

No existing services have been discontinued in the reorganization, Dr. Scannell said. Instead, he said, the three new units should be able to expand services for faculty members at no additional cost.

University's new Division offers services to faculty and students

Editor's Note: Following are brief descriptions of the services available to faculty members and students through the new University Division of Learning and Telecommunications Services:

UNIVERSITY PHOTOGRAPHIC SERVICES

Photographic Services produces slides, filmstrips, copy negatives, and photographic prints. Photographers provide on-location or studio photography for instruction, research and public service. Processing of color slides, black and white film, duplication of slides, mounting, laminating, and the preparation of display prints are included in the services that are available.

Specialized services include slide/sound presentations, high-speed, animation and time lapse cinematography and special effect slides. Consultation on the preparation, production and presentation of photographic materials is available on request. For information about services and costs, contact John Mertz, director, University Photographic Services, 13 Mitchell Bldg., 865-6507.

UNIVERSITY GRAPHICS SERVICES

Artists with skills in graphic design, illustration, cartooning, and art produce custom designed materials for use in instruction, research and public service. The comprehensive visual service includes preparation of: charts, diagrams, technical illustrations, exhibits, displays, animation, television graphics, overhead transparencies, illustrations for research reports, visual presentations for professional meetings. For information about services and costs, contact Richard Rosenfield, director, University Graphics Services, 15 Mitchell Bldg., 865-0421.

AUDIO-VISUAL EQUIPMENT FOR INSTRUCTION

Equipment and operators for classroom use of instructional materials are provided at no cost to academic departments. Equipment is available to handle all formats including film, video tapes, slides, transparencies, and audio. Equipment and operators should be scheduled at least three days prior to their scheduled use. Faculty may choose to pick up and operate the equipment. For scheduling of equipment, contact: Instructional Services for Classrooms, Audio-Visual Services, 26 Willard Bldg., 865-5400. For scheduling of operators, phone 865-6314. At Commonwealth Campuses and other locations, faculty and staff should contact their designated Instructional Services Specialists.

FILMS AND VIDEO FOR INSTRUCTION

More than 15,000 films and videotapes are available for classroom use at no charge to academic departments. Subject area catalogs are available on request, or they may be reviewed in the catalog card file room, Pattee Library, and in the

Commonwealth Campus Instructional Services Offices and Libraries. Free copies for reference are also available at 26 Willard Bldg.

Film catalogs by title that are available on request are: *Documenting Rural America*, *Films about Women*, *Films for Arts and Crafts*, *Films for Business and Industrial Organization and Management*, *Films for Communication for Language Arts*, *Films for Education and Teacher Training*, *Films for Film Study*, *Films for Health, Safety and Physical Education*, *Films for History and Political Sciences*, *Films for Life Sciences*, *Films for Mathematics and Physical Sciences*, *Films for Sociology*, *Films: The Visualization of Anthropology*, *PCR: Films in the Behavioral Sciences*, *Encyclopaedia Cinematographica: Anthropology*, *Encyclopaedia Cinematographica: Biological Sciences*, *Encyclopaedia Cinematographica: Technical Sciences*.

For copies of film catalogs for personal use, call or write: Reference, Acquisition, and Distribution, Audio-Visual Services, Special Services Bldg., 865-3103. For Faculty at University Park, films and videotapes may be scheduled by calling: Scheduling, University Park, 865-6314. Faculty at Commonwealth Campuses and other locations should work through their designated Instructional Services Specialists.

DIAL-ACCESS (Audio)

Audiotape instructional programs and services are available through Dial-Access. The control point for Dial-Access is 10 Pinchot Hall where tapes are placed by faculty for instruction, research, and public service. The tapes may be dialed from more than 150 listening stations on the University Park Campus, including: Pattee Library, Pollock Undergraduate Library, Hammond Building Library, Deike Building Library, 3 Sparks, 15 Pinchot Hall, Rackley Curriculum Materials Center, Leete Hall Reading Room, Leete Hall Language Interest House, Kern Graduate Bldg., HUB Music Room, Ritenour Health Center. For a listing of available audiotape instructional programs and services, and for information about preparation and placement of new materials, call: Audio-Visual Services, 13 Pinchot Hall, 863-1325.

LEARNING CENTERS

Three University Learning Centers for required or suggested audio and visual assignments are available to faculty and students: 6 Sparks Bldg., 301 Business Administration, 10 Human Development Bldg. The Learning Centers are equipped with videocassette players, audiotape players, and other audio-visual equipment. Faculty may place instructional materials in the Centers for use in their courses. For information and assistance call: Audio-Visual Services, 13 Pinchot Hall, 863-1325.

AUDIO PRODUCTION SERVICES

Recording of visiting lecturers and performers are common uses of Audio

Production Services. The tape recordings are then made available for use in the Learning Centers or on Dial-Access. Audio Production Services can also produce audio programs for use in instruction, research, and public service. Services are available for cost of labor and materials. If recordings of lecturers or performers are requested, faculty and academic departments must provide written approvals from the person to be recorded. For information and scheduling, call: David McCarty, Audio Production Services, 865-1993.

TELEVISED INSTRUCTION, MULTI-SECTION COURSES

Interaction between students and teacher in simultaneous multi-section courses is available through televised instruction. Facilities include a television studio in Mitchell Building from which the faculty member teaches. The television studio is connected to 21 classrooms where students gather at the scheduled time. Each classroom is equipped with audio facilities through which the teacher receives and responds to questions. The facilities make it possible to reach up to 700 students at one time, yet provide a small class environment for the student. For information about use of Televised Instruction for Multi-Section Courses, contact: J.D. Carter, Educational Services, Mitchell Building, 865-7548.

INDEPENDENT STUDY BY CORRESPONDENCE

Academic departments and faculty who wish to prepare their courses or individual units of their courses for independent study by their students may consult with course development specialists. More than 200 courses in the Open Learning design are already available. A variety of media may be used, including print, video, audio, slide/tape sets, and others. Because of the complexity of course development, the preliminary consultation is followed by detailed planning and budgeting which involves meetings at the departmental, college, and campus level. For information, call or visit: David Mercer, director, Independent Study by Correspondence, 865-5403, or Gary Miller, assistant director, Educational Services, 865-3637.

OBSERVATIONAL TELEVISION CLASSROOM

Faculty and teaching assistants who wish to observe their classroom presentation techniques for purposes of self-criticism may schedule the observational television classroom in 2 Sparks Bldg. The classroom can comfortably seat a class of 30 or fewer and is equipped with fixed television cameras. A simple studio with controls provides video recording capability. Faculty and teaching assistants may schedule their classes occasionally in the observational television classroom, record the class, and then play back the tape for their own self evaluation. The observational television classroom may also be scheduled by individual faculty or teaching assistants who wish to simulate a

classroom presentation, record it, and then play back the recording for their use. For information and scheduling, call: Audio-Visual Services, 13 Pinchot Hall, 865-1325.

DESK CALCULATOR LABORATORY

A laboratory has been established in Rooms 6 and 7 Sparks Bldg. for use by students in courses that require access to electronic desk calculators. Classes of 28 students or fewer may be scheduled in Room 7 on a regular or periodic basis, and students may study independently in Room 6. Independent study is possible in Room 7 when not scheduled for classes. Calculators available are Monroe Models 1920 and 1930. For information and scheduling, call: Audio-Visual Services, 13 Pinchot Hall, 865-1325.

AUDIO RECORDING

Most of the large classrooms at University Park are connected by line to recording equipment at Pinchot Hall. Faculty may have their classroom presentations recorded for later review by their students through Dial-Access (see description of facilities under Dial-Access). Classrooms from which this service is provided are Electrical Engineering 115B, Buckout 112, Chambers 102, Altitude Laboratory — Auditorium, Eisenhower Auditorium, Mineral Science 26, Forum Building 102, 105, 108, and 111, Osmond Laboratory 119, Schwab Auditorium, Sparks 10, 121, Armsby 215, Borland Laboratory 119, and Chandless Laboratory 112. For faculty who are scheduled in these classrooms and who wish to use the service, call: Audio-Visual Services, 13 Pinchot Hall, 865-1325.

PREVIEW OF INSTRUCTIONAL MATERIALS

Faculty may preview films or video to evaluate their appropriateness in instruction, research and public service. For extended study of films and video, faculty are encouraged to use facilities available at Special Services Building. Previews can also be scheduled for 26 Willard Bldg. or any of the Learning Centers — 6 Sparks Bldg., 301 Business Administration, 10 Human Development Bldg. When requesting previews, please designate the place, time and date. For preview scheduling, call 865-6314.

ACQUISITION OF FILMS AND VIDEO

Films and video for classroom use are acquired by Audio-Visual Services on recommendation of faculty. Through Reference, Acquisition, and Distribution Services, information about available visual materials from all sources in the United States and other countries may be reviewed and recommendations made. Acquisitions will be made based on available funds. For consultation and recommendations on acquisitions, contact: Reference, Acquisition, and Distribution Services, Special Services Building, 865-3106.

Penn Staters

Dr. Z.T. Bieniawski, professor of mineral engineering and director of the Mining and Mineral Resources Research Institute, returned recently from an invited lecture tour in Poland.

Under the sponsorship of the Polish Academy of Sciences and the Technical Universities of Krakow, Wroclaw, and Silesia, he discussed rock mechanics as applied to mining, coal mining research at Penn State, and U.S. methods of graduate instruction. While in Poland, he also visited a number of research institutes and laboratories doing working in mining and tunneling.

Dr. Reginald A. Deering, professor of molecular and cell biology, was an invited speaker at the International Workshop on Gene Expression and Membrane Changes in Cellular Slime Molds sponsored by the European Molecular Biology Organization and the Max-Planck Institute for Biochemistry in Tübingen, Germany. He presented a paper entitled, "DNA Repair in Dictyostelium Discoideum," and participated in a poster session entitled, "Studies Related to DNA Metabolism in D. discoideum." His co-authors for the poster session were Gregory J. Podgorski and Gordon S. Rule, graduate students, and Robert B. Guyer, senior research technician.

Dr. Mary Jane Irwin, assistant professor of computer science, has been named an Association for Computing Machinery (ACM) Lecturer for 1981-82. She is one of seven specialists selected to lecture on computer architecture at ACM chapters throughout the country.

Dr. Joseph Jordan, professor of chemistry, was elected chairman of the Commission on Electroanalytical Chemistry of the International Union of

Pure and Applied Chemistry at its recent general assembly in Leuven, Belgium.

Dr. Jeffrey S. Lannin, associate professor of physics, presented two papers and chaired a session on Amorphous Solids at the International Conference on Phonon Physics in Bloomington, Ind., this month.

Dr. Emilia E. Martinez-Brawley, associate professor of social welfare, has been appointed to the Commission on Accreditation of the Council on Social Work Education (CSWE). The national 26-member body is responsible for the formulation of accreditation standards and policies for graduate and undergraduate social work education and for final decisions on the accreditation of college and university programs in social work.

Longwall-Shortwall Mining, State of the Art, a book edited by **Dr. R. V. Ramani**, professor of mining engineering, has been published by the Society of Mining Engineers of the American Institute of Mining, Metallurgical, and Petroleum Engineers.

Dr. Charles Redenius, associate professor of political science at Behrend, has been invited to be a Visiting Research Fellow at the University of Reading in Reading, England. While abroad, he will conduct research on the economic policies of the Thatcher government and the Reagan administration.

Dr. Philip S. Skell, Evan Pugh professor of chemistry, was plenary lecturer at the 28th Congress of the International Union of Pure and Applied Chemistry in Vancouver, British Columbia. His lecture was entitled "Atom Chemistry: Electron Transfer." From Aug. 31 to Sept. 4 he

attended the 3rd International Symposium in Organic Free Radicals in Freiburg im Breisgau, West Germany, where he presented a paper entitled "Pi and Sigma Radicals." He also presented the same paper at the University of Bonn Institute for Theoretical Chemistry on Sept. 7.

Dr. E-Tu Zen Sun, professor of Chinese history, is the author of "Selected Essays in Chinese Economic History," a 205-page volume published recently by the New Asia College Institute of Advanced Chinese Studies and Research, Hong Kong.

The nine articles in the collection represent Dr. Sun's study of the late-imperial era Chinese society and economy. With the exception of a previously unpublished article on the concepts of wealth and frugality in the late Ming, all of the articles deal with aspects of Chinese economy during the Ch'ing period.

Dr. Gary Wegner, assistant professor of astronomy, presented an invited paper at the 4th European Workshop on White Dwarfs held in Paris, France, Aug. 24-27 at the Observatoire de Paris. The meeting was sponsored by the Observatoire de Paris and the French National Center for Scientific Research.

Dr. Donald J. Willower, professor of education, recently made a number of presentations in Australia. He gave the keynote address, "Educational Administration: Some Philosophical and Other Considerations," at the first national conference of Australian college and university teachers of educational administration in Melbourne. He also conducted seminars for faculty members and graduate students in Melbourne, Sydney and Armidale.

In addition, Dr. Willower spoke to the Sydney Council for Educational Administration and at the national meeting of the Australian Council for Educational Administration, of which he

was made an honorary member. He also chaired a panel evaluating the Centre for Administrative Studies of the University of New England, New South Wales, for the Australian Tertiary Education Commission.

Dr. Brent Wilson, professor of art education, presented a keynote address at the 23rd World Congress of the International Society for Education Through Art in Rotterdam, The Netherlands. The title of his address was "The Triumph of American Culture over the Art Educational Establishment. Findings from the U.S. National Assessment of Educational Progress in Art."

While in Rotterdam, Dr. Wilson presented an invited paper at a pre-congress research seminar. His paper dealt with strategies for the crosscultural analysis of themes, structures, and meaning dimensions of children's sequential narrative drawings.

Dr. Thomas D. Yawkey, associate professor of education, served as a guest co-editor of a research issue on children's play for *The Journal of Research and Development in Education*. The issue, published in Summer 1981, contains 20 current research articles written by leading play researchers in the United States and Canada.

Promotions

Faculty

Bruce R. Michie to assistant professor of forest resources.

Staff Exempt

Robert J. Matthews to senior systems analyst in Management Services.
Larry R. Gingrich to assistant director for continuing education at Hazleton.
Guy Houser to janitor foreman in Physical Plant.

Diane K. Hunt to counselor at Wilkes-Barre.
Karen L. Marfurt to supervisor, Cytogenetics Laboratory at Hershey.
Marcia R. Parker to chief technologist, night and weekend service at Hershey.
Walter Simatic to maintenance foreman at Fayette.
J. James Wager to senior systems analyst in Management Services.

Staff Non-Exempt

Mary Dunkle to administrative aide in Health, Physical Education and Recreation.

Clerical

Wendy E. Bathgate to secretary B in Intercollege Research Programs.
Cheryl Boal to secretary C in President's Office.
Norma A. Drayer to secretary B at Hershey.
Norma Lee H. Gruver to senior Clerk in Libraries.
Elizabeth A. Lass to stenographer A in Engineering.
Kathleen Matason to secretary A in Earth and Mineral Sciences.
Lorna V. Stewart to secretary B in Liberal Arts.
Mary Ella Walker to data preparation operator A in Management Services.
Sheba J. Winfree to clerk typist A in Liberal Arts.

Technical Service

Jerry Bierly to maintenance worker utility in Physical Plant.
Charles Creighton to maintenance worker area landscape in Physical Plant.
Ralph Garrett to maintenance worker utility in Physical Plant.
Richard Iddings to maintenance worker area landscape in Physical Plant.

Mr. Davy

Mr. Loesch

Mr. Walker

Mr. Vonada

Ms. Lampman

25-year chairs

The College of Engineering has presented 25-year service awards to five employees: **William A. Davy**, **William J. Loesch**, **Doyle E. Walker**, **Douglas Vonada** and **Joan P. Lampman**.

Mr. Davy, technical services, Breazeale Nuclear Reactor, is a custodian and driver at the University's research reactor facility. He joined Penn State as a food handler in the Department of Foods in 1956. In 1968 he became a stock clerk and driver for the Department of Purchasing.

He joined the Nuclear Engineering Department at the reactor facility in 1970. Before coming to Penn State, Mr. Davy was a member of the Construction Corps of C-Engineering for the U.S. Army Reserves, and he also worked for the Pennsylvania Fish Commission.

Mr. Loesch is a laboratory machinist and instrument maker for mechanical engineering. When he joined Penn State in 1955, he worked in the former diesel lab, where Hammond Building now stands. In the same year he moved to an "impact project" at Pollock dining halls, where he ran a one-man machine shop for five years. In 1960 he went to the Physics Department and worked there as a machinist until 1973. He then returned to the Mechanical Engineering Department,

where his responsibilities include working in the engine lab and machine shop on both student class projects and faculty research projects. A graduate of State College High School, Mr. Loesch was parts manager at Cadillac Garage in State College before coming to Penn State.

Mr. Walker, group leader and machinist in the Mechanical Engineering Department, joined technical services in 1955 in Maintenance and Operations, working with steam and water lines. In 1960 he became an experimental machinist in Mechanical Engineering. He was named group leader in 1973. He is in charge of all shop work and drawings, and works on both student and faculty research projects. Mr. Walker guides students through the machine operations and often works with more than 30 students a day during the term. He helped make pumps and valves for the Hershey Medical Center's artificial heart project, and the valves he made were placed in cows as part of the project experiments. A resident of Bellefonte, Mr. Walker and his wife, Verna, have a son, David, who is a 1970 graduate of the University.

Mr. Vonada, electronic designer at the Breazeale Nuclear Reactor, joined the staff in 1956 as a senior electronics technician in engineering. Before coming to the University he worked at the State College

T.V. Center. He is a graduate of State College High School and Williamsport Technical Institute, where he studied electronic engineering technology and radio communications. He has also done undergraduate work at Penn State in chemistry and physics.

Mr. Vonada, who holds a nuclear reactor operator's license, is in charge of the reactor control systems and is responsible for their safe and correct operation. He also repairs equipment, and designs and builds special electronic equipment used in nuclear research.

Ms. Lampman, coordinator for personnel and administrative assistant for the College of Engineering, was a technical secretary at the Applied Research Laboratory from 1956 to 1965. In 1965 she became an administrative aide in the Department of Aerospace Engineering, where she supervised office procedures and personnel, wrote proposals, reported publicity and maintained faculty biographies, among other duties. She moved to the Dean's Office of the College of Engineering in 1977.

Ms. Lampman is a graduate of the Technical High School of Scranton and of Lackawanna Junior College. She has earned an associate degree from Penn State in letters, arts, and sciences.

Bookshelf

Dr. Toth pens Metalious biography

The novel *Peyton Place*, published 25 years ago this month, was revolutionary in what it said, according to a University researcher whose biography of *Peyton Place* author Grace Metalious — *Inside Peyton Place* — is being published this month by Doubleday.

"No one was ready for *Peyton Place*, says Dr. Emily Toth, assistant professor of English, who began her research on Grace Metalious's life in 1977.

Nonetheless, advance publicity about the novel — which chronicled the underside of life in a respectable, albeit fictitious, New England town — created widespread fascination, debate and demand.

"A week before the September 24, 1956, publication date, *Peyton Place* ranked No. 4 on the nation's best-seller list," Dr. Toth points out. "Ten days after publication, it had sold 60,000 copies, prompting 20th Century Fox to bid on the film option.

Since then, it has become one of the top 10 best-sellers of the century, with more than 12 million sales in paperback copies alone."

The impression *Peyton Place* made on the silent generation ran deep. During her research, Dr. Toth talked to many women and men in their late thirties and early forties who spoke with relish of their first encounter with the novel. Often, they could recite memorable passages verbatim — a quarter century later.

"They said it was the first 'dirty' book they read, although it contained only three of the seven four-letter words banned from the airwaves," Dr. Toth notes.

"To teenagers in 1956, *Peyton Place* represented lust and rebellion — against boredom, conformity, the double standard. Teenage girls noticed that when Allison MacKenzie goes to the big city, she has sex outside marriage, with a man she

doesn't love — contrary to the standards of the day — and is not punished for it.

"It also helped to unite a generation — the first wave of the youth culture — by creating a sense of community among the teenagers who read it. Elvis Presley and Grace Metalious both proclaimed that young people had more choices than suburbia and gray flannel suits."

In many ways, the novel presaged the women's movement, Dr. Toth believes. Countering the feminine mystique of the '50s — that a woman's fulfillment could come only through husband, home and children — it said that a young, single girl could go to the city by herself.

The perceptions of *Peyton Place* are unusual for 1956: that wife-beating is not inevitable; that rape is an act of violence; that abortion can mean saving a life — the mother's.

"Women who depend too heavily on men — for sex, money or a sense of self — lose out in *Peyton Place*," Dr. Toth says. "The winners are the independent women, the ones who — like Allison MacKenzie — make their own choices in life. They're the ones who can have it all."

Dr. Toth with original 'Peyton Place' manuscript, now housed in Pattee Library

Retirements

As far as supervisor Don Weaver is concerned, **Mr. Thomas** could only be described as a "real craftsman." "I worked with him for 18 years," notes Mr. Weaver. "Mr. Thomas was a good, faithful employee . . . very congenial and well-liked by all his co-workers. He really was a first class auto body man and repairer."

Sept. 18 marked Mr. Thomas' retirement from his position in Physical Plant after 20 years of service with the University. He began and ended his Penn State career as an auto-mechanic-body repairer working on University cars and trucks.

Mr. Thomas occupies his spare time watching baseball and football. He's also an avid Penn State football fan and has enjoyed attending the games through the years.

Mr. Thomas is a Centre County native,

who presently lives with his wife, Mary, in Bellefonte. They have two children, Nancy and Peggy, and four grandchildren.

Carpoolers

Dennis Bauer would like to join a carpool from Coleville to the University. He works the 5 p.m. to 1:30 a.m. shift on Sundays through Thursdays. He can be reached at 865-6751.

Sue Cross would like to share driving from Spruce Creek. She works from 8 a.m. to 5 p.m. Call 863-2802.

Joyce White would like to share driving from Centre Hall. She works 8 a.m. to 5 p.m. in Shields Building. She can be reached at 865-1477.

Appointments

Jesse L. Barlow as assistant professor of computer science at University Park. B.A., U. of Kansas; M.S. (Computer Science), M.S. (Statistics), Ph.D., Northwestern U. Post-doctoral fellow, Northwestern U.

Stephen Beckerman as assistant professor of anthropology at University Park. B.A., George Washington U.; Ph.D., U. of New Mexico. Assistant professor, Southern Methodist U.

Karen Bierman as assistant professor of psychology at University Park. B.A., Stanford U.; M.A., Ph.D., U. of Denver. Psychology intern, U. of Washington Medical School.

James I. Bly as assistant professor of media writing and composition at Behrend. B.A., Augustana College; M.A., U. of Minnesota; Ph.D., U. of Northern Colorado. Associate professor, Tarkenton College.

Donald A. Bryant as assistant professor of microbiology at University Park. B.S., M.I.T.; Ph.D., U.C.L.A. Research associate, Cornell U.

Richard S. Carnahan Jr. as assistant professor of educational psychology at Alhouna. B.A., M.A., U. of Colorado; Ph.D., U. of Wisconsin. Statistical consultant, Inter-Varsity Christian Fellowship.

Peter W. Deutsch as assistant professor of physics at Beaver. A.B., U. of Michigan; M.S., Ph.D., U. of Illinois. Post-doctoral fellow, Graduate Center for Cloud Physics, U. of Missouri-Rolla.

Ann C. Crouter as assistant professor of individual and family studies at University Park. B.A., Stanford U.; Ph.D., Cornell U. Associate researcher, Boys Town Center for the Study of Youth Development.

Donka F. Farkas as assistant professor of French and linguistics at University Park. Diploma de Licenta, U. of Bucharest; Ph.D., U. of Chicago.

James D. Foch Jr. as senior research associate, Applied Research Laboratory at University Park. A.B., Dartmouth College; Ph.D., Rockefeller U. Associate professor, U. of Colorado.

Sherman T. Folland as assistant professor of public administration at Capitol. B.A., Concordia College; M.A., Ph.D., U. of Iowa. Acting director, Health Services Administration, U. of South Dakota.

C. William Heald as associate professor of dairy science extension at University Park. B.S., PSU; M.S., U. of New Hampshire;

Ph.D., Virginia Polytechnic Institute and State U. Associate professor, Virginia Polytechnic Institute and State U.

Christopher K. Hertzog as assistant professor of individual and family studies at University Park. A.B., A.M., Ph.D., U. of Southern California. Research associate, U. of Washington.

John V. Hinds as associate professor of speech communication at University Park. B.A., Trenton State College; M.A., Western Illinois U.; Ph.D., SUNY-Buffalo. Assistant professor, U. of Minnesota.

Stephen D. Mastrofski as assistant professor of administration of justice at University Park. B.A., U. of Iowa; Ph.D., U. of North Carolina. Research associate, U. of North Carolina.

Randall R. Myers as assistant professor of mining engineering at New Kensington. B.A., West Virginia Institute of Technology; M.S., West Virginia U. Instructor, Alderson Broadbent College.

Miriam C. Pastrick as assistant professor of art and humanistic studies at Behrend. B.A., Mercyhurst College; M.A., Northwestern U.; Ph.D., U. of Denver. Teaching fellow, U. of Denver.

Rouben Rostamian as assistant professor of mathematics at University Park. B.S., Arya-Mehr U. (Tehran, Iran); M.S., Illinois Institute of Technology; Ph.D., Brown U.

Alan W. Scaroni as assistant professor of materials science (fuel science) at University Park. B.E., U. of New South Wales; M.S., Ph.D., PSU. Engineer, C.S.R. Limited, Australia.

John B. Shea as associate professor of physical education at University Park. B.S., M.S., Springfield College; M.A., Ph.D., U. of Michigan. Associate professor, U. of Colorado.

John E. Smith as associate professor of nutrition at University Park. B.S., West Liberty State College; M.S., West Virginia U.; Ph.D., U. of Nebraska. Research associate, Institute of Human Nutrition, Columbia U.

Dudley C. Snyder as assistant professor of chemistry at Wilkes-Barre. B.S., U. of Pittsburgh; Ph.D., Purdue U. Teaching assistant and supervisor, Purdue U.

Ellen M. Woolford as assistant professor of anthropology and linguistics at University Park. B.A., Rice U.; Ph.D., Duke U. Instructor, M.I.T.

Richard H. Yahner as assistant professor of wildlife at University Park. B.S., PSU; M.S., U. of Tennessee; Ph.D., Ohio U. Assistant professor, U. of Minnesota.

25 year chairs at Ogontz

Two faculty members at the Ogontz Campus — **Patricia M. Overdeer**, professor of mathematics, and **Lynn Wah**, assistant professor of zoology — received 25-year chairs during the Campus's annual faculty meeting on Sept. 1.

Prof. Overdeer came to Ogontz in 1956, bringing with her a varied background of public school and college teaching.

At Ogontz, she has taken a dynamic role in the development of the Mathematics Department and the Campus itself. One of the founders of the Ogontz Campus Senate, she has served many terms as a senator and has been chairman of the group three times, including the current term. She has represented the Campus on the University Faculty Senate unceasingly since 1967, and has been Senate vice chairman and secretary.

Her dedication to the profession earned her the Outstanding Teaching Award in 1973. That same year she was named an Outstanding Educator of America.

Prof. Overdeer

Prof. Overdeer is currently taking graduate courses in computer science at Villanova University. She holds a bachelor's degree from Montclair State College and a master's degree from the University of Delaware.

Prof. Wah came to Ogontz in 1955, after a year of working for the U.S. Department of Agriculture.

Through the years she has primarily taught Continuing Education courses in anatomy and physiology for Nursing Education, a cooperative program that provides college credits for five area hospital nursing schools. However, her schedule has been diversified, sometimes taking her to off-campus sites, sometimes incorporating resident instruction courses.

Prof. Wah earned both her bachelor's and master's degrees in zoology at Penn State. In graduate school she met her husband, Fred, a serologist for the New Jersey Department of Health.

Prof. Wah

Dean Forth

(Continued from page 1)

Forth emphasizes, "Nonetheless, the Council recognizes — and I think rightfully so — that Penn State can, and must, do more to meet the needs of its most outstanding students."

The University Scholars Program, he observes, is one example of positive, university-wide action to increase educational quality, and he believes the Council is as interested in the program as he is.

Approved by the University Faculty Senate and beginning its second year this fall, the University Scholars Program enhances academic opportunities for outstanding students by offering them honors-level work in general courses in the first two years and highly specialized honors-level work during the junior and senior years. It is directed by Dr. Paul Axt, professor of mathematics.

"I addressed the University Scholars at an Honors Convocation on the Altoona Campus," Dr. Forth recalls, "and I was really impressed — not only with the students themselves, but also with what they said the program means to them. It's a well-conceived program and Dr. Axt and other faculty members involved in it are to be commended on its initial success and we are confident of its potential for the future."

Another important issue, Dr. Forth observes, is increasing support for the University Libraries, a matter of university-wide concern.

"Quite frankly, inflation has cut very deeply into the Libraries' funding," he says. "Strong support is needed not only to provide and maintain resources, but also to attract and retain professional, competent personnel."

He notes that the University has made a positive response to the Libraries' needs and that the Council will have opportunities to address the issue.

"Obviously, inflation and tight money affect the entire University, not only the Libraries, and the Council frequently looks at ways to increase efficiency without reducing services," he says.

"As the Commonwealth's land-grant

University and as one of the premiere educational institutions in the state, Penn State must continue to fulfill — and even expand — its mission of providing excellence in teaching, research and service. It is, indeed, the Council's role to support the University's mission."

This effort, Dr. Forth says, results in a "constant state of creative tension, in the sense that the deans must reconcile the University's overall needs with those of their individual colleges."

"It's a very healthy tension, though, for out of it grows the ability to strive for common priorities while being mindful of individual needs and concerns that themselves are important to the well-being of the entire University."

Regarding what he terms the "budget crunch," Dr. Forth says he is confident that "Penn State has enough talent to meet the challenge."

As chairman of the Council of Academic Deans, he says his challenge is to "unify" the talents of the deans in meeting the University's number one priority, fulfilling Penn State's mission.

"It's going to be a demanding year, for all of us, but one that I look forward to. It's very satisfying, for all members of the Council, to assist in shaping the future of this great University."

Sigma Xi to meet Oct. 1

Sigma Xi, scientific research honorary, will hold its first meeting of the Fall Term at 3:30 p.m. Thursday, Oct. 1, at the Noll Laboratory for Human Performance Research. A talk by Dr. E.R. Buskirk, director of the lab, will be followed by a tour of the facility.

Position open

The Center for Air Environment Studies is seeking applications and nominations for a post-doctoral position to study the effects of inadequate Vitamin E and Selenium nutrition on prostaglandin synthetase and lipoxigenase pathways of arachidonic acid metabolism. Experience in enzymology and organic synthesis is desirable. Background in biochemistry/biorganic chemistry preferred. This is a Fixed Term I position starting Nov. 1, 1981. Salary commensurate with qualifications. Applications should be sent to Dr. C. Channa Reddy, Center for Air Environment Studies, 232 Fenske Laboratory.

AND FOOD SERVICES, UNIVERSITY

PARK Responsible for assisting in the supervision of dining hall operation. Bachelor's degree in hotel and restaurant management, institutional management, food nutrition, or equivalent.

Funding Sources

For further information, call 865-1375

087-3 The Resource Information Service (RIS) provides information to faculty and staff to support their mission of obtaining project funding for instruction, research, continuing education and for fellowships. RIS is the liaison between Penn State and the Office of Federal Programs (OFP), Washington, DC. OFP provides Penn State with continuous monitoring of public and private agency programs. RIS reviews information from numerous sources including the Federal Register and the Commerce Business Daily (CBD) and receives direct agency mailings. RIS makes information distributions to faculty and staff and to promote an awareness of public and private programs, responds to faculty/staff inquiries about programs and program contacts and through a Preliminary Proposal Outline (PFO) mechanism, helps locate project support funds with the assistance of OFP and Penn State's Office of Gifts and Endowments (OGIE). For detailed information about available RIS assistance, contact M.R. Kohler, 5 Old Main, 814-863-0715.

From Notre Dame

Outstanding librarian on campus this year

James G. Neal, head of the collections management department at the Notre Dame University Libraries, is at University Park as a Visiting Associate Librarian for the current academic year.

Mr. Neal was one of five outstanding librarians who were awarded internships this year by the Council on Library Resources for its Academic Library Management Intern Program. Under this program, he is working with Dr. Stuart Forth, dean of University Libraries, "to observe, and to participate in, where appropriate, the workings of a large academic library from the vantage point of the dean and key associates."

A native of Plainfield, N.J., Mr. Neal received his B.A. degree in Russian studies from Rutgers University, and his M.A. degree in history and his M.L.S. degree from Columbia University. He also holds the Columbia Library School certificates in advanced librarianship.

Mr. Neal is the author of several articles in the field of librarianship.

James G. Neal

Women's Club to meet

The Faculty Women's Club will hold its fall reception at 7:30 p.m. Wednesday, Sept. 30, in Room 101-102 Kern Graduate Bldg. Membership is open to part-time or full-time women faculty, administrative or staff-exempt personnel or the wives of men in these full-time positions.

Faculty/Staff Alerts

University contribution to TIAA changed

The University makes a contribution to the Teacher's Insurance and Annuity Association (TIAA) on behalf of each faculty and staff member who belongs to that retirement program. The retirement law which permitted the University to use TIAA as an alternate to the State

Employee's Retirement System (SERS) also states that the amount the University contributes to TIAA shall be no more than the rate the actuaries of the retirement board determine to be necessary to fund the SERS adequately.

The amount is reviewed each year by the actuaries, and it may increase or decrease. From July 1, 1980, through June 30, 1981, the amount has been 7.90 percent of salary. The rate which will be in effect from July 1, 1981, through June 30, 1982, will be 6.50 percent of salary.

The contribution rate by faculty and staff members to either retirement system will remain at 5.00 percent of salary.

Voluntary insurance plan is improved

Since 1964, the University has offered a voluntary insurance plan for accidental death and dismemberment (VADD) to all regular faculty and staff members. The plan provides optional amounts of insurance ranging from \$10,000 to \$200,000 and also provides accidental death and dismemberment coverage for eligible dependents.

The following improvements will be made in the VADD coverage effective Nov. 1:

— Coverage for the spouse has been increased from 55% to 60% of the elected Principal Sum (employee amount) where the spouse is the only insured dependent.

— Coverage for the spouse is increased from 45% to 50% of the elected Principal Sum where a spouse and dependent children are covered.

— A "Common Disaster" provision has been added which provides that in the event you and your insured spouse both suffer loss of life due to injuries sustained in the same accident (or within 90 days of the accident), the Principal Sum payable for your spouse's loss of life will be equal to your Principal Sum. The sum payable will be 100% of the Principal Sum for each death.

— The rates have been reduced as follows:

Type and Amount of Coverage

Employee Only	Monthly Rate (c)		Biweekly Rate (c)	
	From	To	From	To
\$ 10,000	.38	.37	.18	.17
25,000	.95	.93	.44	.43
50,000	1.90	1.85	.88	.85
100,000	3.80	3.70	1.75	1.71
150,000	5.70	5.55	2.63	2.56
200,000	7.60	7.40	3.51	3.42

Employee and Dependents	Monthly Rate (c)		Biweekly Rate (c)	
	From	To	From	To
\$ 10,000	.60	.58	.27	.26
25,000	1.50	1.45	.69	.67
50,000	3.00	2.90	1.38	1.34
100,000	6.00	5.80	2.77	2.68
150,000	9.00	8.70	4.15	4.02
200,000	12.00	11.60	5.54	5.35

The month of October is the period when membership or coverage in this plan may be changed. One or more of the following actions may be taken during the month: (1) change the dollar amount of insurance coverage; (2) change from individual coverage to family coverage or vice versa; (3) enroll in the plan as a new member; (4) withdraw from the plan.

To accomplish any of the above changes, obtain a VADD change form from your personnel representative or business manager, complete it and send it to the Employee Benefits Division, 133 Willard Bldg., by Oct. 31. All changes received by that date will become effective Nov. 1.

Thurmond to speak

U.S. Sen. Strom Thurmond, of South Carolina, will speak on "Conservatism in America" at 8 p.m. Tuesday, Sept. 29, in a program sponsored by Colloquy. Sen. Thurmond currently serves as president pro tempore of the Senate.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 1, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

CLAIMS SPECIALIST, CONTROLLER'S OFFICE, UNIVERSITY PARK Responsible to the risk manager for administering and settling the third party and property insurance claims handled by the Risk Management Office, both insured and self insured. Bachelor's degree (or equivalent) preferably in business administration plus two to three years effective experience in handling property and casualty claims with emphasis on worker's compensation. Travel to other University locations for the investigation of claims is required in this position.

ASSISTANT FOOD SUPERVISOR, HOUSING

University Park Calendar

September 24 — October 4 Special Events

Thursday, Sept. 24

Pass-Fail.
Fixed date for meetings involving Commonwealth Campus faculty.
Nursing Consultation Center, "Learning to Relax" series begins, 7 p.m.; Consultation Center. Information, 863-2200.

Commons Film Series, *Planet of the Apes*, 7 and 9 p.m.; Room 112 Kern.
Sports: field hockey vs. Lock Haven, 3:30 p.m.

Friday, Sept. 25

Pass-Fail.
Fixed date for meetings involving Commonwealth Campus faculty.
Craft Demonstration, 11:30 a.m.; Kern Lobby.
Commonplace Theatre, *Stunt Man*, 7 and 9 p.m.; Room 112 Kern.

Cinematheque Film, *McCabe & Mrs. Miller*, 7 and 9:15 p.m.; Room 10 Sparks Bldg.

Interludia Folk Dancing, 7:30 p.m.; HUB Ballroom.
Shaver's Creek Environmental Center, Project Learning Tree Environment Workshop, 7-9 p.m.; 233 Recreation Bldg. Registration, 865-1851.

Saturday, Sept. 26

Fixed date for meetings involving Commonwealth Campus faculty.

Shaver's Creek Environmental Center, Project Learning Tree Environment Workshop, 10 a.m.-4 p.m.; Environmental Center. Registration, 865-1851.

France-Cinema, *Bunuel, The Discreet Charm of the Bourgeoisie*, 7 and 9 p.m.; Room 112 Kern.
Artist Series, Eddie Rabbitt concert, 7 and 9:30 p.m.; Eisenhower Auditorium.

Cinematheque Film, *McCabe & Mrs. Miller*, 7 and 9:15 p.m.; Room 10 Sparks Bldg.

Sports: field hockey vs. Connecticut, 1 p.m.

Sunday, Sept. 27

Commonplace Theatre, *Stunt Man*, 7 and 9 p.m.; Room 112 Kern.

Monday, Sept. 28

Drop deadline.
Preregistration deadline for Winter Term.
Pass-Fail.

Course repeat deadline.
France-Cinema, *Bunuel, The Discreet Charm of the Bourgeoisie*, 7 and 9 p.m.; Room 112 Kern.

Wednesday, Sept. 30

Commons Concert, Allegheny String Band,

noon, Kern lobby.

Robeson Cultural Center, movie, *Paul Robeson - Tribute to An Artist*, 7:30 p.m.; Walnut Bldg. Free admission.

Sports: women's tennis vs. Lock Haven, 4 p.m.
Public lecture, Helene Cixous, professor of English literature and women's studies, University of Paris-Vincennes and Paris-Saint-Denis, on "The Origins of Writing," 7:30 p.m. HUB Gallery.

Thursday, Oct. 1

Shaver's Creek Environmental Center, Hawk Mountain Trip, 6 a.m.-7 p.m. Registration, 865-1851

Nursing Consultation Center, "Learning to Relax" series begins, 3:30 p.m.; Consultation Center. Information, 863-2200.

Sports: baseball vs. Lock Haven, 3 p.m.; field hockey vs. Delaware, 3:30 p.m.

Friday, Oct. 2

Craft Demonstration, 11:30 a.m.; Kern Lobby.
Commonplace Theatre, *Atlantic City*, 7 and 9 p.m.; Room 112 Kern.

Cinematheque Film, *Chinatown*, 7 and 9:15 p.m.; Room 10 Sparks.

Interludia Folk Dancing, 7:30 p.m.; HUB Ballroom.

CSA Coffeehouse, 8 p.m.; Room 102 Kern.
Artist Series, Carlos Montoya, Guitarist, 8:30 p.m.; Eisenhower Auditorium.

Sports: soccer vs. Fordham, 7:15 p.m.; JV football vs. Rutgers, 1:30 p.m.

Saturday, Oct. 3

France-Cinema, Visconti, *Death in Venice*, 7 and 9 p.m.; Room 112 Kern.

Cinematheque Film, *Chinatown*, 7 and 9:15 p.m.; Room 10 Sparks.

Sports: football vs. Temple (all-University Day), 1:30 p.m.; men's cross country, Penn State Open, 11 a.m.

Sunday, Oct. 4

Health Expo '81, 10,000 Meter Race, 11 a.m. Two-mile "Fun Run," 1 p.m.; HUB Lawn. Sponsored by University Health Services and USG.

Shaver's Creek Environmental Center, Guided walk, 1-3 p.m.; Environmental Center.

Commonplace Theatre, *Atlantic City*, 7 and 9 p.m.; Room 112 Kern.

Sports: baseball vs. Bloomsburg (DH), 1 p.m.

Seminars

Thursday, Sept. 24

Ceramic Science 500 Seminar Series, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. A. Badzian, UNITRA, Warsaw, Poland, on "Synthesis and Crystal Chemistry of Diamond-like Materials."

Gerald Stern

He writes a regular column in *American Poetry Review* called "Notes from the River." His poems have been included in a number of anthologies, including *Puskhat Prize* in 1976 and 1979.

In addition to giving a reading, Stern will visit poetry classes. The reading is open to the public.

The first and last sessions are 90 minutes long instead of one hour to permit the checking of blood pressure. Four sessions are held over the five-week period of the programs which involve practice in, and explanation of, relaxation techniques.

A modest fee is charged. Further information may be obtained by calling the Nursing Consultation Center at 863-2200 from 9 a.m. to noon and from 1 p.m. to 4 p.m.

Physics Colloquium, 3:50 p.m.; Room 117 Osmond Lab. W. Plummer, University of Pennsylvania, on "Photoemission from a Nearly Free Electron Metal."

Fuel Science Seminar, 4 p.m.; Room 301 Steidle Bldg. Dr. Douglas McKee, General Electric Co., on "Catalysis of Carbon Gasification." Math Colloquium, 4 p.m.; Room 104 McAllister Bldg. Professor Joseph Bernstein, University of Maryland, on "Modules Over Rings of Differential Operators."

Special Acoustics Seminar, 4 p.m.; Room 73 Willard Bldg. Dr. Robert J. Hooker, senior lecturer in mechanical engineering, University of Brisbane, Queensland, Australia, on "The Quiet Pneumatic Rock Drill Project."

Friday, Sept. 25

Analytical Chemistry Seminar, 11 a.m.; Room 333 Whitmore Lab. Nancy Redman-Furey, on "A Biochemical Application of Enthalpimetry: Thermodynamic of Substrate Level Phosphorylations."

Geography Dept. Coffee Hour, 3:45 p.m.

Room 319 Walker Bldg. John L. Frick, associate professor of American history, on "Religion in the Middle Colonies: Model for a Nation."

Electrical Engineering Seminar, 4 p.m.; Room 123 Electrical Engineering East. Dr. D. J. DiMaria, IBM Yorktown Heights, on "Electrically Altered Memory - Insulator-Fillic Silicon Physics and Performance."

Monday, Sept. 28

MCB Seminar, 4 p.m.; Room 101 Allhouse Lab. Dr. Ming Chiu, Roswell Park Memorial Institute, on "New Approaches to the Characterization of Antigen-Antibody Immune Complexes in Cancer."

Tuesday, Sept. 29

Biology Seminar, 11:10 a.m.; Room S-2 Frear Bldg. Dr. Ron Bohn, assistant professor of anatomy, George Washington Medical Center, on "Regeneration of the Optic Nerve in the Frog: Some New Observations."

Wednesday, Sept. 30

Fuel Science Seminar, 11 a.m.; Room 301 Steidle Bldg. Professor Robert Rowell, University of Massachusetts, on "Stabilization and Structure of Coal-Oil Slurries."

Thursday, Oct. 1

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. P.W. Walsh, Linde Div., Union Carbide, on "Preparation of Coatings by CVD and Plasma Detonation."

Physics Colloquium, 3:50 p.m.; Room 117 Osmond Lab. C. Kim, Johns Hopkins University, on "Gauge Theories and Quantum Elec-

trodynamics."

Fuel Science Seminar, 4 p.m.; Room 301 Steidle Bldg. Dr. C.T. Ratcliffe, Exxon Research and Engineering Co., on "Unusual Reaction Chemistry of Selected Sulfur Compounds with Al."

Math Colloquium, 4 p.m.; Room 104 McAllister Bldg. Professor M. Delour, Université de Montréal, on "The Role of the Product Space in the Theory of Linear Systems with Delays in State and Control Variables."

Friday, Oct. 2

Analytical Chemistry Seminar, 11 a.m.; Room 333 Whitmore Lab. Gary Small, on "An Interactive Software System for the Simulation of ¹³C NMR Spectra."

Geography Dept. Coffee Hour, 3:45 p.m.

Room 319 Walker Bldg. Barbara Miller, acquisitions librarian, Schlow Memorial Library, on "Who Reads What: Book Selection and Readership in a Small Town Library."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon-11 p.m. Jim Dupree, paintings; Jani Mershon, weavings, through Oct. 2, Linda Newby, feather jewelry; Ziggy Coyle, clay, opens Sept. 25; Jan Brennis, paintings, opens Oct. 3.

Museum of Art, open 11 a.m.-4:30 p.m.

Closed Mondays, Tours, Sundays, 1:30 p.m. Helmine, Neckline, Streamline: Women's Fashions 1890-1940 from the collection of Beverly Birks, through Oct. 4. An Overview of the Permanent Collection, through Sept. 27. Oriental Works from the Museum's Collection, opens Sept. 27.

Pattee Library: Charles Hollingsworth, paintings, East Corridor Gallery. Travels in Greece: Ink Wash Drawings by Wendi Sneydner, Lending Services Library. Bess Conglevsky, relief sculpture, through Oct. 2; Sandy Sandmeyer, recent works in batik, opens Oct. 2. Second Floor East. Highlights from the Allison-Shelley Collection, Rare Books Room.

Paul Robeson Cultural Center: John T. Harris, works in water color, pencil and other media, through Oct. 3.

Visual Arts Bldg. Zoller Gallery

Gallery Hours: 9 a.m.-5 p.m., Monday through Friday, Saturdays and Sundays, noon-5 p.m.

Josef Svoboda, work in theatre design, through Sept. 26. School of Visual Arts Faculty Exhibition, opens Sept. 28.

Paul Robeson Film Series focuses on life of black actor, singer and athlete

The Paul Robeson Film Series, looking at the life and works of the celebrated black actor, singer and athlete, will be presented at the Robeson Cultural Center beginning Wednesday, Sept. 30.

"It's natural that our center would present the series," says Elmore M. Browne, director of the center, "but it's also important that Paul Robeson be recognized."

"He was a formidable concert musician, an acclaimed Shakespearean actor, a scholar and an All-American athlete. He also was a lawyer and civil rights champion."

Robeson "spoke out against racism and injustice when blacks weren't permitted to do so," Mr. Browne adds, "so his accomplishments were obliterated - whole generations of Americans know little or nothing about who he was."

The series will run on alternating Wednesdays, with all films starting at 7:30 p.m. in the conference room of the Center. "Paul Robeson: Tribute to An Artist" will open the series on Sept. 30. The Academy Award-winning documentary features rare footage of Robeson in "Othello," the longest-running Shakespeare production on Broadway and the first (in 1943) to have a black star with a white supporting cast. "Proud Valley" will be shown Oct. 14, with "King Solomon's Mines" on Oct. 28.

"Sanders of the River" on Nov. 11 and "Showboat" on Dec. 9.

All films in the series are free and open to the public.

Art works exhibited by John T. Harris

An exhibition by black artist John T. Harris will be on display at the Robeson Cultural Center until Saturday, Oct. 3.

Mr. Harris, a native of Philadelphia, was associate professor of art at Cheyney State College until his retirement.

His works have been exhibited at the Pennsylvania Academy of Fine Arts in Philadelphia, New York's Harmon Gallery, Morgan State University in Baltimore and Atlanta University.

His works, in water color, pencil and other media, reflect his extensive travel in Japan, Singapore and other portions of Asia.

Mr. Harris has been honored by Cheyney State College. Also, the Wharton Settlement in Philadelphia presented him with an award for teaching excellence.

He earned his bachelor's degree from the Philadelphia College of Arts and his master's degree in art education from Temple University.

Poet Gerald Stern will give reading

Poet Gerald Stern, author of *The Red Coal* and other books of poetry, will give a reading at 4 p.m. Tuesday, Oct. 6, in the Rare Books Room of Pattee Library.

It is co-sponsored by the Institute for the Arts and Humanities Studies, the English Department and the Pennsylvania Council on the Arts.

Richard Hugo, in reviewing *The Red Coal*, said Stern "moves into the forefront as one of our finest, least dispensable poets."

Stern, who lives in Easton, Pa., last year received the first Governor's Award for Excellence in the Arts. His 1977 book, *Lucky Life*, was the Lamont Poetry Selection that year of the Academy of American Poets.

Other books by Stern are *The Pineys*, 1971, and *Rejoicings*, 1973. He has had poems and prose articles published in numerous magazines and journals, and

'Learning to Relax' begins this evening

The University's Nursing Consultation Center will conduct its "Learn to Relax" program several times this year.

The first program begins at 7 tonight. Another series is tentatively set for Oct. 1 at 3:30 p.m. Starting dates are postponed occasionally to assure a full enrollment.

HUB Information Desk offers a variety of answers, services

If you ever need to know when tickets go on sale for that Artist Series performance, or aren't sure of the starting time of a symposium session, call Flo, Nadine, or Jeff.

As the staff of the Hetzel Union Building (HUB) Information Desk, they've grown expert at fielding questions on all types of University goings-on. And lots of people depend on them.

"People look to the HUB Desk as the last word," says William K. Hillner, assistant manager of the HUB.

Since the HUB's opening in 1955, the HUB Desk has been serving students and student organizations. It receives mail and takes messages for many student groups. Out-of-town newspapers and magazines can be borrowed from the desk, as well as telephone books from around the state.

A few faculty and staff members have discovered that they can enjoy HUB Desk services, too, according to desk supervisor Flo Musgrave.

"We have several faculty and staff members who regularly come to the desk to read the papers and magazines," she says. Faculty and staff members also call occasionally to contact student organizations or check on times and dates of special events.

Staff and faculty members also can borrow at the desk electric engravers to put identifying marks or numbers on personal items.

Books by faculty members published by

the Penn State Press are featured in a display case near the desk, and exhibition cases are also available for presentation of art and other special collections such as a recent exhibition of turn-of-the-century photography.

Various student organizations often invite faculty or staff members to participate in special programs by presenting talks on their field of expertise, Mr. Hillner says.

The HUB Desk operates the central Lost and Found Service for the University Park Campus. And visitors to the campus find at the desk people who can help them negotiate the array of classrooms and buildings.

"Visitors often are overwhelmed by the size of the campus," says Nadine Ross, another desk staffer. "They think it's a very beautiful, well-maintained campus, but when you show them how far Shields or Business Administration is from us, they're intimidated — especially in the winter."

"The best part of this work is meeting the students, I think," Mrs. Musgrave says. "They're all different, and most have been really nice; some of the friendlier students come up and start conversations, and I get to know them pretty well. Some even call me their second Mom."

"I've gotten flowers and gifts on Thanksgiving, Christmas, Mother's Day, Easter and my birthday. Sometimes it's just a card, but it's so nice to be remembered."

Flo Musgrave (left) and Nadine Ross offer assistance at the HUB Information Desk

Because, in many instances, HUB Desk staff are the only available representatives of the University, they want to make sure their service is the best it can be.

Conference and seminar attendees sometimes arrive at Penn State unsure of where they should go or what they should do, says Jeffery Dickson, assistant to the HUB manager.

"They may have lost their instruction letter, and in the evenings and on weekends, we're the only place open," he says. "We end up making phone calls, trying to find out when and where they belong."

"To improve our service, we'd like departments and organizations to send us copies of event announcements, with complete information on topics and activities," Mr. Dickson requests. "We'd also like to be on mailing lists for brochures and fliers describing the various academic departments and outlining any of their ongoing programs."

"And we could use advance notice of symposia and seminars; we get lots of requests for that kind of information. We enjoy being a service to the campus and we can do a better job with some support from the University community."

New Restaurants, in 'first phase,' are solving temporary problems

William H. McKinnon, assistant vice president for Housing and Food Service Operations, admits there have been a few problems during the opening weeks of the new restaurant complex in the HUB.

He notes, however, that the problems are of a temporary nature and that Food Service is working hard to resolve them.

"Ideally," Mr. McKinnon says, "we would have liked to have had a 30-day shakedown period before opening for business."

Due to the new construction, however, we were unable to occupy the new facility until Wednesday, Aug. 26, only five days before we opened. We then had five days during new student week to prepare for business as usual. We were still in the process of dealing with minor construction, equipment and operating problems in the midst of the first week of Fall Term classes," he explains.

Mr. McKinnon adds that many of the student employees joined the HUB food service staff for the first time this fall and needed to be trained.

"Our staff and full-time employees have done a terrific job, but they, too, have had to make the transition to a new environment and learn routines and procedures unique to this new food service facility," he says.

Observing the biggest problem to date has been a shortage of seating during the lunch period, Mr. McKinnon notes the University operates on two docks, the academic clock and the administrative clock. He says the academic class schedule causes a rush on food services after the second and third periods end at 11 and 12:30 a.m. The noon break for offices from 12 to 1 p.m. causes a rush at 12:15 p.m.

"What many of our customers may not realize is that we're in only the first phase of our renovation project and even this phase isn't complete. Right now we have three areas open, the Fast Break, the Greenhouse and the Food For Thought, with seating for 500. A fourth area, the Founders Room, is nearing completion. Next year two additional units will open, the Dough To Go and The Celler."

"For this year, after the opening of the Founders Room, seating will total about 625. Next year, with the addition of the Dough To Go and The Celler, seating will be increased by 400, bringing the total capacity to approximately the same level as that of the areas being replaced, the Terrace Room and the Lion's Den," he notes.

In addition, he says, once all six serving areas are complete, food service will be available continuously from 7 a.m. to 11 p.m.

"Still," he stresses, "for this year, we will have limited seating and must call on our patrons for help."

"Frankly, we are flattered that our customers apparently like our various decors and take pleasure in lingering over a cup of coffee or a soft drink while talking, reading or studying. But because of our limited seating, especially over the 11 a.m. to 1 p.m. time period, we must urge patrons to make use of the HUB's many lounges for these purposes."

The HUB food service is open Mondays through Fridays and on football Saturdays. The Fast Break starts serving breakfast at 7:30 a.m. and remains open

until 9:30 a.m., when the Food For Thought line opens for a continuation of coffee, other beverages and baked goods service.

The Fast Break reopens at 10:30 a.m. for lunch, remaining open until 2:30 p.m. Also open for lunch are the Food For Thought (11:30 a.m. to 1:15 p.m.) and the Greenhouse (11 a.m. to 1:30 p.m.). Dinner hours are from 5 to 6:45 p.m. in Food For Thought and from 5 to 6:30 p.m. in the Greenhouse. The Founders Room, when it opens in October, will serve lunch from 11:30 a.m. to 1:15 p.m.

"We still have some adjustments to make," Mr. McKinnon adds, "and we're aware that some of our patrons may have been inconvenienced. As the year progresses, we will continue to evaluate our food services. We welcome comments and suggestions from our customers."

"So far, we are very pleased with the support the University community has given our new operation. All we ask is a little patience as we put the finishing touches on phase one and work to complete the second phase of our HUB restaurant complex."

Forum to focus on liberal arts grads

The College of the Liberal Arts and the Career Development and Placement Center will co-sponsor a University-Employer Relations Forum Oct. 8-9 at the Nittany Lion Inn.

According to Dr. Stanley F. Paulson, dean of the College, the forum will bring together about 50 faculty members and corporate representatives to discuss opportunities and needs for liberal arts graduates in the world of business.

Among the workshop topics: the skills liberal arts graduates need to secure entry level career positions and compete successfully; the processes that could enable employers to identify high potential non-technical liberal arts candidates; and the methods for considering qualified liberal arts candidates along with graduates in technical fields.

"While we in the liberal arts need to educate ourselves about how better to

prepare our students for careers," Dean Paulson says, "we also have to educate employers to the fact that, as a growing body of research indicates, liberal arts graduates often do better in management than their counterparts from more specialized fields."

Dr. Richard G. Swails, director of the Career Development and Placement Center, will welcome forum participants Dean Paulson and Dr. Richard Ritchie, AT&T district manager for research, will deliver keynote addresses.

Employers at the forum will include: AT&T, the CIA, General Electric, General Motors, IBM, Johnson & Johnson, Mellon Bank, Pennsylvania Power and Light, the Travelers, and WTAJ-TV.

Participating liberal arts academic units will include: English, French, German, History, Journalism and Advertising, Philosophy, Political Science, Psychology and Speech Communication.

Helene Cixous to speak on writing

Helene Cixous, essayist, playwright and fiction writer, will present a public lecture at 7:30 p.m. Wednesday, Sept. 30 in the HUB Gallery.

Her lecture on "The Origins of Writing" will outline her current interests in the historical as well as the psychoanalytical sources of creation.

The presentation is being sponsored by the Departments of French and English, the Women's Studies and Comparative Literature programs, and the Institute for the Arts and Humanistic Studies.

An exceptional figure on the French intellectual scene, Helene Cixous was professor of English literature at the now defunct University of Paris-Vincennes, which was known as the harbour of new trends in theoretical thinking and experimental education.

She is a very productive and at the same time "a 'hermetic' writer. In the past twelve years she has published five essays, four plays, fifteen works of fiction and a number of articles and shorter texts.

She has conducted seminars and lectured in the U.S. and Quebec, has held a visiting professorship at New York University and currently is giving a seminar in comparative literature at SUNY Binghamton.

Cixous' research interests in English literature have centered on the "undecidable": James Joyce, Lewis Carroll and 'avant-garde' poets. In France, her unique creativity quickly impressed the critics and she received the Medias Literary Award in 1969.

Beside this enormous intellectual energy, her most striking quality may well be a unique sense of freedom: mixing the theoretical and the lyrical modes in her essays, projecting or anticipating future trends in the development of writing. Having established herself as a leading 'avant-garde' writer, Cixous also identifies as a 'femme en mouvement,' a phrase used by a radical neo-feminist group: "Politique et Psychanalyse."

Exxon provides \$300,000 grant to aid teaching

The University will receive \$300,000 from the Exxon Education Foundation, through a program to encourage young engineers not to abandon teaching careers for jobs in private industry.

The funding, to be administered over a five-year period, will support engineering education in the colleges of Earth and Mineral Sciences and Engineering.

Penn State is one of 66 U.S. colleges and universities to receive support through the \$15 million grant program, believed to be the largest of its kind ever undertaken by a corporate foundation. The special, one-time grants are being financed by the Exxon Corporation as part of the company's centennial, which will be observed in 1982.

In announcing the awards, Foundation representatives said the program was an attempt to slow the drain of young engineers from college and university teaching to private industry, where salaries tend to be higher. It is intended to encourage graduate students to enter teaching, and young faculty members to stay in the field, they said.

In all, the Foundation will award 100 three-year \$50,000 Exxon Teaching Fellowships, beginning in the 1982-83 academic year. Penn State will receive two such fellowships, one each in its chemical engineering and mining engineering programs.

The fellowships are intended to increase the number of graduate students in programs leading to the Ph.D. and teaching careers. Each fellow will receive a stipend of \$12,000 the first year, \$13,500 the second and \$15,000 the third, as well as tuition and fees.

The Foundation also will award 100 faculty assistance grants beginning in 1982-83, to encourage young Ph.D.s to remain in teaching during the first five years, when they are most vulnerable to job offers from industry.

Each of these grants totals \$100,000 — \$20,000 for each of five years — to be used as salary supplements for junior, nontenured faculty members. Penn State has received two of the grants, one in chemical engineering and one in petroleum and natural gas engineering.

The fellowships and assistance grants

Senate to eye PS-23, hear sabbatical leaves study

A call for legislative action on two proposed changes to PS-23, the University's policy document on promotion and tenure, will highlight the agenda when the University Faculty Senate next meets on Tuesday, Oct. 6.

During the meeting — which begins at 2:10 p.m. in Room 112, Kern Graduate Building — the Senate also will continue its discussion of a legislative report on computer information systems, carried over from its Sept. 8 meeting, and hear an informational report on "A Study of the Sabbatical Leaves Program."

But first, the Senate Faculty Affairs Committee will ask for consideration of a two-part recommendation regarding its proposed changes to the so-called "dean's veto" section of PS-23, as well as a recommendation submitted as a substitute motion Sept. 8 by the chairman of PS-23 Commission. In addition, the committee will ask for action on a proposed modification to administrative guidelines for evaluating teaching effectiveness as related to promotion and tenure.

In the committee's recommendation on the dean's veto, the first part focuses on promotion and tenure review at the college level, while the second part focuses on the issue at the Commonwealth Campuses. The

recommendation, with changes or additions to the present policy indicated in italics is as follows:

"... In all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's decision, that dean shall meet with the college or University Libraries committee and state his or her reasons for the negative decision. If, after consultation with the dean, the college or University Libraries committee feels that further review is warranted, the committee shall forward such cases to the Office of the Provost for transmittal to the University Promotion and Tenure Committee...."

"In reviewing Commonwealth Campus faculty... If the decision is made at the college or University Library level of review not to award tenure, the Dean of the Commonwealth Educational System shall notify the faculty member in writing (see section IV 4); negative promotion decisions do not require such formal notification. In all cases where the deans make a negative tenure or promotion decision and

where all recommendations prior to the dean's have been positive, one of the deans shall meet with the college (or University Libraries) committee and state the reasons for the dean's decision. If, after consultation with the dean, the college or University Libraries committee believes that further review is warranted, the committee shall forward such cases to the Office of the Provost for transmittal to the University Promotion and Tenure Review Committee."

Following is the PS-23 Commission's recommendation, submitted as the substitute motion for the Senate committee's recommendation:

"In all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's level have been positive, that dean is required to meet with the college committee and state his or her reasons. The intent is to require full and candid discussion when such divergent recommendations occur."

The Faculty Affairs Committee's second

(Continued on page 5)

Semester class schedule being formed

The Calendar Conversion Council is preparing to recommend a specific class schedule for University Park in the semester calendar.

Meanwhile, the Council has approved a number of principles which it feels are necessary to the operation of the class schedule. The principles, which the Council believes are appropriate to all Penn State campuses, are:

1. The number of different sequences of class meetings currently used at University Park will be unmanageable under a semester calendar. The greater the proportion of classes which are scheduled in the standard sequences of a class schedule, the less the possibility of student conflict. However, it must be recognized that there are necessary exceptions to the sequences of any class schedule. Procedures must be established to consider those exceptions.

2. The pressure on facilities at University Park in the semester calendar will be severe and can be accommodated only if the class schedule assumes relatively even utilization throughout each day of

the instructional week and within each period of the instructional day. The academic departments, the University faculty, and the student body at University Park must all accept the fact that some sections or some courses will be scheduled in the times of the day or the days of the week which are generally considered less desirable. The key appears to be an equitable sharing of less desirable class meeting times.

3. The necessary even utilization of instructional space can only occur with full cooperation and support at the department level. The specific interrelationships of different courses and the necessary commitments to different faculty members are known in detail and understood at the department level. It is also necessary that the appropriate college office monitor the proposed scheduling each semester in order to assure that the college as a whole is proposing even and equitable utilization of all the time periods available. Monitoring of that performance is an appropriate function of the Scheduling Office.

President Oswald addresses University Park volunteers at United Way kick-off luncheon.

Penn Staters

Dr. Sumer C. Aggarwal, professor of management science and operations management, served as an adviser to the U.S. Naval Material Command Headquarters in Washington during the 1980-81 academic year. While there he completed projects on: "Aggregate Productivity Measurement of Naval Shipyards," "Productivity Measurement of Federal Managers," "Review of Existing Productivity Measures," "Draft Plan for a Federal Productivity Center/Institute," "Productivity Measures for Naval Ocean Systems Research Center," and "Productivity Measures and Analysis of the Navy's Acquisition Control Processes."

Dr. Aggarwal also presented lectures to federal executive groups on topics related to productivity and management control practices and evaluated the competence of several consulting organizations.

Dr. Stephen J. Bagnato, assistant professor of child psychiatry at Hershey, and **Dr. John T. Neisworth**, professor of special education, are authors of a text and resource book, *Linking Developmental Assessment and Curricula: Prescriptions for Early Intervention*.

The book, published by Aspen System Corp., is designed for infant stimulation specialists, teachers of handicapped preschoolers and school psychologists who assess and program for young developmentally disabled children.

Engineering names department head

Dr. Allen L. Soyster, former professor of industrial engineering at Virginia Polytechnic Institute and State University, has been appointed professor and head of the Department of Industrial and Management Systems Engineering.

A 1965 Penn State industrial engineering graduate, Dr. Soyster earned his M.S. at Cornell University in industrial engineering and operations research, and his Ph.D. in operations research at Carnegie-Mellon.

He has taught at Temple University, and from 1972-73, was assistant professor in Penn State's IE department. He was an instructor in the department from 1966 to 1969. Dr. Soyster also has been employed as a junior engineer at Western Electric, a cost engineer at IBM, and is a consultant at Stauffer Chemical Company.

He has done consulting work with the Federal Energy Administration. Since 1978 he has served as energy consultant to the Department of Energy and other governmental groups.

His research interests are in mathematical optimization techniques as well as in applications of operation research techniques to the fields of energy, natural resources, and

Dr. Karen Chase, assistant professor of computer science, presented a paper at the 7th International Conference on Very Large Data Bases in Cannes, France, earlier this month. The paper was entitled, "Join Graphs and Acyclic Data Base Schemes." The conference was sponsored by two American professional societies, the Association for Computing Machinery and the Institute of Electrical Engineers, and the French National Institute for Research in Information Sciences and Automation.

Six University faculty members have been selected for the first Invitational Humanities Program of the Pennsylvania Humanities Council. Selected are **Eton F. Churchill**, assistant professor of humanities and multi-media journalism at Capitol; **Alice**

M. Hoffman, associate professor of labor studies at Radnor; **Dr. Robert Lima**, professor of Spanish and comparative literature, and **Dr. Kenneth A. Thigpen**, associate professor of English and comparative literature, University Park; **Dr. Nancy M. Tishler**, professor of English and humanities at Capitol, and **Dr. Arthur Zucker**, assistant professor of philosophy at Hershey.

They are among the 25 scholars the Pennsylvania Humanities Council is providing in the first year of the program for presentations on a wide variety of topics at public meetings, conferences, workshops and festivals throughout the state.

Heather R. Gilbert, assistant executive director of the Alumni Association, is co-author with Nancy Spear, illustrator and free-lance writer, of *Cooking Around the College*, a cookbook about Penn State and the State College area. The paperback book, published by Oxon Press of State College, features recipes, menus, University history and anecdotes.

Dr. Christopher Johnstone, assistant professor of speech communication at the Delaware County Campus, has been appointed to a three-year term as editor of the *Speech Communication Journal* of Pennsylvania Annual. The annual will be refereed and will publish a range of articles dealing with theoretical and critical issues in speech communication.

Dr. Frederick W. Lampe, professor and assistant head of the Department of Chemistry, has been named a Robert A. Welch Foundation Lecturer for 1981-82. He will present lectures in March, 1982, at three Texas schools to be selected by the Foundation. The lectures will focus on "The Role of Collision Processes in Ionic Reactions" and "Multiphoton Infrared Photochemistry of Small Organic Molecules." Dr. Lampe also has been elected to the Board of Directors of the American Society of Mass Spectrometry.

Dr. S.V. Martorana, professor of education, presented a paper at the Fifth International Conference on Postsecondary Education at the University of Lancaster in England. His topic was "Using Magnitude Estimation Scaling in Assessing Institutional Performance." Some 300 delegates, representing 25 countries, attended the conference.

Dr. Martorana's paper was co-authored by Dr. Eileen Kuhns, coordinator of administration programs and associate professor in the School of Education at The Catholic University of America.

Robert A. Walters, assistant professor of general engineering at the McKeesport Campus, will design and develop a Computer-Controlled Cardiac System Analyzer for the Cook Pacemaker Corporation, Leechburg, Pa., according to an agreement signed by the University, Mr. Walters, and the Cook Corp. The agreement calls for the development of an instrument which will analyze and test cardiac pacemakers, analyze the heart lead system, and program the programmable pacemaker.

Professor Walters started the Pacemaker Test Center at the McKeesport

Kress** to residence hall utility worker in Housing and Food Services. **Robert A. Miller** to groundskeeper landscape A in Physical Plant. **Terry Rider** to groundskeeper landscape A in Physical Plant. **Paul B. Shank** to food service worker A, Housing and Food Services at Altoona. **Ann T. Snyder** to food preparer A in Housing and Food Services. **Paul Swartz** to equipment operator (cranes & forklifts) in Physical Plant.

Carpools

H. R. Learned needs a ride or would like to share the driving from the Beechcreek-Howard area. She works from 7 a.m. to 4 or 4:30 p.m. (return hours are flexible). She can be reached at 863-0092 or (717) 962-2948.

Lillian Nelson needs a ride from the Penn State Mobile Home Park (opposite Village Inn Pizza on N. Atherton St.) to the University. She works at Hartnanti-Pollock Housing from 8 a.m. to 4:30 p.m. She can be reached after 5 p.m. at 238-4801.

Allen L. Soyster

transportation. He is the author of numerous technical papers appearing in such journals as *Operations Research*, *Management Science*, *Mathematical Programming*, and the *Journal of the American Institute of Industrial Engineers*, among others.

Dr. Soyster is a member of the American Institute of Industrial Engineers, Operations Research Society of America, and the Institute of Management Sciences.

Continuing education director is appointed

James D. Bennett has been named director of continuing education in the College of Earth and Mineral Sciences. He continues as director of mining engineering continuing education services and instructor in mineral engineering.

In his new position, he is assuming some of the responsibilities formerly held by Dr. Robert Stefanko, associate dean for continuing education in the college, who died in July.

Mr. Bennett joined the University staff in 1974 after working for Mine Safety Appliance Co. in Pittsburgh. He has been responsible for the design, curriculum development, implementation, and evaluation of health and safety training programs provided by Penn State for Pennsylvania coal, metal, and nonmetal mining industries.

These programs include new miner orientation, miner retraining, supervisory, and specialty skills training programs through which about 19,000 miners have been trained by Penn State over the past seven years, and the Elders Ridge Mine Mechanics and Electricians School located near Indiana, Pa. Each year, at Elders Ridge, more than 100 unemployed and underemployed people are prepared for jobs in the mining industry, and, since it was opened in 1965, more than 1,200 have completed the 23-week training program given at the facility.

Mr. Bennett also serves as coordinator

James D. Bennett

and co-director for approximately 30 short courses and workshops offered annually for mining industry personnel by the Mining Engineering Section of the Department of Mineral Engineering.

His research interests have included statistical analysis of mine accidents, training systems design, and analysis of the performance of an automated mine extraction system.

After receiving his bachelor's degree from West Virginia University in 1969, Mr. Bennett entered the U.S. Army, attaining the rank of captain and serving in Germany and Vietnam. He earned a master's degree at Eastern Kentucky University and currently is a candidate for a Ph.D. in vocational industrial education at Penn State.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Penn Staters

(Continued from page 2)

Campus to provide independent engineering analysis and testing of explanted pacemakers and prototypes for manufacturers, hospitals, coroners, doctors, and the Food and Drug Administration. The Center provides both standardized and highly specialized testing for the complex pacers, which today have developed to the point that a single instrument may have more than 1,000 modes of operation.

Dr. Thomas D. Yawkey, associate professor of education, presented an invited paper during August at the Twelfth Biennial Congress of the International Council of Children's Play in Turin. Italy. Titled "An Experimental Investigation of Correlates of Imagination, Pretend and Cognitive Learning in Five-Year-Old Children," the paper was authored by Dr. Yawkey's wife, Margaret L., a reading and communication specialist in the Tyrone Area School District.

Obituaries

Donald Garbrick, maintenance inspector, electrical and mechanical, in Physical Plant, died Sept. 19 at the age of 47. He joined the University staff Dec. 15, 1957.

Arthur L. Haskins, former associate professor of biochemistry, died Sept. 18 at the age of 76. He joined the faculty as an instructor in 1937. He was promoted to assistant professor in 1947 and to associate professor in 1951. He retired July 1, 1970.

Retirements

Chef Richard Jackson of the Nittany Lion Inn recently lost one of the essential ingredients in his kitchen. **Dorothy M. Bloom**, cook at the Inn, retired after 27 years of service with the University.

"Dorothy Bloom was one of the most conscientious employees I've ever seen," notes Chef Jackson. "She worried about the food looking well. . . how it went out to the people. She also had a real knack for seasoning which isn't too common these days. I sure hated to lose her."

Dorothy Bloom began her Penn State career in 1954 as first cook in the Coffee Shop of the Nittany Lion Inn when it opened. When the Coffee Shop was changed to banquet rooms, she became breakfast and lunch cook for the main kitchen. Over the years, she displayed her culinary talents by making everything from scrambled eggs to the soups of the day.

Dorothy Bloom was "born and raised" in Bellefonte where she still makes her home. She has one son, living in Philadelphia, who is a business manager for Temple University.

"Time went so fast. I really miss it," says **Helen M. Haagen** of her years in Housing and Food Service. Mrs. Haagen recently retired after 20 years of University employment as a food service worker.

Although she worked briefly as a food service worker at Redler and Johnston in 1961, the majority of Mrs. Haagen's employment was in Findlay Dining Hall. "You do everything," she says. "You're scheduled around the clock." And Mrs. Haagen's duties took her from dining room to kitchen and from cutting cake, serving students, cleaning tables to fixing salads.

Mrs. Haagen will be joining her husband, Rynln, who retired about five years ago from his job with the Pearce Milk Co. The Haagens reside in State College

Appointments

Joseph C. Atkins as assistant professor of finance at Capitol. B.A., M.A., Ph.D., PSU. Assistant professor, Villanova U.

Thomas J. Bernard as assistant professor of administration of justice at University Park. B.A., U. of Notre Dame; M.S., Southern Illinois U.; Ph.D., SUNY-Albany. Assistant professor, Guilford College.

Robert E. Boering as assistant professor of English at Altoona. B.A., Rutgers U.; M. Div., Princeton Seminary; M.A., Ph.D., Rutgers U. Instructor and lecturer, Rutgers U.

Laurie G. Boyd as assistant professor of theatre at University Park. B.A., U. of California-Berkeley; M.F.A., Connecticut College. Choreographer, Williamstown Theatre Festival.

Simon J. Bronner as assistant professor of folklore and American studies at Capitol. B.A., SUNY-Binghamton; M.A., SUNY-Oneonta. Ph.D., Indiana U. Folklorist, Michigan State U.

Donald R. Chambers as assistant professor of finance at University Park. B.S., SUNY-Binghamton; Ph.D., U. of North Carolina-Chapel Hill. Teaching and research assistant, U. of North Carolina.

Paul H. Cohen as assistant professor of industrial and management systems engineering at University Park. B.S.I.E., U. of Rhode Island, M.S.I.E., Ph.D., Ohio State U. Research associate, Ohio State U.

Pamela C. Colony as assistant professor of anatomy at Hershey. B.A., Wellesley College; Ph.D., Boston U. School of Medicine. Senior research fellow, Harvard Medical School.

Srinivas S. Dalal as assistant professor of math at Wilkes-Barre. B.S., M.S., Ph.D., Karnatak U. (Dharwar, India). Associate professor, Benedict College.

Joan P. Diana as head librarian at DuBois. A.B., College Misericordia; M.S.,

and have one son, John, one daughter, Beverly, and four granddaughters.

Mrs. and Mrs. Haagen plan to do some travelling which they've always enjoyed. Although many of their destinations aren't certain, one "definite" will be a trip to California to visit with their son.

Field supervisor Earl Baum, a member of the Agriculture staff since Sept. 1, 1964, retired Oct. 1.

Betty A. Carter, medical technologist in University Health Services, retired Oct. 1 after serving Penn State since Oct. 1, 1964.

Grace H. Espenshade, patient nourishment assembler, Hershey Medical Center, retired Oct. 1 after serving since Sept. 21, 1970.

Ruth M. Hand, Schuylkill County Extension home economist, retired Oct. 1. She had been an employee of the University since July 1, 1963.

Elwood G. Houtz, residence hall preventive maintenance worker in Housing and Food Service, retired Oct. 1 after working for the University since Sept. 29, 1970.

Murray S. Martin, librarian and associate dean of University Libraries, retired Oct. 1 after serving with the University since Jan. 1, 1967.

Esther N. Spicher, a secretary in the College of Business Administration, retired Oct. 1. She had been a University employee since Aug. 12, 1963.

Marwood College. School library consultant, Pennsylvania Department of Education.

Charles R. Enis as assistant professor of accounting at University Park. B.S. (finance), B.S. (accounting), M.B.A., D.B.A., U. of Maryland. Lecturer, U. of Maryland.

Terry Foch as assistant professor of human development at University Park. B.A., M.A., Ph.D., U. of Colorado. Postdoctoral fellow, U. of Colorado Health Sciences Center.

Jorgie A. Grimes as associate professor of nursing at University Park. B.S.N.E., Wilkes College; M.S.N., U. of Pennsylvania. Assistant professor, SUNY-Buffalo.

Mary M. Hart as assistant professor of individual and family studies at Altoona. B.A., Trenton State College; M.A., Duquesne U.; Ph.D., PSU.

Terence A. Hoagwood as assistant professor of English at Altoona. B.A., U. of Maryland; M.A., American U.; Ph.D., U. of Maryland. Professional lecturer, American U.

Paul R. Howell as assistant professor of metallurgy at University Park. B.A., M.A., Ph.D., Cambridge U. (United Kingdom). Research fellow, Cambridge U.

George R. Imel as assistant professor of nuclear engineering at University Park. A.B., B.S., Lafayette College; M.S., Ph.D., PSU.

Andrew B. Jack as assistant professor of business administration at Capitol. B.A., Queen's U. (Kingston, Ontario); M.A., U. of Toronto (Toronto, Ontario); Ph.D., Harvard U. Economist, New York State Department of Labor.

J. Edward Ketz as assistant professor of accounting at University Park. B.A., M.A., Ph.D., Virginia Polytechnic Institute and State U. Assistant professor, U. of Connecticut.

Walter K. Kunikake as assistant professor of accounting at University Park. B.B.A., M.B.A., U. of Hawaii; Ph.D., U. of Arkansas. Instructor, U. of Arkansas.

Gary L. Lilien as research professor of management science at University Park. B.S., M.S., D.E.S., Columbia U. Associate professor, M.I.T.

George G.S. Lin as assistant professor of engineering at Capitol. B.S., National Taiwan U. (Taipei, Taiwan); M.S., Kansas State U.; D.Sc., Columbia U. Senior staff engineer, Jacobs Engineering Group Inc.

Abdul Sattar Lodhi as assistant professor of physics at Behrend. B.Sc., M.Sc., U. of Karachi (Karachi, Pakistan); M.S., U. of Houston; Ph.D., Baylor U. Postdoctoral, Baylor U.

Deborah J. Medeiros as assistant professor of industrial and management systems engineering at University Park. B.S.I.E., U. of Massachusetts; M.S.I.E., Ph.D., Purdue U. Research assistant, Purdue U.

Robert C. Melton as assistant professor of aerospace engineering at University Park. B.S., Wake Forest U.; M.S., U. of Virginia.

Stephen J. Motowidlo as associate professor of organizational behavior at University Park. B.A., Yale U.; Ph.D., U. of Minnesota. Assistant professor, SUNY-Binghamton.

Carol R. Nchemias as assistant professor of public policy at Capitol. B.A.,

Washington U.; M.A., Ph.D., Ohio State U. Assistant professor, Arizona State U. **James E. O'Brien** as assistant professor of mechanical engineering at University Park. B.S.M.E., U. of Cincinnati; M.S.M.E., Ph.D., U. of Minnesota. Teaching associate and research assistant, U. of Minnesota.

Michael D. Orzolek as associate professor of horticulture extension at University Park. B.S., Alliance College; M.S., West Virginia U.; Ph.D., U. of Maryland. Extension horticulture specialist and staff scientist, U. of Delaware Substation.

Kurt H. Parkum as assistant professor of business administration at Capitol. B.S., M.B.A., The Copenhagen School of Economics (Copenhagen, Denmark); M.S., Ph.D., U. of Wisconsin-Madison; M.P.H., Columbia U. Chairman and associate professor, Queens College.

Robert T. Perry Jr. as assistant professor of general engineering at Altoona. B.S., M.S., Ph.D., Texas A & M U. Assistant scientist, U. of Wisconsin-Madison.

William K. Rawlins as assistant professor of speech communication at University Park. B.A., U. of Delaware; M.A., Ph.D., Temple U. Part-time faculty, Temple U. and U. of Delaware.

Heikki J. Rinne as assistant professor of marketing at University Park. B.S., Brigham Young U.; M.B.A., U. of Oregon. Instructor, Purdue U.

James R. Russo as assistant professor of English at Altoona. B.A., M.A., M.F.A., Ph.D., U. of Arizona. Assistant professor (visiting), Arizona State U.

Carolyn E. Sachs as assistant professor of agricultural economics and rural sociology at University Park. B.A., Alma College; M.A., Ph.D., U. of Kentucky. Teaching and research assistant, U. of Kentucky.

Peter Saller as assistant professor of graphic design at University Park. B.F.A., M.F.A., Yale U.

Eugene Schlossberger as assistant professor of philosophy at Altoona. B.A., Brandeis U.; M.A., Ph.D., U. of Chicago.

Richard D. Sheardy as assistant professor of chemistry at Hazleton. B.S.T., Michigan State U.; Ph.D., U. of Florida. Postdoctoral research fellow, U. of Rochester.

James S. Shortle as assistant professor of agricultural economics and rural sociology at University Park. B.U.S., M.A., U. of New Mexico; Ph.D., Iowa State U. Research associate, Iowa State U.

Robert L. Wadlinger as assistant professor of chemistry at Capitol. A.B., La Salle College; Ph.D., Catholic U. of America. Assistant professor, Elmira College.

David J. Wall as assistant professor of civil engineering at University Park. B.S., M.S., U. of Connecticut; Ph.D., U. of Pittsburgh. Assistant professor, U. of Pittsburgh-Johnstown.

Clinton E. White Jr. as assistant professor of accounting at University Park. B.A., Western Kentucky U.; M.B.A., U. of Louisville; D.B.A., Indiana U. Lecturer, Indiana U.

Savas Yavuzkurt as assistant professor of mechanical engineering at University Park. B.Sc., Middle East Technical U. (Ankara, Turkey); M.Sc., Ph.D., Stanford U. Research fellow and instructor, Israel Institute of Technology (Haifa, Israel).

Four Penn Staters are featured in traveling art exhibition

Works by four artists who received their MFA degrees from the University are included in the exhibition "Traditions: The Region/The World" sponsored by Arttrain. The exhibition, installed in the cars of a railroad train, is traveling primarily through the midwestern and northeastern parts of the United States.

The four artists are William D. Davis (1980), assistant director of the Museum of Art; Charles Gibbons (1973), assistant professor of art at New Kensington; Rick Paul (1970), of the art faculty at Purdue University; and Alan Larkin (1977), of the University of Indiana art faculty.

Mr. Davis' piece of graphite on museum board is entitled "Black Hat-Black Glove." "Northmarland Park" by Mr. Gibbons is a painting of acrylic on canvas, and Mr. Paul's "Nagla II" consists of acrylic and a pencil on paper. Mr. Larkin's work is a color lithograph entitled "Pneumoniacs."

One of the most popular pieces in the collection is a bronze sculpture from the Museum of Art's permanent collection, Paul ManSHIP's "Europa and the Bull."

Arttrain's tour through Pennsylvania is sponsored in part by the Pennsylvania Commonwealth Council on the Arts.

University Park Calendar

October 1-11 Special Events

Thursday, Oct. 1

Sigma Xi, scientific research honorary, first meeting, 3:30 p.m., Noll Laboratory, 330-430, Dr. Elsworth R. Buskirk, Laboratory director, on "Human Performance Research—A Review of Activities," 4:00-4:30 p.m., guided tour of the laboratory, 4:40-5:00, refreshments.

Shavers Creek Environmental Center, Hawk Mountain Trip, 6 a.m.-7 p.m. Registration, 865-1851.

Nursing Consultation Center, "Learning to Relax" series begins, 3:30 p.m., Consultation Center.

Sports: baseball vs. Lock Haven, 3 p.m.; field hockey vs. Delaware, 3:30 p.m.

Friday, Oct. 2

Craft Demonstration, 11:30 a.m., Kern Lobby, Commonsplace Theatre, *Atlantic City*, 7 and 9 p.m., Room 112 Kern.

Cinemathèque Film, *Chinatown*, 7 and 9:15 p.m., Room 10 Sparks Bldg.

Interlanka Folk Dancing, 7:30 p.m., HUB Ballroom.

URTC, Jacobs/Casey, Grosse, 8 p.m., The Playhouse.

GSA Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Carlos Montoya, Guitarist, 8:30 p.m., Eisenhower Auditorium.

Sports: soccer vs. Fordham, 7:15 p.m.; JV football vs. Rutgers, 1:30 p.m.

Saturday, Oct. 3

France-Cinema, Visconti, *Death in Venice*, 7 and 9 p.m., Room 122 Kern.

Cinemathèque Film, *Chinatown*, 7 and 9:15 p.m., Room 10 Sparks Bldg.

URTC, Jacobs/Casey, Grosse, 8 p.m., The Playhouse.

Sports: football vs. Temple (All-University Day), 1:30 p.m.; men's cross country, Penn State Open, 11 a.m.

Sunday, Oct. 4

Health Expo '81, 10 a.m.-5 p.m., 11 a.m.-2 p.m., "Fun Run," 1 p.m., HUB Lawn. Sponsored by University Health Services and USG.

Shaver's Creek Environmental Center, Guided walk, "Pods, Frickles and Parachutes," 1-3 p.m., Environmental Center.

Commonsplace Theatre, *Atlantic City*, 7 and 9 p.m., Room 112 Kern.

Sports: baseball vs. Bloomsburg, (DH), 1 p.m.

Monday, Oct. 5

Health Expo '81, 1-7 p.m., HUB. Keynote speech by Dr. C. William Hettler, III, "The Wellness Revolution," 8 p.m., Schwab Auditorium. Sponsored by University Health Services and USG.

France-Cinema, Visconti, *Death in Venice*, 7 and 9 p.m., Room 122 Kern.

June Miller, organ recital, 8:30 p.m., Music Building Recital Hall.

Tuesday, Oct. 6

Health Expo '81, 10 a.m.-7 p.m., HUB. "Runners Clinic," moderated by Pete Bortolotti, president, Nittany Valley Track Club, 7:30 p.m., HUB Ballroom. Centre Area Health Council panel discussion, "How Community Medical Centers Serve the Needs of the Area, with Emphasis on the Proposed Bellefonte Center," moderated by Carl Beymel, Keystone Health Systems Agency, 8 p.m., Schwab Auditorium.

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

Sports: field hockey vs. Maryland, 3:30 p.m.

Wednesday, Oct. 7

Robeson Cultural Center, "Careers Unlimited"—careers in business and industry, 10 a.m.-4 p.m., Walnut Building.

Health Expo '81, 10 a.m.-5 p.m., HUB. Disaster drill simulating a plane crash, 6:30 p.m., East Halls area. Spectators welcome. Sponsored by University Health Services and USG.

Sports: baseball vs. Juniata, 3 p.m.

Instructional Development Program workshop for faculty, "Communication Skills for Teachers in Large Classes," 9:30-11 a.m., Room 305 HUB.

Thursday, Oct. 8

Robeson Cultural Center, "Careers Unlimited"—careers in business and industry, 10 a.m.-4 p.m., Walnut Building.

Commons Film Series, *Think Dirty*, 7 and 9 p.m., Room 112 Kern.

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

Instructional Development Program workshop for faculty, "Communication Skills for

A ceramics exhibit by Ok Hi Lee currently is on display in Chambers Bldg. Gallery. The show has been extended until Oct. 11.

Teachers in Large Classes," 3-4:30 p.m., Room 305 HUB.

Friday, Oct. 9

Craft Demonstration, 11:30 a.m., Kern Lobby. HUB Craft Center registration for second session classes, noon-5 p.m., Room 312 HUB, through Oct. 22.

Cinemathèque Film, *The Godfather*, 7 and 10 p.m., Room 10 Sparks Bldg.

Interlanka Folk Dancing, 7:30 p.m., HUB Ballroom.

GSA Coffeehouse, 8 p.m., Room 102 Kern.

Artists Series, Phyllis Newman, *The Madwoman of Central Park West*, 8:30 p.m., Schwab Auditorium.

Sports: soccer vs. Maryland, 7:15 p.m.; JV football vs. Milford Academy, 2 p.m.

Saturday, Oct. 10

Cinemathèque Film, *The Godfather*, 7 and 10 p.m., Room 10 Sparks Bldg.

Sports: football vs. Boston College (Homecoming), 1:30 p.m.

Sunday, Oct. 11

Shaver's Creek Environmental Center, "Run for the Fall Colors," 10,000-meter Open, 10 a.m.-two-mile "Fun Run," 10:15 a.m., Stone Valley Recreation Area.

Indoor Sports Complex, open house, 4-6 p.m.

Sports: men's lacrosse vs. Alumni, 11 a.m.; baseball vs. Lock Haven (DH) 1 p.m.

Seminars

Thursday, Oct. 1

Ceramic Science 500 Seminar, 11 a.m.-noon, 301 Steidle Bldg. Dr. P.N. Walsh, Linde Division, Union Carbide, on "Preparation of Coatings by CVD and Plasma Detonation."

State College Women's Forum, noon-1:30 p.m., Assembly Room, Walnut Bldg. Dr. Carolyn Sachs, assistant professor of rural sociology, on "Women in American Agriculture." Bring a bag lunch.

Physics Colloquium, 3:30 p.m., 117 Osmond Lab. C. M. Johns, Johns Hopkins University, on "Grand Unification and Cosmology."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. C. T. Ratcliffe, Exxon Research and Engineering Co., on "Unusual Reaction Chemistry of Selected Sulfur Compounds with Coal."

Math Colloquium, 4 p.m., Room 104 McAllister Bldg. Professor M. Delfour, Université de Montréal, on "The Role of the Product Space in the Theory of Linear Systems with Delays in State and Control Variables."

Friday, Oct. 2

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Gary Small, on "An Interactive Software System for the Simulation of 13C NMR Spectra."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Barbara Miller, acquisitions librarian, Schlow Memorial Library, on "Who Reads What? Book Selection and Readship in a Small Town Library."

Monday, Oct. 5

Geosciences Colloquium, 3:45 p.m., Room 101 Kern. Dr. Claude Herzberg, Dept. of Geological Sciences, Rutgers University, on "Magma Densities at High Pressure: Geophysical and Geochemical Implications."

MC3B Seminar, 4 p.m., Room 101 Althouse Lab. Dr. Randall R. Reed, Dept. of Molecular Biophysics and Biochemistry, Yale University, on "Transposon Mediated Site Specific Recombination."

Philosophy Colloquium, 4 p.m., Room 220 Willard Lab. Professor Bernhard Waldenfels, Ruhr-Universität Bochum, Institut für Philosophie, on "The Despoised Doxa: Husserl and the Continuing Crisis of Western Reason."

Interdisciplinary Symposium on Value, 8 p.m., Room 101 Kern. Christopher Johnstone, Delaware County Campus, on "Ethics, Communication, and the Pursuit of Wisdom."

Central Pennsylvania Society of the Archeological Institute of America, illustrated lecture, 8 p.m., Room 120 Carnegie Bldg. Dr. Clemency Coggins, research associate, Peabody Museum, Harvard University, on "The Tombs and Temples of Tikal Guatemala."

Tuesday, Oct. 6

Chemical Engineering Seminar, 3:45 p.m., Room 140 Fenske Lab. William A. Steele, professor of chemistry, on "Simulation of the Structure and Dynamics of Simple Molecular Liquids."

Human Factors Seminar, 4-5 p.m., Room 210

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Hammond Bldg. Dr. Eliezer Kamen, professor of physiology, on "Physiological Basis for Scheduling Work and Rest During Physical Work."

Poetry Reading by Gerald Stern, author of "The Red Coal," 3:30 p.m., Rare Books Room, Pattee Library. Sponsored by the Institute for the Arts and Humanistic Studies, English Department, and the Pennsylvania Council on the Arts.

Wednesday, Oct. 7

Penn State Mining Engineering Society, 8:30 p.m., Room 26 Mineral Sciences Bldg. Dr. W.C. Hamilton, senior staff scientist, Conoco, Inc., on "Perspectives on the Acid Rain Issue."

Thursday, Oct. 8

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. J.H. Blanks, Alcoa Labs, on "Electrical Conductivity of Magnesian Slags: Property Determination in an Aggressive Solid-Liquid System."

Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. D. Schramm, University of Chicago, on "The Very Early Universe."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Terry Baker, Exxon Research and Engineering Co., on "Metal-Carbon Interactions."

Friday, Oct. 9

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. John Stahl, on "Sulfur Speciation."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Rob Haswell, professor of geography, Louisiana State University, on "The Making of Historic South African Townscapes."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m., Sunday, noon to 11 p.m.

Jim Dupree, paintings, through Oct. 10; Jans Merston, weavings, through Oct. 2; Linda Newby, feather jewelry, Ziggy Coyle, day, Jan Brennis, paintings, opens Oct. 3.

Museum of Art: open 11 a.m.-4:30 p.m.

Closed Mondays. Tours, Sundays, 1:30 p.m.

Hemline, Neckline, Streamline: Women's Fashions from 1890-1940 from the collection of Beverly Bels, through Oct. 4. Oriental Works from the Museum's collection.

Pattee Library: Charles Hollingsworth, paintings, through Oct. 9. Bertolt Bucher, photographs from the East German Government, opens Oct. 9. East Corridor Gallery. Travels in Greece: Ink Wash Drawings by Wendy Snetinger, through Oct. 8; Mary Pat Ford, studio photographs, opens Oct. 9. Lending Services Lobby. Bess Gunglesky, relief sculpture, through Oct. 2. Sandy Sandmeyer, recent work in batik, opens Oct. 2. Second Floor East. High lights from the Allison-Shelley Collection, Rare Books Room.

Paul Robeson Cultural Center: John T. Harris, works in water color, pencil and other media, through Oct. 2.

Visual Arts Bldg. Zoller Gallery. Gallery Hours: 9 a.m.-5 p.m., Monday through Friday. Saturdays and Sundays, noon-5 p.m. The School of Visual Arts Faculty Exhibition.

Organ recital scheduled Oct. 5

An organ recital will be presented by June Miller, associate professor in the School of Music, at 8:30 p.m., Monday, Oct. 5, in the Music Bldg. recital hall.

The program of works by German and French composers from the Baroque, Romantic and Contemporary periods will open with Max Regner's Toccata and Fugue in D, opus 59. Three pieces by J.S. Bach—the Sonata No. 2 in C Minor, "Liebster Jesu, wir sind hier" and the Prelude and Fugue in C—will complete the first part of Ms. Miller's recital.

The Allegro vivace from C.M. Widor's Symphony V will open the second portion of the program. Two selections from N. deGrigny's "Premiere Livre d'Orgue"—the "Recit de tierce en taille" and "Basse de trompette ou de cromorne"—will follow. Ms. Miller will perform the Meditation VI from "Méditations sur le Mystere de la Sainte Trinite" by O.

Messiaen and M. Duruflé's "Prelude sur l'Introuvable Epiphany." Her program will close with a movement from L. Vienne's Symphony II, the Final: Maestoso.

Ms. Miller, who teaches organ and harpsichord, has performed extensively and given lecture-demonstrations and workshops throughout Pennsylvania.

Her recital is being sponsored by the School of Music. There is no admission charge and the public is welcome.

Bird Seed Sale

The Shaver's Creek Environmental Center is sponsoring a bird seed sale. Seed should be pre-ordered by picking up an order form at 267 Recreation Bldg., or at the Environmental Center. Orders must be received by Oct. 10. For more information call 865-1851 or 238-5872.

Guest to lecture on poetic speech

Dr. Dell Hymes, professor of folklore and linguistics and dean of the College of Education at the University of Pennsylvania, will present a public lecture entitled "In Vain I Tied to Tell You: American Indian Myth as Poetic Speech" at 8 p.m. Thursday, Oct. 8, in Room 273 Willard Bldg.

Dr. Hymes is considered one of the most important figures in linguistics, anthropology and folklore in the United States today. His work on American Indian languages, sociolinguistics, and the relationship of language and culture is known worldwide. He is author or editor of six books, in addition to numerous technical and professional articles in his fields.

Dr. Hymes holds a B.A. in anthropology and literature from Reed College, and an M.A. and Ph.D. both in linguistics, from Indiana University. Before joining Penn's faculty in 1965, he taught at the University of California at

Dr. Hymes

Berkeley and Harvard University. His visit is being sponsored by the Linguistics Program with the support of the College of Education and the Distinguished Lecturer series of the Graduate School.

AMERICA'S
ENERGY IS

Mindpower Week nears

The University is among 1,000 colleges and universities observing Mindpower Week Oct. 3-11 to generate support for higher education.

Mindpower Week is part of a year-long campaign organized by the Council for Advancement and Support of Education (CASE), with the theme, "America's Energy is Mindpower."

The goal is to enhance public understanding and appreciation of higher education's value to society and the contributions of college-educated citizens, as well as to alleviate the greatest problem faced by higher education — getting adequate funding.

The campaign is being financed by CASE member institutions, the Exxon Education Foundation, the Atlantic-Richfield Foundation, Newsweek and other corporations.

The honorary campaign committee includes: Sen. Bill Bradley, Bill Cosby, Norman Cousins, Milton Eisenhower, Gerald Ford, J. William Fulbright, Katharine Graham, Helen Hayes and Shirley M. Hufstader.

The NCAA has adopted the Mindpower theme for the football season. The campaign began with observance of the first National Support Higher Education Day July 16 in Washington D.C.

Exxon grant

(Continued from page 1)

are offered in these fields: chemical, petroleum, electrical, mechanical, mining and civil engineering, computer sciences and geology. Selection of individual

Meats Lab has sales

Retail meat sales are being conducted every Friday from 1:30-4:00 p.m. at the Meats Laboratory located near Beaver Stadium.

The meat is from the University herds and is slaughtered and cut by students in the Animal Industry and Food Science classes.

The store carries all the retail cuts of beef, pork, and lamb which includes steaks, chops, hamburger and sausage. Customers should be at the Meats Laboratory at or before 1:30 p.m. at which time they will draw a number for service.

Children's program set

A program in basic movement skills, educational gymnastics, and games will be sponsored by the College of Health, Physical Education and Recreation for children in kindergarten through third grade.

The program will be held on Tuesdays from 4 to 5 p.m., Oct. 6 through Nov. 10 in Room 126 White Bldg. Registration will be Oct. 6 at 3:45 p.m. in the White Building lobby.

Oct. 4-7

Health Expo to have 50 exhibitors

A nationally-known speaker on "wellness" and about 50 exhibitors representing health interest groups will make up the core of Health Expo '81 — four days of health promotion at the University.

Health Expo '81, co-sponsored by University Health Services and the Undergraduate Student Government, will be held Oct. 4 to 7 to encourage students and community members to adopt healthier lifestyles.

The exhibits and programs, free and open to the public, will include: CPR, fat diets, stress reduction, abusive drinking, rape prevention, death and dying, human sexuality, birth control, infertility, aerobics, fitness, reading food labels, jogging safely, employee wellness, binge eating and sexually-transmitted infections.

Hours for the exhibits in the Hetzel Union Building will be Monday, Oct. 5, 1 to 7 p.m.; Tuesday, Oct. 6, 10 a.m. to 7 p.m.; Wednesday, Oct. 7, 10 a.m. to 5 p.m.

Dr. G. William Hettler III will deliver the keynote speech, "The Wellness Revolution," at 8 p.m. Monday, Oct. 5, in Schwab Auditorium.

Dr. Hettler, a physician from the University of Wisconsin at Stevens Point, has gained nationwide recognition in recent years for promoting the wellness concept, which he defines as a process in which a person becomes aware of, and makes choices leading to, a healthier existence.

Kicking off Health Expo '81 on Sunday, Oct. 4, will be a 10,000-meter race at 11 a.m. and a two-mile "Fun Run" at 1 p.m. The runs will start and finish on the HUB lawn.

A Runners' Clinic will take place at 7:30 p.m. Tuesday, Oct. 6, in the HUB

Ballroom, moderated by Pete Bortolotti, president of the Nittany Valley Track Club.

The Centre Area Health Council will hold a panel discussion on "How Community Medical Centers Serve the Needs of the Area, with Emphasis on the Proposed Bellefonte Center" at 8 p.m. Tuesday in Schwab Auditorium. The moderator will be Carl Boymel, senior associate with the Keystone Health Systems Agency.

A disaster drill simulating a plane crash, involving area police, fire and ambulance services, will be held at 6:30 p.m. Wednesday, Oct. 7, in the East Halls area of the campus. Spectators are welcome.

Other events and programs will include: continuous CPR demonstration, lifestyle self-assessment, an "aerobic eyepencer" every morning on the HUB lawn, continuous films, a health museum and health screenings.

Dr. Hettler

Carlos Montoya to open Music Series

The Music Series of Penn State's Artists Series will open its season at 8:30 p.m. Friday, Oct. 2, in Eisenhower Auditorium with a performance by world-renowned flamenco guitarist Carlos Montoya.

One of the most widely heard performers in any concert genre, Montoya has brought his flamenco music to virtually every outpost of the free world, from the U.S. and Canada to Europe and the Orient, eliciting critical acclaim and audience enthusiasm everywhere.

In addition to his globe-girdling tours, Montoya also has won international favor through his many recordings (he is the most recorded flamenco artist in history) and has, in fact, become the living symbol of flamenco music the world over.

A Spanish Gypsy born in Madrid, Montoya demonstrated his innate musical brilliance while still a child and by the age of fourteen was the toast of the "cate

cantantes" during the hey-day of flamenco singing and dancing. His debut as a concert artist was preceded by years of accompanying such distinguished dancers as La Argentina, Vicente Escudero and Argentina.

The first flamenco guitarist ever to dare to display his artistry in a solo concert, he has been hailed by aficionados everywhere as one of the truly great masters of our time. His advanced technique, his flair for inventive innovation and his infinitely varied repertoire represent creative playing in the fullest sense of the term.

Tickets for the Carlos Montoya concert are on sale at the Eisenhower Auditorium box office and the HUB box office. Box office hours are 9:00 a.m. to 4:00 p.m., weekdays. Phone orders on MasterCard/Visa will be accepted at 863-0255 during box office hours.

recipients will be made by the colleges and universities.

Other Pennsylvania institutions, in addition to Penn State, receiving the awards are Carnegie-Mellon and Lehigh universities and the universities of Pennsylvania and Pittsburgh.

The Exxon Education Foundation was established in 1955 by the Exxon Corporation as a nonprofit corporation to aid education, primarily in the United States. The engineering education funding is in addition to the Foundation's regular programs, which total \$22 million in 1981.

Senate

(Continued from page 1)

proposed change to PS-23 is intended to provide a clearer statement of the appropriate procedures for evaluating teaching effectiveness. The committee proposes that procedures and methods of evaluation shall be selected by which members of individual academic units.

Any proposal for revision to PS-23 that is passed by the Senate becomes a recommendation from that body to the President and must be acted upon by him before it becomes policy.

In business carried over from its last meeting, the Senate will continue its discussion of a special committee's legislative report on computer informational systems. Having passed the first of six recommendations — that the Senate through its committees consider

the establishment of a computer literacy requirement within the baccalaureate degree program — the Senate will consider the remaining proposals, through which the University could more efficiently and with more unity utilize its computer and informational systems.

In other legislative business, the Senate will consider proposals from the Committee on Academic and Athletic Standards for changes to "Academic Policies and Procedures for Undergraduate Students," published annually in the *Penn State Student Handbook*. The changes are needed to make student rules conform with the early semester calendar system.

The Senate also will hear a legislative report from the Committee on Undergraduate Instruction on proposed changes to one section of the policy regarding adjudication of grades, also

published in the *Penn State Student Handbook*.

Heading the informational report is the Faculty Affairs Committee's on "A Study of the Sabbatical Leave Program." Undertaken in 1980 and 1981, the purpose of the study was to determine the present status of the program; to assess it in comparison with sabbatical programs at similar universities, and to elicit the reactions of the faculty to the program.

The committee will explain how the study accomplished its goals and will highlight some of the most significant findings.

The second of the two informational reports on the agenda will be presented by the Committee on Undergraduate Instruction, which will expand its "Annual Report on the Distribution of Grades" with sections on "Dean's List" and "Graduation with Distinction."

Electronics use hones skills in CBA's Behavioral Learning Center

Using television to teach isn't new, as thousands of past and present Penn State students who have taken Accounting 101 can testify.

What is new are the different ways in which television production is being employed to promote instruction and faculty research in the College of Business Administration.

Tucked away in six rooms on the second floor of the Business Administration Building is the College's Behavioral Learning Center featuring four television cameras, video cassette recorders, a special effects generator, six TV monitors,

a complete audio system, observation rooms with one-way windows and telephone hook-up with the University computer.

"I would say that this center is among the most up-to-date of its kind in the country," notes Robert E. Griffin, instructional specialist, who oversees the center's operation.

One of the best-known uses of the Behavioral Learning Center is for the interview simulation programs conducted by master of business administration students and by some undergraduates. Students go through "practice"

interviews with actual corporate representatives which are videotaped and available for critique afterwards.

MBA students and honors undergraduates also use the center to hone communication skills in oral business presentations. The students make their presentations which are videotaped and then reviewed by the student and instructor.

MBA students do this six times each year and the presentations are edited onto a master cassette which the students may keep to evaluate progress.

There are other ways to use the center for instruction, says Mr. Griffin. An organizational behavior class, for example, participates in "gaming simulations."

"The class is divided into several groups in separate rooms within the center," he explains. "Each group can be checked from the control room. The instructor gives students a simulated problem and then introduces new developments at various stages."

"The students are linked to the University computer so they can work on the problem and the new developments. We could never have done anything like this in Boucke Building, where the College of Business Administration previously was located."

The one-way windows in rooms surrounding the control room are sometimes useful for experiments. For example, consumers have been videotaped with a television camera concealed behind an observation window to get their reactions to certain soybean-based food products.

They were queried on things such as taste, desirability, price and appeal of packaging. Later, they were informed that the conversations were videotaped — after giving their permission — their comments were used for further study.

"We're finding more use of the center by faculty and students each year," Mr. Griffin says. "The faculty are more acclimated to what the center can do for them and new faculty members frequently bring some media skills with them to Penn State."

The Behavioral Learning Center went into operation in Fall Term, 1976, and records on its use have been gathered quarterly since 1978. The records show that use by faculty and students has more than doubled in the past three years.

As recently as the fall of 1980, the center was operated by one graduate assistant and two part-time employees. Now there are five part-timers in addition to the grad assistant.

The television capabilities of the center have accounted for 44 percent of its use time this year while the computer link accounts for another 32 percent. It has been used for observation 20 percent of the time while audio capabilities alone account for another 4 percent of its use.

"The College of Business Administration's commitment to the Behavioral Learning Center has been stronger than similar efforts at many other schools," Mr. Griffin says, "and I anticipate that the center's use will continue to grow as new ideas for the facilities here are discovered by faculty and students."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 8, 1981. DO NOT CONTACT THE AREA THAT HAS THE vacancy.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PROGRAM ASSISTANT, COMMONWEALTH EDUCATIONAL SYSTEM, SCHUYLKILL CAMPUS Provide assistance to the area director in planning, implementing and conducting a continuing education program for the campus service area; responsible for supervising office procedures, exercising fiscal control; and maintaining related records. Bachelor's degree plus one to two years related experience.

AREA REPRESENTATIVE, COMMONWEALTH EDUCATIONAL SYSTEM, DELAWARE COUNTY CAMPUS Responsible for the functions of

development, organization, operation, and administration of continuing education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two to three years of directly related experience.

CLINICAL DIETITIAN, COLLEGE OF MEDICINE, HERSHEY Responsible to the manager, Patient Nutritional Care, for providing nutritional care to

Extension Professors set promotion-tenure forum

The Extension Professors Association in the College of Agriculture is sponsoring a day-long forum and discussion on promotion and tenure Friday, Oct. 9, at the Nittany Lion Inn. It is open to all College of Agriculture faculty members.

Speakers will include Dr. Samuel H. Smith, dean of the College; Dr. Richard C. Cunningham, chairman of the University Promotion and Tenure Committee; Dr. Rosemary Schraer, associate provost; Dr. Thomas B. King, College of Agriculture Promotion and Tenure Committee, and Dr. Ernest L. Bergman, a former College of Agriculture representative on the University Promotion and Tenure Committee.

All are being asked to speak briefly on

selected individual and/or patient groups by assessing nutritional needs, developing and implementing nutritional care plans and evaluating and reporting results appropriately. Bachelor's degree in food and nutrition or equivalency, plus an approved internship or traineeship, coordinated undergraduate program and registration, plus one to two years of effective experience.

the interpretation of tenure and promotion requirements and rules as presented in PS-23, and to identify what each level committee considers when making promotion and tenure decisions.

Reservations are required. For more information contact Marcia Bepler, 865-6551, or Don Daum, 865-7685.

Banks join salary deposit

The Treasurer's Office has reported that the following banks will participate in the University's salary deposit service, effective Oct. 16: Equibank; Pittsburgh; Union National Bank of Pittsburgh; Mellon Bank, N.A., Pittsburgh; First National Bank of Spring Mills, and Dauphin Deposit Bank & Trust Company, Harrisburg.

Funding Sources

For further information, call 865-1375

365-13 The National Research Council plans to award approximately 35 **Postdoctoral Fellowships for Minorities**. Fellowship recipients will be selected from among scientists, engineers, and scholars in the humanities. The competition is sponsored by the Ford Foundation. Awards will be made in the areas of behavioral and social sciences and EMP fields (engineering sciences, mathematics, physical sciences, life sciences, and interdisciplinary programs). **Tenure of fellowship provides postdoctoral research experience at the institution of the fellow's choice.** Stipend levels are \$18,500 for regular and \$25,000 for senior postdoctorals. The deadline is February 1, 1982. (Ref. NRC announcement)

368-21 The National Research Council announces **1982 Research Association Awards Programs** for research in the sciences and engineering to be conducted in 18 federal research institutions. Approximately 250 new full-time associationships will be awarded for research in chemistry, engineering, mathematics, and in the earth, environmental, physical, space, and life sciences. Awards are for a year with possible extensions for a second year. Stipends range from \$22,400 for recent Ph.D.s to \$50,000 for senior associates. The deadline is January 15, 1982. For information call (202-389-6554). (Ref. NRC announcement)

Penn State Intercom

Enlarged Penn State Fund Council meets, outlines major objectives

"If ever a university was ready to make significant gains in private support, it is Penn State University," President Oswald has told the Penn State Fund Council.

Members of the newly-enlarged Fund Council held their first meeting Friday and Saturday, Oct. 2 and 3, at University Park.

During the two-day session, Council members organized and developed plans for achieving their primary objective: to support, as volunteers, Penn State's efforts to increase private giving from \$11.4 million to \$20 million annually within the next several years.

"The Fund Council is meaning more to the University with each passing year," Dr. Oswald said. "With an enlarged and active membership, the University's decision to strengthen activities within the Office of Gifts and Endowments, and the increased emphasis being given private fund-raising by senior academic officers and their faculties, we are truly ready to reach new heights in private fund-raising."

"Penn State is a vital, vigorous institution attractive to students. As we begin this new level of effort, there is a readiness. I can assure you that there is a need if this institution is to be able to continue to do things well."

Dr. Richard E. Grubb, senior vice president for administration, told the opening luncheon in the Nittany Lion Inn that upgrading private fund-raising is a priority for the University. "Senior academic officers have defined fund-raising as a major priority," he said.

Lawrence G. Foster, Jr., corporate vice president, public relations, Johnson & Johnson, and president of the Fund Council, noted that "this University is a very vital part of the mainstream of America."

President Oswald meets with Lawrence G. Foster, Jr., right, president of the Penn State Fund Council, and Louis E. Lasch, left, Council member, at the group's opening session

"We may have underestimated that point in the past," he said. "As we engage in fund-raising in the real world of competitive philanthropy, that fact vastly broadens the potential."

At the Council's first business session in the Faculty Building, members heard reports on five categories in the University where private funding is of critical importance. Presentations were Provost Eddy, academic enrichment; Dr. Paul Axt, professor of mathematics and head of the University Scholars Program, scholarships and fellowships; Dr. Stuart Forth, dean of the University Libraries; Dr. Wilbur Meier, dean of the

College of Engineering, equipment, and President Oswald, facilities construction and renovation.

An overview of the organization of the Office of Gifts and Endowments, fund-raising capabilities within the colleges, and existing relationships with potential funding organizations also was presented by Charles Lupton, OGE executive director.

At business sessions Friday and Saturday, Council members conducted detailed discussions on how they can most effectively contribute to the private fund-raising program. Committees were organized which will work with OGE staff

members in identifying how the committees and individual committee members can be most useful in gaining financial support for programs and projects.

Council committees and their co-chairmen are:

Alumni and Friends, Jay B. Claster, president, M.L. Claster & Sons, Inc., and Philip H. Cease, vice president, personnel, Kinney Shoe Corporation. Bequests and Deferred Giving Committee, Paul J. Levine, Attorney, Morgan, Lewis & Bockius, and Glenn E. Thomson, attorney. Corporations and Foundations, Edward R. Hintz Jr., president, Hintz & Holman, Inc., and F. Richard Nichol, president, Institute for Biological R & D, Inc.

Fund Council members, besides Mr. Foster, who attended the meeting were: Richard A Benefield, general manager, Hotel Magee; Edward R. Book, chairman and chief executive officer, HERCO, Inc.; Samuel B. Casey Jr., former chairman of the board and chief executive officer of Pullman, Inc.; Mr. Cease; Mr. Claster; Marian U. Coppensmith, president, Barash Advertising; George H. Deike Jr., retired vice chairman of the Board of Directors and secretary, Mine Safety Appliances Company; Robert L. Elmore, president and owner, Hardvires Company; Jay H. Feldstein, president, Feldstein, Grinberg, Stein & McKee; Philip M. Greenberg, retired president, Energy Development Corporation; Mr. Hintz; J. Lloyd Huck, president and chief operating officer, Merck & Company, Inc.

Owen E. Landon Jr., president, Landon Associates, Inc.; Louis E. Lasch, partner, Meyer, Lasch, Hankin & Poul; Mr. Levine;

President appoints commission to deal with concerns of women

President Oswald has established an 18-member commission to deal with concerns of women at the University.

In particular, Dr. Oswald said, The Pennsylvania State University Commission for Women will "foster a climate supporting academic success" of women at the University.

"I expect to meet with the commission on occasion for mutual discussion of issues affecting women at Penn State," Dr. Oswald said. "I am confident that the University, through the work of the Commission for Women, can influence significantly the quality of life for all members of the University community."

Jane E. McCormick, assistant vice president for student affairs, has been named commission chairperson. Seventeen other University women — faculty and staff members, students and volunteers — will serve on the commission with her.

In addition to the primary purpose, the commission, Dr. Oswald said, will serve as:

— a central focus and forum for issues and concerns of women at Penn State;

— a coordinating mechanism and information clearinghouse for programs for women; and

— an advocate for women's concerns by providing advice and consultation or conducting special studies when appropriate.

"In the planning document, 'A Perspective on the '80s,' the University reaffirmed its commitment to improving the climate for women faculty and staff members and students," Dr. Oswald said. "Since 'A Perspective' was adopted by the Board of Trustees in January, 1980, a number of programs have been created to encourage Penn State women to further their education and development."

Citing the contributions of such programs as the Connect Advisory Committee, the Women's Forum, Campus Colleagues, the Alumni Association's Alumnae Day and the Panhellenic Council's Women's Awareness Week, Dr. Oswald noted that the relatively new Women's Studies Option is the only official University unit with "women" in its title.

"The faculty members responsible for the option, therefore, receive many requests for information, speakers and advice which a primarily academic unit is not able to provide without diluting its missions," Dr. Oswald said.

"In addition, women faculty and staff members and students increasingly are being included on standing and ad hoc committees throughout the University. Because of the limited number of women available for such roles, the burden has fallen on the shoulders of a few. I am hopeful that the Commission for Women can address these problems as well."

Jane McCormick

Those who will serve with Ms. McCormick on the commission are:

Dr. Maureen A. Carr, professor and director, School of Music; Dr. Carol A. Cartwright, professor of education and acting associate dean, Commonwealth Educational System; Dr. Patricia Farrell, associate professor and chair, Department of Parks and Recreation; June Gamble, president, Faculty Women's Club; Kathryn Johnson, co-chair, Department of Women's Affairs, Undergraduate Student

(Continued on page 2)

Enrollment for Fall Term is up

Preliminary fall term enrollment at the University is 1,353 higher than the comparable figure for last year. This year's preliminary enrollment for all 21 Penn State campuses is 56,634.

"We have record-high preliminary enrollment figures at seven of the 16 Commonwealth Campuses," Dr. Robert E. Dunham, vice president for undergraduate studies, said. "The total preliminary figure for the Commonwealth Campuses — 17,958 — also is the highest ever reported."

Dr. Dunham said the preliminary enrollment was "higher than we expected" and some cases exceeded last year's final enrollment figures. The final figures are generally higher than the preliminary figures.

At the University Park Campus, last year's final enrollment was 32,704 for the fall term. This year's preliminary enrollment is 33,501.

Overall, the greatest gains were in the Division of Undergraduate Studies, up by about 22 percent, and the College of Business Administration, about 15 percent higher than last year. Large enrollment gains also were reported for the colleges of Science and Engineering.

Last year's preliminary fall term enrollment figure for the Commonwealth Campuses was 17,709. The seven campuses that set new records this year

(Continued on page 3)

Calendar Conversion Council approves evaluation proposal

The Calendar Conversion Council has approved a proposal to evaluate the adequacy of classroom/laboratory facilities and faculty resources, given academic program requirements, under the semester system.

The study will require that colleges and campuses establish trial class schedules for the fall semester, 1983, and the spring semester, 1984. Council and the University Scheduling Office will jointly coordinate the study for University Park, while other locations will conduct parallel studies of their own resources.

Five Council members will visit Iowa State University later this month to discuss problems encountered in Iowa State's recent conversion from the quarter to the semester system.

Departments which, in the process of reviewing their curriculum, decide to drop or add courses or change the credit value of a course are requested to send that information to the Council, 304 Old Main, using the forms which were provided for the curriculum submission sent to the Council in June.

In other business at Sept. 24 meeting, the Council:

- Appointed a Steering Committee to

assist in determining the agenda for meetings and to review progress on calendar conversion. Members are James Dungan, Wendell Harris, Henry Hermanowicz, Richard McCarl, George McMurry, Rosemary Schraer, and Richard Sheeder.

- Conducted a discussion on the pros and cons of course re-numbering. The Steering Committee will decide at its first meeting whether a committee will be appointed to study and make recommendations on course re-numbering.

- Heard the Faculty Contracts Committee report that different types of contracts for different groups of faculty within the University are being considered. Letters of appointment written by individual colleges and departments will be examined by the Committee; one form letter to cover all types of appointments does not appear to be advisable.

- Referred a question concerning the handling of undergraduate students dropped for unsatisfactory scholarship to the Faculty Senate Committee on Admissions, Records and Scheduling.

Six faculty members receive fellowships

The following faculty members have been awarded faculty research fellowships from the Institute for the Arts and Humanistic Studies for the winter and spring terms of this year:

- Dr. Thomas W. Benson, professor of speech communication, for a critical study of documentary films by Frederick Wiseman;

- Dr. Gideon Golany, professor of urban and regional planning, to conduct a

study of underground housing in Tunisia;

- William Hanson, associate professor of art, to create a series of lithographic prints;

- Dr. John L. Logan, assistant professor of French, to examine manuscripts for a book-length study, *The Longman View: Studies in French Critical Theory and Poetic Practice, 1580-1680*.

- Dr. Joseph Price, professor of English, to prepare a collection of critical essays on Hamlet;

- Dr. Michael D. Riley, assistant professor of English at the Berks Campus, for a study of creative writing in poetry.

Faculty honored for published research

The faculty of the Administration of Justice Program in the College of Human Development was rated in the nation's top five in a recent survey of published research.

"We're extremely pleased to see the scholarly contributions of our faculty members recognized in this way," says Dr. Daniel Katkin, associate professor of law and program head. "We believe the research efforts of our faculty are vital to the learning experience of our students."

Dr. David Fabianic of Montana State University examined research articles placed by faculty members of 27 universities in six prominent criminal justice journals between 1974 and 1978. His findings were published in the Fall, 1981, edition of the *Journal of Criminal Justice*.

"The five schools with the highest number of credited articles were the State University of New York at Albany, Pennsylvania State University, University of Southern California, John Jay, and Ohio State University," he wrote.

SUNY-Albany and Penn State offer doctoral programs in criminal justice while the other three institutions do not.

United Way

UPDATE

United Way records increase in gifts

To begin the 1981 United Way campaign, University Park administrators have contributed about \$10,000 in advanced gifts, according to Chairman Charles L. Hosler, dean of the College of Earth and Mineral Sciences.

"This reflects an increase of 23.5 percent by the donors over their contributions last year," he noted. "Through their generosity, these people in leadership positions have set a good example of supporting the variety of services provided by United Way's 29 agencies in Centre County."

Included in the advanced gifts solicitation are members of the president's staff, deans, vice presidents, assistant vice presidents, and assistant and associate deans.

As of Oct. 5, 62 of them contributed to the United Way. Chairman of the advanced gifts campaign is Irvin H. Kochel, assistant vice president for administration.

The University Park United Way campaign, which began Sept. 29, has a goal of \$120,000 — or about \$17,000 more

than last year. Another goal is to increase the percentage of contributors from about 30 percent of employees last year to 50 percent this year.

Through personal solicitation, says Dr. Hosler, every employee is given an opportunity to make an informed decision about participating in the United Way.

In Centre County, the United Way includes this year, for the first time, Easter Seals Society, which operates a rehabilitation treatment center for the physically handicapped. The county-wide United Way goal for all agencies is \$420,000.

As the largest single employer in Centre County, the University supports the United Way as an effective means of helping citizens in need of youth programs, health assistance, counseling and emergency services. Last year United Way agencies served more than 55,000 persons.

United Way campaigns are conducted at all Penn State campuses during September and October. Employees may give through payroll deduction or direct contributions. They may choose to send their contributions to any United Way in Pennsylvania. Contributions are confidential.

Fellowship to assist Chemistry Department

The Russell Marker Faculty Fellowship has been established at the University to provide support for outstanding young faculty members in the Department of Chemistry.

The fellowship honors Dr. Marker, a former faculty member, who is known for his work in isolating and synthesizing steroid hormones. It was established by Syntex Corporation of Palo Alto, Calif., which Dr. Marker helped found in Mexico City in 1944.

Under the terms of the agreement, the holder of the fellowship will receive \$15,000 annually for five years for travel, secretarial services, technical assistance and other expenses. He or she will bear the title, "Russell Marker Faculty Fellow."

Dr. Marker worked in his laboratory at

Penn State to find a cheap and abundant source of steroid hormones. He was particularly interested in a substance called diosgenin that could be converted into the pregnancy hormone, progesterone.

When he discovered, in the jungles of Veracruz in Mexico, a root of a wild vine that produced a good yield of diosgenin, Dr. Marker was certain that Mexico was the place for a hormone industry. However, he could not interest American drug companies in the idea. He left Penn State and rented a small laboratory in Mexico City, where he and two partners incorporated Syntex, S.A.

Although Dr. Marker left the company to go into other Mexican ventures, the work he began became widely known and used. Syntex is now an international health sciences company with operations throughout the world. Star Dental, a Syntex Company, has facilities in Valley Forge and Lancaster, Pa.

Janice Lloyd named alumni award winner

Janice Holm Lloyd, acting director of the Michigan Consumer Education Center, is the 1981 recipient of the College of Human Development's Alumni Recognition Award, given annually by the College's Alumni Society.

Mrs. Lloyd will be honored at 3 p.m. Friday, Oct. 16, in Room S-209 of the Henderson Human Development Bldg. as part of the College of Human Development's Action '81 Program. The program brings together students, faculty

and alumni for three days of meetings to discuss current professional trends and employment information.

Mrs. Lloyd designs and administers Michigan's statewide consumer education program from her offices at Eastern Michigan University in Ypsilanti. She assumed the post in February after serving as associate director of the center since 1979.

A 1955 graduate of Penn State with a degree in home economics, she earned a master's degree from the University of Missouri in 1976 in home economics education with an emphasis in family economics and management.

Faculty workshop set

The Instructional Development Program's fall workshop, "Communication: The Faculty-Student Connection," has been scheduled at three Commonwealth Campuses.

The workshop will be held 1:30-4:30 p.m. Tuesday, Oct. 13, in Room 1 of the Student Center at the Berks Campus; 1:30-4:30 p.m. Thursday, Oct. 15, Room 101, Classroom Bldg., Hazleton Campus,

and 1:30-4:30 p.m. Tuesday, Oct. 20, in the Library at the Beaver Campus.

The workshop theme addresses communication "essentials" and uses that material to generate strategies responsive to problems of student motivation. The presentation combines formal lecture and interactive segments.

Faculty interested in additional information about the workshop or in making reservations should call the Instructional Development Program at 863-2599.

Faculty Handbook due this month

A new 1981 edition of the *Faculty Handbook* will be available later this month.

The *Handbook*, last revised in 1976, will be distributed to faculty members through Interdepartmental Mail. Additional copies may be obtained by contacting Dr. Donald W. Johnson, head of the Instructional Development Program in 307 Grange Bldg., phone 863-2599.

Virtually all material from the old handbook has had some revisions. New material has been added on the following:

Harassment on the Basis of Sex, Academic Administrative Evaluation, Radnor Center, Open-Learning Programs in the Commonwealth Educational System, Structure of the Commonwealth Educational System, Classroom Repairs, Requests for Reduction of Prior Tenure Credit, Dean of University Libraries,

Campus Loop System, and the new Instructional Development Program, University Testing Services, and University Division of Learning and Telecommunications Services.

The *Handbook* is intended to serve the needs of faculty members on a University-wide basis. Some Commonwealth Campuses supplement the *Handbook* with additional information pertinent to their own local conditions.

Chester C. Gnatt, assistant to the provost, served as chairman of the *Handbook* Revision Committee. Members were Marquee A. Bagshaw, representative of the Graduate School; Robert W. Dombrowsky, representative of the Office of Personnel Administration; Dr. Manfred Kroger, Faculty Senate representative; Dr. John L. Leathers, representative of the Commonwealth Educational System; Louise D. Wartik and William E. Campbell, representatives of the Department of Public Information and Relations, and Dr. Leonard N. Zimmerman, representative of the Council of Academic Deans.

Fund Council

Smith, president, Smith, Miller & Associates, Inc.; Mr. Thomson; Samuel S. Vaughan, publisher/president, Doubleday Publishing Company; Robert W. Welsh, executive vice president, Leslie T. Welsh, Inc.; Roy Wilkinson Jr., Justice of the Supreme Court of Pennsylvania.

Quentin E. Wood, president of the University Board of Trustees, and President Oswald are ex-officio members of the Fund Council.

Nursing Consultation Center offers programs

Two programs on interpersonal relationships are being offered at the Nursing Consultation Center.

"Finding Your Cool" is designed for young adults. It consists of three two-hour sessions from 4:45 to 6:45 p.m., beginning Oct. 29.

"Renewing Your Outlook" is for middle-aged adults. It involves three two-hour sessions from 7 to 9 p.m., beginning Oct. 29.

Both programs address the themes of self-understanding, listening and talk. Individuals are urged to register with a partner if possible, but it's not required. A modest fee is charged.

For more information and registration, call the Nursing Consultation Center at 863-2200 weekdays from 9 a.m. to noon and from 1 to 4 p.m.

University community warned about animals

The University's safety officer has issued a warning to faculty and staff members and students not to comfort or feed by hand animals that appear to be sick.

Howard O. Triebold Jr., manager of the safety division, said a skunk, later shown to have been rabid, recently had to be killed near the Institute for Land and Water Research.

"This isn't the first time a rabid animal has been found on University land," Mr. Triebold noted.

He urged members of the University community not to handle, or try to make pets of, wild animals, particularly foxes, skunks and raccoons, which are among the more common carriers of rabies. He added that police or safety officials should be notified when animals that are acting strangely or are sick are spotted.

Provost Eddy will address University Scholars Convocation

Provost Eddy will deliver the keynote address — "You Are Your Own Work of Art" — at the University Scholars Convocation, at 7:30 p.m. Tuesday, Oct. 13, in Schwab Auditorium.

The convocation, which marks the University Scholars Program's second year, is open to the public.

Joining Dr. Eddy on the program will be Dr. George W. Franz, assistant professor of history at Delaware County Campus, who chaired the Task Force on Academically Superior Students for the University Faculty Senate.

Dr. Paul Axt, director of the program, will serve as moderator.

Honor students Stephen L. Mayo, Sara A. George and Hance L. Huston will offer first hand information on how the Scholars Program incorporates undergraduate research, scholarships and internships, and integrated undergraduate-graduate study.

Music for the hour-long program will be provided by two new faculty members in the School of Music, College of Arts and Architecture. Flutist Susan M. Klick and guitarist Anne E. Waller, both instructors, will perform "Grand Duo Concertino, opus 65" allegro maestoso, minuet and trio by composer Mauro Giuliani.

College receptions for Scholars Program participants and faculty will be held immediately following the program at the following locations:

Agriculture, 301 Ag. Adm Bldg; Arts

and Architecture, 216 Engineering D; Business Administration, Fireside Lounge, Nittany Lion Inn; Earth and Mineral Sciences, Alumni Lounge, Old Main; Education, Chambers Gallery; Engineering, Bayard Kunkle Activities Center; Human Development, Living Center, 110 Henderson Human Development Building; Liberal Arts, Main Lobby, Sparks Building; and Science, Gallery Lounge, HUB.

The College of Health, Physical Education and Recreation will honor students enrolled in that college prior to the program. Students enrolled in the Division of Undergraduate Studies will be encouraged to attend any college reception of their choice.

The University Scholars Program is designed to enrich the general education of academically superior students and to deepen their preparation for graduate study or professional practice. These scholars are enrolled in honors classes and projects, graduate-level courses and independent study and research. A program in the residence halls organized by Honors Program Assistants, includes dinner-seminars with faculty, visiting scholars, artists and public figures.

Students invited to participate in the Scholars Program must present high test scores and outstanding secondary school records or show high academic achievement in their freshman and sophomore years.

Enrollment

(Continued from page 1)

were Allentown, Altoona, DuBois, New Kensington, Schuylkill, Scranton and Wilkes-Barre. At the Schuylkill Campus, enrollment was up by nearly 20 percent. Wilkes-Barre reported a nearly 13 percent increase in the preliminary figures.

Penn State's enrollment increases come at a time when most indicators had pointed to the beginning of a decline in higher education enrollments.

"I'm sure that Penn State's admissions office, with its more aggressive recruitment of good students, has been

partly responsible for the increases," Dr. Dunham said.

He also said much of the increase at the Commonwealth Campuses can be attributed to new associate degree programs in such fields as telecommunications and clinical health services.

"I think we've been doing a good job of responding to the needs of society and students," he said. "Our program offerings have been flexible. We've responded quickly to the call for professionals in a number of changing or newly emerging fields."

Much of the enrollment increase at the

Commonwealth Campuses, Dr. Dunham said, has been among students in associate and baccalaureate degree programs. There have been declines, in general, in the number of non-degree and provisional students — those not enrolled in degree programs.

"That generally says something good about the quality of students we're attracting," Dr. Dunham said. "While it isn't true in every case, degree students tend to be more serious about their studies."

Many of the campuses, he added, have stepped up their own efforts to attract qualified degree candidates.

"Black Hat-Black Glove," a graphite drawing by William D. Davis, assistant director of the Museum of Art, is part of the exhibition "Traditions: The Region/The World" sponsored by ArtTrain.

Phyllis Newman

Drama Series opens tomorrow with Phyllis Newman in lead

The Drama Series of the Artists Series will open its season with Phyllis Newman in *The Madwoman of Central Park West* at 8:30 p.m. Friday, Oct. 9, in Schwab Auditorium.

The Madwoman of Central Park West is a madly charming, madly funny, and madly entertaining show with an acting-singing-dancing cast of one. Clive Barnes of the N.Y. Times calls *Madwoman* "... an utterly delightful show, by a woman bold enough, brassy enough, delicate enough and sweet enough to take her psyche off in public and give it a wash and whirl. The result is crazy, brilliant and rather touching."

Phyllis Newman began in show business at age four as a protégé of singer Belle Baker, whose "red hot mama" style she imitated. It was the first of the series of impersonations that she mastered.

Throughout her childhood, she was a popular performer in the circuit which extends from Atlantic City to the Catskills.

At age eleven, she finally retired.

Her interest in the theatre was rekindled when she transferred from Western Reserve College to Columbia University in New York City. There she studied drama and auditioned for and won a part in the Broadway musical *Wish You Were Here*. Later, she was signed to understudy Judy Holliday in the musical hit *Bells Are Ringing*. The book and lyrics for *Bells Are Ringing* were written by Adolph Green (of *Comden and Green*). Phyllis Newman

became Mrs. Adolph Green in 1960. The Greens have two children, Adam and Amanda.

In 1962, Mrs. Newman won a Tony Award as Best Supporting Actress in a Musical for her role in *Suitways Are for Sleeping*, against such competition as Barbra Streisand and Barbara Harris. (She would eventually alternate with Barbara Harris as the lead in Mike Nichols' production of *The Apple Tree*.)

Phyllis Newman's films include *Picnic*, *The Vagabond King*, and Sidney Lumet's *Bye Bye Braverman*. She has played dramatic roles on television in "Burke's Law," "Wild, Wild West," and "CBS Playhouse." Actually, television is the medium through which she has become known and recognized by millions of Americans as a frequent guest on "The Tonight Show," "Merv Griffin," "Mike Douglas," and "That Was the Week That Was."

Phyllis Newman's nightclub career began at the Shamrock Hilton in Houston; from there she moved on to such famous nightspots as the Coconut Grove in Los Angeles and the Persian Room at the Plaza Hotel in New York. Her cabaret act debuted at Manhattan's Grand Hotel in June of 1977.

Tickets went on sale Tuesday at the Eisenhower Auditorium box office and HUB booth. Sales will continue weekdays, 9:00 a.m. to 4:00 p.m.

Choirs to perform for Homecoming

The annual Homecoming Concert will be presented by the Penn State Glee Club and the Penn State Women's Chorus at 7:30 p.m. Saturday, Oct. 10, in Schwab Auditorium.

The Women's Chorus will open the concert with Leonard Bernstein's Canon from Kaddish, Symphony No. 3. G.B. Pergolesi's "Glory to God in the Highest," the second number on the program, will feature solos by sopranos Brenda Harsch and Kathy Hartman and also Candy Kintzer.

The Women's Chorus will perform "Soave sia il vento" from Mozart's "Così fan tutte" and Benjamin Britten's "Old Abram Brown," set to a poem by Walter de la Mare, and Ms. Harsch will again be featured on "Annie Laurie." The chorus will close its part of the concert with Gustav Holst's "To Agni" from "Choral Hymns from the Rig Veda."

The second portion of the program will consist of performances by the Keynotes. Selections by the Hi-Los will comprise the third part of the evening show. The

Hi-Los will be assisted in their performance by violinists Candace Walts and Chris Kranyak, banjoist Dan Swart, guitarist Doug Anderson and bassist Archie Warnock.

Healey Willan's arrangement of the "Agincourt Song" will begin the Glee Club's portion of the concert. The singers have selected several choruses from Gilbert and Sullivan's "H.M.S. Pinafore," to be followed by Archibald T. Davidson's arrangement of "Sacramento," an American sea chanty.

The Glee Club will perform two western numbers arranged by Norman Luboff, "Streets of Laredo" and "Whoopee Ti Yi Yo." Bass-baritone Joel Westa will be featured in Fennesz Heath's arrangement of "In That Great Gettin' Up Mornin'." The evening will close with the Glee Club's renditions of ever-popular Penn State songs.

Bruce Trinkle, associate professor of music, directs both the Penn State Glee Club and the Penn State Women's Chorus. Mr. Westa is assistant director of the Glee Club and Ms. Harsch serves as assistant director of the Women's Chorus.

The concert, which is being sponsored by the School of Music, is free and open to the public.

Brown, Triolo set for annual recital

Bass-baritone Raymond Brown, professor of music at the University and pianist Phyllis Triolo will present their annual fall recital at 3:30 p.m. Sunday, Oct. 11, in Schwab Auditorium.

The concert will be devoted to music by Johannes Brahms and Hugo Wolf. Included in the program are Wolf's "Michelangelo Leider," the last songs written by the composer, in which he used as texts the translations of poems by the Italian sculptor, painter and poet. Mr. Brown and Mrs. Triolo will perform two songs from Brahms' Opus 43, "Von ewiger Liebe" and "Die Mainacht" as well as the composer's complete Opus 105 and his cycle "Four Serious Songs."

Several of Mr. Brown's students and

choir members will perform Brahms' "Leibeslieder Waltzes." Pianists Carl Berceac and Rhonda Wright will accompany the singers for these selections.

Mr. Brown, a Fellow in the University's Institute for the Arts and Humanistic Studies, is a well-known choral director and voice teacher who has conducted numerous performances on campus and elsewhere.

Mrs. Triolo, a State College resident, is a graduate of Juillard and the Paris Conservatory, and has performed frequently at University Park and other campuses. She also has presented recitals in New York City and Washington, D.C.

The School of Music and the Institute for the Arts and Humanistic Studies are sponsoring the concert. There is no admission charge and the public is invited to attend.

Kern shows to offer some Texan humor

A touch of Texan humor opens the first of two productions scheduled this year for Kern Theatre. *Laundry and Bourbon* and *Lone Star*, two one-act plays running as a doublebill, will be presented at the Kern Graduate Commons Oct. 15-18.

The two comedies written by James McClure concern a trio of women and a trio of men as they talk about their problems and lives in the small town of Maynard, Texas. Each play, although a complete unit by itself, reflects and refers to its counterpart — Roy Caulder, the main character of *Lone Star*, and his beloved 1959 pink Thunderbird are the central topics in both.

Michael A. Connolly, a faculty member of the Department of Theatre and Film, plays the part of Roy in *Lone Star*. Mr. Connolly performed most recently as the Wizard in Festival Theatre's "Once Upon a Mattress" and previously in the University Resident Theatre Company's production of *The Crucifer of Blood* last spring. The other two characters in *Lone Star* are played by Michael Brown and David C. McNeill.

For *Laundry and Bourbon*, Lawr Means, a

Michael Connolly

first year MFA-acting candidate, plays Roy's wife Elizabeth. Susan Martinelli and Cyndi Yost complete the cast of *Laundry and Bourbon*.

Laundry and Bourbon and *Lone Star* are directed by Danny Peak and Robert S. Garber respectively — both MFA-directing students. The plays are presented by Kern Graduate Commons in collaboration with the University Resident Theatre Company. Kern Theatre will offer its second production, *Play It Again Sam* by Woody Allen, on April 15-18.

Fayette Campus professor exhibits art

Zeljko Kujundzic, professor of art at the Fayette Campus, is presenting a one-man exhibition at Gallery '76 in Wenatchee, Washington. It opened the Gallery's fall season Sept. 23 and will continue until Oct. 14.

The exhibition of recent works includes ceramics, most of which are figurative sculpture made in Kujundzic's heroic style. Also exhibited are a number of paintings in acrylics and oils, wood block prints and large wall hangings which are linear handwoven tapestries and baliks. *Arts West* critic, Anne Payne, observes "Kujundzic's murals and sculptures are bold tributes to man, nature and freedom. Somehow he has created free space within the confines of his design."

The exhibition is sponsored by the Allied Arts Council of North Central Washington and is supported by a promotion grant from the Alcoa Corporation of Washington.

A sculpture by Kujundzic

University Park Calendar

October 8-18

Special Events

Thursday, Oct. 8

Robeson Cultural Center, "Careers Unlimited" — careers in business and industry, 10 a.m.-4 p.m., Walnut Building.
Commons Film Series, *Think Dirty*, 7 and 9 p.m., Room 112 Kern.
Penn State Dames meeting, 7:30 p.m., Room 101 Kern.
Instructional Development Program workshop for faculty, "Communication Skills for Teachers in Large Classes," 3-4:30 p.m., Room 305 HUB.

Friday, Oct. 9

Craft Demonstration, 11:30 a.m., Kern Lobby.
HUB Craft Center registration for second session classes, noon-5 p.m., Room 312 HUB, through Oct. 22.
Cinematheque Film, *The Godfather*, 7 and 10 p.m., Room 10 Sparks Bldg.
Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.
GSA Coffeehouse, 8 p.m., Room 102 Kern.
Artists Series, Phyllis Newman, *The Madwoman of Central Park West*, 8:30 p.m., Schwab Auditorium.
Sports: soccer vs. Maryland, 7:15 p.m.; JV football vs. Millford Academy, 2 p.m.

Saturday, Oct. 10

Cinematheque Film, *The Godfather*, 7 and 10 p.m., Room 10 Sparks Bldg.
Sports: football vs. Boston College (Homecoming), 1:30 p.m.

Sunday, Oct. 11

Shaver's Creek Environmental Center, "Run for the Fall Colors," 10,000-meter Open, 10 a.m.; two-mile "Fun Run," 10:15 a.m., Stone Valley Recreation Area.
Indoor Sports Complex, open house, 4-6 p.m.
Sports: men's lacrosse vs. Alumni, 11 a.m.; baseball vs. Lock Haven (DH), 1 p.m.

Tuesday, Oct. 13

Forum on Faith, "Strengthening Your Faith through Insights from Science," Dr. Rustum Roy, director of the Materials Research Laboratory, 12:30 p.m., HUB Main Lounge.
GSA Council Meeting, 6:30 p.m., Room 101 Kern.

University Scholars Convocation, 7:30 p.m., Schwab Auditorium.
Dr. Edward D. Eddy, Provost, speaker.
HUB Craft Center open house, 7:30-9:30 p.m., Room 312 HUB.

Wednesday, Oct. 14

Commons Concert, Rustal Quality String Band, noon, Kern Lobby.
Robeson Cultural Center, movie, *Proud Valley*, starring Paul Robeson, 7:30 p.m., Walnut Bldg. Free admission.
Un-Common Theatre (student preview), 2

one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.

Thursday, Oct. 15

Fixed date for meetings involving Commonwealth Campus faculty.
College of Human Development, Action '81 Program, Faculty Day.
Artists Series, Shinichi Suzuki's Talent Education Tour for Young Audiences, 11 a.m., Eisenhower Auditorium.
Artists Series, Suzuki Strings, 7:30 p.m., Schwab Auditorium.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.

Friday, Oct. 16

Astronomy Open House, 8:30-11 p.m., 6th floor, Davey Lab. If overcast, will be held Saturday, Oct. 17. Open to the public.
Fixed date for meetings involving Commonwealth Campus faculty.
College of Human Development, Action '81 Program, Alumni Review Day.
Craft Demonstration, 11:30 a.m., Kern Lobby.
Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.
Cinematheque Film, *Moonstreets*, 7 and 9 p.m., Room 10 Sparks Bldg.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.
Sports: ice hockey vs. Pittsburgh Jr. Penguins, 9:15 p.m.

Saturday, Oct. 17

Fixed date for meetings involving Commonwealth Campus faculty.
College of Human Development Alumni Society Board of Directors meeting, 9 a.m.-3 p.m., Mt. Nittany Room, Nittany Lion Inn.
Cinematheque Film, *Moonstreets*, 7 and 9 p.m., Room 10 Sparks Bldg.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.
Sports: men's cross country vs. Arkansas and Providence, 11 a.m.; field hockey vs. Ohio State, 1 p.m.; ice hockey vs. Pittsburgh Jr. Penguins, 3:30 p.m.

Sunday, Oct. 18

HUB Craft Center second session classes begin.
Shaver's Creek Environmental Center, Pioneer Crafts Festival, noon-5 p.m., Environmental Lab.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.
Sports: field hockey vs. James Madison, 1 p.m.; men's lacrosse, Penn State Invitational.

Seminars

Thursday, Oct. 8

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. J.H. Blanks, Alcoa

Labs, on "Electrical Conductivity on Magnetically Slags: Property Determination in an Aggressive Solid-Liquid System."
Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. D. Schramm, University of Chicago, on "The Very Early Universe."
Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Terry Baker, Exxon Research and Engineering Co., on "Metal-Carbon Interactions."
Public Lecture, 8 p.m., Room 273 Willard Bldg. Dr. Dell Hymes, professor of folklore and linguistics and dean, College of Education, Univ. of PA, on "Indian Myth as Poetic Speech: American Indian Vain as Poetic Speech."

Friday, Oct. 9

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. John Stahl, on "Sulfur Speciation."
Aerospace Engineering, 3:30 p.m., HUB Assembly Room. George Page, launch director, NASA Space Shuttle, "Preparation and Launching of First Space Shuttle."
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Rob Hasswell, professor of geography, Louisiana State University, on "The Making of Historic South African Townships."

Monday, Oct. 12

Entomology Seminar, 4 p.m., Room 204 Patterson Bldg. Dr. John W. Maunier, London School of Hygiene and Tropical Medicine, on "Little Patterning Feet on the Head: Problems with Human Head Lice."
Computation Center Seminar, 7:30 p.m., Room 101 Walker Bldg. Introduction to the use of the Tektronix 4662, Houston-Instrument CPS 156, and 8222A electrostatic Versatec plotters.

Tuesday, Oct. 13

Chemical Engineering Seminar, 3:45 p.m., Room 140 Fenske Lab. Dr. L. A. Robbins, Dow Chemical Company, on "The Strategy of Design and Operation of Mini-Plants."
Geosciences Colloquium, 3:45 p.m., Room 112 Walker Bldg. Professor Donald L. Turcotte, Dept. of Geological Sciences, Cornell University, on "Geometrical Form of Volcanoes."
Genetics Seminar, 4 p.m., Room 111 Animal Industries Bldg. Dr. F. Ferguson, associate professor and director, Central Biological Lab, on "Maternal-Fetal Immune Interactions."
Illustrated talk on American painters in Germany in the 19th century by David Sokol, art historian, University of Illinois and curator, Terra Museum of American Art, Evanston, 5 p.m., Room 230 Arts Bldg. Sponsored by IAHS.

Thursday, Oct. 15

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Della Roy, professor of material science, "Recent Advances in Cement Science."

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Physics Colloquium, 2:20 p.m., Room 445 Davey Lab. M. Tinkham, Harvard University, on "Beyond Equilibrium Superconductivity."
Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. T. J. Peters on "From Phenanthrene to Coke and Graphite."
Special Acoustics Seminar, 4 p.m., Room 73 Willard Bldg. Dr. Robert J. Hooker, senior lecturer in mechanical engineering, University of Brisbane, Australia, on "Noise of Load-Haul-Dump Vehicles."
Computation Center Seminar, 7:30 p.m., Room 101 Walker Bldg. Introduction to the use of the Tektronix 4662, Houston-Instrument CPS 156, and 8222A electrostatic Versatec plotters.
Annual Fall English Conference, guest speaker, 8 p.m., Room 101 Kern. Dr. Donald Murray, professor of English, University of New Hampshire, on "Writing Before the First Draft."

Friday, Oct. 16

Annual Fall English Conference, guest speaker, 9 a.m., Room 101 Kern. Dr. Donald Murray, professor of English, University of New Hampshire, on "Reading Unwritten Writing."
Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Gene Karwacki on "Organic Molecular SIMS."
Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Edward D. Eddy, provost, on "Inside the Black Box: Penn State Management."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon to 11 p.m. Jim Dupree, paintings, through Oct. 10; Linda Brennis, paintings, through Oct. 14; Linda Newby, feather jewelry, through Oct. 15; Ziggy Coyle, clay, through Oct. 15; Jack Troy, ceramics, opens Oct. 18.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 12:30 p.m. Oriental Works from the Museum's Collection. Danish Ceramic Design, opens Oct. 18.

Pattee Library: Bertolt Brecht: Photographs from the East German Government, East Corridor Gallery. Mary Pat Ford, studio photographs, opens Oct. 9, Lending Services Lobby. Sandy Sandmeyer, recent works in batik, Second Floor East. Highlights from the Allison-Shelley Collection, Rare Books Room.

Visual Arts Bldg. Zoller Gallery: Gallery Hours: 9 a.m.-5 p.m., Monday through Friday. Saturdays and Sundays, noon-5 p.m. School of Visual Arts Faculty Exhibition, through Oct. 14.
Leonard Lehrer, print exhibition, opens Oct. 16.

English educator to speak on deafness

Dr. Geoffrey P. Ivey, senior lecturer in child development at the University of London Institute of Education, will present a public lecture at 2:30 p.m. Friday, Oct. 16, in Room 107 Moore Bldg. He will speak on "Why Deaf Children Often Fail to Develop Language."

Dr. Ivey

Dr. Ivey is currently an Alexander Graham Bell Association International Lecturer. He is a strong advocate of teaching hearing-impaired children to communicate by auditory-oral methods. In London, Dr. Ivey maintains a private clinical practice for children who are deaf or hard-of-hearing and who have language disorders.

Certified as a teacher of the deaf by Manchester University, he taught hearing-impaired and multiply-handicapped children from 1953 to 1965. He received a master's degree in educational psychology from Reading University and a doctorate in psycholinguistics from London University.

Illinois art historian to lecture on Oct. 13

Art historian David Sokol will present a free public lecture at 5 p.m. Tuesday, Oct. 13, in Room 230 Arts Bldg. His presentation will be entitled "American Artists in Germany: The Dusseldorf Experience."

During his visit, Mr. Sokol also will present a talk for a Comparative Literature

'Forum on Faith' to begin on Oct. 13

Forum on Faith, a brown-bag lunch program sponsored by the Office of Religious Affairs in conjunction with several campus ministries, will examine "Strengthening Your Faith through Insights from Science" during the Fall Term.

The forum is designed to provide an opportunity for students, faculty and staff to discuss the impact of religious faith on daily life and duties at the University. Discussion will focus on a short presentation by a member of the University community.

Luncheon and meet with art history students and faculty.

Mr. Sokol, a specialist in 19th century American art, is chairman of the Department of the History of Architecture and Art at the Chicago Circle Campus of the University of Illinois. He also is curator of the Terra Museum of American Art in Evanston, Illinois.

His visit is being sponsored by the University's Institute for the Arts and Humanistic Studies.

Presenter for the Fall Term series will be Dr. Rustum Roy, professor of solid state and geochemistry, director of the Materials Research Laboratory, and chairman of Penn State's Science, Technology, and Society Program.

The program will be held from 12:30 to 2 p.m. Oct. 13 and 20 in the HUB Main Lounge; Oct. 27 in the HUB Gallery Lounge, and Nov. 3 in the HUB Main Lounge.

Guest to lecture at English Conference

Dr. Donald Murray, professor of English at the University of New Hampshire, will give two public lectures at the University's annual Fall English Conference next week.

He will speak on "Writing Before the First Draft," at 8 p.m. Thursday, Oct. 15, in Room 101 Kern. His talk will examine the "writing" that precedes writing — the activities that successful writers employ to make effective writing possible.

Dr. Murray will discuss "Reading Unwritten Writing," at 9 a.m. Friday, Oct. 16, in Room 101 Kern. He will suggest methods of teaching student writers to read writing in progress so that successive drafts may improve.

Penn Staters

Dr. Stephen J. Benkovic, Evan Pugh professor of chemistry, has been chosen to serve for three years on the Committee on Chemical Sciences (CCS) of the National Research Council (NRC). The NRC is the research arm of the National Academy of Sciences. The CCS is the principal NRC channel for interaction between the chemical research community and federal agencies and organizations responsible for chemical sciences research.

Dr. Benkovic and Dr. Rold Hoffman of Cornell University have been assigned to study the scope, role, and extent of chemistry research supported by the National Institutes of Health.

Donald J. Epp, professor of agricultural economics and assistant director of the Institute for Research on Land and Water Resources, was an invited participant at an international conference on the University and Rural Resource Development: "The Road Between Theory and Practice," in Backaskog, Sweden.

The conference was arranged by the Swedish University of Agricultural Sciences and was attended by scientists from fourteen countries. Dr. Epp presented a paper entitled "University Assistance to Government in Decisions Involving Risks" and served as recorder for one of the subgroups.

George T. Harrell, vice president emeritus for medical sciences, has been elected to the Institute of Medicine, which was chartered in 1970 by the National Academy of Sciences to enlist distinguished members of medical and other professions for the examination of policy matters pertaining to the health of the public.

James R. Keiser, associate professor of hotel and institutional administration and assistant program head, Food Service and Housing Administration, has been named the 1981 winner of the Evelyn R. Saubel Faculty Award.

The award, sponsored by the College of Human Development Alumni Society, is presented annually to a faculty member in the College who is committed to human service and to serving students.

Professor Keiser was cited for being accessible to students as an adviser and for assisting them in career decisions. He was lauded for demonstrating a caring, professional style and for symbolizing the values toward which the College of Human Development is directed.

The award is named for Mrs. Saubel of State College, a retired faculty member who has been deeply concerned for the welfare of her students. Professor Keiser will receive the award, which includes a \$500 check, at 10 a.m., Thursday, Oct. 15.

at the Hetzel Union Building Assembly Hall as part of an all-college faculty meeting of the College of Human Development.

Dr. Philippos Loukissas, assistant professor of urban and regional planning, was an invited participant in a post-graduate seminar on methods for interdisciplinary research on Mediterranean island and coastal ecosystems.

The seminar was sponsored by the inter-governmental program, "Man and Biosphere," under the auspices of UNESCO. It brought together natural and social scientists from 10 nations on the Greek island of Skopelos, Aug. 24 to Sept. 5.

Dr. Loukissas' participation involved preparation and demonstration of a gaming simulation model for the impacts of tourist development on island ecosystems. He also presented a paper on

application of the model at the annual Congress of the International Association of Scientific Experts in Tourism in Cardiff, Wales, Sept. 13-18.

Dr. Gary L. Lilien, research professor of management science, has been named editor-in-chief of the journal *Interfaces* for a three-year term beginning April, 1982.

Dr. Lilien, who joined the University this fall from MIT, received bachelor's master's and doctoral degrees in operations research from Columbia University. His major research interests are in management science applications, particularly in the marketing area.

Dr. Samuel H. Smith, dean of the College of Agriculture, has been appointed by Trustees of the University of Pennsylvania to a three-year term on the Board of Overseers of the University of Pennsylvania School of Veterinary Medicine.

25-year chairs

Dr. Hudson

Dr. Alessandro

Dr. Beik

The University of Education recently presented 25-year chairs to two faculty members, **Dr. George R. Hudson** and **Joseph Alessandro**.

Dr. Hudson, professor of education in the Division of Counseling and Educational Psychology, joined the Penn State faculty in September, 1955, after serving for two years as counselor and director of guidance in the Massapequa (N.Y.) Public Schools. He also was a high school English teacher and served as a psychometrist for the American Institute for Research in Pittsburgh.

During his Penn State tenure, Dr. Hudson served as chairman of the College of Education's Counselor Education Programs from 1959 to 1968. In addition, he has served both the College and the University in a number of capacities, most recently as chairman of the College's Faculty Council and as current chairman of the University's Hearing Board, a position he's held for the past six years.

Dr. Hudson has authored, co-authored or edited some 25 articles for professional journals. He has presented numerous reports on counseling to national and state agencies and has served on a number of national and state committees. He also has served as a consultant and has made some 100 presentations, many using a workshop format, to school faculties, counseling groups and civic organizations. He is a past president of the Pennsylvania Personnel and Guidance Association.

A native of New York State, Dr. Hudson received his A.B. and M.A. degrees, both in English, from New York State College for Teachers at Albany. He received his Ed.D. in vocational guidance and personnel psychology from Columbia University's Teachers College.

Dr. Alessandro, professor of education in the Division of Educational Policy Studies, also joined the Penn State faculty in September, 1955. Immediately before joining the faculty, he was director of Penn State's Migrant Summer School — the first such experiment for migrants on the East Coast.

From 1955 to 1974, Dr. Alessandro served as coordinator of the College of Education's International Programs. During that time, he initiated the first

bi-lingual training program for high level Latin American educators for the American International Development Program, from which some 2,000 persons have graduated.

Reflecting his long-standing interest in comparative, international and development education, Dr. Alessandro served as the 1973-74 chairman of the University Committee on International Programs, as the 1974 chairman of Penn State's Hays-Fulbright Conference, and as director of the Commonwealth-Main Campus International Conference in 1974.

In addition, he has been a consultant to many national and international agencies, including the U. S. Department of State and the World Bank. He also has served as a consultant to numerous ministries of education, mostly in Central and South America.

Dr. Alessandro has published some 20 professional articles and has conducted research on international education both at Penn State and overseas.

He received his B.S. degree in social studies from Franklin and Marshall College. His master of education degree in history and his D.Ed. in secondary education both were awarded by Penn State.

Dr. Leland L. Beik, professor of marketing, received a 25-year chair during ceremonies recently at the College of Business Administration.

Dr. Beik came to Penn State in 1956 after teaching at the University of Arkansas, the University of Buffalo and part-time at Columbia University's Graduate School of Business.

He's a former head of the Marketing Division in the College of Business Administration and has taught many graduate and undergraduate courses in economics and business in addition to marketing.

Dr. Beik's professional interests include marketing research, marketing analysis and planning, and marketing information and communication. He is the author of many professional articles and a textbook, *Marketing Research and Analysis*, published by Ronald Press.

Promotions

Faculty

L. Barry Phelps to assistant professor of mining engineering.

Staff Exempt

Gerry L. Castellano to programmer in Management Services.

Barry G. Phelps to applications programmer/analyst in management services.

Staff Non-Exempt

Renee Fields to senior staff nurse at Hershey.

Sherri L. Letterman to junior microfilm operator in management services.

Sally A. Nell to senior nuclear medicine technician at Hershey.

Dorothy J. Smith to quality assurance assistant at Hershey.

Clerical

Susan M. Broadwater to clerk typist A in Science.

Mithoo Katrak to secretary A at Hershey.

Suzanne Sinclair to secretary A in Science.

Technical Services

Richard L. Auman to senior electronics technician, computer systems in Physical Plant.

Beth C. Baer to food service worker B at Mont Alto.

Kent A. Crossland to maintenance mechanic A at Fayette.

Violet Grose to patient nourishment assembler at Hershey.

Nellie J. Kline to janitorial worker in Physical Plant.

Robert J. Mills, Jr. to maintenance worker area landscape in Physical Plant.

Obituary

Eleanor White Blakely, writer-editor in the Institute for Research on Land and Water Resources, died Sept. 23 at the age of 62.

Mrs. Blakely was appointed a technical publications writer and editor in 1965 for projects in the Continuing Education

Department of Planning Studies. In April, 1970, she became assistant editorial specialist for the College of Agriculture Cooperative Extension Service and for the Institute for Research on Land and Water Resources.

She was named writer-editor in 1976. Among her other duties, she served as editor of the Institute for Research on Land and Water Resources Newsletter.

Thank-you note

To the Editor:

We wish to express our deepest appreciation for the kind and generous contributions given to our family. The money will be used to obtain a climate control system for our home. Our children, Amanda and Jon, will benefit immensely from this system, because with cystic fibrosis they are subject to extreme dehydration during periods of hot weather. Again, we would like to thank the staff and clerical people at University Park and the Commonwealth Campuses for their kind and generous contributions. Sincerely,

Dennis and Dani Whitbred

Carpoolers

Mariam Mackey seeks either riders or a carpool from the Flemington area. She works weekdays from 10 a.m. to 7 p.m. and can be reached at home at 748-5009.

Geraldine Waltz needs a ride from Aaronsburg to the University. She works from 6 a.m. to 2:30 p.m. at Ritenour Health Center. She can be reached after 4 p.m. at 349-8841.

Penn Staters

Retirement

George R. Bubash, instructor in veterinary science, retired Oct. 1, after 28 years of service with the University. He worked chiefly in diagnostic bacteriology.

Mr. Bubash earned national recognition for isolating and identifying three important organisms causing disease. He was the first person on the North American continent to isolate fungi causing ringworm in swine and other domestic animals. He was also the first person to isolate a fungus causing pneumonia in Bighorn sheep.

Both of these organisms are listed as Bubash strains and are maintained in the American Type Culture Collection as contributions from Penn State. The third organism he identified was a variety of bacteria related to animal diseases.

From 1948 to 1950, Mr. Bubash was research assistant to Dr. Jonas E. Salk in polio research at the University of Pittsburgh. During this time he isolated two polio strains. From 1950 to 1952, he was chief of the Virus and Rickettsiae Laboratory of the U.S. Army at Fort Baker, Calif. He was engaged in influenza research with the Influenza Commission of the U.S. Army from 1951 to 1952.

During his first year at Penn State in 1953, he was associated with the Department of Sanitary Engineering in stream pollution research. The following year he joined the faculty of the Department of Veterinary Science and served there until retirement.

At Penn State, Mr. Bubash was involved as diagnostic bacteriologist for both fowl and mammals. He worked cooperatively in a number of research programs, including studies on

George Bubash

respiratory, reproductive, and mastitis disease problems of domestic animals.

The author or coauthor of some 30 scientific publications, he has contributed sections or chapters to three nationally recognized textbooks. He is listed in the 14th and 15th editions of *Who's Who in the East* and holds five patents in his field of expertise. His professional affiliations include the American Society of Microbiology and Phi Sigma, national biological honorary fraternity.

He taught courses in veterinary bacteriology and he instructed veterinary science and dairy science graduate students in assorted bacteriological techniques. He extended veterinary bacteriology techniques by mail to veterinarians in private practice.

A native of Pittsburgh, Mr. Bubash earned a bachelor's degree from Penn State. He did graduate work in bacteriology while on the faculty. Both George and Amelia Bubash are graduates of Penn State, as are their four children — Nicholas, Mary, Stefany, and Alice.

25-year chair at Delaware County

John D. Vairo, director of the Delaware County Campus, was surprised when he was honored with his 25-year chair: he had just finished addressing an informal convocation of the faculty, on the patio of the Campus's new Library-Learning Center, when attention shifted to two "secret" visitors.

Unknown to Mr. Vairo, Dr. Robert J. Scannell, vice president and dean of the Commonwealth Educational System, and Dr. John L. Leathers, assistant to Dr. Scannell, were on hand to make the surprise presentation, "appearing" at the end of the informal convocation.

Mr. Vairo was appointed director of the Delaware County Campus in January 1967 when the Campus was opened. He has been a faculty member of the School of Journalism since September 1956, when he first became affiliated with Penn State. In addition to the directorship of the Campus, he also is an associate professor of journalism.

Mr. Vairo received a B.S. degree from the United States Merchant Marine Academy, a B.A. degree in history from Syracuse University, and an M.A. degree in journalism-history from Penn State.

He maintains research interests in, and has made contributions to, the scholastic press, labor press, public relations, and industrial journalism. He has participated in many Continuing Education conferences relating to professional journalism, public relations, labor press, and advertising.

He also served the University on a variety of committees and on commissions through the years he has been with Penn State.

John Vairo

Mr. Vairo holds membership in and is active in a number of educational societies and associations, both local and national.

Before affiliating with Penn State, he served as a newspaper reporter, photographer, and editor on newspapers in Pennsylvania and New York. He maintains an active interest in community planning and served on planning commissions at the township, county, and state levels.

Mr. Vairo is the recipient of a number of citations for work in professional journalism, community development, and for his work with educational associations.

From the Press

A Search for Equality: The National Urban League, 1910-1961. By Jesse T. Moore Jr. 252 pages. \$17.95.

A history of the Urban League that places it within the mainstream of Afro-American thought, this book shows the League as a major force for civil rights. Dr. Moore, who as a Sparks Fellow received his Ph.D. from Penn State, demonstrates that understanding the roots of the Afro-American search for equality is essential both to students of black history and to participants in the ongoing struggle for universal human rights.

Correcting previous interpretations, Dr. Moore contends that a number of individuals involved in forming the Urban League rose above the Washington-Du Bois controversy, attending to the needs and aspirations of blacks already acculturated to urban life as well as those who arrived in cities without the skills to prosper in a modern, industrial and increasingly complex society.

The record presented here shows that cooperation between the NUL and the NAACP has been the norm, despite occasional differences, and that the two organizations remain vibrant forces in the search for equality.

Dr. Moore teaches history at the University of Rochester, which awarded him the 1980 Curtiss Award for Excellence in Undergraduate Teaching.

Romantic Love: A Philosophical Inquiry. By Dwight Van de Vate Jr. 150 pages. \$15.75.

Romantic love is subject to the same philosophical analysis, this book shows, as any other human experience such as selfhood, good and evil, or justice—even though most philosophers have neglected it. An appropriate method of inquiry here, the author holds, "must be an ontological theory; it must evaluate the reality of love

in comparison to the other things we think are real."

Dr. Van de Vate's book is divided into three parts. Part I examines the layman's conception of romantic love as a "mysterious, unanalyzable feeling." It also examines the psychologist's conception of romantic love as "an unmythical natural phenomenon"—a drive. Part II turns to the sociologist's conception of romantic love as a social institution—"an interpersonal transaction with a social function." Part III concludes that romantic love is an objective social process which society makes possible "by granting the individual a private inner being which escapes typification by being literally unspeakable."

The Rediscoverers: Major Writers in the Portuguese Literature of National Regeneration. By Ronald W. Sousa. 192 pages. \$17.50.

This book is a study in the social history of literature. Portugal's power and prestige began to decline in the mid-1500s, reducing the nation's international standing and self-image to a low point from which it has never fully recovered. In the ensuing years, Dr. Sousa argues, mythicizing the Age of the Discoveries and establishing a link to it have been recurring patterns in Portuguese thought. These patterns are reflected in what is called "the literature of national regeneration."

Dr. Sousa shows how the self-image of writers since the Age of the Discoveries "commingles in their minds with the image they have of their nation." Chapters are devoted to several writers and their works, including Luis de Camoes, Antonio Vieira, Almeida Garrett, Eca de Queiroz and Fernando Pessoa.

The book's unique literary-historical synthesis makes it valuable to both Hispanic scholars and those seeking an introduction to Portuguese literature.

Staff Development

Eighteen University employees completed the Writing Skills for Secretaries/Clericals Program. They are:

Elizabeth Barto, clerk, drafting room B. Physical Plant; **Marlis Brooks**, clerk typist A, Housing and Food Services; **Joyce Combs**, secretary C, Libraries; **Kathy DeShong**, secretary bi-lingual, Liberal Arts; **Joan Emmanuel**, technical secretary C, Applied Research Laboratory; **Kathryn Getz**, clerk A, Libraries; **Linda Gruhn**, secretary B, Earth and Mineral Sciences; **Deborah Hamilton**, clerk A,

service desk, Physical Plant; **Margaret Holderman**, clerk typist A, Earth and Mineral Sciences;

Darlene Keller, clerk typist B, Housing and Food Services; **Katherine Marinakos**, secretary C, Intercollege Research Programs; **Oligi Mueller**, secretary C, Liberal Arts; **Diane Rusnak**, clerk, accounting A, Controller's Office; **Ruth Senior**, library assistant, Libraries; **Wanda Showers**, secretary C, Health, Physical Education and Recreation; **Deborah Snyder**, secretary B, Liberal Arts; **Carol Ann Wasson**, library assistant, Libraries; **Pamela Williams**, accounting clerk, Controller's Office.

Old Main Tower has new clock mechanism

If you hear a different sound emanating from Old Main Tower these days, there's a reason.

The University is experimenting with various bell and chime sounds for the Old Main clock. The chiming of the clock has been done electronically for many years. A special allocation of funds from the University's Office of Gifts and Endowments has been granted to replace the worn chiming mechanism.

A new mechanism was put into operation on Monday, Sept. 14, and is

now creating the sound of the chimes.

The Office of Physical Plant periodically will be changing the tone and other aspects of the chiming, and will be gathering reactions from the University community. A final decision will be made in the near future, regarding the actual character and tone that should be built into the new system.

"In the meantime, people should be aware that they will hear somewhat different tones than that to which they have been accustomed in the past," Ralph E. Zilly, vice president for business said.

Questions and comments can be directed to the Office of Public Information, 312 Old Main.

The Family on Trial: Special Relationships in Modern Political Thought. By Philip Abbott. 230 pages. \$16.75.

A defense of the modern family, in historical perspective, this book reconstructs political theory with the family in an important and honorable place. By reviewing critically both traditional and contemporary thought on the most special relationships—as well as current public policy issues relating to them—the author addresses concerns shared by professional and lay constituents. Noting Tocqueville's

observation of the American obsession with re-evaluating and remodeling the family, Dr. Abbott pleads for a balanced view.

A tradition exists, Dr. Abbott holds, that facilitates reconciliation between the modern family and the political order: pluralism. Pluralism is an attempt to balance individual autonomy and mutuality, decentralization and stratification, reform and tradition, reason and sentiment. Public policy in respect to schools, housing, health care, working conditions, and recreation should be designed to foster a pluralistic, family-centered society.

University class in the new skating rink

Penn State Hall of Fame

Photos: Scott Johnson

On Oct. 11

Dedication ceremonies planned for new Indoor Sports Complex

The University's new Indoor Sports Complex will be dedicated in formal ceremonies at 2 p.m. Sunday, Oct. 11, as part of Homecoming Weekend activities.

Approximately \$2.3 million has been contributed or pledged thus far for the project in the largest private fund-raising campaign in the history of the University.

Many of the donors to the complex will be on hand for the dedication. Speakers will include President Oswald; Quentin E. Wood, president of the Board of Trustees; Charles Lupton, executive director of the Office of Gifts and Endowments; Joseph V. Paterno, director of intercollegiate athletics; and Dr. Karl G. Stoedefalke, acting dean of the College of Health, Physical Education, and Recreation.

A reception for invited guests will be held at the indoor practice area following the dedication ceremony. Guided tours of the facilities will be given.

The Indoor Sports Complex project involved conversion of the old Ice Pavilion to an indoor practice area for the men's football, track and baseball teams, women's softball team, and men's and women's lacrosse teams.

The lower level of a new wing includes a year-round skating rink, a patch or figure skating area, locker rooms, showers, meeting rooms, and support facilities. In addition to club hockey, it is available for classes, public use and private rentals. There is seating for some 1,100 spectators at the rink. A warming room with a large fireplace is nearby.

The upper level of the new building, which is connected to the indoor practice area, houses rooms for specialized classes, offices, training and equipment facilities, meeting rooms, and lockers.

Coach Paterno and his football staff have offices in this area. One of the features of this floor near the entrance is a Penn State Hall of Fame, devoted to Penn State sports and outstanding athletes through the year.

Thirty-eight persons served on the project's fund-raising committee. Charles W. Shoemaker and Roland W. Oberholzer Jr. served as honorary chairman and campaign chairman, respectively. C.P. Neidig represented the Penn State Fund Council and was chairman of the advisory group.

Sever J. Toretti, former Lion athlete, later assistant football coach, chief recruiter and assistant athletic director, was coordinator of fund raising for the athletic department. Now retired, Toretti still works in behalf of the project as a volunteer.

Names of those who contributed \$1,000 or more to the complex will be displayed on gold, silver, and bronze plaques in the ice rink lobby.

The University continues to welcome financial gifts to the complex. Persons desiring information or wishing to contribute may contact Dave Colton, at the Indoor Sports Complex, phone 863-3041.

Houston president to give new lecture

Dr. Charles E. Bishop, president of the University of Houston, will speak on "Mobility of Capital and Labor in the 1980s" at 3 p.m. Tuesday, Oct. 20, in Room 301 Agricultural Administration Bldg.

Dr. Bishop's presentation is the first in a new annual lecture developed within the Department of Agricultural Economics and Rural Sociology. Known as the M.E. John Lecture Series, the talks will honor Dr. John, retired head of the department.

Before assuming the Houston presidency, Dr. Bishop, an internationally known economist, was president of the

University of Arkansas for six years. Earlier he was vice president for research and public service at the University of North Carolina and chancellor of the College Park Campus of the University of Maryland.

Engaged in classroom teaching and research for two decades, he also served as chairman of the Department of Economics at North Carolina State University and as a visiting professor in the Graduate School of Business Administration at the University of Virginia.

Dr. Bishop has served four of the last five U.S. presidents on high-level task forces or commissions. These activities studied such national issues as vocational education, rural development and balanced national growth.

Artists Series presents Suzuki Strings

The Artists Series' Fine Arts Series will present a performance by the Suzuki Strings at 7:30 p.m. Thursday, Oct. 15, in Schwab Auditorium.

The performance is part of the eleventh transcontinental American tour by young Suzuki students from Japan. They have delighted their audiences everywhere with their fine musicianship, the accuracy of their playing, and the beauty of their intonation.

The remarkable success achieved by Shinichi Suzuki in teaching young children to be fine violinists, through the method he calls "Talent Education," is now known around the world. Since 1958, when word of his success first reached the United States, enthusiastic interest among American string teachers has spread throughout the country, and today thousands of American youngsters too are learning to play the violin, and to love music.

Although the young performers range in age from 8 through 13, they will not be performing "children's music." They will present as complex a program as would be encountered at any adult program, including works by Mozart, Vivaldi, Saint-Saens, Chopin, and Bach.

In addition to the evening performance, a concert for young audiences will be presented in Eisenhower Auditorium at 11 a.m. Thursday. Tickets for both performances will be on sale at the Eisenhower Auditorium box office from 9:00 a.m. to 4:00 p.m., weekdays, beginning Tuesday, Oct. 13.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (interwork line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 15, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative

Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

SENIOR MEDICAL ILLUSTRATOR, COLLEGE OF MEDICINE, HERSHEY Responsible to the director, Educational Resources, for supervising the Graphic Division staff and creating surgical, anatomical, and scientific illustrations, producing conceptual and schematic art to include idea drawings, diagrams, charts and graphs. Cooperate in the production of teaching and research media involving graphics content, such as slides/tapes, television and related software. Bachelors degree in medical or biological arts or equivalency; masters degree preferred plus two-three years of effective experience.

Funding Sources

For further information, call 865-1375

(369-1) U. S. — Finland and U. S. — Sweden Cooperative Science programs have been established within the NSF Division of International Programs. Programs include research projects, joint workshops/seminars, and long-term research visits. For further information contact Mr. Henryk Uzarski (202-357-7554). (Ref. NSF Bulletin, September 1981) (369-2) Proposals for special research initiation awards in information science are due at NSF by Feb. 3, 1982. Program goals include increasing the understanding of properties and structures of information and information transfer and contributing to the store of scientific and technical knowledge which can be applied to the design of information systems. The announcement (NSF 81-34) has been ordered — or contact (202-357-9569). (Ref. NSF Bulletin, September 1981)

Penn State Intercom

Dr. Almquist receives prestigious award for livestock research

Dr. John O. Almquist, professor of dairy physiology, is one of three scientists who will receive a 1981 Wolf Foundation Award for agriculture. The award carries with it a gift of \$100,000.

Dr. Almquist, who is being honored for his work in artificial insemination for livestock improvement, will share the award with Dr. Henry A. Lardy of the University of Wisconsin and Dr. Glen W. Salisbury of the University of Illinois.

"I congratulate Dr. Almquist and his distinguished colleagues," President Oswald said. "This is a very prestigious award, and it brings great honor to Dr. Almquist and to Penn State."

"Dr. Almquist's pioneering research in artificial insemination has made direct contributions to alleviating world hunger. His techniques have greatly enhanced the world's supply of milk and meat."

The four-year-old Wolf Foundation awards prizes to researchers in agriculture and four other fields for "outstanding contributions on behalf of mankind." Winners—in agriculture, mathematics, chemistry, physics and medicine—are selected by five committees, each consisting of members from various countries. This year's committees included six Nobel laureates.

"More than \$31 million is being saved annually in the United States through use of Dr. Almquist's technique of adding antibiotics to bull semen, a practice now adopted worldwide," said Dr. Samuel H. Smith, dean of the College of Agriculture. "Total savings around the world is estimated to be \$580 million."

"Dr. Almquist is widely recognized for his work in artificial insemination and reproductive physiology of farm livestock. With his techniques, it is possible to inseminate 100,000 cows per year from top bulls, something that could not have been done a few years ago."

The award will be presented at a ceremony at the Knesset, the Parliament of Israel, in March. The president of Israel, ministers and other national authorities will be present. While in Israel, Dr. Almquist will deliver several lectures on his research.

Dr. Almquist has been conducting research at Penn State since 1944, when he was appointed to the faculty. By 1950, his modest, one-room research laboratory had developed into a greatly expanded Dairy Breeding Research Center.

His early research demonstrated the value of adding penicillin and streptomycin to diluted bull semen to control bacterial growth and increase fertility. As a result of that work, antibiotics are almost universally used by the artificial breeding industry.

Dr. Almquist realized early in his career that artificial insemination held tremendous potential for the dairy industry. He advocated, more than 20 years ago, the widespread application of frozen semen, ovulation control and improved feeding and management.

Today, three-fourths of the dairy cows in Pennsylvania are bred artificially, partly due to techniques developed by Dr. Almquist and his colleagues. The practice has permitted rapid increases in milk and meat production through the use of superior bulls, and has been of special value to small farmers, who cannot afford to buy such bulls. Many of the techniques developed by Dr. Almquist for cattle have been applied to other species, including humans.

Dr. Almquist said the Wolf Foundation Award is particularly gratifying because one of the other scientists who will share it—Dr. Salisbury—is his former teacher.

"It was Dr. Salisbury (then at Cornell) who first interested me in animal science research," he said. "As an undergraduate

Dr. Almquist in the Dairy Breeding Research Center

Photo: Scott Johnson

at Cornell, I was deciding whether to pursue a career in medicine, law or agriculture. After working in Dr. Salisbury's laboratory as an undergraduate, I knew I wanted a career in research."

Dr. Almquist went on from Cornell to earn a master's degree at Purdue and a doctorate at Penn State. He has been the recipient of several major awards and is author or co-author of more than 160 scientific publications.

Presentation of the Wolf Awards has

been selected to coincide with the first anniversary of the death of the founders, Dr. and Mrs. Ricardo Subirana Lobo Wolf, who passed away in February and March of this year, respectively. The exact date for the ceremony has not yet been set.

The Wolf Foundation was established by Dr. and Mrs. Wolf. In addition to the prizes for scientists, the Foundation sometimes awards major prizes to artists, regardless of nationality, for achievement in the interest of mankind.

Faculty Senate will recommend lifting 'dean's veto' from PS-23

After rejecting a substitute motion proposed by the PS-23 Commission, the University Faculty Senate voted Oct. 6 to recommend to President Oswald that PS-23 be modified to negate the so-called "dean's veto."

In a close vote which followed months of debate, the Senate agreed to a two-part recommendation proposed by its Faculty Affairs Committee to change the dean's veto section of PS-23, the University's policy document on promotion and tenure.

The first part of the committee's recommendation focuses on promotion and tenure review at the college level, while the second focuses on the issue at the Commonwealth Campuses. The recommendation, with changes or additions to the present policy indicated in italics, is as follows:

"... in all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's have been positive, that dean shall meet with the college (or University Libraries) committee and state his or her reasons for the negative decision. If, after consultation with the dean, the college or University Libraries committee feels that further review is warranted, the committee shall forward such cases to the Office of the Provost for transmittal to the University Promotion and Tenure Committee..."

"In reviewing Commonwealth Campus faculty... If the decision is made at the college or University Library level of review not to award tenure, the Dean of the Commonwealth Educational System shall notify the faculty member in writing (see

section IV.4); negative promotion decisions do not require such formal notification. In all cases where the deans make a negative tenure or promotion decision and where all recommendations prior to the dean's have been positive, one of the deans shall meet with the college (or University Libraries) committee and state the reasons for the dean's decision. If, after consultation with the dean, the college or University Libraries committee believes that further review is warranted, the committee shall forward such cases to the University Promotion and Tenure Committee."

The PS-23 Commission's recommendation, defeated as the substitute motion for the Senate committee's recommendation is as follows:

"In all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's level have been positive, that dean is required to meet with the college committee and state his or her reasons. The intent is to require full and candid discussion when such divergent recommendations occur."

In other action related to PS-23, the Senate tabled until its next meeting discussion of a proposed modification to administrative guidelines for evaluating teaching effectiveness as related to promotion and tenure.

Any proposal for revision to PS-23 that is passed by the Senate becomes a recommendation from that body to the President and must be acted upon by him before it becomes policy.

(Continued on page 4)

Search group named for HPER Dean

Provost Eddy has appointed a re-opened Search Committee to identify candidates for the position of Dean of the College of Health, Physical Education and Recreation.

Chairman of the re-opened search is Dr. Elsworth R. Buskirk, professor of applied

physiology and director of the Laboratory for Human Performance Research.

Members of the committee are: Monty L. Christiansen, associate professor of recreation and parks; Dr. Robert E. Dunham, vice president for undergraduate studies; Dr. James M. Eddy, assistant professor of health education; Vilma R. Hunt, associate professor of environmental health planning and administration; Dr. Herschel W. Leibowitz, Evan Pugh professor of psychology.

Dr. Wesley A. Olsen, associate professor of physical education, Ogontz Campus; Dr. Rosemary Schraer, associate provost; James I. Tarman, associate director of athletics; Dr. James G. Thompson, associate professor of physical education, and Barbara A. White, student.

Candidates should be available by the summer of 1982. Nominations and letters of application (with resume) should be sent to Dr. Elsworth R. Buskirk, chairman, HPER Dean Search Committee, The Pennsylvania State University, 205 Old Main, University Park, PA 16802.

Dr. Karl G. Stoenkel, associate dean for academic affairs in the College, is continuing to serve in 1981-82 as acting dean, following the appointment last year of Dean Robert J. Scannell as vice-president and dean of the Commonwealth Educational System.

Nobel Laureate to give seminar

Dr. Paul Berg, 1980 Nobel Laureate in Chemistry, will present a seminar at 4 p.m. today in 119 Osmond Lab. The seminar, entitled "Introducing Genes into Mammalian Cells," is sponsored by the Department of Chemistry and the Department of Microbiology, Cell Biology, Biochemistry and Biophysics.

Dr. Berg, a 1948 Distinguished Alumnus of Penn State, is a Willson Professor of Biochemistry at Stanford University and a non-resident fellow of the Salk Institute for Biological Studies. He also has served as chairman of the Department of Biochemistry at Stanford's School of Medicine.

Dr. Berg received the Nobel Prize in Chemistry for his studies on the biochemistry of nucleic acids.

Penn Staters

Dr. Charles O. Crawford, professor of rural sociology; **Dr. Edward V. Ellis**, associate dean for Continuing Education and Commonwealth Campuses in the College of Human Development, and **Nancy C. Covert**, Jefferson County Extension agent, have been appointed to the Pennsylvania Health Education Development Task Force by Dr. H. Arnold Muller, secretary of the Department of Health.

The Task Force, comprised of 12 persons from public and private organizations across the state, was created by Dr. Muller to examine the current state of health education in Pennsylvania and make recommendations for future organization and direction of such work.

Dr. Paul H. Cutler, professor of physics, has been named co-director of a NATO Advanced Study Institute on Quantum Metrology and Fundamental Physics Constants scheduled for the Ettore Majorana Center for Scientific Culture in Erice, Sicily, Nov. 16-18. His co-directors are Dr. A. Lucas of the University of Namur, Belgium, who served as an adjunct professor of physics at Penn State from 1975 to 1978.

According to NATO, the Institute is needed now because of the many advances that have taken place in the last 10 years in the science of measurement, particularly, the substantial improvement in the accuracy of the measurement of atomic constants and the velocity of light using laser technology and the more accurate determination of electrical standards using superconducting devices.

Drs. Cutler and Lucas were asked to convene and direct the Institute because of their research on the point contact diode. These devices have been and are being used in the extremely precise infrared and optical laser frequency measurements.

Maurice K. Goddard, professor emeritus of forest resources, has been awarded the Gifford Pinchot Medal by the Society of American Foresters "for outstanding contribution to the administration and professional development of North American forestry."

Dr. Goddard served as secretary of Forests and Waters and secretary of Environmental Resources of the Commonwealth from 1955 to 1978. Prior to this he was on the faculty of the School of Forest Resources, serving as its director from 1952 to 1955.

Dr. Inyong Ham, professor of industrial engineering, visited The People's Republic of China for three weeks to

present a series of lectures. He was invited by Xian Jiaotong University to conduct a two-week seminar on Group Technology.

Dr. Ham, who was named a "consulting professor" by Xian Jiaotong University, also presented two lectures at a special meeting sponsored by Shanghai Chapter of the China Society of Mechanical Engineers in Xian. He also attended a meeting sponsored by China Aviation Research Institute for Standardization in Beijing.

Dr. S. I. Hayek, professor of engineering mechanics, has been elected a Fellow of the Acoustical Society of America. At the Society's 101 meeting in Ottawa, Canada, Dr. Hayek chaired a session and presented two papers: "A New Model for a Noise Barrier on a Rigid Plane" (with M. Noble) and "Nearfield Acoustical Radiation from Spherical Shells" (with E. Wong). He also presented a paper entitled "Prediction of Echo Formation in Underwater Applications" at the International Symposium on Underwater Acoustics, held at Tel-Aviv University, Israel.

Dr. H. K. Henisch, professor of physics, was an invited speaker and session chairman at the 5th International Congress on Thin Films, held at Herzlia, Israel, September 20-25. He presented a paper on "Macroscopic Transport Processes in Thin Films," and served as a member of the International Advisory Committee. The congress proceedings will be published as a special issue of *Thin Solid Films*.

Dr. Glyn P. Norton, associate professor of French, presented an invited paper entitled, "La notion de *phrasis* dans la traduction française de la Renaissance," at the Third International Colloquium of the Association d'Etudes sur l'Humanisme, la Reforme et la Renaissance in Montpellier, France.

Dr. Robert W. Ott, associate professor of art, has been elected to a chairmanship of the International Council of Museums headquartered in Paris. Dr. Ott's election took place in Svendborg, Denmark, by a vote of the Committee for Educational and Cultural Action of ICOM.

As an elected chairman, Dr. Ott will head the Training Commission and will be advised by a six-member board composed of elected museum representatives from Germany, Sweden, Holland, England, Canada and France. The obligation of the board is to develop and publish policies

for the training of adults as educators, communicators and interpreters in museums.

Dr. Allen T. Phillips, professor of biochemistry, presented a paper, entitled "Function of NAD at the Active Site of Urocanase," at the Fourth International Conference on Methods in Protein Science Analysis held at the Brookhaven National Laboratory, Upton, N.Y.

Dr. William M. Smith, professor emeritus of rural sociology, is editor with Dr.

Raymond T. Coward, of the University of Vermont, of *The Family in Rural Society*, published by Westview Press, of Boulder, Colo.

The book provides a picture of present-day rural society, emphasizing the changing role and structure of the family. It analyzes demographic trends in rural areas, examines the effects of immigration on rural communities, looks at the diverse family patterns adopted in today's rural areas, explores how the role of women has changed in rural society, and describes the plight of the aged in the rural social system.

Faculty members named for search

Dr. Richard G. Cunningham, vice president for research and graduate studies, has named six faculty members to a Search Committee for the position of director of the Pennsylvania Transportation Institute.

Dr. David A. Anderson, associate professor of civil engineering, is committee chairman. Members are Dr. Philip D. Cady, professor of civil engineering; Dr. John J. Coyle, professor of business administration and head of the Department of Business Logistics; Dr. William H. Park, professor of mechanical engineering; Dr. Robert D. Pashek, acting director of the Transportation Institute; and Dr. James C. Wambold, professor of mechanical engineering.

Dr. Thomas Larson served as Institute director from 1968 until January, 1979, when he was granted leave of absence to serve as secretary of the Pennsylvania Department of Transportation.

The Transportation Institute is an interdisciplinary research center devoted

to studying transportation problems. Its three principal objectives are to conduct multidisciplinary transportation research and to disseminate research results; to provide significant educational and research opportunities for Penn State students, and to promote continuing educational opportunities for transportation professionals.

The Institute director is the chief academic administrator of the unit which is part of the Intercollege Research Programs and Facilities. The director also will hold a tenure-eligible faculty appointment with associated duties and responsibilities in an appropriate department of the University. An applicant must possess a doctorate; have the ability to conduct research; provide academic leadership; and administer interdisciplinary research programs. Applicants should have experience in teaching and have facility in interpersonal relationships.

Faculty/Staff Alerts

Review of health care coverage advisable

Regular University faculty and staff members are urged to review periodically the deductions being taken for their health care coverage (hospital/surgical/medical, dental and vision) to be certain that they are paying for the correct coverage.

A change in family status may affect your cost and your coverage. For example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage, if you haven't taken steps to indicate the change in coverage desired.

Consideration should be given to changing coverage if any of the following circumstances arise:

1. You get married.
2. You get divorced (or separated and no longer wish to provide spouse dependent coverage).
3. You become the parent of a first child (note: a baby is covered automatically for 31 days following birth; however, to provide for coverage beyond that time for a child, a coverage form must be completed).
4. Your only dependent child reaches age 19 (or 23 in the case of a full-time student).
5. Your only dependent child gets married.
6. Your spouse begins or ceases working for the University as a regular employee.

Faculty adviser sought

Phi Kappa Theta, social fraternity, is seeking a faculty adviser. Anyone interested may contact George Severine, alumni and public relations officer, at the fraternity house, 338 E. Fairmont Ave., phone 238-9957.

7. Your only dependent child begins or ceases working for the University as a regular employee.

8. Your spouse enters military service.
9. Your only dependent child enters military service.
10. Your spouse dies.
11. Your only dependent child dies.

If you feel a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Bldg., 865-1473.

Faculty or staff members located away from University Park may receive assistance by contacting the appropriate Business Manager or Regional Personnel Officer.

The University has no way of knowing whether a change should be made, so it is the responsibility of the individual faculty or staff member to keep his or her records up to date. No refunds for overpayment will be made, unless it can be shown that the University was in error.

Early registration set

Early registration for Winter Term 1982 has been scheduled for mid-November by the Office of the University Registrar.

Degree students who have preregistered and who wish to accept their assigned schedules may register early from Nov. 16 through Nov. 20 in Room 112 Shields Bldg. The early registration times are from 8:30 a.m. to 4:30 p.m.

Isotopes use surveyed

A survey is being conducted by the National Research Council to determine current and future interest in the use of separated stable isotopes. The extent to which this survey receives a positive response may be expected to influence the availability of these isotopes in this country in the near future.

Anyone at the University who has an interest in the use of stable isotopes is invited to contribute to a response to the survey and may do so by contacting Dr. William W. Pratt, professor of physics, 104 Davey Lab, 863-0794.

Promotions

Staff Exempt

Karen E. Augustowski to admissions counselor II in Undergraduate Admissions.

Joseph A. Cessna III to specialist, shipping and receiving at Penn State Bookstore.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and biweekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Joanne M. Farwell to assistant director, development services in Gifts and Endowments.

Rita R. Hammond to admissions counselor II in Undergraduate Admissions.

Jane A. McLaren to personnel specialist in Housing and Food Services.

Theresa A. Novak to associate director of Undergraduate Admissions in Undergraduate Admissions.

Clerical

Joy L. Barger to secretary B in Human Development.

Elizabeth Barto to secretary C in Arts and Architecture.

Mary Lois Hamill to secretary B at Hershey.

Pamela M. Lohr to data preparation operator B in Management Services.

Technical Service

Carl R. Butler to maintenance worker area landscape in Physical Plant

University Park Calendar

October 15-25

Special Events

Thursday, Oct. 15

Fixed date for meetings involving Commonwealth Campus faculty.
College of Human Development, Action '81 Program, Faculty Day.
Artists Series: Shunichi Suzuki's Talent Education Tour for Young Audiences, 11 a.m., Eisenhower Auditorium.
Artists Series, Suzuki Strings, 7:30 p.m., Schwab Auditorium.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.

Friday, Oct. 16

Fixed date for meetings involving Commonwealth Campus faculty.
College of Human Development, Action '81 Program, Alumni Review Day.
Craft Demonstration, 11:30 a.m., Kern Lobby.
Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.
Cinematheque Film, *Mainstreets*, 7 and 9 p.m., Room 10 Sparks Bldg.

Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.

Astronomy Open House, 8:30-11 p.m., 6th floor, Davey Lab. If overcast, will be held Saturday, Oct. 17. Open to the public.
Sports: ice hockey vs. Pittsburgh Jr. Penguins, 9:15 p.m.

Saturday, Oct. 17

Fixed date for meetings involving Commonwealth Campus faculty.
College of Human Development Alumni Society Board of Directors meeting, 9 a.m., 3 p.m., Mt. Nittany Room, Nittany Lion Inn.
Cinematheque Film, *Mainstreets*, 7 and 9 p.m., Room 10 Sparks Bldg.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.

Sports: men's cross country vs. Arkansas and Providence, 11 a.m.; field hockey vs. Ohio State, 1 p.m.; ice hockey vs. Pittsburgh Jr. Penguins, 3:30 p.m.

Sunday, Oct. 18

HUB Craft Center second session classes begin.
Shaver's Creek Environmental Center, Pioneer Crafts Festival, noon-5 p.m., Environmental Center.
Un-Common Theatre, 2 one-act plays, *Love Star and Laundry and Bourbon*, 8 p.m., Room 112 Kern.
Sports: field hockey vs. James Madison, 1 p.m.; men's lacrosse, Penn State Invitational.

Monday, Oct. 19

France Cinema, Robert, *The Tall Blond Man with One Black Shoe*, 7 and 9 p.m., Room 112 Kern.
Tuesday, Oct. 20
Chinese Student Association film, 7 p.m., Room 112 Kern.
Sports: soccer vs. Pittsburgh, 7:15 p.m.

Wednesday, Oct. 21

Commons Concert, "Duets," noon, Kern Lobby.
Graduate Council Meeting, 2:30 p.m., Room 101 Kern.
Musica da Camera, 8 p.m., Music Bldg. Recital Hall.

Thursday, Oct. 22

Commons Film Series, *Jeremiah Johnson*, 7 and 9 p.m., Room 112 Kern.
Robeson Cultural Center, Music of Scott Joplin, 8 p.m., Schwab Auditorium. Free admission.
Sports: field hockey vs. Cortland State, 3:30 p.m.

Friday, Oct. 23

Craft Demonstration, 11:30 a.m., Kern Lobby.
Commonplace Theatre, *Brubaker*, 7 and 9 p.m., Room 112 Kern.
Cinematheque Film, *The Enforcer*, 7 and 9 p.m., Room 10 Sparks Bldg.
Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.
ACA Colloquium, 8 p.m., Room 102 Kern.
Sports: JV football vs. Fork Union Military Academy, 2 p.m.; ice hockey vs. Philadelphia Jr. Flyers, 9:15 p.m.

Saturday, Oct. 24

France Cinema, *Reinns, Mon Oncle d'Amerique*, 7 and 9 p.m., Room 112 Kern.
Cinematheque Film, *The Enforcer*, 7 and 9 p.m., Room 10 Sparks Bldg.
Artists Series, Chamber Music Society of Lincoln Center, 8:30 p.m., Eisenhower Auditorium.

Sports: football vs. West Virginia, 1:30 p.m.; ice hockey vs. Philadelphia Jr. Flyers, 8 p.m.

Sunday, Oct. 25

Shaver's Creek Environmental Center, informal insect hunt with Dr. Charles Rutschky, Dept. of Entomology, 2-4 p.m.
Commonplace Theatre, *Brubaker*, 7 and 9 p.m., Room 112 Kern.
Sports: field hockey vs. Virginia, noon

Seminars

Thursday, Oct. 15

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Della Roy, professor of material science, on "Recent Advances in Ceramic Science."

Physics Colloquium, 2:20 p.m., Room 445 Davey Lab. M. Tinkham, Harvard University, on "Beyond Equilibrium Superconductivity."

Anthropology Colloquium, 3:30 p.m., Room 107 Carpenter Bldg. Eric Fredlund, on "Classifying Marriages: The Shitani Yonomamo."

Chemistry/MCB3 Seminar, 4 p.m., Room 119 Osmond Lab. Dr. Paul Berg, 1980 Nobel Laureate in Chemistry, on "Introducing Genes into Mammalian Cell."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. J. J. Peters on "From Phenanthrene to Coke and Graphite."

Philosophy Colloquium, 4 p.m., Room 220 Willard Bldg. Donald P. Verene, Dept. of Philosophy, on "Philosophical Memory and Philosophical Truth."

Special Acoustics Seminar, 4 p.m., Room 73 Willard Bldg. Dr. Robert J. Hooker, senior lecturer in mechanical engineering, University of Brisbane, Australia, on "Noise of Load-Haul-Dump Vehicles."

Computation Center Seminar, 7:30 p.m., Room 101 Walker Bldg. Introduction to the use of the Tektronix 4662, Houston-Instrument CTS 15k, and 8222A electrostatic Versatec plotters.

Annual Fall English Conference, guest speaker, 9 a.m., Room 101 Kern. Dr. Donald Murray, professor of English, University of New Hampshire, on "Writing Before the First Draft."

Public Lecture, 8 p.m., HUB Gallery Lounge. Mr. Bruce Fitzwater on "The Logical Certainty of Christian Healing."

Dept. of German, film, *Der Schindler*, directed by Rolf Hadrich, 8 p.m., Room 167 Willard Bldg.

Friday, Oct. 16

Annual Fall English Conference, guest speaker, 9 a.m., Room 101 Kern. Dr. Donald Murray, professor of English, University of New Hampshire, on "Reading Unwritten Writing."

Anthology Chemistry Seminar, 4 p.m., Room 333 Whitmore Lab. Gene Karwacki on "Organic Molecular SIMS."

Public Lecture, 2:30-5:30 p.m., Room 107 Moore Bldg. Dr. Geoffrey P. Ivey, senior lecturer in child development, University of London Institute of Education, on "Why Deaf Children Often Fail to Develop Language."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319, Walker Bldg. Edward D. Eddy, provost, on "Inside the Black Box: Penn State Management."

Monday, Oct. 19

Entomology Seminar, 4 p.m., Room 204 Patterson Bldg. Howard Fescmeyer, Dept. of Entomology, on "The Reproduction and Bionomics of Dyctidid Beetle Defensive Agents" (M.S. Thesis) Mark Hutton, Dept. of Entomology on "Comparison of a Microbial and Chemical Spray for the Control of *Triphleba* in *Habner Lepidoptera* (Noctuidae) on *Three Cultures of Lepidoptera*." (M.S. Thesis)

Tuesday, Oct. 20

Joint Solid State Physics/Physical Chemistry Seminar, 11 a.m., Room 339 Davey Lab. B.A. Scott, IBM T.J. Watson Research Center, Yorktown Heights, on "Amorphous Hydrogenated Silicon Prepared by a New (Homogeneous) CVD Method."

Ecology Seminar, 11:10 a.m., Room 2 South Frear. Dr. Richard Yahner, assistant professor of Wildlife, on "Why does a Deer (Muntjak) Bark Like a Dog?"

Office of Religious Affairs, "Faith on Faith," 12:30-2 p.m., Main Lounge, HUB. Dr. Rustum Rugh, Evan Gough professor of the solid state and geochemistry, on "Strengthening Your Faith Through Insights from Science."

Bring a bag lunch.
Business Economics Research Seminar, 3:30 p.m., Room 201 Business Administration Bldg. Dr. Keith Ord, professor of management science, on "Models of Spatial Pro-

cesses." Sponsored by the PA Economic Analysis Program, College of Business Administration.

Geosciences Colloquium, 3:45 p.m., Room 112 Walker Bldg. Dr. Anthony N. Manano, consulting geologist, Carlisle, Massachusetts, on "Current Trends in the Economic Geology of Carbonates."

Genetics Seminar, 4 p.m., Room 111 Animal Industries Bldg. Dr. T. Du, assistant professor of biochemistry, on "Introduction to Recombinant DNA Technology."

Engineering Science and Mechanics Seminar, 4 p.m., Room 214 Hammond Bldg. Dr. A. Rothwarf, Drexel University, on "Polycrystalline Thin Films for Terrestrial Solar Cells."

College of Earth and Mineral Sciences Student Council Undergraduate Seminar, 7:30 p.m., Room 102 Chambers Bldg. Dr. Gregory Forbes, assistant professor of meteorology, on "Tornadoes and Severe Storms."

Dept. of German lecture, 8 p.m., Room 124 Sparks Bldg. Axel Schulze, poet, prose and film writer from East Germany, on "Lyrik der DDR," along with a reading of his works followed by a discussion.

Inorganic/Organic Seminar, 8 p.m., Room 333 Whitmore Lab. Professor Jephrey Peterson, West Virginia University, on "Stereochemistry and Chemical Reactivity of Early Transition Metal Metallocenes."

Wednesday, Oct. 21
Organizational Behavior Seminar, 9 a.m., Room 201 Business Administration Bldg. Paul R. Lawrence, Wallace Brett Donham professor of organizational behavior, Harvard University, on "Organizational Adaptation."

Thursday, Oct. 22
Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. M. Brin, General Electric, Schenectady, N.Y., on "High Temperature Hard Materials."

Anthropology Colloquium, 3:30 p.m., Room 107 Carpenter Bldg. Karen Gottlieb, assistant professor of anthropology, on "Twin Studies as a Tool in Physical Anthropology."

Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. J. O'Connell, National Bureau of Standards, on "Unsolved Puzzles in Electromagnetic Interactions."

Engineering Science and Mechanics Seminar, 4 p.m., Room 214 Hammond Bldg. Dr. J. Mort, Xerox Research Center, Webster, N.Y., on "Transport and Photogenetation Studies in Amorphous Silicon."

The Artists Series' FABULOUS FALL SALE of tickets will be held Tuesday, Oct. 22, at the Eisenhower Auditorium box office. During this special advance sale individuals will be able to purchase tickets for performances by the Chamber Music Society of Lincoln Center, Oct. 24.

Pilobolus Dance Theatre, Nov. 7, *They're Playing Our Song*, Nov. 12, and *A Christmas Carol*, Dec. 6.

The Chamber Music Society of Lincoln Center, performing at 8 p.m. Saturday, Oct. 24, in Eisenhower Auditorium, is the second event in the Music Series. The official performing organization at New York's Alice Tully Hall since 1972, the Society also has been presenting concerts at Washington's Kennedy Center. Its nationwide tours have been received enthusiastically by audiences and critics alike.

Its program at Penn State will include works by Danzi, Schumann, Britten, and Brahms. Performing will be Leonard Arner, oboe; Loren Glickman, bassoon; James Buswell, violin; Walter Trampler, viola; Leslie Parnia, cello; and Andre-Michel Schub, piano, winner of the Sixth Van Cliburn International Piano Competition last spring.

Also included in the FABULOUS FALL SALE will be tickets to the Pilobolus Dance Theatre performance on Nov. 7. Their performance on Nov. 6 has already been sold out by subscription. *They're Playing Our Song*, Neil Simon's smash Broadway musical, tells the hilarious story of a composer and lyricist who collaborate on more than music. *A Christmas Carol* will

A daily calendar of events is available around the clock at 863-1000. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Tony Perrotta, Gulf Research and Development Co., on "Growth of Mesophase in Various Carbonaceous Materials."

Math Colloquium, 4 p.m., Room 104 McAllister Bldg. Professor John Horvath, University of Maryland, on "Integrable Distributions and Convolutions of Distributions."

Philosophy Colloquium, 4 p.m., Room 220 Willard Bldg. Roberts Keelson, Dept. of Philosophy, 8erks Campus, on "Methodological Solipsism: Charles S. Peirce's Phenomenology."

Special Acoustics Seminar, 4 p.m., Room 73 Willard Bldg. Dr. Robert J. Hooker, senior lecturer in mechanical engineering, University of Brisbane, Queensland, Australia, on "Aeolian Vibration of Overhead Transmission Lines."

Friday, Oct. 23
Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Karin Foley on "Surface Characterization with SIMS: CO Adsorption on Ni Surfaces."

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon to 11 p.m.

Jack Troy, ceramics: Shirley Steitz, drawings and watercolor; Bill David, drawings and water color, open Oct. 18.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays. Tours, Saturdays, 1:30 p.m. Oriental Works from the Museum's Collection. Danish Ceramic Design, opens Oct. 18.

Pattee Library: Bertolt Brecht: Photographs from the East German Government, East Corridor Gallery. Mary Pat Ford, studio photographs, Lending Services Facility. Sandy Sandmeyer, recent work in bath, through Oct. 23. Seventh-one Percent of the World as Interpreted through Maps, Poetry, and Art, opens Oct. 23. Second Floor East Highlights from the Akron-Schlesky Collection. Trade Union Memorabilia: An AFL-CIO Centennial Exhibition from the Collection of Edward Rosney. Rare Books Room.

Visual Arts Bldg. Zeller Gallery
Gallery Hours: 9 a.m.-5 p.m., Monday through Friday. Saturdays and Sundays, noon-5 p.m.

Leonard Lehrer, print exhibition, opens Oct. 16.

Artists Series fall tickets sale to open

The Artists Series' FABULOUS FALL SALE of tickets will be held Tuesday, Oct. 22, at the Eisenhower Auditorium box office. During this special advance sale individuals will be able to purchase tickets for performances by the Chamber Music Society of Lincoln Center, Oct. 24.

Pilobolus Dance Theatre, Nov. 7, *They're Playing Our Song*, Nov. 12, and *A Christmas Carol*, Dec. 6.

The Chamber Music Society of Lincoln Center, performing at 8 p.m. Saturday, Oct. 24, in Eisenhower Auditorium, is the second event in the Music Series. The official performing organization at New York's Alice Tully Hall since 1972, the Society also has been presenting concerts at Washington's Kennedy Center. Its nationwide tours have been received enthusiastically by audiences and critics alike.

Its program at Penn State will include works by Danzi, Schumann, Britten, and Brahms. Performing will be Leonard Arner, oboe; Loren Glickman, bassoon; James Buswell, violin; Walter Trampler, viola; Leslie Parnia, cello; and Andre-Michel Schub, piano, winner of the Sixth Van Cliburn International Piano Competition last spring.

Also included in the FABULOUS FALL SALE will be tickets to the Pilobolus Dance Theatre performance on Nov. 7. Their performance on Nov. 6 has already been sold out by subscription. *They're Playing Our Song*, Neil Simon's smash Broadway musical, tells the hilarious story of a composer and lyricist who collaborate on more than music. *A Christmas Carol* will

feature more than 100 life-size mannettes in a musical adaptation of Charles Dickens' immortal classic. There will be a matinee at 3:00 on Dec. 6 as well as an 8:30 evening performance of this delightful family show.

Penn State Symphony to present first concert

The Penn State Symphony Orchestra will present its first concert of the 1981-82 season at 8:30 p.m. Friday, Oct. 16, in Eisenhower Auditorium. The concert marks the debut of Smith Toulson, associate professor of music, as conductor of the symphony.

A composition by Franz Liszt, "Les Preludes," will open the symphony's program. One of the most popular of Liszt's orchestral works, the piece was originally intended to be part of a large choral work which was never completed. The title of the composition was taken from a poem by the French poet Lamartine.

Also included in the symphony's program is Brahms' "Tragic Overture" and the first Peter Gynt Suite by Edvard Grieg, the 19th century Norwegian composer. The symphony's string section will be featured on the Adagio for Strings by Samuel Barber, the well-known American composer who died in January of this year.

The School of Music is sponsoring the free concert, and the public is welcome.

Provost appoints search committee

Louis P. Inerra, associate professor of architecture, has been named chairman of the Search Committee for the dean of the College of Arts and Architecture and director of the University Arts Services.

Dr. Walter H. Walters, the dean and director for the past 12 years, has indicated that he plans to retire no later than January 1, 1982.

Members of the Search Committee, appointed by Provost Eddy, are: Dr. Maureen A. Carr, director, School of Music; Dr. Richard P. Chait, associate provost; Dr. Caroline D. Eckhardt, associate professor of English and

comparative literature; William Hull, director of exhibitions, Museum of Art; Daniel R. Jones, assistant professor of landscape architecture; Dr. Pierce F. Lewis, professor of geography.

Dr. John M. Lilley, dean, Behrend College; Dr. Lowell L. Manfull, professor of theatre arts; Dr. George L. Mauer, professor of art history; Richard Mayhew, associate professor of art; Jeanette D. Miller, student; and Dr. Roger R. Zellner, associate professor of art education, Altoona Campus.

Nominations and letters of application (with resume) should be sent to Louis P. Inerra, chairman, Search Committee, Dean of the College of Arts and Architecture, The Pennsylvania State University, 205 Old Main, University Park, PA 16802.

Nominations sought for teaching award

Nominations are still being sought by the College of Education for its annual Outstanding Teaching Award.

The deadline for nominations to be submitted is Oct. 19.

According to an announcement from the award committee, nominations will be accepted from undergraduate and graduate students, as well as former students, from all of the University's campuses. The recipient will be selected

by a committee of faculty members and students.

The award, which includes a cash prize, is presented to a College of Education faculty member who has a distinguished record in teaching and advising and who exhibits outstanding performance in developing quality instructional techniques and in aspiring students.

Nomination blanks, a complete list of criteria and a set of procedures may be requested from: The College of Education, Outstanding Teaching Award Committee, 165 Chambers Bldg., University Park, Pa., 16802.

Faculty Senate

(continued from page 1)

Turning to a legislative report from a special committee on computer and informational systems, carried over from its September meeting, the Senate agreed to four additional recommendations to the President and defeated one.

During its September meeting, the Senate agreed to a recommendation that it consider, through its committees, the establishment of a computer literacy requirement with the baccalaureate degree program.

The four recommendations agreed to Oct. 6 are:

1. . . . that the existing committee system be replaced by (1) an academic computer policy committee with representation primarily drawn from the faculty appointed by the Senate and including academic administration appointed by the President and (2) a similar committee for administrative computation. These committees would formulate University policy and assist and advise the manager of computation facilities for the University

in implementing policies on computation. . . . that the University recognize that fiscal requirements for computers are substantial and, in as much as possible, provide for these needs in a structured short and long range strategic plan of action.

2. . . . that the major computer system supporting instruction, academic-administrative needs, and informational needs be arranged such that they can be accessed from the same terminal and share access to common data bases.

3. . . . that computing facilities for research purposes using sponsored research funds be purchased with a minimum of imposed coordination at this time."

The recommendation defeated was "that the President appoint a manager (vice-presidential level) of information systems and computer facilities for the University reporting directly to him."

In other legislative business, the Senate agreed to a number of proposals from the Committee on Academic and Athletic Standards for changes to "Academic Policies and Procedures for Undergraduate Students," published annually in the *Penn State Student Handbook*. The changes are needed to make student rules conform with the early semester calendar system.

The Senate also heard a legislative report from the Committee on Undergraduate Instruction on proposed changes to one section of the policy regarding adjudication of grades, also published in the *Penn State Student Handbook*. After a lengthy discussion which brought to light several interpretations of the policy, the Senate tabled the committee's recommendation.

The Senate also heard two informational reports, one from the Faculty Affairs Committee on "A Study of the Sabbatical Leave Program," and one from the Committee on Undergraduate Instruction on the "Annual Report on the Distribution of Grades, Dean's List and Graduation with Distinction."

One Senator replacement was announced during the meeting: Theodore E. Kiffer replaces Murray S. Martin as a Senator from the College of the Liberal Arts.

The Senate's next meeting is scheduled for Tuesday, Nov. 10, at 2:10 p.m. in Room 112, Kern Graduate Bldg. The Senate Council will meet on Tuesday, Oct. 27.

President Oswald announces call for Faculty Scholar nominations

President Oswald has announced the call for nominations for the Faculty Scholar Medal for 1981-82. The faculty award for excellence in scholarship, research and art was established in September, 1980, to honor those who have excelled in creative work and to express the University's gratitude and appreciation for those achievements.

The awards are to be given in recognition of scholarly or creative excellence represented by a single contribution or a series of contributions around a coherent theme. The attainment for which the candidate is to be honored shall have occurred during the three years preceding the nomination for the award.

The contribution may be original basic research in any area of science; it may represent application of knowledge in the creation of a process or device useful to society; it may be in any area of the arts or humanities such as poetry, musical composition, design, sculpture, paintings, ceramics, theatre arts and photography.

Candidates will be considered in arts and humanities; life and health sciences; physical sciences and engineering, social and behavioral sciences.

Faculty members honored at Winter Term commencement last year were Gerard J. Braut, arts and humanities; Peter R. Gould, social and behavioral sciences; Hiroshi Ohmoto, physical sciences and engineering; and John A. Waldhausen, life and health sciences.

The selection panel for the arts and humanities area is under the chairmanship of Robert W. Carrubba, professor of classics and associate dean, Graduate School. Other members are Paul Axt, professor of mathematics; Frederick R. Matson, professor emeritus of archaeology; and Peep Rebane, associate professor of history at Ogontz.

Howard E. Morgan, Evan Pugh

professor of physiology, chairs the panel for the life and health services area. Other members are Elsworth R. Buskirk, director of the Human Performance Laboratory and professor of applied physiology; Edward G. Buss, professor of poultry science; Thomas Smyth Jr., professor of entomology; and G.K. Strother, professor of biophysics.

The panel for the physical sciences and engineering area is chaired by Alfred K. Blackadar, professor of meteorology. Serving with him will be Stephen J. Benkovic, Evan Pugh professor of chemistry; Edward H. Kleivans, professor of nuclear engineering and research dean, College of Engineering; Arthur J. Marsicano, associate professor of engineering at Schuylkill; and Philip L. Walker, Evan Pugh professor of materials science.

Carol A. Cartwright, professor of education and acting associate dean, Commonwealth Educational System, chairs the panel for the social and behavioral sciences. Other members are Roy C. Buck, professor emeritus of sociology and social science; Peirce F. Lewis, professor of geography; John D. Martz, professor and head of political science; and Stephen J. Cimbala, associate professor of political science and associate director for academic affairs, Delaware County Campus.

Pioneer Festival set

Shaver's Creek Environmental Center will hold its sixth annual Pioneer Crafts Festival at the center from noon to 5 p.m. Sunday, Oct. 18.

More than 25 craftsworkers will share their specialties and sell their wares. Included will be demonstrations of candlemaking, spinning, quilting, herbal lore, woodworking and blacksmithing.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Oct. 22, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (FES-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

MANAGER OF FLEET OPERATIONS, OFFICE OF BUSINESS SERVICES, UNIVERSITY PARK Responsible to the director, Fleet and Airport Services for overall administration of Fleet Operations including facilities, equipment and personnel. Responsible for planning, organizing, controlling and coordinating functions. Accountable for total overall effectiveness and performance results. Bachelor's degree or equivalent in business administration plus four to seven years of effective experience in motor fleet management.

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Assistant Coordinators	Student Affairs
Assistant Food Supervisors	Housing and Food Services
Computer Operators	Intercollege Research Programs
Shifts: 8:00 a.m. to 4:30 p.m. 4:30 p.m. to 1:00 a.m. 12 midnight to 8:00 a.m.	

Programmers	Management Services
Research Aides	College of Agriculture Student
Residence Hall Area Coordinators	Student Affairs
Cardiology Technicians	Hersey
Clinical Laboratory Assistants	Hersey
Licensed Practical Nurses	Hersey
Critical Care Monitoring Technicians (Jr. & Sr. Levels)	Hersey
Cryo-Technologists	Hersey
Medical Technologists (CLIA, MLT, Hersey)	Hersey
Nuclear Medical Technicians	Hersey
Pharmacists	Hersey
Physical Therapists	Hersey
Physician's Assistants	Hersey
Psychiatric Assistants	Hersey
Respiratory Technicians	Hersey
Research Technicians (Jr. & Sr. Levels)	Hersey
Respiratory Therapy Technicians	Hersey
Staff Nurses	Hersey

(070-1) The National Science Foundation (NSF) and the National Endowment for the Humanities (NEH) announce new guidelines for Interdisciplinary Incentive Awards and Sustained Development Awards under NSF's Ethics and Values in Science and Technology (EVIST) program. The applications closing dates Feb. 1, 1982, SEI-42A and SEI-42B have been ordered. The contact is Dr. Arthur Norbert (202-357-7550). (Ref. NSF Bulletin, October 1981)

(070-2) A limited number of computing equipment grants for research in the mathematical sciences are available from the National Science Foundation. Specific research project pursuits are the required criteria for the purpose of assisting researchers whose work is limited due to lack of suitable equipment. A target date of Dec. 1, 1981 is anticipated. Contact Dr. Alvin Thaler (202-357-9764). (Ref. NSF Bulletin, October 1981)

Scholars Program to offer campus seminars

The University Scholars Program is offering special seminars during the 1981-82 academic year at the McKeesport, New Kensington and Beaver campuses. Students from five campuses, including Shenango Valley and Fayette, will share in the program.

The first of the seminars will begin at noon, Tuesday, Oct. 20, at McKeesport when Dr. David R. Dilley, economist of United States Steel Company, will address students in a special lecture on "Supply-Side Economics." Following the public lecture will be a private lunch with the Scholars Program participants and faculty advisers, and an afternoon seminar to discuss economic theories and applications.

The Western Pennsylvania Scholars Seminars also will hold Winter and Spring Term seminars at the New Kensington and Beaver campuses. Tentative plans call for the topics to be presented on "International Terrorism" and "The Ethics of Bioengineering."

October 30

Eisenhower Chapel to mark first 25 years

A celebration marking the 25th anniversary of the Helen Eakin Eisenhower Chapel will be held 11 a.m. Friday, Oct. 30, in the All-Faith Chapel.

President Oswald, joined by representatives of the major faiths, will participate in the ceremony, which will be followed by a buffet luncheon in the Frizzell Room of the Chapel.

Eisenhower Chapel, the campus center for religious activities, came into being under the leadership of Milton S. Eisenhower, University president from 1950 to 1956.

Ground for the Chapel was broken on Feb. 22, 1955, and the cornerstone was laid by President Dwight D. Eisenhower on June 11, 1955. An official dedication of the Chapel was held Sept. 16, 1956. In 1976, an additional unit to the Chapel was completed and dedicated.

Construction of all phases of the Chapel was made possible through gifts from alumni and friends of the University.

As the focal point of religious activity on campus, the Chapel serves as the worship center for many religious groups and provides meeting space for their social and educational programs. Office space also is provided for the major campus ministries and for organizational staff.

The Chapel is managed by the Office of Religious Affairs, which also oversees and facilitates the activities of religious workers on campus and provides educational programs which explore contemporary issues from a religious perspective.

This fall, and throughout the year, the Office of Religious Affairs and associated ministries will present programs focusing on Penn State's religious traditions and current practices.

The University community is invited to attend the Oct. 30 anniversary ceremony.

Members of the University's newly-established Commission for Women are, seated, from left, Louise Sandmeyer, Patricia Farrell, Carol Cartwright, Rosanel Oswald, Jane McCormick, Rosemary Schraer, Joan Thompson, Audrey Rodgers; standing, from left, Melanie Miller, Kathryn Johnson, Kathryn Moore, Nancy Tischler, Wendy Oakes, Nancy Lyday, Barbara Kautz, Maureen Carr, Jacqueline Schoch, and June Gamble.

Behrend College to bestow four Medallion awards

Behrend College will present the highest honor it can bestow, the Behrend Medallion, to four prominent persons in recognition of contributions which "have had a significant influence on the prestige and betterment of the Erie community."

Dr. John M. Lilley, dean of Behrend College, and President Oswald will present the awards in a special ceremony Oct. 22 at 8 p.m. at the Kahkwa Club, a country club in Erie.

Receiving the awards will be Donald M. Alstadt, president of Lord Corporation; Harnet Behrend Ninow, whose parent's home, Glenhill Farm, is now the Behrend campus; Robert C. Reed, retired General Electric executive; and Allyn S. Wright, chairman of the board of Reed Manufacturing Co.

Mr. Alstadt, a nationally recognized industrialist, is an author and lecturer on management technology and innovation.

He also serves on the Behrend Council of Fellows.

Mrs. Ninow's mother, Mary Behrend, gave her parent's estate to Penn State in the mid-1940s for the establishment of the College in memory of her husband, Ernest.

Mr. Reed, a former member and vice president of the Behrend Advisory Board (now known as the Council of Fellows), served in 1953 as chairman of the capital fund drive for construction of Erie Hall, the first new building on the Behrend campus. The campus's Reed Building is named in honor of his father, J. Elmer Reed.

Mr. Wright served on the committee which worked to bring Penn State to Erie. He was a member of the College's first Advisory Board, served as its president for two years, and is now a Life Fellow.

More than 200 persons have been invited to join in honoring the award recipients.

Crownvetch to be official state plant?

A bill that would make Penngift Crownvetch the official "beautification and conservation plant of Pennsylvania" has been introduced in the State Senate.

Crownvetch, a hardy legume, was discovered by Dr. Fred V. Grau in June, 1935, on a steep shale slope on the Robert Gift farm near Virginville, Berks County. Dr. Grau, at the time, was serving on the

University faculty as the nation's first Extension agronomist in turf.

After extensive experimentation by Dr. Grau, the plant was widely accepted for use as a ground cover. Since 1958, the Pennsylvania Department of Transportation has used the plant along the roadways of every interstate highway in the Commonwealth.

Women's Studies receives lecture fund

The University's Women's Studies Program has received a \$10,000 gift from Jay B. and Dr. Barbara L. Claster of State College.

According to Dr. Audrey Rodgers, associate professor of English and coordinator of the Women's Studies Program, the gift will be used to create the Claster Lecture Series. On a regular basis, the series will bring to Penn State women of distinction in such fields as science, literature, education, business, politics and the arts.

"We are most appreciative of the Clasters' generosity," Dr. Rodgers says. "Their gift will greatly enhance the cultural, as well as the academic, goals of the Women's Studies Program."

The Women's Studies Program was instituted three years ago in the College of the Liberal Arts. It is an interdisciplinary academic program offered as a 21-credit option, and is open to all students of the University. Thirty-five faculty members, men as well as women, are engaged in the program.

In addition to the academic program,

Women's Studies has hosted visits from such outstanding women as poet Denise Levertov, and NOW founder Karen De Crow. Women's Studies faculty members also have served on panels dealing with "women's concerns" such as sexual harassment and dual careers. More than 1,000 students have taken Women's Studies courses, and the program, both academically and culturally, is growing.

Dr. Rodgers says. The impetus for the gift came from Dr. Barbara L. Claster, a psychotherapist whose area of expertise is women. With a private practice in State College and New York City, Dr. Claster is currently involved in research toward a psychoanalytic theory of women and the development of psychotherapeutic techniques for women.

Mr. Claster is president of M.L. Claster & Sons, Inc., of Bellefonte. He serves on the Penn State Fund Council and on the boards of the American Heart Association, the Gesinger Foundation, and The Pennsylvania Manufacturers' Association.

Dr. Audrey Rodgers, standing, coordinator of the University's Women's Studies program, confers with Dr. Barbara and Jay Claster, who have established the Claster Lecture Series.

Penn Staters

Gideon Golany, professor of architecture, has been appointed a member of the Institute of Human Settlements, India, whose objective "is to conduct research, investigation and case studies on human settlements and to undertake demonstration projects." The Institute will conduct interdisciplinary studies in major problems on human settlements.

Stephen R. Grecco, associate professor of English, is one of 23 playwrights in the United States chosen for a 1981 Playwright Fellowship from the National Endowment for the Arts. One of 525 playwrights from across the country who submitted manuscripts, he was the only Pennsylvanian chosen.

Dr. Jan P. Holland, senior research associate, Applied Research Laboratory,

presented a paper entitled, "A Technique for Determining the Anisotropic Properties of Ambient Ocean Noise," at the International Symposium on Underwater Acoustics in Tel Aviv, Israel.

Dr. Donald G. James, professor of mathematics, presented an invited colloquium on "Forms, Groups, and Geometry" at the Mathematics Department of the University of Notre Dame.

Murray S. Martin, associate dean of libraries, is the author of *Issues in Personnel Management in Academic Libraries*. The book is Volume 14 in the JAI Press series, "Foundations in Library and Information Science," and deals with the ways in which current concepts of library personnel classification and use will have

to be modified in order to keep up with changes in institutional and library goals, declining budgetary support, and changes in technology over the next decade.

Dr. Margaret A. Newman, professor of nursing, has been appointed consultant for nursing research to the surgeon general of the United States Army.

Brig. General Hazel W. Johnson, chief of the Army Nurse Corps, said that Dr. Newman's "contributions in the field of nursing research are well known and the Army Nurse Corps is delighted to have (her) as a member of its team. We are working toward building a sound foundation for professional nursing practice in the Army Medical Department."

Dr. Elizabeth Ray, professor of home economics education, and head, Division of Occupational and Vocational Studies, is editor of the first yearbook for home economics education. The book, *Home Economics Teacher Education: Sixty*

Significant Years, is sponsored by the American Home Economics Association and published by McKnight.

It presents an historic perspective on the development of the field from the 1917 Smith-Hughes Act to the present. Included among the 15 contributing authors is Francine Hultgren, instructor in home economics education, who co-authored one chapter.

Dr. Thomas D. Yawkey, associate professor of education, has been appointed 1982 Conference co-chairman for the 15th annual conference of the Northeastern Educational Research Association.

Dr. William G. Yendol, professor of entomology, has been elected president of the Eastern Branch of the Entomological Society of America. The society provides an opportunity to over 1,800 entomologists for scientific interchange in Northeastern United States.

Promotions

Faculty

Betty Holmes to assistant professor of education and reading at Capitol.
John C. Tamplin to assistant professor of English at Shenango Valley.

Staff Exempt

David E. Branigan to director of financial reporting in Controller's Office.

Donald J. Cook to farm supervisor in Agriculture.

Kay L. Holtzman to supervisor, surgery research animal laboratory at Hershey.

James W. Locker Jr. to coordinator, equal employment opportunity program in Agriculture.

Jesse L. Shade to assistant housekeeping supervisor in Housing and Food Services.
Phyllis L. Smith to assistant housekeeping supervisor in Housing and Food Services.

Peter F. Special to supervisor, trades in Physical Plant.

Bradley J. Wilt to assistant to the director in Intercollegiate Research Programs.

Staff Non-Exempt

Patricia A. Myers to senior staff nurse at Hershey.

Clerical

Susan DelPonte to secretary B in Science.
Winifred F. Haldeman to clerk A, benefits in Personnel Administration.

Carpoolers

Debra Lauder would like to share driving from the Warriors Mark-Seven Stars area. She works at the Findlay Post Office from 8 a.m. to 5 p.m. She can be reached at either 865-0465 or (814) 632-8562.

Madeline Yarnell needs a ride from Bellefonte to State College. Her working hours are from 9 a.m. to 3 p.m. at Rec Hall. She can be reached after 5:30 p.m. at 355-8308.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

USPS 351-170

William E. Campbell, Acting Editor
C. Thomas Ressler, Assistant Editor
Calendar Editor — 865-2501
Department of Public Information and Relations
Room 312 Old Main
University Park, Pa. 16802
Telephone: (814) 865-7517
Second-class postage paid at State College, Pa. 16801

Shelby L. Hoy to secretary B in Agriculture.

Shirley J. Keller to secretary B in Agriculture.

Sylvia H. Malone to clerk, transcript A in Registrar.

Douglas H. McAnallen to clerk A in Libraries.

Donna C. Nicely to secretary B in Engineering.

Donna Rignin to clerk, billing A in Physical Plant.

Daisy E. Romig to clerk, records A in Graduate School.

Evelyn D. Smith to clerk A, Interlibrary Loans in Libraries.

Deborah Underwood to clerk A, information retrieval in Personnel Administration.

Carrie E. Winters to data input-error control clerk at Hershey.

Kathy L. Zettie to secretary A in Agriculture.

Technical Service

Harold L. Doll to maintenance worker area landscape in Physical Plant.

Nancy J. Guttischall to storeroom clerk C at Hershey.

Stephen E. Harbst to maintenance worker area landscape in Physical Plant.

Samuel K. Lykens to equipment and locker room attendant in Health, Physical Education & Recreation.

Samuel Ryder to groundskeeper landscape A in Physical Plant.

Glays E. Sampsel to residence hall utility worker in Housing and Food Services.

Richard F. Shawley Jr. to residence hall preventive maintenance worker in Housing and Food Services.

Jeffrey Sowash to refrigeration technician, apprentice in Physical Plant.

Obituaries

Edna M. Schultz, who retired April 7, 1971, as salad group leader in Housing and Food Services, died Oct. 10 at the age of 75. She had joined the University staff Sept. 11, 1959.

Betty J. Whippo, who joined the University staff Oct. 1, 1948, as a maid in Housing and Food Services and retired Feb. 14, 1976, as assistant housekeeping supervisor, died Oct. 10. She was 60.

Matthew W. Lengyel, research associate in the Applied Research Lab, died Oct. 8 at the age of 48. He joined the University staff March 13, 1965, as research assistant in ARL and was promoted to research associate July 1, 1971.

George C. Wheeland, groundskeeper in Physical Plant from April 17, 1938, until his retirement Nov. 1, 1969, died Oct. 8. He was 70.

Retirements

"I really enjoyed working with the students," recalls **LaVada J. Dixon**, secretary in the College of Science. "I made such lasting relationships with many of them. Some of the students, such as student council members who graduated as long as 10 years ago, still write to me to find out what's going on here. Yes, the students really made the job worthwhile."

With pleasant memories of the past and high hopes for the future, Mrs. Dixon left the University on Oct. 1 after 20 years of service.

She notes that her new lifestyle will require some "initial adjustment." "I'm still getting up at 6 or 6:30 a.m. It still feels like I'm on vacation . . . it will probably be a couple of weeks before this hits me!"

Future plans for Mrs. Dixon include doing volunteer work with retarded or brain-damaged children for an organization such as PARC (Pennsylvania Association for Retarded Citizens). Her spare time will also enable her to be with her husband, Joseph, department head of Chemistry, when he travels on his job.

LaVada Dixon began her Penn State employment in 1961 as a clerk typist for Dean Brickwedde in the then College of Chemistry and Physics. Her job was upgraded through the years to her most recent position as secretary in the College of Science to Dean Norman Freed, associate dean for resident instruction. Her duties entailed handling student work, such as registration, graduation, student council and student records.

"There isn't any building on campus that I didn't work in!" recalls **Robert W. Horner**.

As a Grade A plumber-fitter in Physical Plant, he worked for Penn State since 1955. In the ensuing years, Robert Horner

tackled a variety of duties from tearing out and installing new bathrooms, connecting valves on boilers to putting new equipment in the cheese room (Borland Lab) at locations all over University Park campus to Stone Valley. Now, 26 years later, Mr. Horner has retired.

Although he'll no longer be travelling around campus, Mr. Horner will be spending quite a bit of his spare retirement time exploring the great outdoors. In addition to his favorite pastimes of hunting and fishing, he says that he "just loves to be in the woods hiking around. Another favorite outdoor activity takes place in Beaver Stadium during the Fall as Mr. Horner avidly supports the Penn State football team. He's also active in the Nazarenes and the Pine Grove Mills VFW. Mr. Horner and his wife, Phyllis, reside in Petersburg. They have two daughters, Bonita and Judy, and two sons, Robert Jr. and Shawn. Robert Horner Jr. graduated from Penn State in accounting in 1975.

Clarence C. Beard, general helper at Capitol since Oct. 1, 1969, retired Oct. 13.

Partings

Wallace M. Swinehart, security supervisor at the Hershey Medical Center, left the University on Sept. 25. He had been an employee since 1967.

Dama L. Wirries, senior project associate in the Intercollegiate Research Programs, left the University on Oct. 11, after being employed since 1971.

Elizabeth L. Meek, administrative aide in the President's Office, will leave the University on Nov. 1. She began working at the University in 1964.

should request a biographical data form from the Employment Division, 117 Willard Bldg., 865-1387 (Network 475-1387), or submit a revised resume.

Tax to be withheld

The University again this year will withhold the Occupational Privilege Tax of \$10.00 from all University Park employees who are liable for the tax.

For faculty and staff members who are paid on a monthly basis, the tax of \$10.00 will be withheld from paychecks dated Nov. 30, 1981. For all other employees (technical service, graduate assistants and wage), the deduction will be made from paychecks dated Nov. 13, 1981.

If any employee wishes to appeal his liability for this tax, he should apply directly to Mr. Michael S. Groff, Tax Administrator, 118 South Fraser St., State College, Pa. 16801. Department heads are asked to be certain that part-time wage employees are aware of this tax.

Faculty/Staff Alerts

File updates urged

During the years they spend at the University, some employees acquire new skills or knowledge as the result of taking courses, participating in training programs or through individual study. They may also gain experience in another field through outside activities.

When employees apply for promotion to another job, it's important that this new information be in their files, the Employment Division points out. Unless employees provide such information about themselves, however, their files cannot be brought up to date.

The Employment Division urges that all employees periodically consider whether they can add to the information currently in their files. Persons who wish to do so

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

October 22- November 1

Special Events

Thursday, Oct. 22

Commons Film Series, *Jeremiah Johnson*, 7 and 9 p.m., Room 112 Kern.
Robeson Cultural Center, Music of Scott Joplin, 8 p.m., Schwab Auditorium
Sports: field hockey vs. Cortland State, 3:30 p.m.

Friday, Oct. 23

Craft Demonstration, 11:30 a.m., Kern Lobby.
College of Education public lecture, 2:30 p.m., Room 101 Kern, Michael Round, headmaster.
Haling Manor Comprehensive High School (London, England) on "Recent Trends in English Education."
Commonspace Theatre, *Brubaker*, 7 and 9 p.m., Room 112 Kern.
Cinematheque Film, *The Enforcer*, 7 and 9 p.m., Room 10 Sparks Bldg.
Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.
CSA Coffeehouse, 8 p.m., Room 102 Kern.
Sports: JV football vs. Fort Union Military Academy, 2 p.m.; ice hockey vs. Philadelphia Jr. Flyers, 9:15 p.m.

Saturday, Oct. 24

France-Cinema, *Resnais, Mon Oncle d'Amerique*, 7 and 9 p.m., Room 112 Kern.
Cinematheque Film, *The Enforcer*, 7 and 9 p.m., Room 10 Sparks Bldg.
Artists Series, Chamber Music Society of Lincoln Center, 8:30 p.m., Eisenhower Auditorium.

Sports: football vs. West Virginia, 1:30 p.m.; ice hockey vs. Philadelphia Jr. Flyers, 8 p.m.

Sunday, Oct. 25

Shaver's Creek Environmental Center, Informal insect hunt with Dr. Charles Rutschky, Dept. of Entomology, 2-4 p.m.
Commonspace Theatre, *Brubaker*, 7 and 9 p.m., Room 112 Kern.
Sports: field hockey vs. Virginia, noon.

Monday, Oct. 26

First day to sign Winter Term NDSL and University Long Term Loans, Room 208 Shields Bldg.
Deadline for November graduates to deliver theses to Graduate School and for department to certify completion of required papers for November graduates.
France-Cinema, *Resnais, Mon Oncle d'Amerique*, 7 and 9 p.m., Room 112 Kern.

Sigma Delta Epsilon — Graduate Women in Science, Panel Discussion, 7:30-9:30 p.m., Room 101 Kern Bldg. Drs. Nancy Chiswick, Stella Goldberg, Vilma Hunt, Eva Pell, Sylvia Stern, on "Superwoman — Myths to the Madness."

Slide presentation by Dr. Stephen Kress, "Bird Islands of the North Atlantic," 8 p.m., Room 26 Mineral Sciences Bldg. Sponsored by Shaver's Creek Environmental Center and the State College Bird Club.

Tuesday, Oct. 27

Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom.
Colloquy, George McGovern on "Conservation in America," 8 p.m., Eisenhower Aud. Admission is free.

Wednesday, Oct. 28

Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom.
Commons Concert, Richard Sleight, noon, Kern Lobby.
Robeson Cultural Center, movie, *King Solomon's Mines*, 7:30 p.m., Walnut Bldg. Free admission.

Chamber Choir, 8 p.m., Music Bldg. Recital Hall.

Thursday, Oct. 29

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Friday, Oct. 30

Craft Demonstration, 11:30 a.m., Kern Lobby.
Commonspace Theatre, *Love and Death*, 7 and 9 p.m., Room 112 Kern.
Cinematheque Film, *Alien*, 7 and 9:15 p.m., Room 10 Sparks Bldg.
Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.
URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.
GSA Coffeehouse, 8 p.m., Room 102 Kern.
Artists Series, Gregory Allen, pianist, 8:30 p.m., Schwab Auditorium.

Sports: soccer vs. Fairleigh Dickinson, 7:15 p.m.; women's volleyball, Penn State Classic.

Saturday, Oct. 31

Chinese Student Association film, 1:30 p.m., Room 112 Kern.
GSA, Halloween Party, 6:30 p.m., Rooms 101, 102, 104 and Lobby, Kern Bldg.
France-Cinema, Bergman, *Wild Strawberries*, 7 and 9 p.m., Room 112 Kern.
Cinematheque Film, *Alien*, 7 and 9:15 p.m., Room 10 Sparks Bldg.
URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.
Sunday, Nov. 1
Commonspace Theatre, *Love and Death*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Oct. 22

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. M. Brun, General Electric, Schenectady, N.Y., on "High Temperature Hard Materials."

Anthropology Colloquium, 3:30 p.m., Room 107 Carpenter Bldg. Karen Gottlieb, assistant professor of anthropology, on "Twin Studies as a Tool in Physical Anthropology."

Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. J. O'Connell, National Bureau of Standards, on "Unsolved Puzzles in Electromagnetic Interactions."

Engineering Science and Mechanics Seminar, 4 p.m., Room 214 Hammond Bldg. Dr. J. Mort, Xerox Research Center, Webster, N.Y., on "Transport and Photogenetic Studies in Amorphous Silicon."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Tony Perrotta, Gulf Research and Development Co., on "Growth of Mesophase in Various Carbaceous Materials."

Math Colloquium, 4 p.m., Room 104 McAllister Bldg. Professor John Horvath, University of Maryland, on "Integrable Distributions and Convolutions of Distributions."

Philosophy Colloquium, 4 p.m., Room 220 Willard Bldg. Roberta Kevelson, Dept. of Philosophy, Berks Campus, on "Methodological Solipsism: Charles S. Peirce's Phenomenology."

Special Acoustics Seminar, 4 p.m., Room 73 Willard Bldg. Dr. Robert J. Hooker, senior lecturer in mechanical engineering, University of Brisbane, Queensland, Australia, on "Aeolian Vibration of Overhead Transmission Lines."

Computation Center Seminar, 7:30 p.m., Room 101 Walker Bldg. Introduction to the use of the Tektronix 4602, Houston-Instrument CPS 156, and 8222A Electrostatic Versatile plotters.

Friday, Oct. 23

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Karine Foley on "Surface Characterization with SIMS: CO Adsorption on Ni Surfaces."

Statistics Seminar, 2:20 p.m., Room 273 Willard Bldg. Dr. C. R. Rao, F.R.S., University of Pittsburgh, on "Statistical Analysis of Diversity: A Unified Approach and its Applications."

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Dennis Elpern, senior planner, Centre Regional Planning Commission, on "Planning in the Centre Region: Coronado Presses on Toward El Dorado."

Monday, Oct. 26

Philosophy Colloquium, 3 p.m., Room 124 Sparks Bldg. Ernesto Grassi, emeritus professor, University of Munich and director, Center of Humanistic Studies, on "Italian Humanism and Heidegger's Thesis of the End of Philosophy."

Geosciences Colloquium, 3:45 p.m., Room 101 Kern Bldg. Dr. Thomas B. McCord, Planetary Geosciences, Harvard Institute of Geophysics, on "Remote Sensing in the Planets."

Entomology Seminar, 4 p.m., Room 204 Patterson Bldg. Dr. Harry Hoogstraal, head, Medical Zoology Dept., U.S. Naval Medical Research Unit 3, on "Changing Patterns in Tickborne Diseases in Modern Society."

MCB Seminar, 4 p.m., Room 101 Altshouse Lab. David Shortle, Biology Division, M.I.T., on "Single-stranded Gaps as Targets for In Vitro Mutagenesis."

Tuesday, Oct. 27

Biology Seminar, 11:10 a.m., Room S-2 Frear Lab. Dr. William G. Gordon, National Marine Fisheries Service, Washington, D.C., on "Marine Fishes Management, Past, Present and Future."

Philosophy Colloquium, 3 p.m., Room 124 Sparks Bldg. Ernesto Grassi, emeritus professor, University of Munich and director, Center of Humanistic Studies, on "Italian Humanism and Heidegger's Thesis of the End of Philosophy."

Chemical Engineering Seminar, 3:45 p.m., Room 140 Fenske Lab. Professor K.A. Osseo-Asare, Dept. of Metallurgy, on "Interfacial Phenomenon and Mass Transfer in Hydrometallurgical Liquid-Liquid Extraction Systems."

Genetics Seminar, 4 p.m., Room 111 Animal Industries Bldg. Dr. R. Dietert, director of poultry science, Cornell University, on "Expression of a Chicken Oocyte — Development Antigen on Avian Hemopoietic Cells."

Women's Studies Colloquium, 7:30 p.m., Room 124 Sparks Bldg. Christine Makward, associate professor in French, on "Women, Writing and Theory in France Today."

Inorganic/Organic Seminar, 8 p.m., Room 333 Whitmore Lab. Professor Richard Heck, University of Delaware, on "Talladium Catalyzed Organic Synthesis."

Poetry Reading by William Meredith, author of *The Cheer*, *Hazard The Painter*, *The Wreck of the Thresher* and chancellor of the Academy of American Poets, 8 p.m., HUB Lounge. Sponsored by the English Department and the Institute for the Arts and Humanistic Studies.

Wednesday, Oct. 28

Office of Religious Affairs, "Forum on Faith," 12:30-2 p.m., HUB Gallery. Dr. Rustum Roy, Evan Pugh professor of the solid state and geochemistry, on "Strengthening Your Faith Through Insights from Science." Bring a bag lunch.

Philosophy Colloquium, 3 p.m., Room 124 Sparks Bldg. Ernesto Grassi, emeritus professor, University of Munich and director, Center of Humanistic Studies, on "Italian Humanism and Heidegger's Thesis of the End of Philosophy."

French Dept. Journal Club, 7:30 p.m., Room 124 Sparks Bldg. Thomas Hale on "Ala recherche de l'Épique chez les Songhai et les Zarma du Niger" and Annette LaPalme on "Une Année de recherches au Cameroun."

Thursday, Oct. 29

Ceramic Science 500 Seminar Series, 11 a.m., Room 301 Steidle Bldg. Dr. T.M. Besmann, Oak Ridge National Lab, on "Thermodynamic Measurements of Oxycarbide Nuclear Fuel Materials."

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Dr. Robert DeLevie,

Georgetown University, on "AC Methods in Electrochemistry."

Aesthetics, Literary Criticism and Interpretation Theory Seminar, 3:45 p.m., Gilpin Room. Nittany Lion Inn. Brent Wilson, Art Education, on "The Genesis of Aesthetic Response and Artistic Style: Puzzles and Prospects."

Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. S. Fleming, University of Maryland, University of PA., of Physical Science Techniques Applied to Art."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Leon Petrakis, Gulf Research and Development Co., on "ESR Studies on Coal."

Friday, Oct. 30

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Laks-huan Taps, associate professor of geography, on "The Vulnerability of American Agriculture and What Some People Are Doing About It."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon to 11 p.m. Jack Troy, ceramics; Shirley Sturtz, drawings and watercolor; Bill Davis, drawings and watercolor.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays, Tours, Sundays, 1:30 p.m. Oriental Works from the Museum's Collection, Danish Ceramic Design.

Pattee Library: Bertolt Brecht: Photographs from the East German Government, through Oct. 28; A Commonplace Campus: Yesterday, Today and Tomorrow, opens Oct. 29. East Corridor Gallery. Mary Pat Ford, studio photographs, through Oct. 29, Cheryl King, drawings and paintings, opens Oct. 30. Lending Services Lobby. Sandy Sandweaver, recent work in batik, through Oct. 23. Seventy-one Percent of the World as Interpreted through Maps, Poetry, and Art, opens Oct. 23. Second Floor East. Highlights from the Allison-Shelley Collection, through Oct. 30. Trade Union Memorabilia: An AFL-CIO Centennial Exhibition from the Collection of Edward Rosney, Rate Books Room.

Visual Arts Bldg. Zoller Gallery. Gallery Hours: 9 a.m.-5 p.m., Monday through Friday, Saturdays, and Sundays, noon-5 p.m. Leonard Lehrer, paint exhibition, through Oct. 29; Duane Michaels, photo exhibition, opens Nov. 1.

Artists Series presents pianist

The Artists Series will present Gregory Allen, pianist, at 8:30 p.m. Friday, Oct. 30, in Schwab Auditorium as part of the "Pride of Pianists/The Young Prize Winners" segment in the Fine Art series.

Mr. Allen, 30, of Austin, Texas, was first prize winner of the Third Arthur Rubinstein International Piano Master Competition in Tel Aviv on April 16. He won the coveted prize over 36 competitors from 19 countries. Prior to taking top honors in the Rubinstein competition, Gregory Allen won second prize in the Washington International Competition in 1978, and the following month another second prize in the Queen Elizabeth Competition in Brussels.

Mr. Allen's program will include Variations in G by Leo Smit. Nocturne in

E-flat and Polonaise Fantaisie by Frederic Chopin, Sonata no. 7, for 64 "White Mass" by Alexander Scriabin, Nocturne no. 11 in F-sharp minor, op. 104 by Gabriel Faure, Prelude in A, op. 132, Etude-Tableau in F-sharp minor, op. 39, and Etude-Tableau in D, op. 39 by Sergei Rachmaninoff.

Visiting poet to present readings

Poet William Meredith will read from his own works at 8 p.m. Tuesday, Oct. 27, at an English Department colloquium in the HUB Gallery Lounge. He also will read at a Comparative Literature luncheon earlier in the day.

A New York City native and Princeton alumnus, Mr. Meredith is the author of seven books of poetry. His first, *Life Letter from an Impossible Land*, was chosen by Archibald MacLeish in 1944 for the Yale Series of Younger Poets.

His second book of verse, *Ships and Other Figures*, was published in 1948, followed by *The Open Sea* (1958), *The Wreck of the Thresher* (1964), *Earth Walk: New and Selected Poems* (1970), and *Hazard, and the Painter* (1975).

Mr. Meredith's visit is one in a series of fall poetry readings sponsored by the Institute for the Arts and Humanistic Studies, the Department of English and Pattee Library, with funding from the Pennsylvania Council on the Arts.

Scott Joplin music set for Schwab

"Scott Joplin and Friends," an evening of ragtime music, will be presented at 8 tonight in Schwab Auditorium.

The production is a creation of concert pianist and accompanist Den Kawash. A classical soloist, Mr. Kawash first encountered ragtime music in 1972. All selections played in the performance are Joplin compositions.

The show is a performing arts presentation of the Paul Robeson Cultural Center. Tickets to the performance may be purchased at the Hetzel Union Building main desk for \$2.

Residential building program established

A new academic program in residential building construction, to be administered by the Civil and Architectural Engineering departments in the College of Engineering, has been established at the University.

Bernard Hankin of Exton, a 1943 graduate of Penn State's Civil Engineering Department and immediate past president of the Pennsylvania Builders Association, is providing funds to establish a professorship of residential construction in the College of Engineering. Mr. Hankin initiated the program because "we weren't getting our share of professional engineers in our industry."

Musica da Camera to present first concert

Musica da Camera, the University's chamber orchestra, will present its first concert of the season at 8:30 p.m. on Wednesday, Oct. 28, in the Music Bldg. recital hall. The concert marks the opening of the group's 10th year of existence.

Handel's Concerto Grosso opus 6, No. 9

Penn State Ensemble to present concert

A program of recently-written works for wind band has been selected for the Penn State Symphonic Wind Ensemble's first concert of the 1981-82 season at 8:30 p.m. on Friday, Oct. 23, in the Music Bldg. recital hall.

The free concert, which is being sponsored by the School of Music, is open to the public.

Results announced for campaign drive

To date, University Park employees have contributed more than \$95,000 to the United Way. Fifty-six percent of the campus' 7,000 employees, including 550 new givers, have turned in their cards.

The University's goal this year is \$120,000 towards the Centre County goal of \$420,000 which serves 29 human service agencies in the county.

Persons who have not yet responded are urged to return their confidential replies to the United Way volunteer in their work area.

German philosopher to present seminars

Ernesto Grassi, emeritus professor of philosophy at the University of Munich, will present three seminars on "Italian Humanism and Heidegger's Thesis of the End of Philosophy" next week.

The seminars will be conducted from 3 to 5 p.m. on Monday, Oct. 26, Tuesday, Oct. 27, and Wednesday, Oct. 28, in Room 124 Sparks Bldg. Prof. Grassi's visit is being sponsored by the Department of Philosophy, the Department of German, and the Institute for the Arts and Humanistic Studies.

Prof. Grassi is the author of numerous books on the nature of art, myth, imagination, and the philosophical history of culture. A student of German philosopher Martin Heidegger for 10 years, he is a specialist in the rhetorical tradition of classical and renaissance philosophy.

Mr. Hankin's contributions will provide an endowed professorship in either the Civil Engineering or Architectural Engineering department. The faculty member appointed to hold it will coordinate the residential construction program at the senior-graduate level for students in both departments.

Both the Pennsylvania Builders Association and the National Builders Association have contributed to establishment of a Residential Building Construction Scholarship Fund which will assist young men and women who seek jobs in the residential construction business.

"In the Engineering College's centennial year, the homebuilders' involvement in education marks a trend in university-industry cooperation," Dr. Wilbur L. Meier Jr., dean of the College of Engineering, said.

—one of 12 concerti grossi comprising opus 6—will open Musica da Camera's program. For the piece, three concertists—violinists Chris Kranyak and Marta Malutza and cellist Leonard Feldman—will be featured in contrast with the full string ensemble.

In addition to concerts on campus, the group has performed extensively through out Pennsylvania and the eastern United States and has toured Europe twice in the last five years.

Musica da Camera, which is composed of specially-auditioned undergraduate and graduate music students and School of Music faculty, is directed by Dr. Douglas Miller, associate professor of music.

The University's School of Music is sponsoring the Wednesday evening performance. It is free and the public is welcome.

English headmaster to discuss education

Michael Round, headmaster of the Haling Manor Comprehensive High School in London, England, will give a public lecture at the University on Friday, Oct. 23.

Mr. Round, whose lecture is sponsored by the College of Education, will speak on "Recent Trends in English Education" at 2:30 p.m. in Room 101, Kern Graduate Building.

The lecture will include a question and answer period and refreshments will be available.

Computation Center plans two seminars

The Computation Center will conduct introductory seminars on interactive computing with VM and CMS at 7:30 p.m. on Nov. 10 and 12 in Room 108 Forum Bldg.

The dates and locations of the seminars have been changed because of a scheduling conflict. The second seminar will be a continuation of the first session, at which PSU documentation will be available.

Participants will be expected to have programming experience but the seminars will assume no knowledge of CMS.

The Computation Center also will offer a series of six seminars on Job Control Language (JCL) at 7:30 p.m. Monday and Thursday evenings, Nov. 30, Dec. 3, 7, 10, 14 and 17, in Room 112 Walker Bldg.

Concepts and facilities of the MVS operating system will be covered, and an overview of techniques for storing and transferring data when using disks and tapes will be given.

JCL, the language used by the operating system to manage jobs and data, provides a great deal of flexibility in manipulating data files. Prospective attendees should have a background equivalent to at least one programming course.

Registration for the seminars can be made by contacting Darlene Rhoads, 863-0422.

For academic affairs

Beaver Campus seeks associate director

A search has been opened for candidates for the position of associate director for academic affairs at the Beaver Campus.

Leo H. Takahashi, assistant professor of physics at Beaver, is chairman of the search committee. Members are Dr. Susan M. Bennett, assistant professor of psychology at Beaver; Dr. Thomas J. Knight, associate dean for Commonwealth Campuses and Continuing Education, College of the Liberal Arts; Dr. Eugene S. Lindstrom, head of the Department of Biology; Janet M. Loteki, president of the Beaver Campus Student Government; Association; Dr. M. Frank Mallette, professor of biology; Joseph J. Manak, assistant professor of engineering at Beaver; Dr. Lloyd J. McElroy, assistant professor of microbiology at Beaver; and Frank P. Montgomery, assistant director, Administration and Field Services, Continuing Education.

The new associate director will be responsible to the campus director for administering academic functions. Responsibilities will include working with the colleges and departments of the University in providing leadership in the professional development of faculty, in initiating new and innovative programs, and in campus service to the community.

Candidates should have an earned doctorate and successful academic administration experience, as well as at least five years of experience involving full-time teaching and scholarly pursuit, including preparation of proposals for external funding.

Applications and nominations should be sent by Nov. 20, 1981, to David B. Otto, director, Beaver Campus, Department U, Broadhead Road, Monaca, PA 15061.

Fuel scientist to give Taylor lecture

Dr. Irving Wender, internationally recognized fuel scientist and research professor at the University of Pittsburgh, will deliver two lectures as the 1981 Nelson W. Taylor Lecturer in Materials Science.

On Thursday, Nov. 5, he will discuss "On Our Energy Outlook through 2000," at 4 p.m. in 26 Mineral Sciences Bldg. On Friday, Nov. 6, he will talk about "Oil from Coal: Direct and Indirect Liquefaction Routes," at 4 p.m. in 112 Kern Bldg.

The Taylor Lectures, which are sponsored by the Department of Materials Science and Engineering, honor the memory of Dr. Nelson W. Taylor, who served as professor and head of the then Department of Ceramics from 1933 to 1943.

Dr. Wender was director of the Pittsburgh Energy Technology Center from 1972 to 1979, overseeing its changeover from the Department of the Interior to the Department of Energy. He then went to Washington where he served as director of the Office of Advanced Research and Technology within the Office of Fossil Energy. He was an adjunct professor at Pitt from 1964 to 1972 and assumed his present position there early this year.

He has received many awards for his research on coal chemistry and the

Dr. Wender

conversion of coal to synthetic fuels. He serves as editor of the journal, *Fuel*, and is on the editorial boards of three other journals.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1367 (network line 475-1367). Applications for these staff vacancies will be accepted until 5 p.m. Oct. 29, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-11) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam area veteran.

SYSTEMS DEVELOPER, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK. Responsible to the manager of the Systems Development Group in the Computation Center for the development of significant enhancements of computer operating systems, modification of externally available system software, and the development of components of major subsystems. Bachelor's degree in computer science or equivalent, plus one year's directly related experience in system programming and system development on large IBM system.

SUPERVISOR, CENTRAL TRANSPORT SYSTEM, COLLEGE OF MEDICINE, HERSHEY. Responsible to the manager, Central Stores, for providing escort services to nursing floors and ancillary departments requiring effective supervision, coordination, and scheduling of personnel and resources. High school graduate or equivalent plus three to four years of effective experience.

PSYCHIATRIST, UNIVERSITY HEALTH SERVICES, UNIVERSITY PARK. Responsible to the director, Mental Health Center, for providing psychiatric and neurologic consultation, limited therapy and provide consultation services to various departments and agencies of the University. Medical doctor degree required with post-graduate training in psychiatry and neurology. Five to seven years effective experience required in psychiatry

For further information, call 865-1375

(PS-11) The National Endowment for the Humanities announces a Oct. 1, 1981, preliminary proposal deadline date for NEH Youth Projects for Major Project Grants. These are out-of-classroom projects for groups of young people (up to age 21) and are particularly appropriate for Universities and research centers to develop with young people. Outreach programs to secondary schools are also encouraged. Major project grants vary in amount. Pilot Grants are also encouraged and they range from \$2,500 to \$5,000. The pilot grant deadline is April 15, 1982. Guidelines have been ordered. The program contact is (202-724-0996). (Ref. NEH announcement)

(PS-12) The Smithsonian Institution is taking applications until Jan. 15, 1982, for higher education and research training fellowships in American history and material culture, art history, history of technology and science, anthropology, geology, geophysics and earth sciences. The fellowships, awarded on merit, support independent research in residence at the Smithsonian.

Postdoctoral awards are \$17,000 to \$20,000. Presidential awards are \$8,500 plus and a limited number of 10-week appointments for graduate students carry a \$1,500 award. For applications and information, contact: Smithsonian Institution, Office of Fellowships and Grants, 3500 L'Enfant Plaza, Washington, D.C. 20560. The Smithsonian requests that prospective candidates for fellowships indicate proposed fields of research along with the dates of degrees received or expected. (Ref. HENA, 10/09/81)

Penn State Intercom

Grant funds are received for energy conservation projects

More than \$94,000 in matching federal funds has been granted to the University for energy conservation improvements to four buildings, it was announced at the October meeting of the Executive Energy Conservation Committee.

The Department of Energy approved four Energy Conservation Measures grant applications submitted by Penn State in June, 1981, to the Governor's Energy Council, which administers the federal program in Pennsylvania.

The Harmony Hall dormitory at Beaver Campus, Worthington Scranton Campus's Student Learning Center, the Laboratory Building at the Wilkes-Barre Campus and Altoona Campus's Adler Building were approved by the Energy Department to receive a total of \$94,320. The grants will be combined with

University funds to meet the total costs of improvements.

The selected buildings were among 33 building improvement plans submitted by Penn State totalling \$1,135,000.

"We've been making and continue to make energy efficiency improvements throughout the Penn State system, but this grant allows us to implement procedures we otherwise could not afford," said Ralph E. Zilly, vice president for business and chairman of the committee.

According to the report, cost avoidances from the modifications will equal the University's costs in less than three years at all four sites, with the Beaver and Wilkes-Barre Campus buildings both returning the University's investment in

(Continued on page 2)

Ross B. Lehman

Holiday schedule is announced

The Office of Personnel Administration notes that at this time of year questions typically arise regarding the forthcoming holiday schedules.

The next official University holiday is Thanksgiving, Thursday, Nov. 26. The Friday following Thanksgiving is not an established University holiday.

In December this year and January, 1982, in accordance with policies PS-28, PS-62, the clerical policy book and the agreement covering technical-service employees, the holiday schedule is as follows:

Christmas is on Friday, Dec. 25. When Christmas is on a Friday, the other established University holidays are Dec. 24, 28, 29, 30 and 31. Friday, Jan. 1, 1982, also is a University holiday.

Except for essential services personnel, University offices will close beginning Thursday, Dec. 24, and reopen on

Monday, Jan. 4, 1982. Classes will end on Saturday, Dec. 19, 1981, at 12:25 p.m. and will resume on Monday, Jan. 4, 1982, at 8:00 a.m.

Milton S. Hershey Medical center schedules may vary, since employees there receive service days in lieu of the extra December holidays, because of the special nature of the Medical Center.

Biweekly paychecks will be dated and available on Wednesday, Dec. 23, covering the payroll period Nov. 29 through Dec. 12. Payroll deposits for biweekly checks also will be made Dec. 23.

Monthly paychecks will be available on Wednesday, Dec. 23, to cover the period Dec. 1 through Dec. 31 and will be dated Dec. 31. The early distribution of the monthly checks is being done as a convenience for employees to avoid their having to return to campus during the break to pick up their checks. Employees are cautioned not to attempt to cash the checks before the proper date since banks have been alerted not to accept the checks in advance. Monthly payroll deposits to bank accounts will be made on Dec. 31.

Ross Lehman to retire in 1983

Ross B. Lehman, executive director of the Alumni Association for the past 11 years, has announced plans to retire in the spring of 1983.

"We will miss Ross's able guidance and ready wit," President Oswald said.

"During the past 11 years, the Alumni Association has nearly doubled its membership and greatly expanded its service to the University. Under Ross's leadership, the University has instituted such programs as the Alumni Fellows' visits, career counseling and an annual vacation college for alumni."

"Ross's extensive knowledge of Penn State's resources, including its alumni, has made him especially effective," added Richard A. Zimmerman, president of the Alumni Association. Mr. Zimmerman is president and chief operating officer of the Hershey Foods Corporation.

Mr. Lehman is a 1942 graduate of Penn State. A journalism major, he edited the Daily Collegian and was a member of several campus honorary societies.

He worked briefly as a news assistant in the University's Department of Public Information, and served two years as assistant city editor of the Lancaster New Era. In 1948, he returned to Penn State as assistant executive secretary of the Alumni Association.

During World War II, Mr. Lehman spent nine months in a German prison camp after his plane was shot down over Austria in 1944. He was a lieutenant in the Air Force, commissioned as a bombardier and navigator. He lost a leg in that incident, and later was awarded the Distinguished Flying Cross, the Air Medal with two clusters and the Purple Heart.

Dr. Robert D. Hume

Professor studies London stage

Editor's note: This article is one in an on-going series in which a faculty member describes work in progress.

By Robert D. Hume
Professor of English

Research in English is generally divided into critical interpretation ("What does this poem mean?") and an old fashioned kind of factual scholarship ("What is the date of this poem?"). Like most American-trained Ph.D.s I started as an interpreter of texts — but unlike most, I soon wandered into the more arcane realms of historical scholarship. It happened by accident.

In 1969, I started to write an article about the first new plays in England after 1660 (the theatres had been closed for 18 years by Cromwell's Puritan government). Only 15 or 20 late-seventeenth-century plays (of some 500) had ever been studied in much detail, and I found that the neglected plays cast a great deal of light on the well-known

ones. Fascinated, I read on, discovering that the popular types of plays interacted and changed almost on a year-by-year basis.

I soon realized to describe the evolution of the genres soundly, I had to date the plays well enough to be sure of their sequence. This was a serious problem. Almost no playbills have survived, and the first daily newspaper in London was not founded until 1702. There is a daily performance calendar, *The London Stage, 1660-1800*, compiled by five scholars over a period of 30 years and published in 11 volumes during the 1960s. But up to 1710 it is radically incomplete (fewer than 10% of the performances) and often inaccurate. I wrote my book (*The Development of English Drama in the late 17th Century*, published by Oxford in 1976), but in the process I found the direction of my research permanently changed.

In the course of reading every extant

(Continued on page 8)

Hettche named ARL director

Dr. L. Raymond Hettche has been appointed professor of engineering research and director of the University's Applied Research Laboratory.

Dr. Hettche, who assumes his new post Nov. 16, is superintendent of the Material Science and Technology Division of the U.S. Naval Research Laboratory (NRL), Washington, D.C. He replaces Dr. John C. Johnson, research professor of acoustics, who is stepping down to devote more time to program development and research.

Dr. Hettche will direct the University's major interdisciplinary research unit—a laboratory that has maintained leadership in technological developments for the U.S. Navy, through use of acoustic system and noise reduction techniques.

A native of Baltimore, Md., Dr. Hettche, in 1961, received both a B.A. in mathematics and a B.S. in civil engineering from Bucknell University. He got his M.S. and Ph.D. in civil engineering from Carnegie-Mellon University in 1963 and 1965 respectively.

From 1964 to 1966, he was an assistant professor of civil engineering at Rutgers University. For the next two years, he was a National Research Council research assistant at the National Bureau of Standards. In 1968, he joined NRL as a fracture mechanics consultant. He worked under Dr. J. Kraft, widely known expert on the dynamic deformation of aluminum alloys.

Transferring in 1971 to NRL's

Dr. L. Raymond Hettche

Thermomechanical Effects Section, Dr. Hettche initiated a research program in an emerging area of interest to the Navy: the response of materials to radiation. Over two years, he and his colleagues developed many innovative experimental and analysis techniques for investigating such phenomena. Their efforts grew into a major NRC program.

Dr. Hettche, who was appointed head of NRL's Micromechanical Branch in 1973, directed research programs and pursued his own research on the response of materials to pulsed laser heating. His significant research findings helped establish NRL as a national leader in the field.

Statewide essay writing contest is set for high school seniors

A casual conversation at a professional meeting has led to the establishment by the University of a statewide essay-writing contest for high school seniors.

Provost Eddy struck up a conversation with a headmaster at a leading Pennsylvania high school who lamented the demise of the *Atlantic Monthly* awards for superior high school writing.

"The awards were highly prized by students," Dr. Eddy said, "and had been credited with providing incentive to many students, not only to improve their writing, but to go into a career in writing. The headmaster suggested that this kind of endeavor was something a university might consider."

Following his return to Penn State, Dr. Eddy passed on the idea to Dr. Wendell V. Harris, chairman of the English Department, and offered to make \$1,500 available from the Fund for Academic Excellence for basic expenses and prizes.

The English Department obtained the joint sponsorship of the Pennsylvania Council of Teachers of English and seniors who will graduate in 1982 currently are being nominated by their high schools for the contest.

Dr. John Harwood, director of

composition at Penn State, said the contest is designed to encourage high school students in their writing and to recognize publicly some of the best student writers in the Commonwealth.

Ten finalists, who will be identified in March, 1982, will be recognized at University Park. The author of the best essay will receive an honorarium of \$100; the authors of the second- and third-place essays will receive \$75 and \$50, respectively.

According to Dr. Harwood, seniors nominated by their high schools will be asked to write an impromptu essay on a predetermined topic in one hour or less under the supervision of one of their teachers.

The high schools will then submit the essays—without revision—up to Penn State, where they will be judged by experienced teachers of composition from the University and PCTE.

"The new Penn State Award in Writing is exciting," Dr. Eddy said. "It could be an effective means not only of emphasizing the strategic necessity of good writing at the high school level, but also of recruiting superior students to Penn State."

Fraternities support numerous charities

Fraternities at University Park raised \$163,954 for charity and completed 10 community service projects during the 1980-81 academic year, reports George R. Severine, public relations chairman of the Interfraternity Council.

Mr. Severine notes that the figure, tabulated by the Office of Associated Student Activities, includes \$83,000 raised in the annual IFC-sponsored dance marathon for the Hershey Medical Center's Four Diamonds Fund.

Remaining funds were raised by various events sponsored by individual fraternities, sometimes in conjunction

with sororities. These include the Sy Barash Regatta, which raised \$19,000 for the American Cancer Society, and the Phi Psi 500, which brought in \$32,000 for Centre Community Hospital.

Fraternities also completed a wide range of community service projects, including an environmental clean-up project of Spring Creek, a Halloween party for orphans and disadvantaged children, and contributions of more than 100 pints of blood to the Red Cross Blood Drive.

"This year, the number and size of our philanthropic events are expected to continue to grow," Mr. Severine says.

Lehman to retire

(Continued from page 1)

For 26 years, Mr. Lehman and his wife, Katey, who passed away in January, wrote a popular daily column for the *Centre Daily Times*, "Open House," a warm and friendly look at home and family life, repeatedly won Keystone Press and Freedoms Foundation awards.

The Lehmans often wrote about their four children: Joanna, Kathryn, Amy and Ross.

Mr. Lehman helped his predecessor in the Alumni Association, Ridge Riley, establish the Penn State Foundation and the University's Alumni Institute and Alumni Fund. He has been active in the programs of the nearly 130 alumni clubs throughout the United States.

In 1973, he and his associates initiated an Alumni Fellows program, through which outstanding alumni return to campus to share their insights with students and faculty members. An honorary alumnus award and the two-week alumni vacation college, with lectures and programs by Penn State faculty members, also have been established in recent years.

The first Alumnae Day Program, a day of lectures on topics of special interest to women, was held in 1979.

"Our alumni programs have flourished, not because of me, but because of the insight and perception of University administrators and faculty members and because we have such excellent alumni on our Alumni Council," Mr. Lehman said. "It's a total effort. It's a family effort, actually."

An ardent family man, Mr. Lehman has often compared residents of the towns in which Penn State campuses are located to an extended family for students. In a 1961 *Open House* column he wrote:

"We, as townspeople, should feel proud of the products of Penn State... I don't believe we understand, sometimes in our busy lives, the strategic, individual, personal, vital role we play in the lives of these alumni. It is unique and wonderful."

Mr. Lehman was secretary of the Lions Paw Alumni Association and adviser to the Lions Paw student group for many years. Since 1970, he has been chairman of the University's Freshman Scholarship Committee.

Pianist and quartet featured in concert

The Alard String Quartet will be joined by pianist Steven Glaser, new faculty member in the School of Music, for a concert at 8:30 p.m. Wednesday, Nov. 4, in the Music Bldg. recital hall.

The first number selected for the program is Beethoven's String Quartet in C Minor, opus 18 No. 4. The Alard Quartet will also perform the String Quartet, Opus 8 by Kurt Weill—the only quartet written by the composer, who was best known for theatrical works such as "The Threepenny Opera," "Mahogany," "Street Scene" and "Down in the Valley." Written in Berlin when the composer himself was 23 years old, the piece is very representative of the expressionistic style.

The final number on the program, featuring Mr. Glaser, will be Schumann's Piano Quintet in E-flat, opus 44.

The Alard String Quartet is composed of violinists Joanne Zagst Feldman and Donald Hopkins, violist Raymond Page and cellist Leonard Feldman. All are associate professors in the School of Music.

Mr. Glaser, who received his B. Mus. degree with honors from the University of Michigan and his M. Mus. degree from Juilliard, has performed throughout the New York area and in Chicago, Washington, and in Israel as part of a

Steven Glaser

14-concert tour of the country. He has served on the faculty of C.W. Post College, the Pre-College Division of Juilliard and the Usdan Center for the Performing Arts. He is an instructor in the School of Music.

The concert, sponsored by the School of Music, is free and open to the public.

Poet-editor Sydney Lea to read from his works

Poet Sydney Lea, founding editor of *The New England Review*, will read from his own works at 3:30 p.m. Thursday, Nov. 5, in the Rare Book Room of Pattee Library.

Mr. Lea is author of two books of verse: *Searching The Drowned Man* (1980) and *The Floating Candles*, to be published in 1982. The latter work is also a Lamont nominee. He published a critical study, *Gothic to Fantastic*, in 1980.

His poems have appeared in *The New Yorker*, *Antaeus*, *The New Republic*, *Virginia Quarterly* and other magazines and journals. His essays and reviews have appeared in *Elhi*, *Parnassus*, *The New Republic* and *Studies in Romanticism*.

He has been a Bread Loaf Fellow and a Fellow of the Robert Frost Festival in Franconia, N.J., and has taught at Dartmouth, Yale and Middlebury.

Mr. Lea's visit is sponsored by the Institute for the Arts and Humanities Studies, the Department of English and Pattee Library, with funding from the Pennsylvania Council on the Arts.

Energy grants

(Continued from page 1)

1.7 years.

In other action, the committee approved of a publicity effort with the University's Office of Public Information and Relations to raise public awareness of energy and water conservation attempts, and their validity.

"It's estimated that 50 to 60 percent of the University's potential energy and water savings must come from voluntary accommodations and small sacrifices by the total University community," Mr. Zilly said. "So we want people to know what the University is doing to conserve, and how they can help."

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Keller gets new sculpture

A bronze sculpture piece by Sigrid Christensen, assistant professor of art, has been installed on the plaza in front of the J. Orvis Keller Bldg.

The sculpture, entitled "Gruppo Uno," was selected by Continuing Education in a competition sponsored for sculptors in the School of Visual Arts. The piece was installed with the support of undesignated funds from the Office of Gifts and Endowments.

The sculpture was cast in bronze in 1970 when Ms. Christensen was a second year graduate student at the Villa Schifanoia in Florence, Italy. It was shipped to this country in 1974 and has been on loan at the University of Pennsylvania's Wharton School of Business since 1975.

Ms. Christensen received her B.F.A. from the Rhode Island School of Design and her M.A. and M.F.A. degrees, in art history and bronze casting, from the Villa Schifanoia.

She also has taught at Rhode Island College, the University of Bridgeport in Connecticut, Carnegie-Mellon University and the University of California, Stanislaus, at Turlock.

University personnel install this bronze sculpture by Sigrid Christensen, "Gruppo Uno," on the plaza in front of the J. Orvis Keller Bldg.

New Liberal Arts minor-option is blossoming

The new professional skills minor-option for Ph.D. candidates in the College of the Liberal Arts, begun last winter, promises to blossom in its first full year of operation.

"We believe the program will help to make liberal arts doctoral students more attractive to employers outside academe

or, if they work within a college or university, more effective teachers and researchers," says Dr. John B. Smith, program director.

The professional skills minor-option is a one-year program (15-18 credits) that seeks to expand and develop the

analytical, research and communication skills of doctoral students. Although designed primarily for those in the liberal arts, it is open to doctoral students in any University program.

"Ph.D. students typically concentrate on the substance of their discipline, often overlooking the analytical, research and communication skills acquired en route," Dr. Smith, associate professor of English, says.

"These skills form the core of a number of professional activities in private industry, government agencies, research and consulting firms. By focusing on each skill separately, students will enlarge the areas in which they can apply the skills."

"More important, they will be strongly encouraged to think of themselves not only as students of literature or of history, but as individuals prepared to examine problems systematically and to work with others in finding solutions."

According to Dr. Smith, programs designed to make liberal arts students more marketable usually employ more business courses.

"The professional skills minor-option provides greater flexibility," he notes, "and, we hope, will provide our students with a wider range of opportunities."

Persons seeking further information should write Dr. Smith in care of the professional skills minor-option, 105 Sparks Building, University Park, PA 16802.

Labor Studies plans special conference

The Department of Labor Studies will hold a special conference, "Union Responses to Changing Environments: Corporate Structure, Technology and Public Policy," Thursday, Nov. 5, and Friday, Nov. 6, at the Keller Conference Center.

Topics will include: "The Impact of Technological Change on Union Organizing and Collective Bargaining," "Technological Change in the Office Workplace and Implications for Organizing" and "The Auto Crisis and the Union's Response." Speakers from the research departments of various international unions and representatives from the AFL-CIO will participate.

Anyone interested in further details can contact Donald Kennedy, Department of Labor Studies, 865-5425.

Speaker set for lecture series

Dr. Peter M. Rentzepis, head of the Physical and Inorganic Chemistry Research Department at Bell Telephone Laboratories, will present the 1981-82 series of Whitmore Lectures on Nov. 2, 3, 4, and 5.

His talks are entitled, "Picosecond Spectroscopy," "The Dynamics of Chemical Reactions," "Electron Transfer," and "Proton Transfer." All will be held in 333 Whitmore Laboratory. The Nov. 2 lecture will be given at 8 p.m., the others at 11 a.m.

In addition to his post at Bell Labs, Dr. Rentzepis is an adjunct professor of chemistry and biophysics at Yale University and adjunct professor of chemistry at the University of Pennsylvania.

He is the creator of the field of picosecond spectroscopy where he uses ultra-short laser pulses to supply picosecond bursts of energy and advanced detection systems to study very short-lived first events of key chemical and biological reactions. He has used this technique to explore problems in energy transfer, spectroscopy, photochemistry, and chemical kinetics among others.

Dr. Rentzepis will receive the Peter Debye Award in Physical Chemistry at the March, 1982, national meeting of the American Chemical Society. He also has been honored with the Langmuir Prize in Chemical Physics in 1973 and the A. Cressy Morrison Award of the New York Academy of Sciences in 1978. A member of the U.S. National Academy of Sciences, he was honored in 1980 with the Leadership in Science and Education award of the Greek National Academy.

Born in Greece, Dr. Rentzepis was naturalized as a U.S. citizen in 1965. He earned his Ph.D. degree at Cambridge University in 1963 and joined Bell Labs the same year. Currently, he has about 175 publications and more than 30 patents to his credit.

The Whitmore Lecture series was established in 1976 to honor the late Frank C. Whitmore, distinguished chemist and dean of the School of Chemistry and Physics, forerunner of the College of Science.

Conversion Council studies renumbering

The Calendar Conversion Council has appointed a committee to explore the issue of course renumbering. The committee is to either make a renumbering proposal or recommend that the issue be dropped.

The Council, at its Oct. 8 meeting, heard a report from the Faculty Contracts Committee which is continuing to explore options on a contract system that would apply to faculty hired after a new system was put in place. It was reported that the committee is not considering any proposal for conversion of faculty currently on a contract other than 'M' to the 'M' contract or its equivalent.

The Council also heard a report from the Standing Summer Session Committee whose subcommittees are considering the academic and programmatic objectives of the new summer session, budgetary and fiscal questions, and the administration and management of the session.

In other business, Council:

— Received recommendations from Chairman Bartoo for a General Education Task Force and for some flexibility in baccalaureate degree requirements in conjunction with the calendar conversion. The recommendations are to be discussed at the Council's Nov. 5 meeting.

— Heard a report from the Class Schedule Committee on the Block 45 class schedule which will be featured in detail in an upcoming edition of INTERCOM.

Ceramics show set at Museum

The exhibit, "Danish Ceramic Design," will continue on display at the Museum of Art through Jan. 24.

Denmark, a small country with many fine studio potters, is represented in the exhibit by some of its best recent work. Included are many internationally known masters of Danish modern design: Gertrud Vasegaard, Lisbeth Munch-Petersen, Gudrun Medom Boech, Richard Kjaergaard, and Edith Sonne Bruun.

The work of potters little known outside of Scandinavia also is included as are examples of country potters mainly concerned with the production of domestic wares.

The consistent high quality of design of these pieces, whether from the hands of world-class potters or from potters concerned with objects for everyday use, has been a focus in the selection of the exhibition. Decorative quality too, from plain glazes to complex patterns and textures, is explored for its integration to form.

The Museum's own fine collection of ceramics led to the interest in the exhibition. Following the show's closing, a selection of works will travel to the Currier Gallery of Art, Manchester, N.H.; Davis & Langdale Galleries, New York, and the University of Minnesota at Minneapolis.

This porcellaneous stoneware is in the "Danish Ceramic Design" exhibit

Roy Vollmer's "Housetemples I," recently exhibited at Yale University

Architecture entries

Roy Vollmer designs selected for display in major exhibits

Several designs by Roy Vollmer, associate professor of architecture, have been selected for display in two major national exhibitions.

Mr. Vollmer's entry in the Vietnam Veterans Memorial Design Competition will be on exhibition at the Octagon House in Washington, D.C., during November and December. His design, "Housetemples," was one of six projects in an exhibition entitled "An Ideology for Making Architecture" on display at the Yale School of Architecture in New Haven through Oct. 22.

Mr. Vollmer's entry in the design competition is one of 46 meritorious designs to be selected, along with 18 award winners, for permanent exhibition by the Vietnam Veterans Memorial Fund. Plans are underway for the exhibition to travel to other cities after it leaves the Octagon House.

The Vietnam Veterans Memorial Fund, a non-profit organization based in Washington, was formed in 1979 with the purpose of establishing a national memorial in Washington to honor American veterans of the Vietnam War.

In all, 1,421 designs were submitted to the Fund's competition, making it the largest competition for an actual project in United States history. The winning design, submitted by Maya Ying Lin, an architecture student at Yale University, will be located in Constitution Gardens near the Lincoln Memorial.

Mr. Vollmer describes his entry as follows: "The memorial is placed on axial alignment commemorating the sunset

anniversary date for withdrawal of U.S. combat units. The memorial form and axiality is reminiscent of ancient burial mounds depicting the rising and setting of the sun, nature's life cycle. The linear and axial concept of the memorial expresses repetition and eternal duration.

"The structure consists of a base four hundred feet long out of which rise 30 white marble-faced slabs, on which the names of the dead and missing are inscribed; approximately 1,000 names on each facade. At night, the slabs may be lighted from recessed troughs giving the whole assembly a luminous presence and spiritual quality."

"Housetemples" and the other five projects in the Yale exhibition reflected some of the architectural themes of the late Louis I. Kahn. Mr. Vollmer studied under Mr. Kahn when he was working on his master's degree in architecture at the University of Pennsylvania's Graduate School of Fine Arts. He also worked in the architectural offices of Louis I. Kahn, Philadelphia and Dacca.

Concerning his design, Mr. Vollmer says: "The Housetemples Series of drawings and models is a work about origins and evolution in making architecture. It is a pedagogical exercise making allusive reference to the primitive hut evolving into its idealized form, the temple. The didactic nature of this work, concerning the generation of form, illustrates fundamental principles about the division of space and combining of building elements."

Pilobolus Dance Theatre will give performances in Eisenhower

The Artists Series will present Pilobolus Dance Theatre on Friday, Nov. 6, and Saturday, Nov. 7, at 8:30 p.m. in Eisenhower Auditorium. The Friday evening performance is part of the Theatre/Dance Series and is sold out by subscription. The Saturday evening performance, which will consist of a different program, is a Performing Arts event.

The 1981/82 performing season marks the tenth anniversary of Pilobolus Dance Theatre. The Company was founded by Moses Pendleton and Jonathan Wolken, who had met in a dance class given by Alison Chase while they were undergraduates at Dartmouth College. They were soon joined by Robby Barnett and Lee Harris, also former students of Ms. Chase. Within a year of its founding, Pilobolus had evolved into a completely self-sufficient organization — its programs choreographed, danced, managed, and publicized by the four men.

Within two years of its founding, Alison Chase and Martha Clarke joined Pilobolus. Michael Tracy replaced Lee Harris in 1974 and since 1978 the Company has been expanded to ten dancers. (Martha Clarke left the Company in 1978.) Pilobolus is based in Washington, Conn., where most of the members make their homes.

Pilobolus takes its name from a genus of phototropic fungi. This unusual and creative group of artists is known for its energy, originality, and humor, and for its unusual way of working. Pilobolus choreographs most of its pieces collectively, without an artistic director. This collaborative process has proved to be the creative mainspring of the group.

Pilobolus received the Scotsman Award in 1973 for performances at the Edinburgh Festival, the Berlin Critic's Prize in 1975, the New England Theatre Conference Prize in 1977, and the Award for Excellence in the Arts by the Connecticut Commission on the Arts in 1981. The Company has been the recipient of numerous commissions from the

American Dance Festival, and members of the Pilobolus have choreographed new works for other major dance companies, both in the United States and in Europe. In 1980 the Company was commissioned by the Fine Arts Committee of the 1980 Winter Olympics to choreograph and perform a new work at the Olympics, in Lake Placid, New York.

Television credits for the Company

includes segments for "Sesame Street," and in 1977 and 1980 PBS devoted hour-long "Dance in America" programs to Pilobolus. Other television work consists of features for the French, Danish, Canadian, and Bangladeshi national networks. They have toured extensively in the United States and Europe, and in Canada, Mexico, Central and South America, Scandinavia, the

Mid-East and Japan. The United States State Department has sponsored the Company in Portugal, Turkey, Afghanistan, Spain, and the Indian subcontinent.

Tickets for the Saturday evening performance will be on sale at the Eisenhower Auditorium box office, 9:00 a.m. to 4:00 p.m., beginning Tuesday, Nov. 3.

Pilobolus Dance Theatre will perform in Eisenhower

University Park Calendar

October 29- November 8

Special Events

Thursday, Oct. 29

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Friday, Oct. 30

Helen Eakin Eisenhower Chapel 25th Anniversary Celebration, 11 a.m., All-Faith Chapel. Craft Demonstration, 11:30 a.m., Kern Lobby Commonsplace Theatre, *Love and Death*, 7 and 9 p.m., Room 112 Kern. Cinematheque Film, *Alien*, 7 and 9:15 p.m., Room 10 Sparks Bldg. Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

CSA Coffeehouse, 8 p.m., Room 102 Kern. Artists Series, Gregory Allen, pianist, 8:30 p.m., Schwab Auditorium.

Sports: soccer vs. Fairleigh Dickinson, 7:15 p.m.; Women's volleyball, Penn State Classic.

Saturday, Oct. 31

Chinese Student Association film, 1:30 p.m., Room 112 Kern.

CSA, Halloween Party, 6:30 p.m., Rooms 101, 102, 104 and Lobby, Kern Bldg.

France-Cinema, Bergman, *Wild Strawberries*, 7 and 9 p.m., Room 112 Kern.

Cinematheque Film, *Alien*, 7 and 9:15 p.m., Room 10 Sparks Bldg.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Sunday, Nov. 1

Commonsplace Theatre, *Love and Death*, 7 and 9 p.m., Room 112 Kern.

Monday, Nov. 2

Late drop deadline.

Last day to sign Fall Term NDSL and University Long Term Loans, Room 108 Shields.

Campus Colleagues meeting, 4:30-6:30 p.m.; Nittany Lion Inn. Panelists will discuss general election.

France-Cinema, Bergman, *Wild Strawberries*, 7 and 9 p.m., Room 112 Kern.

Tuesday, Nov. 3

Shaver's Creek Environmental Center, Hawk Mountain Trip, 6 a.m.-7 p.m. Registration, 8:05-1851.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Wednesday, Nov. 4

Commons Concert, Chris Lee, noon, Kern Lobby.

Alard String Quartet, 8 p.m., Music Bldg. Recital Hall.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Thursday, Nov. 5

Poetry Reading by Sidney Lea, author of *Searching the Drained Man* and editor of the *New England Review*, 3:30 p.m.; Rare Books Room, Pattee Library. Sponsored by the English Department and the Institute for the Arts and Humanistic Studies.

Commons Film Series, *Myra Breckinridge*, 7 and 9 p.m., Room 112 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Friday, Nov. 6

Cinematheque Film, *Shampoo*, 7 and 9 p.m., Room 10 Sparks Bldg.

Commonsplace Theatre, *Apocalypse Now*, 7 and 9:30 p.m., Room 112 Kern.

Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.

CSA Coffeehouse, 8 p.m., Room 102 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Artists Series, Pilobolus Dance Theatre, 8:30 p.m., Eisenhower Auditorium.

Sports: JV football vs. Indiana (PA), 2 p.m.; soccer vs. Connecticut, 7:15 p.m.; men's swimming, Penn State Invitational; women's swimming, Penn State Invitational; women's fencing, Penn State Open, 9 a.m.; ice hockey vs. Uppsala, 9:15 p.m.

Saturday, Nov. 7

Shaver's Creek Environmental Center, Hawk Mountain Trip, 6 a.m.-7 p.m. Registration, 8:05-1851.

France-Cinema, Truffaut, *Bed and Board*, 7 and 9 p.m., Room 112 Kern.

Cinematheque Film, *Shampoo*, 7 and 9 p.m., Room 10 Sparks Bldg.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Happy Halloween!

Sports: men's swimming, Penn State Invitational; ice hockey vs. Uppsala, 8 p.m.

Sunday, Nov. 8

Shaver's Creek Environmental Center, Moss Hanna Trail Hike, Black Moshannon State Park, 10 a.m.-6 p.m. Registration, 8:05-1851. Commonsplace Theatre, *Apocalypse Now*, 7 and 9:30 p.m., Room 112 Kern.

Sports: women's cross country, NCAA Regional Qualifier, 1 p.m.

Seminars

Thursday, Oct. 29

Ceramic Science 500 Seminar Series, 11 a.m., Room 301 Steidle Bldg. Dr. T.M. Besman, Oak Ridge National Lab, on "Thermodynamic Measurements of Oxycarbide Nuclear Fuel Materials."

Analytical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Dr. Robert DeVliege, Georgetown University, on "AC Methods in Electrochemistry."

Anthropology Colloquium, 3:30 p.m., Room 107 Carpenter Bldg. Ellen Woolford, assistant professor of anthropology and linguistics, on "Generating the Set of Possible Human Kin Term Systems."

Aesthetics, Literary Criticism and Interpretation Theory Seminar, 3:45 p.m., Gilpin Room, Nittany Lion Inn. Brent Wilson, Art Education, on "The Genesis of Aesthetic Response and Artistic Style: Puzzles and Prospects."

Physics Colloquium, 3:30 p.m., Room 117 Osmond Lab. S. Fleming, University Museum, University of PA, on "Physical Science Techniques Applied to Art."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Leon Petrakis, Gulf Research and Development Co., on "ESR Studies on Coal."

Bioengineering/Nuclear Engineering Seminar, 4 p.m., Room 206 Hammond Bldg. Alan Jacobs, head, nuclear engineering department, University of Florida, on "NMR Imaging."

Friday, Oct. 30

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Lakshman Yapa, associate professor of geography, on "The Vulnerability of American Agriculture and What Some People Are Doing About It."

Monday, Nov. 2

Entomology Seminar, 4 p.m., Room 204 Patter-

son Bldg. Ms. Sherie Coolidge, Chevron Chemical Company, on "Training as an Entomologist for a Career in the Chemical Industry."

MC3B Seminar, 4 p.m., Room 101 Althouse Lab. Dr. Donald S. Berns, director, Physical Chemistry Laboratories, The Governor Nelson A. Rockefeller Empire State Plaza, on "Phycocyanin Structure and Function."

Tuesday, Nov. 3

Office of Religious Affairs, "Forum on Faith," 12:30-2 p.m., Main Lounge, HUB. Dr. Rustum Roy, Evan Pugh professor of the solid state and geochemistry, on "Strengthening Your Faith Through Insights from Science. Bring a bag lunch."

Economics Seminar, 3 p.m., Room 101 Kern Bldg. Robert E. Weintraub, senior economist, Joint Economic Committee, on "Deficit Spending and Inflation."

MC3B Seminar, 4 p.m., Room 101 Althouse Lab. Dr. Donald S. Berns, director, Physical Chemistry Laboratories, The Governor Nelson A. Rockefeller Empire State Plaza, on "Chlorophyll Containing Photosensitive Membranes as Model Systems."

Genetics Seminar, 4 p.m., Room 111 Animal Industries Bldg. Dr. W.D. Taylor, professor of biophysics.

Thursday, Nov. 5

Ceramic Science 500 Seminar Series, 11 a.m., Room 301 Steidle Bldg. Dr. H.P. Kirchner, Ceramic Finishing, on "Surface Preparation and Properties."

Philo Bldg. Professor Robert L. Folk, Dept. of Geological Sciences, University of Texas, on "Italian Radiolarian Cherts and Opals: Pentidol or Abyssal?"

Physics Colloquium, 3:30 p.m., Room 117 Osmond Lab. P. Mohr, Yale University, on "Lamb Shift in High Z Atoms."

1981 Taylor Lecture in Materials Science, 4 p.m., Room 26 Mineral Sciences Bldg. Dr. Irving Wender, fuel scientist and research professor, University of Pittsburgh, on "Our Energy Outlook through 2000."

Philosophy Colloquium, 4 p.m., Room 220 Willard Bldg. Albert C. Tsingaris, Dept. of Philosophy, on "Truth and Fiction."

Engineering Science and Mechanics Seminar, 4 p.m., Room 214 Hammond Bldg. Dr. P. Keating, Bendix Advanced Technical Center, Columbia, MD, on "Piezoelectricity at the Atomic Level."

Special Acoustics Seminar, 4 p.m., Room 73 Willard Bldg. Dr. Robert I. Hooker, senior lecturer, mechanical engineering, University

of Brisbane, Queensland, Australia, on "High Damping Metals."

Friday, Nov. 6

Geography Dept. Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Hans Panofsky, Evan Pugh professor of atmospheric science, on "The Ozone Layer."

Geosciences Colloquium, 3:45 p.m., Room 101 Kern Bldg. Professor Robert L. Folk, Dept. of Geological Sciences, University of Texas, on "Early Industrial Processes in Iron-Age Palestine: Iron Smelting and Glass Making."

1981 Taylor Lecture in Materials Science, 4 p.m., Room 112 Kern. Dr. Irving Wender, fuel scientist and research professor, University of Pittsburgh, on "Oil and Coal: Direct and Indirect Liquefaction Routes."

Exhibits

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m.; Sunday, noon to 11 p.m. Jack Troy, ceramics; Shirley Sturtz, drawings and watercolor; Bill Davis, drawings and watercolor.

Museum of Art: open 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m. Oriental Works from the Museum's Collection. Danish Ceramic Design.

Pattee Library: A Commonwealth Campus Yesterday, Today and Tomorrow, opens Oct. 29, East Corridor Gallery. Cheryl King, drawings and paintings, opens Oct. 30, Lending Services Lobby. Seventy-one Percent of the World as Interpreted through Maps, Poetry, and Art, Second Floor East. Highlights from the Allison-Shelley Collection, through Oct. 30. Trade Union Memorabilia: An AFL-CIO Centennial Exhibition from the Collection of Edward Rosney, through Nov. 1. The Academy of St. Luke, Rome: Architectural Treatises and Perspective Books, opens Nov. 8. Rare Books Room.

Visual Arts Bldg. Zoller Gallery
Gallery Hours: 9 a.m.-5 p.m. Monday through Friday, Saturdays, and Sundays, noon-5 p.m. Tony Ray-Jones, photo exhibition, opens Nov. 1.

Inventions Gallery of Photography, 212 Arts Bldg.
Gallery Hours: Sunday and Tuesday, noon-5 p.m. Thursdays, 7-10 p.m. Virginia Behan, photography.

Penn Staters

Dr. Stephen J. Beckerman, assistant professor of anthropology, presented a paper, "Optimal Foraging with Food Sharing as a Resource Management Technique: The Bari," at the 50th annual meeting of the International Society for Tropical Ecology in Bhopal, India. Dr. Beckerman's presentation was made possible through a grant from the Smithsonian Office of Fellowships and Grants.

Dr. G. P. Patil, professor of mathematical statistics, has been chosen to participate in the 1981-82 Visiting Lecture Program in Statistics sponsored by the Committee of Presidents of Statistical Societies which includes the American Statistical Association, Institute of Mathematical Statistics and Biometric Society. Dr. Patil is one of ten specialists selected to lecture

on statistical ecology and distribution theory.

Earlier this month, Dr. Patil presented an invited colloquium at the Biostatistics Department of Harvard University. He discussed "Multimodal Modeling and Analysis of Ecological Data on Abundance and Recruitment."

Dr. David L. Pearson, associate professor of biology, presented invited lectures at four South American universities. He discussed his research on insect community structure in deserts and tropical lowland forests at Universidad Mayor San Antonio in Cusco, Peru; Universidad Mayor San Marcos and Universidad Cayetano Heredia, Lima, Peru; and Universidad Catolica, Quito, Ecuador.

Dr. Robert A. Schlegel, assistant professor of molecular and cell biology, presented an invited paper at the International Titisee Conference on Fusion and Implantation in Biological Membranes in Titisee, Germany. The paper was entitled, "Diffusion of Membrane and Cytoplasmic Macromolecules Introduced into Mammalian Cells by Lectin-enhanced PEG-induced Fusion with Erythrocytes."

The late **John C. Snowdon** has been posthumously named a Fellow of the American Society of Mechanical Engineers. The Fellow grade is conferred upon a member who has had at least ten years active engineering practice and who has contributed significantly to the field of engineering.

From 1961 until his death July 9, 1980, Dr. Snowdon was professor of engineering research at the Applied Research Laboratory. In this capacity he served as a principal investigator on U.S. Naval contracts and guided graduate students in the field of shock and vibration.

Prior to joining ARL, Dr. Snowdon worked in the field of shock and vibration at the Philco Corporation, the University of Michigan Research Institute and Hawker Siddeley Aviation Ltd, England. He pioneered in the realistic analytical treatment of the dynamic properties of rubber-like materials and of structural damping.

Promotions

Staff Exempt

Donna J. Lucidi to assistant extension agent in Agriculture.
Rebecca L. Peplinski to administrative assistant in Agriculture.
Nancy J. Sheal to medical social worker I at Hershey.

Staff Non-Exempt

Susan M. Bедger to neurophysiology technician at Hershey.
Joan B. McGwire to senior research technician at Hershey.

Clerical

Carol M. Stickell to secretary B in Earth and Mineral Sciences.

Technical Service

Leon Fetterolf to electronics technician A in Engineering.
Mary Joan Mitchell to food preparer B at Altoona.
Paul Petyak to storekeeper in Earth and Mineral Sciences.
Arthur R. Rhoades to laborer-helper utilities piping in Physical Plant.
Hannah E. Wheeler to laboratory attendant A at Hershey.
Stephen M. Yambor to building maintenance worker in Student Affairs.

Obituary

Dr. Joseph F. Krawiec, associate professor of clothing and textiles who retired in 1969 after 31 years of service, died Oct. 18. He was 72.

Dr. Krawiec received B.S. and M.S. degrees at the University and in 1936 was named an instructor in textile chemistry, in charge of developing a new statewide institutional laundry program.

From 1950 to 1952 he was employed by

the U.S. Air Force, to establish a laundry and dry cleaning branch of the Air Materiel Command. He also was consultant for Air Force base laundries and dry cleaning plants throughout the world.

On his return to Penn State, he again assumed charge of the institutional laundry program in the College of Human Development. In 1954 he received a doctoral degree in education and chemistry from Penn State.

Bookshelf

Dr. Wendell V. Harris, professor and head of the Department of English, is the author of *The Omnipresent Debate: Empiricism and Transcendentalism in Nineteenth-Century English Prose*, a 300-page book published by Northern Illinois University Press.

In the nineteenth century, philosophical speculation fell into a sustained conflict between the empiricists and the transcendentalists. Dr. Harris analyzes the tenets and implications of the conflicting philosophic orientations and shows how they informed the intellectual life of the time.

Taking as prototypes Coleridge and James Mill, Dr. Harris explores the philosophic implications of the two great modes of thought as they extend into such practical issues as theories of mind, government, religion, morality, education and aesthetics. On specific issues, the implications of empiricism and of transcendentalism are shown to be more tightly argued than the general rubrics for the philosophic stances might suggest. The study explores the ramifications of the two views in the writing of Beethoven, Carlyle, John Stuart Mill, Southey, Ruskin, Arnold, E.S. Dallas, Vernon Lee, Oscar Wilde and others.

The Omnipresent Debate is the first major study to focus on these central philosophic attitudes and to trace the depth and breadth of their expression in nineteenth-century prose. Establishing correlations between metaphysics and social doctrines, it provides valuable insights into the rich variety of the century. It concludes with an analysis of the dissolution of the conflict between the system-builders and the cloud-piercers as idealism gave way at the end of the century.

Dr. E. Willard Miller, professor of geography emeritus and associate dean for resident instruction emeritus in the College of Earth and Mineral Sciences, and **Ruby M. Miller**, former map librarian at Pattee, are the co-authors of a three-volume bibliography titled: "Africa: The Third World"; "Northern and Western Africa: A Bibliography on the Third World"; and "Tropical, Eastern and Southern Africa: A Bibliography on the Third World." The bibliographies, which contain more than 2,600 references dealing with the natural resources, economics, government, political relations and social aspects, provide a wide perspective of sources for the African specialist.

25-year chair

"I've enjoyed working at the University better than any place else. I've worked in industry, at four or five places, and there's just no comparison." And **Harold Shope**, mail distribution clerk in Mail Services, has the years of Penn State employment behind him to make that statement. Mr. Shope recently marked his 25 years of service with the University.

He began his career in 1956 working for General Stores delivering supplies to various departments around the University and "filling-in" at Mail Services. Around 1959, he became a mail delivery clerk for Mail Services where he was responsible for delivering mail on campus.

In his present position, Mr. Shope handles a variety of duties ranging from working with metered and nixie mail (incorrectly addressed mail sent to the University from the State College Post Office), handling postage due, insured and registered mail to keeping student, faculty and staff listings up-to-date. An average daily workload might include two large hampers, two to three trays of letters, six or eight bundles of 'flats' (magazines), about 30 packages and films.

Outside his busy job, Mr. Shope hunts, fishes, and rides a motorcycle. He's also a football and baseball fan, who either goes to a game or watches on television every chance he gets. Mr. Shope also belongs to

Dr. E-tu Zen Sun, professor of Chinese history, recently presented an invited paper on "Trends in Chinese Education in the 1911 Period" at the Conference on the 70th Anniversary of the 1911 Revolution, held in Wuhan, People's Republic of China.

Sponsored by the Chinese Historical Association in conjunction with the Chinese Academy of Social Sciences, the conference commemorated the Oct. 10, 1911, uprising led by Sun Yat-sen which ended the 2,000-year-old imperial system in China and established the Republic. The conference held additional activities in Peking and Canton.

Dr. John W. White, professor of floriculture, has won the "Blue Ribbon Award" from the American Society of Agriculture Engineers for his work in greenhouse energy research.

Dr. White was co-winner of the award for a booklet entitled "Greenhouse Energy Conservation, Penn State 1980," which he co-authored with Dr. Robert W. Aldrich, former faculty member who is head of the Agricultural Engineering Department at the University of Connecticut.

The booklet, which has been circulated all over the world, deals with various phases of greenhouse energy conservation and other alternative energy systems. It contains diagrams of energy saving systems and has examples from the field where professional greenhouses used those systems to cut their fuel bills.

Harold Shope

the Howard Fire Company.

Future plans for Mr. Shope include retirement. "I'm looking forward to retiring a year from now in November," he says.

However, his family, as Mr. Shope notes, will still be "pretty well represented on campus." His wife, Minnie, is a maid in East Falls and has worked for Penn State for 18 years. Their two children are University employees. Daughter Susan is a cook at Simmons Dining Hall and their son Kenneth works at the Applied Research Lab.

Mr. and Mrs. Shope are residents of Howard.

Retirements

Dr. Max D. Richards, professor of management, has retired with emeritus

Dr. Max D. Richards

rank after 25 years of service.

Dr. Richards came to the University in 1956 after serving on the faculties of the University of Wichita and the University of Illinois. He also worked as an industrial engineer for U.S. Steel Corporation.

Dr. Richards served as chairman of the Division of Organizational Behavior in the College of Business Administration from 1978 to 1979. He was assistant dean and director of graduate programs from 1967 to 1976. He headed the Division, and later, the Department of Management from 1960 to 1967.

He was awarded the Master of Business Administration program teaching award three times, the latest in 1980. In recent years, he was program director of Penn State's senior Executive Management Program and the Management of Managers Program.

A native of Nova, Ohio, he attended Miami University, Oxford, Ohio, and earned the master of business

(Continued on page 7)

Penn Staters

(Continued from page 6)

administration degree from Harvard. His doctorate was awarded by the University of Illinois.

Dr. Richards has been honored as an elected fellow of the Academy of Management and served as president of that organization in 1967. He also held many other offices within the Academy. He has been listed in *Who's Who in America*, *American Men of Science*, and the *Writer's Directory*, and holds memberships in the Order of Artus (economics honorary), Beta Gamma Sigma (business honorary), and Sigma Iota Epsilon (management honorary).

He is the author of seven books and monographs and numerous papers published in professional journals. Among his books are *Organizational Goal Structures*, published by West Publishing Co. in 1978 and *Readings in Management*, for which he was co-editor of four editions and sole editor of two editions published by Southwestern Publishing Co.

Dr. Richards and his wife, the former Ruth S. Nixon, have moved to Winter Springs, Fla. where he has accepted a position as distinguished professor of management at the Roy E. Crummer Graduate School of Business of Rollins College.

Earl G. Johnston, Dairy Herd Improvement Association (DHIA) records supervisor, retired Oct. 1 after 33 years of University service and 41 years of service to the DHIA.

Prior to coming to Penn State, he worked for the DHIA for five years on the county level in Westmoreland County and had served three years in the Army. Mr. Johnston, who attended Penn State from 1938 to 1941, was appointed to the University staff in 1948 as a district dairy agent, working with milk testing supervisors in the western part of the state. In 1953, he was promoted to assist in dairy husbandry Extension. Mr. Johnston

received his 25-year Service Award chair and certificate in 1973.

The DHIA program aids dairymen in improving their feeding, breeding and management practices. Records of milk production and feeding programs are collected by DHIA supervisors and are summarized by electronic computers.

Although Mr. Johnston has no definite retirement plans, the watch presented to him by the DHIA will help him keep track of his retirement time. In his spare hours, he likes to hunt deer and small game and collect coins, stamps and books on World War II. He belongs to the Grange, V.F.W., Centre County Coin Club, American Philatelic Society and American Numismatic Association.

Earl Johnston and his wife, Kathleen, reside in Pennsylvania Furnace.

Earl G. Johnston

Pearl L. Gurbal, dining hall worker in Housing and Food Services, retired Oct. 17. She had been a University employee since Nov. 24, 1969.

Joseph F. Leon, groundskeeper/landscape in Physical Plant, retired Oct. 2. He had been a University employee since Feb. 1, 1967.

Joseph Palometz, group leader and maintenance worker/utility at the Ogontz Campus, retired Oct. 2 after working for the University since 1971.

their being or having been assureds during this policy period."

Coverage is excluded for any loss arising out of any claim made against any assureds, or the college or university or any of them, based on or attributable to the rendering or failure to render any opinion, treatment, consultation or service if such opinion, treatment, consultation or service was rendered or failed to have been rendered while any person was (a) engaged in any activity for which such person received compensation from any source other than the college or university named in item A of the Declarations or (b) gratuitously engaged other than by specific direction of the college or university named in item A of the Declarations.

The Risk Management office has attempted to provide adequate liability insurance coverage for almost every conceivable exposure confronting the faculty member which can be indemnified through commercial insurance. The Office continually reviews these programs with the University's broker and liability insurance carriers in an effort to provide continuity of coverage.

Questions relating to the University's Liability Insurance Program should be presented to the Risk Management Office, 307 Shields Building, University Park, 865-6307.

New VADD booklet will be distributed

Faculty and staff members who participate in the Voluntary Accidental Death and Dismemberment (VADD) program will receive a new booklet/certificate which describes the program in detail, including the new provisions and lower rates which go into effect on Nov. 1, 1981. The

Equilibrium, consisting of Nancy and Michael Udow, will present its first campus concert tonight.

Duo plans first campus concert

An evening of dance and percussion will be presented by Equilibrium, the duo of Nancy and Michael Udow, at 8:30 tonight in the Music Bldg. recital hall.

The program will consist of a collection of collaboratively composed works. The Udows will perform one of their own works, "Figures," describing it as a piece in which "the character images are vehicles for exploring the rhythmic content of movement, the movement aspect of percussion and the varieties of ensemble between the two media."

Three solo percussion works by Herbert Brann, "Stalks and Trees and Drops and Clouds," "Touch and Go" and "Plot for Percussion" will be included in Equilibrium's program. For these pieces, Dr. Udow will be utilizing the Iliac Computer, the Cal Comp Plotter and the Timbrack, a four "octave" multiple percussion console he designed and built with the aid of a grant from England's Premier Drum Company, Ltd.

Equilibrium will perform "The Moral of

the Story. . . ." by Nancy Udow and Michael Kowalski, a composer-pianist and computer systems designer. The composition uses texts from Grimm's Fairy Tales and the German translation of Beatrix Potter's "Peter Rabbit."

In "666 Scanning," a piece based on a drawing "6x6" by artist Chris Watts, the percussionist interprets Arabic numbers on a grid in the painting, constructing six horizontal, vertical and/or diagonal readings and arranging them in a time sequence.

Ms. Udow, who has been an instructor of dance at the University of Rochester and Dartington College of the Arts in England, currently is involved in the study of sign language and dance instruction for the hearing impaired. Dr. Udow, who teaches percussion in the School of Music, joined the faculty in September as an assistant professor.

The School of Music is sponsoring the performance, which is free and open to the public.

Faculty/Staff Alerts

University outlines insurance provisions

Following is a brief description of the insurance provisions contained in the three major liability insurance programs provided by the University which include all faculty and staff as additional insureds while the individual is acting within the scope of his or her University duties:

General Liability: Provides protection for all bodily injury and property damage claims at all locations and for any operations the University is involved in subject to the listed exclusions. The faculty member benefits from this coverage in the classroom, the lab, on field trips, on contracts; for libel, slander, or for other defamatory or disparaging material, violations of an individual's right of privacy.

Umbrella Liability: Adds additional limits over the basic liability policies such as general liability, fleet liability, employer's liability and broadcasters liability. The coverage provides additional protection for those areas not covered by the primary policies. The same principles apply as in the general liability program as to scope of employment, etc.

Directors & Officers Insurance: Coverage for wrongful acts as defined: "Wrongful Act shall mean any actual or alleged errors or misstatement or misleading statement or act or omission or neglect or breach of duty by the assureds in the discharge of their duties, individually or collectively, or any matter claimed against them solely by reason of

booklets will be mailed in mid-November.

In the event that a faculty or staff member who participates in the program does not receive the new document, he or she may obtain one from the Employee Benefits Division, 133 Willard Building, 865-1473.

Employee pool sought for research projects

The University annually receives grants for projects designed to fulfill specific research responsibilities.

Often the research grant or project is of relatively short or temporary duration. In most instances, University project administrators must react quickly in making selections of support staff personnel for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research support positions.

This announcement is made so that

qualified individuals may make their interests known. The types of temporary research support staff positions typically available are: Senior Project Associate, Project Associate, Project Assistant, Senior Research Technologist, Research Technologist and Research Technician.

The types of discipline backgrounds required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics, chemistry, but are not limited to these areas.

If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you feel that you are interested in and have background related to typical University research projects, you may apply now or in the future for such temporary research support staff positions by calling the University's Employment Div., 865-1387 (network 475-1387).

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Nov. 5, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PF-3) and in compliance with the University's Affirmative

Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

SUPERVISOR, HISTOCOMPATIBILITY LAB, COLLEGE OF MEDICINE, HERSHY Responsible to the manager of the Clinical Laboratories for efficient operation of section within constraints of budgets, staffing, space and equipment. Also, responsible to the director of the Clinical Laboratories (and/or her designee) as outlined by applicable Federal and State rules and regulations for the selection of testing methods, quality control, normal ranges and other technical direction. Bachelor of Science degree, or equivalent, in medical technology plus three (3) years of effective experience in clinical immunology.

English research

(Continued from page 1)

performed play 1660-1710, I had to run down those plays never published but still extant in unique handwritten manuscripts — and teach myself to read the relevant hands. Along the way I found and edited with friends manuscripts of two supposedly "lost" plays, only the second and third such discoveries for this period in the twentieth century. Pursuit of dates for plays took me into the London Public Record Office where bills for royal attendance are preserved, and where I soon discovered that 50 years of research by numerous scholars had by no means exhausted the pay dirt in those chaotic and miserably handwritten records.

So much new material turned up that with a friend at the University of Iowa I was invited to prepare new, vastly expanded editions of the first two parts of *The London Stage* (expanding 2,000 pages of material into perhaps 3,000). In 1976 this seemed like 10 years' work (I now think 20 more realistic), and we set to work.

We are looking for letters, diaries, poems, account books — anything printed or handwritten that will yield new information about performance dates, actors, theatre practices, company finances, audience response. Most of the actual theatre records are lost (wooden theatres burn down), but a considerable amount of detailed information about finances and personnel can be quarried out of lawsuit testimony preserved at the Public Record Office.

Unfortunately, the Chancery lawsuit records are massive, chaotic, and largely uncatalogued. One must also remember that most of the litigants are confused, or lying, or both.

Not two months into the project, we were invited to edit a Manuscript Collection at Harvard from the years 1706-1715 that concerns Vanbrugh's opening of the first Italian opera house in London — a treasure trove of unpublished information including box office reports, orchestra rosters, contracts, angry protests in fractured French by Italian castrati, costume and sundry bills, government orders regulating the theatre, and so forth.

Delight was followed by consternation: Harvard was unaware that it possessed only part of the collection, which had been broken up at auction in 1876. In five years of systematic searching we gradually reconstructed the original collection, finding pieces in ones and twos in libraries and private collections from London to California. The resulting book, *Vice Chamberlain Coke's Theatrical Papers*, will be published this winter — the richest single find of English theatrical manuscripts since the 1920s.

I started out primarily interested in plays as literary texts. Inevitably, I began to see them in terms of the particular actors who mounted them and the particular buildings in which they were first performed. Searching records for dates and information about personnel and finances turned up information about the theatre buildings, and I found myself writing articles about the height and width of proscenium arches, the depth of forestages, the theatres' capacities and scenic resources.

This further changed my view of the plays, and I am now at work on a collaborative book analyzing a number of plays from the vantage point of actual performance, then and now. What were the physical staging capacities of the original theatres? Where did the actors enter and exit, and what did the audience see, stage direction by stage direction? What can we learn by studying other known roles of the original performers? What different meanings — "valid" within the limits of the text — can be achieved by directorial choices?

I have come full circle. Starting as a literary critic, I made myself into a documentary theatre historian, only to discover that I was led back to criticism armed with a new perspective and a whole

Dr. Philip Keeney, head of the Food Science Department, points to the new black cherry ice cream, "Cherry-Quist," created in honor of Dr. John O. Almqvist, professor of dairy physiology, who samples the first cone.

Ice cream named for Almqvist

For years, John Almqvist has been going to the Penn State Creamery to buy his favorite black cherry ice cream. Dr. Almqvist likes the ice cream so much that Phil Keeney, head of food science, often calls him when the ice cream is available. Last week the ice cream was the same, except for the name — "Cherry-Quist." "Cherry-Quist" is the creation of Dr. Keeney in honor of Dr. Almqvist being named a 1981 Wolf Foundation Award recipient. The honor, one of the highest ever awarded a Penn State professor, has been called the "Nobel Prize for Agriculture."

"It all came about naturally," says Dr. Keeney. In a congratulatory memo to Dr. Almqvist, Dr. Keeney wrote, "What does it say about all of us when it takes someone from afar to uncover an asset that has been lingering here for decades?"

He added that he "would crank out a

special cherry ice cream, the J.O. Almqvist Commemorative Ice Cream."

Word of the idea spread and a small contest ensued to name the new ice cream. Dr. Keeney's suggestion was ruled out because it was too long to fit on a rubber stamp. Other ideas included "JOA Special," "Almqvist Delight," "Bull Cherry," and "John's Special."

"Cherry-Quist" won because of its originality.

With the media there to record the event Dr. Almqvist was presented the first "Cherry-Quist" cone.

In March, 1982, he will travel to Israel to accept the Wolf Foundation Prize before the Israeli Parliament, the Knesset.

The award carries with it a prize of \$100,000 which Dr. Almqvist will share with two other Americans. Dr. Almqvist is being honored for his pioneering research in artificial insemination.

Publications Office receives design awards

Four publications produced by the Department of Publications have been cited by University and College Designers' Association for their excellence.

Winners in the association's annual nationwide contest are: All That Is Glorious Around Us, a catalog for the

Museum of Art, designed by Rick Villastrigo; Hemline, Neckline, Streamline, also for the Museum, designed by Gretl Magadini; Bioengineering, a recruitment brochure, and Pennanna, an inaugural booklet, both designed by Larry Krezo with photographs by James Collins.

Bioengineering won a silver medal and the three others received awards of merit.

new set of interpretive techniques. I had never intended to give up criticism but no more would I now wish to give up historical research.

There is a special fascination to dealing with fact, and there is no excitement quite like unearthing a handwritten copy of a play believed lost, or a manuscript which fills in some blank in our knowledge of the theatres and the way they operated. I never open even a printed book from the period without hoping for a discovery. Just last winter one of my graduate students found a previously unknown eighteenth-century cast for Vanbrugh's

The Mistake handwritten into a copy of the play in the Pattee Rare Book Room.

This sort of scholarship has its frustrations. The material is scrappy, hard to find, hard to read, and often impossible to see any immediate use for. But in 10 years I have seen our factual knowledge of the Restoration theatre expand in a fashion no one dreamed possible, and I am convinced that many more discoveries are still to come. When I was in graduate school in the late 1960s, I was told that the Restoration theatre history was worked dry. Not quite.

Renaissance dinner to honor Roy Wilkinson

Justice Roy Wilkinson Jr., long active in civic and humanitarian concerns, will be honored at the fifth annual Renaissance dinner Wednesday, Nov. 18. The event will benefit Penn State's Renaissance Fund, which provides scholarship aid for "the brightest among the neediest" of the University's students.

"Roy Wilkinson is a truly outstanding human being," former Pennsylvania Governor Raymond P. Shafer, who has been active in previous Renaissance dinners, said recently. "He has brought, and brings, intelligence and integrity to his every undertaking and to every aspect of his outstanding career, as a lawyer, an original judge on the Commonwealth Court and now justice of the Pennsylvania Supreme Court. I am proud that we are friends."

Gov. Shafer, in 1970, selected Justice Wilkinson to serve on Pennsylvania's Commonwealth Court, then being created to assist the state's Superior and Supreme courts. Last year, Gov. Thornburgh appointed him to the state's Supreme Court, filling the vacancy created by the retirement of Chief Justice Michael J. Eagen.

The Renaissance program, over the past 11 years, has raised almost half-a-million dollars for needy scholars in medicine, science, art, business and other fields. The fund aids some 100 students each year.

The scholarships — \$750 per student per year — go to young people who have shown intellectual promise but who lack the financial resources to pay for their own education. According to organizers of the dinner, Justice Wilkinson is being honored, in part, for his many contributions to young people.

Born in Philipsburg, he went to school in Bellefonte and was a 1936 graduate of Penn State. He graduated cum laude from the University of Pennsylvania Law School, where he distinguished himself as editor of the law review. For 24 years, Justice Wilkinson, in law partnership with John C. Love in Bellefonte, provided legal counsel to Penn State. The first president of the Pennsylvania Council on Crime and Delinquency, he has served on many committees — and the board of governors — of the state Bar Association. He was president of the Centre County Bar.

For 16 years, Justice Wilkinson was a member of the Pennsylvania State Board of Law Examiners. He has also served on the state's Crime and Education Television commissions and was the first chairman of the State Horse Racing Commission. In 1971, he received the Distinguished Alumnus Award from Penn State.

Previous Renaissance Fund dinners have honored former State College Mayor Jo Hays; Dr. John H. Light of State College; W.K. Ulerich of Clearfield, and former Penn State President Dr. Eric A. Walker.

The Nov. 18 banquet at the Nittany Lion Inn will begin with a cash bar at 6 p.m., followed by dinner at 7 p.m. Tickets cost \$16 per person.

Donations for the Renaissance Fund (which are not required to attend the event) may be made in the following categories: contributor, \$50; associate, \$100; patron, \$200; sponsor, \$500; and angel, \$1,000.

Contributions or requests for tickets may be sent to Mimi Ungar Coppersmith, P.O. Box 77, State College, Pa. Checks should be made payable to the Penn State Renaissance Fund.

Chapel seating limited

Because of limited seating, attendance at the Eisenhower Chapel 25th anniversary observance on Friday, Oct. 30, is by invitation.

Others wishing to attend the ceremony may contact the Office of Religious Affairs, 865-6548.

Penn State Intercom

President decides not to enact recommendation on 'dean's veto'

President Oswald has decided not to enact the Faculty Senate's recommendation to discontinue the so-called "dean's veto" in promotion and tenure decisions.

His decision, based on input from a variety of sources, was made known in a letter to Dr. Nancy M. Tischler, chairman of the Faculty Senate.

On Oct. 6, in a close vote, the Senate agreed to recommend a change in the dean's veto section of PS-23, the University's policy document on promotion and tenure.

The first part of the committee's recommendation to Dr. Oswald focused on promotion and tenure review at the college level, while the second focused on the issue at the Commonwealth Campuses. The recommendation, with

changes or additions to the present policy indicated in *italics*, was as follows:

"... in all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's have been positive, that dean shall meet with the College (or University Libraries) committee and state his or her reasons for the negative decision. If, after consultation with the dean, the College or University Libraries committee feels that further review is warranted, the committee shall forward such cases to the Office of the Provost for transmittal to the University Promotion and Tenure Committee..."

"In reviewing Commonwealth Campus faculty... If the decision is made at the College or University Library level of review not to award tenure, the Dean of the Commonwealth Educational System shall notify the faculty member in writing (see section IV 4): negative promotion decisions do not require such formal notification. *In all cases where the deans make a negative tenure or promotion decision and where all recommendations prior to the dean's have been positive, one of the deans shall meet with the College (or University Libraries) committee and state the reasons for the dean's decision. If, after consultation with the dean, the College or University Libraries committee believes that further review is warranted, the committee shall forward such cases to the Office of the Provost for transmittal to the University Promotion and Tenure Review Committee.*

In his response to Dr. Tischler, Dr. Oswald wrote:

"I deeply respect and value the advice of the Faculty Senate, particularly on matters related to promotion and tenure policies. Nevertheless, I have decided not to enact the Senate's recommendation to discontinue the so-called dean's veto. Since the earliest discussions about PS-23 I have advocated that college deans be empowered to terminate at the college level candidates for promotion and tenure. In September, 1978, I affirmed that view when the Senate offered legislation quite similar to the present recommendation.

"Although I appreciate the concerns behind the Senate's recommendation, there are, I believe, more persuasive counter-arguments and considerations, a

(Continued on page 3)

Faculty Senate meeting canceled

The University Faculty Senate meeting scheduled for Nov. 10 has been canceled by the Senate Council on the advice of the Senate officers.

The number and nature of reports expected for both the November and December meetings can be accommodated at the Dec. 15 meeting.

Nov. 10 will be used, however, as a time for seven of the Senate's standing committees to meet. This will give them an opportunity to do necessary work and to coordinate some actions with other committees. The seven committees are: Academic and Athletic Standards; Admissions, Records and Scheduling; Curricular Affairs; Faculty Affairs; Research; Student Affairs, Awards and Scholarships; and Undergraduate Instruction.

The usual meeting of officers and committee chairmen, held the night before the Senate meeting, also has been canceled, as has the Commonwealth Campus Caucus meeting at noon on Senate day.

Autumn leaves on the steps of the Henderson Human Development Building.

Photo: Scott Johnson

Presidential search group named

Quentin E. Wood, president of the Board of Trustees, has announced the names of 15 people who will serve on the University Presidential Search and Screen Committee.

The committee will play a major role in the search for a successor to President Oswald, who will retire June 30, 1983. The 15 are all faculty and staff members, students and alumni.

Dr. Robert S. Friedman, director of the Science Policy Center and professor of political science, has been appointed committee chairman. Dr. Nancy M. Tischler, chairman of the University Faculty Senate and professor of English and humanities at the Capitol Campus,

has been named vice chairman.

Other members are: Daniel M. Bollag, tenth-term undergraduate student majoring in chemistry; Dr. Carol A. Cartwright, secretary of the University Faculty Senate and acting associate dean for academic affairs in the Commonwealth Educational System; Dr. Herbert Cole Jr., professor of plant pathology; Dr. Joseph A. Dixon, chair-elect of the University Faculty Senate and professor and head of the Department of Chemistry; Edward M. Elias, director of the York Campus.

Dr. Stuart Forth, chairman of the Council of Academic Deans and dean of the University libraries; Dr. George W.

(Continued on page 3)

Winter conference being planned on general education objectives

President Oswald has announced that a Conference on the Objectives of General Education at Penn State, sponsored by the Office of the President, the Office of the Provost, and the University Faculty Senate, will be held this winter at University Park.

The conference program, to be developed by a special steering committee, will be highlighted by an opening plenary session. In the weeks following the plenary session, additional programs and meetings will be organized to promote discussion of general education among faculty members, students and administrators at all University locations.

Quoting a 1977 report from the Carnegie Foundation for the Advancement of Teaching, Dr. Oswald observed that "the curriculum is the major statement any institution makes about itself." Within the

curriculum, he added, general education can be the trademark that makes a university unique.

Courses taken to fulfill general education requirements currently comprise about one-third of the undergraduate student's academic experience at Penn State. Accordingly, Dr. Oswald said, periodic reappraisal of general education should be a high priority.

Dr. Oswald cited several factors that contribute to the need to reconsider the meaning of a Penn State education at this time, including:

- A *Perspective on the '80s* discusses the evolution of general education requirements at Penn State over the past 20 years and encourages a continuous reassessment and improvement of these requirements.
- Changing professional interests of

many students and corresponding changes in programs evoke a reappraisal of the University role in providing a balanced curriculum.

- Consideration must be given to the most effective use of the University's instructional resources, including its personnel, in serving students.

- The entire nation is experiencing a need for greater social cohesion and for a broad base of intellectual literacy, a climate not unlike those that served as catalysts for general education awakenings in the past.

The conference steering committee will be co-chaired by Dr. Oswald, Provost Eddy, and Dr. Nancy M. Tischler, chairman of the University Faculty Senate. The committee has been asked to address seven objectives in the conference agenda and the broader University-wide discussion which follows:

- To stimulate discussion of the broader aims of general education at Penn State — its purpose, goals, and ideals.

- To promote a greater understanding of the functions and character of a general education, in contrast to distribution requirements and credits earned.

- To clarify the distinctive contributions that general education makes to the development of the individual student.

- To explore the premise that there are identifiable qualities that should be attributable to a Penn State graduate.

- To extend the insights developed through the conference to a reconsideration of Penn State's general education program.

- To offer improvements in the incentives and rewards for faculty contributions to general education.

Penn Staters

Dr. George E. Andrews, Evan Pugh professor and head of the Department of Mathematics, presented a series of lectures in India. He spoke at the Indian National Academy of Sciences meeting in Cochin; Matscience Institute in Madras; the Indian Statistical Institute in Calcutta; Lucknow University, and Delhi University.

His talks were all on the "lost" notebooks of Srinivasa Ramanujan, one of the giants of 20th century mathematics. Dr. Andrews discovered Ramanujan's notebooks, which probably represent the Indian mathematician's final work, in a box in Trinity College Library, England, in 1976. While in Madras, Dr. Andrews also met with Ramanujan's widow, who is

now 81 years old, and appeared on the Madras television news program, "Men and Matters."

A large stoneware piece, "Jar of the Snowy Mountain Scroll" by Kenneth R. Beittel, professor of art education and Fellow of the Institute for the Arts and Humanistic Studies, is one of 28 selected works by Pennsylvania artists to be included in a traveling exhibition organized by the American Wind Symphony Orchestra, Wind Orchestra of the Americas, for its 1981-82 concert voyage aboard Point Counterpoint II en route to Jamaica, Puerto Rico, and the Caribbean and South American ports. Dr. Beittel also was invited to be an artist-in-residence aboard the cruise.

Dr. J. Larry Duda and Dr. James S. Vrentas, professors of chemical engineering, have been named co-recipients of the William H. Walker Award of the American Institute of Chemical Engineers (AIChE).

Given annually to a person who has made an outstanding contribution to chemical engineering literature, the award consists of a certificate, plaque and a \$2,000 honorarium from the Monsanto Co.

The award is named for Professor William H. Walker, who graduated from Penn State with a B.S. in chemistry in 1890 and is considered the father of chemical engineering.

Dr. Duda and Dr. Vrentas, the first Penn State researchers to win a major AIChE award, are being recognized for their work in polymer melts and solutions and their general contributions to the understanding of diffusional phenomena.

F. G. Helfferich, professor of chemical engineering, has been appointed editor of a new scientific journal, *Reactive Polymers*. The international journal will cover all aspects of modification of fluid composition through interaction with reactive polymeric substances, both organic and inorganic.

The journal will include, but is not restricted to subjects such as ion exchanges, sorbents, polyelectrolytes, fixed enzymes, and membranes and their use in water and effluent treatment, separations, catalysis, and synthesis as well as environmental, hydrometallurgical, biochemical, biomedical, and pharmaceutical applications.

Dr. James W. Kelz, professor of education and director of rehabilitation programs, recently assumed the presidency of the Pennsylvania Rehabilitation Association.

Dr. Kelz also serves as an elected senator of the American Personnel and Guidance Association. He chairs the Armed Services Committee of the National Vocational Guidance Association.

Dr. Herberta M. Lundegren, interim associate dean for graduate studies and research in the College of Health, Physical Education and Recreation, has received the 1981 Meritt Award of the Eastern Association for Physical Education of College Women.

The award recognizes persons who have given meritorious service to girls and women in physical education through teaching, writing, research and leadership in various organizations.

Paintings, drawings and prints by abstractionist Richard Mayhew, associate professor of art, are on display in the Morgan State University Gallery of Art, in the Carl Murphy Fine Arts Center in Baltimore, through Nov. 6.

Paintings by Wirth McCoy, professor emeritus of art, will be on exhibition in the Student Union Lounge of the Fayette Campus through Nov. 20.

Mr. McCoy, who served as professor and head of art before his retirement from the University, works in acrylic and oil and his paintings are influenced by natural subjects. He holds degrees from the Universities of Minnesota and Iowa and a diploma in painting and design from the Academie de la Grand Chaumiere in Paris.

Three members of the Cooperative Extension Service staff have been named recipients of Distinguished Service Awards presented by the National Association of Extension 4-H Agents. Cited for "outstanding achievements in youth programming" were Harold R. Ott, regional 4-H agent for the Northwest Extension Region; Charles G. Replogle, Allegheny County 4-H agent, and Dr. Jerry H. Reubyn, 4-H curriculum specialist.

Ott, who served one year as regional 4-H agent and 16 years as Erie County Extension agent, initiated a regional 4-H citizenship retreat, 4-H exchange programs, including one with Canada, and three pre-teen exchanges with other Pennsylvania counties.

Replogle provided statewide leadership the last two years for "Citizenship-Washington Focus," an educational experience for teens at the National 4-H Center. He developed an orientation handbook that has been used by more than 300 4-H leaders during the last three years.

Dr. Reubyn, associate professor of forest resources Extension, pioneered 4-H in urban settlement houses, started 4-H physical fitness programs for urban youth, and originated Pennsylvania 4-H projects in riflery, archery, orienteering, and leisure education.

Dr. Hans Panofsky, Evan Pugh professor of atmospheric sciences, has been chosen chairman-elect for Section W, atmospheric and hydrospheric sciences, of the American Association for the Advancement of Science.

On Jan. 9, 1982, Dr. Panofsky will become chairman-elect for the first year of a three-year term. In the second year, he will serve as chairman and in the third he will be retiring chairman. He previously served as representative-at-large for Section W.

Dr. John H. Pazur, professor of biochemistry, recently returned from Tokyo, Japan, where he served as a visiting scholar at the Institute of Physical and Chemical Research, the major research facility for physics, chemistry, and the life sciences supported by the Japanese government.

At the Institute and also at several universities and industrial research laboratories, Dr. Pazur lectured on "Purification of Anti-carbohydrate Antibodies and Myeloma Proteins of Potential Value in the Detection and Treatment of Human Diseases." The organizations visited included Osaka City Research Institute, Osaka University, Kyoto University, Tohoku University, and Showa Denko Co.

Dr. Pazur also presented a paper, "Anti-glucoamylase Antibodies with Specificity for the Carbohydrate Moieties of Glucoamylase," at the sixth International Glycoconjugates in Tokyo and participated in the annual meeting of the Japanese Biochemical Society in Sendai.

Dr. Rio Preisner, professor of German, is author of a new, complex study of Western culture entitled *Culture Without an End*. The book is published in Czech under the title, *Kultura bez konce* (Munich: Edition Artyr, Karel Jadrny Verlag, 1981).

It examines Western political and religious thought and cultural development, beginning with the ancient Greeks. Dr. Preisner researched and completed the book during a 1977 sabbatical stay at Wolfenbuttel, Germany.

Dr. Rustum Roy, director of the Materials Research Laboratory, was organizer and principal speaker at a Workshop on Materials for Education held at the VIII Interamerican Conference on Materials Technology in Mexico City Oct. 20-23.

Dr. Roy described the Educational Modules for Materials Science and Engineering project headquartered at MRL. EMMSE is a consortium of U.S. universities and industries developing new modular materials in print, video and computer format for college and continuing education use.

Over the last two years, EMMSE has become international, with a West European Committee playing a major role in the system. Similar consortia have been started in the USSR and India, each providing materials for the EMMSE journal.

Promotions

Staff Exempt

Charles N. Long, to maintenance supervisor in Housing and Food Services.

Staff Non-Exempt

Patricia Blasko to administrative aide in Science.

Clerical

Vicki G. Keller to secretary B in Science.

Appointments

John C. Becker as assistant professor of agricultural law extension at University Park. B.A., LaSalle College; J.D., Dickinson School of Law, Attorney, Bangor, Pa.

Madhu S. Prakash as assistant professor of education at University Park. B.A., Lady Shri Ram College (New Delhi, India); M.A., Miranda House (Delhi, India); M.B.A., Faculty of Management

Donna F. Lance to secretary C in Agriculture.

Edna L. Shuey to secretary in Science.

Lisa A. Spotts to clerk, typist A in Agriculture.

Technical Service

Shirley H. Bennett to building services assistant in Continuing Education.

Beth E. Jefferson to patient nourishment assembler at Hershey.

Eileen T. Loffreda to patient service aide at Hershey.

Studies (Delhi, India): Ph.D., Syracuse U. Instructor, Syracuse U.

Malcolm L. Van Blerkom as assistant professor of psychology at Shenango Valley. B.S., M.S., Ph.D., Penn State; M.Ed., Kent State. Instructor of psychology, Altoona Campus.

Eric R. Weisman as assistant professor of speech communication at Ogoritz. B.A., M.A., Ph.D., Temple U. Part-time instructor, Community College of Philadelphia.

education that makes sense philosophically, scientifically and politically," says Dr. Garbarino, "although some, no doubt, will find it controversial."

C. Elliott Asp, a doctoral student in human development at the University, assisted in the final writing and technical preparation of the manuscript.

Retirements

Gilbert H. Harter, mechanic, auto in Physical Plant, retired Oct. 31. He had been employed by the University since Oct. 1, 1963.

Newton Pressler, building and equipment attendant in Human Development, retired Nov. 1 after serving with the University since Oct. 17, 1966.

Oliver L. Tate, building services assistant in Continuing Education, retired Nov. 1 after being employed by the University since Feb. 1, 1967.

Obituary

Helen S. Bottorf, secretary and office manager in the College of Health, Physical Education and Recreation from July 1, 1916, until her retirement Jan. 1, 1960, died Oct. 25. She was 83.

Bookshelf

Dr. James Garbarino, associate professor of human development, is the author of *Successful Schools and Competent Students*. The 170-page book, published by Lexington Books, D.C. Heath and Co., presents a social and developmental perspective on schools and schooling.

Dr. Garbarino describes it as "an essay with a point of view rather than just a review of the literature." He says he tried to look beyond educational psychology and instructional technique to find criteria with which to evaluate U.S. education.

The issues examined include the importance of the school in shaping social development at all educational levels. Cross-cultural comparisons are made and the issue of crime in the schools is confronted, along with the question of equality in educational opportunity.

The book "seeks to develop a view of

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Simon musical set for Nov. 12

Neil Simon's hit Broadway musical comedy *They're Playing Our Song*, starring Lorna Luft, will be presented by the Artists Series at 8:30 p.m. Thursday, Nov. 12 in Eisenhower Auditorium.

They're Playing Our Song was written by Neil Simon, with music by Marvin Hamlisch and lyrics by Carole Bayer Sager. The hit musical comedy has musical numbers staged by Patricia Birch and is directed by Philip Cusack.

They're Playing Our Song is a musical comedy about a composer and a lyricist who collaborate not only on music but also on romance and is loosely based on similarities in the real lives of the composer and lyricist. The eight-character musical revolves around Vernon, an Academy Award-winning composer and Sonia, a witty, intelligent and off-beat lyricist of contemporary pop songs who have a difficult time making their lives as harmonious as their music.

Appearing as Sonia will be Lorna Luft, daughter of the legendary Judy Garland. Ms. Luft is a stage performer, nightclub headliner, and concert and recording artist. *They're Playing Our Song* marks her second association with a Neil Simon musical. She made her Broadway debut in Neil Simon's *Promises, Promises*, for which she received the "Rising Star of the Year Award" from the American Guild of Variety Artists. Her most recent stage appearances include John Kenley's production of *Grease* in the lead role of Sandy Dumbroski and the starring role of Lilli in the musical *Carousel*.

Richard Ryder (Vernon), the former painter, turned singer, turned actor, has piled up an impressive list of credits. He

Lorna Luft will star in *'They're Playing Our Song.'* Nov. 12 in Eisenhower Auditorium.

has appeared on Broadway in *Via Galactica* and *Oh! Calcutta*, and in musical comedies such as *Pal Joey*, *Fiddler on the Roof*, *Kiss Me, Kate*, *See Saw*, *Five O'Clock Girl*, and *Can't Help Lovin' Dat Kari*. His television credits range from "The Tonight Show" to "For Richer, For Poorer," while on the nightclub circuit he has shared the stage with Juliet Prowse, Andy Griffith, Tennessee Ernie Ford, and Henri Mancini.

A limited number of tickets will go on sale at the HUB Booth and Eisenhower Auditorium box office at 9 a.m. Monday, Nov. 9.

Leonard Feldman to give recital

Leonard Feldman, cellist with the Alard String Quartet, will present a recital at 8:30 p.m. Wednesday, Nov. 11, in the Music Bldg. recital hall. A preview of the performance is scheduled for 1 p.m. Tuesday Nov. 10 in the recital hall as part of the School of Music's Common Hour Series.

Included in Mr. Feldman's program will be some seldom-heard works for one and two cellos as well as pieces originally written for clarinet, oboe and violin and later transcribed for cello.

Mr. Feldman will begin the concert with Friedrich Grützmaier's arrangement of Robert Schumann's Fantasy Pieces, opus 73. Pianist Jill Olson will assist Mr. Feldman in a performance of the Sonata for Cello and Piano, opus 119 by Sergei Prokofiev.

Mr. Feldman's 15-year-old son, Stephen, also a cellist, will join his father on the Duo II in B flat, opus 10 by Franz Christoph Neubauer. Stephen is a student at State College Intermediate High School and a member of the Penn State Symphony Orchestra.

Also selected for the program is the Adagio from George Szell's arrangement of Mozart's Concerto in D, K. 285d; Joseph Shuster's arrangement of "Nigun" from "Baal Shem" by Ernest Bloch and the program's closing number, Tchaikovsky's *Pezzo Capriccioso*, opus 62.

Leonard Feldman

An associate professor and a member of the Alard String Quartet since 1959, Mr. Feldman has performed on four continents and has taught at Wilmington College, the State University of New York at Potsdam and the University of Canterbury in New Zealand with the Quartet.

The School of Music is sponsoring both the preview performance and the recital, and the public is welcome to attend both free events.

President decides

(Continued from page 1)

conclusion also reached by the Joint Committee on Tenure in April, 1980. The specific reasons I have decided not to alter current policy are as follows:

"1. A college dean is ultimately responsible for the quality of that college's faculty. To ensure quality control and to assign authority commensurate with responsibility a dean must be able to deny tenure to individuals whom that dean considers unqualified for a permanent position.

"2. The proposed amendment to PS-23 will, I feel certain, tempt departmental and college committees to be less stringent in the first instance. On questionable or marginal cases the college committees may vote favorably with the full knowledge that, should the dean decide otherwise, the committee can reconsider the case after the dean has rendered a judgment.

"3. Under those circumstances, the traditional promotion and tenure process becomes inverted; the dean needs to make a persuasive case to a faculty committee to deny tenure rather than having the faculty committee make a persuasive case to the dean to award tenure. Such a change in procedure does not in my opinion serve the interests of quality.

"The process will inevitably push more cases to the University level and place a greater workload and a greater burden for

quality control on the University Committee, the Provost, and the President. Increasingly, selectivity will have to be exercised at a level removed from the College.

"Finally, I am confident that PS-23 and other University regulations provide adequate means for redress where there have been allegations of arbitrary, capricious, or unlawful actions in the promotion and tenure process.

"While I have not accepted the Senate's proposed legislation, I do support heartily the recommendation of the Joint

Commission that 'In all cases where a dean makes a negative tenure or promotion decision and where all recommendations prior to the dean's level have been positive, that dean is required to meet with the college committee and state his or her reasons.' I would be pleased to receive such a recommendation from the Senate."

Dr. Tischler told INTERCOM that the Faculty Affairs Committee will be asked to "reconsider the dean's veto section of the Senate's recommendation on promotion and tenure."

Labor Studies Club offers exhibit, films

The Penn State Labor Studies Club is observing the 100th anniversary of organized labor in the U.S. with an exhibit and film festival.

The exhibit — which features labor union pins, badges, posters and other material — will be on display in the HUB Art Alley through Nov. 20.

The film festival will be held in the HUB Assembly Room Monday, Nov. 9, and Friday through Sunday, Nov. 13-15. Screening time is at 8 each evening; the films are offered free of charge.

Army ROTC officer to visit tomorrow

Maj. Gen. Robert A. Sullivan, Army deputy chief of staff for ROTC, will visit the University tomorrow.

Maj. Gen. Sullivan's visit will be his first to an ROTC unit at a major university, according to Lt. Col. Arthur S. Dervaes, head of Army ROTC at Penn State. There are about 900 Army ROTC cadets at the University's various campuses.

Maj. Gen. Sullivan is scheduled to meet with Dr. Robert E. Dunham, vice president for undergraduate studies, in addition to meeting with the cadet chain of command and other selected cadets. He will speak at a military dinner for cadets, faculty members and administrators at 6:30 p.m. at the Sheraton Inn.

As deputy chief of staff for ROTC, Maj. Gen. Sullivan is responsible for the Army Reserve Officer Training Corps program offered at 287 host institutions and at over 750 other colleges and universities.

Before assuming his present post at U.S. Army Training and Doctrine Command, Fort Monroe, Va., Maj. Gen. Sullivan was chief of public affairs in the office of the Secretary of the Army, Washington, D.C.

Presidential search

(Continued from page 1)

Franz, immediate past chairman of the University Faculty Senate and assistant professor of history at the Delaware County Campus; Steve A. Garban, vice president and controller; Dr. James D. Hammond, professor of business administration.

Dr. Charles L. Hosler, dean of the College of Earth and Mineral Sciences; Lauren Sue Miller, graduate student in genetics; Dr. Fred Rapp, Evan Pugh Professor of Microbiology, and director of the Specialized Cancer Research Center at the Hershey Medical Center, and Richard

A. Zimmerman, president of the Penn State Alumni Association.

Mr. Wood is chairman of the eight-member Trustee Presidential Selection Committee that earlier this fall authorized establishment of the Search Committee.

The Search Committee, he said, will publicize the search for a new president, and receive and screen applications and nominations. Ultimately, it will submit to the Selection Committee a list of top candidates. The Selection Committee will select a final candidate and submit that name to the full Board of Trustees for confirmation.

Both committees will serve until Dr. Oswald's successor assumes office.

Winter conference

(Continued from page 1)

— To explore organizational and pedagogical benefits that might be derived by virtue of the University's network of campuses in the Commonwealth Educational System.

Dr. Oswald said the conference also would support such other concerns as the restructuring of the curriculum in the University's conversion to an early semester system.

"I would hope," he said, "that the ideas generated by the conference would have a long-term influence in promoting a continuing discussion on general education within the colleges and at all the University's campuses. Ultimately, this

discussion could lead to a restructuring of Penn State's general education requirements to meet most effectively both societal and individual student needs."

Members of the Steering Committee besides Dr. Oswald, Dr. Eddy, and Dr. Tischler are: Robert D. Arbuckle, director, New Kensington Campus; Paul Axt, director, University Scholars Program; Paul D. Bell, student member, Board of Trustees; Robert W. Carrubba, associate dean of the Graduate School; Carl A. Cartwright, acting associate dean, Commonwealth Educational System; Jerry B. Covert, associate professor of biology.

Robert E. Dunham, vice president for undergraduate studies; Caroline D. Eckhardt, associate professor of English

and comparative literature; Patricia Farrell, department head and associate professor of Recreation and Parks; Theodore L. Gross, provost and dean, Capitol Campus; Christopher Hopwood, chairman, Student Academic Assembly; Charles L. Hosler, dean, College of Earth and Mineral Sciences.

Theodore E. Kiffer, General Education Programs, College of the Liberal Arts; John M. Lilley, dean, Behrend College; Stanley F. Paulson, dean, College of the Liberal Arts; Robert F. Schmalz, professor of geology; William E. Toombs, director, Center for the Study of Higher Education; Carl H. Wolgemuth, professor of mechanical engineering; Staff to the committee is G. Gregory Lofzer, associate director for planning and research, Office of Planning and Budget.

University Park Calendar

November 5-15

Special Events

Thursday, Nov. 5

Japanese Program film, "Shinto: Nature, Gods and Man in Japan," 11:10 a.m., Room 171 Willard Bldg.

Poetry Reading by Sidney Lea, author of *Searching the Drowned Man* and editor of the *New England Review*, 3:30 p.m., Rare Books Room, Pattee Library. Sponsored by the English Department and the Institute for the Arts and Humanistic Studies.

Commons Film Series, *Myra Breckenridge*, 7 and 9 p.m., Room 112 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Friday, Nov. 6

Cinemafest Film, *Shampoo*, 7 and 9 p.m., Room 10 Sparks Bldg.

Commons Place Theatre, *Apocalypse Now*, 7 and 9:30 p.m., Room 112 Kern.

Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.

GSA Coffeehouse, 8 p.m., Room 102 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Artists Series, *Flabobus Dance Theatre*, 8:30 p.m., Eisenhower Auditorium.

Sports: JV football vs. Indiana (PA), 2 p.m.; soccer vs. Connecticut, 7:15 p.m.; men's swimming, Penn State Invitational; women's swimming, Penn State Invitational; women's fencing, Penn State Open, 9 a.m.; ice hockey vs. Upsilon, 9:15 p.m.

Saturday, Nov. 7

Shaver's Creek Environmental Center, Hawk Mountain Trp, 6 a.m.-7 p.m. Registration, 865-1851.

France-Cinema, Truffaut, *Bed and Board*, 7 and 9 p.m., Room 112 Kern.

Cinemafest Film, *Shampoo*, 7 and 9 p.m., Room 10 Sparks Bldg.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Pi Lambda Fraternity, weight-lifting competition benefiting the Arthritis Foundation, Rec Hall.

Sports: men's swimming, Penn State Invitational; women's swimming, Penn State Invitational.

Chamber Choir sets recital for Sunday

The first on-campus recital by the Penn State Chamber Choir will be presented at 3:30 p.m. Sunday, Nov. 8, in the recital hall of the Music Bldg.

For the first half of the program, the chamber choir will perform two different compositions based on texts from the "Lamentations of Jeremiah." The first interpretation, by 16th century composer Thomas Tallis, is highly representative of sacred music of the time. The second interpretation of the "Lamentations" was written four centuries later, by 20th century South American composer Alberto Ginastera.

One of J.S. Bach's earliest and most frequently performed cantatas, "Ich hatte viel Bekümmernis" (B.W.V. No. 21), has been selected for the second part of the

tational; ice hockey vs. Upsilon, 8 p.m.

Sunday, Nov. 8

Shaver's Creek Environmental Center, Moss Hanna Trail Hike, Black Mohonohan State Park, 10 a.m.-6 p.m. Registration, 865-1851. Commons Place Theatre, *Apocalypse Now*, 7 and 9:30 p.m., Room 112 Kern.

Sports: women's cross country, NCAA Regional Qualifier, 1 p.m.

Monday, Nov. 9

The University Readers "The Moral of the Story," a selection of fables and stories by James Thurber, 12:45 p.m., Room 309 Sparks Bldg. 7:30 p.m., HUB Main Lounge.

France-Cinema, Truffaut, *Bed and Board*, 7 and 9 p.m., Room 112 Kern.

Eco-Action Sub-Committee Trans-Species Unlimited meeting, 8 p.m., Room 173 Willard Bldg.

Tuesday, Nov. 10

GSA Council meeting, 6:30 p.m., Room 101 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Wednesday, Nov. 11

Graduate Council meeting, 3 p.m., Room 101 Kern.

Robeson Cultural Center, movie, *Sanders of the River*, 7:30 p.m., Walnut Bldg.

Leonard Feldman, concert, 8 p.m., Music Bldg. Recital Hall.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Thursday, Nov. 12

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Friends of the Museum, 8 p.m. Museum of Art. Philip Grausman, sculptor, on "Discovering Form."

Friday, Nov. 13

Craft Demonstration, 11:30 a.m., Kern Lobby. Commons Place Theatre, *Kramer vs. Kramer*, 7 and 9 p.m., Room 112 Kern.

Interludia Folk Dancing, 7:30 p.m., HUB Ballroom.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

GSA Coffeehouse, 8 p.m., Room 102 Kern.

chamber choir's program. The cantata includes recitatives, arias, duets and four choral movements, a larger number than most of the composer's later cantatas. Musica da Camera, the University chamber orchestra, as well as soprano Brenda Harsch, alto Janice Wilson, tenors Ralph Lyons and Charles Claus and bass Joel Westa will be featured on this piece.

Also included in the chamber choir's program is Vaughn Williams' "O Clap Your Hands." Highlighting this selection will be solos by the same five singers.

The Penn State Chamber Choir is composed of 24 singers, both graduate and undergraduate students, most of whom are music majors at the University. The group is conducted by D. Douglas Miller, associate professor in the School of Music.

The Sunday afternoon recital, sponsored by the School of Music, is free and the public is welcome.

neuroscience, pharmacology and psychiatry.

Dr. Snyder's Lasker Award winning research was described at that time as a contribution which "lies at the heart of attempts to solve the major human problems of the relief of pain and the counteracting of narcotic addiction."

Term calendar info is due next Thursday

Information for the INTERCOM Winter Term Calendar should be turned in by Thursday, Nov. 12. Material can be sent to Calendar Editor, Room 301 Old Main, 865-2501.

"Beat Alabama" Pep Rally, 8:45 p.m., Rec Hall.

Saturday, Nov. 14

Deadline to submit petition to Records Office to graduate in absentia in November.

Chinese Student Association film, 1:30 p.m., Room 112 Kern.

France-Cinema, Visconti, *The Innocent*, 7 and 9 p.m., Room 112 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Sports: football vs. Alabama, 1 p.m.; women's volleyball vs. Pittsburgh, 8 p.m.

Sunday, Nov. 15

Commons Place Theatre, *Kramer vs. Kramer*, 7 and 9 p.m., Room 112 Kern.

Seminars

Thursday, Nov. 5

Ceramic Science 500 Seminar Series, 11 a.m., Room 301 Steidle Bldg. Dr. H.P. Kirchner, Ceramic Finishing, on "Surface Preparation and Properties."

Engineering Science and Mechanics Seminar, 11 a.m., Room 232 Hammond Bldg. Dr. V.K. Varadan, Ohio State University, on "Acoustic Scattering by a Finite Elastic Cylinder in Water."

Geosciences Colloquium, 3:45 p.m., Room 22 Deike Bldg. Professor Robert L. Folk, Dept. of Geological Sciences, University of Texas, on "Italian Radiolarian Cherts and Ophiolites: Peridot or Abyssal?"

Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. S. Koenig, IBM Thomas J. Watson Laboratory, on "NMR Studies of Biological Molecules."

Record enrollment figures highlight President's news conference

The University has the highest enrollment in its history.

A record 57,194 resident instruction students are enrolled for Fall Term. President Oswald told news media representatives at University Park last week. The all-time high figure represents an increase of 1,533 or 2.8 percent over last year.

The final enrollment figures show 33,756 students at University Park, a record, and 18,133 at the 17 Commonwealth Campuses, also a record. Behrend College has 1,800 students; Capitol Campus, 2,526; Hershey Medical Center, 543; and Radnor, 436.

Dr. Oswald reported that eight of the Commonwealth Campuses have record enrollments.

At University Park, four of the ten colleges increased in enrollment, with the Division of Undergraduate Studies showing a 17.4 percent increase, Business Administration 14.6 percent and Engineering 9 percent.

Enrollments in Science and Earth and Mineral Sciences increased, while Liberal Arts, the largest college, and Health, Physical Education and Recreation, the smallest, remained about the same as last year. Arts and Architecture and Human Development showed small decreases.

The largest single drop in undergraduate resident instruction, 7.7 percent, was in the College of Education, followed by the College of Agriculture at 6.3. Dr. Oswald noted that studies have indicated that in the early 1990s there could be a possible shortage of teachers unless enrollments in education begin to pick up.

The President said he expects the University to fare well in the 1990s despite projected decreases in the number of high school graduates since Penn State is so strong in many areas that society is clamoring for, including business, engineering, earth and mineral sciences, and computer science.

Concerning future state support to Penn State, he said he is hopeful the Legislature will keep up with the

President Oswald meets with news media representatives at a briefing at University Park. On his right is Arthur V. Ciervo, director of the University's Department of Public Information and Relations.

increased costs of higher education.

"Realistically, these costs will have to be shared by the State and the students, both of whom benefit from higher education. We certainly are going to have to set priorities within the funds available and we have, in fact, done so over the past 10 years, reallocating some \$22 million within the University."

There will be an increased emphasis on private support, he added, noting that such support increased from \$5 million to \$11 million annually in the last five years. The University, with the assistance of an enlarged Penn State Fund Council, hopes to double that to over \$20 million annually in the next five years.

"I really expect that the State will provide sufficient funding for the University to be adequate," Dr. Oswald said. "The difference in Penn State being an adequate university and a first-rate university will have to come from private gifts, federal grants, and a full variety of other sources."

Recent changes in federal regulations

on student aid, when they go into effect, will not result so much in fewer students at Penn State but may bring about a different mix, he told the media representatives.

"A higher percentage of our students may come from more affluent families and a smaller percentage from middle income families. If the further 12 percent cut suggested goes into effect, we may well have some fallout."

"It's been predicted that this additional 12 percent cut would affect some 500,000 students nationally and some of these, of course, would be Penn State students. The last thing we want to do is lose students and this may require us to shift some funds into student aid."

Asked to pinpoint the highlights of his tenure at Penn State, Dr. Oswald cited the evolution of the Hershey Medical Center "from a fledgling medical school to one of the absolutely first-rate medical schools in the country" and a set of governance principles where "it's clear that faculty members are involved at most

stages of governance and students are much more involved than in the past."

Concerning the closing of residence halls at University Park at the end of Fall Term, Dr. Oswald issued this statement:

"The University residence halls and classroom facilities will be officially closed following the end of final examinations to the period of commencement. Indeed, the University is currently in litigation concerning the obligations it may or may not have as it relates to opening and closing dates. Furthermore, to voluntarily extend the services of the University beyond the end of the final examination period might have an adverse impact upon the position of the University in the law suit."

In other matters, Dr. Oswald:

— Said the biggest problem with regard to the proposed public radio station at University Park is to get a permit from the Federal Communications Commission to proceed with construction. "There are a number of competing organizations for the frequency our professional people tell me is the best. We also have some different options for dealing with construction of high towers, but we cannot proceed until we hear from the FCC on the license."

— Reported he may make a recommendation for the new position of vice president for development at the November Board of Trustees meeting, and, if not, at the January meeting.

— Said the University has not seen increases in minority enrollments it would like to have seen, but progress has been made. "We turned around a most serious situation that developed in 1975 and we hope to keep our minority enrollments increasing."

— Anticipated that by his retirement in 1983, conversion to the semester system will be well set. "Obviously this is not a simple operation. We are emphasizing to all who come in with curricular changes that they use this time for curricular reform wherever possible."

Dean Hermanowicz delivers annual 'State of the College' address

"When I am asked what is the state of the College, my unequivocal answer is that it is healthy, strong, vigorous, productive and distinguished."

So remarked Henry J. Hermanowicz, dean of the College of Education, in his annual "State of the College" address during a special faculty meeting last Friday.

"I am committed to advancing those qualities and characteristics . . . and am optimistic about the future of the College of Education and The Pennsylvania State University," Dean Hermanowicz said.

Focusing on the College's budget and enrollment figures, he explained that of the College's \$6.6 million budget, some \$4.8 million is derived from general funds. In addition, the College has generated to date about \$1.4 million in contractual funds for either resident education, research or continuing education, and another \$410,000 of what is termed "basic funding in vocational education."

"At the same time last year, our total budget was approximately \$6.3 million, although our total restricted funds were about the same," Dean Hermanowicz said.

"And," he added, "even though I cut \$140,000 and six positions in the College of Education last year, our overall budget increased this year largely because of salary increases."

Turning to enrollment figures, Dean Hermanowicz told the faculty that the College anticipates its decrease in undergraduate enrollment will probably be less than the figures reported this week suggest (see related story on page 5).

"Our predictions are that we would have a 6.9 percent decrease in enrollment

on the undergraduate level from the Fall of 1980 to the Fall of 1981, but a slight increase in our graduate enrollment," he observed.

The 7.7 percent undergraduate enrollment decline probably will come closer to or even under the 6.9 percent projected decrease as we process students who change their majors."

Dean Hermanowicz explained that the College of Education traditionally has seen its enrollment figures increase during the Fall Term as a result of students changing their majors and transferring to the College of Education from other Colleges.

"Last year, the College of Education had a net gain of more than 100 undergraduate students resulting from this change-of-majors process," he noted.

He also pointed out that some 40 percent of the students taking undergraduate courses in the College are not "majors," and that the College does, indeed, provide "important service functions to the entire University that are not readily apparent in collegiate enrollment counts."

Graduate enrollments, the Dean said, are increasing slightly, "particularly because of increases in such programs as adult education, education theory and policy, and the instruction systems option in the Division of Curriculum and Instruction."

He further observed that the College has more than 35 doctoral and master's degree candidates enrolled full-time in the area of bilingual education under a special agreement with the Puerto Rico Department of Education.

Dean Hermanowicz also highlighted some of the achievements of faculty members during the past year.

"The heart of any college is its faculty, and the faculty of the College of Education continue to distinguish themselves, the College and the University," he said.

"For example, just this past year, more than a dozen books or monographs have been authored or co-authored by College of Education faculty members."

"And, as another example, the fifth edition of the *Encyclopedia of Educational Research*, soon to be published, will have an indelible Penn State College of Education stamp on it, not only because so many faculty contributions, but also because the team of Harold E. Mitzel (associate dean for research and graduate studies), John H. Best (head of the Division of Education Policy Studies) and William Rabinowitz (professor of educational psychology) gave the whole project form, direction and substance as its chief editors," he remarked.

Dean Hermanowicz also called attention to significant accomplishments of no less than 35 faculty members, with each of the College's five divisions making numerous noteworthy contributions.

Areas of major concern for the College, the Dean said, include the new political strategies or policies in Washington, with respect to education; the Pennsylvania Department of Education's redirection of teacher evaluation and certification standards; future retrenchment of the College; the need for a viable summer session in the conversion to a semester system; and its role in the presidential search process.

College priorities, he explained, should center on examining new thrusts in teacher education; additional four-year non-certification programs; extended degree programs to better serve the citizens of the Commonwealth across the state; to assure the successful operation of the College's new master's and doctoral programs in adult education and the doctoral program in educational theory and policy; to expand and improve research, development and experimentation in impacting on problems of schooling as well as on the training of education personnel, and to strengthen doctoral programs throughout the College.

Stressing again his optimistic view of the College and University's future, Dean Hermanowicz closed with five words:

"Let's have a good year."

Committee has funds for special programs

The University Committee for International Programs (UCIP) currently has a small amount of money that may be used by faculty members and departments to help defray costs of speakers, program development or proposals of an international nature. First priority will be given to interdisciplinary or inter-college programs or activities.

Funds should be requested at least 30 days prior to the activity by sending brief biographical data, program details, total costs and the amount requested to UCIP, 306 Willard Bldg.

Last Saturday, President Oswald and Dr. Clark Kerr, president emeritus of the University of California, toured the University's apple variety museum at Rock Springs. The museum—established in 1976 and named in honor of Dr. Kerr, who grew up on a Pennsylvania farm—contains 120 varieties of apples and eventually will include some 250 varieties, some of which are almost extinct.

Academic heads attend workshop

Critical issues in academic leadership provided the focus for Penn State's first University-wide workshop for recently appointed department heads held Oct. 1 and 2 at the Keller Conference Center.

"The workshop was the result of an in-depth review of effective departmental leadership requirements at Penn State," says Dr. Eugene J. Kelley, dean of the College of Business Administration and program chairman.

"It was sponsored by the senior academic officers of the University and was based on their recommendations as well as the findings of an intensive research effort."

The research included interviews with all academic deans at Penn State, several scholars of higher education, experienced department heads at the University, and a number of recently appointed department heads.

Based on the research findings, the workshop addressed critical issues in academic leadership such as recruitment, selection, and maintenance of a vital, productive faculty.

"More broadly," notes Dean Kelley, "the issues dealt with the development of academic vision and excellence."

Provost Eddy opened the workshop and comments by President Oswald closed a day-and-a-half intensive learning experience.

First was a case study presented by Dr. Louis Barnes, professor of organizational behavior at the Harvard Business School, on "Roles and Responsibilities of Academic Leadership."

Other workshop leaders included Dr. Joseph Dixon, head of the Department of Chemistry, speaking on "Factors Critical to Departmental Success." Dr. Charles Hosler, dean of the College of Earth and Mineral Sciences, led a session on "The Role of the Department Head: The Dean's Perspective." Dr. Fred Vondracek, associate professor and former head of Individual and Family Studies, discussed "Selecting and Recruiting Faculty." "Evaluating and Developing Faculty: The Team Approach," was the topic covered by Dr. Robert Stern, head of the Department of Psychology.

Consultation sessions with Dean Hosler, Dr. Dixon, Dr. Vondracek and Dr. Stern followed the presentations.

"This program was unquestionably developmental in approach," says Dean Kelley. "The research model was that which is used in executive management programs conducted in the College of Business Administration. My impression is that the workshop was successful. We tried to structure it so that it can apply to all department heads, not just new department heads. We're gathering reactions now from the participants to see what direction to take in the future."

Among the early reactions to the workshop is a comment by Dr. John S. Patterson, head of the Humanities

Division at Capitol Campus, who said, "I was impressed by the imaginative overall design of the conference and by the quality and effectiveness of the individual speakers."

Dr. G. Phillip Cartwright, head of the Division of Special Education and Communication Disorders, added, "There was evidence of recognition by the central administration of the importance of department heads within the University structure."

In addition to Dr. Patterson and Dr. Cartwright, the participating department heads included:

Dr. George Andrews, Department of Mathematics; Dr. Peter D. Bennett, Department of Marketing; Dr. Maureen Carr, School of Music; Dr. Samuel M. Curtis, Department of Agricultural and Extension Education; Dr. John A. Dutton, Department of Meteorology; Dr. Gerald Eggert, Department of History; Dr. Harold L. Gilmore, Division of Business Administration, Capitol Campus.

Dr. Ernest Lovrie, Religious Studies; Dr. Jerrold W. Maddox, School of Visual Arts; Dr. Christopher K. McKenna, Division of Public Affairs, Capitol Campus; Dr. Richard L. McNitt, Department of Engineering Science and Mechanics; Dr. Joan M. Rinehart, Department of Nursing; Dr. Allen L. Sowsler, Department of Industrial and Management Systems Engineering; Dr. James G. Thompson, Department of Physical Education.

Dr. Charles T. Townley, head librarian, Capitol Campus; Dr. Hugh R. Urban, Individual and Family Studies; Dr. Carl Vaught, Department of Philosophy; Dr. Paul J. Wangness, Department of Dairy and Animal Science; Dr. William A. Welsh, Jr., Division of Science, Engineering and Technology, Capitol Campus.

"Many people worked hard to produce a successful workshop," notes Dean Kelley, and I appreciate the support of those who served with me on the Senior Academic Officer Study Group: Chester C. Gantt, assistant to the provost; Dr. Henry J. Hermanowicz, dean of the College of Education; Daniel T. Hopkins, assistant vice president and director of the Division of Continuing Education; and John M. Lilley, dean of Behrend College.

"Thanks also to Ray T. Fortunato, assistant vice president for personnel administration for serving as consultant to the study group and to Kent Addis, conference coordinator.

"The research and program development was handled by Dr. Kenneth R. Graham, acting assistant dean for continuing education and director of executive programs in the College of Business Administration; Trudy A. Smith, assistant to the dean in the College of Business Administration; and Albert A. Vicere, assistant director of executive education in the College."

William W. Scranton to speak

Capitol Campus to mark 15 years in special Convocation on Nov. 11

William W. Scranton, former Pennsylvania governor and U.S. Ambassador to the United Nations, will be the keynote speaker at the Nov. 11 Convocation marking the 15th anniversary of the University's Capitol Campus. As governor, Mr. Scranton provided the impetus for the founding of the campus at the former Olmsted Air Force Base facility in Middletown.

Joining Gov. Scranton on the platform at the 8 p.m. convocation at the campus will be Dr. Eric A. Walker, president emeritus of Penn State, who, as University president, worked with Gov. Scranton, the State Board of Education, the Olmsted Redevelopment Committee of the Harrisburg Chamber of Commerce and others to establish Capitol Campus.

Coleman Herpel, Capitol's first director and now director emeritus, and Dr. Robert E. McDermott, the first Campus provost, will represent Capitol's founding administration.

Representing the University will be President Oswald; Provost Eddy; Quentin E. Wood, president of the Board of Trustees; Ralph E. Peters, chairman of the Capitol Campus Board of Advisers; Dr. Theodore L. Gross, provost and dean of the Capitol Campus; and Dr. George D. Wolf, professor of American

studies and history and former dean of the campus faculty.

Platform party members from the state and federal government will be Dr. Robert G. Scanlon, secretary of education; State Senator George W. Cokos, State Representative Rudolph Dimini, and U.S. Rep. Allen E. Ertel.

Upon learning in 1965 that the base was to be phased out by the Defense Department and that the physical facilities were to be made available to the Commonwealth, then-Governor Scranton asked if Penn State would consider establishing a graduate center at Middletown.

On May 12, 1966, a total of 177.5 acres containing 16 major buildings was formally transferred to the University. Classes started Oct. 3, 1966.

Capitol Campus today is one of approximately 25 upper-division institutions in the country offering junior, senior and graduate level college courses. Capitol offers nine master's degree programs and seven undergraduate degree programs. In December, a Ph.D. program in political science will be offered in cooperation with the University's Political Science Department.

More than 2,500 students currently are enrolled, and there are 135 faculty members.

Animal abuse is Weather World topic

George P. Cave, who has served as a lecturer in English at the Altoona and DuBois campuses, will appear on WFSX-TV's Weather World this evening to present the views of a new organization, Trans-Species Unlimited.

Dr. Cave, founder and president of Trans-Species Unlimited, says the organization's goal is "to eliminate unnecessary animal abuse and suffering through education, investigation and direct action."

The group's name, he observes, reflects

its view that "the totality of living creatures on earth constitute an interconnected, organic network which man is part of, rather than in dominion over, and secondly, that moral concern for other creatures which are capable of suffering 'crosses over' species' distinctions to embrace all life."

Dr. Cave, who says he came to the animal rights movement through his interest in applied ethics, has published articles and reviews in *Clio*, *Environmental Ethics* and *Ethics and Animals*.

Additional information about Trans-Species Unlimited can be obtained by writing to P.O. Box 1351, State College, or by telephoning 238-0793.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 965-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. Nov. 12, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (P5-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ADMINISTRATIVE SUPERVISOR, OPERATING ROOM, COLLEGE OF MEDICINE, HERSHEY Responsible to the assistant director of Nursing Services, Operating Room Complex for the operation of the operating room to maintain acceptable standards of nursing care and provide guidance and development to nurses and operating room technicians on a 24-hour basis. Bachelor of science degree in nursing or equivalency and current licensure to practice as registered nurse by the Pennsylvania State Board of Nurse Examiners, plus one to two years of effective operating room experience.

CLINICAL SUPERVISOR, OPERATING ROOM, COLLEGE OF MEDICINE, HERSHEY Responsible to the assistant director of Nursing Services, Operating Room Complex, for the day-to-day effective and efficient operation of the operating rooms to include planning and coordinating the daily schedule with the clinical director of the Operating Room or his/her designee. Bachelor of science degree in nursing or equivalency, and current licensure to practice as a registered nurse by Pennsylvania State Board of Examiners, plus one to two years of effective operating room experience.

ASSISTANT DIRECTOR, INTERNATIONAL STUDENT AFFAIRS, STUDENT AFFAIRS, UNIVERSITY PARK Responsible to the director of International Student Affairs for development and implementation of various programs and services. Bachelor's degree (or equivalent) with one to two years effective experience, or master's degree (or equivalent) with up to twelve months of effective experience. Experience in accounting, administration or business required, and an understanding of cross-cultural experiences desired.

MANAGEMENT SYSTEMS ANALYST, COLLEGE OF MEDICINE, HERSHEY Responsible to the manager, Management Systems, for the operations auditing activities of the hospital to include an independent appraisal of planning (short and long range), operational control, organizational structure, staffing and productivity, policies, procedures, accounting and other records, reports, and standards of performance for every hospital department. Bachelor of science degree in business administration or its equivalent plus two to three years experience in management and auditing activities, preferably in a health care facility.

Funding Sources

For further information, call 865-1375

(372-1) The Research Corporation is a non-profit foundation for the advancement of science and technology, serving educational institutions through grants and for basic research in the natural sciences. Its **Cottrell Research Grants** program supports basic investigations in the physical sciences at graduate institutions and public undergraduate universities. Preliminary proposals are required (3-6 pp.). Grants average \$10-15K, and range from \$2-20K. Brief guidelines are available and/or for additional information contact R. Scott Pryor (Allentown) (404-252-9377). (Ref. RC)

Penn State Intercom

Calendar group drops Block 45; studies other schedule options

The Calendar Conversion Council is studying several alternative "block" class schedules, after unanimously rejecting the proposed "Block 45" schedule.

Council, at its Nov. 5 meeting, voted to drop consideration of "Block 45" because of dissatisfaction and confusion by individual academic departments.

In its stead, Council received three other proposed schedules, Blocks 36, 42 and 47, all of which have 55-minute periods and period-and-a-half class meeting times.

Block 36 is set up in the traditional Monday, Wednesday and Friday sequence, with 55-minute classes, and

Tuesday and Thursday classes for a period-and-a-half.

Block 42 provides a Monday, Wednesday and Friday three-period sequence during the first two and last three periods of the day. The middle three periods are used to provide five three-period sequences distributed among five days of the week.

Block 47 provides for two- and three-hour laboratory sessions that are spaced evenly during the day. It also provides that most periods will be in the morning or early afternoon.

Council member James Dungan said that, as a result of the semester calendar, 65 percent of the classes would be three-credit courses and that the University would offer 50 percent more classes.

Concerning confusion regarding the proposed block schedules, he noted that the current term schedule has 866 options in which to schedule classes.

The Council reported that it used historical data on day scheduling, credit worth and departmental requests for periods in the day to provide information for developing the proposed schedules.

A memo of summary statements on the proposed class schedules notes that, as a result of the extra sections, "all schedules have Monday, Wednesday and Friday three-credit sequences and permit faculty members teaching two or three sections to have two days per week with no scheduled classes."

Council member Wendell Harris, head of the English Department, suggested that the proposed schedules be run through a computer to determine if there are enough facilities to house the increase in sections.

It also was suggested that Council attempt to determine how the various proposed schedules are accepted by faculty and students.

In other business, Council voted to communicate to the Faculty Senate its concerns about apparent increases in the number of credits which may be required to earn some Penn State degrees. Some students enrolled during the transition period, Council noted, may need

(Continued on page 4)

Libraries schedule term break hours

Pattie Library has announced that the Reserve Reading Room and East Pattie, except Microforms and Photoduplication, will remain open until 2 a.m. Monday, Nov. 16, through Friday, Nov. 20 (the actual nights are Sunday night through Thursday night).

There will be no circulation services after midnight and each floor open to the public will be staffed with an attendant except Third Floor, East Pattie. Since the last exam will be given at 6:50 p.m. Friday, Nov. 20, Pattie and branches will remain open until the normal closing of 9 p.m.

Pattie also will remain open until 10 p.m. Saturday, Nov. 14.

Term break hours are as follows:

Friday, Nov. 20, 7:45 a.m. to 9 p.m.; Saturday and Sunday, Nov. 21 and 22, closed; Monday-Wednesday, Nov. 23-25, 7:45 a.m. to 5 p.m.; Thursday, Nov. 26 (Thanksgiving), closed; Friday, Nov. 27, 7:45 a.m. to 5 p.m.; Saturday and Sunday, Nov. 28 and 29, closed;

Monday-Wednesday, Nov. 30-Dec. 2, 7:45 a.m. to 5 p.m.; Thursday, Dec. 3, resume regular hours.

Pollock Library will close at 9 p.m. Friday, Nov. 20, and reopen at 9 a.m. Thursday, Dec. 3.

The Founders Room, in the HUB restaurant complex

President cuts ribbon in HUB

President Oswald, joined by representatives of several student organizations, officiated during a ribbon-cutting Monday evening at Housing and Food Service Operations' new restaurant complex in the HUB. The ribbon-cutting — which also featured light snacks, beverages and an opportunity to tour the new facilities — marked the completion of the first phase of a renovation project that eventually will transform the entire ground floor of the HUB.

Now open, and rounding out the first phase of the project, is the Founders Room. It joins three areas which opened earlier this term, the Fast Break, the Greenhouse and the Food for Thought.

The Founders Room, open for lunch Mondays through Fridays from 11:30 a.m. to 1:30 p.m., features a self-service salad bar and table service for its other menu items.

Included on each day's menu in the Founders Room are two soup selections

(with all soups being the "made-from-scratch" variety) and six entree selections, served by student waitresses and waiters.

- The daily entree selections are:
- all-you-can-eat soup and salad bar;
- club sandwich, with ingredients varying from day-to-day;
- hot meat sandwich or a specialty dish such as quiche;
- hot casserole or other hot dish;
- and two deli-style, cold sandwiches, with the double choice changing daily.

With the exception of the all-you-can-eat soup and salad bar, each of the entrees includes a cup of soup.

The Founders Room also serves a variety of beverages and desserts, the prices of which are in addition to the cost of the entrees.

Next year, in the second phase of the renovation project, two additional units will join the four now operating in the HUB complex. These are Dough to Go and The Cellar.

Faculty members receive 19 Biomedical Research Support Grants

Twenty-five faculty members have been awarded nineteen one-year Biomedical Research Support Grants, ranging from \$6,800 to \$16,600.

"These funds are awarded to support lines of research relating to or contributing to the solution of human health problems," said Dr. Richard G. Cunningham, vice president for research and graduate studies, who administers the program.

A committee consisting of G.G. Ferguson (program director), R.J. Flipse, Penny Kris-Etherton, E.H. Ludwig-G.E. McClearn, A.T. Phillips (chairman), J.M. Tarbell, J. Ultman, and J.M. Warren reviewed and screened 52 proposals. Faculty members receiving awards and their proposal titles are:

Craig Baumrucker, associate professor of animal nutrition/physiology, "Lactating Mammary Tissue Amino Acid Transport and Intracellular Pools;" Robert Beelman,

associate professor of food science, Daniel Royse, assistant professor of plant pathology, and Sudhir Sastry, assistant professor of agricultural engineering, "Control of Aganin in Cultivated Mushrooms: A Model Study for the Removal of Naturally-Occurring Potential Carcinogens in Foods;" Paul Cornwell, associate professor of psychology, and Emerson Hibbard, professor of biology, "Behavioral and Anatomical Effects of Damage to the Visual System in Chick Embryos;" Philip DeShong, assistant professor of chemistry, "Selective Control of Insect Populations."

Terry Etherton, assistant professor of animal nutrition, "Mechanisms of Insulin Resistance in Non-Insulin-Dependent (Type II) Diabetes Mellitus;" Frederick McClearn, associate professor of veterinary science and director of the Centralized Biological Laboratory, "The Role of Idiotype Regulation in

Maternal/Neonatal Immune Interactions;" Richard Frisque, assistant professor of microbiology, "Host Range and Sequence Analysis of JC Virus Isolated from Human Kidneys;" Gary Fournier, assistant professor of nutrition science and Gerald McClearn, associate dean for research and graduate studies, "Genetic Influences on Zinc Metabolism;" Gordon Hamilton, professor of chemistry, "Cysteine Metabolism and Insulin Action."

Andrea Mastro, assistant professor of microbiology and cell biology, "Cellular Immune Responses and Tumor Promotion *in vivo*;" R. Nagarajan, assistant professor of chemical engineering, "Surface Chemical and Molecular Interpretation of Pulmonary Surfactant Performance;" Keith Nelson, associate professor of psychology, and Philip Prinz, assistant professor of communication disorders, "Early Reading and Writing in Deaf Children;" Robert A.

Schlegel, assistant professor of molecular and cell biology, "Membrane Fluidity of Normal and Pathological Erythrocytes;" David Shalloway, assistant professor of molecular biology, "Role of the Cellular Homolog of the Rous Sarcoma Virus Transforming Protein."

K.K. Shung, assistant professor of bioengineering, and T.M. Wilson, associate professor of veterinary science, "Ultrasonic Characterization of Atherosclerotic Lesions;" John Smith, associate professor of human nutrition, "The Role of the Golgi Apparatus in Retinol-Binding Protein Metabolism;" W.D. Taylor, professor of biophysics, "Mammalian Cell Mutagenesis by Carcinogenic Agents;" John Warren, professor of psychology, "Experimental Gerontology of Learning;" Robert Wideman, assistant professor of avian physiology, "Investigation of Bi-Directional Renal Tubular Phosphate Transport."

Penn Staters

Dr. James G. Beierlein, assistant professor of agricultural economics, was co-author of a selected paper presented at the third annual International Conference on Energy Use in Berlin, West Germany. The paper was entitled "Energy Management and Conservation in Food Processing."

Dr. John L. Brown, Jr., professor of electrical engineering, presented one of four invited lectures at the Fourth Aachen Symposium, "Theory and Applications of Signal Processing," at the Rheinisch-Westfälische Technische Hochschule in Aachen, Germany. The topic of his paper was "Multi-Channel Sampling and Reconstruction of Bandlimited Signals," a research area dealing with the distribution of sampling rate requirements over a number of independent linear time-invariant channels.

Burt Fenner, professor of music, has been chosen a recipient of the ASCAP Award for the fifth consecutive year. The award from the American Society of Composers, Authors and Publishers is given annually to approximately 100 American composers. Recipients are chosen by an independent panel of distinguished music scholars and educators who serve on the faculties of major music schools.

Dr. Ronald L. Filippelli, librarian and associate professor of labor studies, gave three lectures in Italy on the problems and prospects of the American labor movement.

He addressed the social science faculty of the University of Cosenza, the Centro Ricerche del Lavoro (Center for Labor Research) in Rome, and the Fondazione Pietro Seveso (Foundation for Documentation and Research on the Problems of the World of Work) in Milan.

Promotions

Faculty

Miriam C. Pastrick to assistant professor of communications at Behrend.

Staff Exempt

Norman Brown to textbook assistant — used books in Penn State Bookstore.

James T. Coutlangus to supervisor, Evening Pharmacy Services at Hershey.

Charles D. Geiger to supervisor, IV Addictive Center at Hershey.

Vivian M. Hammers to senior research aide in Agriculture.

Debra M. Lauderbaugh to supervisor, Outpatient Pharmacy Services at Hershey.

Obituary

Edgar O. Radeen, dining hall worker in Housing and Food Services from June 11, 1966, until his retirement July 1, 1978, died Nov. 3. He was 68.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Dr. James Garbarino, associate professor of human development, and two graduate students, Florence N. Long and Janet M. Sebes, have edited a special edition of *Children and Youth Services Review*, a professional journal concerned with the welfare of young people.

The special issue is called "Knowledge in the Service of Children and Youth." Its focus is the link between research and its use by those who work with youth services. The articles deal with a wide variety of problems, ranging from reaching policy-makers to improving counseling.

Dr. Wendell V. Harris, professor and head of the Department of English, and **Dr. Stanley Weintraub**, research professor of English and director of the Institute for the Arts and Humanistic Studies, were among six American scholars who made presentations at the 1981 meeting of the Victorians Institute sponsored by Catholic University.

Dr. Harris discussed "Aestheticism as the Fortuitous Conflation of Alien Forces." Dr. Weintraub gave the principal address on "The Peacock in His Peacock Room: Whistler and the Aesthetic Rebellion."

Dr. Heinz K. Henisch, professor of the history of photography and a Fellow in the Institute for the Arts and Humanistic Studies, gave several lectures as University Distinguished Professor at California State University at Chico. During his stay, the exhibition, "Photography and Humor," prepared by him and several other photohistorians for the 1981 History of Photography Events, was on display. Dr. Henisch's appointment at Chico was jointly sponsored by that University's departments of Physics and Art.

Michael Lippincott to textbook specialist in Penn State Bookstore.

Robert K. Reese Jr. to assistant manager, Food Stores Building, in Housing and Food Services.

Staff Non-Exempt

Marilyn T. Downing to administrative aide in President's Office.

Clerical

Deborah Eckley to cashier — check cashier in Penn State Bookstore.

Diann L. Hower to secretary B in Health, Physical Education and Recreation.

Joan A. Thomas to secretary B in Continuing Education.

Jacqueline H. Wooden to secretary B in President's Office.

Technical Service

Anthony H. Omeis to horticulture aide in Agriculture.

Carpoolers

Nancy Knoffsinger would like riders from Zion or the Pleasant Gap area. She works from 8 a.m. to 5 p.m. in the Agricultural Administration Building. Call either 865-5419 or 383-2648.

Paul Petyak would like to share driving from Pleasant Gap. He works in the Mineral Sciences Building stockroom from 8 a.m. to 5 p.m. He can be reached at 865-4241.

Neda Wilson needs a ride from the Hilltop Trailer Park to the University. She works from 8 a.m. to 5 p.m. in Wagner Bldg. She can be reached at 863-3359 or 238-3643.

Dr. George R. Hudson, professor of education, received two honors at the annual convention of the Pennsylvania Personnel and Guidance Association (PPGA).

He received the "Outstanding Practitioner Award" from the Pennsylvania Association for Counselor Education and Supervision and the "Distinguished Service Award" from the PPGA.

Dr. Hudson, the founding president of PPGA in 1969-70, was honored by both groups for the excellence of his professional work in the preparation of counselors and for his continuing leadership in behalf of the counselors of the Commonwealth in diverse organizational roles.

Dr. Tony M. Lentz, assistant professor of speech communication, and **Jeanne M. Lutz**, instructor in speech communication, have been honored by the Speech Communication Association of Pennsylvania.

Dr. Lentz was presented the Emerging Scholar Award, which recognizes outstanding academic achievement by young Pennsylvania academics in the speech field. Ms. Lutz received the Carroll Arnold Distinguished Service Award. Named for Prof. Carroll C. Arnold, professor emeritus of speech communication, it is the highest honor the association confers on its members.

Bookshelf

Dr. Stanley B. Baker, associate professor of education in the Division of Counseling and Educational Psychology, is the author of a 300-page volume, *School Counselors' Handbook: A Guide for Professional Growth and Development*, published by Allyn and Bacon, Inc.

Dr. Baker's book is designed to provide school counselors with a systematic, do-it-yourself program for up-dating, evaluating and improving school counseling skills while on the job. Included in the book are timely discussions of recent trends in guidance, such as career education, advances in improving the counseling process, and psychoeducation.

Also covered are self-assessment tools, learning activities for improving counseling skills and competencies, and strategies for combatting constant guidance problems.

Dr. Gordon F. De Jong, professor of sociology and associate director of the University's Population Issues Research Center, is co-editor with Robert W. Gardner, research associate in the East-West Population Institute, of a 395-page volume, *Migration Decision Making: Multidisciplinary Approaches to Micro-Level Studies in Developed and Developing Countries*, published by Pergamon Press, Inc.

The book brings together for the first time various disciplinary perspectives on the migration decision-making process of individuals in families.

In particular, it provides a systematic review and evaluation of microlevel frameworks and models of the migration decision, examines empirical evidence from developed and developing countries to discover how well these models and frameworks explain migration behavior, and considers policy implications of the models, particularly for developing societies.

Dr. Peter B. Pfahf, retired professor of floriculture, is co-author with Dr. Elwood W. Kalin, professor of floriculture at Washington State University, of a new book, *American Style Flower Arranging*.

The book, published last month by Prentice-Hall, is described by Dr. Pfahf as "a comprehensive, illustrated introduction to the design and construction of flower arrangements for use in the American home."

Dr. Robert Lima, professor of Spanish and comparative literature, gave two invited lectures at Gettysburg College.

At the invitation of the Department of Spanish, he spoke on "The Theatre of Federico Garcia Lorca." Under the auspices of The Pennsylvania Humanities Council, of which he is a Fellow in the Invitational Humanist Program, he spoke on "What the Devil . . . The Infamous History of Satan."

Mrs. Eulalia G. Lombede, instructor in French and Spanish at the McKeesport Campus, presented an invited paper at the "Colloquy on Rene Guy Cadou" in Nantes, France. Her paper, "The Metamorphosis of Helen," studied the poet's transformation of his wife through the use of metaphors. Mrs. Lombede was the only participant in the three-day program, sponsored by the University of Nantes, Faculty of Letters and Human Sciences, who was not a French citizen.

Dr. Henry P. Sims Jr., associate professor of organizational behavior, was one of four outstanding Beta Gamma Sigma faculty members selected to participate in the Beta Gamma Sigma National Seminar at the University of Rhode Island. He discussed "Meeting the Productivity Crisis with New Relationships at Work." Beta Gamma Sigma is the national scholastic honor society in business and management.

American Style Flower Arranging, one of the few textbooks devoted to the teaching of this subject, is written for use by four-year and two-year college students, trade school and high school students, and garden club members.

The book reviews the history of flower arranging and discusses flower arrangement design and use of color in design. Plant materials, including their handling and care, are given. Included are designs for holiday arrangements and for home and church displays and arrangements of dried and silk flowers. The book also includes flower arrangements for competition.

Dr. Pfahf, who retired in 1979 after 31 years service, is author of an earlier book, *The Retail Florist Business*, now in its third printing.

Dr. Frank J. Swetz, professor of mathematics and education at Capitol Campus, is the author of *The Mathematics Laboratory in the Elementary School: What? Why? and How?*, published by Intergalactic Publishing Co., Westmont, N.J.

The book is a manual on the mathematics laboratory methods of instructing children and is intended for use by elementary school teachers and teachers in training. It discusses the philosophy and strategies of teaching mathematics to young children.

The development, organization, and management of a mathematics laboratory teaching situation is discussed in detail.

More than forty instructional schemes employing concrete-based learning activities are included for teacher use and adaptation. The material in the book is based on Dr. Swetz's experiences teaching young children and on his involvement in elementary teacher training at Capitol Campus.

Kern cafeteria hours change for term break

The term break schedule for the cafeteria in the Kern Graduate Building has been announced.

On Nov. 23, 24 and 25, the cafeteria will be open from 7 a.m. to 2 p.m. It will be closed all day on Nov. 26, 27, 28 and 29.

The cafeteria will reopen on Nov. 30, with hours from 7 a.m. to 2 p.m. through Dec. 2.

It will return to its regular hours, 7 a.m. to 6 p.m., on Dec. 3.

University Park Calendar

November 12-28

Special Events

Thursday, Nov. 12

Penn State Dames meeting, 7:30 p.m., Room 101 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Friends of the Museum, 8 p.m., Museum of art, Philip Grausman, sculptor, on "Discovering Form."

Friday, Nov. 13

Craft Demonstration, 11:30 a.m., Kern Lobby, Commonsplace Theatre, *Kramer vs. Kramer*, 7 and 9 p.m., Room 112 Kern.

Interlalia Folk Dancing, 7:30 p.m., HUB Ballroom.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

GSA Coffeehouse, 8 p.m., Room 102 Kern. Labor Studies Club Film Festival, 8 p.m., HUB Assembly Room. "The Turnaround," "The Sky's the Limit," "With Babies and Banners," and "Crystal Lee Jordan." Also shown Saturday and Sunday at 8 p.m., HUB Assembly Room.

"Beat Alabama" Pep Rally, 8:45 p.m., Rec Hall.

Saturday, Nov. 14

Deadline to submit petition to Records Office to graduate in absentia in November.

Chinese Student Association film, 1:30 p.m., Room 112 Kern.

France Cinema, Visconti, *The Innocent*, 7 and 9 p.m., Room 112 Kern.

URTC, Williams, *The Glass Menagerie*, 8 p.m., Pavilion Theatre.

Labor Studies Club Film Festival, 8 p.m., HUB Assembly Room.

Sports: Football vs. Alabama, 12 p.m. Women's Volleyball vs. Pittsburgh, 8 p.m.

Sunday, Nov. 15

Commonsplace Theatre, *Kramer vs. Kramer*, 7 and 9 p.m., Room 112 Kern.

Labor Studies Club Film Festival, 8 p.m., HUB Assembly Room.

Monday, Nov. 16

Full Term classes end, 9:55 p.m.

Last day to sign Fall Term Emergency Loans, Room 106 Shields.

Early Registration for Winter Term, 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields. Continues through Nov. 20.

The University Readers, "The Little Prince" by Antoine de Saint Exupéry, 12:45 p.m., Room 309 Sparks.

France Cinema, Visconti, *The Innocent*, 7 and 9 p.m., Room 112 Kern.

Sports: Women's Basketball vs. Mt. St. Marys, 8 p.m.

Tuesday, Nov. 17

Early Registration for Winter Term, 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields. Continues through Nov. 20.

Final Examinations, through Nov. 20.

Wednesday, Nov. 18

Final Examinations, through Nov. 20.

Early Registration for Winter Term, 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields. Continues through Nov. 20.

Thursday, Nov. 19

Final Examinations, through Nov. 20.

Board of Trustees meeting, Faculty Bldg. A. Early Registration for Winter Term, 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields. Continues through Nov. 20.

through Nov. 20.

Friday, Nov. 20

Final Examinations.

Early Registration for Winter Term, 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields.

Board of Trustees meeting, Faculty Bldg. Craft Demonstration, 11:30 a.m., Kern Lobby. Shaver's Creek Environmental Center, Fireside Reading, 7-10 p.m., Environmental Center.

Interlalia Folk Dancing, 7:30 p.m., HUB Ballroom.

Sports: Men's Basketball vs. Athletics in Action, 8:10 p.m.

Saturday, Nov. 21

Sports: Football vs. Notre Dame, 1:00 p.m.

Sunday, Nov. 22

Shaver's Creek Environmental Center, Fireside Reading, 7-10 p.m., Environmental Center.

Monday, Nov. 23

Fixed date for meetings involving Commonwealth Campus faculty.

Tuesday, Nov. 24

Fixed date for meetings involving Commonwealth Campus faculty.

Thursday, Nov. 26

Thanksgiving Day, University offices closed.

Saturday, Nov. 28

Full Term Commencement, 10:30 a.m., Rec Hall.

Sports: Men's Basketball vs. Bloomsburg, 8:10 p.m.

Seminars

Thursday, Nov. 12

Organic/Inorganic Seminar, 9:35 a.m., Room 333 Whitmore Lab. Professor V. Jager, University of Wurzburg, on "Izoaxolines — Unique Alkaloid Analogues."

Ceramic Science 500 Seminar, 11 a.m.-noon, Room 301 Steidle Bldg. Dr. L. Bowen, GTE Laboratories, Waltham, MA, on "Zinc Oxide Varistors."

Anthropology Seminar, 3:30 p.m., 107 Carpenter Bldg. Joy Lightcap, Department of Anthropology, on "Child Abuse from a Sociobiological Perspective."

Physics Colloquium, 3:50 p.m., Room 117 Osmond Lab. S. Koenig, IBM Thomas J. Watson Laboratory, on "NMR Studies of Biological Molecules."

Acoustics Seminar, 4 p.m., Room 73 Willard Bldg. Dr. Robert T. Beyer, professor of Physics, Brown University, on "Understanding the Nature of Sound Absorption in Sea Water."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. Dr. Ronald Liotta, Exxon Research and Engineering Co., on "Mechanism of Oxidative Weathering of Coal."

Schilling Science and Religion Seminar, 6 p.m. Cyprian Room, Nittany Lion Inn. Dr. Aston Drackman, retired associate professor of philosophy, on "Science, Poetry, Religion — A Unity."

Computation Center Seminar, 7:30 p.m., 108 Forum. Introductory Seminar on interactive computing with VM and CMS. Seminar continues Nov. 17, 19, 7:30 p.m. 108 Forum.

Friday, Nov. 13

Analytical and Physical Chemistry Seminar, 11 a.m., Room 333 Whitmore Lab. Paul Shapiro, on "The Effect of Wavelength on the Quenching of Aldehyde Excited States."

Computational Fluid Dynamics Seminar, 11 a.m., Room 102 Mechanical Engineering

Bldg. Dr. Harry A. Dwyer, Dept. of Mechanical Engineering, Univ. of California, on "Some New Numerical Methods of Old Problems in Fluid Mechanics and Heat Transfer."

Geography Department Coffee Hour, 3:45 p.m., Room 319 Walker Bldg. Ronald Eytz, associate professor of Geography, on "City Eching: The Remote Sensing of Urban Snow Scars."

Metalurgy Seminar, 2:15 p.m., Room 301 Steidle Bldg. Konrad G. Weil, visiting professor, Technische Hochschule-Darmstadt, on "Mass Spectrometric Studies of the Volatilization of Intermetallic Compounds."

Fuel Science Seminar, 4 p.m., Room 301 Steidle Bldg. E.T. McHale, Atlantic Research Corp., on "Formulation and Combustion of Coal-Water Slurry Fuel."

Engineering Science and Mechanics Seminar, 4 p.m., Room 152 Hammond Bldg. Dr. Umar Yuceoglu, Lehigh University, on "Some Problems of Composite Multilayer Cylindrical Shells."

Monday, Nov. 16

MCB Seminar, 4 p.m., Room 101 Althouse Lab. Dr. Allen Jacobsen, Dept. of Molecular Genetics & Microbiology, University of Massachusetts Medical School, on "A Function of Poly (A)?"

Entomology Seminar, 4 p.m., Room 204 Patterson Bldg. Priscilla Seymour, Dept. of Entomology, on "Effect of Glandular and Simple Hairs on Ovipositional Preference of *A. f. f. f.* on *Leucanthemum*." Lisa Lemie, Dept. of Entomology, on "Distribution of the Northern Fowl Mite *Ornithonyssus sylviarum* on Laying Hens and Evaluation of Visual Sampling Methods."

Industrial and Management Systems Engineering Seminar, 4 p.m., Room 319 Sackett Bldg. Robert C. Williges, Dept. of Industrial engineering and operations research, Virginia Polytechnic Institute, and president, Human Factors Society, on "Human Factors Considerations in Human-Computer Dialogue Design."

Tuesday, Nov. 17

MCB Seminar, 11 a.m., Room 101 Althouse Lab. Dr. Allen Jacobsen, Dept. of Molecular

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Genetics & Microbiology, University of Massachusetts Medical School, on "Birth, Death, and Mid-Life Crises of Shime Mold mRNA."

Inorganic/Organic Seminar, 8 p.m., Room 333 Whitmore Lab. Prof. George McLendon, Rochester University.

Computation Center Seminar, 7:30 p.m., 108 Forum. Introductory Seminar on interactive computing with VM and CMS. Seminar continues Nov. 19, 7:30 p.m. 108 Forum.

Thursday, Nov. 19

Computation Center Seminar, 7:30 p.m., 108 Forum. Introductory Seminar on interactive computing with VM and CMS.

Aerospace Engineering, 4 p.m., Room 212 Hammond. Robert C. Nelson, associate professor, University of Notre Dame, on "Boundary Layer and Side Force Characteristics of a Spinning Axisymmetric Body."

Exhibits

HUB Art Alley: Labor union memorabilia.

Kern Gallery: open Monday through Saturday, 8 a.m.-11 p.m., Sunday, noon to 11 p.m. Jack Troy, ceramics; Shirley Sturtz, drawings and watercolors; Bill Davis, drawings and watercolors.

Museum of Art: open 11 a.m.-4:40 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m. Oriental Works from the Museum's Collection. Danish Ceramic Display. Gallery talk by William Hull in connection with Danish Ceramic Display, 10:30 a.m., Tuesday, Nov. 24.

Pattee Library: Richard Burke and Chuck Kullman, photographs, East Corridor Gallery. Todd Whitehill, paintings, open Nov. 17. Lending Services Lobby. Mary McGuire, pottery, Second Floor East and Main Lobby.

Visual Arts Bldg., Zoller Gallery: Gallery House: 9 a.m.-5 p.m., Monday through Friday, Saturdays, and Sundays, noon-5 p.m. Tony Ray-Jones, photo exhibition, "English Resorts."

Concert Choir to perform Friday

The new Penn State Concert Choir will give its first performance at 8:30 p.m. Friday, Nov. 13, in the recital hall of the Music Bldg.

Psalm settings by a variety of Baroque composers — Pitiotti, Lotti, Scarlatti, Schutz, Purcell and Handel — will comprise the first portion of the concert choir's program. These compositions, both a cappella and accompanied works, range from somber expressions of prayer to exuberant psalms of praise. Texts are in Latin, German and English.

The second and final part of the concert choir's program will consist of the longest of J.S. Bach's six motets, "Jesus, meine freude." Several of the 11 movements in the motet are based on the chorale "Jesus, meine freude" while others use biblical texts. The form of the composition is symmetrical — musical phrases from the first movement reappear in the last movement, phrases from the second movement are included in the second-to-last movement, and so forth.

The Penn State Concert Choir consists of 48 singers representing 24 majors throughout the University. D. Douglas Miller, associate professor of music, directs the concert choir. Dr. Miller also serves as director of the new Penn State Chamber Choir.

The free concert, sponsored by the University's School of Music, is open to the public.

Chinese scientists to discuss sports

Four sports scientists from the People's Republic of China will present a seminar on sport and physical education in their country at 10 a.m. Tuesday, Nov. 17, in Room 101 Kern Bldg.

The seminar is part of the scientists' four-day visit to Penn State, Nov. 15-18, as guests of the College of Health, Physical Education and Recreation. The visit is being coordinated by Dr. Richard C. Nelson, director of the Biomechanics Laboratory.

The scientists, all associated with the National Research Institute of Sports Scientists in Peking, are: Ma Bin, NRI director; Wang Ru-yang, associate research professor and head of the NRI's scientific research section; Chen Ming-da, associate research professor and deputy head of the NRI's mass sports research department; and Gao Ho, associate research professor.

Their visit is part of a 20-day tour of sports science facilities in the United States and Canada arranged by the American College of Sports Medicine.

Sculptor Grausman to lecture tonight

Sculptor Philip Grausman will present a slide lecture entitled "Discovering Form" at 8 tonight at the Museum of Art.

Mr. Grausman has taught at Pratt Institute and Cooper Union in New York, Skowhegan School of Painting and Sculpture, Dartmouth College (sculptor in residence), and Yale University.

The lecture is designed to illustrate as openly as possible a sculptor's full consciousness of his own sources, interests, techniques and discoveries over two decades of development. Admission is free and open to the public.

Donations used for ambulance

The University has a new ambulance, purchased with funds donated by Penn State alumni and friends. It replaces a 1974 model that no longer met accepted design standards.

"We operate to serve students on and off campus, but when other ambulance organizations call on us, we help with their calls too," says David J. Lindstrom, director of the University Ambulance Service.

The ambulance service is affiliated with the University Health Services.

It is staffed by two paid employees during daytime working hours and by trained student volunteers at night and on weekends. All University ambulance

personnel have at least the Emergency Medical Technician level of training. One is an active paramedic from the Allentown area.

The new ambulance, a 1981 model, was built from a van-type Ford chassis.

Our old ambulance lacked sufficient storage space for supplies and equipment," Mr. Lindstrom says. "It also lacked walk-through space for attendants. And it didn't have a good oxygen storage system."

The new ambulance will be used as a teaching aid. Students in emergency health care classes will be given training in its layout and the use of its equipment.

Blue Band to present Bandorama

The Penn State Blue Band will present Blue Bandorama IV at 8 p.m. Saturday, Nov. 14, in Eisenhower Auditorium. In addition to the Marching Blue Band and the auxiliary units, the concert will feature the Symphonic Blue Band in short pops concert and the Clee Club Hi-Lo's in a few light selections.

The marching band will feature the Blue Sapphire Lori Bowers, Touch of Blue (majorettes), the Blue Band Silks and Drum Major Rich Gorodetsky. Music includes special medleys of Penn State school songs and halftime hits from the current season. Music from the 1981 season includes "New York, New York," "My Favorite Things," "TV Commercial Medley," "Chimes Festival," "Brass Roots," "Barrum," "Russian Christmas Music," "Carmina Burana," "Fame," "Give it One," "National Spirit March," and "Slaughter on Tenth Avenue."

The program also includes a percussion feature, trumpet feature and trombone section feature. The Symphonic Blue Band will play "Chester" by William Schuman based on a Revolutionary War song; a medley of music from Bob Hope films, and "Norwegian Rhapsody" arranged by Clare Grundman and the finale of "Concerto for Trombone" by Leyden, featuring the entire trombone section.

Tickets at \$1.50 for adults and students will be on sale at Eisenhower Auditorium. Children under twelve will be admitted free. Recordings of last year's Bandorama will be on sale in the lobby.

The Blue Band is under the direction of Dr. Ned C. Dehl, assisted by Dr. Darhyl S. Ramsey, assistant director, and Richard Bundy, graduate assistant.

PENNARAMA link to be ready Jan. 1

The Board of Directors of Pennsylvania Educational Communications Systems (PECS) has set Jan. 1, 1983, as the date when the total statewide interconnection of cable systems will be in place for receipt of programming by PENNARAMA, Pennsylvania's Continuing Education Cable Television Service.

The first stage of the interconnection is complete, and PENNARAMA programming is now being provided 24 hours a day to more than 150,000 cable television households in over 60 communities in central and eastern Pennsylvania.

Dr. Robert J. Scannell, vice president and dean of the Commonwealth Educational System, said that the University is pleased with the developments to date, including especially the participation of other colleges and universities in the programming. He said that Penn State, during the past year, had taken several crucial steps to assure that its participation in PENNARAMA will match the potential of the system.

Two years ago Penn State and the cable industry signed an agreement to develop PENNARAMA. Penn State agreed to coordinate the participation of other colleges and universities through Learning and Telecommunications Services, a Division of the Commonwealth Educational System.

Calendar group

(Continued from page 1)

administrative assistance to insure that the conversion does not obstruct normal degree progress.

The Sabbatical Leave Committee submitted a tentative draft report which will be discussed at Council's next meeting. Academic deans and the Senate Faculty Affairs Committee will be asked to review Council's recommendations. A consolidated report will be sent to the President for consideration.

The Faculty Contracts Committee hopes to submit its report at the end of November. The committee has considered establishing a list of common elements to be included in all offer letters from academic officers to prospective new faculty members. The committee is considering a system of academic year (36 weeks) and extended year (48 weeks) contracts.

A draft schedule for calendar conversion is being reviewed and will be published in a future issue of INTERCOM. Council also:

- Announced it will appoint a committee to review University policy on committee of staff exempt, staff nonexempt, and clerical employees.
- George R. Lovette, assistant vice president for business, will chair the committee.

- Heard from the Summer Session Committee on budgetary issues. A subcommittee is considering a separate summer session budget for each college, with controls to assure that it will be used for summer instructional activities.

- Discussed the visit to Iowa State University where calendar conversion has taken place.

- Reported it will meet approximately every three weeks during 1982.

Phi Delta Kappa sends three to conference

Three State College men—Peter Carpenter, Paul Bingham and Frank Anthony—attended Phi Delta Kappa's 38th Biennial Council and Fifth International Conference on Educational Issues in Chicago Oct. 22-25.

The three men represented Penn State's chapter of Phi Delta Kappa, a professional educational fraternity dedicated to promoting quality public education. Penn State's chapter has members in Centre, Blair, Huntingdon and Mifflin counties.

Mr. Carpenter, principal of State College's Fairmount Elementary School, is president of the Penn State chapter, and Mr. Bingham, assistant principal of State College's Intermediate High School, is vice president for programs.

Mr. Anthony, professor emeritus of agricultural education at the University, is coordinator of region 6-B of the national fraternity.

Attending the conference were delegates from 546 chapters representing every state, Canada and several other countries. Organized in 1906, Phi Delta Kappa is celebrating its Diamond Jubilee anniversary. Its membership includes some 130,000 leaders from all levels of the education profession.

WPSX-TV production to be aired nationally

"Rural America: Coming of Age," produced by WPSX-TV, will be aired nationally this month by the Public Broadcasting Service, coinciding with the White House Conference on Aging which begins Nov. 30.

The program, hosted by veteran actor Lorne Greene, identifies important aging issues, including transportation, employment, housing, health, energy and loneliness, and examines innovative programs designed to deal with them. It will be aired on WPSX, Channel 3, at 9 p.m. Wednesday, Nov. 18, 11:30 a.m. Thursday, Nov. 26, and 6 p.m. Sunday, Dec. 13.

"Rural America: Coming of Age," was written and produced by Kathleen Pavello of Penn State Television. The documentary was directed by Keith Schneider, with videography by Bradley Babcock and sound by Jan Stief.

The Penn State Blue Band

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 665-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. Nov. 19, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

CUSTOMER SERVICE REPRESENTATIVE, OFFICE OF PHYSICAL PLANT, UNIVERSITY PARK. Responsible to the supervisor of planning and scheduling for Physical Plant/Customer liaison. Obtains project details following project requests from customers. Prepares estimates identifying manpower and materials necessary to complete a project. Coordinates and schedules facilities, designs, materials, and trades with both customers and OPP personnel. Associate degree or equivalent technical training such as an apprenticeship in a building trade, plus two to three years' experience in estimating construction and maintenance work for the building trades. Public relations skills essential.

WRITER-EDITOR, COLLEGE OF AGRICULTURE, UNIVERSITY PARK. Responsible to the director of Agricultural Communications. Edit journal articles, technical and other manuscripts including resolving recommended changes with authors in conference, and coordinating design and layout. Process publications in production. Handle creative writing projects, including special newsletters, publications, reports, and feature articles. Edit materials prepared by research and extension faculty. Participate in evaluation of publications, direct mail, and other written communications. Work with design staff in getting coordinated letterheads and similar materials. Bachelor's degree in communications area and one to two years of experience are required.

AREA REPRESENTATIVE, COMMONWEALTH EDUCATION SYSTEM, BERK CAMPUS. Responsible for the functions of development, organization, operation, and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two to three years of directly related experience or a master's degree or equivalent, plus one to two years of directly related experience.

PROGRAMMERS, MANAGEMENT SERVICES, UNIVERSITY PARK. Analyze and design or modify program logic; prepare and interpret general and detailed flow charts and structure charts; code program instructions; prepare test data; test programs and program systems; document programs and program systems; prepare or modify JCL. Bachelor's degree or equivalent in Computer Science or related field plus six to nine months of experience are required. Proficiency with COBOL on third generation

computer equipment is desired. Fixed Term I positions beginning January, 1982, for a period of 15 months to two years.

APPLICATIONS PROGRAMMER/ANALYSTS, MANAGEMENT SERVICES, UNIVERSITY PARK. Responsible for the analysis, design, and programming required in the development and modification of computer programs. The individual will conduct interviews with systems users, perform feasibility studies, and investigate alternative modes of data handling in gathering necessary data to support system design recommendations for systems modification or to support the project leader's design efforts in systems development. Bachelor's degree or equivalent in basic computer systems and one to two years of effective experience in computer programming and analysis are required. Strong experience in COBOL or IMS/DC is desired. Fixed Term I positions beginning January, 1982, for a period of 15 months to two years.

SYSTEMS ANALYST, MANAGEMENT SERVICES, UNIVERSITY PARK. Responsible for assisting customers/users in defining information-handling problems, in assessing plausible alternative technical solutions, and in specifying system designs which can be effectively implemented within the processing technologies available to Management Services; also responsible for planning and assigning work to programmer/analysts and programmers and assisting in their education program. Specific functions of this position include fact-finding data gathering and analysis, task planning, cost-benefit and feasibility studies, systems documentation, information flow and utilization analyses, etc. Bachelor's degree or equivalent with training in computer systems and systems planning, plus two to four years of effective experience in data processing. Applications experience in IMS/DBDC is desirable. Fixed Term I position beginning January, 1982, for a period of 15 months to two years.

Funding Sources

For further information, call 865-1375

(373-1) The Resource Information Service (RIS) provides information to faculty and staff to support project funding for instruction, research, continuing education and for fellowships. RIS is the liaison between Penn State and the Office of Federal Programs (OFP), Washington, DC. OFP provides Penn State with continuous monitoring of public and private agency programs. RIS reviews information from numerous sources including the Federal Register and the Commerce Business Daily and receives direct agency mailings. RIS makes information distributions to Penn State to provide an awareness of public and private programs, responds to faculty/staff inquiries about programs and program contacts, and through a Preliminary Proposal Outline (PPO) mechanism, helps locate project support funds with the assistance of OFP and Penn State's Office of Gifts and Endowments (OGE). For detailed information about available RIS assistance, contact M. R. Kohler, 5 Old Main, 814-863-0715.

Penn State Intercom

State's investment for higher education yields high rate of return

Every dollar Pennsylvanians invest in their colleges or universities returns \$1.70 to the state's economy, a new study shows. The 70-cent net return adds about \$1.7 billion annually to Pennsylvania's economy.

"The research indicates that higher education is a valuable asset to Pennsylvania's economy — in fact, it is one of the state's major industries," said John W. Ingram, director of the State Division of the Pennsylvania Economy League (PEL), a non-profit, citizen-supported public affairs research agency.

Ingram, on Tuesday in Harrisburg, reported results of the PEL's 14-month study, "Higher Education and the Economy: A Survey of the Impacts on Pennsylvania's Economy of Its Colleges and Universities."

The study, Ingram added, is believed to be the first of its kind for a major state. Combining data for 125 public and private institutions from 1979-80, the study found that:

- Revenues originating in Pennsylvania from all public and private sources for Pennsylvania's higher education institutions amounted to \$2.5 billion in 1979-80. Spending in Pennsylvania related to higher education was \$4.2 billion, a return of \$1.70 to the economy for every dollar invested.

- The impact of spending by colleges and universities, their employees and students, and by persons employed in the Commonwealth's higher education agencies was \$3.8 billion (excluding capital outlays) — three percent of total retail, wholesale and service industry sales in Pennsylvania in 1979-80.

- Among the major classes of non-government employers, higher education, with 102,000 faculty and staff employees, is the state's 13th largest employer.

- Spending related to higher education

Higher Education's Net Contribution to Pennsylvania's Economy: \$1.7 Billion

For fiscal year 1979-1980

creates an additional 74,876 jobs statewide. The number of higher-education-related jobs thus totals 177,432 — accounting for one of every 27 persons employed in Pennsylvania.

- With an annual payroll of nearly \$1.5 billion for its 102,000 direct employees, higher education has the ninth-largest non-government payroll in Pennsylvania. Its payroll is ranked above those of such industries as food and kindred products, trucking and warehousing, business services, chemicals and allied products, food stores and mining.

- Total payroll for the 177,432 employees related to higher education was almost \$2.5 billion in 1979-80. This

sum represents \$3 of every \$100 of income earned by every worker and owner in all of Pennsylvania's employment sectors except agriculture.

- Total deposits in Pennsylvania financial institutions made by educational institutions, full-time faculty and students and by related businesses were more than \$1.1 billion in 1979-80, helping to expand the credit base for citizens and businesses.

- For every \$1 spent out-of-state, Pennsylvania's colleges and universities brought back \$2.02. In 1979-80, this ratio yielded a net gain of nearly \$500 million in out-of-state money imported into Pennsylvania's economy.

- Capital expenditures by higher

education institutions totaled \$212 million in-state during 1979-80. Two-thirds of it went for new construction, renovation or acquisition of buildings and land. One-third went for the purchase of new equipment from Pennsylvania businesses.

- Although considered to be tax exempt, a number of institutions reported paying federal, state and local taxes in 1979-80 totaling \$3.25 million. The lion's share — \$2 million — went to local governments. In addition, institutions reported paying \$1.1 million in direct user fees to governments for such services as water, sewer, and trash collection.

"It was not possible," Ingram pointed out, "for the study to take into account all of the impacts which higher education has on the economy of Pennsylvania. It does not tabulate the economic contributions of such typical higher education services as conferences and seminars, professional advising, technical assistance, consulting, testing and formal research activities."

"Most persons think of colleges and universities solely as centers for teaching and research," he added. "Their direct economic role as operating enterprises — which is considerable — is often overlooked."

"Those who provide financial support to assure the sustenance and growth of Pennsylvania's colleges and universities as teaching and research centers — alumni, corporations, philanthropies, taxpayers, legislators, government agencies, students and their families — must be kept aware also of the practical economic stakes involved."

The PEL's study was commissioned by the Pennsylvania State Board of Education and the Pennsylvania Higher Education Assistance Agency, with coordination from the Pennsylvania Association of Colleges and Universities. The study was partly supported by the Buhl Foundation of Pittsburgh.

Special convocation at Capitol Campus marks 15th anniversary

More than 500 persons attended the special convocation Nov. 11 marking the 15th anniversary of the Capitol Campus.

Former Governor William W. Scranton, who was instrumental in the development of the campus, delivered the keynote address which focused on the history and motivating factors for higher education

that led to the establishment of Capitol Campus.

"We do not have the best system in the world, but we do have an extraordinary pluralistic system of higher education in the Commonwealth," Gov. Scranton told the convocation gathering.

"What is happening at Capitol

Campus," he said, "isn't done yet. We all know that. We have here an institution that is in the process of building a science and technology building and I am thrilled to see it . . . they are about to begin a Ph.D. program in political science . . . and this particular institution is accentuating business administration and is now establishing an MBA program."

The pluralistic system of education is in place, he added. "Now all we have to do is take it and make it the best there is anywhere at a cost that people can afford."

Other speakers at the convocation were Quentin E. Wood, president of the University's Board of Trustees; President Oswald; Ralph E. Peters, chairman of the

Capitol Campus Board of Advisers; Dr. Eric A. Walker, president emeritus, who was president of the University when Capitol Campus was founded, and Dr. Theodore L. Gross, provost and dean at Capitol.

Also representing the University on the platform were Provost Eddy Coleman Herpel, founding director of Capitol Campus; Dr. Robert E. McDermott, provost at Capitol from 1972 through 1978, and Dr. George D. Wolf, professor of American studies and history and the first faculty member at the campus.

Representing the federal and state governments were U.S. Rep. Allen E. Ertel, and State Senator George W. Gekas.

Participants in Capitol's special convocation were, left to right: Dr. Theodore L. Gross, President Emeritus Walker, and former Pennsylvania Governor Scranton.

Parking regulations are in effect for term breaks

University Park parking rules and regulations are in effect year-round, including term breaks, parking coordinator Allan Derzak reminds faculty and staff members.

The regulations specify that vehicles with current faculty-staff parking permits must be parked in the assigned parking area or in one of the designated "open"

parking areas between 7 a.m. and 5 p.m. Mondays through Fridays.

After 5 p.m., vehicles with current permits may be parked in any bonafide parking space, including individual reserved spaces, visitor spaces, 15-minute spaces or any other reserved space, with the exception of 24-hour spaces as indicated on the individual reserved sign.

Penn Staters

Dr. Eugene N. Borza, professor of history, was one of seven scholars invited to participate in a symposium, "Alexander of Macedon," at Harvard University.

Cosponsored by several Harvard departments and institutes, the symposium drew specialists in art, archaeology, history and literature to discuss aspects of Alexander the Great's impact on the Mediterranean basin and western Asia. Dr. Borza's paper, "The Second Coming of Philip and Alexander," provided an analysis of the contemporary Greek political exploitation of the legends of Philip II and Alexander the Great.

"Art in Byzantine Society: Motive Forces of Byzantine Patronage" was the topic of a Main Paper (Hauptbericht) delivered by **Dr. Anthony Cutler**, professor of art history, at the XVI International Congress of Byzantine Studies in Vienna, Austria.

Dr. Cutler's attendance at the Congress followed a 10-week research tour through Europe, where he studied late antiquities and early Byzantine ivory carvings in private collections, museums and cathedral treasuries. His research was funded by a fellowship from the Institute for the Arts and Humanistic Studies and a grant-in-aid from the American Council of Learned Societies.

Dr. Michael W. Ecker, assistant professor of mathematics at the Worthington Scranton Campus, has been appointed to an advisory panel to the Mathematical Association of America High School Contest Committee. Function of the panel

is to propose and evaluate challenging problems and solutions for three annual contest exams, including the USA Mathematical Olympiad, which is used to identify the best high school math students in the country.

Dr. J. Cordell Hatch, professor of agricultural communications, was in Swaziland, South Africa, during October to help develop a teacher training program. He participated on a U.S. Agency for International Development project paper design team and was responsible for specifying the educational resources, facilities, and equipment needed for teacher training.

Dr. Jan S. Prybyla, professor of economics, presented a paper on "United States and China's Industrial Modernization" at a conference on the "U.S. and China's Modernization" at Princeton University on Nov. 5.

Dr. Daniel Walden, professor of American studies, presented an invited paper on "Richard Wright and Arthur Miller, Technology and Values, the 1930s and 1940s" at Interface '81, hosted by the Southern Technological Institute in Marietta, Ga.

At the Utopian Studies Conference at Virginia Polytechnic Institute and University, he discussed King Champ Gillette, inventor of the first successful safety razor and proponent of a utopian world corporation and national city, called

"Metropolis," which was his solution to the urban crises of the late nineteenth century.

Dr. Eric A. Walker, professor emeritus, has been named chairman-elect for Section M, engineering, of the American Association for the Advancement of Science.

In January, Dr. Walker will become chairman-elect for the first year of a three-year term. He will serve as chairman in the second year and as retiring chairman in the third year. He previously

was representative-at-large for Section M.

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, is co-editor of the revised edition of *The Portable Oscar Wilde* (Penguin Books) with the late Richard Aldington, who edited the original in 1944. The revised edition includes many documents and letters that have surfaced since that time, including the unexpurgated text of Wilde's notorious prison letter, "De Profundis."

25-year chair

William E. Mosso, assistant director for Continuing Education at Behrend College, has had a very healthy career at the University: during his 25 years with Penn State, he has not missed a single day due to illness.

Mr. Mosso, who likes to joke about starting his University tenure in "the dog house" (his first office was in the Behrend faculty's former dog kennel building), is now the senior field representative in Penn State's Continuing Education network. As such, he is responsible for adult education programs in Erie, Crawford and Warren counties.

In recognition of his contributions during his 25 years of service, he received a special resolution of tribute from the Behrend faculty. In the tribute, it is noted he is known in Erie professional circles as "Mr. Continuing Education."

At Behrend, he has been instrumental in the formation of the summer Management Development programs, which have produced some 3,500

William E. Mosso

graduates and which are recognized statewide.

Mr. Mosso also has worked with numerous representatives from business and industry, setting up a wide variety of programs to meet their specific needs.

Promotions

Staff Exempt

Ursula Gusse to manager — HUB Food Service in Housing and Food Services
Ruth Luse to janitor foreman in Physical Plant.

Staff Non-Exempt

Glenn A. Pankuch to senior research technician at Hershey.

Clerical

Karen E. Derstine to customer service clerk A in Bookstore.
Tammy J. Fritz to medical records clerk/receptionist at Hershey.
Stacey Kelley to secretary B in Health,

Physical Education and Recreation.

Selena M. Meyer to clerk, accounting A in Human Development.

Betty Jane Powley to teller in Controller's Office.

Helen M. Rudolph to accounting clerk in Gifts and Endowments.

Mary F. Tier to clerk, production A in Housing and Food Services.

Judith K. Weigel to secretary B at Hershey.

Technical Service

Robert W. Brouse to office duplicator operator in Student Affairs.

Genevieve B. Culp to residence hall utility worker in Housing and Food Services.

Donald Schreffler to senior operating mechanic in Physical Plant.

middle-class women and members of minority groups.

Written for a popular audience, the study is, nevertheless, a serious and comprehensive treatment of issues which concern both women and men from traditional religious backgrounds who are caught up in the social revolution caused by the entry of larger and larger groups of women into the work force. The authors of *Christian Women at Work* develop a theology of work and discuss the meaning of work and its relation to creativity. Such practical issues as the changing role of women, decision-making, discrimination, loneliness, stress, coping, and managing time also are treated.

Co-author of the book is **Martha G. Stout**, executive assistant to the president of Gordon College in Massachusetts. Ms. Stout has an M.A. in English from Penn State.

Obituary

Martin Simcikso, residence hall maintenance worker in Housing and Food Services from 1967 until his retirement Jan. 1, 1978, died Nov. 8. He was 68.

Staff Development

Fifteen staff employees are graduates of the Oral Communications/Talking With People Course, which is designed to help participants learn the basic principles of effective communication, and offers an opportunity for inter-personal communication, interviewing, and public speaking.

Completing the course were **Dorothy Carolus**, associate housekeeping supervisor, Housing and Food Services; **Elmer Cartwright**, assistant housekeeping supervisor, Housing and Food Services; **Charles Croyle**, design and engineering estimator, Office of Physical Plant; **Robert Fooks**, design and engineering estimator, Office of Physical Plant; **Erna Hamilton**, assistant housekeeping supervisor, Housing and Food Services; **Robert Harris**, central control system coordinator, Office of Physical Plant.

Andrew Petkac, senior housekeeping supervisor, Housing and Food Services; **Louis Plank**, supervisor, storeroom operations, Office of Physical Plant; **Jeanne Price**, employment specialist, Office of Personnel Administration; **Greg Ritchey**, senior engineering systems analyst, Management Engineering; **Dean Ross**, coordinator, special facilities, Office of Physical Plant; **Don Rote**, supervisor, trades, Office of Physical Plant.

James Scanlon, broadcast programming specialist, Continuing Education; **Jean Salvage**, administrative assistant, Office of Planning and Budget; **Janis Spalvins**, architectural designer, Office of Physical Plant.

The University offers the EXCEL Program as a training and development program for senior, career-oriented personnel. It is designed to enhance and improve the various relevant skills essential in the proper and effective performance of their jobs.

University employees who completed the course work during the past term include **Kathy Bailey**, accounting clerk. Secretary: **Doris Carter**, conference Secretary: **Continuing Education; Mary**

Grove, secretary B, Agriculture; **Judith Hand**, secretary B, Human Development; **Nancy Hatch**, secretary B, Pattee Library; **Nancy Hommel**, purchasing clerk, Business Services; **Nancy Igo**, secretary B, Student Affairs; **Miriam Johnson**, secretary B, Earth and Mineral Sciences; **Cynthia Krusch**, secretary B, Agriculture; **Cheryl Lucas**, secretary B, Office of the Registrar; **Kay McClellan**, secretary A, Human Development; **Cathi Moyer**, secretary B, Engineering; **Eleanor Sagnmiller**, senior clerk, Student Administrative Services; **Anne Smilowitz**, secretary B, Continuing Education; **Delphine Smith**, secretary B, Continuing Education; **Georgiann Wasson**, coding clerk, Controller's Office; **Donna Weber**, secretary B, Liberal Arts; **Martha Williams**, accounting clerk, Agriculture; **Janet Wolfe**, accounting clerk, Controller's Office.

Twenty-one employees have completed a course in Basic Supervisory Management.

Completing the course were:

Fayne Abel, accounting clerk, Engineering; **Cathy Arney**, secretary A, Agriculture; **Glynis Austin**, ticket manager, University Arts Services; **Mary Bayltes**, senior clerk, Continuing Education; **Terry Cofl**, service advisor, Business Services; **Ron Diehl**, supervisor, accounting files and multith, Controller's Office; **Laura Frye**, secretary B, Business Administration.

Debbie Fudrow, data entry assistant/programmer, Continuing Education; **Vickie Gerontonis**, secretary A, ARL; **Ivan Kagaris**, secretary A, Human Development; **Don Korman**, assistant bursar, Bursar's Office; **Becky Messing**, accounting general, Housing and Food Services; **Joan Miller**, secretary B, Continuing Education; **Shelly Miller**, secretary B, Continuing Education.

Diane Mullen, registration clerk, Continuing Education; **Teresa Reed**, secretary B, Engineering; **Joan Reish**, secretary A, Office of Planning and Budget; **Jean Rose**, secretary B, Business Administration; **Karen Sampsel**, senior clerk, Student Administrative Services; **Jim Stever**, accountant, Bursar's Office; **Lela Weavering**, secretary A, Education

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

November 19-December 3

Special Events

Thursday, Nov. 19

Final Examinations, through Nov. 20.
Board of Trustees meeting, Faculty Bldg.
Early Registration for Winter Term 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields.
Continues through Nov. 20.
Mathematics Colloquium, 4 p.m., Room 115.
McAllister Bldg. Prof. Kshusha Alladi, Institute for Advanced Study, on "Additive Functions and Analytic Number Theory."
Computation Center Seminar, 7:30 p.m., 108 Forum. Introductory seminar on interactive computing with VM and CMS.

Friday, Nov. 20

Final Examinations.
Early Registration for Winter Term 1982, 8:30 a.m. to 4:30 p.m., Room 112 Shields.
Board of Trustees meeting, Faculty Bldg.
Craft Demonstration, 11:30 a.m., Kern Lobby.
Aerospace Engineering Seminar, 4 p.m., Room 212 Hammond. Robert C. Nelson, associate professor, University of Notre Dame, on "Boundary Layer and Side Force Characteristics of a Spinning Axisymmetric Body."
Shaver's Creek Environmental Center, Fireside Reading, 7-10 p.m., Environmental Center.
Interluda Folk Dancing, 7:30 p.m., HUB Ballroom.

Sports: Men's Basketball vs. Athletes in Action, 8:10 p.m.

Saturday, Nov. 21

Sports: Football vs. Notre Dame, 1:00 p.m.

Sunday, Nov. 22

Shaver's Creek Environmental Center, Woods in Winter Nature Walk, 1-3 p.m., Environmental Center.

Monday, Nov. 23

Fixed date for meetings involving Commonwealth Campus faculty.

Tuesday, Nov. 24

International artifacts sale, 9 a.m. to 4 p.m. weekdays, Kern Graduate Building, through Dec. 15.

Fixed date for meetings involving Commonwealth campus faculty.

Thursday, Nov. 26

Thanksgiving Day, University offices closed

Saturday, Nov. 28

Full Term Commencement, 10:30 a.m., Rec Hall.

Sports: Men's Basketball vs. Bloomsburg, 8:10 p.m.

Sunday, Nov. 29

Winter Term Arrival Date.

Monday, Nov. 30

Pattee Library, Distribution of faculty spaces.
Winter Term, 7:15 a.m., C106 Pattee.
Seminar: Job Control Language (JCL) 7:30 p.m., Room 112 Walker Bldg. Continues Dec. 3, 7, 10, 14, 17. Registration: 863-0422.
Sports: Men's Basketball vs. Rider, 8:10 p.m.

Tuesday, Dec. 1

Winter Term Registration.
Continuing Education English and Mathematics Placement Examination, 6:30 p.m., Keller Bldg.

Wednesday, Dec. 2

Winter Term Registration.
Continuing Education Evening Class Registration, Noon to 8 p.m., 101 Kern.

Thursday, Dec. 3

Winter Term Classes Begin.
Continuing Education Evening Class Registration, 9 a.m. to 5 p.m., 101 Kern.
Physics Colloquium, 3:50 p.m., Professor U. Fano, University of Chicago.
Seminar: Job Control Language (JCL) 7:30 p.m., Room 112 Walker Bldg. Continues Dec. 7, 10, 14, 17. Registration: 863-0422.
Steven Smith, recital, 8 p.m., Music Bldg. Recital Hall.

day, 8 a.m.-11 p.m.; Sunday, noon to 11 p.m. Jack Troy, ceramics; Shirley Sturtz, drawings and watercolors; Bill Davis, drawings and water colors. (closes Nov. 20).

Museum of Arts open 11 a.m.-4:30 p.m.

Closed Mondays. Tours, Sundays, 1:30 p.m. Original works from the Museum's collections. Danish Ceramic Design. Gallery talk by William Hull in connection with Danish Ceramic Design, Tuesday, Nov. 24, 10:30 a.m.

Pattee Library: Richard Burke and Chuck Kullman, photographs, East Corridor Gallery. Todd Whitehill, paintings, Lending Services Lobby. Mary McGuire, pottery, Second Floor East and Main Lobby.

Visual Arts Bldg., Zoller Gallery: Gallery Hours: 9 a.m.-5 p.m., Monday through Friday, Saturdays and Sundays, noon-5 p.m. Tony Ray-Jones, photo exhibition, "English Resorts." (closes Nov. 20).

Invisions Gallery of Photography, 212 Arts Bldg.

Gallery Hours: Sunday and Tuesday, noon to 5 p.m., Thursdays, 7-10 p.m. Luciano Franchi De Alfara, III, photographs.

Exhibits

Kern Gallery: open Monday through Saturday.

Messiah sing-in to be held Dec. 6

The seventh annual "Messiah Sing-In" will be held at 3 p.m. Sunday, Dec. 6, in Schwab Auditorium.

The free event, sponsored by the University Choir, Nittany Valley Symphony Orchestra, the Office of Religious Affairs, and the Lutheran Student Association, is designed as an opportunity for community and campus

to come together during the holiday season.

The event annually attracts hundreds of people who are led by Raymond Brown, School of Music faculty member. The Sing-In gives them a chance to sing with a large orchestra and to sing whether or not they have a singing voice. One past participant said it was the first time he's ever seen a crowd get high on Handel.

Soloists are selected from both the University and the community. Persons interested in soloist roles should contact Professor Brown at 865-0431. Instrumentalists who are not members of the orchestra are also welcome to join the group for the Sing-In. There are no rehearsals, but musicians interested in playing should be at the auditorium on Sunday by 2:30 p.m.

Architectural exhibit will open at Museum

The exhibition, *Architectural Fantasy and Reality: Drawings from the Accademia Nazionale di San Luca in Rome, Concorsi Clementini 1700-1750*, will open at the Museum of Art on Dec. 6. The exhibition will be on view through Jan. 31, except for the holiday break, after which it will travel to the Cooper-Hewitt Museum, the Smithsonian Institution's Museum of Design, where it will be on display Feb. 16 through May 2, 1982.

Included are seventy-eight prize-winning drawings from the Accademia di San Luca's (founded 1596) design competitions named for Pope Clement XI, an active patron of the academy. None of the drawings has been previously exhibited in this country.

Among the architects represented are Carlo Stefano Fontana, Bernardo Antonio Vittone, Carlo Marchionni, and Filippo Juvarra. A scale model of one of Juvarra's projects was built for the exhibition by Gil R. Smith with the assistance of Christine Challingsworth, graduate students in art history.

The exhibition, selected by Dr. Hellmut Hager, head of the Department of Art History, will be accompanied by a fully illustrated, scholarly catalog written by Dr. Hager and a group of his graduate students. A series of lectures also is being arranged.

The Broadway Marionettes are featured in A Christmas Carol

A Christmas Carol set for Dec. 6

Over 100 life-sized marionettes will be featured in the Artists Series presentation of the musical adaptation of Charles Dickens' immortal holiday classic, *A Christmas Carol*. The marionette extravaganza will be presented for two performances on Sunday, Dec. 6, at 3:00 and 7:30 p.m. in Eisenhower Auditorium.

Known all over the country for their musical presentation of *Pinochio*, the Broadway Marionettes have been touring the United States and Canada with their puppet magic since 1965. The *Pinochio* production has been presented from the Huntington Hartford Theater in Los Angeles to Madison Square Garden in New York City.

In response to a growing interest by presenters all over the country, the Broadway Marionettes created this new marionette musical, *A Christmas Carol*, for presentation during the holiday season. "Since the Dickens' short story is truly a fantasy," notes master puppeteer Charles Budrow, "it was only natural to come up with a version for puppets. Unlike real actors, ours can appear and disappear, fly, turn cartwheels in mid-air and everything

else a child expects and understands."

Designer and stage manager Alan McMullen explains, "The ghosts multiply, Marley must appear and disappear like magic, and the whole Dickensian world must seem dreamlike to the audience. Particularly when children are involved, our fantasy play must truly be fantastical and that's why puppets work so much better than people."

Actual traditional Christmas carols have been added to the show for all of the audience to sing and enjoy. "As an important part of this performance," adds Budrow, "we wanted to get the whole family involved in the production. While the show is non-secular in nature, we think the spirit of the holiday season is, nevertheless, captured by the play."

Group sales are now available by calling 865-1871, 9:00 a.m. to 4:00 p.m., weekdays. The general ticket sale begins Tuesday, Dec. 1, at 9:00 a.m. at the HUB Booth and Eisenhower Auditorium. Phone orders on MasterCard and Visa may be placed by calling 863-0255 during sale hours.

Pivot poetry magazine is available in area

The newest edition of *Pivot*, the "little poetry magazine," is now on sale in State College and at the University.

Pivot is marking its 30th year of publication, and the new issue—Number 31—is dedicated to the late Katey Lehman of State College—"poet, columnist and staunch friend of *Pivot*."

Pivot's editor, Joseph L. Grucci, is a retired associate professor of English. The new issue contains 45 contributions from poets across the nation.

The issue carries poems from a number of Penn States: Jack Manis, John Haag, John Balaban, Sandra Nestlerode, Brian Shoemaker and Cary Holladay. Over the years, *Pivot* has earned a critical reputation that extends far beyond Penn State. Mail orders can be placed for the new *Pivot* by writing: Joseph L. Grucci, editor, 221 S. Barnard St., State College, Pa. 16801.

International artifacts to be on sale in Kern

An exhibition and sale of international artifacts will begin at the Kern Graduate Commons Nov. 24 and continue through Dec. 15.

Items included in the exhibition are leather coin purses from India, baskets from Indonesia, carved wooden animals from Kenya, silver jewelry from Mexico, and jade earrings from Taiwan. Other artifacts from Bangladesh, Colombia, Hong Kong, Jordan, Korea, Peru, Philippines, and Sri Lanka are represented in the exhibition.

Items may be purchased from 9 a.m. to 4 p.m. Monday through Friday at the Kern Graduate Commons Information Desk.

Cyndy Constantine, graduate student in communication disorders, works with a client at the Speech and Hearing Clinic.

Faculty members receive awards

Three College of Business Administration faculty members have been named winners of the Master of Business Administration Association's annual Excellence in Teaching Awards.

Dr. Stewart W. Bither, professor of marketing, Dr. John Russell Ezzell, associate professor and head of the Department of Finance, and Dr. Ronald J. Teichman, assistant professor of accounting, were honored at a banquet given by the Student MBA Association.

It was Dr. Bither's fourth time to receive the award. Dr. Ezzell and Dr. Teichman have each won it twice.

The recipients are chosen through analysis of the MBA students' written course evaluations. The evaluations are reviewed by officers of the MBA Association along with Dr. Michael P. Hottenstein, faculty director of the MBA Program, and Charles F. Maguire, assistant director.

University is hosting credit unions

The University is hosting the National Credit Union Financial Management School through Nov. 20.

The school is designed for credit union managers and others responsible for making financial decisions for credit unions. It is sponsored by the Credit Union National Association, Inc. Approximately 50 persons are expected to attend from credit unions east of the Mississippi River.

"We're pleased that this school will be held at Penn State for the first time," says Dr. John R. Ezzell, head of the Department of Finance in the College of Business Administration. "It reflects well

on the University that the resources can be assembled here to provide an intensive week of schooling for credit union executives.

"We believe that our participation in programs such as the Financial Management School enables us to do a better job in our teaching and research activities."

Two Penn State faculty members are on the faculty, which includes experts from various universities, financial institutions and credit unions. Dr. J. Randall Woolridge and Dr. William A. Kelly, Jr., assistant professors of finance, are the Penn State representatives.

Anybody There?

To the Faculty and Academic Administrators:

"Graduates of Penn State, we really don't care about you at all."

That is the message that we as a faculty convey at commencement after commencement to the students receiving degrees from our University. Excluding those who must attend the ceremonies (the platform party, college deans, marshals, and very few others), faculty participation in the academic procession has numbered 10, 24, and 6 at the winter, spring, and summer, 1981.

commencements. From a faculty of 1,800 at the University Park Campus, this is appallingly low.

Following four years of undergraduate studies, or a variable number of years of more intensive graduate studies, we as a faculty and as individuals should want to congratulate and acknowledge our graduates for their achievements. Each of the students has worked hard to earn his or her diploma, surely far more of us can find the several hours it takes to recognize

these young men and women.

It seems to me that a mandatory part of the job of each Department Head should be attendance at graduation ceremonies. In addition, any adviser who has a student receiving an advanced degree should be expected to attend that ceremony. If a policy of having only one additional faculty member from each department were to be initiated, along with participation of all academic administrators across the campus, the faculty procession would be truly impressive. Even though we tend to dismiss showiness these days, the pomp and ceremony of a university commencement still has its rightful place.

I urge each of my colleagues to reconsider participation in the academic procession. It is my fervent hope that we will tacitly indicate (by our presence at commencement) to our graduates, their parents, and friends that we do, indeed, care about them and their achievements. The Fall Term commencement will be held Saturday, Nov. 28, in Rec Hall. Please join me in the academic procession. E. Alan Camerono, Associate Professor of Entomology

Speech and Hearing Clinic gives variety of training and service

For more than 40 years, the College of Education's Speech and Hearing Clinic has provided vital, hands-on training for students of audiology, speech pathology and education of the hearing impaired.

It also has served the community — about 1,500 children and adults with speech or hearing problems last year alone.

"Its primary purpose is to support the academic training and research of the communication disorders program," says Dr. Bruce M. Siegenthaler, professor-in-charge of the program. "We're not trying to compete with other providers in the field. The clinic is our laboratory demonstration facility."

Located in Moore Building, the clinic has individual and group treatment rooms and observation facilities, hearing testing suites, a medical examination room, a speech science laboratory, classrooms and offices.

The clinic, which serves community members, University staff and students, is part of the College of Education's Division of Special Education and Communication Disorders. The division head is Dr. G. Phillip Cartwright.

Equipment available in the clinic includes a videotape recording system, diagnostic testing instruments, hearing measurement devices and an array of educational materials.

Undergraduate and graduate students (the trend in the field is a master's degree) get practical experience working with hearing-impaired children, the elderly and victims of strokes and head injuries, for example.

The service the students provide to the public, under supervision, is top quality. Dr. Siegenthaler notes. He adds Penn State's communication disorders program is one of few university programs in the country certified for the quality of both the training in speech and hearing and the professional service it provides.

"The fact that we are certified for both training and services certainly is a work of merit," says Dr. Siegenthaler. "It is an unusual situation."

The certifications are awarded by the Educational Training Board and the Professional Services Board of the American Board of Examiners in Speech Pathology and Audiology.

Debra R. Suffolk, who holds the newly-created position of coordinator of clinical experiences, explains students meet their required hours of clinical

practice by providing therapy to clients in the clinic's six programs.

"All of the practice the students do is under close supervision so that the public gets valid treatment," Dr. Siegenthaler says.

The Audiological Services Program, headed by Dr. Thomas A. Frank, does hearing testing and consultation and hearing aid assessment. Research is carried out on the development of hearing tests and on methods of prescribing, evaluating and fitting hearing aids.

The Child Diagnostic Program, under the direction of Dr. Stephen N. Calculator, evaluates speech, hearing and language disorders in pre-school and school-age children.

Children diagnosed as hearing impaired obtain speech and language therapy in the Hearing Impaired Child Therapy Program. The program, about one year old, is directed by Dr. Richard G. Stoker. Children diagnosed as having only speech or language problems enter the Child Speech Therapy Program, directed by Dr. Frederick F. Weiner.

The Adult Therapy Program serves adults over 16 on a part-time basis, or full-time during academic terms in which clients are housed in University residence halls. The program is under Mrs. Suffolk's direction. The University Program, headed by Dr. James V. Frick, provides examinations and therapy to University students and staff.

The University offered its first accredited courses in the speech and hearing field in 1936, and began offering clinical training for students in 1938.

Yearbook staff seeks campus photographs

LA VIE 1982, the Penn State yearbook, has announced the opening of a new gallery section. The staff of LA VIE 1982 is seeking 5 by 7 inch black and white photographs depicting some aspect of Penn State life for the new section.

Faculty and staff interested in submitting photographs should do so by Dec. 11 at the LA VIE office, 206 Hetzel Union Bldg. The photographs will be judged and the most appropriate selected for the yearbook.

For more information, pick up a specification sheet at the yearbook office or the HUB Desk or call 865-2602.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Nov. 27, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (FE-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

PROJECT ARCHITECT, OFFICE OF PHYSICAL PLANT, UNIVERSITY PARK Responsible to the manager, Architectural and Landscape Design and Engineering, for the development of drawings and specifications for maintenance, alterations, and selected new construction projects for The Pennsylvania State University, including development of details, selection of materials and construction methods and specifications. Bachelor's degree in the field of architecture, or architectural engineering, plus two to four years' effective experience as an architectural designer and draftsman, and a working knowledge of structural and

mechanical systems. Should be a registered architect, or equivalent.

MAINTENANCE FOREMAN, MONT ALTO CAMPUS Responsible to the business manager for the maintenance of the physical plant including scheduling and supervising employees. Maintain necessary records such as time cards, work orders, reports, show drawings and related data. Responsible for the campus water system. High school graduate with two years' vocational training or equivalent plus over two years' effective experience in building and grounds maintenance and construction. Supervisory experience highly desirable.

SENIOR PROGRAMMER/ANALYST, COLLEGE OF AGRICULTURE, UNIVERSITY PARK Responsible to the manager of Data Processing Services for assistance in the solution of computer data processing problems related to the research projects and for supervision of office staff. Develop new computer programs and upgrade, maintain and adapt existing programs. Plan logical steps to solution of problem, use of computer system components, input and output data formats and translate plans into computer instructions. Confer with project personnel to determine the objectives, anticipated results, and use of project data. Advise researchers in the design of survey forms, types of analyses possible and time requirements. Advise and assist researchers in the efficient execution and the debugging of programs. Act as a consultant on joint projects with other universities. Attend pertinent conferences and workshops. Bachelor's degree (or equivalent) with a major in mathematics, statistics, or computer science and two to four years of effective experience is required. Course work in linear algebra, numerical analysis, calculus, statistics, computer languages and systems programming is particularly desirable.

Penn State Intercom

Governor proposes transfer of hospital to University

In a move that "will significantly expand rehabilitation services to disabled people across Pennsylvania," Gov. Dick Thornburgh has proposed legislation to transfer the Elizabethtown Hospital for Children and Youth from the state Department of Health to the University's Milton S. Hershey Medical Center.

"Since this is the International Year of the Disabled Person, I can think of no more appropriate a time to take steps that will expand and strengthen the rehabilitation, therapy and medical services provided to disabled persons at Elizabethtown Hospital, a facility that is unique in the state," Gov. Thornburgh said.

Under the proposal, the state will lease the hospital to the medical center and provide a yearly operating subsidy of \$3.2 million pending construction of a new \$29.6 million hospital facility on the grounds of the medical center to be financed under the state's capital budget.

The purpose of the comprehensive rehabilitation center is to provide for the diagnosis, evaluation, treatment and

rehabilitation of patients who have physical or neuro-developmental disabilities.

The center will be operated from the Elizabethtown Hospital during construction of an addition to the Hershey Medical Center by the Commonwealth's Department of General Services. Upon completion of the addition, the entire Elizabethtown Hospital program will not only be moved to Hershey but also expanded. An annual appropriation for the operation of the Elizabethtown Hospital, as well as capital project funding for the construction at Hershey, will be provided by the Commonwealth — approximately \$46 million.

President Oswald expressed his extreme pleasure that Hershey Medical Center can meet the needs, as requested by the Commonwealth, in the development of a major rehabilitation center. "The focus of the Center's programs will benefit not only patients but also will make Penn State's College of Medicine at Hershey a finer educational facility," he said.

The legislation enacting this initiative will be sponsored by Rep. Kenneth E. Brandt (R-Lancaster), whose district contains Elizabethtown Hospital. The hospital is in the senatorial district of Clarence F. Manbeck, who also supports the transfer.

Commenting on the proposal, Rep. Brandt said, "I'm glad to see the Advisory Board taking a positive approach in seeing that the services at Elizabethtown will be expanded and continued. Most important is the fact that the dedicated employees at Elizabethtown will continue to be a part of providing these services as employees of the Milton S. Hershey Medical Center."

In addition, the proposal is being supported by the Elizabethtown Hospital Advisory Council, which will be retained by Hershey Medical Center.

Elizabethtown Hospital currently provides rehabilitation, physical therapy and surgical services to children age 18 and under with severe neuro-muscular and skeletal problems caused by birth defects or trauma.

When in full operation the new center

will provide comprehensive inpatient and outpatient services for adults as well as children. The existing programs for patients at Elizabethtown (spinal cord injury, complex orthopaedic problems, cerebral palsy, and pediatric head trauma) will be continued and hopefully expanded. Other programs and support services that have a major rehabilitation component, such as pulmonary medicine, will be phased into the Center when construction is complete.

Penn State has an active affiliation with the Elizabethtown Hospital for Children and Youth. Over a period of time Penn State medical faculty members have participated in the care of patients and in teaching medical students and resident physicians at the facility.

Gov. Thornburgh cited a number of advantages that will result from affiliating the hospital with Hershey Medical Center:

- Services, currently limited to children, will be expanded to cover disabled persons of all ages.
- The quality and scope of care will be enhanced by a full range of medical services available at the Hershey Medical Center.
- Greater economies will be realized through the consolidation of support services, and ultimately through construction of a modern, efficient new facility.

Under the terms of the legislation, the transfer will take place on July 1, 1982. Hershey Medical Center, as operator of the Elizabethtown facility, will continue to provide a proportion of services to persons who are unable to pay.

Each of the 200 current employees at Elizabethtown Hospital will be retained by Hershey Medical Center for an initial period following the transfer. Employees will be transferred to the Penn State payroll, and will retain full pension rights in the state retirement system.

University-wide computer position is established

A national search will be initiated to fill the University's newly created position of Director of Computer and Information Systems, and Special Assistant to the President.

"This important position was established," President Oswald said, "after wide-ranging discussions with many groups in the University community, including the University Faculty Senate."

"The new director will work closely with me and the senior officers of the University in developing and implementing comprehensive University-wide computing and information systems that will enable the University to keep pace in this complex and rapidly changing field."

Dr. Oswald said the director of computer and information systems (CIS) will be concerned with centralized operating units — Management Services, Computation Center, Library Information System — and with decentralized CIS facilities in college and Commonwealth Educational System locations.

The director will be responsible for guiding University CIS planning and development, including University data bases, codes and standards, communication systems and network design.

He or she also will evaluate requests for CIS equipment through an advisory committee and will make recommendations to the President for major acquisitions.

Other responsibilities include:

- Provide recommendations for using CIS solutions to administrative, instructional and research problems, and keep users posted on new developments in techniques and facilities.

- Monitor and coordinate CIS units to optimize services available.

- Monitor administrative centralized units and decentralized units, assessing performances in terms of cost effectiveness and user satisfaction.

- Monitor instructional and research applications in terms of progress toward academic goals, cost effectiveness, and faculty-student receptivity.

- Manage CIS related communication systems (telephone lines, cables, microwave), information systems software for academic and administrative communication uses, standards for terminals and related equipment.

- Coordinate administration of University data, and advise on data administration in decentralized units.

Directors of CIS units will report to

appropriate senior academic officers for normal operations and production, and to the new director for planning, acquisitions and leasing, coordination of CIS facilities, networks, data bases, data administration, codes and standards.

Qualifications expected include strong skills in management of computer facilities, and an understanding of University information system needs, both administrative and academic. Administrative experience at university/college level or industrial or government equivalent will be required.

Presidential search is proceeding on schedule

The search for a successor to President Oswald is proceeding on schedule, Board of Trustees President Quentin E. Wood said this week.

Mr. Wood made that statement following a joint meeting on Friday of the two committees conducting the search. The meeting was called to review procedures for the search and responsibilities of each committee.

It was the first time the two — the Trustee Presidential Selection Committee and the University Presidential Search and Screen Committee — have met together.

"Both committees are right on target," Mr. Wood said, referring to the timetable set up for the search earlier this fall.

That timetable was designed by the Selection Committee. Mr. Wood noted that the Selection Committee also has set up procedures for the search, appointed members to the Search and Screen Committee, and outlined qualifications that candidates for the presidency should have. The Selection Committee's next job, he said, will be to draw up guidelines for the interview process.

The Selection Committee's eight members are all Penn State Trustees. Its chairman is Mr. Wood.

The Search and Screen Committee has 15 members, all University faculty and

staff members, students, and alumni. Its chairman is Dr. Robert S. Friedman, professor of political science and director of the Center for the Study of Science Policy, Institute for Policy Research and Evaluation.

The Search and Screen Committee, Mr. Wood noted, is responsible for advertising the post, and seeking out, screening, reviewing and evaluating all applicants. In May, that committee will submit to the Selection Committee the names of up to 10

candidates deemed to be most qualified.

The Selection Committee will present a final recommendation to the full Board of Trustees in November.

"One strong theme in conversation at the meeting was that we really do intend for this to be a national search," Mr. Wood said. "That was included in the charge the Selection Committee originally gave to the Search Committee: to follow every lead to find the best possible candidates, no matter where they may be."

Drive aids former Nittany Lion mascot

A group of University students has launched a drive to raise money for the hospital bills of Norman Constantine, the Nittany Lion mascot for 1976 and 1979. Norm has been in a coma in a Philadelphia hospital since he was struck by a hit-and-run driver on Oct. 17.

Mary Beth Johnstone, a coordinator of the fund-raising project, says the students plan to conduct a phonathon from Dec. 14 to 17. A senior art major, she may be reached at 865-6070.

Checks should be made out to Associated Student Activities — Norm Constantine Fund. Contributions may be

sent to that fund at 202 Hetzel Union Bldg., University Park Campus.

While a student at Penn State, Norm was active in charities, and had a special interest in working with the handicapped. After graduating, he joined the United Cerebral Palsy Association of Philadelphia as a recreational therapist. He ran bowling, wheelchair track and field and other sports programs. He had a karate and martial arts program for the handicapped.

Norm is the son of Mr. and Mrs. Cy Constantine, 1822 Evars St. in Philadelphia.

University ranked with leaders in federal support for research

Of the nation's public universities, Penn State ranks eighth in the amount of federal support provided for research, President Oswald told Trustees.

Dr. Oswald and three other administrators presented to the Board "A Review and Analysis of Current and Future University Research Programs."

Citing the authoritative list of federal support to the top 100 public and private universities published by the National Science Foundation, Dr. Oswald observed that Penn State is ranked 20th. The rankings, he noted, are based on data from fiscal year 1978, the most current available.

The President also said that when inflation is taken into consideration, the University's funding for research is slightly above the level of 1971. He added that nationally, research funds are up only slightly from the level of a decade ago.

In his part of the presentation, Dr. Richard C. Cunningham, vice president for research and graduate studies, explained some of the consequences of federal reductions in research funding. He also outlined the importance of cooperation between industries and

universities in conducting research.

Dr. Cunningham said the University has taken three steps to cultivate cooperation between industry and the University in conducting research.

First, the University established the Office of Industrial Research in July, 1980. To date, the office has assisted in securing funding for four affiliates (industry) programs and has generated responses from some 170 companies and industries.

Second, the University has joined the newly formed Council for Chemical Research, and third, it has changed its patent policy and procedures to make them more flexible.

Rounding out the presentation were the University's two newest academic deans, Samuel H. Smith, Agriculture, and Wilbur L. Meier, Engineering.

Both highlighted recent trends and developments in their areas and outlined their concerns and goals for the future.

Holiday mail service changes to be made

During the period when offices are closed at University Park for the Christmas break, from 5 p.m. Wednesday, Dec. 23, to 8 a.m. Monday, Jan. 4, interdepartmental mail service, U.S. mail service and United Parcel service will be suspended.

If, however, a department has a special need for delivery of incoming U.S. mail on Dec. 24, 28, 29, 30 and/or 31, arrangements can be made for the U.S. Postal Service to deliver by calling University Mail Service, 865-4051, before 5 p.m. Friday, Dec. 11.

A department requesting this service is responsible: (1) for assigning an employee to be at work in the building at a specified time to receive the mail; and (2) for receiving all incoming mail for the building in which the department is housed.

The U.S. Postal Service will only sort incoming mail by building, not by department.

Trustees authorize sale of Harris Twp. land

Trustees have authorized the sale of a 7.69-acre tract of land in Harris Township, Centre County.

"The property, once the site of a ski lodge and recreational area, no longer is needed by the University," Robert A. Patterson, senior vice president for finance and operations, said.

The lodge burned down 30 years ago. Mr. Patterson said. The land originally was purchased from the Boalsburg Water Company and adjoins the water company's property and that of a private owner.

Mr. Patterson said that at least two potential buyers have expressed interest in the land. It will be sold either at public auction or by sealed bid.

Pianist Steven Smith will present recital

Ravel's "Gaspard de la Nuit," inspired by three poems of Aloysius Bertrand, will highlight a recital by pianist Steven Smith, associate professor of music, at 8:30 p.m. Monday, Dec. 7, in the Music Bldg. recital hall.

Dr. Smith also will perform Two Preludes by French composer Jean-Pierre Benoit, J.S. Bach's Italian Concerto, Beethoven's Sonata in A Major, opus 103 and the Scherzo in C Sharp Minor, op. 103 by Frederic Chopin.

The recital, sponsored by the School of Music, is free and open to the public.

President Emeritus Walker addresses Trustees after the unveiling of his portrait

1,800 receive degrees at commencement

About 1,800 students received degrees at Fall Term commencement exercises Saturday in Recreation Bldg.

Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, spoke. President Oswald presented degrees under the authorization of Dr. Joel N. Myers, University trustee. Dr. Robert E. Dunham, vice president for undergraduate studies, presided.

Artists Series will present hit musical

One Mo' Time!, New York's red-hot jazz musical smash hit will be performed at Eisenhower Auditorium at 8:30 p.m. Wednesday, Dec. 9, under the auspices of the Artists Series.

The show turns back the clock to 1926, taking the audience behind-the-scenes where the likes of Bessie Smith, Ma Rainey, Bill "Bojangles" Robinson, and "Sweet Mama Stringbean" (better known as Ethel Waters) recreate a night at the legendary Lyric Theatre in New Orleans. Filled with sizzling songs, fancy dancing, and hot jazz the show features some two dozen memorable hits, such as "Darktown Strutters Ball," "A Hot Time in the Old Town," and "He's Funny That Way" performed by the talented gang of four backed by a lively New Orleans band known as the Blue Serenaders.

Tickets to *One Mo' Time!*, which is part of the Music Series, are limited to Section 1 and 3 seats only. These tickets will go on sale at the HUB booth and Eisenhower Auditorium on Monday, Dec. 7, beginning at noon.

INTERCOM is an internal communications medium published weekly during three days of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Overnight parking ban detailed

Overnight parking will be prohibited in most University lots from Dec. 1 through March 15, according to Allan A. Derzak, University parking coordinator.

Signs stating, "No parking 2:30 a.m. to 6 a.m.," will be placed at the entrance of lots affected. The regulation will be in effect if snow is on the ground or not.

Overnight parking will be permitted in

areas not posted for snow removal, but vehicles must be moved by 7 a.m. if the area is not an open lot, Mr. Derzak notes.

Open lots not posted for snow removal include Blue E, near the Computation Center; Red C, the gravel lot near the Foods Building; and Orange F, near the football practice field.

Included in the lots which are off limits to overnight parking are the Keller Conference Center parking area, visitor parking areas and the nursing education patient unloading area.

"When parking lines are covered by snow, the first few vehicles that are parked will determine how efficiently the remainder of the parking lot can be used," Mr. Derzak explains.

He suggests that persons parking in snow covered lots "take a moment or two and get out of their vehicles to clear a small section of lot to determine where the lines are."

Testing Services seeks Winter Term requests

Faculty members planning to bring work to University Testing Services (UTS) in Winter Term are asked to call 863-2802 and complete a term request as soon as possible.

Faculty members or teaching assistants who have never worked with UTS should attend an orientation session before completing a term request.

Orientation sessions are scheduled for 7:30 p.m. Monday, Dec. 7; 10:30 a.m. Tuesday, Dec. 8, and 3 p.m. Wednesday, Dec. 9, all in Room 173 Willard. Call 863-2802 to make a reservation for any of the sessions.

Sports professionalism examined by Colloquy

Dr. Allen L. Sack, director of the Center for Athletics' Rights and Education, will speak on "Professionalism in Intercollegiate Sports" at 7:30 tonight in the Main Lounge of the Hetzel Union Bldg.

The free talk is sponsored by the University's Colloquy Series.

On Friday, Dec. 4, Dr. Sack will conduct question and answer sessions for the College of Health, Physical Education and Recreation and the Department of Sociology.

Forms reminder issued by Controller

The Controller's Office reminds those employees who filed Earned Income Credit Advance Payment Certificate (W-5) or State Income Tax Non-Withholding Application (RIT-214) for 1981 that these forms expire Dec. 31.

If you qualify and wish to continue your exemption, or if you are applying for the first time, you must file a W-5 and/or RIT-214 prior to Dec. 21. Forms are available from the Payroll Department, Room 301 Shields Bldg.

Seminar series set on 'straight talk about sex'

"We believe religion should help us accept ourselves as sexual beings. Acceptance of ourselves without guilt is the goal of our program being held daily Dec. 7 through 11 in the HUB Main Lounge at 11:30 a.m.," says the Rev. Ned E. Weller of The United Ministry at Penn State.

"Straight Talk About Sex" is the theme for the daily presentations and evening seminars. The first program's speaker is Dr. Graham B. Spanier, professor of human development and sociology, on the topic "Pre-Marital Sex and the Sexual Revolution." The seminar is at 7:30 p.m. in HUB Room 324.

Dr. Edward W. Wickersham, associate professor of biology, will speak Tuesday, Dec. 8, on "Forms of Sexual Expression."

Dr. Steven Crain, clinical psychologist, will speak on Wednesday, Dec. 9, about "Sexual Dysfunction." That evening's seminar will be led by Dr. Wickersham. Some explicit films will be shown.

Thursday's program, on "Sexual Values and Guilt," will feature Dr. Robert A. Walker, assistant professor of health education, and Ms. Annette Ranck, clinical psychologist, as speakers. The evening seminar is in HUB Room 317.

Holiday shopping guide:

A browse through gifts available at University Park

The Museum of Art

Each holiday season the Museum of Art's gift store is filled with presents that say the magic of Christmas and this year is no exception. Items from all over the world that have been selected by Aviva Gorlow, gift store manager, occupy every corner of the store. Adjoining the Visual Arts Building, the store is open from 11 a.m. to 4:30 p.m., Tuesdays through Sundays. Closed Mondays. (Dec. 23 will be their last day for Christmas sales.) Some items may be available in limited quantities. For that special Christmas gift, choose from:

- Indian hand-woven cotton rugs in vibrant colors (\$23.75)
- Natural wool earth-tone tapestries from Peru (\$21)
- Replicas of antique weathervanes (\$14 and up)
- One-of-a-kind German nutcrackers (\$24.50 to \$40)
- Replicas of Chinese export porcelain (made for Historic Charleston and the Metropolitan Museum of Art) (\$19 and up). Whole sets are available.
- Decorative enameling on glass hanging plaques (\$10.50 and up)
- An array of decorative boxes (brass, petit point, wood, soapstone) (\$2.75 and up)
- Ceramic plates by Roger Zellner of the Art Dept., Altoona Campus (\$20, \$30, \$40)
- Antique prints (approx. 1843 to 1878) of Pennsylvania cities, towns and historical events (\$15 to \$35)
- "Scherebnitte" — framed scissor cuttings of Pennsylvania Dutch designs (\$15 and up)

The Museum has an unusual and unique collection of jewelry that is indicative of cultures from other countries to jewelry with artistic and historic expression from American craftsmen.

- Brass, silver, copper and enamel earrings (Assorted prices)
 - Sterling silver, enamel and stone (garnets, tigers eye, etc.) rings (Assorted prices)
 - Brass and copper purse necklaces from India (\$6)
 - Brass and sterling on brass kohl bottles from India (\$6.50)
 - Art Nouveau pewter pendants, key rings and picture frames (\$6 to \$9)
 - 18 kt. gold plate on brass museum replica pendants and pins, inspired by American iron hardware (\$12 to \$16)
 - Brass animal pins, crafted in Wisconsin (\$10)
 - Sterling silver snowflake from the Metropolitan Museum of Art, can be used as a pendant or an ornament (\$24)
 - Books at the gift store will both delight and surprise the book lover on your gift list with the wide variety of subjects they cover. Areas include photography, stencil design, needlepoint, art, quilting, and many others. Some examples:
 - For children, *Nutcracker Ballet — Cut & Assemble Toy Theatre*, complete with dolls and stages (\$3.95)
 - Paper doll books of John Wayne, Marilyn Monroe, Pavlova and Nijinsky, and others (\$2.75, \$2.95)
 - *Design and Chart Your Own Needlepoint* (\$2.95)
 - *Iron-On Transfer Pattern Books* (\$1.75)
 - *Great Luxury Liners — 1927-1954* (\$8.95)
 - *Steinlen Cats* (\$2)
 - *Women at Work — 153 Photographs* (\$6)
 - *Rembrandt Bible Drawings* (\$2)
 - *A Short History of Glass* (Corning Museum of Glass) (\$5)
 - *Wine and The Artist — 104 Prints and Drawings* (\$5.95)
 - *The Cookbook, from the Worcester Art Museum* (\$10.95)
 - *Victorian Fashions and Costumes from Harper's Bazaar 1867-1898* (\$8.95)
- The gift store has many different ideas for stocking stuffers for family and friends.

For children:

In the interest of making Holiday shopping easier, INTERCOM presents its third annual listing of gift ideas that are available at University Park. Sales locations will be open until Dec. 23 unless noted otherwise.

Compiled by Diane M. Lisko

Imported, hand-carved boxes in International Artifacts Exhibition and Sale

- Fiber Optic Wand (\$5, without batteries)
 - Sunprint Kit — make photographic type images without chemicals (\$2.40)
 - Touch Me — a liquid crystal toy (\$2)
 - Origami folding paper sets (\$2)
 - Miniature paint boxes from England (\$1)
 - Mini wooden birds from India (25c, 50c)
 - Mexican wooden jumping jacks (\$1)
 - Wooden bird whistles from China (60c)
 - Calligraphy sets (\$3.95)
 - Ikaso construction kits, an adult tinker toy (\$1.35 to \$5)
 - Small art subject trays from Italy (\$2)
 - Leather change purses from India (\$2)
 - Eight Baby pin cushion from China (\$3)
 - Bird, butterfly and fish pins from Japan (29c)
 - Wooden needle cases from New Hampshire (35c)
 - Zwiggles — whimsical wooden creatures to delight all ages (\$2)
- Special items to meet your holiday needs and to help you start the new year are also available:

- Museum art subject:
 - Christmas cards (25 for \$3.75 to 25 for \$8.50)
 - Wrapping paper (85c to \$1.50)
 - Notepaper (\$2.25 to \$2.95)
- Clay Christmas tie tacs, pins and earrings (\$2.50 to \$4.50)
- Engagement Calendars:
 - Metropolitan Museum of Art, *A Kingdom of Flowers* (\$6.95)
 - Smithsonian, *Birds* (\$6.95)
 - Philadelphia Museum of Art, *Fun and Games* (\$7.95)
- Metropolitan Museum of Art, *Unforgettable People* Address Book (\$12.95)
- Metropolitan Museum of Art, *Gardener's Diary* (\$12.95)
- Metropolitan Museum of Art, *Birthday Book* — a permanent record of birthdays (56.95)
- Ornaments for your Christmas tree:
 - Jack-in-the-box (\$2.70)
 - Red metal wagons (\$3.50)
 - Sports figure ornaments (\$5.50)
 - Chinese silk hand-embroidered rocking horses, birds, elephants (\$3 to \$5)
 - Train set ornaments (\$1.30)
 - Knit animals from China (\$3.25) and Peru (\$2.80)
 - Brass Long Life symbol (\$3.50)
 - Indian silk stuffed animals (\$1.50)
 - Wooden spinning wheels from New Hampshire (\$2.65)
 - Clay Dough Birds from Guatemala (\$1.75)

International Artifacts Exhibition and Sale

Sponsored by the Kern Graduate Commons, the International Artifacts Exhibition and Sale provides yet another source for presents from the four corners of the world. You can purchase silver jewelry from Mexico, carved wooden animals from Kenya, jade earrings from Taiwan, or leather coin purses from India, as well as artifacts from Jordan, Indonesia, Peru, Korea, the Philippines, Sri Lanka, Colombia, Hong Kong and Bangladesh. The sale will run through Dec. 15th. You can make your holiday selections of international artifacts from the showcase exhibit in Kern. Items may be purchased from 9 a.m. to 4 p.m., Monday through Friday, at the Kern Graduate Commons Information Desk.

Penn State Bookstore

To help the University community cut costs this Christmas, the Penn State Bookstore's fourth annual Faculty/Staff/Student Appreciation Sale will have savings on gifts, wrappings, books and more. The sale runs from Dec. 14 through Dec. 18 at each of the Bookstore's campus locations. All merchandise will be 20 percent off (excluding textbooks, calculators, and other limited items) and all Christmas items will be reduced 30 percent. They will also be offering non-text books and calendars at a 20 percent discount during the sale at the McAllister Building basement Bookstore location. For that Christmas present with the Penn State touch, check into the 20 percent discount savings at the Bookstore's Clothing and Gifts location on the main floor of the HUB. This location will also have a special sale table with further reductions.

Craft Centre

For presents that have been skillfully handcrafted and represent University talent, stop by the Holiday Instructors' Sale of the Craft Centre. Craft items and art work by instructors who are local artists or teach in the Art Department are on display in the Browning Gallery on the first floor of the Hetzel Union Building. Crafts featured in the sale include pottery (mugs, bowls, tea sets, sachet bottles); macramé; woven scarves; batik holiday cards; wheat weaving; drawings and silk-screen prints. The sale will be held on Dec. 14 and 15 from 10 a.m. until 4 p.m.

Greenhouses

Numerous varieties of plants await buyers at the University Greenhouses for decorating or gift-giving this holiday season. Red, white and pink poinsettias (\$1.50 and up) are available. Other traditional Christmas plants on sale include Christmas Cacti (\$3), cyclamen (\$6), Christmas cherry (\$1), kalanchoe (\$5), and Norfolk Island pines (\$3 and up). The Greenhouses will also offer gardenias (\$6, \$12), Reiger begonias (\$4.50, \$6.50), African violets (\$3.50), and glounia (\$3.50), along with other assorted plants. Prices of plants may vary according to size. The Greenhouses will also make some special arrangements upon request (865-2482). Prices would be quoted at the time of request. Sales take place in Headhouse 2, behind Tyson Building, Mondays through Fridays. Extended holiday hours, 10 a.m. to 4 p.m., are in effect through Dec. 23. The Greenhouses will also be open on two Saturdays, Dec 5 and 12, from 10 a.m. to 4 p.m.

Creamery

Already renowned for its tasty cheese, ice cream and other dairy products, Penn State's Creamery offers these specialties in a variety of gift ideas sure to make your Christmas entertaining and feasting especially delicious. Gift box assortments top the list of Creamery gift suggestions. Sure to delight the cheese connoisseur is a gift box assortment of Creamery specialties (cheddar cheese, smoked cheddar cheese, honey, cream cheese, and two cheese spreads) for \$13. Another gift selection consists of a University Creamery cutting board and a variety of cheeses for \$15. The cutting board may be purchased separately for \$9 or an alternate cutting board gift selection may be assembled with your own choice of items from the Creamery. Special shipping boxes for the cheese are furnished upon request. Ideal as a stocking stuffer or to accompany the gift box assortments is a wooden-handled cheese cleaver with the Nittany Lion etched on its stainless steel blade for \$3. The Creamery's famous ice cream will be available in two special flavors, rum raisin and eggnog, during the holiday season. Ice cream can be packed in dry ice for a small charge. Creamery hours are 7:30 a.m. - 5:30 p.m., Mondays through Saturdays, and 9:30 a.m. - 5:30 p.m. Sundays.

Poultry Sales

Christmas dinner just wouldn't be complete without a tender, juicy turkey and all the trimmings. To find the tastiest one for your holiday feasting, visit Poultry Sales. They have Christmas turkeys, ranging in weight from 8 to 18 pounds, roasters and eggs. Capons or pheasants will not be available this year. The sales room is located at the poultry farms (next to the outdoor swimming pool) and is open every Thursday from 10 a.m. to 3 p.m. During Christmas week, Poultry Sales will be open on Dec. 23.

The Penn State Press

Books are the type of Christmas present that keep on giving all year long — to be enjoyed before a cozy fireplace during the winter months or to be leisurely read on a bright summer's day. And the Penn State Press has a wide selection of books that are designed to inform and entertain. Their books are available to any faculty or staff member at a 20 percent discount year round. The following books are sold at special Christmas discount prices through Dec. 23.

- The 270 photographs reproduced in *A Pennsylvania Album: Picture Postcards, 1900-1930* capture a way of life in each of Pennsylvania's counties during

University Park Calendar

Winter Term 1981-82

Thursday, Dec. 3

Winter term classes begin.
Spring Term pre-registration accepted, Room 112 Shields, through Jan. 7.
Continuing Education Evening Classes registration, 9 a.m.-5 p.m., Room 101 Kern.
HUB Craft Centre class registration, noon-5 p.m., Room 312 HUB, through Dec. 10.
Physics Colloquium, 3:30 p.m., Room 117 Osmond U. Fano, Univ. of Chicago.
Job Control Language (JCL) Seminar, 7:30 p.m., Room 112 Walker. Continues Dec. 7, 10, 14, 17. Registration: 863-0422.
Sports: Swimming (women) vs. Syracuse & North Carolina, 1 p.m., (men) vs. West Virginia, 7 p.m.

Friday, Dec. 4

Shaver's Creek Environmental Center Holiday Party, 7 p.m., (members only).
Sports: Swimming: Penn State Relays, 1 p.m., trials, 7 p.m. finals. Wrestling: Penn State Invitational, 1 and 7 p.m. Ice hockey vs. Cortland State, 8 p.m.
Holiday Festival VIII, Opening Reception, 12:30 p.m., Kern Lobby.

Saturday, Dec. 5

AAUW Mini-Used Book Sale, 9 a.m.-5 p.m. Also Dec. 6, 12-5 p.m.
France-Cinema, Schindler, *The Tin Drum*, 6:30 and 9 p.m., Room 112 Kern. Also Dec. 7.
Sports: Swimming: Penn State Relays, 9 a.m., trials, 3:30 p.m. finals; Wrestling: Penn State Invitational, 1 and 7 p.m.

Sunday, Dec. 6

Shaver's Creek Nature Center Holiday Decorations workshop, 1-5 p.m. Registration: 865-1851.

Artists Series: "A Christmas Carol," 3 and 7:30 p.m., Eisenhower Auditorium.
Sports: Fencing (women) vs. Alumnus, 9 a.m.
Holiday Festival VIII, International Fair, noon-6 p.m., HUB Ballroom; Messiah Sing-In, 3 p.m., Schwab; International Art and Artifacts Exhibits, HUB Art Alley, through Dec. 13.

Week of Dec. 7

Monday, Dec. 7

International Programs Symposium, 11 a.m.-5 p.m., Room 101 Kern. "International Development: Are Women Losing Out?" Information: 865-5441.

Holiday Festival VIII, International Music, noon, Kern Lobby.

MCB Seminar, 4 p.m., 101 Althouse, Robert A. Schlegel on "Mercyenne 540: A Membrane Stain of Leukemia Cells and Immature Hematopoietic Cells."

Interdisciplinary Symposium, 8 p.m. presentation, Room 101 Kern. Madu Prakash, Ed. Theory and Policy, on "Ethical and Metaethical Relativism — A Consideration of Moral Relativism and Its Implications for Moral Education."

Graduate Women in Management, 7:30 p.m., Room 305 HUB. Mimi U. Coppessmith, President, Barash Advertising and Morgan Signs, on "The Business World: What to Expect."

Stephen Smith, recital, 8 p.m., Music Bldg. Recital Hall.

Tuesday, Dec. 8

Holiday Festival VIII, International Music,

noon, Kern Lobby.
MCB Seminar, 11 a.m., 101 Althouse, Robert A. Schlegel on "Mercyenne 540 as a Probe of Lipid Bilayer Symmetry and Receptor-mediated Endocytosis."

Liberal Arts Brown Bag Seminar, noon, 124 Sparks. Stephen R. Couchon "More Cossacks of the Local Country: Pennsylvania Coal and Iron Police."

English Colloquium, 1-4 p.m., Room 301 HUB. Richard E. Young, Carnegie-Mellon Univ., on "Writing Can be Learned but it Cannot be Taught: Common Sense and Uncommon Knowledge."

Workshop, Assertive Training for Minorties, 7:30 p.m., Conference Room, Walnut Bldg. Dr. Howard Hall. Also Dec. 15.
International Student Affairs Lecture, 7:30 p.m., Room 112 Kern.

Wednesday, Dec. 9

Holiday Festival VIII, Holiday Plant Sale, noon-4 p.m., Kern Lobby; Czechoslovakian Dough Sculpture Demonstration Workshop, 7 p.m., Kern Lobby.

Commons Noontime Concert, holiday music, Kern Lobby.

Biology Seminar, 6th period, 8 Mueller Lab. Dr. Sievert Rohwer, Dept. of Zoology, Univ. of Washington, on "Deception and the Evolution of Animal Communication."

Campus Colleagues, 4:30 p.m., Nittany Lion Inn. "Conversation with members of the PSU Commission for Women."

Alard String Quartet, 8 p.m., Music Bldg. Recital Hall.

Artists Series, "One Mo' Time," 8:30 p.m., Eisenhower Auditorium.

Holiday Festival VIII, Holiday Luncheon, 11 a.m.-2 p.m., Kern Cafeteria; Linda Rossman, "Wheat Weaving," 11:30 a.m., Kern Lobby.

Film, "Make Mine Music," 6:30 and 8:30 p.m., Room 112 Kern.

Psi Delta Kappa luncheon, 11:30 a.m., 101 Kern.

Economics Seminar, 3 p.m., 101 Kern. Physics Colloquium, 3:30 p.m., 117 Osmond.

R. Parks, Univ. of Maryland, on "Surface Phase Transitions."
Department of Speech Communication lecture on computer literacy, 4 p.m., Room 112 Kern. Dr. Carolyn Marvin, University of Pennsylvania, on "Computer-Ease: A Twentieth Century Literature Emergent."

Friday, Dec. 11

Holiday Festival VIII, International Craft Demonstration, 11:30 a.m., Kern Lobby; Un-Common Snowflake Buffet, 6:30 p.m., Room 101 Kern.

Saturday, Dec. 12

Holiday Festival VIII, Children's Christmas Party, noon-3 p.m., Assembly Room, Walnut Bldg.; International Coffee House, 8 p.m., Kern.

Sports: Swimming (men) vs. St. Bonaventure, 2 p.m.

France-Cinema, Truffaut, *Jules and Jim*, 7 and 9 p.m., Room 112 Kern. Also Dec. 14.

Sunday, Dec. 13

Shaver's Creek Nature Center Holiday Decorations workshop, 1-5 p.m. Registration: 865-1851.

Holiday Festival VIII, Christmas Caroling Around Campus, 8 p.m., Eisenhower Auditorium.

Week of Dec. 14

Monday, Dec. 14

Late registration deadline.
Add deadline.
HUB Craft Centre Instructors' Holiday Sale, 10 a.m.-4 p.m., HUB Gallery. Also Dec. 15.

Tuesday, Dec. 15

Senate Committee on Faculty Affairs, 9:30 a.m., Room 101 Kern.

Senate Undergraduate Instruction Committee meeting, 9:30 a.m., Room 101-A Kern.

Liberal Arts Senators meeting, 11:30 a.m., Room 101 Kern.

University Faculty Senate meeting, 2:10 p.m., Room 112 Kern.

College of Ed. Faculty Council meeting, 2:20 p.m., Room 101 Kern.

Artists Series film, "Aida," 8 p.m., Eisenhower Auditorium.

Wednesday, Dec. 16

Deadline for graduate students to pay thesis fee for March graduation.

Commons Noontime Concert, holiday music, Kern Lobby.

Paul Robeson Film Series, "Showboat," 7:30 p.m., Assembly Room, Walnut Bldg.

University Readers Christmas Reading, 7:30 p.m., Room 112 Kern. Dr. Tony Lentz, Dickens' "A Christmas Carol." Also Dec. 17.

Thursday, Dec. 17

Physics Colloquium, 3:30 p.m., Room 117 Osmond. A. Komar, Yeshiva Univ., on "Constrained Dynamical Systems."

Saturday, Dec. 19

Christmas and New Year's recess begins, through Jan. 3.
Sports: Basketball (women) vs. St. Joseph's, 2 p.m.

Week of Dec. 21

Monday, Dec. 21

Sports: Basketball (men) vs. Nebraska, 8:10 p.m.

Thursday, Dec. 24

University offices closed for holiday break through Jan. 3.

Week of Jan. 4

Monday, Jan. 4

Winter Term classes resume.

Tuesday, Jan. 5

Pass-Fail through Jan. 7.

Wednesday, Jan. 6

Commons Noontime Concert, Glenn Kidder. Kern Lobby.

Sports: Basketball (women) vs. LaSalle, 7:30 p.m.

Thursday, Jan. 7

Drop Deadline.
Spring Term pre-registration deadline.
Course Repeat Deadline.
Economics Faculty meeting, 3 p.m., Room 101 Kern.
Physics Colloquium, 3:50 p.m., Room 117 Osmond (TBA).
Slide Show, Felicia Bell, "Kenya, My African Experience," 7:30 p.m., Conference Room, Walnut Bldg.

Friday, Jan. 8

Sports: Gymnastics (women) vs. Michigan State, 8 p.m.; Ice hockey vs. Delaware, 9:15 p.m.

Saturday, Jan. 9

Sports: Swimming (women) vs. Brown, 1 p.m.; Volleyball (men) vs. Alumni, 1 p.m.; Ice hockey vs. Delaware, 8 p.m.; Basketball (men) vs. Philadelphia Textile, 8:10 p.m.

Sunday, Jan. 10

Artists Series: "The Best Little Wherehouse in Texas," 3 and 8:30 p.m., Eisenhower Auditorium.
Sports: Basketball (men) vs. South Florida, 8:10 p.m.

Week of Jan. 11**Monday, Jan. 11**

Interdisciplinary Symposium, 7:30 p.m., Room 101 Kern (TBA).

Wednesday, Jan. 13

Commons Nontime Concert: Richard Sleight, Kern Lobby.
English Colloquium, 8 p.m., Room 101 Kern.
Robert D.C. Downs, BBC Film, "Going Gently."

Thursday, Jan. 14

Physics Colloquium, 3:50 p.m., Room 117 Osmond. A. Redfield, Brandeis Univ., on "Pulsed Fourier Transform NMR and Transfer RNA."

UFCV David H. Bell, *Indian Summer*, 8 p.m., Pavilion Theatre. Also Jan. 15, 16, 19-23, 26-30.

Friday, Jan. 15

Artists Series, Paul Osborn, "Morning's at Seven," 8:30 p.m., Eisenhower Auditorium.
Sports: Basketball (women), Coca-Cola Lady Lion Classic, 6 and 8 p.m. Also Jan. 16.

Penn Staters

Dr. Z. T. Bieniawski, professor of mineral engineering, has received appointments to two National Research Council committees. He is serving on the U.S. National Committee on Tunneling Technology and the U.S. National Committee on Rock Mechanics. The National Research Council is the principal operating agency of the National Academies of Sciences and Engineering.

Dr. Craig F. Bohren, associate professor of meteorology, has been appointed a consulting editor of *Weatherwise*, a bimonthly magazine on the weather published by Helder Publications, Washington, D.C.

Dr. G. W. Brindley, professor emeritus of mineral sciences, presented an invited paper at an international colloquium in Montreal at which the role of the French language in science and technology was discussed. While in Montreal, he gave an invited lecture to the Geoscience Department of McGill University on "Order-Disorder in the Structures of Clay Minerals."

Dr. John J. Cahir, professor of meteorology, has been elected president

of the National Weather Association, an organization of some 1,500 meteorologists with special interests in weather analysis and prediction. In an address at the group's annual meeting, Dr. Cahir called for the National Weather Association's support for new observational systems, new approaches to prediction of severe storms, and new arrangements for communicating forecasts to users.

Dr. T. Emmanuel Feuchtwang, professor of physics, and **Dr. Nicholas Miskovsky**, assistant professor of physics at Altona, participated in a NATO Advanced Study Institute on Quantum Metrology and Fundamental Physics Constants at the Ettore Majorana Centre for Scientific Culture in Ence, Sicily.

Dr. Joseph L. French, professor in charge of educational psychology and school psychology in the College of Education's Division of Counseling and Educational Psychology, has been elected to a three-year term on the Committee on Accreditation of the American Psychological Association.

Composed of ten members, this committee evaluates the applications and

supporting material of all psychology programs seeking approval in the nation.

Dr. Theodore L. Gross, provost and dean at Capitol Campus, was an invited speaker at the annual conference of the American Association for the Advancement of the Humanities. He spoke on "Specialization and Graduate Education in the Humanities."

Dr. Edwin L. Herr, professor and head, Division of Counseling and Educational Psychology, delivered the keynote address at an international conference in Tokyo, Japan, which observed the 30th anniversary of the introduction of counseling psychology into Japan by the Education Commission created by the occupation government of Gen. Douglas MacArthur.

While in Japan, Dr. Herr addressed the annual conference of the Japan Society for the Study of Career Guidance and the Japan Association of Student Counseling, and served as a consultant to the Counseling Institute of Sophia University.

Dr. C. L. Hosler, dean of the College of Earth and Mineral Sciences and professor of meteorology, represented the United States at a meeting of the World Meteorological Organization in Geneva, Switzerland. Topic of the meeting was meteorological education and training in lesser developed countries. Dean Hosler is a past president of the American Meteorological Society.

Dr. Philip A. Klein, professor of economics, spent the Fall Term as Academic Visitor at the London School of Economics, during which time he attended the 15th Conference of the Centre for International Research on International Tendency Surveys in Athens, Greece.

Dr. Joseph Jordan, professor of chemistry, presented invited lectures at Oakland University, Rochester, Michigan, and the University of Michigan

at Ann Arbor on "Resource Development in Analytical Chemistry for the New Synfuel Technologies."

Dr. Philippos Loukissas, assistant professor of urban and regional planning, participated in a training seminar for human settlement managers of the Mediterranean coastal areas in Palermo, Italy. The program was organized by the Italian National Center for Technical Education and sponsored by UNESCO.

Dr. G. P. Patil, professor of mathematical statistics, presented a series of lectures in South Africa as a guest of the South African Statistical Association, Medical Research Council, and the Council of Scientific and Industrial Research. He gave inaugural and final keynote addresses at the annual conference of the South African Statistical Association.

Dr. Patil also gave a series of seminars at various universities and led a series of scientific discussions at the Institutes of Mathematical Sciences and Biostatistics. The subjects covered during the visit included perspectives in statistical ecology, dynamics of exploited populations, analysis of biological diversity, and applied statistical distribution theory.

The Rev. Dr. Derald W. Stump, Episcopal chaplain and associate in Religious Affairs, has been elected treasurer of the Episcopal Society for Ministry in Higher Education. Dr. Stump is a charter and founding member of the Society.

Dr. Robert L. Webb, professor of electrical engineering, has been elected a Fellow of the American Society of Mechanical Engineers (ASME).

Dr. Webb was honored by the 100,000-member organization for significant achievements in heat transfer research and enhanced heat transfer technology. The ASME has about 1,000 active Fellows.

Beatrice Talifero to group leader, maintenance worker utility at Ogontz.

25-year chairs

For **Keith D. Wheeland**, acting assistant director of systems planning and development in Management Services, his first full-time Penn State work location had a special significance: it was in the Tabulating Department in the basement of Old Main, the same place his father, Rodney, had worked as a waiter when the Sandwich Shoppe was located there.

That was in the Fall of 1956, and Mr. Wheeland — who recently received his 25-year chair — has been instrumental in making many of the changes in how the University makes its "tabulations" that have occurred since then.

"Today, of course, computers play a much greater role than they did even a decade ago, and their use is increasing all the time. It's been exciting to help in applying modern technology to the University's operation," he says.

Currently, Mr. Wheeland is responsible for the conversion of computer programs and procedures for changing from the term calendar to the semester calendar. He also has served as manager of information services, being responsible for laying the groundwork for implementing the Information Center concept, as manager of process control and as manager of systems standards and procedures.

"I owe whatever success I've had to all the persons who have taken time to stop and show me how to do things — and, to those who have shown faith in me by giving me challenging assignments," says Mr. Wheeland.

In his personal time, Mr. Wheeland brings his professional experience to bear on one of his favorite hobbies, sport caving.

"I'm part owner of the largest cave in Virginia, a non-commercial one called Butler Cave, where I spend a half dozen weekends a year. I'm now engaged in setting up a data base to store information

K. D. Wheeland

J. E. Stuart

for all the caves in Pennsylvania," he explains.

"I love my work and look forward to each day," he says. "And I sleep well at night."

In his 25 years in the Department of Purchases, **James E. Stuart** has purchased practically every commodity used at the University.

Mr. Stuart, assistant purchasing agent, was born and raised in New Bethlehem, Pa., and was graduated from Penn State with a bachelor of arts degree in commerce in 1953.

Following graduation, he joined the Air Force and served for three years as a B-25 pilot and as a staff supply officer in the headquarters of the Eastern Air Defense Force. On Nov. 1, 1956, he joined the University staff as a buyer in the Department of Purchases.

He was appointed assistant purchasing agent Sept. 1, 1979, and, at present, is responsible for the purchase of agricultural equipment and supplies, building equipment, and all related items. He also is responsible for General Stores' operational procedures and inventory control.

In his spare time, Mr. Stuart is an organic gardener and enjoys hunting and fishing. Interested in music, he is a long-time member of the Pine Grove Mills Chorus.

He and his wife, Lois, a secretary at WPXS, live in Lemont and are the parents of three children — Terry, Tracy and Kathy.

Obituaries

Dr. Shiou-Chuan Sun, professor emeritus of mineral processing, died Nov. 16. He was 70.

Dr. Sun received a bachelor's degree in mining and metallurgy from Peking University, Tientsin, China, in 1936 and a master's degree in geology in the same field from the Missouri School of Mines in 1938. In 1945 he received a doctor of science degree in metallurgy from the Massachusetts Institute of Technology.

Dr. Sun joined the University faculty in

1946 as assistant professor of mineral preparations. He was named associate professor in 1951 and professor in 1957. He served as acting head of the Department of Mineral Preparation from 1946 to 1948. He retired July 1, 1976.

Survivors include his wife, E-Tu Zen Sun, professor of Chinese history, and two sons.

Joseph F. Neff, barn worker-milker in the College of Agriculture from June 1, 1955, until his retirement Sept. 1, 1970, died Nov. 15. He was 75.

863-0301 or 342-3980.

Audrey L. Smith would like to share driving from Centre Hall. She works in Burrows Building from 8 a.m. to 5 p.m. She can be reached at 865-9561 or 364-9712.

Neda Wilson needs a ride from the Hilltop Trailer Park to the University. She works from 8 a.m. to 5 p.m. in Wagner Bldg. She can be reached at 863-3359 or 238-3643.

the period of 1900 until 1930. Each of the postcards reproduced is accompanied by a short, explanatory caption. George Miller is the author. (Regularly: \$18.75/cloth; sale price: \$14. Regularly: \$10.95/paper; sale price: \$8.20)

— **Pennsylvania Prints** — From the Collection of John C. O'Connor and Ralph M. Yeager contains an array of prints showing Pennsylvania town views and landscapes, political and military scenes, disasters and famous events. This catalog, compiled by Judith W. Hansen, features a selection of 83 excellent reproductions. The O'Connor and Yeager Collection includes over 300 items, collected over a period of more than 30 years, and is one of the most comprehensive collections of Pennsylvania town views. This collection has long been a feature of the Tavern Restaurant in State College. (Regularly: \$17.95/cloth; sale price: \$13.45. Regularly: \$10/paper; sale price: \$7.50)

— **Rivers of Pennsylvania** by Tim Palmer serves as an introduction to Pennsylvania's 45,000 miles of usable streams. It provides information for the active or prospective canoeist, kayaker, boater, or rafter; the hiker or camper; the nature or history buff; the angler or conservationist. (Regularly: \$18.95/cloth; sale price: \$14.20. Regularly: \$12.95/paper; sale price: \$9.70)

— Of particular interest to Centre County residents is **Historic Buildings of Centre County, Pennsylvania**, prepared by the Historic Registration Project of the Centre County Library. George Ramsey, Coordinator. This volume describes in detailed text and 236 photographs, maps and drawings, local structures which include log houses and round barns, the Georgian and Victorian mansions of the ironmasters and landowners, sturdy inns and mills, hotels, churches, farms, and buildings of the Beaux-Arts classicism on the University campus. (Regularly: \$15/cloth. Sale price: \$11.25)

— **Pennsylvania 1776**, Robert A. Secor, general editor. This book is a vivid portrayal of life in Pennsylvania at the time of the Declaration of Independence. (Regularly: \$22.50/cloth. Sale price: \$10)

— **Pennsylvania Politics, Today and Yesterday: The Tolerable Accommodation** by Paul B. Beers presents the reader with a characterization of the Pennsylvania political scene during the period from 1900 to 1979. A type of rough justice prevailed, the author argues, as defined in Learned Hand's

words as "the tolerable accommodations of the conflicting interest of society." (Regularly: \$16.75/cloth. Sale price: \$12.50)

— **William Warren Scranton, Pennsylvania Statesman** is the first biography of a man whose reputation extends well beyond the borders of his home state. This book covers Scranton's long and distinguished career which marks him as one of the foremost political figures to have emerged from Pennsylvania in this century. George D. Wolf, professor of American studies and history, and former dean of the faculty at Capitol Campus, is the author. (Regularly: \$16.50/cloth. Sale price: \$12.35)

Holiday shoppers are welcome to browse through the assortment of books at the Penn State Press office in Room 215 Wagoner Building (865-1327). Press hours are Mondays through Fridays, 8 a.m. to 12 p.m. and from 1 p.m. to 5 p.m. Special arrangements may be made for book orders to be picked up from 12 p.m. to 1 p.m. The Press will mail books anywhere in the United States (\$1 mailing charge extra). Prepaid orders should be sent to Penn State Press, 215 Wagoner Bldg., University Park, PA 16802.

Penn State Music

Music from Penn State spans a wide range of styles from the Glee Club, Blue Band and Alard Quartet. Why not consider one of their albums for your music lover's listening pleasure?

Glee Club

"The Penn State Glee Club in a Program of Pennsylvania Music: 90th Anniversary Concert" is one of the records that the Glee Club, under the director of Bruce Trinkle, offers for your musical enjoyment. This album presents Pennsylvania folk songs, spirituals, poems by e. e. cummings and closes with Penn State songs. It is on sale in Room 232 Music Bldg. for \$6 (plus \$1 charge for postage and handling if the album is to be mailed). The Glee Club also presents a 45 rpm entitled "Favorite Penn State Songs" which features the "Alma Mater," "Hail to the Lion," "The Blue and White," and "Fight on State." This record is also available in Room 232 Music Bldg. for \$2.50 or \$3 if the record is to be mailed.

Blue Band

"Bandorama III" (1980), a sellout performance at Eisenhower Auditorium, is the latest Blue Band album. Under Director Ned C. Diehl, music on this recording features the Symphonic Blue Band, Marching Blue Band and Jazz Blue Band performing a variety of music

including half-time show music and Penn State songs. This recording is available for \$8 in Room 217 Chambers Bldg. and can be purchased at all student bookstores.

Alard Quartet

With notoriety and recognition by audiences on four continents and as the quartet-in-residence for the University, the Alard Quartet presents three albums to captivate and entertain you this year. Their latest album is "Beis Bantok — Quintet for Piano and Strings" which features Sylvia Glickman, pianist, and sells for \$6. Another recording, "Music for Flute and Strings by Three Americans — Amy Beach, Katherine Hoover, Arthur Foote" (Diane Gold, flautist) is available for \$6. The third album is "The Alard Quartet Playing Quartets by Hindemith and Janacek" for \$7. All albums are on sale at the Museum of Art gift store.

Alumni Association

If you have a graduating senior, alum, or Penn State fan on your Christmas list, the Alumni Association provides the ideal gifts that represent University tradition.

— Alvastone Nittany Lion replicas (from a mold made and signed by Lion Shrine sculptor, Heinz Warnke) can be purchased for \$35. It also comes on a walnut base for \$35.

— Penn State chairs are available in several styles: a Boston rocker for \$118; an armchair with satin-finish black arms for \$125 and an armchair with

cherry-finish arms for \$132. All chairs are satin-finish black with gold trim and University seal, unless otherwise specified.

— Alumni Association memberships are on sale for \$15/yr. Regular members receive *The Penn State Magazine*, the *Football Letter* and College/Campus newsletters. Associate memberships may also be purchased for non-alums for \$15/yr. The associate membership entitles recipients to the same privileges except that they are excluded from voting for alumni trustees and running for office. Lifetime memberships (regular or associate) are on sale for \$150.

All purchases may be made at the Alumni Association office in Room 105 Old Main, 8 a.m. to 12 p.m. and from 1 p.m. to 5 p.m.

The Weekly Collegian

The *Weekly Collegian* is the perfect gift for alumni who want to keep informed of important happenings at Penn State. Published by the staff of the *Daily Collegian*, it provides a means of keeping in touch with a constantly changing University.

The *Weekly Collegian* is published 36 times a year. Subscription price is \$12 a year or \$22 for two years.

To subscribe, send a check, payable to Collegian, Inc., to 126 Carnegie Bldg., University Park, PA 16802. Your subscription will begin upon receipt of your order.

Retirements

Dr. John L. George has retired as professor emeritus of wildlife management after 18 years of service to the University.

While at Penn State, Dr. George initiated species studies and management recommendations for the white-tailed deer, wild turkey, elk, otter, and eastern coyotes. He pioneered urban wildlife studies at the University and from 1974 to 1980, he was the chairman of the U.S. Forest Service's working group on urban wildlife.

He also studied animal damage control and was one of the developers of the "Penn State 5-Wire Electrical Deer Fence." While on sabbatical in 1979, he did a general management review on Alaska for the U.S. Forest Service.

Dr. George's research interests have been in vertebrate ecology, particularly population dynamics of birds and mammals. He is a pioneer in studies to determine whether or not DDT would affect birds when applied in the field.

In 1958, he became a research staff specialist in pesticides for the Washington

Dr. John L. George

office of the Bureau of Sport Fisheries and Wildlife, U.S. Department of the Interior, where he served as the government's chief expert on the ecological effects of pesticides on wildlife.

In 1963, he joined the staff of the School of Forestry Resources at Penn State. His interest in pesticide ecology

continued at University Park. Working with the late Dr. Donald E. H. Frear, he discovered DDT in penguins, fishes, seals, and skua sea birds in the Antarctic, thousands of miles from any known use of DDT.

Dr. George received his bachelor of science degree in forestry (1939) and the master of science degree in zoology (1941), both from the University of Michigan, Ann Arbor. In World War II he served as a

Naval Combat Information Officer on a destroyer in both the Atlantic and Pacific Theatres. He completed the doctor of philosophy degree in zoology (1952) at Michigan.

Dr. Hiram L. Wiest, associate professor of family and community medicine at Hershey, retired Nov. 1. He joined the staff Sept. 1, 1968.

Research grant proposals sought

Faculty from all University campuses are invited to submit proposals to the Penn State 1982-83 Research Initiation Grant (RIG) Program, established to support research and other creative work in the sciences, engineering, social sciences, and arts and humanities.

The RIG program is a competitive process based on scholarly merit and is limited to new faculty on standing appointments and with a service accumulation of two calendar years or less by September, 1982.

The 12-month awards will range from \$2,000 to \$5,000 and will be announced following a preliminary screening by the colleges and final recommendation from a committee appointed by Dr. Richard G. Cunningham, vice president for research and graduate studies.

Faculty desiring further information should call their ACOR representatives or Commonwealth Campus directors. The proposal deadline submission to ACOR deans is Monday, Jan. 18, 1982. Awards will be announced Friday, Feb. 26, 1982.

Behrend director to premiere new Broadway-bound show in Erie

In the beginning, Paul C. Iddings, associate professor of theatre arts at Behrend College, accepted an offer to go to New York City to direct a new Broadway show, *Daisy*.

As it turns out, Mr. Iddings has remained in Erie, where he is preparing *Daisy* for its world premiere on Friday, Dec. 11.

"It's exciting, it's hard work and it's a lot of fun," says Mr. Iddings in describing the intensive preparations for the show's debut.

"But perhaps the greatest thrill is in bringing together Behrend students, faculty members and New York professionals for a once-in-a-lifetime opportunity."

Daisy, too, is rather unique.

On the one hand, it is a moving portrayal of the life of a New York City shopping bag lady named, of course, *Daisy*. As such, it's a drama.

Daisy, however, also is a musical, with an original score of some 20 songs spanning the musical styles of three decades.

"The show is being billed as a musical-drama," Mr. Iddings observes. "This is the first show I know of to be labeled as such, and it's entirely appropriate."

Daisy's plot begins in the present, with *Daisy* appearing as a 47-year-old bag lady who looks 87. Through flashbacks that return as far into her grim past as 1951, *Daisy*'s life story is presented.

"It's a sad, but realistic, story," Mr. Iddings says. "The plot has many surprise turns, but builds smoothly and continuously to an emotional climax that has quite an impact."

The Behrend director further observes that *Daisy*'s musical score, in depicting music from the 1950s, '60s and '70s, is faithful to the musical styles of each of the decades.

"The '60s music, for example, has a distinct Beatles flavor to it, adding to the dramatic realism as *Daisy*'s life is portrayed. Throughout the show, the music is carefully tailored to match historical time."

Daisy was written by Norman Simon (no relation to Neil), a playwright and

Paul C. Iddings

songwriter who has had more than 200 of his songs recorded by such performers as the Inkspots and Nat King Cole. Mr. Simon wrote the music in conjunction with Lowell Mark and the book in conjunction with Howard Behrend.

In searching for a director for the show, Mr. Simon and his colleagues were having difficulty finding an applicant who was familiar with the three decades portrayed.

Luckily for Mr. Iddings and Behrend, Mr. Iddings' former New York agent — who represented the director during a 1974-76 stint of fulltime acting and directing in New York — suggested the Penn State for the job.

"I received telephone calls from both Mr. Simon and my former agent, looked over the script, listened to tapes and decided I was interested," Mr. Iddings recalls.

"I finally got the confirmation call, and to say I was extremely excited would be an understatement. I'd always dreamed of directing on Broadway and for a time, I just couldn't believe it was happening."

At that point, *Daisy* was titled *Daisy, the Shopping Bag Lady*, and the show was still slated to make its debut on Broadway.

"Mr. Simon and I met in New York one

weekend to discuss the show in person — we'd been communicating until then by telephone and letter — and I made the suggestion that we change the title, and the character's name, to *Daisy*."

"I felt the original title was too long and I liked the different spelling because it suggests an element of craziness. While *Daisy* is not a crazy lady in the pure sense of the word, she has experienced a crazy life and is a product of it."

Mr. Simon liked Mr. Iddings' suggestion about the title and had one of his own to make: that the show's first pre-Broadway production take place in Erie.

"Mr. Simon wanted to put the show into a workshop setting to fully prepare it for its debut," Mr. Iddings says. "He especially liked the idea of being able to combine the talents of New York professionals with those of Behrend students and faculty members."

Eleven Behrend students and two faculty members are in the cast, which totals 27. John B. Wilkerson, instructor in music, is serving as music director, and Marjorie J. Podolsky, English instructor, as accompanist.

While it is unlikely any of the local actors will travel with the show to Broadway, they will have the distinction of being listed as the show's original cast members whenever it appears in print form.

"It's an outstanding opportunity for the Behrend community to be involved in the process of shaping a new play for its debut production. The students are getting a real taste of professional theatre and are gaining the unique experience of being involved in a show from the ground up," Mr. Iddings observes.

In addition, all involved in the production are having their efforts documented, as Mr. Iddings is planning a book to record the birth of *Daisy*.

"We're photographing everything — auditions, rehearsals and performances. We're also videotaping the action and recording the sound track. The book will be a combination of the show's story and its making, and as such, will also be a first," he says.

As unique as the many aspects of the

show are, there's one more that perhaps stands out among the rest.

Susan Edwards, a former student of Mr. Iddings (when both were at the Virginia School of Performing Arts), was cast in the lead role before Mr. Iddings was chosen to direct.

"Susan and I have kept in touch over the years," Mr. Iddings says, "but it was still a big surprise when I learned she had become cast as *Daisy*. She's a first-rate actress and I'm simply delighted to be working with her again."

Ms. Edwards is no stranger to Broadway: she has appeared in *Magic Show*, *Bubbling Brown Sugar* and *The Suicide*, with Derreck Jacobi. She also has been an understudy for Lucy Arnaz in *They're Playing our Song*.

Daisy opens Dec. 11 in the Little Theatre at Mercyhurst College (Behrend's theatre has only 73 seats as compared to Mercyhurst's 273) and runs for 10 more performances.

Dates and times are: Dec. 11-13 and 16-20, 8 p.m.; Dec. 13 and 20, 2:30 p.m. matinees. Also, there will be a special matinee on Dec. 19 for potential financial backers of the show. Included will be a luncheon and an opportunity to meet with the original production members.

Reservations may be made by telephone (814) 898-1511, Ext. 331.

Mr. Iddings, a member of the Behrend faculty since 1976, was theatre department chairman at Mercyhurst from 1971 to 1974. In between his stints at the two Erie colleges, he was an actor and director at the Iglesias Theatre in New York City and at the Cherry County Playhouse in Traverse City, Mich.

He also has directed and taught in the Washington, D.C., public schools; at the Performing Arts Center of Virginia in Williamsburg; at Randolph Macon College, and in the Ashland, Va., public schools.

At Behrend, he directs a play each term and teaches theatre arts courses in a variety of areas.

"I thrive on energy," he says, "and challenges."

"Doing *Daisy* is satisfying both."

— by Tom Ressler

Staff Vacancies

The following vacancies for positions classified as staff exist and no staff exempt have been listed with the University Employment Division for filling. This announcement is made to that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 457-1387). Applications for these staff vacancies will be accepted until 5 p.m., Dec. 10, 1981. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PE-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam area veteran.

ADMISSIONS COUNSELOR II, UNDERGRADUATE ADMISSIONS, UNIVERSITY PARK. Responsible to the associate or assistant director of Undergraduate Admissions for general assistance in handling of the more complex admissions matters in an assigned regional area. Participate in and administer admissions activities for students, advanced standing, transfer, provisional, and nondegree students who are baccalaureate or associate degree candidates for University Park Campus and for assigned Commonwealth Campus. Behrend College. Bachelor's degree or equivalent with two to three years of effective experience in admissions or related fields.

PHYSICIAN, UNIVERSITY HEALTH CENTER, UNIVERSITY PARK. Responsible for University Health Center for providing medical care to University students, as well as emergency care to University faculty, staff, employers and visitors. Doctor of Medicine degree from an accredited school of medicine, a license to practice medicine in the Commonwealth of Pennsylvania, plus four to five years of effective experience in a similar position.

SYSTEMS ANALYST, COLLEGE OF MEDICINE, HERSHEY. Responsible to the manager, Medical Computer Center, for implementing the payroll and accounting procedure for the College of Medicine with

the various departments to determine their information requirements and operational needs. A bachelor's degree in accounting with knowledge of third generation programming language plus four years of data processing experience.

ACCOUNTANT, COST, COLLEGE OF MEDICINE, HERSHEY. Responsible to the supervisor, Third Party Reimbursement and Cost Accounting, for the preparation of all third-party cost reports and cost studies and maintenance of controls on third-party accounts receivable. A bachelor's degree in accounting or equivalency plus two to three years experience in hospital cost reporting or hospital auditing.

ASSOCIATE HEALTH PHYSICIST, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK. Perform applied radiation safety tasks such as radiation and contamination surveys, instrument calibration, dosimetry, bioassay, radiochemical analysis, waste disposal, and record keeping. Master's degree or equivalent in radiological health, health physics, or public health with a major in health physics or radiological science and one to two years' effective experience required. Bachelor's degree in chemistry or physics preferred.

COLLEGE HEALTH NURSE, GONZAGA CAMPUS. Responsible administratively to the Dean of Student Affairs and professionally to the administration of the University Health Services through the director of Nursing Services for providing nursing care to the student body, including the treatment of minor and temporary illnesses and accidents, plus making appointments and referring students and employees to a physician or hospital when necessary and appropriate. Graduate of an accredited nursing program or its equivalent and current licensure in Pennsylvania as a registered nurse, plus six to nine months of effective experience in public health nursing or other related institutional nursing experience.

NURSING SOCIAL WORKER II, COLLEGE OF MEDICINE, HERSHEY. Responsible to the social services coordinator for providing inpatient and outpatient medical social services and provide practical help and emotional support to patients and their families. Master of social work degree from an accredited college or university or equivalent plus one to two years' effective experience.

EXTENSIVE SERVICES SPECIALIST, COMMONWEALTH EDUCATIONAL

SYSTEMS. Responsible to assistant director, Audio Visual Services, for developing and maintaining direct contact with rental/purchase clientele. Also responsible for evaluation and acquisition of behavioral science films. Some travel required. Bachelor's degree or equivalent, with three years' experience in the film library operation, marketing, or related area. Background in behavioral sciences desired.

SENIOR TECHNICAL SPECIALIST ONE, COMMONWEALTH EDUCATIONAL SYSTEM, UNIVERSITY PARK. To assist in the transfer and application of clean air and cold processing technology. Provide person-to-person assistance in interpreting research findings, solving technical problems and similar technology transfer activities.

Master's degree or equivalent in engineering or earth and mineral sciences with specific experience in clean air or related fields. This is a contract position which must be funded annually.

SENIOR TECHNICAL SPECIALIST TWO, COMMONWEALTH EDUCATIONAL SYSTEM, UNIVERSITY PARK. Assist small business in the transfer and application of high technology for purposes of economic development. Provide person-to-person assistance in interpreting research findings, solving technical problems and similar technology transfer activities. Master's degree or equivalent in engineering field or physical science plus at least seven years of related experience. This is a contract position which must be funded annually.

Lion Ambassadors advance University

Faculty and staff members are encouraged to recommend students for membership in Lion Ambassadors, a new student organization created to support the Penn State Alumni Association and the Office of Gifts and Endowments.

Lion Ambassadors will consist of 50 appointed students and is designed to support these offices by "incubating" within students the idea that their involvement with and support of Penn State should begin while they are students and not end with their graduation but continue the rest of their lives."

The organization, founded this fall, is intended for students who have a special interest in the University. It is to be comprised of individuals from all walks of student life who are dedicated to the advancement of the University through student recruitment, public relations and information, and assistance with Penn State administrators and alumni.

According to John W. Black, associate

executive director, Alumni Association, who is directing the development of the organization, these efforts "are aimed at creating an awareness of a student's ongoing association and involvement with the University as a student and as an alumnus."

Applications are available in Room 105 Old Main for students interested in becoming a Lion Ambassador. Applications must be accompanied by a recommendation from either a faculty or staff member or a current Ambassador.

Faculty and staff members are encouraged to recommend students whom they feel have a positive attitude and appreciation for Penn State and whose academics won't suffer from membership in the organization.

Recommendations and applications should reach Larry Atwell, coordinator, Student/Alumni Relations, 105 Old Main, no later than Tuesday, Dec. 8.

Penn State Intercom

University Park employees give record amount to United Way

University Park employees contributed a record \$113,224 to the Centre County United Way, reports Dennis Kulchyski, executive director.

"The amount raised by University employees exceeds last year's total by \$10,622. Twenty-nine percent of employees at University Park contributed, including 622 new givers," Kulchyski said.

"The personal approach to the solicitation, begun last year, and the endorsement by University administration are responsible for the success of the campaign. Of the 22 colleges and administrative units, nine submitted more than 90 percent of their cards to

United Way. This indicates that more employees have had the opportunity to participate and ask questions about United Way."

Areas to be cited by the Centre County United Way for outstanding giving records are:

Advanced Gifts (President's staff, deans, associate and assistant deans)—83 percent; Colleges of Education and Health, Physical Education, and Recreation—50 percent; College of Business Administration—49 percent; Colleges of Agriculture, Earth and Mineral Sciences and Administration (Senior Vice President for Administration)—45 percent.

1981 campaign chairman, Charles L. Hosler, dean of the College of Earth and Mineral Sciences, says: "The financial success of this year's campaign can be attributed to the dedication and hard work of associate chairpersons and their assistants who solicited the nearly 7,000 employees. I extend my personal thanks to each volunteer and contributor in this year's campaign."

"While we are pleased to fulfill our obligation financially to local citizens, as the largest employer in Centre County, I hope that future University campaigns will continue to show even greater employee participation."

Money raised this year is part of the county's \$420,000 goal to help 27 United Way member agencies. They are: Red Cross (State College, Bellefonte, Philipsburg), Easter Seals, Home Health Service, YMCA (Bellefonte, Philipsburg), Association for Retarded Citizens, Centre Crest Auxiliary, Youth Service Bureau, Community International Hospitality Council, Childbirth Education Association.

Rape/Abuse Crisis Center, Skills, Centre County Library, Mid-State Literacy Council, Community Alternatives in Criminal Justice, Voluntary Action Center Society for Crippled Children, Counseling Service, Girl Scouts, Associated Charities, Transient Fund, On Drugs, Inc., Boy Scouts, Strawberry Fields Day Camp, and the Community Nursing Service (Philipsburg).

PSU community urged to aid in President search

Students, faculty and staff members, alumni and friends of the University have been urged to take an active role in the search for a new president.

"We hope that everyone will feel free to provide information to us," said Dr. Robert S. Friedman, chairman of the University Presidential Search and Screen Committee.

"We're looking for general views on the presidency—what qualities people think the new president should have and so forth," Dr. Friedman said. "We're also looking for specific candidates' names. We intend to conduct the widest possible search, and we strongly urge everyone interested in Penn State to submit names of candidates."

The Search and Screen Committee, whose members are Penn State faculty and staff members, students and alumni, has submitted an advertisement to the Chronicle of Higher Education for its Dec. 16 issue and to other appropriate periodicals. The ad appears on page 3.

The 15-member Search and Screen Committee will advertise the position, solicit nominations and assist with the screening of candidates. Late next spring, it will submit its report to the

eight-member Trustee Presidential Selection Committee, which will then continue to screen candidates. The Selection Committee, composed of Trustees, is expected to recommend a final candidate to Penn State's Board of Trustees in November, 1982.

President Oswald has announced he will retire on June 30, 1983.

Mitchell Bldg. renamed

Mitchell Building is the new name of the former Mitchell Instructional Services Building.

The change, approved by the Board of Trustees, permits more flexible use of the building, following the reorganization earlier this year of media-related services housed there.

The building is named for Judge H. Walton Mitchell of Pittsburgh, who died in 1943. He was an 1890 Penn State graduate. A Trustee from 1902 to 1929, Mr. Mitchell was president of the Board from 1914 to 1929.

Candlesticks in the International Artifacts Exhibition and Sale at Kern.

General Ed. Conference plans advance

The Penn State Conference on General Education, co-sponsored by the Office of the President, the Office of the Provost, and the University Faculty Senate on Friday and Saturday, Jan. 22 and 23, is being held in conjunction with the January Board of Trustees meeting, and will serve as part of the agenda of the Committee on Educational Policy.

Keynote speaker for the conference will be Dr. Harlan Cleveland, director of the Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota. Dr. Cleveland has served as assistant secretary for international organizational affairs in the Department of State, U.S. Ambassador to NATO, dean of the Maxwell Graduate School of Public Affairs at Syracuse University, president of the University of Hawaii, and as director of the International Affairs program of the

(Continued on page 3)

McNitt named Engineering dept. head

Dr. Richard P. McNitt has been appointed professor and head of the Department of Engineering Science and Mechanics in the College of Engineering, succeeding Dr. John R. Mentzer, who retired July 1.

Dr. McNitt comes from Virginia Polytechnic Institute and State University, where he was professor of engineering science and mechanics and where he taught both undergraduate and graduate level courses, some of which he developed and introduced.

A native of Reedsville, Pa., Dr. McNitt received his B.S. in engineering science and his M.S. in engineering mechanics from Penn State in 1957 and 1959, respectively. He received his Ph.D. in engineering science from Purdue University in 1965.

Dr. McNitt's research interests include dynamic response of structures to moving masses and the environmental effects on the mechanical properties of materials. Recent work has centered on interdisciplinary studies on the effect of

stress state on hydrogen embrittlement, hydrogen effects on fatigue life, and mechanical and metallurgical characterization of copper-nickel to steel welds.

Richard P. McNitt

Insurance switch will provide better service

In order to provide better and more timely service to faculty and staff members for payments of life insurance, hospital/surgical/major medical and vision claims, effective Jan. 1, 1982, these programs will be administered by The Prudential Insurance Company of America.

The Prudential has administered the dental program since Jan. 1, 1979. While The Prudential will process the hospital/surgical/major medical, dental and vision claims, the University will have direct financial responsibility for the payments.

There will be no change in the coverages or the cost to you for any of these programs. New claim forms will be made available to the faculty and staff members in the same manner as in the past, i.e., through their personnel representative or campus business managers or the Employee

Benefits Division. Hospitals, doctors, and medical care providers in the University Park area also will be given a supply of the claim forms. Life insurance beneficiary arrangements made with the previous carrier, The Equitable, will be honored by The Prudential.

It should be noted that with the exception of life insurance, all health care claims are now to be filed directly with The Prudential, the claims administrator, and sent to the address listed on the appropriate claim form. The address of the claims offices will be printed on the claim forms. Previously, the dental and vision claims were mailed directly to the carriers, but with this change the hospital/surgical/major medical claims also will be mailed directly to The Prudential Office instead of to the Employee Benefits Division as in the past.

Any claims (regardless of when charges were

incurred) filed after Dec. 18, 1981, should be filed with a Prudential claim form and sent to the appropriate office.

Regular full-time faculty and staff members will be provided with new hospital/surgical/major medical identification cards in the near future. In the meantime, hospitals and other providers of medical treatment may verify your coverage by contacting The Prudential or the Employee Benefits Division.

During the transition period, there may be some delays in the claim payments. However, it is expected that better claims service will result from these changes.

Questions about these new procedures should be referred to the Employee Benefits Division, 133 Willard Bldg., University Park, telephone 814-865-1473 (Network 475-1473).

McHale named acting dean

William J. McHale has been named acting dean of the College of Arts and Architecture, effective Jan. 1.

He will serve until a successor to Walter H. Walters is named. Dr. Walters, dean of the College for the past 12 years, announced earlier this year that he would retire at the end of 1981.

"We appreciate Dr. McHale's willingness to serve," Provost Eddy said, in announcing the appointment. "The College's programs will continue with strong leadership during this interim period."

Dr. McHale has been associate dean for resident instruction in the College since 1974. Before that time, he was assistant dean. He is an associate professor of art.

A graduate of Kutztown State College, he received his master of education and doctor of education degrees in art education from Penn State. He joined the college in 1962 as an arts specialist with the Penn State Extension Service. He also was associate professor of housing and design, and head of the Division of Family Housing and Home Art in the College of Human Development.

From 1967 to 1969, he directed the major in consumer related studies. Dr. McHale currently is chairman of the Bachelor of

William J. McHale

Philosophy Committee, which is responsible for an inter-college undergraduate degree program. He is in charge of the general arts major within the College. He also serves as an administrative member of the Landscape Architecture Accreditation Board and is chairman of the State College Community Appearance and Design Review Board.

Dr. Walters announced in July his plans to take early retirement this year to spend more time on personal projects. He and Mrs. Walters plan to move to the Jacksonville, Fla., area.

Calendar Conversion Council to name inclusive Communications Committee

The Calendar Conversion Council will appoint a Communications Committee to assist in the conversion process.

The committee will be made up of representatives from each University Park college, Behrend College, Capital Campus, College of Medicine, Commonwealth Educational System, Division of Undergraduate Studies, Office of the Vice President for Undergraduate Studies, Graduate School, Office of the Vice President for Research, Office of the Vice President for Student Affairs, Office of the Vice President for Business, University Libraries and University Faculty Senate.

Council Chairman James Bartoo noted that recommendations of the Council will go to President Oswald for review and consideration as deemed appropriate. He also reported that he is meeting with chairpersons of the University Faculty Senate to further clarify the working relationship between the Senate and the Calendar Conversion Council.

Council approved recommendations of its Sabbatical Leave Committee for submission to President Oswald. The recommendations relate only to changes pertinent to the calendar change.

In other business at its Nov. 19 meeting, Council:

- Discussed the question of appropriate procedures to establish a class schedule for University Park and to determine the facilities match, faculty resource match, and student programmatic need match for the 1983-84 semester calendar. Two previously appointed committees were instructed to

meet jointly and develop a specific recommendation.

- Accepted a report recommending that no major course renumbering proposal will be considered at this time.

- Announced it will issue a clarifying memorandum on new program submission to Curricular Affairs or the Calendar Conversion Council.

- Approved the following 1982 meeting schedule, with all meetings to be held in Room 101 Kern Graduate Bldg.:

Tuesday, Jan. 12, 2-5 p.m.; Wednesday, Feb. 3, 8:30-11:30 a.m.; Thursday, Feb. 25, 2-5 p.m.; Tuesday, March 16, 8:30-11:30 a.m.; Wednesday, April 7, 8:30-11:30 a.m.; Thursday, April 29, 2-5 p.m.; Wednesday, May 26, 8:30-11:30 a.m.; Tuesday, June 15, 2-5 p.m.; Thursday, July 8, 8:30-11:30 a.m.; Wednesday, July 28, 2-5 p.m.; Thursday, Sept. 9, 2-5 p.m.

Chemerda Lectures set for January 5-8

Dr. Leroy E. Hood, Bowles professor and head of the Division of Biology at the California Institute of Technology, will offer the fourth annual series of John M. Chemerda Lectures in Science at the University Jan. 5 through 8.

Each of the lectures will be presented at 8 p.m. in Room 119 Osmond Laboratory. The titles are "Immunity, Disease, and Cancer"; "The New Genetics and Microchemical Instrumentation"; "Molecular Development of Antibody Producing Cells," and "Genes of the Major Histocompatibility Complex: A Model System for Cell-Cell Recognition."

A specialist in the genetics and evolution of multigene systems and antibody diversity, Dr. Hood also has made important contributions to the chemistry and genetics of eukaryotic membrane proteins and protein evolution.

In addition, Dr. Hood and his Cal Tech colleagues have developed a so-called "gene machine," or automated DNA synthesizer, which can make a fully workable gene segment in a day. In the late 60s, Hood and others also developed an automated protein sequencer with which they can sequence even minute quantities of protein.

Senate to eye legislative action on PS-23's teaching evaluation

Legislative action on a proposal to modify the section of PS-23 dealing with the evaluation of teaching effectiveness is expected during the University Faculty Senate's meeting on Tuesday, Dec. 15.

Also on the agenda for the meeting — which begins at 2:10 p.m. in Room 112, Kern Graduate Bldg. — are informational reports from the Calendar Commission on "Conversion Update," the Curricular Affairs Committee on "Status of Baccalaureate Degree Requirements," and the Committee on Undergraduate Instruction on "Mathematics Testing for Entering Freshmen."

The proposal to modify PS-23, from the Senate's Faculty Affairs Committee, is carried over from the Senate's Oct. 6 meeting. During that meeting, Sally S. Small, associate librarian, moved to delete several sections of one of the committee's recommendations that dealt with standardized comprehensive questions. Her motion was tabled until the Senate had a report from a subcommittee of deans, which is now included as an attachment to the report. It is an example and is for information only.

The committee will present a clarified version of its recommendations in which details receive more emphasis. It proposes that procedures and methods of evaluation shall be selected by faculty members of individual academic units.

Any proposal for revision to PS-23, the University's policy document on promotion and tenure, that is passed by the Senate becomes a recommendation from that body to the President and must be acted upon by him before it becomes policy.

Heading the informational reports is that from the Calendar Commission, which will be presented by Dr. James B. Bartoo, commission chairman and dean of the Graduate School. Senators and faculty members will have an opportunity, following the Dean's report, to ask questions and discuss the conversion process.

In addition, the Liberal Arts Council of Senators will introduce a motion regarding class scheduling under the semester system. The motion will come up in the Senate's new business.

Dr. Jerry B. Covert, associate professor of biology at Hazelton, will present the Curricular Affairs Committee's report on the status of baccalaureate degree requirements. He also will refer to guidelines and procedures regarding changes.

In its informational report on "Mathematics Testing for Entering Freshmen," the Committee on Undergraduate Instruction will outline changes in the mathematics test, which is given to all entering freshmen.

Previously, the test has consisted of two parts, a 75-minute basic arithmetic test and a 65-minute test of algebra and trigonometry. For the admissions year 1982, the Mathematics Department will change the test to focus on basic algebra and trigonometry and advanced algebra and trigonometry, thus eliminating the basic skills test in arithmetic.

Changes in the test, the committee notes, are intended to better serve students by allowing for more accurate placements and advising. The changes are not intended to affect admissions requirements.

In other legislative action, the Committee on Academic Policy will introduce to the Senate the following resolution:

"It being the aspiration of this University to achieve and maintain a position of excellence among major academic institutions, BE IT RESOLVED that to signal this intention and to provide the leadership essential for its accomplishment, the Faculty Senate, on behalf of the faculty, urges that the Presidential Search Committee undertake to include in its recommendations to the Board of Trustees specifically those

candidates, of proven executive ability, who have achieved distinction as scholars in the academic community."

The Senate also will consider legislative action on the Academic and Athletic Standards Committee's proposed changes to "Academic Policies and Procedures for Undergraduate Students," published annually in the *Penn State Student Handbook*. The changes are needed to make student rules conform with the early semester calendar system.

In other business, the Senate will hear several informational reports. The Committee on Admissions, Records and Scheduling will report on "Special Admissions"; the Committee on Commonwealth Campuses-Continuing Education will report on "Commonwealth Campuses-Continuing Education Integration"; the Committee on Libraries will report on "Library Computer and Information Systems"; and the Committee on Undergraduate Instruction will report on "Resident Instruction Fall Term Enrollments."

Senate group seeks input on Dec. 14

The Faculty Senate's special Committee on Computers and Information Systems will seek input from all interested faculty members during a special meeting on Monday, Dec. 14, from 7 to 9 p.m. in Room 101 Kern Graduate Building.

Charged by the Senate chairman to consider several aspects of the University's computer operations, the committee is considering the advisability of recommending to the Senate that an intercollegiate committee be formed. The committee would investigate the possibility of establishing intercollegiate degree programs and related non-degree studies in the areas of computer technology, computer engineering, and computer applications.

The committee wishes to discuss ideas with faculty members from throughout the University who have substantial commitments to computers, computing and related programs. The committee also is considering the establishment of an intercollegiate, University-wide center for academic computing.

Questions the committee will address include:

- What activities should be incorporated into this center;
- What needs it can fulfill;
- How it should be constituted;
- How faculty would wish to interact;
- Would such a center help faculty members in their work;
- and, is there sufficient interest for further study?

The committee emphasizes that the Dec. 14 meeting is open to any interested faculty member and that the discussion will focus on the overall picture of academic computing at the University with an emphasis on future growth. The committee will not discuss the standard problems with computer systems operation, hardware, software, turnaround, etc.

Faculty members not able to attend the meeting should send their written comments to Thomas E. Daubert, committee chairman, Birch Cottage, by Dec. 14.

Golf shop is open; memberships available

Faculty and staff are reminded that the White Golf Shop at Recreation Bldg. is open weekdays from 9 a.m. to 5 p.m. through Dec. 23. Season memberships for 1982 are available. Visit the shop or call phone 865-6231 for further information.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Plans advance for General Education Conference in Winter Term

(Continued from page 1)

Aspen Institute for Humanistic Studies. His address will be presented at 8:30 p.m. Jan. 22 in Schwab Auditorium and is open to the University community.

According to Dr. Theodore Gross, provost and dean of Capitol Campus and chairman of the subcommittee planning the keynote conference, the conference

steering committee has identified four issues that will be debated during the conference: (1) objectives and assessment; (2) content and connections; (3) articulation in the curriculum and the professions; and (4) the faculty role.

Several panel sessions involving Penn State faculty and representatives of business, industry, the professions,

government, and education are being organized. Topics to be addressed by the panels include:

1. *General education's role in preparing the individual for a career in business, industry, or the professions.* The panel will discuss the relationship of the general education component of the baccalaureate curriculum to the expectations of the graduate in the applied setting. Moderator: Carl H. Wolgemuth

2. *Baccalaureate general education — building upon the high school curriculum.* The panel will examine the general education component of the baccalaureate curriculum in the context of the student's elementary and secondary school preparation, the University's expectations, and the continuity of the educational experience. Moderator: Robert E. Durham

3. *Developing an international view in general education.* The panel will discuss strategies for instilling a greater understanding of worldwide cultures and issues through general education. Moderator: Caroline D. Eckhardt

4. *An historical perspective of general education at Penn State.* The panel will summarize the University's experience in devising and providing a general education over the past 30 years, reviewing changes in the program and factors which have facilitated or inhibited developments. Moderator: Robert F. Schmalz

5. *Uniform general education designed for all undergraduates or variable general education designed for the specific college or discipline?* The panel will explore differing approaches to offering a general education

— from the course smorgasbord, to the University-wide core curriculum, to the college-specific core curriculum. Moderator: Theodore E. Kiffer

6. *Identifying the skills which are essential in a general education.* The panel will discuss whether there is a set of definable skills, e.g., written, oral, computational, scientific, and linguistic, that should identify the baccalaureate graduate who has a general education. Moderator: Jerry B. Covett

7. *Offering general education as a lower division set of requirements or a four-year curricular commitment.* The panel will explore the need for curricular integration in general education and the impact of this need upon the scheduling of the general education experience. Moderator: Edward M. Elias

8. *Motivation and reward for faculty participating in general education.* This panel will examine the role of the faculty in determining the content and intent of general education, including responsibilities for extending student and faculty expectations beyond the individual course or the particular discipline, and for integrating general education into every University course. Moderator: Charles L. Hosler

Dr. Carol Cartwright, acting associate dean for academic affairs of the Commonwealth Educational System and chairman of the conference subcommittee on continuing programs, will moderate a concluding panel that will address the four conference issues and build upon the discussions held by the other eight panels.

PRESIDENT The Pennsylvania State University

The Board of Trustees of The Pennsylvania State University invites applications and nominations for the position of President.

The Pennsylvania State University is Pennsylvania's land-grant University dedicated to providing comprehensive programs in instruction, research and public service. The University has a full-time faculty of 3,000 and a student enrollment of 62,000 of which 35,000 are enrolled at the University Park Campus. An additional 27,000 students are enrolled at the University's 21 other campus locations including The Milton S. Eisenhower Medical Center. The current annual operating budget is \$495 million.

The corporate authority for the management and government of the University is vested by charter in the Board of Trustees. The President serves as the chief executive and educational officer of the University and is responsible to the Board of Trustees.

The nominees for this position should have a broad understanding of academic institutions. They should also have executive experience and proven leadership capacity. Nominees should have familiarity with the diverse missions of a comprehensive undergraduate, graduate, research and public service institution.

The position will be available on July 1, 1983.

Nominations or applications must be received by March 15, 1982 and should be addressed to:

Professor Robert S. Friedman, Chairperson
University Presidential Search and Screen Committee
The Pennsylvania State University
2031 Old Main
University Park, PA 16802

The Pennsylvania State University is an Equal Opportunity, Affirmative Action Employer.

Procedures for using human subjects in research are revised

The following article was prepared by Dr. Robert E. Slater, Director of Office for the Protection of Human Subjects, 312 Willard Building, University Park, PA 16802. Phone 814-865-1775. Questions regarding review procedures and policies, requests for printed informational materials, and related forms for review applications should be directed to Dr. Slater. The Human Subjects Office is a function of the office of the Vice President for Research and Graduate Studies, 207 Old Main.

The University's policies and procedures for the review of research involving human subjects have undergone major changes in response to new federal regulations issued by the Department of Health and Human Services (DHHS). These new regulations, which became effective on July 27, 1981, have been integrated into the University's existing system for protecting human subjects.

Briefly stated, University policy requires the review and approval of all activities which involve using human beings as research subjects. Approval must be obtained prior to the involvement of subjects.

The University's Institutional Review Board (IRB) is composed of two committees (The Biomedical Review Committee and the Behavioral and Social Sciences Review Committee), responsible to the Vice President for Research and Graduate Studies. The committee headed by the Director of the Human Subjects Office with the role of the IRB to ensure compliance with University policy as well as with applicable federal regulations for DHHS funded research as detailed in the Federal Register, Vol. 46, No. 16, January 26, 1981, and any other federal regulations currently in force or which may be introduced in the future.

Requests and instructions needed to submit a proposal for review may be obtained through the Human Subjects Office, or through the Associate Dean for Research in the colleges.

New Review Categories

There are now three general categories of review under the new policy. These are described below. When making application for review, investigators will apply for that category most appropriate for their study.

1. **Exemption Requested.** There are several broad categories of social science, educational, and economic research which are exempt from extensive committee review. The following types of research may be exempted from committee review if proper procedures to assure confidentiality and informed consent are evident and subjects are exposed to no more than "minimal risk."

2. Research conducted in established or commonly accepted educational settings, involving normal educational practices such as research on or comparison among instructional strategies, curricula, or classroom management methods.

3. Research involving the use of educational tests (cognitive, diagnostic, aptitude, achieve-

ment), if the data are recorded so that subjects CANNOT BE IDENTIFIED either by the use of names or special coded identifiers.

- c. Research involving surveys, interviews, or observation of public behavior. In the event that subjects can be identified directly or through identifiers, an exemption is allowable only if: 1. the subject's responses (if they become public) will not place the subject at risk of criminal or civil liability; 2. the subject's responses do not deal with sensitive aspects of personal behavior for example, illegal conduct, drug use, sexual behavior, or use of alcohol.

- d. Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in such a manner that subjects CANNOT BE IDENTIFIED, directly or through identifiers linked to the subjects.

2. **Expedited Review.** The Director will expedite the review of certain types of "minimal risk" research. Protocols will be reviewed by the Director and/or one or two experienced members, by mail or phone ballot. With expedited review, subjects may not be exposed to more than "minimal risk." The IRB may either approve the protocol or refer it for full committee review. In the event the committee cannot approve the protocol under expedited review, the Director will contact the investigator about the next step in the review process. Expedited review may also be used to approve minor changes in the protocol of an approved project. The categories of research eligible for expedited review are:

- a. Collection of hair and nail clippings, in a non-disruptive manner, deciduous teeth, and permanent teeth (if patient care indicates a need for extraction).

- b. Collection of excreta and external secretions including sweat, unclotted saliva, placental blood at delivery, and amniotic fluid at the time of rupture of membrane prior to or during labor.

- c. Recording of data from subjects 18 years of age or older using noninvasive procedures routinely employed in clinical practice. This includes the use of physical sensors that are applied either to the surface of the body or at a distance and do not involve invasive matter or significant amounts of energy into the subject or an invasion of the subject's privacy. It also includes such procedures as air or underwater weighing, testing sensory acuity, electrocardiography, electroencephalography, thermography, detection of naturally occurring radioactivity, diagnostic echography, surface electrodermography, electrodermography, and electroretinography. It also includes exposure to the visible range (for example, x-rays, microwaves).

- d. Collection of blood samples by venipuncture in amounts not exceeding 450 milliliters in an eight-week period and no more often than two times per week, from subjects 18 years of age or older and who are in good health and not pregnant.

- e. Collection of both supra- and subgingival dental plaque and calculus, provided the procedure is not more invasive than routine prophylactic scaling of the teeth and the process is accomplished in accordance with accepted prophylactic techniques.

- f. Voice recordings made for research purposes such as investigations of speech defects.
- g. Moderate exercise by healthy volunteers. (The American College of Sports Medicine Guidelines should also be followed in research of this type.)

- h. The study of existing data, documents, records, pathological specimens, or diagnostic specimens.

- i. Research on individual or group behavior or characteristics of individuals, such as studies of perception, cognition, game theory, or test development, in which the investigator does not manipulate subjects' behavior and the research will not involve stress to subjects.

- j. Research on drugs or devices for which an investigational new drug exemption or an investigational device exemption is not required.

3. **Full Committee Review.** Any research not covered by the conditions of Exemption Requested or Expedited Review, including all research which involves more than "minimal risk," or which could not be approved using other review categories, will be referred to the appropriate committee for full review. Categories is that the review process has been significantly streamlined for most applications. For "Exemption Requested" and "Expedited Review," investigators will be able to submit fewer copies of the review applications, and these reviews will normally be completed within one week (instead of the former 30 days). Also, an effort has been made to simplify the application forms and eliminate unnecessary paperwork for all parties.

Research Activities for Instructional Purposes

Many University courses require a "research experience" as part of the course requirements. Students of design and pilot test research, interviews, conduct interviews, learn to use laboratory equipment, analyze data, etc., as an integral part of a course designed wholly or in part for instruction in these techniques. Such supervised instructional activities do not, in general, require review by the IRB. However, these research and other independent research by students which involves human subjects must be reviewed by the IRB. The review is at the level of faculty supervision. Instructors and their students are reminded that the University expects that these learning

activities will be conducted within the same guidelines as those imposed on research projects in general. That is, all due care is to be taken to ensure that the "subjects" of these activities are not exposed to more than minimal risk, that they give their consent to participate, that they have an honest expectation of their involvement in the activity, and that anonymity and confidentiality of any data generated by their participation is assured and maintained. Attention to human subject guidelines and other ethical issues is considered an important component of such instruction.

Instructors should call to the attention of their students the fact that the associate dean for research in their college may instruct activities that could involve risk for the participants. These administrators should determine whether the IRB should review the intended project for compliance with human subjects guidelines. This administrative review would be especially important for those cases in which the participants are solicited through an outside developer, such as a private, for-profit school, etc. (whether or not the participants could be at legal, physical, or psychological risk) since the good name of the instructor, students, the department, and the University must be maintained.

Instructors of these courses are encouraged to call the Human Subjects Office if they need assistance or want materials for their classes. A Human Subjects Office is available through this office to help students design their class projects in accordance with good practice.

Other Services of the Human Subjects Office

The Director of the Human Subjects Office is available to speak to classes, faculty groups, and other University organizations about the operation of that office, research ethics, and other related "human subjects" topics. This office also has several publications and materials from professional, public, and private sources which pertain to human subjects issues; these are available to individuals who are interested in scholarly research in this area.

Definitions

Human Subject — an individual about whom an investigator (whether professional or student) conducting research obtains (1) data through intervention or interaction with the individual, and (2) identifiable personal information.

Informed Consent — an agreement between investigator and freely participating subjects that informs them of their role in the research and of potential hazards or risks, and describes all activity features that might reasonably be expected to influence willingness to participate.

Minimal Risk — the risks of harm anticipated in the proposed research are not greater, considering probability and magnitude, than those ordinarily encountered in daily life or during the performance of routine physical or psychological examinations or tests.

Bassoonist Peebles to give first campus performance Dec. 14

Bassoonist Georgia Peebles, instructor in the School of Music, will present her first campus performance at 8:30 p.m. Monday, Dec. 14, in the Music Bldg. recital hall.

Ms. Peebles will open the program with Antonio Vivaldi's Concerto for Bassoon in E Minor, followed by "Bassoonery: Study for Solo Bassoon" by Samuel Adler. The first part of the recital will conclude with J. N. Hummel's Concerto for Bassoon.

On William Presser's Bassoon Duets, a three-movement selection, Ms. Peebles will be joined by Trina Baker, a graduate student in bassoon performance. The final number will be the Sonate pour Bassoon by Camille Saint-Saens.

Ms. Peebles will be accompanied by pianist Keith Ward, another new instructor in the School of Music, on all but the Adler and Presser pieces.

Ms. Peebles, who was appointed instructor in bassoon, saxophone and music history in September, just received her D.M.A. in bassoon performance from the University of Maryland at College Park. She earned her M.A. in music history and literature from the University of North Carolina at Chapel Hill and her B.Mus. degree from Baylor University.

A student of Kenneth Pasmanick and Mark Popkin, she has performed with the

Georgia Peebles

North Carolina Chamber Players, the North Carolina Little Symphony, the Fairfax Symphony, the Penn State Chamber Players and Musica da Camera.

She has served in various capacities as a research and teaching assistant at Baylor University and at the Universities of North Carolina and Maryland, and received numerous awards and honors when she was a student at Baylor and North Carolina.

The School of Music is sponsoring the free Monday night concert, and the public is invited.

Dance company to present concert

The Contemporary Dance Company, sponsored by the College of Health, Physical Education, and Recreation, will present a concert at 1:30 and 4 p.m. Sunday, Dec. 13, in the White Hall Dance Theatre.

Co-directors Patricia Heigel-Tanner and Paula Donahoe are the featured choreographers for the performance which will consist of five pieces from the company's repertoire.

Three works on the program — "Free Flow," with music composed by Johann Sebastian Bach; Antonio Vivaldi's "Concerts for Violin, Lute and Figured

Bass," and "Dinosaur's Dance," with music by Bruce Trinkle of the School of Music, were choreographed by Ms. Heigel-Tanner.

Two pieces choreographed by Ms. Donahoe are "May I Have This Dance?" with composers Erik Satie, Gabriel Faure, Claude Debussy/Larry Linton, and George Gershwin, and "Jigsaw" with an elaborate version of "Twinkle, Twinkle, Little Star" by Wolfgang Amadeus Mozart.

Performing the dances are company members Maria Antonis, Mary Ellen Berish, Pegi Farrell (apprentice), Inez Ferraco (apprentice), Debbie Fisher (apprentice), Bill Flood, Stephen Hancok (apprentice), Judy Jenkins, Roberta Kjelgaard, Liz Limons, Drew Londa, Ann Madvedoff, Peggy Moses, Chris Nichols, Len Pfleger, Donna Pompei, Elaine Reidman and Gwen Welliver.

Choreographer is Amy S. O. De Francesco. Tickets are \$1.00 for students and \$2.00 general admission. They will be on sale at the door.

Glee Club, chorus give annual concert

The Penn State Glee Club and The Penn State Chorus will present its annual Christmas Concert at 3 p.m. Sunday, Dec. 13, in Schwab Auditorium.

The concert, sponsored by the School of Music, is free and open to the public. The program will include popular Christmas music from the 16th through 20th centuries.

The Penn State Glee Club is directed by Bruce Trinkle. Joel Westa is assistant director. The Penn State Chorus is directed by Bruce Trinkle, with Brenda Harsch, assistant director, Suzanne Roy, soprano, and Robert Trehy, baritone.

The groups have dedicated the concert to Dr. Walter H. Walters, dean of the College of Arts and Architecture, for "his years of service to music and the arts at Penn State."

University libraries set holiday hours

University Park libraries will be closed Thursday, Dec. 24, through Monday, Dec. 28, and Friday and Saturday, Jan. 1 and 2, for the Christmas and New Years holidays.

Pattee Library will be open from 7:45 a.m. to 5 p.m. Tuesday, Dec. 29, through Thursday, Dec. 31. Branch libraries, however, will remain closed. All University libraries will resume regular hours on Sunday, Jan. 3.

Penna. German course to be offered

Although the sight of the Pennsylvania "Dutch," wearing their quaint costumes and driving a horse and buggy, may be familiar to many residents of the Commonwealth, most know very little of Pennsylvania German history, language and culture.

Beginning Jan. 12, an eight-week course entitled "Pennsylvania German Culture" will be offered through the University Park/State College Area Continuing Education Office.

The course, taught by Dr. James Hurd, provides a survey of the background, customs, religion, folklore, superstitions, folk art, language, music and education of the Pennsylvania Germans. A brochure is available by calling 865-3443 or at 102 Boucke Bldg.

Mont Alto Campus given new network number

The Mont Alto Campus will have a new network telephone number beginning Dec. 28. The new number will be 488-2011.

URTC to present world premiere

The University Resident Theatre announces the world premier of a new play, entitled *Indian Summer*, by playwright and director, David H. Bell.

Scheduled to open Jan. 14 in the Pavilion Theatre, *Indian Summer* is the warmly humorous study of an American family during the golden indian summer of 1941. Virginia and John Robertson have raised their children in the glow of a romantic and idealistic American vision until Dec. 7, 1941, and the Japanese bombing of Pearl Harbor interrupts the American peace. In the wake of Pearl Harbor, the Robertson family is changed and a chapter in American history closes forever.

Mr. Bell directed this past Festival Theatre and URTC production of *Grass*. Most recently he was nominated for five of the coveted and highly regarded Joseph Jefferson Awards in Chicago and won "Best Choreography" for his 1980 production of *Cabaret* and 1981 production of *South Pacific* and "Best Director" for his production of *Man of La Mancha*.

Indian Summer is the fourteenth play in a twenty cycle of plays Bell is writing entitled, *The American Memoirs*.

The *American Memoirs* cycle deals with

the growth of an Irish immigrant family from their arrival in America through one hundred years of that family's descendants.

Indian Summer will open Jan. 14, 1982, and play Jan. 15, 16, 19-23, 26-30. Tickets are currently on sale at the Playhouse Theatre Box Office. For reservations call 865-1884.

David H. Bell

Alard Quartet featured in program

A program of works by Haydn, Kodaly and Mendelssohn will be presented by the Alard String Quartet, the University's quartet-in-residence, at 8:30 p.m. Wednesday, Dec. 16, in the Music Bldg. recital hall.

The musicians will begin the concert with the Quartet in B-flat, opus 76 No. 4 by Joseph Haydn. Written around 1797 after Haydn's two visits to London, the four quartets of opus 76 were published in 1799 when Haydn was semi-retired. The B-flat quartet is often called the "Sunrise."

Institute awards six research fellowships

The Institute for the Arts and Humanistic Studies has awarded six faculty research fellowships for winter and spring terms. Recipients are:

— Dr. Thomas W. Benson, professor of speech communication, for a critical study of documentary films by Frederick Wiseman.

— Dr. Gideon Golany, professor of urban and regional planning, to conduct a study of underground housing in Tunisia.

— William Hanson, associate professor of art, to create a series of lithographic prints.

— Dr. John L. Logan, assistant professor of French, to examine manuscripts for a book-length study. *The Longinian View: Studies in French Critical Theory and Poetic Practice, 1580-1680*.

— Dr. Joseph G. Price, professor of English, to edit a collection of critical essays on *Hamlet*.

— Dr. Michael D. Riley, assistant professor of English, Berkey Campus, for creative writing in poetry.

'A Christmas Festival' planned in Eisenhower

The University Choir, directed by Raymond Brown, and the University Symphony Orchestra, directed by Smith Toulson, will present "A Christmas Festival," a free concert celebrating the Christmas season, at 8:30 p.m. Saturday, Dec. 12, in Eisenhower Auditorium.

Featured will be music spanning works from the fifteenth century composer Dufay to a jazzy contemporary setting of traditional spirituals. The concert will close with the festive and stirring "Benedicite" by Ralph Vaughn Williams with Kim Kronenberg as soprano soloist.

quartet because of the long ascending line played by the first violinist in opening the piece.

Zoltan Kodaly's Second String Quartet is the second number on the program. Although Kodaly studied Hungarian folk music with fellow composer Bela Bartok, his compositions are more conservative than Bartok's, without the percussive dissonance and primitive rhythms that are so much a part of Bartok's music.

Concluding the Alard Quartet's concert will be Mendelssohn's Quartet in E Minor, opus 44 No. 2. Mendelssohn's interest in composing chamber music was evident at the age of thirteen, when he began work on three piano quartets. The Quartet in E Minor is described by the Alard Quartet as "a melodious work, with rich fugue passages, delightful imitations, luscious counter-melodies and (ii) is distinguished by one of the most original and enchanting of scherzos."

Members of the Alard String Quartet are violinists Joanne Zagel Feldman and Donald Hopkins, violist Raymond Page and cellist Leonard Feldman. All are associate professors of music.

The performance, sponsored by the School of Music, is free and open to the public.

Friends group buys works for Art Museum

Two works have been purchased by the Friends of the Museum of Art for donation to the Museum's permanent collection. The items were selected at the Friends' annual Purchase Party held recently at the Museum.

Receiving the greatest number of votes was a 15th century book illumination from the school of Stefan Lechner, who worked in Cologne during the early and mid-1400s. The page, which depicts a miniature Nativity scene, is from an anthology (musical score).

The second acquisition is a pen and ink drawing by the 16th century Italian artist Luca Cambiaso. The drawing shows the Holy Family with St. Anne and John the Baptist in a humble, domestic setting. The intimate portrayal of religious figures — an innovation during Cambiaso's lifetime — anticipated the style of artists yet to come such as Rembrandt.

Both acquisitions currently are on display at the Museum of Art. The Museum is open 11 a.m. to 4:30 p.m. Tuesdays through Sundays, and admission is free and open to the public.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

December 10-

January 14

Special Events

Thursday, Dec. 10

Holiday Festival VIII, Holiday Luncheon, 11 a.m.-2 p.m., Kern Cafeteria; Linda Rossman, "Wheat Weaving," 11:30 a.m., Kern Lobby; Film, "Make Mine Music," 6:30 and 8:30 p.m., 112 Kern.
Phi Delta Kappa luncheon, 11:30 a.m., 101 Kern.

Friday Dec. 11

Holiday Festival VIII, International Craft Demonstration, 11:30 a.m., Kern Lobby; Un-Common Snowflake Buffet, 6:30 p.m., 101 Kern.
Sports: Penn State Squash Club Insinko Tournament, Rec Hall. Registration: 865-5481 or 865-7491.

Saturday, Dec. 12

Holiday Festival VIII, Children's Christmas Party, noon-3 p.m., Assembly Room, Walnut Bldg.; International Coffee House, 8 p.m., Kern.
Sports: Swimming (men) vs. St. Bonaventure, 2 p.m.

France-Cinema, Truffaut, *Jules and Jim*, 7 and 9 p.m., 112 Kern. Also Dec. 14.

"A Christmas Festival," featuring the University Choir and University Symphony Orchestra, at 8:30 p.m., Eisenhower Auditorium.

Sunday, Dec. 13

Shaver's Creek Nature Center Holiday Decorations Workshop, 1-5 p.m. Registration: 865-1851.

Holiday Festival VIII, Christmas Caroling Around Campus, 8 p.m., Eisenhower Auditorium.

Monday, Dec. 14

Late registration deadline.
Add deadline.
HUB Craft Centre Instructors' Holiday Sale, 10 a.m.-4 p.m., HUB Gallery. Also Dec. 15.

Tuesday, Dec. 15

Senate Committee on Faculty Affairs, 9:30 a.m., 101 Kern.
Senate Undergraduate Instruction Committee meeting, 9:30 a.m., 101-A Kern.
Liberal Arts Senators meeting, 11:30 a.m., 101 Kern.
University Faculty Senate meeting, 2:10 p.m., 112 Kern.
College of Education Faculty Council meeting, 2:30 p.m., 101 Kern.
Artists Series film, "Aida," 8 p.m., Eisenhower Auditorium.

Wednesday, Dec. 16

Deadline for graduate students to pay thesis fee for March graduation.
Commons Nontime Concert, holiday music, Kern Lobby.
Graduate Council meeting, 3 p.m., 101 Kern.
Paul Robeson Film Series, "Showboat," 7:30 p.m., Assembly Room, Walnut Bldg.
University Readers Christmas Reading, 7:30 p.m., 112 Kern. Tony Lentz, Dickens' "A Christmas Carol." Also Dec. 17.

Saturday, Dec. 19

Christmas and New Year's recess through Jan. 3.
Sports: Basketball (women) vs. St. Joseph's, 2 p.m.

Monday, Dec. 21

Sports: Basketball (men) vs. Nebraska, 8:10 p.m.

Thursday, Dec. 24

University offices closed for holiday break through Jan. 3.

Monday, Jan. 4

Winter Term classes resume.
Penn State Squash Club, 7-9 p.m., White Bldg.

Tuesday, Jan. 5

Pass-Fail through Jan. 7.

Wednesday, Jan. 6

Commons Nontime Concert: Glenn Kiddier. Kern Lobby.
Sports: Basketball (women) vs. LaSalle, 7:30 p.m.

Thursday, Jan. 7

Drop deadline.
Spring Term pre-registration deadline.
Economics faculty meeting, 3 p.m., 101 Kern.
Slide Show, Felicia Bell, "Kenya: My African Experience," 7:30 p.m., Conference Room, Walnut Bldg.

German nutcrackers are available for Holiday giving at the Museum of Art Gift Store.

Photo: Scott Johnston

Friday, Jan. 8

Sports: Gymnastics (women) vs. Michigan State, 8 p.m.; Ice hockey vs. Delaware, 9:15 p.m.

Saturday, Jan. 9

Sports: Swimming (women) vs. Brown, 1 p.m.; Volleyball (men) vs. Alumni, 1 p.m.; Ice hockey vs. Delaware, 8 p.m.; Basketball (men) vs. Philadelphia Textile, 8:10 p.m.

Sunday, Jan. 10

Artists Series: "The Best Little Whorehouse in Texas," 3 and 8:30 p.m., Eisenhower Auditorium.
Sports: Basketball (men) vs. South Florida, 8:10 p.m.

Monday, Jan. 11

Interdisciplinary Symposium, 7:30 p.m., 101 Kern. Daniel G. Baker, Philosophy, "The Primacy of Speaking and Its Normative Foundations."
Penn State Squash Club, 7-9 p.m., White Bldg.

Wednesday, Jan. 13

Commons Nontime Concert: Richard Sleight, Kern Lobby.

Thursday, Jan. 14

URTC: David H. Bell, "Indian Summer," 8 p.m., Pavilion Theatre. Also Jan. 15, 19-23, 26-30.

Seminars

Thursday, Dec. 10

Chemistry Colloquium, 12:45 p.m., 335 Whitmore. C. Bradley Moore, University of California, Berkeley, on "Selectivity in Laser Photochemistry."

Dept. of Economics and Institute for Policy Research and Evaluation Seminar, 3 p.m., 101 Kern. Nancy A. Wentzler on "Risk Analysis in Health and Safety: Problems and Research Needs."

Computational Fluid Dynamics Seminar, 3 p.m., 216 Hammond. P.K. Koshla, Univ. of Cincinnati, on "Navier-Stokes Calculations with a Coupled Strongly Implicit Method and Spline Deferred-Correction Solver."

Physics Colloquium, 3:50 p.m., 445 Davey. R. Parks, Univ. of Maryland, on "Surface Phase Transitions."

Math Colloquium, 4 p.m., 102 McAllister. L. Evans, Univ. of Maryland, on "New Methods for Hamilton-Jacobi Equations."

Dept. of Speech Communications Lecture - Computer Literacy, 4 p.m., 112 Kern. Carolyn Marvin, Univ. of Pennsylvania, on "Computer-Ease: A Twentieth Century Literary Emergent."

Friday, Dec. 11

Mathematics Colloquium, 4 p.m. 103 Osmond. Jean-Pierre Serre, College de France/Harvard, on "Integral Points on Algebraic Varieties."

Monday, Dec. 14

Div. of Learning and Telecommunications Services Seminar, 3 p.m., 8 Mitchell. W. Müller, WPX executive producer, on "ALARD."

MC3B Seminar, 4 p.m. 101 Althouse Lab. Dr. Peter Blumberg, NCI, NIH, on "Receptors for Phorbol Ester Tumor Promoters."

Tuesday, Dec. 15

Water Pollution Control Seminar, 2:30 p.m., 217 Willard. Terry Williams, graduate student in civil engineering, on "Filamentous Microorganisms and Activated Sludge - Are They Compatible?"

Business Economics Research Seminar, 3 p.m., 201A Business Administration. Dr. Frank Goode, associate professor of agricultural economics, on "Refining Industrial Location Models."

Plant Pathology Seminar, 3:55 p.m., 213 Buckhout. W. Merrill, on "Introduction to Phytopath Classics."

Materials Science Graduate Seminar, 4 p.m., 112 Walker. J. Laughner on "Quartz - Still Ferrous After All These Years," B. Landes, on "Saran Copolymers."

Thursday, Dec. 17

Chemistry Colloquium, 12:45 p.m., 335 Whitmore. S. Walter Englander, University of Pennsylvania, on "Internal Protein Dynamics, Hydrogen Exchange, and Allostery in Hemoglobin."

Physics Colloquium, 3:50 p.m., 445 Davey. A. Komar, Yeshiva Univ., on "Constrained Dynamical Systems."

Acoustics Seminar, 4 p.m., 215 Hammond. J. Welz and M. Dahl on "An Introduction to the Use of Microcomputers in Acoustics."

Tuesday, Jan. 5

Plant Pathology Seminar, 3:55 p.m., 213 Buckhout. Gregory Watson on "Tillet - Classic #5."

Materials Science Graduate Seminar, 4 p.m., 112 Walker. L. Radovic on "Inorganic Matter Effects in Ligand Char Reactivity," M. Monokowski on "Chlorine Incorporation During Thermal Oxidation of Silicon."

Thursday, Jan. 7

Physics Colloquium, 3:50 p.m., 445 Davey. (TBA).

Tuesday, Jan. 12

Plant Pathology Seminar, 3:55 p.m., 213 Buckhout. Garfield Thomas on "Fontana - Classic #2."

Materials Science Graduate Seminar, 4 p.m., 112 Walker. E. Minford on "Environmental Effects on the Time Dependent Failure of Silicon Carbide Ceramics," J. Youtcheff on "Study of Biological Markers in Coal."

Wednesday, Jan. 13

English Colloquium, 8 p.m., 101 Kern. Robert D. C. Downs, BBC Film, "Going Gentle."

Thursday, Jan. 14

Physics Colloquium, 3:50 p.m., 445 Davey. A.

Redfield, Brandeis Univ., on "Pulsed Fourier Transform NMR and Transfer RNA."

Exhibits

Chambers Gallery: Student Drawings, Form and Idea, Art 222, through Dec. 18.
Group Show, Graduate Art Education Students, Jan. 7-28.

HUB Art Gallery: International Artifacts, Art Alley, through Dec. 13.
Laser Photography Exhibit/Sale, Art Alley and Browning Gallery, through Dec. 11.

"Art of the Contemporary American Indian," The Gallery, through Dec. 20.
Ukrainian Club Exhibition, Art Alley, Jan. 4-30.
Nittany Divers Exhibition, Art Alley, Jan. 4-30.

Central Pennsylvania Scholastic Art Awards, Art Alley and Browning Gallery, Jan. 7-23.

Invasions Gallery of Photography, 212 Arts Bldg. Gallery Hours: Sunday and Tuesday, noon to 5 p.m.; Thursday, 7-10 p.m.

Luciano Franchi De Alfara, III, photographs, through Dec. 30.

Kern Gallery: Dorothy Crowley, watercolors, through Dec. 21.
International Artifacts Exhibition/Sale, 9 a.m.-4 p.m., through Dec. 15.

Gordon Mortensen, woodcuts, through Dec. 18.

Dorothy Hook, paintings, Jan. 5-29.
Metalcraft, Jan. 6-28.

Museum of Art: Museum Hours: 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m.

Danish Ceramic Design, through Jan. 24.
Architectural Fantasy and Reality, Drawings from the Accademia Nazionale di San Luca in Rome, through Jan. 31.

American Paintings Before World War II, from the permanent collection, through Feb. 14.

Pattie Library: Rare Books Room: The Academy of St. Luke, Rome: Architectural Treatises and Perspective Books.

Second Floor, East Patter: Mary McGuire, pottery, through Dec. 11; Kathy Dubash, ceramics, through Jan. 7; Slavic Books, Jan. 7-25.

East Corridor: Peter Jogo, recent works, through Jan. 18; James Abbot, photography, Jan. 8-31.

Lending Services Gallery: Sally Berndt, watercolors, through Jan. 4; Ruth Kemper, recent works, Jan. 5-26.

Visual Arts Bldg., Zoller Gallery. Gallery Hours: 9 a.m.-5 p.m., Monday through Friday; Saturdays and Sundays, noon to 5 p.m.

PSU Masters of Fine Arts Graduate Group Show, through Jan. 3.

Architectural Drawings/Alpha Rio Chi, Jan. 6-20.

Penn Staters

Dr. John E. Baylor, Extension agronomist, has been named winner of the 1981 Pennsylvania Forage and Grassland Council's Special Award.

Dr. Baylor has been primarily responsible for the developing Extension educational programs related to forage crop improvement. He currently serves as coordinator of Extension agronomy programs.

Dr. Frederick R. Eisele, associate professor of social policy, has edited a special issue of the *Journal of Health Politics, Policy and Law* (vol. 6, No. 1, Spring 1981) on "Health Policies for the Elderly." The journal is published by Duke University Press and is affiliated with the American Health Planning Association.

Dr. Gordon N. Fleming, professor of physics, presented three invited seminars at the University of Connecticut at Storrs. At a Theoretical Physics Seminar he discussed, "The Quantum Pathology of Unstable Particles or When You're About to Go to Pieces Which Way Do You Turn?" At a Philosophy of Science Seminar he spoke about "Pierce, Popper and Probability" and at a Physics Seminar his topic was "Zeno's Paradox in Quantum Theory."

Dr. Thomas A. Hale, associate professor of French and comparative literature, presented an invited seminar at the School of Area Studies of the Foreign Service Institute, Department of State, Washington, D.C. He discussed "From Griots to Negritude: The Origins and Evolution of Biculturalism in Francophone Africa."

Ellen M. Harkleroad, assistant Perry County Extension agent, has been named recipient of the New Worker Extension Award presented by the Alpha Omicron Chapter of Epsilon Sigma Phi, honorary extension fraternity.

The award is presented annually to a

member of the University's Cooperative Extension Service staff with two or less years of service and who has organized and conducted outstanding educational programs.

Dr. Russell E. Larson, provost emeritus, has received the 1981 Clover Award of the Pennsylvania Association of Extension 4-H Agents. The award was established in 1980 to recognize an individual for outstanding support of Pennsylvania 4-H programs. Dr. Larson was cited for his work in the formation of Pennsylvania Friends of 4-H, a foundation to aid in increasing the scope of the Extension Service youth program.

Joseph A. McCurdy, Extension agricultural engineer, has been named recipient of the 1981 Ruby Award presented by the Alpha Omicron Chapter of Epsilon Sigma Phi. The award is presented annually to a member of the University's Cooperative Extension Service staff for innovative educational programming.

Mr. McCurdy provided leadership in the management of potato storage facilities in Pennsylvania. He designed and developed a ventilation system that allows potatoes to be stored longer with less shrinkage and waste. This unique system enabled farmers to increase their income and provide better quality potatoes for consumers.

Dr. E. Willard Miller, professor of geography emeritus and associate dean emeritus of resident instruction in the College of Earth and Mineral Sciences, presented the plenary address on "Spatial Dynamics of the Pennsylvania Economy" at the annual meeting of the National Council of Geographic Education.

Dr. Dan E. Moore, associate professor of rural sociology Extension, has been named recipient of the 1981 Cooperative Extension Service Award. The annual award is presented to a member of the

Pennsylvania Extension staff for outstanding educational programming.

Dr. Moore was cited for planning and conducting "Pennsylvania: The Citizen's Viewpoint," a survey of Commonwealth citizens which has made their views and concerns accessible to decision makers throughout the state.

Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, has been elected 1982-83 chairman of the Commission on Arts and Sciences of the National Association of Land Grant Universities and Colleges.

Composed of 15 deans and three university presidents, the commission makes recommendations to the national association on issues related to education and research in colleges of arts and sciences within land grant universities.

Manila, Seoul and Tokyo were included in a research-tour led by **Dr. Warren C. Robinson**, director of the Population Issues Research Center and professor of economics.

He presented a paper, written with Dr. Wayne Schutjer, professor of agricultural economics, entitled "Agricultural Surplus and Population Growth in the Development Process" at the meeting of the International Union for the Scientific Study of Population in Manila.

In Seoul, Dr. Robinson consulted with the staff of the Korea Rural Economics Institute and the Korea Energy Research Institute, both engaged in collaborative work with Penn State. In Tokyo, he presented a paper entitled "Demand and Supply Factors in the Fertility Transition"

at the Population Institute of Nihon University.

Dr. Michael J. Streibel, assistant professor of instructional systems, has been appointed to serve on the Educational Technology for Postsecondary Institutions Committee of the Pennsylvania Department of Education.

George L. Thuringer, director of management engineering and professor of industrial engineering, has been elected vice president of general engineering of the American Society of Mechanical Engineers. The position includes serving as a member of the Council of Engineering which is responsible for the technical programs of the Society and as chairman of the Committee on Public Issues and Positions.

Dr. T. T. Tsong, professor of physics, presented two lectures at a NATO Advanced Study Institute on "Surface Mobilities of Solid Materials" held in Les Arcs, France. The lectures were entitled, "Correlation Between Adatom-Adatom Pair Interactions and Adlayer Superstructure Formation" and "Surface Diffusion of Single Atoms With and Without a Driving Force."

Dr. Thomas D. Yawkey, associate professor of education, and early childhood doctoral students Glessie Miller, Mary Ann Melizzi, Fay Glossenger and Susan Trostle presented an invited research symposium on "Child's Pretend Play" at the 12th annual convocation of the Northeastern Educational Research Association.

From the Press

The Shaw Review, one of two literary journals published by Penn State press, has been transformed to *Shaw: The Annual of Bernard Shaw Studies*, in book format.

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, will remain as general editor, a position he has held for 25 years.

The change in format brings with it some changes in substance. On odd-numbered years, the annual will be thematic. The first such volume, *Shaw and Religion*, edited by Dr. Charles A. Berst of U.C.L.A., already has been published.

Theme of the 1983 annual is *Shaw's Plays in Performance*. It will be edited by Dr. Daniel Leary, professor of English at City College of New York. The 1985 annual, *Shaw Abroad*, will deal with the impact of Shaw's travels upon his writing.

In even-numbered years, the annual's scope will be general. The 1982 general volume will be published in February or March, 1982.

"The change should be more attractive to scholars," Dr. Weintraub says.

"Because of its book size, Shaw will offer about twice as many pages as the former three-issue format combined; it therefore will be possible to use more illustrative material than before and more detailed studies.

"The new format should also prove more attractive to libraries. Faced with increasingly tighter budgets, libraries are cutting back on journals. The related costs of postage and handling and of binding made it useful all around to convert the journal to an annual."

All volumes, thematic and general, will continue to carry the Continuing Checklist of Shaviana — the bibliography of Shaw studies — as well as the book review section.

Colette: The Woman, The Writer, Erica M. Eisinger and Mari McCarthy, editors. Foreword by Elaine Marks. 200 pages. \$16.95.

This book explores the link between women's identity and women's writing, through Gabrielle Sidonie Colette's life and work, by 20 leading French and American critics and scholars.

How did a self-styled "woman born not to write" become one of the most honored and successful writers of her time (1873-1954), while pursuing careers as music hall performer, journalist, beautician, sensualist, and wife and mother? In what sense does Colette fit Louis Perche's description as "the first woman in French literature to write as a woman?"

These questions are addressed in a blending of modern feminist and critical perspectives, including structuralism and post-structuralist semiotics.

Donna C. Connell to assistant extension agent in Agriculture.

Samuel J. Duck to foreman, operations & maintenance (power plant) in Physical Plant.

Robert C. Finley to director of operations at Behrend.

Greg Ingram to assistant dining hall supervisor in Housing and Food Services.

Robert Long to foreman, central control system in Physical Plant.

Connie M. Paden to assistant extension agent in Agriculture.

Marybeth Reese to area representative in Continuing Education.

Milton R. Trask to regional personnel officer in Personnel Administration.

(Continued on page 7)

Bookshelf

Dr. Gerald G. Eggert, professor of American history and head of the History Department, is author of a new book, *Steelmasters and Labor Reform, 1886-1923*, published by University of Pittsburgh Press.

Dr. Eggert's study of corporate debate on labor "reform from above" focuses on the career of William B. Dickson, one of the last of Andrew Carnegie's "young geniuses" to rise to the top levels of Carnegie Steel. Dickson went on to high positions with U.S. Steel and later with Midvale Steel and Ordinance Co. Dickson was the most active reformer in the steel industry of his era, his proposals growing out of his youthful experiences in the mills as a laborer.

Dr. Eggert's study provides an inside view of top steel officials arguing their positions on various reforms under consideration: stock purchase plans, employer liability, employee representation plans, and elimination of the 12-hour shift and 7-day work week. The account is based on materials collected by Dickson: corporate correspondence and records, news clips, his diaries, notes and reminiscences.

Ray T. Fortunato, assistant vice president for personnel administration, is co-author with D. Geneva Waddell, personnel specialist at Montgomery Community College, Montgomery, Md., of *Personnel Administration in Higher Education*.

This handbook of faculty and staff personnel practices is designed to fill the gap between abstract theories of personnel administration and the practical approach actually employed by effective practitioners in higher education institutions.

Published by Jossey-Bass Inc., San Francisco, Calif., it focuses specifically on meeting faculty and staff personnel needs in colleges and universities, and covers every aspect of personnel management from defining and filling new positions to preparing a retirement plan.

The handbook also includes dozens of sample forms and policy statements to serve as guides in developing or adapting similar materials for a particular institution.

Dr. Anton Glaser, professor of mathematics at Ogonitz, is the author of a new edition of his *History of Binary and Other Nondecimal Numeration*, published by Tomash Publishers, Los Angeles.

During the last four centuries, mathematicians and philosophers have proposed many exotic and practical number systems beyond the decimal, including the binary system that has become both the base and basis for the new Computer Age.

This encyclopedic historical work — long out of print and previously available only in a rare, privately printed edition — is a carefully researched study of the basic mathematical ideas and insights that made possible the conception and creation of the electronic computer. The work is of interest to teachers, computer users, scholars and historians.

Fathoms, a new book of poetry by **Dr. Robert Lima**, professor of Spanish and comparative literature, has been published by the Carnation Press, State College.

Limited to 500 numbered copies, the edition carries a cover design by Cyse Shumkas, a State College artist employed as the sign and print shop operator at the Hetzel Union Bldg.

Staff Non-Exempt

Chester DeFurio, Jr. to estimator-inspector in Physical Plant.
Dale R. Miller to food service steward at Nittany Lion Inn.
Helen M. Sheehy to documents operations assistant in Libraries.

Clerical

Nancy J. Carra to clerk, accounting A in Agriculture.
Katherine S. DeShong to secretary B in Liberal Arts.
Karen Haldeman to secretary Bin Alumni Association.
Joni D. Ingram to clerk typist A in Science.
Beverly A. Keen to accounting clerk in Agriculture.

Hatti C. Reese to inventory clerk in Controller's Office.
Maria Russo to secretary B. in Human Development.

Technical Service

Harold S. Bagshaw to group leader, athletic equipment and facilities worker in Health, Physical Education and Recreation.
Larry S. Gohn to greenhouse worker (hort.) in Agriculture.
Florence Hawkins to cafeteria worker at Hershey.
Ray B. Mayopoulos to group leader, escort service lead at Hershey.
George E. Miller to food service worker A. Housing and Food Services at Capitol.
Gary P. Osborne to maintenance worker general C in Physical Plant.
Stewart L. Vonada to first cook, main kitchen at Nittany Lion Inn.

supply and handling liquid waste from milking centers for dairy farms. Mr. Wooding also worked closely with officials of the Pennsylvania Department of Environmental Resources concerning implementation of the Sewage Facilities Act. He served seven consecutive two-year terms as the University's official representative to the Sewage Advisory Committee an advisory group mandated by the act.

He conducted waste management seminars for fruit and vegetable processing industry personnel. He also provided educational programs relating to water supply, irrigation, and drainage for the state's turfgrass industry.

Mr. Wooding is a member of the American Society of Agricultural Engineers and served on numerous technical committees of the society. He also is a member of Gamma Sigma Delta, honor society in Agriculture; Alpha Epsilon, honor society in agricultural engineering, and Epsilon Sigma Phi, national honorary extension fraternity. He is a charter member and past president of the Extension Professors Association and member of the Pennsylvania Board of Extension Professional Associations.

A veteran of World War II and the Korean Conflict, he was active in the U.S. Army Reserve until his retirement as a colonel in 1972. He and his wife, the former Anna Lightner, of Tyrone, are the parents of three children, all of whom attended Penn State.

In fact, Mr. Blazer has driven for several of the University's presidents, including Dr. Oswald, Dr. Walker and Dr. Hetzel. "After Dr. Eisenhower, though, I didn't get to drive the presidents nearly as often — air transportation became the norm, and except for unusual instances, the presidents flew more than they traveled by car," he says.

Although driving for Penn State presidents has always been a special aspect of Mr. Blazer's work, he has held numerous other responsibilities.

He began his career in Central Extension (now Continuing Education) where he served as travel coordinator. Fleet Operations was organized in 1957, and Mr. Blazer was named its supervisor in 1960.

"Fleet Operations had its origins in the old Extension fleet," Mr. Blazer says. "The Extension fleet had the first two passenger cars on campus, two 1941 station wagons."

In 1957, Fleet Operations had 16 vehicles, which were taken over from the Extension fleet. Today, Fleet Operations has some 375 vehicles.

It has been Mr. Blazer's responsibility to oversee purchasing, maintaining and leasing the fleet, and his record is impressive: Fleet Operations not only functions smoothly in meeting the needs of the University, it also has an outstanding safety record.

"Safety has always been very important to every member of the Fleet Operations staff," Mr. Blazer says, "and although I may have been supervisor, much of that credit must go to the staff members who take such good care of the vehicles."

In 1971, Mr. Blazer was honored for his service to Penn State when he received the third McKay Donkin Award given annually to "that member of the faculty or staff who has contributed most to the general welfare of the University faculty." President Oswald presented the award during a special dinner at University House.

The award was established with contributions made by the family and friends of the late McKay Donkin, who prior to his death in 1968 had served more than 10 years as vice president for finance and as treasurer.

Mr. Blazer's wife, Betty L., also will retire from the University on Dec. 31. She has been a University secretary for 18 years, most recently in the College of Education.

A son, Steven, is a 1979 Penn State graduate, and daughter Suzanne worked as a University secretary. Both currently reside in the State College area.

Mr. and Mrs. Blazer plan some travel during their retirement, but will retain their State College residence. Mr. Blazer has been a member of the Alpha Fire Company since 1944, going onto the honorary list after 28 years of active service which included driving Alpha ambulances. He also is active in St. Paul's United Methodist Church of State College, where he has served as a trustee and as a member of the official board.

Col. Richie was a member of the University Senate for six years, serving on the committee for military instruction from 1959 to 1965. He directed the summer orientation program for incoming freshmen and their parents from 1967 to 1974, and served as assistant to the executive officer of the University Teachers Certification Council during the same period.

Save bumper stickers

Faculty and staff members who trade vehicles can save \$10 by returning all the fragments of their University parking bumper stickers or permits to their parking representatives.

If complete remnants are not returned, a \$10 fee must be charged for the issuance of replacement stickers, according to Allan Derzak, University parking coordinator.

W. D. Moir

W. S. Pierce

P. Bower

N. H. Wooding, Jr.

25-year chairs

William D. Moir, director, Office of Sponsored Programs, in the Office of the Vice President for Research and Graduate Studies, has received his 25-year award.

Mr. Moir joined the University staff in September, 1956, as a research assistant in the College of Engineering. From 1957 to 1963 he was an accountant in the Controller's Office.

In 1963, Mr. Moir was named contract negotiator and coordinator for the University, and in a reorganization of that office in 1979 he was named to his present position.

Mr. Moir is a Penn State graduate, having received a bachelor of science degree in business management in 1957.

William S. Pierce, associate librarian and chief of facilities planning for the University Libraries, has received his 25-year chair.

Mr. Pierce, who joined the University in 1956 as Extension librarian, began working in 1959 in library programs concerned with Commonwealth Campuses and Continuing Education, serving as assistant director of libraries for Commonwealth Campuses and Continuing Education until 1970.

At that time, he was appointed to his present position, and more recently has divided his time between facilities planning and as an archivist in the Penn State Room at Pattee Library.

During the early years of his tenure, he was responsible for establishing library programs at all the campuses. Later he had a large role in building fifteen library buildings at Commonwealth Campuses and University Park.

Mr. Pierce holds degrees from West Virginia Wesleyan College and the Carnegie Institute of Technology. He is a nationally-known consultant on library buildings and furnishings, and has recently completed a book, *Furnishing the Library Interior* (NY: Marcel Dekker, 1980). He lives in State College with his wife, Mitam, who also is a librarian at Penn State, and their three children.

For **Phil Bower**, Montoursville RD 1, being transferred to a job in the Williamsport area 10 years ago meant coming home.

Mr. Bower, area director for the Continuing Education Office at the Williamsport-Lycoming County Airport at Montoursville, was recently recognized for 25 years of University service. The Williamsport native began his Penn

State service in 1956 as a district representative at the DuBois Campus and transferred to University Park in 1960 as coordinator of adult courses in the College of Business Administration.

"Everybody said I should get some experience in a metropolitan area, so I transferred in 1965 to the Ogonitz Campus as a district administrator," he said. Three years later, he moved to the Delaware County Campus, then assumed his present duties in 1971.

"Working around the city didn't kill me, but I was certainly happy when I was offered this job right back here where I grew up," he explained. An avid outdoorsman, he finds the mountainous Northern Tier counties much to his liking.

Mr. Bower is responsible for Continuing Education credit and credit-free programs in Lycoming, Potter, Tioga, Bradford, Clinton, Sullivan, Union, and Snyder Counties, in addition to portions of Northumberland and Montour Counties.

He is a graduate of Williamsport High School and Lycoming College, where he earned a bachelor of science degree in business administration. He also received a master of education degree from Indiana University of Pennsylvania.

Mr. Bower and Mrs. Bower, the former Shirley A. Platt, also longtime resident of Williamsport, have three daughters, Karen and Linda Bower and Mrs. Faith Shalls.

Retirements

N. Henry Wooding, Jr., professor of agricultural engineering Extension, will retire Jan. 1 with 32 years of service.

A native of Virginia, he received a bachelor of science degree from Virginia Polytechnic Institute and master of science degree from Rutgers University. Both in agricultural engineering. As Extension specialist, Professor Wooding has conducted educational programs relating to water supply waste management, sewage disposal, and conservation and management of natural resources.

He has worked with farmers and rural homeowners in solving domestic water supply and sewage disposal problems. He also assisted local and state government agencies, planning commissions, and community leaders on activities designed to solve environmental pollution problems.

As a member of the Northeast Dairy Practices Council he helped develop regional guidelines for potable water

Samuel C. and Betty L. Blazer

Trips to the White House and Camp David are among many fond memories recalled by Samuel C. Blazer, supervisor of Fleet Operations, as he reviews his 40 years as a University employee.

Mr. Blazer, who will retire Dec. 31 after working for Penn State since Nov. 21, 1941, says "one of the biggest thrills" of his career was driving for University President Milton S. Eisenhower.

"I got to retire President Eisenhower to Camp David, Gettysburg and the White House for visits with his brother. It was always an enjoyable time, as the Eisenhowers were very friendly people," he notes.

Obituary

Col. Ellis B. Richie, U.S. Army, Ret., former instructor in education and professor of military science, died Wednesday, Dec. 2, in El Paso, Texas. Col. Richie, who was 71, retired in 1975 as assistant for student affairs and instructor in education in the College of Education. He previously had retired from the Army in 1965, after serving six years as professor of military science and head of the Army Reserve Officer Training Corps program at Penn State.

A native of Stigler, Okla., Col. Richie was a graduate of Southeastern (Okla.) State College where he earned a bachelor of arts degree in history and education. He pursued graduate studies in educational administration at the University of Chicago and the University of Oklahoma, and received a master of education degree from Penn State in 1964.

Capitol Campus historian describes his 'sudden' turn to fiction

Editor's note: This article is one in an on-going series in which a faculty member describes work in progress.

By George D. Wolf
Professor of American Studies and History

Why does a historian who has just seen the release of his biography of a major figure in Pennsylvania politics (*William Warren Scranton, Pennsylvania Statesman*, Penn State Press) suddenly turn to writing fiction? More than any other, this is undoubtedly the most frequent question about my recent work. Although the reasons are varied, they are not particularly complex.

Predominant is the simple fact that the fictional context allows the author a certain freedom of action which is more dependent upon his intuition and creativity than upon the rules of evidence for traditional historical scholarship. But why the switch?

In the first place, I was not trained as a traditional historian. My degree in American Studies, or American Civilization as it is departmentalized at the University of Pennsylvania, was an early influence. The twin disciplines of history and literature have provided the basis for a program I feel belongs in the Humanities, as it is at the Capitol Campus.

Having taught history for years with occasional injections of literature, I now find that I am more interested in teaching literature with an historical background. My graduate seminars tend to be built around literary classics like *Huckleberry Finn*, *All the King's Men*, *The Red Badge of Courage*, and others. Since I believe that "history is about chaps", as H.T. Buckle, the English historian, once wrote, then it

seemed quite natural to me to move from Bill Scranton to my fictional Terry Freeman to comment on the contemporary political and social scene.

Secondly, a life-long interest in American political novels has familiarized me with the genre. I've been teaching such a course for years. Why not write a political novel? Besides, my political involvement over the past 30 years was an added boon. As a special assistant to Governor Scranton, I kept a daily journal, something I repeated during my stint as Historian for the Constitutional Convention of 1967-68. Such notes are fodder for the political novelist.

My best time for fictional writing has been in the summer when concentrated blocks of time are available to me. Interest in the genre and thoughts about Chappaquiddick three years ago prompted a mistaken plunge into the writing at that time. I soon found that a different kind of organizing and planning, as well as research, was absolutely necessary. Consequently, after a false start, I began doing chapter synopses and character sketches until the next summer. Even then, I found it necessary to re-write the two chapters I had completed. Now, after obtaining other opinions, I'm going to do more rewriting. My characterizations, for one thing are not sufficiently developed.

A two- to four-hour summer morning regimen best suits me and over the past two years I have completed a draft which is still unsatisfactory at this point. In addition to the problems with characters, I have divulged too much of the plot through the narrator, a vital factor if I intend to maintain any reader interest. My biggest mistake was in trying to "get something on paper". Unlike my

George D. Wolf

scholarly efforts which are buttressed by footnotes and the like, I need more information on my characters and in the synopses. The manuscript is just too thin, despite the fact that it runs to some 300 or more pages.

I try to do a chapter a week, which means three to five pages or, roughly, 1,000 to 1,500 words. This past summer I was much more regular in maintaining a Monday through Friday schedule.

At this juncture, I feel that I have a good idea and the possible context in which I

can make the comments I want to make about politics and human existence. But still have a long way to go. Although an agent has agreed to read the manuscript, and that is an essential with fiction, I don't think I'm ready to take that step at this moment. Publishers are beyond the realm of any consideration just now. A lot of plain hard work, rewriting, fleshing out characters, and considering a more persistent theme as well as a plot, will have to be experienced before I can even begin to consider this effort satisfactory.

College of Agriculture presents numerous 25-year service awards

Thirty-five staff members in the College of Agriculture received 25-year Service Awards recently during ceremonies at the Nittany Lion Inn. They are: 1. Clarence R. Bryan, Jr., Extension agent in Delaware County; 2. John W. Mastalerz, professor of horticulture; 3. Thomas E. Piper, senior Extension agent in Adams County; 4. Marshall S. Garretson, senior orchard worker and machine operator at Fruit Research Laboratory, Biglerville; 5. Robert H. McAlexander, assistant dean and director of International Agr. Programs; professor of farm management; 6. John E. Brockett, Jr., associate professor of agr. economics Extension; 7. Henry D. Gerhold, professor of forestry; 8. Larue K. Thomas, Extension agent in Tioga County; 9. John W. Bergstrom, assistant professor and assistant to the director of Agricultural and Home Economics Extension; 10. C. Rodney Knepp, animal caretaker in Veterinary Science; 11. B. Wayne Kelly, professor of farm management Extension; 12. Harold E. Neigh, associate professor of consumer economics Extension; 13. Arva W. Gates, agronomy technician A; 14. Alvi O. Voigt, professor of agricultural economics Extension; 15. Norman L. Perschke, associate Extension agent in Warren County; 16. Merrill W. Moore, agronomy technician A; 17. J. Calvin Sammons, Extension agent in Lawrence County; 18. Warren R. Poage, supervisor, Dairy Production Research Center, judging coach; 19. Thomas B. Jurchak, senior Extension agent in Lackawanna County; 20. George F. Parnell, lab assistant, Soil Testing Laboratory; 21. William A. Reagan, Jr., Extension agent in Franklin County; 22. Doyle L. Thomas, Extension agent in Susquehanna County; 23. Norman D. Walters, supervisor, Dairy Production Research Center; 24. Peter H. B. Norton, assistant professor of rural sociology Extension; 25. Dexter N. Putnam, professor emeritus of dairy science Extension; 26. Edward G. Buss, professor of poultry science; 27. Robert C. Antram, Extension agent in Somerset

County; 28. Lura J. Sollenberger, Extension agent in Bedford County; 29. Catherine B. Love, assistant professor of consumer economics; 30. Margaret C. Herbst, Extension agent in Lycoming County; 31. Audrey M. Phelps, supervisor, Agr. Communications Office (retired); 32. Uraña B. Linn, senior Extension agent in Venango County; 33. Helen D. Tunison, senior Extension agent in Adams County. Missing from the photo are Merrill H. Duck, equipment service operator in the Farms Department, and Marjorie L. Rudy, secretary B in the Soil Testing Laboratory.

Penn State Forum

Penn State Intercom

An open letter to the University community

On Friday and Saturday, January 22 and 23, the Office of the President, the Office of the Provost, and the University Faculty Senate are sponsoring a keynote conference on general education. Planning for the conference was initiated with the strong encouragement and support of Dr. Oswald, who held discussions with the Faculty Advisory Committee and the Council of Academic Deans prior to the formulation of a conference steering committee. Throughout, the President has indicated his desire to develop a conference that would involve the entire University community.

The conference will be the first part of a concentrated reassessment of general education that will draw upon previous considerations and activities of the faculty, and continue during the next several months at the Commonwealth Campuses, departments, and colleges of the University. Between January and May, a series of continuing programs will be organized by designated conference delegates and form the basis of a second plenary conference at University Park on May 7 and 8.

The program for the January keynote conference accompanies this letter. This program, and the continuing dialogue that will occur between the two conferences, will be informed by five basic issues which have been developed by the conference committee.

Objective and Assessment

What common learning is essential? Is there a distinctive mark of a student with a general education? What intellectual abilities and qualities of mind are inherent in any meaningful description of general education? How do we assess the fulfillment of general education objectives?

Content and Connections

To what extent can the liberal arts and sciences be related to the professions and result in an education pertinent to the contemporary world? What is an appropriate balance between the breadth and depth elements of general education? What intellectual and practical skills are essential to a general education? How should general education prepare a student for a world that has increasingly become a global community?

Articulation in the Curriculum and the Profession

What should be the relationship of the high school

curriculum to general education? How can the educational objectives of both general education and the academic major be more effectively integrated? Can a greater synthesis between the objectives of general education and career aspirations be realized so that the student is adequately prepared for graduate and professional school as well as the world of work?

Faculty Role

Who are the faculty members responsible for providing the experiences of general education? What type of preparation is necessary to provide students with general education? To what extent does the faculty need to be retrained for general education requirements in a technological age? How can the faculty reward system be modified to recognize faculty contributions to general education?

Organizational Change

What strategies are most appropriate for the University to reexamine the curriculum systematically and implement change effectively? Is the University's organizational structure responsible to the need for change in the curriculum?

More than 200 University delegates to the conference have been designated by college deans and Commonwealth Campus directors. Representatives of state government, the state legislature, other colleges and universities, and industries have also been invited and will be attending the conference as delegates and panelists.

Designated college and campus delegates to the January keynote conference, in coordination with the Sub-Committee on Continuing Programs, will have the responsibility for organizing specific programs and promoting an ongoing dialogue during the period between the keynote and plenary conferences. Materials will be provided to stimulate the continuing sessions at the Commonwealth Campuses and in the colleges: a thirty-minute videotape and printed summary of the keynote conference, a collection of significant articles dealing with general education, and an annotated bibliography. Throughout these sessions, the University will have the support of the Center for General Education of the Association of American Colleges,

whose director Dr. Jerry Gaff has just completed the supervision of a three-year project that has developed general education models at 14 colleges and universities across the country. In addition, Dr. Gaff will be the keynote speaker at the plenary conference on May 7.

The continuing sessions will also provide the framework for developing the remainder of the May conference program. Each delegate from a campus, department, or organization outside the University is invited to prepare a position paper on any one or more of the live conference issues as well as on any aspect of general education that concerns the University community. The paper should be forwarded to Gregory Lozier, coordinator of the Conference on General Education, Room 315 Old Main. These position papers will be summarized prior to the May conference and distributed to all conference delegates. The papers will also be reviewed by a conference editorial board for consideration in a publication of conference proceedings. The edited proceedings will be published as a special issue of the *Journal of General Education* and will include the speeches of the keynote speakers at both conferences. An hour-long program for the Pennsylvania Public Television Network will feature the highlights and recommendations of the conference; a number of ten-minute programs will be aired on *Weather/World*, *PTPN*, so that the considerations of the conference will be shared with a larger audience; and the audio-video tapes of the conferences will be made available, for a nominal fee, to other college communities and to the public at large.

General education is a University-wide concern. It is also a concern of national proportions as educators seek coherence in an age of specialization, disconnected learning, intense vocationalism, and curricular fragmentation. All faculty members, academic administrators, and students share in this important component of a baccalaureate education; it is the foundation of our house of intellect. We invite you to attend the initial keynote conference on Jan. 22-23 and encourage you to participate in the continuing dialogue which will be occurring across the entire University during the next several months. We welcome your ideas and concerns, and urge your support for this important effort.

Theodore L. Gross, Chairperson, Sub-Committee on the Keynote and Plenary Conferences
Carol A. Cartwright, Chairperson, Sub-Committee on Continuing Programs

The names of conference participants and the program can be found on page 4

University community can submit AMOCO, Lindback nominations

The University community is invited to submit nominations for two all-University awards which will be presented during 1982. They are the AMOCO Foundation Outstanding Teaching Awards and the Christian B. and Mary F. Lindback Award for Distinguished Teaching.

Nominations should be sent to College deans and Campus directors. They, in turn, will submit official nominations from their units to the Vice President for Undergraduate Studies by March 15, 1982.

Four AMOCO awards, recognizing excellence in teaching performance in the undergraduate program by senior faculty members, will be presented. At least two of the awards will be made to professors at campuses other than University Park.

To be eligible for nomination, a faculty member must have a minimum of three years of service; have undergraduate teaching as a major portion of his or her assigned duties; and hold the rank of assistant, associate or full professor.

Candidates for the Lindback Award must be tenured faculty members, with a minimum of five years of Penn State

service. Undergraduate teaching should be a major portion of the assignment of the nominee, who should also be young enough to have many productive years of teaching ahead.

Names sought for computer director

Nominations are being sought by the Search Committee for the Director of Computer and Information Systems and Special Assistant to the President.

The individual filling this new position will report to the President of the University and work closely with senior University officers in developing and implementing comprehensive University-wide computing and information systems.

In his charge to the Search Committee, Dr. Oswald noted that the individual selected for the position must have strong skills in management of complex computer facilities, including extensive knowledge of hardware and software. *(Continued on page 6)*

Distinction between 'process' and 'outcome' occupies psychologists

Editor's note: This article is one in an ongoing series in which a faculty member describes work in progress.

By Michael J. Mahoney
Professor of Psychology

There are over 130 recognizably different psychotherapies in use today and this figure does not include the growing multitude of popular methods for personal growth. All purport to have harnessed the basic forces that direct a human life, and all offer advice on the pragmatics of how best to live that life. This is the point at which science is supposed to intervene and decide the issue with a clear verdict etched in fact. But science doesn't operate like that and the trustworthiness of the various claims has yet to be unequivocally rendered. For the past three decades much of the research energy in clinical psychology has been directed at the venerable issues of effectiveness and technical superiority — i.e., "does psychotherapy work?" and "which is the best therapy?" Many responses have taken the form of a factorial footrace —

Dr. Mahoney

psychoanalysis in lane one, behavior modification in lane two, and so on — each contestant focusing on certain suspected sources of variance. The results of these footraces have been none too clear. Like the disgruntled lunar scientists, we seem to have finally accumulated a

(Continued on page 6)

Penn Staters

Dr. Harriet C. Ison, assistant professor of microbiology at Hershey, has received a Research Career Development Award from the National Institutes of Health for a research proposal on the "Regulation of Differentiation in Hepatocytes in Vitro." A faculty member since 1976, Dr. Ison holds a Ph.D. from the University of Illinois.

Dr. Gordon F. De Jong, professor of sociology and associate director of the Population Issues Research Center, co-authored three recent invited papers for international conferences: "Community Structure, Value-Expectancies and Migration Intentions" for the Third Conference of Asian Sociologists, Tokyo, Japan; "Reasons for Moving and Migration Behavior," for the United Nations Economic and Social Commission for Asia and the Pacific, Bangkok, Thailand; and "International and Internal Migration Decision Making," for the 19th General Conference of the International Union for the Scientific Study of Population, Manila, Philippines.

Dr. Don N. Page, assistant professor of physics, presented several invited seminars in the U.S. and England during the past term. They included a colloquium at the University of Delaware entitled "Is Gravity Quantized?"; a relativity seminar on "Indirect Evidence for Quantum Gravity" at the University of Maryland Physics Department; and an invited paper at the Nuffield Quantum Workshop Imperial College of Science and Technology, London. The paper, "An Experimental Test of Quantum Gravity," will be published in the conference proceedings by Cambridge University Press.

Dr. Richard L. Frautschi, professor of French and Department head, presented an invited lecture, "Les Axes du discours narratif: essai d'une taxonomie appliquée a quelques romans francophones du 18e siècle," at the Congres d'Informatique et Science Humaines at the University of Liege in November.

Dr. David Tu, assistant professor of biochemistry and molecular biology, presented an invited paper at the Academia Sinica, Taipei, on Jan. 12. His topic was "Transposable Elements and Gene Expression."

Dr. Turgay Ertekin, assistant professor of Petroleum and Natural Gas Engineering, presented an invited paper at the 2nd International Conference of Advances in Heavy Oil Recovery in Caracas. The title of Dr. Ertekin's presentation was "A Comparative Laboratory Evaluation of Potentials of Micellar Flooding in Oil-Wet and Water-Wet Systems."

Herschel W. Leibowitz, Evan Pugh Professor of Psychology, has been appointed to a new committee of the National Academy of Sciences-National Research Council, The Working Group on Simulation, within the Committee on Human Factors, will try to develop new, improved methods for researching human performance.

Dr. Leibowitz recently presented a seminar on "Implications of the Two Systems Subversing Smooth Eye Movements for Illusory Motion." He spoke at the University of Rochester's Center for Visual Science.

The National Association of Industrial and Technical Teacher Educators has honored Dr. David L. Passmore, associate professor of vocational education, for producing the "Outstanding Research Manuscript" published in Volume 18 of the *Journal of Industrial Teacher Education*. The manuscript is titled "Estimation and Correction of Selectivity Bias Due to Non-returns in a Mail Survey of Deaf Postsecondary Occupational Program Graduates."

Dr. Sherry L. Willis, associate professor of human development, has co-authored a new book, *Human Development and Behavior*, with Dr. Jere E. Brophy of Michigan State University.

The 500-page text is intended for human development courses that take a lifespan approach. It covers human development from conception until death.

Published by St. Martin's Press, Inc., the book contains 20 chapters arranged in pairs. The first chapter of each pair presents theory and research on a topic; the second, the social implications and practical applications.

An instructor's manual is available with the book, along with a test booklet including more than 1,500 essay and multiple choice questions.

Dr. Allan Rodgers, professor of geography, spent recently as a distinguished lecturer in regional development at the University of Waterloo in Canada.

Jerry M. Lefkowitz, senior project associate, Department of Statistics, presented an invited paper and poster session recently at the 43rd session of the International Statistics Institute in Buenos Aires, Argentina. The paper was entitled, "Minitab on Microcomputers: Use and Implementation"; the poster session, "Portability and Distribution of Minitab." Dr. Thomas A. Ryan, Jr., associate professor of statistics, is co-author of both papers.

Dr. Peter Everett, assistant professor of man-environment relations, has been named chairman of the Transit Service Characteristics Committee of the Transportation Board, an agency of the National Academy of Sciences. His five-year appointment begins in February. The committee's function is to identify areas where transit systems could be more responsive to passenger needs.

Dr. Ralph L. Webb, professor of mechanical engineering, has been elected a Fellow of the American Society of Mechanical Engineers (ASME).

Dr. Francis T.S. Yu, professor of electrical engineering, has been elected a Fellow of the Optical Society of America.

Dr. Richard R. Hill, Jr., and Dr. Gary W. Petersen, have been named Fellows of the American Society of Agronomy. Dr. Hill is research agronomist and research leader of the Regional Pasture Research Laboratory at University Park. Dr. Petersen serves as co-director of the Office for Remote Sensing of Earth Resources and professor of soil genesis and morphology.

Jerrold Maddox, professor of art and director of the School of Visual Arts, has been elected chairman of the National Council of Art Administrators.

Dr. Robert F. Nicely, Jr., coordinator of continuing education and commonwealth relations in the College of Education, is president-elect of the Pennsylvania Association for Supervision and Curriculum Development. Dr. Nicely, associate professor of education, is serving also on the Board of Directors of the Association for Continuing Professional Education.

Donald W. Leslie, associate professor of landscape architecture at the University, has been elected vice-president of the Pennsylvania-Delaware chapter of the American Society of Landscape Architects.

Dr. Charles S. Prebish, associate professor of religious studies, has been elected to a second term on the board of directors of the International Association of Buddhist Studies.

Dean Swope

Prof. Goltz

Dean Decker

Retirements

William S. Decker, assistant dean for students and associate professor of marketing in Business Administration, retired Jan. 1 after more than 31 years on the faculty. He will hold the title of assistant dean emeritus.

Dean Decker came to Penn State in 1950 as an instructor in marketing. He was named assistant professor in 1952 and associate professor in 1965. He became assistant to the dean of the College of Business Administration in 1965 and was named assistant dean for students in 1972.

A native of Indiana, Dean Decker received his bachelor's degree in marketing and his master of arts degree in marketing and advertising from the University of Iowa.

He enlisted as a private in the U.S. Army Air Corps in 1941 and retired from the U.S. Air Force Reserve as a Lt. Colonel in 1979. During World War II, he served as an air intelligence officer with the Mediterranean Allied Tactical Air Force in Africa, Sicily and Italy.

Dr. Robert E. Swope, assistant dean of resident education in the College of Agriculture since 1964, retired Jan. 1. He was also a professor of veterinary science and has retired with emeritus rank after serving since 1951.

Working with students, developing the undergraduate teaching program in the College and coordinating international agriculture programs were Dr. Swope's major concerns as an administrator. He spent two years (1958-60) in India with the U.S. Agency for International Development and returned in 1969-70 as director of a Penn State project there. He helped set up a new university and six agricultural colleges, coordinating project support.

In 1966-67, he served as a consultant in veterinary medicine in Chile with the Rockefeller Foundation, and during the 1970s was involved in University programs in India, Spain and Jamaica.

As a researcher in veterinary science, he helped resolve the mystery of "X-disease" in cattle, a disease found to be caused by toxins introduced into pelleted feed from oil used in the pelleting machinery.

Dr. Swope received his DVM degree from the University of Pennsylvania. Prior to joining the University, he was a Captain in the U.S. Army Veterinary Corps and an associate professor at the University of Maryland.

Paul F. Anderson, accountant-student loans in the Controller's Office, retired Jan. 1. He had been a University employee since May 9, 1955.

Gail E. Dando, stock delivery clerk in Business Services, retired Dec. 4 after serving Penn State since June 1, 1952.

Bridget M. Drain, residence hall worker in Housing and Food Services, retired Jan. 1. She had been employed by the University since Oct. 26, 1971.

Associate county agent in Agriculture, Rebecca Drick, retired Jan. 1. She had been employed by the University since Oct. 1, 1965.

Malcolm Eckley, photographer-printer in Continuing Education, retired Jan. 1 after working for the University since Jan. 3, 1949.

Completing nearly 30 years of service, Helmut J. Goltz, professor and head of the Department of Labor Studies, retired Jan. 1 with emeritus rank.

From 1952-64, Professor Goltz worked primarily as a program director in labor education for Penn State, first at the Allentown General Extension Center and then, from 1957, with General Extension at University Park.

He was named associate professor in 1959 when the Department of Labor Education was created. In 1964, he was promoted to professor and department head (the department changed its name to Labor Studies in 1967).

Under his leadership, the Department established the labor studies major (1970), which enrolls 80-90 students annually. It also established the associate degree in labor studies (1973) at the Berks, Delaware and Worthington Scranton campuses. In Pattee, the Labor Archives Project was initiated.

An Allentown native, Professor Goltz received his bachelor's and master's degrees in history from Temple University in 1936 and 1937. His research has focused on unemployment and economic growth. Among his many professional activities was his appointment, at President Carter's request, to the National Advisory Council on Extension and Continuing Education.

After serving as Invitational Professor of History at Arizona State University in Tempe during spring semester 1982, Professor Goltz will return to State College and engage in consulting assignments with union and university labor studies centers.

Jan M. Elicker, extension agent in Agriculture, retired Jan. 1 after serving the University since June 15, 1947.

Martha M. Giannetti, senior accounting clerk in Continuing Education, retired Jan. 1. She had been employed by Penn State since Nov. 1, 1969.

Mary Ellen Goss, residence hall worker in Housing and Food Services, retired Jan. 1 after serving the University since Sept. 2, 1965.

Maintenance foreman at Mont Alto, Clarence L. Harbaugh, retired Jan. 9. He had been a University employee since Oct. 16, 1965.

Joseph H. Harris, body repairer in Physical Plant, retired Jan. 1 after working for Penn State since May 4, 1970.

Residence hall worker in Housing and Food Services, Elvie E. Henry, retired Jan. 1. She had served Penn State since Sept. 1, 1971.

Research aide in Intercollege Research Programs, Howard W. Hester, retired Jan. 1. He had worked for the University since Sept. 1, 1968.

Georgeanna M. Hillard, secretary in Liberal Arts, retired Jan. 1 after being employed by the University since Oct. 16, 1969.

College health nurse at Ogontz, Sarah D. McFarland, retired Jan. 1. She had been a University employee since Sept. 1, 1966.

Joseph H. Owens, painter in Physical Plant, retired Jan. 1 after serving Penn State since June 8, 1970.

George Reisinger, assistant supervisor-technical services in Earth and Mineral Sciences, retired Jan. 1 after being employed by the University since May 1, 1968.

Philip Saggese, storekeeper in Earth and Mineral Sciences, retired October 1. He had been a University employee since Feb. 1, 1954.

Jane Sari, food production worker at McKeesport, retired Jan. 1 after working for the University since Nov. 4, 1971.

Corinne Summers, secretary in the Controller's Office, retired Jan. 1. She had been employed by the University since Oct. 23, 1963.

June A. Wisner, secretary in Undergraduate Admissions, retired Jan. 1 after serving Penn State since Nov. 1, 1966.

Geneva W. Workman, food preparer in Housing and Food Services, retired Jan. 1 after working for the University since Sept. 30, 1967.

Appointments

Pamela S. Cutright as extension clothing and textiles specialist at University Park, B.S., West Virginia Wesleyan College; M.S.H.E., U. of North Carolina. Extension clothing and textile specialist, Montana Cooperative Extension Service.

Dwight Davis as assistant professor of medicine at Hershey, B.S., North Carolina Agricultural and Technical State U.; M.D., U. of Rochester School of Medicine. Fellow, Duke U. Medical Center.

Robert B. Duckrow as assistant professor of medicine at Hershey, Sc.B., Brown; M.D., Yale. Research associate, U. of Miami School of Medicine.

Richard J. Frisque as assistant professor of science at University Park, B.S., Ph.D., U. of Wisconsin-Madison. Fellow, CSH Laboratory.

J. Michael Fritsch as associate professor of meteorology at University Park, B.S., P.S.U.; M.S., Ph.D., Colorado State U. Research meteorologist, Office of Weather Research and Modification (NOAA) (Boulder, Colorado).

John Hermanovich Jr. as assistant professor of medicine at Hershey, B.S., P.S.U.; M.D., Jefferson Medical College. Fellow, U. of California at Davis.

Leroy R. Hettche as professor of engineering research and director of Applied Research Laboratory at University Park, A.B., B.S., Bucknell U.; M.S., Ph.D., Carnegie-Mellon U. Superintendent, Material Science and Technical Division, Naval Research Laboratory.

Victor Levine as assistant professor of education at University Park, B.A., U. of Cincinnati; M.A., M.Ed., Teachers College/Columbia U.; M. Phil., Ph.D., Columbia U. Staff economist, Office of Policy, Planning and Evaluation, FNS-USDA.

James W. Locker Jr. as coordinator of the Equal Employment Opportunity Program (Cooperative Extension Service) at University Park, B.S., U. of Florida. Employment specialist and administrative specialist, P.S.U.

Callian T. Lum as assistant professor of surgery and chief of the transplant section at Hershey, M.D., Tufts U. School of Medicine. Fellow, U. of Minnesota.

Paula J. Romano as director of the histocompatibility and clinical immunology laboratory at Hershey.

B.A., Catholic U. of America; Ph.D., Duke U. Instructor, Georgetown U. School of Medicine.

Mary A. Simmonds as assistant professor of medicine at Hershey, A.B., Smith; M.D., Medical College of Pennsylvania. Fellow, Hershey.

Carpoolers

June Allison needs a ride from Milesburg. She works from 7:30 a.m. to 4:40 p.m. at Nurses Ed. She can be reached at 355-4317 after 5 p.m.

Peg Krumline needs a ride from University Acres (Buffalo Run Road) to the University. She works from 8 a.m. to 5 p.m. in White Bldg. and can be reached at 865-1102 or 355-7150.

Mary McClure is seeking a ride from Bellefonte to the University. She works from 8:30 a.m. to 5:30 p.m. and can be reached at either 865-7623 or 355-9197 (after 6:30 p.m.).

Suzanne Sinclair is looking for a ride or someone to share driving from Centre Hall. She works from 8 a.m. to 5 p.m. at Whitmore Lab. Call either 863-0284 or 364-9731.

John Uffrin is seeking a ride or looking for riders from the Hollidaysburg area or Altoona. He works at Management Services from 7:45 a.m. to 4:45 p.m. He can be reached at either 863-1459 or 696-0829.

Robert Wood, of Centennial, would like to carpool. He can be reached at 865-7271 or 692-8515.

Obituaries

Gerald J. Blozitis, head of Publications and Public Information for the Commonwealth Educational System from 1971 to 1981, died Dec. 23. He was 38.

Clyde G. Corle, professor emeritus of education, died Dec. 5. A member of the faculty from 1952 to 1973, he was 73.

Lottie Crissman died Nov. 28 at the age of 85. She was employed as a mending clerk in the Libraries from 1926 to 1961.

Joseph Dean, janitorial worker with the Office of Physical Plant from 1943 to 1968, died Dec. 13 at the age of 78.

Henry R. Fortmann died Dec. 6. He was 61. He joined the faculty in 1949 and at his retirement in 1979 was professor of agronomy and assistant director of the Agricultural Experiment Station.

Robert S. Hamilton, who was a foreman in the Applied Research Laboratory and a member of the staff from 1946 to 1979, died Dec. 15 at the age of 65.

John E. Malloy, a glassblower in the College of Science from 1956 to 1975, was employed as a building superintendent for Student Affairs at his death on Dec. 16. He was 54.

Garnier Mitchell, who retired as an extension agent in the College of Agriculture in 1980, died Dec. 5 at the age of 54. He had joined the staff in 1954.

S. Catharine Neidigh, laboratory attendant in the College of Agriculture from 1957 to 1973, died Dec. 23 at the age of 70.

Ether Spicher, secretary in the College of Business Administration from 1963 to 1981, died Dec. 17 at the age of 60.

Ruth Wagaman, a counterwoman with Housing and Food Services from 1950 to 1967, died Dec. 30 at the age of 78.

Promotions

Faculty

Douglas W. Nigh to assistant professor of international business in Business Administration.

Staff Exempt

Victoria G. Bordin to supervisor, student records in Registrar.

Daniel W. Greening to assistant director, Student Employment Programs/CC Aid Delivery in Student Administrative Services.

Charlotte J. Hitchcock to graduation coordinator in Registrar.

Gewn Karten to assistant dining hall supervisor in Housing and Food Services.

Bruce N. Kline to manager, Safety, Police & Security Program, C.E.S. in Safety.

Edward W. Kyler to associate housekeeping supervisor in Housing and Food Services.

Dora G. Ream to administrative assistant to the Director at York.

John E. Rideout to manager of staff services in Safety.

Beatrice Spangler to dining hall supervisor in Housing and Food Services.

Staff Non-Exempt

Barbara A. Arvey to senior staff nurse at Hershey.

Kathleen M. Dorsey to senior staff nurse at Hershey.

M. Jean Englerider to assistant to the financial officer at Capitol.

Clerical

Shirley A. Egan to secretary B in Continuing Education.

Bonnie Eichenberger to secretary A in Controller's Office.

Rela Gilliland to secretary B in Registrar.

Ruth K. Hoffer to secretary B at Hershey.

June Krell to customer service clerk A in Bookstore.

Nancy Potts to clerk, accounting A in Controller's Office.

Jeanette M. Schwartz to secretary A at Hershey.

Margaret M. Williams to secretary C in Alumni Association.

Carole J. Yearick to secretary B in Agriculture.

Technical Service

Timothy W. Chamberlain to dining hall worker A in Housing and Food Services.

Marlin E. Luse to fuel and car wash attendant in Business Services.

Carl Martin to laboratory mechanic in Earth and Mineral Sciences.

Robert A. Mohl to patrol officer-Medical Center at Hershey.

John F. Rattenbury to senior patrol officer at Hershey.

Fay R. Smith to escort service aide at Hershey.

Staff Development

Among the 25 employees who recently completed the Writing Skills for Secretaries/Clericals Program were:

Lisa Bauman, clerk typist A, Agriculture; Grace Condo, secretary A, IRP; Lois Cook, secretary B, Earth and Mineral Sciences; Dottie Duck, secretary B, Earth and Mineral Sciences; Kathy Evey, clerk typist A, Agriculture; Darla Franks, clerk, curriculum material, Education; Barbara Gates, secretary C, Health, Physical Education and Recreation.

Sandy Gild, clerk, publications, Agriculture; Judy Hoy, clerk typist A, Agriculture; Marie Hughes, senior office secretary, University Health Services; Sue Kelleher, clerk typist B, Agriculture; Pat Long, clerk accounting A, Continuing Education; Sandy Lowery, clerk A, Agriculture; Cindy Miller, secretary B, Bursar's; Marilyn Mitinger, secretary C, Continuing Education; Loida Muniz, clerk, publications B, Education; Judy Musser, correspondence typist A, Physical Plant; Kaye Musser, clerk typist B,

Health, Physical Education and Recreation.

Linda Padron, clerk B, Physical Plant; Barbara Prucey, clerk typist A, Physical Plant; Kathy Ricker, secretary B, Foreign Studies; Ruth Stoner, procedures clerk, Registrar's Office; Linda Whitehill, conference secretary, Continuing Education; Rita Williams, secretary C, Planning and Budget; Vicki Zimmerman, clerk typist B, IRP.

Fourteen University staff personnel recently completed the initial Alcohol Awareness Program. The course, designed and taught by Dr. William Eck, associate professor of health education, is intended to create an awareness of the use, non-use, and problems associated with beverage alcohol. Participating were:

Donald Arndt, director, housing services, Housing and Food Services; Jack Brown, director, facilities planning, maintenance and laundry operations, Housing and Food Services; Duane Callahan, supervisor, airport operations, Business Services; F. David Dimmick, personnel coordinator, Human Development; William Fuller, HUB manager, Student Affairs; Dennis Hulse, events manager, Health, Physical Education and Recreation; Joan Lampman, coordinator, personnel and administrative services, Engineering;

Richard Lucas, assistant athletic director, Health, Physical Education and Recreation; Charles Ness, librarian and assistant dean, University Libraries; Valerie Nisbet, administrative assistant, Graduate School; Chuck Phillips, assistant personnel director, ARL; David Rice, manager, landscape/vehicle and equipment maintenance, Physical Plant; Norma Ruedy, secretary A, Business Services; Esther Smith, administrative aide, Engineering.

25-year Chairs

Elmer Swanger's 25 years at Penn State reflect not only a good employment but also a safe driving record. Mr. Swanger, a refuse collector and mechanics helper in Physical Plant, has been selected to participate in the University's Safe Driving Awards Program.

"Mr. Swanger's driving record is outstanding for the number of years that he's been driving a vehicle," comments Don Weaver, supervisor of the Operating Equipment Facility. "He also maintains his equipment and keeps it in good condition. We wouldn't be able to get the performance or usage out of the machines if he didn't."

Mr. Swanger began his University employment as a laborer in Landscape where he worked for 11 years before accepting his present position in Physical Plant.

Residents of State College, Mr. Swanger and his wife, Dorothy, have two children - one son, Joseph, and one daughter, Virginia. In his spare time, Mr. Swanger enjoys fishing and hunting deer and turkey.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

General Education Conference: program, participants

Program

Friday, January 22

- 1 p.m. Registration, Keller Conference Center Lobby
 - 2 p.m. Opening Session, Keller Conference Center Auditorium
- Convener: Nancy M. Tischler, Chairman, University Faculty Senate
- Presentations:
- An Exposition on the Conference Issues
 - John W. Oswald, President
 - General Education and the Land-Grant Tradition
 - Edward D. Eddy, Provost
 - The Penn State Experience
 - Arthur O. Lewis, Associate Dean, College of the Liberal Arts
 - The National Perspective
 - Theodore L. Gross, Provost and Dean, Capitol Campus
 - 3 p.m. Beverage Break, Keller Conference Center Cafeteria
 - 3:30 p.m. Concurrent Panels

1. *General education's role in preparing the individual for a career in business, industry or the professions.*

The panel will discuss the relationship of the general education component of the baccalaureate curriculum to the expectations of the graduate in the applied setting.

Keller Conference Center Auditorium
Moderator: Carl H. Wolgemuth
Panelists: John J. Coyle, Jr.
William Shenkle
William Sippel
Mary E. Ward

2. *Offering general education as a lower division set of requirements or a four-year curricular commitment.*

The panel will explore the need for curricular integration in general education and the impact of this need upon the scheduling of the general education experience.

Keller Conference Center, Room 312-314
Moderator: Edward M. Elias
Panelists: Wendell V. Harris
G. Robert Himmer
Melvin C. Seesholtz
Judith VanHenik

3. *Developing an international view in general education.*

The panel will discuss strategies for instilling a greater understanding of worldwide cultures and issues through general education.

Keller Conference Center, Room 402-403
Moderator: Caroline D. Eckhardt
Panelists: John D. Daniels
Elizabeth A. Horsman
Paul W. Todd
William Toombs

4. *An historical perspective on general education at Penn State.*

The panel will summarize the University's experience in devising and providing a general education over the past thirty years, reviewing changes in the program and factors which have facilitated or inhibited developments.

Keller Conference Center, Room 204
Moderator: Robert F. Schmalz
Panelists: Paul D. Bell
Hans Fleener
Henry C. Johnson
Arthur O. Lewis
Leon J. Stout

- 5 p.m. Adjournment
- 8:30 p.m. Keynote Address

Schwab Auditorium

Convener: Nancy Tischler, Chairman University Faculty Senate

Introduction: John W. Oswald, President

Presenter: Harlan Cleveland, Director, Hubert H. Humphrey Institute of Public Affairs, University of Minnesota

Topic: *Shouldn't We Also Be Educating for Wisdom?*

- 9:30 p.m. Reception, Nittany Lion Inn, Colonial Room

Saturday, January 23

- 9 a.m. Concurrent Panels

1. *Uniform general education designed for all undergraduates or variable general education designed for the specific college or discipline?*

The panel will explore differing approaches to offering a general education — from the course smorgasbord, to the University-wide core curriculum, to the college-specific core curriculum.

Conference keynoter Harlan Cleveland was the director of the Program in International Affairs of the Aspen Institute for Humanistic Studies from 1974 until his appointment at Minnesota in 1980.

From 1969 to 1974, he served as president of the University of Hawaii; earlier he was assistant secretary of state of International Organizational Affairs in the Kennedy Administration, and U.S. ambassador to NATO under President Johnson.

curriculum.

Keller Conference Center Auditorium
Moderator: Theodore E. Kiffer
Panelists: Joseph C. Ray
Evan G. Pattishall
Leo H. Takahashi
Gary L. Thomas
Thomas J. Von Gunden

2. *Identifying the skills which are essential in a general education.*

The panel will discuss whether there is a set of definable skills, e.g., written, oral, computational, scientific, and linguistic, that should identify the baccalaureate graduate who has a general education.

Moderator: Jerry B. Covert
Panelists: Leonard Berkowitz
Stuart Forth
Robert B. Mitchell
Daniel Shterom

3. *Baccalaureate general education — building upon the high school curriculum.*

The panel will examine the general education component of the baccalaureate curriculum in the context of the student's elementary and secondary school preparation, the University's expectations, and the continuity of the education experience.

Keller Conference Center, Room 402-403
Moderator: Robert E. Dunham
Panelists: Robert Campbell
Robert Cawley
Jane E. Cooper
Isabel F. Knight
Daniel Taylor

4. *Motivation and reward for faculty participating in general education.*

The panel will examine the role of the faculty in determining the content and intent of general education, including responsibilities for extending student and faculty expectations beyond the individual course or the particular discipline, and for integrating general education into every University course.

Keller Conference Center, Room 204
Moderator: Charles L. Hosler
Panelists: Chandra L. Mowery
Leonard R. Riformio
Suzanne M. Roy
Theodore R. Vallance

- 10:30 a.m. Beverage Break, Keller Conference Center Cafeteria

- 11 a.m. Plenary Panel

Reassessing the Conference Issues.

The panel will address specifically the five issues devised to inform the conference. The panelists will proffer preliminary answers to the questions raised by the issues, drawing upon the earlier conference sessions.

Keller Conference Center Auditorium
Moderator: Carol A. Cartwright
Panelists: Jerry B. Covert
Robert E. Dunham
Charles L. Hosler
Theodore L. Kiffer

- 12:30 p.m. Adjournment

Participants

Paul D. Bell
Student, College of Business Administration, University Park

Leonard Berkowitz

Assistant Professor of Philosophy, York College Area School District, State College, Pa.

Carol Cartwright
Professor of Education, Acting Associate Dean for Academic Affairs, Commonwealth Educational System

Gordon Cawley
Executive Director, Association for Supervision and Curriculum Development, Alexandria, Va.

Jane E. Cooper
Associate Professor of Biology, Delaware County

Jerry B. Covert
Associate Professor of Biology, Chairman, BDR III Subcommittee, Hazleton

John J. Coyle, Jr.
Professor of Business Administration, Head, Department of Business Administration, University Park

John D. Daniels

Professor of Business Administration, Chairman, University Committee on International Programs, University Park

Robert E. Dunham

Professor of Speech Communication, Vice President for Undergraduate Studies

John A. Dutton

Professor of Meteorology, Head, Department of Meteorology, University Park

Caroline D. Eckhardt

Associate Professor of English and Comparative Literature, Co-Editor, *Journal of General Education*

Edward D. Eddy

Professor of Higher Education, Provost, The Pennsylvania State University

Edward M. Elias
Assistant Professor of Engineering, Director, York

Joseph C. Flay
Associate Professor of Philosophy, University Park

Hans Fleener
Associate Professor of Higher Education, University Park

Stuart Forth
Dean, University Libraries, University Park

Theodore L. Gross
Professor of English, Provost and Dean, Capitol

Wendell V. Harris
Professor of English, Head, Department of English, University Park

G. Robert Himmer
Associate Professor of History, York

Elizabeth A. Horsman
Student, College of the Liberal Arts, University Park

Charles L. Hosler
Professor of Meteorology, Dean, College of Earth and Mineral Sciences

Henry C. Johnson
Professor of Education, University Park

Theodore E. Kiffer
Associate Professor of English Linguistics, Director, General Education Program, College of the Liberal Arts, Associate Head, Department of English

Isabel F. Knight
Associate Professor of History, University Park

Arthur O. Lewis
Professor of English, Associate Dean, College of the Liberal Arts, University Park

Robert B. Mitchell
Associate Professor of Biology, Pre-Medical Adviser, University Park

Chandra L. Mowery
Student, College of Earth and Mineral Sciences, University Park

John W. Oswald
Professor of Plant Pathology, President, The Pennsylvania State University

Evan G. Pattishall
Professor of Behavioral Science, Dean, College of Human Development, University Park

Leonard R. Riformio
Associate Professor of History, Shenango Valley

Suzanne M. Roy
Assistant Professor of Music, University Park

Robert F. Schmalz
Professor of Geology, Chairperson, Special Senate Committee on Academic Policy

Melvin C. Seesholtz
Assistant Professor of English, Ogontz

William Shenkle
General Plant Manager, Rockwell International, DuBois, Pa.

Daniel Shterom
Student, College of the Liberal Arts, Altoona

William Sippel
Registered Architect, Deeter, Ritchey, Sippel Associates, Pittsburgh, Pa.

Leon J. Stout
Senior Assistant Librarian, University Park

Leo H. Takahashi
Assistant Professor of Physics, Beaver Campus

Daniel Taylor
Vice President, College Entrance Examination Board, New York, N.Y.

Nancy M. Tischler
Professor of English and Humanities Chairman, University Faculty Senate

Gary L. Thomas
Executive Vice President, Peterson, Howell, and Heather, Inc., Hunt Valley, Md.

Paul W. Todd
Professor of Biophysics, University Park

William Toombs
Professor of Higher Education, Director, Center for the Study of Higher Education, University Park

Theodore R. Vallance
Professor of Human Development, University Park

Judith VanHenik
Assistant Professor of Religious Studies, University Park

Thomas J. VonGunden
Student, College of Education, University Park

Mary E. Ward
Student, College of Earth and Mineral Sciences, University Park

Carl H. Wolgemuth
Professor of Mechanical Engineering

Course and program changes for switch to semesters are due as soon as possible

Making the switch to the early semester system in Fall 1983 could be either "difficult" or "smooth."

But either way, it will be the University community — and particularly faculty members and academic administrators — whose actions determine how the transition occurs.

So observed Dr. James B. Bartoo, chairman of the University Faculty Senate's Calendar Commission and dean of the Graduate School, in an oral informational report at the Senate's Dec. 15 meeting.

For the transition to be a "smooth" one, Dr. Bartoo said, faculty members and academic administrators must get their course and program changes for the semester system to the Senate Office as quickly as possible. He stressed that this must be accomplished by April at the very latest.

Dean Bartoo further observed that the calendar conversion process is progressing on schedule and that a Communications Committee has been established to facilitate the coordination of input from all segments of the University community.

The Senate also heard an oral informational report from Dr. Robert J. Scannell, vice president and dean of the Commonwealth Educational System, on "Commonwealth Campuses-Continuing Education Integration."

Dr. Scannell said the integration of the two systems — which occurred in Fall 1980 — is continuing to develop according to plan. He also noted that the integration is resulting in increased efficiency in a number of areas.

In legislative action, the Senate tabled until its next meeting on Feb. 2 a proposal to modify the section of PS-23 dealing with the evaluation of teaching effectiveness.

The proposal to modify PS-23, from the Senate's Faculty Affairs Committee, was tabled because snow- and ice-covered roads prevented Senators from nearly half the Commonwealth Campuses from

attending the meeting.

Any proposal for revision to PS-23 passed by the Senate becomes a recommendation from that body to the President and must be acted upon by him before it becomes policy.

In other legislative action, the Senate approved changes to "Academic Policies and Procedures for Undergraduate Students," published annually in the *Penn State Handbook*. The changes, proposed by the Senate's Academic and Athletic Standards Committee, are needed to make student rules conform with the early semester calendar system.

The Senate also voted to adopt a resolution introduced by its Committee on Academic Policy.

Presented by Dr. Robert F. Schmalz, professor of geology, the resolution stresses the need for faculty members to take an active interest in the search for a president to succeed Dr. Oswald.

It reads: "It being the aspiration of this University to achieve and maintain a position of excellence among major academic institutions, BE IT RESOLVED that to signal this intention and to provide the leadership essential for its accomplishment, the Faculty Senate, on behalf of the faculty, urges that the Presidential Search Committee undertake to include in its recommendations to the Board of Trustees specifically those candidates, of proven executive ability, who have achieved distinction as scholars in the academic community."

In its only other legislative action of the meeting, the Senate agreed to a motion introduced by the Liberal Arts Council of Senators. The motion reads: "The University Faculty Senate recommends, for University Faculty, adoption of a 'flat' rather than a 'sawtooth' class schedule, to the greatest extent possible, under the semester calendar."

Dr. Marylee C. Taylor, Council chairman and assistant professor of sociology, explained that a flat schedule is

one in which classes meet at uniform times on Mondays, Wednesdays and Fridays, and at longer, but also uniform times, on Tuesdays and Thursdays.

A sawtooth schedule, she said, is one in which class meeting times and intervals between class meetings are varied.

The advantages of the flat schedule, which is similar to that being used now, have been proven, she noted, while those of the sawtooth schedule are questionable.

The Senate also heard a number of other informational reports, including:

- "Mathematics Testing for Entering Freshmen," during which the Committee on Undergraduate Instruction outlined changes in the mathematics test, which is given all freshmen. Changes in the test are intended to better serve students by allowing for more accurate placements and advising;

- "Library Computer and Information Systems," during which Nancy M. Cline, associate librarian, highlighted aspects of the University Libraries' automation programs. Although pointing out that computers will eventually enable the Libraries to function almost entirely with electronic data bases, she stressed that computers will not replace books and other printed matter, but will enable the Libraries to improve and expand their services;

- "Status of Baccalaureate Degree Programs," presented as a door handout by the Curricular Affairs Committee (see below).

- "Resident Instruction Fall Term Enrollments," presented by the Committee on Undergraduate Instruction; and

- "Special Admissions," presented by the Committee on Admissions, Records and Scheduling. Included in the report are programs for high school seniors at most campuses and special talents groups in Arts and Architecture, Communications Disorders and Veterans.

The Senate next will meet on Tuesday, Feb. 2, at 2:10 p.m. in Room 112 Kern Graduate Building.

\$21 million is received for capital projects

A State appropriation of almost \$21 million for four University renovation and construction projects involving academic buildings was approved by Gov. Thornburgh just before Christmas.

Requested by University administrators and approved by the Board of Trustees, the \$20,890,000 appropriation was approved as part of a \$251 million State capital appropriations bill that also includes monies for cell construction in prisons and renovations to State parks.

"This is the first State funding for capital improvements to University academic buildings in 10 years," observes Frederick M. Ciletti, special assistant to President Oswald for governmental affairs.

He explains that in prior bills the State had approved various utility construction projects on campus — such as improvements to the University's power plant — but despite annual requests from the Trustees, no such funds had been approved for capital projects involving academic buildings.

INTERCOM scores a Penn State 'first'

INTERCOM is scoring a Penn State "first" this week. The copy for this issue was transmitted on Public Information's IBM 5520 word processing equipment directly to a phototypesetter at our printers using the office telephone.

The communication interface, which was implemented by Kamal A. Hazboun of the Office of Information and Administrative Services, is expected to result in lowered printing costs.

Budgetary restrictions will reduce the number of issues of INTERCOM to be published during the remainder of the academic year. Groups wishing to publicize events should note that in the Winter Term, no issues will be published Feb. 4 and 18 and March 4.

BDR Subcommittee reports on activities

The University Faculty Senate's Committee on Curricular Affairs presented an informational report on "Status of Baccalaureate Degree Requirements" to the Senate during its Dec. 15 meeting.

Presented as a door handout prepared by Dr. Jerry B. Covert, BDR Subcommittee chairman and associate professor of biology at Hazleton, the report also refers to guidelines and procedures regarding BDR changes.

"Within the last academic year, the BDR Subcommittee has presented informational and legislative reports to the Senate and the University community," Dr. Covert observed.

He explained that the legislative report requested jurisdiction for the BDR Subcommittee over the advanced learning skills area course lists. It also included the proposal that consultative committees in these areas be established.

"The legislative report was approved and the consultative committees have been established and are presently functioning. An informational report announced procedures for the addition and deletion of courses from the BDR lists, both the advanced learning skills and the breadth area lists," Dr. Covert added.

These procedures, he noted, are now being followed by the University community, and the Curricular Affairs Committee's Blue Sheets are being used to announce proposals and approvals.

Dr. Covert outlined the procedure for adding courses to, and deleting courses from, the BDR lists of courses as follows:

"Requests for course additions to the BDR lists of courses should be sent to the Senate Office, Birch Cottage, with course outlines and justification. The justification should include information explaining why the course should be included on the list.

"Once the requests are received, the Senate Office will send copies to the appropriate consultative committee for action. Upon action by the consultative committee, the requests will be sent to the BDR Subcommittee for approval. Upon approval by the BDR Subcommittee, the course(s) would be added to the University list.

"Requests for deletion of courses from the BDR lists of courses should include a justification for deletion and follow the same routing pattern as outlined above for additions to the list.

"The processes will function in an ongoing manner throughout the year, but the new lists will not become effective until the beginning of the subsequent academic year."

Dr. Covert observed that the approval system "appears to be working smoothly, which allows the Subcommittee more time to pursue one of its other charges, that of 'keeping abreast of national developments in general education.'"

Within the University, he noted, there are lists of courses that are designed to provide a varied, general education. The BDR Subcommittee has been working with the Office of the Vice President for Undergraduate Studies to evaluate the effectiveness of the BDR requirements to see if they are meeting the stated

objectives related to general education.

A special task force chaired by Dr. John J. Romano, associate dean for undergraduate studies in the College of the Liberal Arts, will design an experimental project on the assessment of general education at Penn State. Dr. Covert pointed out. This project should run parallel to, and as an adjunct to, the University's Conference on General Education being planned under the leadership of President Oswald, Provost Eddy and Senate Chairman Tischler.

"The BDR Subcommittee will continue to process proposals to the BDR lists and will do so with an ear to the needs and wishes of the University as it expresses itself during the Conference on General Education," Dr. Covert noted.

"The BDR course lists are flexible and adaptable to the evolution of Penn State, especially as the University converts to an early semester calendar."

Martin Luther King Jr. Memorial Banquet Friday

Dr. Thelma Griffith-Johnson will speak at the fourth annual Martin Luther King Jr. Memorial Banquet to be held at 7:30 p.m. on Friday, Jan. 15, at the Sheraton-Penn State Inn. Dr. Griffith-Johnson is director of the Pennsylvania Human Relations Commission's Harrisburg Region.

The banquet, held annually on Dr. King's birthday, is sponsored by the University's Forum on Black Affairs. Persons desiring further information, reservations and tickets may contact Elmore M. Browne at 865-1779.

Included in the four projects, which form the University's Capital Program for 1982-83, are two at University Park and one each at the Mont Alto and Delaware County campuses.

At University Park, \$6,804,000 will be used in the first project for renovations to several College of Agriculture buildings, including Buckhout and North Frear laboratories. Headhouses III and IV and Tyson Building. The work will focus on modernizing laboratory facilities serving the College's plant pathology and agronomy departments.

Mr. Ciletti notes that Rep. Gregg L. Cunningham of Benner Township had sponsored the amendment for the agricultural buildings capital appropriation.

The second renovation project at University Park, supported by funds totaling \$6,605,000, will be in College of Earth and Mineral Science buildings. It includes replacement and refurbishing of plumbing and electrical systems and was supported by State Sen. Doyle Cormac of Bellefonte.

The other two projects are for construction of multi-purpose physical education buildings at the Mont Alto and Delaware County campuses. The Mont Alto campus building, supported by State Sen. William Moore, will cost \$3,491,000; the Delaware County campus building, supported by State Sen. Clarence Bell, will cost \$3,990,000.

Pointing out that the Mont Alto and Delaware County campuses have great need for the multi-purpose physical education buildings, Mr. Ciletti says that construction of all the buildings is expected to be completed in about three years.

Distinction between 'process' and 'outcome' occupies psychologists

(Continued from page 1)

healthy sample of the surface of our subject, but we can't agree on its meaning or implications.

The "best therapy" contest will probably continue for many years to come and I believe that its intended yield is a commendable one — namely, the clarification of information about how best to help people. For some time now, however, I have questioned the ability of our outcome methodologies to reveal the staggering complexities of a human life in transition. My technical concerns here are primarily epistemological and I have belabored them enough elsewhere. They are mentioned to introduce a distinction that is currently receiving renewed attention within the field of psychology and within the specialty of psychotherapy in particular. That distinction is between "process" and "outcome" — a distinction which itself invokes subtle boundaries

between causes and effects. For a number of years now I have been studying some of the fundamental change processes that are reflected in personal development. My assumption has been that psychotherapy is a special kind of relationship which focuses on the clarification, redirection, and acceleration of processes that permeate all human lives. I have further assumed that I would learn much from studying the invariance within the variance — that is, those patterns and phenomena that are so robust that they survive the tacit Procrustean distortions of divergent metaphysics of change.

To date, my research has rendered a number of hypotheses regarding personal change that are now being more carefully evaluated. No unifying model has yet emerged, but I will be presenting my conjectures in a forthcoming book titled *Human Change Processes: Notes on the facilitation of personal development* (Basic

Books, in press). Some of the points I will be making there can be abbreviated as follows:

- human experience is imbued with the quest for and transformation of personal meanings (all "successful" psychotherapy facilitates meaning clarification and/or change);

- the human nervous system is a very active participant in co-creating the realities with which it interacts;

- our most primitive and pervasive cognitive processes rely on contrasts and boundaries to create the "content" of experience — the abstractions and processes behind that generation of content are therefore critical elements in an adequate understanding of change;
- the central nervous system is generally self-protective and self-perpetuating in its patterns (an observation which relates to notions of therapeutic "resistance" and the brain's understandable reluctance to change too much too quickly);

- efforts toward change often interfere with spontaneous change processes (this observation is particularly apparent in patterns that require sympathetic-parasympathetic coordination — e.g., tension reduction, insomnia, biofeedback, sexual dysfunction, and so forth);
- insight — whether developmental, rational-evaluative, or pattern-descriptive — often reflects and facilitates personal change, but it is neither necessary nor sufficient for that change;

- it is much easier to modify peripheral meanings and isolated habits than it is to change core personality features;

- persons who are engaged in the transformation of core personal meaning structures often experience "hypercycles" of emotionality, confusion, and phenomenological novelty;

- emotional "imbalance" may be critically important in energizing and directing personal transformation; and

- persons who are hopeful or trusting in their own developmental processes are more likely to report satisfaction with the pace and direction of their life movement.

These are, to be sure, truncated statements of points I have developed more fully in my technical publication. Needless to say, the scope of my intentions has forced me into literatures far afield from psychotherapy outcome. I am presently trying to integrate the literatures of psychobiology, cognitive psychology, lifespan development, emotion, epistemology, and autopoiesis as they bear on the phenomenon of personal change. The bottom line of all of this is, perhaps, my continuing fascination with the breadth, depth, and complexity of human experience. As much as I am intrigued with our scientific theories, I remain awed and humbled by the size of the gap between our theoretical maps and the experiential territory they are supposed to represent.

Computer director names sought

(Continued from page 1)

understanding of university computing and information system needs and problems, both administrative and academic, is also essential.

Administrative experience at university/college level or industrial or governmental equivalent is required, along with a master's degree in a related subject or equivalent in experience. Ten years of experience in computing and data processing, including five years of experience as a director or manager of a large-scale business and scientific computing operation, is desirable. The post requires an individual with strong written and verbal communications skills.

Donald G. Dickson, dean of admissions, will chair the Search Committee. Members are Dr. John J.

Cahir, associate dean for resident instruction and professor of meteorology; Nancy M. Cline, associate librarian; Loren M. Furtado, director of planning and budget; Dr. Stephen Jablonsky, associate professor of accounting; Dr. Gerald Johnson, associate professor of computer science; George L. Lane, deputy controller; Dr. Wilbur L. Meier, dean, College of Engineering; and Dr. Robert J. Scannell, vice president and dean, Commonwealth Educational System.

Nominations and applications for the position should be sent by Feb. 18 to: Dean Donald G. Dickson, Room 214 Shields University Park, Pa. 16802

Anyone desiring further information can contact Dean Dickson at 865-5478.

Applications, nominations sought for director of Developmental Year Program

Applications and nominations are being sought for the position of Director of the Developmental Year Program.

The Director, who reports to the Vice President for Undergraduate Studies, provides overall direction and academic leadership to the program and is responsible for coordinating its instruction and counseling components. Other responsibilities include record keeping, student advising, tutoring, research and administrative assignments, as well as relating with government offices.

Candidates should have experience in teaching in higher education, advising and academic administration. Preference will be given to candidates having an earned doctorate and to those who hold or have held academic rank and have had experience in similar programs.

Applications and nominations should be sent by Jan. 31 to:

Developmental Year Search Committee
117 Old Main, Dept. I
University Park, Pa. 16802

Financial aid applications are now available

Financial aid applications for the 1982-83 academic year are now available in the Office of Student Aid, Room 335 Bouck Building. Applications are available for the Pell Grant, State Grant, National Direct Student Loan, Supplemental Educational Opportunity Grant, College Work Study Program, and University Scholarships.

Students should be advised that applications are available from 8 a.m. to 5 p.m., Monday through Friday. Financial Aid staff members are available to answer questions.

Trustees approve plans for handicapped

Final plans to make 32 buildings at University Park more accessible to the handicapped have been approved by Trustees.

Funds for the project, \$666,000, are provided by the Commonwealth's Department of General Services as part of a handicapped accessibility funding package for State colleges and State-related universities.

The improvements include easing access to doors, modifying restroom facilities and adding ramps.

The buildings to undergo modifications are Agricultural Engineering, Althouse, Animal Industries, Arts, Bouck, Business Administration, Carnegie, Carpenter, Chambers, Chandlee, Deike, Electrical Engineering, Forum, Frear, Hammond, Henderson Human Development, Kern, McAllister, Mechanical Engineering, Mineral Science, Mueller, Music, Noll, Osmond, Rackley, Recreation, Sackett, Tyson, Visual Arts, Walker, Whitmore and Willard.

The Office of Student Aid recommends that applications for the Pell Grant and State Grant be filed by Feb. 15.

Applications for the National Direct Student Loan, Supplemental Educational Opportunity Grant, College Work Study Program, and University Scholarships must be completed and filed with the Office of Student Aid by April 1.

Summer Term assistance through the campus based programs (NDSL, SEOG, CWSP) appears unlikely at this time. Further information concerning the status of these programs for summer will be distributed near the end of Winter Term. Students should apply for a Guaranteed Student Loan to insure financial aid consideration for planned summer studies. Pennsylvania undergraduate students may also apply for the State Grant for Summer Term.

Faculty and staff members are requested to encourage students in need of assistance to apply for financial aid and to address questions to the Office of Student Aid.

Approximately 80 percent of Penn State's students receive financial assistance through federal, State and University-coordinated programs.

George Plimpton to speak

Author George Plimpton, an exponent of "participatory journalism," will speak on "The Professional Amateur" at 8 p.m. Thursday, Jan. 21, in Eisenhower Auditorium. His talk, which is free, is sponsored by Colloquy.

Mr. Plimpton's books include *Paper Lion*, *Out of My League*, *The Bigger Man*, *Mad Ducks and Bears*, *One for the Record* and *Shadow Box*.

Pennsylvania ranks in the bottom quartile in terms of tax support for higher education

Pennsylvania is one of 12 states forming the bottom quartile in the latest report on *Appropriations of State Tax Funds for Operating Expenses of Higher Education*.

The study by Dr. M.M. Chambers of Illinois State University is designed to provide a collective analysis in the 50 states. It offers the earliest available data on state legislative activities across the country involving appropriations for higher education.

The study shows that Pennsylvania had a 12 percent gain in appropriations of state tax funds for annual operating expenses of higher education from fiscal year 1982 over fiscal 1980.

According to the report, the 12 states in the fourth quartile (two-year gains from 4 to 12 percent) are mostly in four blocs: three contiguous states — Ohio, 4; Michigan, 5; Pennsylvania, 12 — in the lower Great Lakes region; four in the South Central — Arkansas, 8; Alabama, 11; Tennessee, 12; and Missouri, 12; two in the upper Mississippi Valley — South Dakota, 5, and Minnesota, 12; three in the "Inland Empire" (Pacific Northwest) — Washington, 6; Oregon, 10; and Idaho, 12.

Three of the most populous states — Pennsylvania, Ohio, and Michigan — are in the bottom quartile.

Current unfavorable aspects of national and regional economic conditions, Dr. Chambers says, are recognized as playing parts in this result.

Of the 13 states in the report's top quartile (showing two-year gains of 30 percent or more), 10 are west of the Mississippi River. These include the only seven in the nation showing 38 percent more: Alaska, 49; Wyoming, 60; Texas, 45; North Dakota, 43; Oklahoma, 42; Louisiana, 38; and Montana, 38. Completing the ten are New Mexico, 39; Arizona, 32; and Hawaii, 30. The other three in the 13 are all on the Atlantic coast: Delaware, 35; New Hampshire, 31; and Georgia, 30.

"By October 1981," Dr. Chambers notes, "it was possible to say the performance of the 50 states as a whole was not as good as had been hoped, nor as bad as had been feared."

"The weighted average nationwide percentage gain in appropriations of state tax funds . . . for fiscal year 1982 over fiscal 1980 was 20 percent. This was a few points less than the comparable figures of the 1970s."

"A look at the range among the 50 states discloses many bright spots. The two-year gains ranged from as low as 4 percent to as high as 69 percent. This is a wider spread than usual."

The report was published by the National Association of State Universities and Land-Grant Colleges. Copies may be obtained by contacting the Association, Suite 710, One Dupont Circle, N.W., Washington, D.C. 20036.

News in Brief

Acting coordinator named for Developmental Year

Kay Hudspeth has been named acting coordinator of the Developmental Year Program, administered by the Office of the Vice President for Undergraduate Studies.

Ms. Hudspeth, an instructor in the Mathematics Department since coming to Penn State in 1973, served as mathematics coordinator of the Basic Skills Program and as mathematics coordinator of the Developmental Year Program at the time of her appointment. She holds an M.S. degree in mathematics from Syracuse University and a B.A. degree in liberal arts from the University of Texas.

"We are fortunate to have found an acting coordinator with this expertise and experience," Dr. Robert E. Dunham, vice president for undergraduate studies, said. "I am confident that Kay Hudspeth will do an excellent job."

Unique Rhodes Fellowship for Women deadline nears

Jan. 31 is the application deadline for a Rhodes Fellowship for Women being offered at St. Hilda's College of the University of Oxford.

The Fellowship, tenable at St. Hilda's for two academic years beginning Oct. 1, 1982, is open only to women below the age of 35 who are of postdoctoral status (or close to it), or of comparable academic standing. Board, lodging and a stipend will be provided, as will travel expenses at the beginning and end of the Fellowship. Single women and women with families can be accommodated.

Applications should be addressed: The Principal, St. Hilda's College, Oxford, OX4 1DY, England.

To apply, the candidate should enclose one copy of a statement of her qualifications; a brief outline of the research she proposes to undertake; and the names of no more than three persons prepared to act as academic referees. Copies of published or unpublished work may be called for at a later date, but should not be submitted in the first instance.

For additional information, interested Penn Staters should contact Dr. Eugene R. Melander, assistant vice president for undergraduate studies, at 865-0458.

Student exchange program established in Liberal Arts

The College of the Liberal Arts and American Studies program have established a student exchange program with the University of Manchester in England.

Beginning Fall Term 1982, the University of Manchester will send six third-year undergraduates to Penn State for a full academic year of study in the American Studies program, according to its chairman, Dr. Harrison Meserole.

The six Penn State juniors who go to Manchester can come from any University program — as long as Manchester offers a similar curriculum.

"We expect that most of the Penn Staters we send to Manchester will come from the humanities and social sciences, but the opportunity is open to students in other fields, too," Dr. Meserole says.

Penn State students who are interested in the exchange program should hold 7th-term standing by Fall Term 1982 and should have "strong academic records," Dr. Meserole says. They should contact Dr. Meserole in Room 9 of Pattee Library (the American Studies office) as soon as possible.

The exchange program's advisory committee will select six candidates and six alternates. Chaired by Dr. Meserole, the committee consists of: Dr. Peter Gould, professor of geography; Dr. Isabel

Knight, associate professor of history; Michael Laubscher, assistant director of foreign studies; Dr. Merrill Noble, professor of psychology; and Dr. John Romano, associate dean for undergraduate studies in Liberal Arts.

The new program is the second foreign exchange arrangement between Penn State and Manchester. Since 1971, the two universities have had a program in mass communications, sponsored on this end by the Department of Speech Communication.

Libraries join land grant microfilming project

The University Libraries have joined with those of Cornell, Rutgers, Delaware and Maryland in the cooperative microfilming of land grant agricultural documents.

The purpose is to preserve in archival form the historically significant contributions of these institutions to agricultural research.

Penn State will act as regional coordinator for the project, which is co-sponsored by the U.S. Department of Agriculture's National Agricultural Library. That library has provided a grant of \$26,800 for the work.

The microfilming will begin in 1982 and is likely to take a year or more to complete, according to Dr. Keith Roe, associate librarian, who is coordinating the project at Penn State.

UCIP has funds for international proposals

The University Committee for International Programs (UCIP) currently has a small amount of money that may be used by faculty members and departments to help defray costs of speakers, program development or proposals of an international nature.

First priority will be given to interdisciplinary or intercollege programs or activities.

Funds should be requested at least 30 days prior to the activity by sending brief biographical data, program details, total costs and the amount requested to UCIP, Room 306 Willard Bldg.

U.S. Army War College Current Affairs Panel visits

The U.S. Army War College Current Affairs Panel, which will visit the University Jan. 19-21, will present a panel discussion on Wednesday, Jan. 20, at 7 p.m. in Room 102 Forum Building.

The discussion, featuring five War College students and a faculty moderator, will focus on specific facets of the national security policy formulation process. It is open to the public.

In addition, representatives from the Current Affairs Panel will be available on Jan. 20 and 21 to appear in classes or at faculty meetings. Faculty members interested in scheduling a visit from a panel representative should contact Lt. Col. Arthur Dervaes at 863-0368.

Workshop to help parents communicate with children

The Individual and Family Consultation Center will offer a six-session parenting workshop for parents interested in learning how to discipline and communicate more effectively with their children 3-12 years.

No charge will be made for the workshops, which will be offered in the evening at the Catharine Beecher House on campus. The first class meeting will be scheduled between Jan. 14 and 20. More information may be obtained by calling the Consultation Center, University Park, 865-1751, between 8 a.m. and 5 p.m.

Department of Nursing receives full accreditation

The Department of Nursing has been awarded continuing full accreditation of its master's and baccalaureate degree programs.

Approval was granted for an eight-year period, the maximum time allowed by the accrediting body, the Board of Review for the Council of Baccalaureate and Higher Degree Programs of the National League for Nursing.

DNA Technology lectures scheduled for next week

Dr. Jean E. Brencley, research director of Genex Corporation, Rockville, Md., and Dr. T.H. David Ho, assistant professor of botany at the University of Illinois, will present public lectures at the University next week.

Dr. Brencley will discuss "Biotechnology: Progress, Problems, Perspectives" Wednesday, Jan. 20, at 3:15 p.m. in Room 112 Kern. Dr. Ho will speak on "Plant Molecular and Cellular Biology" Thursday, Jan. 21, at 10 a.m. in Room 112 Kern. Both lectures are part of a Workshop in Recombinant DNA Technology sponsored by the Industry-University Cooperative Program in Recombinant DNA and supported by the Program's charter affiliate members.

Dr. Brencley, a specialist in molecular genetics and nitrogen metabolism, formerly served on the faculties of Penn State and Purdue.

Dr. Ho is a specialist in plant biochemistry and developmental biology. He was formerly a postdoctoral fellow at Michigan State and Washington Universities and the Massachusetts Institute of Technology.

Flashers can prevent parking violations

Some faculty and staff members have received parking violations that could have been prevented if they had used their vehicle's emergency flashers, according to Allan Derzak, University parking coordinator.

Short-time parking for loading and unloading, pick-up or delivery is permitted in parking areas and in loading zones provided the vehicle's emergency warning flashers are operating. The maximum time limit for pick-up or delivery parking is 15 minutes. If a vehicle is not equipped with emergency flashers, the head lamps should be turned on.

A note affixed to the windshield or displayed on the dashboard is not an acceptable alternative to the above procedure.

Retail meat sales continue at Meats Lab

Retail meat sales are in progress each Friday from 1:30 to 4 p.m. at the Meats Laboratory located near Beaver Stadium.

The meat is from the University herds and is slaughtered and cut by students in the Animal Industry and Food Science classes.

The store carries all the retail cuts of beef, pork and lamb. Customers should be at the Meats Laboratory at or before 1:30 p.m., at which time they will draw a number for service.

Employment Division has Affirmative Action library

The Employment Division has a library of Affirmative Action/Equal Employment Opportunity reference material to assist University personnel seeking recruitment and affirmative action information. Such information may prove helpful in ascertaining availability of minorities, women and handicapped for specific job categories, or in locating recruiting

resources in fulfillment of affirmative action, good faith efforts.

Some samples of the kinds of data available in this library are: 1) a directory for reaching minority groups, 2) a directory of resources for affirmative recruitment, 3) a handbook for recruiting at the traditionally black colleges, 4) a directory of organizations interested in the handicapped.

While the reference material is not available for overnight loan, it may be used in the Employment Division, Room 117 Willard Building, Mondays through Fridays, from 8 a.m. to noon and 1 p.m. to 5 p.m.

Arts Roundup

Jan. 17 concert to mark Franz Joseph Haydn's birth

The first concert of several upcoming events commemorating the 250th year of Franz Joseph Haydn's birth will be presented by University musicians at 7:30 p.m. Sunday, Jan. 17, in Gallery C of the Museum of Art. The program will consist entirely of works by Haydn.

The Alard String Quartet will open the evening concert with a performance of the String Quartet in G Major, opus 54 No. 1. French hornist Christopher Callahan, an assistant professor of music, will play Haydn's Horn Concerto, and Musica da Camera, the University's chamber orchestra, will conclude the program with the Symphony No. 6.

Tickets for the event, which is being sponsored by the School of Music, are \$5 each and are being sold at the Musica da Camera office in Room 218 of the Music Building. Tickets may also be reserved by calling the Musica da Camera office at 865-0431.

Philadelphia percussionist to present a master class

Alan Abel, a percussionist with the Philadelphia Orchestra and a professor of percussion at Temple University, will present a master class for the School of Music's Common Hour at 1 p.m. Tuesday, Jan. 19, in the Music Building Recital Hall.

The public is welcome to attend this program, which has been given at major music conservatories throughout the United States and is designed to give the audience an in-depth look at the rhythm, color and dynamics involved in orchestra percussion.

Prof. Roy to debut work in a recital on Jan. 20

The premiere performance of 11 "Voodoo Songs" by Burt Fenner, professor of music, will highlight a recital by soprano Suzanne Roy at 8:30 p.m. Wednesday, Jan. 20, in the Music Building recital hall.

Ms. Roy, an assistant professor of music, has also selected works by four other composers for her program. She will perform Anton Webern's Opus 12, as well as pieces by Gabriel Faure, and Maurice Ravel.

Planiest Steven Smith, an associate professor of music, will accompany Ms. Roy. For the Ravel piece, they will be joined by flutist Susan Klick, an instructor of music and cellist Leonard Feldman, an associate professor and member of the Alard String Quartet.

Professor Roy holds a D.M.A. degree from the University of Wisconsin at Madison, and she earned both her M. Mus. and B. Mus. degrees from the University of Michigan.

She is currently doing research on the solo vocal settings of texts by Rainer Maria Rilke (funded 1980-81 by a Research Initiation Grant) and prepared the American catalog of settings which will be published in 1982-83.

University Park Calendar

January 14 — 24

Special Events

Thursday, Jan. 14

URTC, David H. Bell, *Indian Summer*, 8 p.m., Pavilion Theatre. Also Jan. 15, 16.

Friday, Jan. 15

Artists Series: Paul Osborn, "Morning's at Seven," 8:30 p.m., Eisenhower Auditorium. Sports: Basketball (women), Coca-Cola Lady Lions Classic, 6 and 8 p.m. Also Jan. 16.

Saturday, Jan. 16

Sports: Fencing (men) vs. Clemson, Columbia, North Carolina, N.C. State, Notre Dame, 9 a.m. (women) vs. Clemson, Cornell, North Carolina, John's Hopkins, 9 a.m.; Swimming vs. Pittsburgh, 1 p.m. (women), 4 p.m. (men); Basketball (men) vs. Pittsburgh, 1:30 p.m.; Ice hockey vs. Canisius College, 8 p.m.

Sunday, Jan. 17

Concerts: Works by Haydn, performed by various Univ. musicians, 7:30 p.m., Gallery C, Museum of Art. Sports: Bowling vs. George Washington, 1 p.m.; Ice hockey vs. Villanova, 3:30 p.m.

Tuesday, Jan. 19

Senate undergraduate instruction meeting, 9:30 a.m., 101-A Kern.

School of Music Common Hour, 1 p.m., Music Bldg. Recital Hall, Alan Abel, Phila. Orchestra, master class on rhythm, color and dynamics of orchestra performance.

Senate Council meeting, 1:10 p.m., 101 Kern.

HUB Craft Center Open House, 7:30 p.m., 312 HUB.

HUB, Second semester registration, 8:05-8:01. Artist Series: Philadelphia Orchestra, Eugene Ormandy, conducting, 8:30 p.m., Eisenhower Auditorium.

Wednesday, Jan. 20

Commons Noonline Concert, Stan Shepherd, Kern Lobby.

Graduate Council meeting, 3 p.m., Room 101 Kern.

Industry-University Cooperative Program in Recombinant DNA Technology Lecture, 3:15 p.m., 112 Kern. Dr. Jean Brenchley, Genes Corp., on "Biotechnology: Progress,

Problems, Perspectives."

Penn State Credit Union meeting, 7:30 p.m., 101 Kern.

Recital, Suzanne Roy, soprano, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Jan. 21

Liberal Arts Faculty meeting, 3 p.m., 101 Kern. Industry-University Cooperative Program in Recombinant DNA Technology Lecture, 10 a.m., 112 Kern. T.H. David Ho, Univ. of Illinois, on "Plant Molecular and Cellular Biology."

Friday, Jan. 22

Board of Trustees meeting, Faculty Bldg. Sports: Gymnastics (women) vs. Florida, 8 p.m.

Saturday, Jan. 23

Board of Trustees meeting, Faculty Bldg. Faculty Women's Club Midwinter Coffee, 9:11-30 a.m., Museum of Art. France-Cinema, Truffaut, *The Last Metro*, 7 and 9 p.m., 112 Kern. Also Jan. 25. Sports: Bowling, Penn State Lion's Pride Invitational, also Jan. 24: Gymnastics (men and women) vs. Ohio State, 8 p.m.

Seminars

Thursday, Jan. 14

Physics, 3:50 p.m., 445 Davey Lab. A. Redfield, Brandeis Univ., on "Pulsed Fourier Transform NMR and Transfer RNA."

Agromony, 3:55 p.m., 111 Tyson. Doug Mason on "Grassland Potential in Northeast Thailand," and Tom Reed on "Influence of Nozzle Type and Spray Volume on Herbicides for Quackgrass Control in No-Till Corn."

Acoustics, 4 p.m., 75 Willard. Arthur Pentz, on "Acoustic Parameters of Voice in Down's Syndrome Children."

HFER, 7 p.m., Gallery Lounge, HUB. Dr. Peter R. Cavanagh, biomechanics, on "The Biomechanics of Sport."

Friday, Jan. 15

Analytical Chemistry, 11 a.m., 333 Whitmore. Dr. John Hammond, Physical Industries, Inc., on "Topics in Surface Analysis."

Geography, 3:45 p.m., 319 Walker. Dr. Caroline Eckhardt, English and comparative lit., on "King Arthur and Archaeology, History, and Legend."

Monday, Jan. 18

Aerospace Engineering, 4 p.m., 152 Hammond. Dr. Michael J. Andrew, Univ. of Southampton, on "Aerodynamics of Coastal Rotors in Flow."

Entomology, 4 p.m., 204 Patterson. Danny Lee Rinker, PSU doctoral candidate, on "Biology of the Mushroom Infesting Phorid Fly."

MC3B, 4 p.m., 101 Althouse Lab. Dr. Richard Crowell, Nahemann Medical School, on "Viral Receptors and Pathogenesis."

Tuesday, Jan. 19

Biology, 11:10 a.m., 8 Mueller. William S. Brown, Shimer College, on "Field Studies of the Timber Rattlesnake in N.E. New York."

Ag Greenhouse, 2:20 p.m., 111 Animal Industries. Jay Holcomb, horticulture, on "Growing Media for Containers."

Water Pollution Control, 2:20 p.m., 271 Willard. S.N. Hong, Air Products & Chemicals, on "Biological Treatment System for Nutrient Removal."

Geosciences, 3:45 p.m., 22 Deike. S.A. Morse, Dept. of Geology and Geography, Morrill Science Center, Univ. of Mass., on "Magmatic Crystalligraphy."

Thursday, Jan. 21

Chemistry, 12:45 p.m., 333 Whitmore. Albert I. Meyers, Colorado State Univ., on "New Asymmetric Carbon-Carbon Bond Forming Reactions."

Physics, 3:50 p.m., 445 Davey C. Patel, Bell Labs, on "Pulsed Optoelectronic Spectroscopy of Condensed Matter."

Agromony, 3:55 p.m., 111 Tyson. Dr. Daniel Kniesel, agromony, on "Reproductive Development in Maize: Texas Style."

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865/1387 (network line 475-1387).

Applications for these staff vacancies will be accepted until 5 p.m., Jan. 21, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (P5-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ADMINISTRATIVE AIDE, COLLEGE OF EDUCATION, UNIVERSITY PARK Responsible to the Head, Division of Counseling and Educational Psychology, for administrative functions associated with the operation of the division, including coordinating course scheduling, student records, office operations, building maintenance and other related duties. Duties involve close contact with faculty and with Dean's Office. Requires five years of experience. Associate Degree or equivalent, plus one to two years of effective administrative or supervisory experience.

APPLICATIONS PROGRAMMER/ANALYST, COLLEGE OF HEALTH, PHYSICAL EDUCATION AND RECREATION, UNIVERSITY PARK Analyze information needs of organizations' administrative offices and define the information systems and services that are required to satisfy these needs in a cost effective manner. Support staff, maintain awareness of colleges' evolving administrative services and analyze office operations. Consult with staff on applications of information system planning and design, plus one to two years of effective experience including

computer procedure design and programming, administrative procedure development and systems analysis.

STAFF TRAINING AND DEVELOPMENT SPECIALIST, COLLEGE OF MEDICINE, HERSHEY Responsible to the Associate Hospital Director for the overall development, implementation and administration of staff training and development program to update supervisory and management skills. Bachelor's degree, plus two to three years of effective experience in the area of management and supervisory training and development; preferably in a health-care setting.

ASSISTANT DIRECTOR, ANNUAL GIVING, OFFICE OF GIFTS AND ENDOWMENTS, UNIVERSITY PARK Responsible within the Penn State annual giving program for planning, scheduling and coordinating fundraising telephone solicitation campaigns; planning and producing direct mail solicitations to alumni and friends; planning and coordinating senior class gift program and other student-alumni related programs and acknowledging private gifts from individuals to include special recognition. Bachelor's degree in journalism or related field, plus two to three years of effective experience in public relations, advertising or promotional activity. Experience in higher education and knowledge of printing production desirable. Good oral and strong written communications skills essential.

DATA COORDINATOR, COLLEGE OF MEDICINE, HERSHEY Responsible to the Manager, Department of Medical Records, for developing and implementing continuing programs for dissemination of patient and statistical data to the Physician Staff, Hospital Administration and associated disciplines. Bachelor's degree in Business Administration and Registered Records Administration or RRA eligible with three to six months of effective experience; or an Accredited Records Technician with at least one year of effective experience in a medical records department environment. Knowledge of the ICD coding system as well as the ability to discern and index information desirable.

COORDINATOR OF PUBLIC INFORMATION, SEHEND COLLEGE Responsible to the Dean of

Behrend College and the Director of University Relations, Behrend College, for a wide variety of duties, including coordination of communications and public information, media relations, publications and research activities for fund raising programs. Bachelor's degree in journalism or communications, with two to three years' related experience required. Excellent communication skills, particularly writing skills essential.

JUNIOR COPY EDITOR, UNIVERSITY PRESS, UNIVERSITY PARK Responsible for editing and proofreading a variety of manuscripts in accordance with standard usage, press style, and special requirements of the individual work. Clear permissions for use of copyrighted material. Maintain cooperative relations with authors, journal editors, advertising personnel, production department and acquiring editors. Convert information about books to the Library of Congress. Bachelor's degree in arts, sciences, or journalism, or equivalent, with evidence of facility in written expression and from one to two years of effective experience in editorial practices.

Faculty Staff Alerts

IRA accounts should be considered carefully

There has been much publicity recently concerning the Individual Retirement Accounts (IRA) which were provided for under the Economic Recovery Act of 1981. Beginning January 1982, University employees are eligible to start their own individual retirement accounts. The maximum allowed is \$2,000 per year. Most local banks and other financial institutions are now offering individual IRAs.

Faculty and staff members of The Pennsylvania State University are

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Friday, Jan. 22

Analytical Chemistry, 11 a.m., 333 Whitmore. Joe Yakupovsk on "Electrochemistry of Polysulfides." Geography, 3:45 p.m., 319 Walker. Warren Robinson, economics, on "The Apocalyptic Vision of Homer Loe: A Neglected Early American Political Geographer."

Exhibits

Chambers Gallery: Group Show, Graduate Art Education Students.

HUB Art Gallery: Ukrainian Club Exhibition, Art Alley.

Nittany Divers Exhibition, Art Alley. Central Pennsylvania Scholastic Art Awards, Art Alley and Browning Gallery, through Jan. 23.

Photo-Journalism Undergraduate Exhibition, opens Jan. 24.

Invitations Gallery of Photography, 212 Arts Bldg. Gallery Hours: Sunday and Tuesday, noon to 5 p.m.; Thursday, 7-10 p.m.

Jim Abbott, black and white photographs, through Jan. 20.

Karen M. Strom, landscapes, opens Jan. 22.

Kern Gallery: Dorothy Hook, paintings. Ron Hand, ceramics.

Museum of Art: Museum Hours: 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m.

Danish Ceramic Design, through Jan. 24. Architectural Fantasy and Reality, Drawings from the Accademia Nazionale di San Luca, Rome.

American Paintings Before World War II, from the permanent collection.

Pattee Library: Rare Books Room: The Academy of St. Luke, Rome: Architectural Treatises and Perspective Books.

Second Floor, East Palace: Slavic Books. East Corridor: James Abbot, photography.

Lending Services Gallery: Ruth Kemper, recent works.

Visual Arts Bldg., Zoller Gallery. Gallery Hours: 9 a.m.-5 p.m., Monday through Friday; Saturdays and Sundays, noon to 5 p.m.

Architectural Drawings/Alpha Rho Chi, through Jan. 24.

reminded that they have had, as members of an institution of higher education, the opportunity to participate in a more flexible tax deferred annuity program for many years under Section 403(b) of the Internal Revenue Service Code. The University has tax deferred annuity contracts with three different insurance companies: The Equitable Life Assurance Society, Teachers' Insurance and Annuity Association (TIAA), and The Variable Annuity Life Insurance Company (VALIC). It should be noted that the transfer of the health care plan administration from The Equitable to The Prudential will have no effect on the tax deferred annuity offered by The Equitable.

Generally, the opportunities afforded by existing University tax sheltered plans are more liberal and accommodating than under the new IRA Plan. Because of the numerous and varying IRA investment plans being offered by financial institutions, it would be wise for you to consult your financial advisor as to what is best for you.

FICA deductions to be higher in 1982

Social security (FICA) deductions will be higher in 1982, as mandated by Federal Law.

The social security base increased from \$29,700 to \$32,400, the rate increased from 6.65 percent to 6.7 percent, effective Jan. 1, 1982. The maximum annual deduction will be \$2,170.80, an increase of \$195.75 over 1981.

Penn State Intercom

Mr. Tarmam

New athletic director named

Joe Paterno, head football coach and athletic director, has requested to be relieved of his responsibilities as athletic director at Penn State.

"Joe feels that he has achieved the desired reorganizational and fiscal steps he set out to accomplish since he was appointed athletic director two years ago," said President Oswald. "He now wishes more time to concentrate on his coaching tasks and to spend more time with his family."

In agreeing to Mr. Paterno's request, Dr. Oswald commended him for his "high-level of performance as the athletic director" and indicated he would maintain the same organizational structure set up under Mr. Paterno.

Effective March 1, James I. Tarmam, associate athletic director, will succeed Mr. Paterno as athletic director. His promotion to director, said Dr. Oswald, was recommended by Mr. Paterno, and the two officers to whom Mr. Tarmam

(Continued on page 4)

Admissions offers on target for '82-'83

Recalling the advice of a statistics professor who used to tell classes, "Don't believe it unless you can chart it," Admissions Dean Donald G. Dickson likes to begin Monday mornings working on his notebooks of Admissions Office charts.

Right now, these charts reflect good news for Penn State. The University ceased making regular offers of admissions for spring, summer and fall as of Nov. 30 for University Park, and applications for places at the Commonwealth Campuses and Behrend are running far ahead of last year.

"By our Nov. 30 first review date, we had received 18,000 applications for admission as compared to 13,500 last year, an increase of 35 percent," Dean Dickson points out. "I believe that represents a real increase of 15 percent — and that perhaps 20 percent of the rise is due to earlier applying by students and faster processing by our Admissions staff — the application flow to mid-January continues this trend. For 1981, applications received by Nov. 30, 1980, (the 'pool') were processed by Jan. 14, 1981. For the 1982 'pool,' that work had been accomplished by Dec. 16, 1981."

Using the applications received by Nov. 30 for both 1981 and 1982 as a benchmark, University Park admissions offers are up only 4 percent because of space limitations, while offers for the Commonwealth Campuses are up 48 percent, and Behrend is up over 100 percent.

While Dean Dickson is naturally pleased with these figures, he points out that last year toward the end of January, the number of applications suddenly climbed steeply and that there is now no way of knowing whether the 1982 figures will continue to rise at the same pace.

What he does know for certain is that University Park cannot accommodate — either in its classrooms or housing

facilities — more than the 33,756 students enrolled this year.

"Last year we made 8,917 offers of admission to Summer and Fall Term baccalaureate degree programs at University Park," he reports, "and approximately 4,700 students actually wanted — about 500 more than we actually wanted. This year we will make 8,069 offers to produce 4,214 freshmen."

To hold down applications for Colleges with limited facilities for enrollment expansion, predicted gradepoint average requirements were raised for Engineering — from 2.75 to 2.9; for Business

Administration — 2.75 to 2.85; and for Science — 2.65 to 2.75. (The procedure used in developing predictions depends on whether the student's preference is for a science- or non-science-oriented College.)

"We calculate that the new eligibility levels resulted in about 800 fewer offers," Dean Dickson continues. "If we had not taken this action, we would be over our targets by now. As a further control, we will only accept 500 students with advanced standing as compared to 800 last year."

Offers of admission for the different
(Continued on page 4)

No guarantees for Centre County late applicants

Although the Admissions Office ceased sending out regular offers for places at University Park on Nov. 30, 1981, some spaces are customarily saved for special categories of applicants.

These include groups such as very high ability students, ROTC scholarship winners, EOP candidates applying late, grant-in-aid athletes, veterans, and Arts and Architecture talent program applicants.

In the past, space has also been saved for residents of Centre County, according to Dean Dickson.

For 1982, Centre County students with normal eligibility levels who applied by Nov. 30 were treated in the same way as all other candidates. Those with averages below normal University Park eligibility levels but with predicted GPAs above 2.0 have been offered admission for the Summer Term to all Colleges except Engineering.

Those Centre County students

who applied with complete credentials in December will probably also be able to be granted admission to University Park in either the Summer or Fall Term.

However, Centre County students who waited until January or later to apply have no assurance of admission to University Park — even if they are prepared to live at home. "We have a shortage of classroom space as well as housing," Dean Dickson emphasizes. January applicants will not be considered until mid-March — after the reply date for earlier applicants. Those applying in February or later probably will not be notified of their status until April.

Dean Dickson suggests that Centre County students not accepted in resident instruction programs at University Park consider utilizing the resources of Continuing Education, opting for a Commonwealth Campus, or applying for the 1982-83 Winter Term.

African programs not a one-way street, Provost reports

- At the University of Yaounde in Cameroon, a year-old copy of *PMLA*, the journal of the Modern Language Association of America, is kept locked in a separate office. Faculty members can sign out for a key, but they may not remove the journal from the office because it is in constant demand.

- Faculty members at the University of Swaziland expressed disappointment and anger when an American university which had recruited several of their graduate students handed them accelerated master's degrees, having waived normal degree requirements.

- The faculty at another African university gathered to hear a lecture by Provost Eddy, even though many of them could understand only a little English. They wanted to be in the presence of an American academic discussing an intellectual topic.

"My dominant impression from Africa," says Dr. Eddy, "is that the faculties of African universities are a beleaguered but intensely brave and dedicated group of scholars, devoted to learning and seeking to expand their horizons."

Dr. Eddy spent late November and much of December in Africa visiting Penn State's foreign studies programs and exploring possibilities for new ones, including student-faculty exchanges and assistance programs.

Accompanied by Penn State's Foreign Studies Director, Dr. W. LeMarr Kopp, he travelled to Cameroon; the University of Nairobi, Kenya; the University of Zimbabwe; Swaziland; Congo-Brazzaville; and the National University of Zaire.

In preparation for the trip, Dr. Eddy met with the ambassadors from each of these nations to discuss how they viewed their countries' needs and how Penn State could help them. He corresponded also with the American ambassadors and AID mission chiefs in each country. Finally, he spent a day at the Department of State in Washington to receive a briefing on current American policy toward each country.

Penn State now has foreign studies and foreign aid opportunities in West Africa (Cameroon), East Africa (Kenya) and Southern Africa (Swaziland). Dr. Eddy signed the agreement to establish the program at the University of Swaziland during his visit.

"At Penn State we should recognize

that our African programs are not a one-way street," Dr. Eddy remarks. "Because most Americans are so pathetically ignorant about Africa, they may not realize that Africans are as devoted to their lands and their lives as we are to ours. Africans have their 'Happy Valleys,' too. Death comes sooner there; food is less plentiful; wood may be scarcer. But it is their world, and to them it is very rich and good and filled with traditions and customs far older than ours."

Dr. Eddy cautions also against propounding simple solutions to Africa's problems.

"Different levels of problems emerge even after a brief visit," he notes. "Cameroonians face constraints on their intellectual freedom; in Kenya, the major problem is overpopulation. Zimbabwe is struggling with race relations, and Swaziland's problem is Zimbabwe — the future of these two countries is linked. In Zaire, the problem is corruption; while in the Congo, it is getting out from under the domination of the Eastern bloc."

"American foreign policy planners, however, tend to look at these countries in terms of either their potential for our own security or their ability to supply us with such essential minerals as cobalt and

uranium."

Dr. Eddy believes that President Reagan's insistence on private capital bearing its share of the cost is one of the answers to helping universities in Third World countries. Penn State, for example, is negotiating with several American oil companies for funding to establish a program in Cameroon.

"American companies that are investing heavily in Africa," Dr. Eddy points out, "are finding that the continent does not have enough educated manpower to serve their needs. The key then to the future — not just of the universities but of the nations themselves — lies in education."

Noting that probably the most critical general need is for trained faculty, Dr. Eddy cites the case of Zimbabwe, where the government took 40 young Ph.D.s from the university's staff to replace departing British officials. Again, in Swaziland, about 50 of the university's 90 faculty members are Ugandans, who are only waiting for more stable conditions to return to their homeland.

A second dominant problem is growing student unrest — much like the radical expression embraced by American students in the late '60s and early '70s.

(Continued on page 4)

Penn Staters

Dr. John C. Johnson, University research professor of acoustics and former director of the Applied Research Laboratory (ARL), has received the Meritorious Public Service Citation from the Department of the Navy.

Drs. Charles Taillie, lecturer in statistics, and G. P. Patil, professor of mathematical statistics, are co-editors of a three-volume series entitled, "Statistical Distributions in Scientific Work," published recently by D. Reidel. The books are volumes four, five and six in the NATO Advanced Study Institutes Series C, Mathematical and Physical Sciences, and constitute the Proceedings of the NATO Advanced Study Institute held during 1980 at the University of Trieste.

In addition, Dr. Patil recently presented seminars at McMaster University and the University of Toronto on his research on stochastic and statistics in marine fisheries research and management. He delivered a lecture at the University of Milan, Italy, on "Measurement of Diversity and Related Issues." On a recent trip to India, Dr. Patil chaired a session and presented a paper, "Studies in Statistical Ecology Involving Weighted Distributions," at the Golden Jubilee Celebrations of the Indian Statistical Institute in Calcutta. On the same trip, he lectured at the Universities of Bombay and Poona.

Dr. John C. Griffiths, professor emeritus of petrography, was elected a fellow of the American Association for the Advancement of Science during the AAAS Council's annual meeting earlier this month in Washington, D.C.

Dr. Richard C. Bradt, professor of ceramic science and engineering and head of the Department of Materials Science and Engineering, was one of the invited lecturers in a series of talks on materials frontiers sponsored by the Department of Materials Engineering at North Carolina State University. He discussed "The Fracture Toughness of Glasses and Ceramics, or Brittle Fracture, an Elastic Process."

Dr. Bradt also chaired a session and presented a paper at an Engineering with Ceramics meeting, sponsored by the Basic Science Section of the British Ceramic Society in London.

A critically acclaimed BBC-TV film — based on a novel by Robert C. Downes, professor of English and director of the undergraduate writing program — was shown on campus Jan. 13. Titled *Going Gentle*, the film is based on Prof. Downes' 1973 novel of the same name. It depicts the story of two terminally ill cancer patients sharing a hospital room and was the BBC's sole nominee for a 1981 International Emmy.

Dr. Peter Luckie, professor of mineral engineering and chairman of the mineral processing section in the Department of Mineral Engineering, and Dr. K. Osseo-Asare, associate professor of metallurgy, recently served as invited participants in the Indo-U.S. Workshop on Mineral Processing and Chemical Metallurgy held in Udaipur, India. The workshop was sponsored by the National Science Foundation.

Charles H. Nagin, director of management services, has been elected to a three-year-term on the board of CAUSE, the Professional Association for Development, Use and Management of Information Systems in Higher Education.

Dr. John Tilton, professor of mineral economics, presented a paper on "Material Substitution and the Demand for Tin" at the Fifth World Conference on Tin held in Kuala Lumpur, Malaysia. At the Tenth International Conference on the Unity of Science, held in Seoul, Korea, he spoke on "The Challenge for Science and Technology."

Dr. Elliot S. Vesell, professor and chairman of pharmacology at Hershey, has been named as a member of a new panel of experts in the field of geriatrics to work with the United States Pharmacopeial Convention, Inc., in developing drug-use information programs and official standards.

The Creative Achievement Medal of the College of Arts and Architecture, designed last winter by John Cook, professor of art, has been added to the collections of the American Numismatic Society in New York and to the medal and numismatic holdings of the Smithsonian Institution in Washington, D.C.

Professor Cook has also designed for the University the Faculty Scholar Medal struck in 1981 and the Mount Nittany Society Medal struck in 1980. He believes that medals should again be considered a major sculptural form.

"They are ideally suited to today's social and aesthetic needs," he contends. "Because of their amuletic qualities, their intimacy, and their ability to reach vast audiences easily, medals have an expressive capability far exceeding their physical dimensions."

Retirements

The first item on Torsten Bjälme's retirement agenda is completing the airplane he has been building in his basement for almost 10 years. Having recently sold the plane he's owned for the past 15 years, he's anxious to get the new one in the air after spending thousands of dollars and hours on it.

With the new aircraft, he'll no longer have to pay hangar rent; for it has fold-up wings, allowing him to store it in a special garage he has built for it at his home and transport it back and forth to the airport on a trailer behind his car.

He earned his pilot's license in 1946, the same year he began work as a machinist in what was then the School of Mineral Industries. Last Dec. 31, he retired as supervisor of technical services in the College of Earth and Mineral Sciences where he also served as superintendent of the College's four buildings.

Born in Kalmar, Sweden, Mr. Bjälme came to the U.S. in 1931. After his graduation from Bellefonte High School in 1939, he trained as a machinist at Sulton Engineering in Bellefonte and then at Bendix Aviation in Philadelphia. From 1944 to 1946, he served with Army Ordnance in the South Pacific.

A man of many interests, he has been an avid gun collector. He also enjoys outdoor activities, especially fishing, and is a partner in a camp in Quebec. More recently, he has become interested in photography and his retirement gift from the College's faculty and staff was a telephoto lens for his camera.

His wife, Mary Jo, a records clerk in the College of Education, plans to retire next March and then they will spend their winters in Stewart, Fla., where they recently purchased a small home. The couple has five sons, one of whom, Torsten, Jr., is a Penn State graduate and works as an accounting assistant in Pattee Library.

Mr. Bjälme

Ms. Cassidy

David Kravitz, associate professor of engineering and chairman of Mechanical Design Engineering Technology and Energy Technology Programs at Capitol Campus, retired Jan. 1.

A member of the Capitol faculty since 1967, Prof. Kravitz was among the first group of engineering faculty members to serve at Capitol. Prof. Kravitz, who holds a B.S. degree in mechanical engineering from Drexel Institute of Technology (now Drexel University), came to Capitol from Curtiss-Wright Corp.

Audrey B. Harsanyi, assistant professor of home economics in the College of Education's Division of Occupational and Vocational Studies, retired Jan. 1 after serving as a University faculty member since 1960.

25-year chair

Marie Cassidy's 25 years as a residence hall worker in Centre Halls has given her something she never had. "I always wanted a girl but never got one," she says, "so I love working with the girls."

Mrs. Cassidy feels that the people she comes in contact with everyday are an important part of her job. "I really love working with the students and I like the people that I work with. That means a lot."

And that feeling is mutually shared by co-workers and friends. "She gets along nicely with everyone," notes supervisor Marie Clink. "She's just a real pleasure to be around."

To "keep busy" and "get her mind off of work," Mrs. Cassidy is an active community member involved in the Pleasant Gap Women's Club, Logan Grange, church work and an Eastern Star member. Favorite pastimes include various craft projects and travelling south to her native Florida to forget the chill of Centre County's winter.

The proud mother of two sons, Harold and Edward, and grandmother to five grandchildren, Mrs. Cassidy lives with her husband, Leon, in Pleasant Gap.

Promotions

Staff Exempt

Curtis L. Hughes to assistant extension agent in Agriculture.
Charles Houser to supervisor of technical services in Earth and Mineral Sciences.
Woodrow Kling to assistant supervisor, technical services in Earth and Mineral Sciences.
Paul B. Rebarhak to coordinator, farm, greenhouse and turf plots in Agriculture.

Clerical

Vera Carson to secretary B in Earth and Mineral Sciences.
Linette K. Courtney to secretary B in Foreign Studies.
Earl Davis to secretary C in Continuing Education.
Anna Marie Ediger to secretary B at Capitol.
Melody P. Heckman to insurance clerk in Controller's Office.
Tamera Korman to correspondence typist A in Health, Physical Education and Recreation.
Elizabeth A. Lass to secretary C in Engineering.

Carol Ann Sonnier to secretary B in Science.
Doris A. Vickroy to secretary B at Hershey.
Christine Wilson to secretary B in Engineering.

Technical Service

George R. Atticks to maintenance worker, utility at Capitol.
Thomas I. Cox to operating mechanic in Physical Plant.
Mary Lou D. Ishler to food preparer B in Housing and Food Services.
Gary St. Clair to senior operating mechanic in Physical Plant.

Calendar report

The Calendar Conversion Council will review an executive summary of its Summer Session Committee report at its Feb. 3 meeting before forwarding the summary to President Oswald.

The committee, chaired by Henry J. Hermanowicz, submitted to the Council a comprehensive report which examines the purpose of the summer session, student population to be served, tuition structure, faculty compensation system, budget structure, and administrative arrangements.

In other business, the Council reported that deans of the colleges at University Park have indicated a preference for the FLEX 83-C schedule in meeting their program requirements. The schedule will be used in developing the Facilities/Faculty/Program Match project.

Council also:
— announced appointment of a Communications Committee, which will hold its first meeting Jan. 22;
— approved a report from its Faculty Contracts Committee and forwarded it to President Oswald;

— noted that staff members have been discussing calendar concerns with students and are available to meet with any University groups desiring information on the conversion process.

Obituaries

Egon Gartenberg, who joined the faculty at Mont Alto in 1970, retiring as an associate professor of music in 1976, died Jan. 9. He was the author of three books. *The Composer Mahler, Vienna: Its Musical Heritage and Johann Strauss: End of an Era.* His last book, *Daumier*, will appear later this year.

Frederick A. Hussey, an associate professor of administration of justice, died Jan. 12. He was 39. A member of the faculty since 1972, Dr. Hussey held a doctor's degree from Brandeis. Co-author of the book, *Probation, Parole and Community Field Services: Policy, Structure and Process*, he was coordinator of the field experience for his program.

James H. McKelvey, a painter with Physical Plant from 1960 until his retirement in 1972, died Jan. 10 at the age of 76.

Nancy A. Rosenblatt, a part-time lecturer in the Department of History from 1966 to 1981, died Jan. 10 at the age of 46. A Berkeley Ph.D., Dr. Rosenblatt was a specialist in modern European history.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University. USPS 351-170

Jan. 21 - 31 Special Events

Thursday, Jan. 21
Industry-University Cooperative Program in Recombinant DNA Technology Lecture. 10 a.m., 112 Kern. T.H. David Ho, Univ. of Illinois, on "Plant Molecular and Cellular Biology."
Museum of Art lecture, 10:30 a.m. Elaine Dee, Smithsonian Cooper-Hewitt Museum, on "Oppenheimer: Marchionni and the Accademia di San Luca."
Liberal Arts Faculty meeting, 3 p.m., 101 Kern. Kern Classics, "Funny Girl." 7 and 9 p.m., 112 Kern.

Friday, Jan. 22
Board of Trustees meeting, Faculty Bldg.
Penn State Conference on General Education.
Five concurrent panels, 1-5 p.m., Keller Conference Center. Keynote address, 8:30 p.m., Schwab Auditorium. Speaker, Harlan Cleveland, director, Hubert H. Humphrey Institute of Public Affairs, Univ. of Minn., on "Shouldn't We Also Be Educating for Wisdom?"
Sports: Gymnastics (women) vs. Florida, 8 p.m.

Saturday, Jan. 23
Board of Trustees meeting, Faculty Bldg.
Penn State Conference on General Education.
Four concurrent panels and plenary panel, 9 a.m.-12:30 p.m., Keller Conference Center.
Faculty Women's Club Midwinter Coffee, 9-11:30 a.m., Museum of Art.
Cross-Country Ski Workshop for Beginners, Shaver's Creek Environmental Center, 10:30 a.m., Stone Valley.
France-Cinema, Truffaut, *The Last Metro*, 7 and 9 p.m., 112 Kern. Also Jan. 25.
Owl Prowl, Shaver's Creek Environmental Center, 7:30 p.m. Information: 238-5872.
Sports: Bowling, Penn State Lion's Pride Invitational, also Jan. 24. Gymnastics (men and women) vs. Ohio State, 8 p.m.

Sunday, Jan. 24
Cross-Country Ski Workshop for Advanced Skiers, Shaver's Creek Environmental Center, 2 p.m., Stone Valley.

Monday, Jan. 25
Sports: Basketball vs. Syracuse, (women) 6 p.m., (men) 8:10 p.m.

Tuesday, Jan. 26
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.
Nickolas Grace, Royal Shakespeare Company, on "The King's Two Bodies: An Actor's View of Richard II."
English Dept. Colloquium, 8 p.m., 112 Kern.
Workshop on Shakespearean scenes (related to Saturday night Artists Series performance), Royal Shakespeare Company actors.

Wednesday, Jan. 27
Instructional Development Workshop.
"Communication Strategies that Help Motivate Students," 9:30-11 a.m., 305 HUB.
Artists Series, ACTER/Actors from the Royal Shakespeare Company, *Under Milk Wood*, 8:30 p.m., Schwab Auditorium.
Sports: Basketball vs. Temple, (women) 6 p.m., (men) 8:10 p.m.

Thursday, Jan. 28
Instructional Development Workshop.
"Communication Strategies that Help Motivate Students," 3:40-5 p.m., 305 HUB.
Royal Shakespeare Company public lecture, "Who's Afraid of the Sonnets?" 4 p.m., 105 Forum.
Kern Classics, "Support Your Local Sheriff," 7 and 9 p.m., 112 Kern.

Friday, Jan. 29
Museum of Art lecture, 5 p.m. Tod Marder, Rutgers Univ., on "Bernini's Pantheon at Arcadia."

Five RSC actors will participate in week residence

Five distinguished actors from the Royal Shakespeare Company will be in residence at the University Jan. 25 through Jan. 30.

During its residency the Company will present three evenings of theatre: *Under Milk Wood* (Wednesday, Jan. 27), *Shakespeare Lady: The Life and Times of Fanny Kemble* (Friday, Jan. 29), and *Love, Love, Nothing But Love* (Saturday, Jan. 30).

All performances will be held in Schwab Auditorium at 8:30 p.m., under the sponsorship of the Artists Series.

Under Milk Wood, a play for Voices is Dylan Thomas' last completed work. In keeping with the original design of the play, four actors will recreate in a dramatic reading the dreams, memories and daily lives of the inhabitants of a Welsh village.

Shakespeare Lady: The Life and Times of Fanny Kemble is a fully costumed production devoted to the letters, diaries and many of the Shakespearean roles played by one of the most remarkable Shakespearean actresses of the 19th century.

The residency concludes on Saturday evening with *Love, Love, Nothing But Love*. As the title suggests, this is an evening of scenes from Shakespeare's best known plays on the theme of love.

The actors in residence at Penn State are Nickolas Grace, William Homewood, Estelle Kohler, Edwin Richfield and Susan Tracy.

Nickolas Grace, who has been with the Royal Shakespeare Company for many years, most recently appeared at the Edinburgh Festival in a new production of *Candida*. William Homewood is a published poet and composer, and his musical, *The Siege of Masada*, was performed in 1980 in West London.

Estelle Kohler has been a leading actress with the Royal Shakespeare Company for more than ten years, performing many roles in Stratford and at the Aldwych. Edwin Richfield has stage, film and television credits. Susan Tracy, who began her career in repertory at the Victoria Theatre in Stoke-on-Trent, is also seen frequently on British television.

Tickets to all three performances are now on sale at Eisenhower Auditorium box office, weekdays from 9 a.m. to 4 p.m. Phone orders on MasterCard/Visa will be accepted at 863-0255 during sale hours.

The Royal Shakespeare Company actors in residence at University Park will participate in four programs open to the

public, in addition to meeting with classes.

This part of their residency is sponsored by the Institute for the Arts and Humanistic Studies.

"The King's Two Bodies: An Actor's View of Richard II" will be the subject of Nickolas Grace in a 30-minute talk at the Comparative Literature Luncheon on Tuesday, Jan. 26, at 1 p.m. in Room 204 HUB. Those wishing lunch should appear at 12:15 p.m.

Tuesday evening at 8 p.m., The English Department Colloquium will be devoted to a workshop on Shakespearean scenes, related to the Saturday night performance of *Love, Love, Nothing But Love*. All of the actors will participate in this workshop.

A public lecture on Shakespeare, "Who's Afraid of the Sonnets?" will be presented by William Homewood on Thursday, Jan. 28, in Room 105 Forum. This lecture will be open to students in area public schools.

The final event is a symposium sponsored by the English Department on "Shakespeare in the Modern Theatre." The five RSC actors will discuss and demonstrate various trends in producing Shakespeare on Saturday, Jan. 30, from 10 a.m. to noon in Room 112 Kern.

France-Cinema, Kurosawa, *Kagemusha*, 6:30 and 9 p.m., 112 Kern. Also Feb. 1.
Artists Series, ACTER/Actors from the Royal Shakespeare Company, *Love, Love, Nothing But Love*, 8:30 p.m., Schwab Auditorium.

Sports: Fencing (men) vs. Army and Wm. Patterson, 11 a.m.; Bowling vs. Howard, 1 p.m.; Basketball (women) vs. Seton Hall, 2 p.m.; Swimming (men) vs. Ohio State and Cleveland State, 2 p.m.; Volleyball (men) vs. Army, 2 p.m.; Wrestling vs. Navy, 8 p.m.; Ice Hockey vs. Green, 8 p.m.

Sunday, Jan. 31
Cross-Country Ski Workshop for Beginners, Shaver's Creek Environmental Center, 2 p.m., Stone Valley.
Sports: Swimming, Penn State Diving Invitational, Volleyball (men), Nittany Lion Invitational, 9 a.m.; Bowling vs. Temple, 1 p.m.; Wrestling vs. Maryland, 2 p.m.

Seminars

Thursday, Jan. 21
Chemistry, 12:45 p.m., 333 Whitmore. Albert I. Meyers, Colorado State Univ., on "New Asymmetric Carbon-Carbon Bond Forming Reactions."
Physics, 3:50 p.m., 445 Davey. C. Patel, Bell Labs., on "Tuned Optoacoustic Spectroscopy of Condensed Matter."
Agronomy, 3:55 p.m., 111 Tyson. Daniel Kniel, agronomy, on "Reproductive Development in Maize: Texas Style."

Friday, Jan. 22
Analytical Chemistry, 11 a.m., 333 Whitmore. Joe Yakupovich on "Electrochemistry of Polysulides."
Geography, 3:45 p.m., 319 Walker. Warren Robinson, economics, on "The Apocalyptic Vision of Homer Ixus: A Neglected Early American Political Geographer."

Monday, Jan. 25
Aerospace Engineering, 4 p.m., 232 Hammond. L. Michael Freeman, Mississippi State Univ., on "A Solution of the Incompressible Two-Dimensional Navier-Stokes Equations

for Flow Over and Airfoil Using an Adaptive Grid."

Entomology, 4 p.m., 204 Patterson. Edgar D. Eckes, director, USDA, APHIS, PPQ, on "The California Med Fly Eradication Project."

MC3B, 4 p.m., 101 Althouse. George Weinbaum, Dept. of Pulmonary Diseases, Albert Einstein Medical Center, on "The Role of Proteases in the Development of Emphysema."

Tuesday, Jan. 26
MC3B, 11 a.m., 101 Althouse. George Weinbaum, Dept. of Pulmonary Diseases, Albert Einstein Medical Center, on "The Role of Proteases Inhibitors and Other Defense Mechanisms in Preventing Emphysema."

Ag Greenhouse, 2:20 p.m., 301 Ag. Adm. Dave Sheilar, entomology, on "Animal Pest Management in the Greenhouse."

Water Pollution Control, 2:20 p.m., 271 Willard. Bruce Morton, Univ. of Connecticut, on "Septage Treatment and Groundwater Quality Relationships."

Geosciences, 3:45 p.m., 22 Deike. J.C. Griffiths, petrology, on "Geologic Similarity by Q-Analysis."

Plant Pathology, 3:55 p.m., 213 Buckhout. Daniel Small on "Fabricius-Classic #1."

Biomechanics-Industrial Management Systems Engineering, 4 p.m., 216 Hammond. Andris Freivalds, industrial engineering, on "Use of Biomechanical Strength Models for Industrial Job Analysis."

Materials Science, 4 p.m., 112 Walker. P. McMarr on "Spectroscopic Ellipsometry — A New Materials Characterization Tool." U. Pal on "Kinetic Studies on Liquid Slags Containing PbO."

Wednesday, Jan. 27
Physiology, 4 p.m., 121 Noll. Seymour Abpert, professor of applied physiology, Univ. of New Mexico, on "The Two-Reservoir Model for Human Energy Storage and Exchange."

Thursday, Jan. 28
Chemistry, 12:45 p.m., 333 Whitmore. John T. Herron, Nat'l. Bureau of Standards, on

"The Chemistry of the Criegee Intermediate."

Music, 1 p.m., Music Bldg. Recital Hall. Anthony Walls on "Compositional Technique and Compositional Thought in the String Quartets of Haydn."

Physics, 3:50 p.m., 445 Davey. J. Tucker, Univ. of Illinois, on "Quantum-Limited Response of Non-Linear Tunnel Junctions."

Agronomy, 3:55 p.m., 111 Tyson. Todd Campbell on "Modeling Competition Between Corn, Yellow Nutsedge, and Velvetleaf." Doug Breda on "Interaction of Three Trifurges Species."

Friday, Jan. 29
Analytical Chemistry, 11 a.m., 333 Whitmore. Kathy Perry on "Recent Developments in Capillary Columns for HPLC."

Geography, 4 p.m., 319 Walker. Don Leon, architecture, on "The Pennsylvania Courthouse Project."

Exhibits

Chambers Gallery: Group Show, Graduate Art Education Studies, through Jan. 28.

Museum of Art: Mused Mondays, 11 a.m.-4:30 p.m. Closed Mondays. Tours, Sundays, 1:30 p.m.

Danish Ceramic Design, through Jan. 24. Architectural Fantasy and Reality, Drawings from the Accademia Nazionale di San

Lucain, Rome.

American Paintings Before World War II, from the permanent collection.

Pattee Library: Rare Books Room: The Academy of St. Luke, Rome: Architectural Treatises and Perspective Books.

Second Floor, East Patten: Slavic Books, through Jan. 25; Jim Adams, ceramics, through Jan. 26.

East Corridor: James Abbott, photography. Lending Services Gallery: Ruth Kemper, recent works, through Jan. 26; Rebecca Ostels, open, Jan. 26.

Visual Arts Bldg., Zoller Gallery. Architectural Drawings/Alpha Rho Chi, through Jan. 24.

Faculty/Staff Alerts

Major Medical claims due by March 31

March 31, 1982, is the last date on which The Prudential Insurance Company will accept charges for a 1981 major medical claim for University employees or their dependents. A major medical claim is established if an employee reports \$100 of eligible, out-of-pocket medical expenses incurred during the calendar year 1981.

Charges that are acceptable for major medical claim include doctors' office calls, prescribed drugs, private duty nursing (if medically necessary), local ambulance services, oxygen, physiotherapy, insulin and special equipment and appliances. Among charges not covered are routine physical exams, dental work, eye exams and lenses.

Hemized receipts should be obtained for eligible charges and submitted to The Prudential with a claim form. In order to

avoid delay of payment by the insurance company, all questions in the employee's section of the claim form should be fully completed. Cancelled checks and cash register receipts are not acceptable evidence of charges incurred.

Claim forms and additional information on how to report a major medical claim are available at the Employee Benefits Division, Room 133 Willard Building, the Business Offices at locations other than University Park, and the Personnel Office at the Hershey Medical Center.

Address card needed by foreign nationals

Annually during the month of January all foreign nationals including those with permanent resident status are required by law to complete a special address card to be sent to the Immigration and Naturalization Service. This annual address form is different from the regular change of address form aliens are required

to prepare periodically and must be prepared and submitted even though the alien may have recently submitted a normal change of address notice.

The special forms can be obtained at the Post Office and directly from the Immigration and Naturalization Service. The normal procedure is that the alien completes the card and returns it to the Post Office for delivery to the Immigration and Naturalization Service.

If they follow their regular pattern, the Immigration and Naturalization Service will place notices in local newspapers reminding aliens that they must complete the annual address forms and that rather harsh penalties do exist for failure to comply with the form. The annual address forms are available at the Post Office only until Jan. 31. Therefore, it is essential that the aliens take action during January. After Jan. 31 the forms can only be obtained from the Immigration and Naturalization Service and the alien will be required to explain why the address form was not filed as specified.

Dr. Eddy visits African universities

(Continued from page 1)

"African students are rebelling against unfulfilled promises made by the new post-colonial governments," Dr. Eddy explains. A single example suffices. The Africans in Zimbabwe still live in compounds; the principal difference now that the British have left is that the gates aren't locked at night.

Governments tend to deal with unrest by shutting down the universities and sending the students back to their tribal villages. Sometimes this has unexpected results. When the University of Nairobi was closed, its students campaigned from village to village and in the next election, three leading government ministers were defeated.

Still a major problem is how to keep young nations from using their universities to serve a particular political purpose of the government or dictator in power.

"Many of the administrative posts within the university are regarded as political plums," Dr. Eddy observes. "On occasion one can turn on the radio at noon for the national announcements and hear that four deans — or even the chancellor or vice chancellor — have been replaced. That's how the persons affected hear about it, too."

Travelling through Africa, Dr. Eddy found much to remind him of what Penn State must have been like in the 1870s — a hardy group sitting out in the middle of a valley trying to keep a university alive and encouraging each other in research and scholarship. This kind of isolation engenders a strong sense of cooperation rather than competition. When an individual learns something, he feels an immediate obligation to share it with the community because he is a part of a community that needs to stand together. "Our land-grant concept is something that speaks to African scholars," Dr. Eddy continues, "because both their universities and their nations are young, and they can grow together. Coming out of a colonial past, they have patterned their universities on French, British and Belgium models, which have strong, almost unshakable traditions of what to learn and exactly how to learn it. The Africans to whom I talked were attracted immediately by the idea that higher education could be shaped to meet the needs of the people as well as the needs of a particular time period."

Utilizing the groundwork that has been laid by the University's Office of Foreign Studies and several of the academic colleges during the past few years in Africa, Dr. Eddy believes that Penn State's major contribution should be the strengthening of the intellectual life in African universities through faculty and student exchanges.

"The thirst for knowledge of a high quality is so great in Africa that it can be met in part by even small doses of contact and exposure," he says, adding:

"We need also to provide assistance with administrative and managerial skills. At one university I visited, the chancellor told me that he has to come to his office each evening and personally opens and answers every piece of mail for the university."

Dr. Eddy concludes:

"Before we left for Africa, all the experts who saw our schedule told us we would never be able to adhere to it, that Africans don't keep to schedules, that their planes are impossibly late and sometimes don't even fly."

"I'd like to report that we made every meeting which had been planned and that of all the airlines we flew, only one was very, very late — the line, U.S. Air."

Engineering, Science, Business applications soaring

(Continued from page 1)

Colleges show a great deal of fluctuation between 1981 and 1982. Engineering registered a 35 percent increase in offers systemswide, much of it at the Campuses because of space limitations at University Park. Business Administration was up 18 percent and Science, 34 percent, and both of these Colleges showed a dramatic increase in Campus offers.

"Although the University does not admit by major, we think that the increase in Science may be due largely to the growing interest in computer science," Dean Dickason observes.

Earth and Mineral Sciences had a 67 percent increase. "Their offers at University Park rose from 118 to 238," Dean Dickason says. "About half of these were to students who could not be accommodated in Engineering. By steering them to E&MS, we saved them from Penn State."

Colleges with a decline in the number

of their U.P. offers are Agriculture, Arts and Architecture, Education, and Health, Physical Education and Recreation. However, at the Campuses, Ag, A&A and HPER increased their offers over last year, as did Human Development, Liberal Arts and DUS. The last three Colleges registered small gains at University Park as well.

What does the future hold for Penn State's enrollment?

Dean Dickason has a chart ready. Based on figures from the State Department of Education, the number of Pennsylvania high school graduates continuing on to college dropped from 81,000 in 1975 to 75,500 in 1981. While the yearly declines have been gradual, by 1986, a figure of 61,000 is projected.

"Historically, about 30 percent of all college-bound high school seniors apply to Penn State's baccalaureate and associate degree programs," Dean Dickason points out. "Since we know that the total pool is

declining, we must increase the percentage of those applying to the University. On the other hand, between 1975 and 1981, the number of our out-of-state applicants rose from 3,500 to 7,500; so while we have held our own within the State, we have gained outside its boundaries.

"During the current year, we estimate we will have made about 678,000 student contacts, sent out 175,000 applications and captured 40,000 applications for the year."

At this point, it is still too early to estimate the number of "paid accepts" the University will receive. They are well ahead of last year, according to Dean Dickason, but "the offer cycle has been so much different that year-to-date comparisons are currently worthless."

"One thing I am certain of after many years of watching the annual admissions fray, however, and this is that anyone who is in the business needs a high tolerance for ambiguity."

New director

(Continued from page 1)

will report — Robert Patterson, senior vice president for finance and operations, and Dr. Karl Stoedafke, acting dean of the College of Health, Physical Education and Recreation.

"We are fortunate to have Mr. Tarmann on the staff to assume the responsibilities as athletic director; a position he has worked in very closely with Mr. Paterno," Dr. Oswald added. "Mr. Tarmann has done an absolutely first-rate job in performing his responsibilities."

Under Mr. Tarmann's leadership, the Intercollegiate Athletic Department will remain part of the College of Health, Physical Education and Recreation. The athletic director of the department will report to:

— the Senior Vice President for Finance and Operations for fiscal, organizational, personnel, contractual and other policy matters;

— the Dean of the College for all academic related matters such as the academic duties and progress of the coaching staff, the academic integrity of the intercollegiate program (for example, admissions, eligibility, etc.) and relations with the University faculty; and

— both officers on matters relating to facilities and their usage.

Mr. Tarmann has been a Penn State employee for 23 years, serving in sports information, public relations, operations and management.

A 1952 honors graduate of Gettysburg College, he is a member of Phi Beta Kappa and a trustee of the college. He also is a member of the College Sports Information Directors of America Hall of Fame.

Staff Vacancies

The following vacancies for positions classified as staff exemplify a staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in these positions may apply by calling the Employment Division, 665-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Jan. 28, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PF-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

HISTOPATHOLOGY TECHNOLOGIST, COLLEGE OF AGRICULTURE, UNIVERSITY PARK Responsible to Department of Veterinary Science faculty supervisor for the selection, preparation and maintenance of animal tissue samples for diagnostic testing. Instruct and direct technicians, staff members and students in histologic techniques. Prepare variety animal tissue for the histopathology preparative laboratory, to include cutting, fixation, dehydration, embedding and microtomy for both light and electron microscopy. Stain tissue preparations employing tissue stains, special chemical strains and immunohistochemical procedures for fluorescent and antibody evaluation. Operate and maintain equipment such as microtome and knives, ultramicrotomes, autoclaves, various ultracentrifuges, etc. Associate degree (or equivalent) and American Society of Clinical Pathologist Histotechnologist Registration, plus one to two years of effective experience.

PHOTODUPLICATION PRINTER, COMMONWEALTH EDUCATIONAL SYSTEM, UNIVERSITY PARK Responsible for the operation of the black and white printing dark room, including the coordination of processing and printing functions, quality control and supervision of the print room employees. Produce quality photographic reproductions from original negatives and client submitted negatives. An associate degree or equivalent in photography or related field,

plus one to two years of effective experience. A portfolio or other demonstration of competency is required.

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interest known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Assistant Food Supervisors	Housing and Food Services
Computer Operators	Intercollegiate Research Programs
Skilled, 8 a.m.-4:30 p.m. 4:30 p.m.-1 a.m. 12-8 a.m.	
Programmers	Management Services
Research Aides	College of Agriculture
Cardiology Technicians	Hershey
Clinical Laboratory Assistants	Hershey
Clinical Laboratory Technologists (HEW)	Hershey
Critical Care Monitoring Technicians	Hershey
(Jr., Sr., Levels)	
Cyto-Technologists	Hershey
Licensed Practical Nurses	Hershey
Medical Technologists	Hershey
(ICLA, MLT, CLT, HEW)	
Nuclear Medical Technicians	Hershey
Perfusionists	Hershey
Pharmacists	Hershey
Physical Therapists	Hershey
Physician's Assistants	Hershey
Psychiatric Assistants	Hershey
Radiology Technicians	Hershey
Research Technicians	Hershey
(Jr., Sr., Levels)	
Respiratory Therapy Technicians	Hershey
Staff Nurses	Hershey

Penn State Intercom

Trustees select Conti and Book

Walter J. Conti, owner and operator of Conti's Cross Keys Inn in Doylestown, Bucks County, has been elected president of the University's Board of Trustees. Edward R. Book, chairman and chief executive officer of Hershey Entertainment and Resort Company (HERCO) Inc., Hershey, was named vice president. Both were elected to one-year terms. Mr. Conti succeeds Quentin E. Wood, president and chief executive officer of the Quaker State Oil Refining Corp. of Oil City. Mr. Wood had served three terms and did not seek re-election. Mr. Book succeeds Mr. Conti, who has been vice president of the Board for three years.

Mr. Conti is president of the National Restaurant Association. He serves on the Pennsylvania Governor's Council on Physical Fitness and Sports and as a director of Big Brothers of America. In 1980, he was a delegate to the White House Conference on Small Business. While a Penn State student, Mr. Conti was president of Kappa Sigma fraternity. Since graduating in 1952, he has been active in alumni affairs. He is a charter member of the Penn State Club of Bucks County and also serves on its board of directors.

He has been an area chairperson for the Penn State Alumni Fund and a "Penn State Drummer." He is a member of the Nittany Lion Club and the advisory council of the University's Levi Lamb Fund.

Conferees begin discussions on role of general education in today's curriculum

Five administrators and faculty members provided an intellectual and historical context for the subject of General Education as Penn State's two-day conference on this topic opened Friday afternoon.

Speakers were University Faculty Senate Chairman Nancy M. Tischler, President Oswald, Provost Eddy, Liberal Arts Associate Dean Arthur O. Lewis and Capitol Campus Provost/Dean Theodore L. Gross.

Dr. Tischler, professor of English and humanities at Capitol, convened the session in a crowded Keller Conference Center Auditorium. She told the 250 delegates that the Conference addresses an urgent need at Penn State, "since breadth, in many ways, is our most challenging concern." The conclave, she noted, "allows us to talk about the menu, without actually cooking the meal."

In his talk, Dr. Oswald acknowledged the appropriateness of having members of the Board of Trustees Committee on Educational Policy meeting with faculty members and administrators during the Conference.

"When I first proposed this Conference," he said, "I felt it was absolutely essential that the Faculty Senate, representing the faculty, the Provost's Office, representing academic administration, and the President's Office, covering the total educational thrust of the University, each be involved in its development; and I was determined that whatever we did would broadly involve the entire University in all of its programs and campuses."

Noting the cyclicity of the general education issue in academe, Dr. Oswald advised Conference delegates to use two words — breadth and depth — as touchstones in their deliberations.

"By breadth in education," he said, "I have reference to the educated individual who is widely informed, is better able to use natural wits in interconnecting

thoughts and concepts, reaching more logical answers, and concerned with a breadth of issues."

He also acknowledged the importance of depth in the educational experience.

"The concept of depth . . . can relate to the student's preparation for his professional career, his first job, and serve as the foundation for the unfolding of his lifetime contribution to the society which sustains him. However, I think we will all agree that it is the *breadth* of his educational experiences which prepares him for his fourth, fifth or sixth job and for the adaptation to change and new direction with which he or she will be faced."

He said that general education must be thought of as "more than service courses, more than efforts to make better architects or teachers. Our educational mission at Penn State . . . must have a concern for better people — more productive, more inventive, more conciliatory, more comprehending."

"I am sure we do not want to confound this Conference with a *plan* for general education at Penn State," he continued, "but Penn State, as must all similar institutions, should assure that the breadth of general education is sufficiently

high in its priority as an educational mission."

"Some will take issue with the concern implicit in this Conference; some will take the position that nothing needs to be done. But we are considering this issue at a propitious time as we move toward our calendar change and the opportunity inherent for a fresh view of content and mission."

He reminded that "we educate not for some small stage or for one brief decade. What we do here at Penn State is woven into the warp of our nation for generations."

Concluding, Dr. Oswald commended the stated issues of the conference to delegates:

- What common learning is essential?
- Does the student with a general education bear a distinctive mark?
- To what extent can the liberal arts and sciences be related to the professions and result in an education pertinent to the contemporary world?

— Can a greater synthesis between the objectives of general education and career aspirations be realized so that the student is adequately prepared for graduate and professional school as well as the world of

International education must permeate general education, Dean Paulson says

The "international imperative" was the topic of an address by Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, at the Friday evening meeting of the Conference.

Dean Paulson agreed at the last minute to act as a substitute for the scheduled Conference keynote, Dr. Harlan Cleveland, who was stranded in Minneapolis by the weather.

Pointing out that the content of basic education must shift with the times, Dean Paulson said that "what is basic in our

time is the need for international competence. . . . International education must permeate general education at the University because all citizens have to confront a new world reality in ways they have never done before."

"International competence is essential to our economic, physical, social and cultural survival," Dean Paulson warned, noting that the American economy is linked to that of the world as never before. In Pennsylvania, for example, one

Penn Staters

Dr. Parris Chang, professor of political science, made an invited presentation on "China's Modernization and Foreign Policy" in a panel on "International Relations in East Asia," held in December at Tokyo University of Foreign Studies. On Jan. 11, Dr. Chang gave an invited talk on "China's Leadership and Political Developments" at the National War College in Washington, D.C.

In addition, his monograph, "Elite Conflict in Post-Mao China," was published in December by the University of Maryland Law School's Occasional Papers Series in Contemporary Asian Studies.

Provost Edward D. Eddy is the author of an article, "Higher Education Axioms for the Eighties: What should be higher education's basic concerns for this decade?" The piece appears in the Winter issue of *Educational Record*, published by the American Council on Education.

Dr. Thomas A. Hale, associate professor of French and comparative literature, has been named chairman of the Division on French Literature Outside Europe of the Modern Language Association. Dr. Hale previously served the Division as a member of its Executive Committee.

Dr. Linda W. Craighead, assistant professor of education in the Division of Counseling and Educational Psychology, has received the 1981 New Researcher Award from the Association for the Advancement of Behavior Therapy. Her award-winning study, "Behavior Therapy and Pharmacotherapy of Obesity," was co-authored by Albert J. Stunkard, M.D., of the University of Pennsylvania, and Richard M. O'Brien, Ph.D., of Hofstra University. It was published in the July 1981 issue of the *Archives of General Psychiatry*.

Dr. Luis F. Gonzalez-Cruz, professor of Spanish at New Kensington, has received an award from the *Journal Revista Chicano-Riquena* for his short story, "Lazaro volando." The story, published in a special anthology of "Latino Fiction," depicts the final days of Batista's regime and the arrival in Havana of Castro's forces.

Dr. Gonzalez-Cruz's poem "Albor" has also been included in an anthology published by Ediciones Solar of Miami as an "Homage to Angel Cuadra," the Cuban poet currently imprisoned in his homeland.

Paul W. Welliver, professor of education in the Division of Curriculum and Instruction, is the recipient of the Pennsylvania Learning Resources Association's 1981 Eero Davidson Memorial Award. The award is presented to a member of the Association for outstanding accomplishment in communications.

James Garbarino, associate professor of human development, is co-writer of a film that won a Silver Award at the recent International Film and TV Festival of New York. His work, "Don't Get Stuck There," is a 14-minute, 16 millimeter documentary about abused adolescents. The film was produced by the Boys Town Center in Nebraska in cooperation with Face-to-Face Health and Counseling Service of St. Paul, Minn.

Dr. Robert D. Shipman, professor of forest ecology, received the Award of Merit of the Northeastern Weed Science Society at the organization's recent annual meeting in New York City.

Wolfgang E. Meyer, professor emeritus of mechanical engineering, was recently elected a Fellow of the Society of Automotive Engineers (SAE).

Ms. McCutcheon

Retirements

Hazel J. McCutcheon believes the secret to enjoying life is learning and growing, and it was with the philosophy that "every end is a new beginning" that the Osgontz Campus associate librarian looked forward to her Dec. 31 retirement.

In 1960 Ms. McCutcheon joined the Osgontz staff after having gained experience at the Free Library in Philadelphia and as a teacher in both public and private schools. She earned a bachelor's degree and a master's in education, with a mathematics major, from the University of Pennsylvania. Later she earned a master's degree in library science at Drexel.

During her tenure as head librarian at Osgontz, she was instrumental in the planning and development of the three-story library facility, completed in 1971.

In retirement, she hopes to pursue her interest in oil painting, music, calligraphy, sewing, crafts, and even yoga, and especially looks forward to newfound time to read — for in her own words "there's so very much to know."

The old adage, "a jack of all trades and a master of none," certainly doesn't apply to Harold E. Rudy. He should more appropriately be referred to as a "master of trades" after his years of experience as supervisor of trades in Physical Plant. Mr. Rudy not only celebrated his retirement toward the end of 1981 but also his 25-year award for University service.

His Penn State career began in 1956 as a foreman in the Sheet Metal Shop, where he was involved with laying out and estimating work, contacting customers and supervising construction. He advanced to supervisor of trades in 1974, assuming responsibility for the supervision of work crews, new construction, installations, remodeling and maintenance of existing systems.

"Harold Rudy supervised most of our trade crews at one time or another," notes Don Roté Jr., supervisor of trades. "He always responded no matter what the problem or what time of day it was; even at 2 or 3 a.m., he was there. He was also a very well-liked employee. He got along with everyone with whom he came in contact."

Residents of Boalsburg, Mr. Rudy and his wife, June, have one son, Gerald, who graduated from Penn State in 1972 with an associate degree in hotel administration.

James R. Weaver recently left a job many would have given their eye tooth — or rather their "sweet tooth" — to have. As production supervisor of Creamery Products, he retired Jan. 1 after what he calls, "38 really nice years."

Mr. Weaver's long career reflects a lot of experience in the dairy field. In 1941, he began his service as a laborer in the dairy barns where he worked until 1943. Two years later, he returned to the Creamery as head bottler in the milk room. In 1947, he was promoted to the enviable position of ice cream maker in the ice cream room, where he worked computing mixes and flavoring ice cream. After ten years in that job, he assumed his present position as production supervisor.

James Weaver is one of five brothers who have worked or are working for the University. Although three of the family members are retired, one brother, Don, is currently employed at the Services Building. In addition, two of Mr. Weaver's sons are Penn State grads. John received his doctorate in food science in 1977, and Gary earned a master's degree, also in food science, in 1976.

A Spring Mills resident since 1946, Mr. Weaver and his wife, Ruth, are looking forward to travelling during his retirement.

For Leda Brobeck, Jan. 1 means not only the start of the new year but a new lifestyle of "just taking it easy." After 34 years of University employment, Mrs. Brobeck won't find it hard to fill her retirement days. "Whenever I find something I like, I do it," she says. She enjoys knitting and crocheting, working quilts by hand, and plans to travel to Colorado to visit her brother and to Arizona to see a niece.

Starting in 1948, Mrs. Brobeck worked in the College of Agriculture, first as a stenographer in Ag. Extension and later in the Department of Dairy Science. In 1962 she moved to Earth and Mineral Sciences as secretary to Dr. Howard Palmer, then head of fuel science. Three years later, she assumed secretarial duties in the Mineral Constitution Lab.

Mrs. Brobeck lives in Pleasant Gap and has three sons, William Earl, Kenneth Barry, and Richard Allen.

Reuben W. Adams, a residence hall project worker with Housing and Food Services since 1971, retired Jan. 26.

Mary M. Cramer, a guest room attendant at the Nittany Lion Inn since 1972, will retire Jan. 31.

Esther M. Hawkinson, a secretary in the Office of the Vice President for Research and Graduate Studies, will retire Feb. 1. She was a member of the staff from 1948 to 1952 and from 1971 to 1982.

Promotions

Staff Exempt

M. Patricia Burns to programmer in Management Services.

Staff Non-Exempt

Barbara J. Horvath to research technician at Hershey.

Debra L. Riley to research technician at Hershey.

Clerical

Marian R. Blair to secretary B in Agriculture.

Kathleen P. Houser to secretary C in Agriculture.

Diane S. Kemmerer to customer service clerk A in Bookstore.

Millie J. Landis to secretary B at Capitol.

Technical Service

James F. Sosa to maintenance worker (general) B at Hazleton.

Fusarium: Diseases, Biology and Taxonomy, edited by P.E. Nelson, T.A. Toussoun and R.J. Cook. 457 pages. \$39.50.

Fusarium has been known to science for over 165 years. Work in almost every discipline of biology — including genetics, physiology, pathology, anatomy, ecology, soil science and plant breeding — has been done on this genus; yet Fusarium diseases continue to be among the most important plant diseases and are a more significant factor in agricultural production now than at any time in the past.

This volume brings together in 40 papers by 60 authors what is currently known about the pathology, ecology, genetics, cytology, physiology, biology and taxonomy of this genus. Each area is covered by several experts.

The editors are Paul E. Nelson and T.A. Toussoun, both professors of plant pathology at Penn State, and R.J. Cook, a member of the USDA Cereal Disease Laboratory at Washington State University.

Three other faculty members from the Department of Plant Pathology, contributed to the book: Professor Herbert Cole, Jr., Associate Professor Stanley P. Pennypacker, and Research Associate Patricia L. Sanders. A fourth member of the department wrote the Foreword — President John W. Oswald.

In his foreword, Dr. Oswald notes that during the nurturing of this book, he was "the one individual in whom all the strains of connection come to focus."

As a graduate student at Berkeley, Dr. Oswald wrote his thesis under W.C. Snyder, who finished this book's Introduction shortly before his death. Through Professor Snyder and his colleague, Dr. H.N. Hansen, he became imbued "with a conviction, indeed an excitement, about the importance of the fungus genus *Fusarium*."

When, after service in World War II, Dr. Oswald returned to Berkeley, he resumed his research and eventually became head of plant pathology there. Among the students at Berkeley who worked at various times with the Hansen-Snyder-Oswald trio were James Tammen (formerly head of Penn State's plant pathology department and now dean of agriculture at Minnesota), T.A. Toussoun, and Paul E. Nelson.

"The next decades brought a variety of dispersed experiences to all of us away from this focal point in California," Dr. Oswald continues, "but by the 1970s destiny had brought us all to Penn State, still fascinated by *Fusarium*, which was by then the priority concentration of Drs. Toussoun and Nelson." These two men, Dr. Oswald points out, have organized and operate the University's Fusarium Research Center and in 1976 published the widely used *Pictorial Guide to the Identification of Fusarium Species*, now in its second edition.

And Dr. Oswald writes: "Let me conclude this foreword with a personal word of gratification that the dormant yet vital research interests of a pre-occupied university president were energized by the opportunity of commending this volume to the eager attention of dedicated experts in this field. This project thus became the ultimate intersection of a number of lives and careers who had already touched in another place in other years."

Obituary

Frances Sharkey was a file clerk at the Hershey Medical Center from 1974 until her death on Jan. 17. She was 56.

1982-83 Leaves of Absence

College of Agriculture

Karen S. Boran, associate county agent (Huntingdon), to complete a master's degree in Agricultural Education at Penn State.

David M. Cox, associate county agent (McKean), to work toward a master's degree in the College of Agriculture at Penn State.

Frederick G. Ferguson, associate professor of veterinary science, to develop additional research competencies in the area of immunobiology, to publish a backlog of research data and to collaborate on planning and organizing an international meeting on swine immunology.

Hays B. Gamble, professor of agricultural economics, to work with the Western Pennsylvania Conservancy on a study of rural land use. This is a continuation of the Conservancy's research on the "Future of the Pennsylvania Countryside," a project which examines trends in land and resource use, demographics, and economic growth and development in rural Pennsylvania in the year 2000.

David H. Gordon, associate Extension agent (Jefferson), to pursue a master's degree in communication from Clarion State College.

Glen W. Goss, associate professor of agricultural economics and director of Agricultural Communications, to participate in resident instruction and Cooperative Extension activities in the College of Agriculture at the University of Florida.

Hannon B. Graves, professor of poultry science, to work at the University of California, Santa Cruz, in the area of behavioral biology.

Mary Hoffman-Miller, associate Extension agent (Cameron), to pursue a master's degree in Extension education at Penn State.

David R. Mackenzie, professor of plant pathology, to investigate the potential for collaborative research efforts between various federal agencies and the Agricultural Experiment Stations for the development of a National Crop Loss Assessment System.

Jeffrey W. Mixer, associate Extension agent (Snyder), to pursue a master's degree in Extension education at Penn State.

James H. Mortensen, associate professor of agricultural education, to serve as Senior Scholar on the faculty of education at Ain Shams University, Cairo, under the Fulbright-Hays Educational Exchange Program with Egypt.

Eva J. Pell, associate professor of plant pathology, to study methods necessary to freeze fracture plant material for electron microscopy analysis of cell membranes and to use this technique to study membranes of potato protoplasts from divergent germplasm.

John W. White, professor of floriculture, to do research in the area of energy conservation in the greenhouse at the Levin Horticultural Research Center in New Zealand.

College of Arts and Architecture

Roger N. Cornish, associate professor of theatre arts, to devote an extended period of uninterrupted time to dramatic playwrighting.

Anthony Cutler, professor of art history, to continue research into the technical aspects regarding the production of late antique ivories to define the relationship between technique and style, i.e. between the objectively verifiable data already collected and the observations concerning form that have dominated the study of ivory for more than 70 years.

Anne A. Gibson, associate professor of theatre arts, to study the methods of practicing professional designers and explore the techniques of theatre craftsmen in New York. She will follow and photographically record at least one production from the studio through the shops and to its opening.

Robert W. Ott, associate professor of art education, to study art education training formations influencing museum education on a cross-cultural basis.

Wladyslaw A. Strumillo, associate professor of architecture, to prepare a study on physical changes to the urban fabric of Warsaw, Poland, brought about by the hostilities of World War II. The study will deal with the interrelationship of physical space and human conflict.

Behrend College

Dean R. Baldwin, assistant professor of English, to do a critical study of the work of H.E. Bates, author of *Love for Lydia*.

John K. Gamble, Jr., professor of political science and head, Social and Behavioral Sciences, to examine what determined countries' tendencies to participate in or avoid multilateral treaties entering into force between 1921 and 1980. The research differs from virtually all other work in the field because the principal focus is those aspects of the treaties that might be changed with relatively small political/diplomatic costs. The research is likely to contribute to the development of strategies that will increase participation.

Chester L. Wolford, assistant professor of English, to continue previous work on American author Stephen Crane, to be published by the University of Nebraska Press under the title, *The Anger of Stephen Crane*. His new study will include other major American authors of the late 19th and early 20th centuries.

College of Business Administration

John D. Daniels, professor of business administration, to continue research inquiries on the cross-national management groupings of multinational enterprises.

Henry P. Sims, Jr., professor of organizational behavior, to investigate corporate human resource strategies in U.S. corporations with emphasis on the structure, process and leadership of self-management work groups.

Capitol Campus

Robert J. Lesniak, associate professor of education, to complete a handbook on resource management for practitioners and researchers, continue research on the establishment, change and management of learning environments and prepare a synthesis of the various approaches.

William J. Mahar, assistant professor of humanities and music, to prepare a comprehensive history of American music from the Colonial period to the present.

Vedula N. Murty, professor of mathematics and statistics, to develop a training manual for basic courses in experimental design for process industries. He will work with engineers at a major manufacturing plant to gather data.

College of Earth and Mineral Sciences

Ronald F. Ahler, professor and head of Geography, to conduct comparative research on the geographical consequences of the evolution of intercommunications technologies (postal, telegraph, telephone, telex and computer-mediated systems) in Sweden and the U.S.

Richard Hogg, professor of mineral processing, to conduct research and participate in the graduate program in applied surface chemistry at the University of Melbourne, Australia.

Allan L. Rodgers, professor of geography, to study regional economic development in the Mediterranean region of southern Italy. His goal is to obtain an empirical base to help evaluate current theories of regional economic development and inter-urban diffusion.

John E. Tilton, professor of mineral economics, to conduct research on Western European policies for securing strategic and critical minerals, particularly those from southern Africa. Professor Tilton's leave will be spent in Paris.

College of Education

Eunice N. Askov, professor of education, to review critically the literature and research on adult literacy in addition to analyzing components of successful programs in adult education. Her study will be used to strengthen the knowledge and research base for Penn State's new program in Adult Education.

Donald B. Keat II, professor of education, to enhance his expertise in child counseling and therapy by visiting a few select centers and experts utilizing multimodal therapy strategies with children.

Patrick D. Lynch, professor of education, to study and analyze the policies and actual treatment of students' rights in so-called "civil law nations" as provided by government institutions as compared to the United States. His research will be conducted in Brazil and Venezuela and with the Organization of American States.

Susan F. Weis, associate professor of home economics education, to work with the Washington-based American Vocational Association to examine the processes whereby initiatives are translated into policies at the federal level for vocational education. She will focus on AVA efforts on reauthorizing legislation and the means used nationally to disseminate information for vocational education planning.

Frederick G. Welch, associate professor of vocational education, to investigate the cooperative vocational education approaches used in the Republic of China. He will help develop in-service and pre-service programs for teachers in cooperative vocational education at the National Taiwan Normal University where he has been invited to serve as a visiting professor.

College of Engineering

John L. Brown, Jr., professor of electrical engineering, to serve as a Prince Visiting Scholar in the School of Engineering, Arizona State University. His primary activity will be to continue and extend his investigations of multi-channel signal sampling.

Anthony J. Ferraro, professor of electrical engineering, to direct long path propagation and detection studies as part of his research effort to use the natural current system which flows in the ionosphere as a gigantic radio transmitting antenna at very low frequencies and extremely low frequencies. Professor Ferraro's leave will be spent in Puerto Rico, at the Arecibo Observatory, the principal research facility of the National Astronomy and Ionosphere Center.

James P. Ingilio, professor of industrial engineering, to conduct research in the areas of Goal Programming and Multiobjective Optimization. Part of his leave will be spent at the International Institute for Applied Systems Analysis in Austria and part at the Center for Operations Research and Econometrics, Université Catholique de Louvain in Belgium.

M. Albert Vannice, professor of chemical engineering, to conduct research on a nuclear resonance technique called "magic angle" spinning, and to apply it as a characterization technique to a new family of metal catalysts. Research in this area has future potential in many chemical and petroleum processes, especially those involved with the conversion of coal to clean fuels and chemicals. Dr. Vannice will be at the Centre National de la Recherche Scientifique Laboratory, Orleans, France.

College of Health, Physical Education and Recreation

Jerald E. Elliott, associate professor of recreation and parks, to study the behavior of older citizens as they relate to outdoor activities in national forest parks and historic sites. Research results will be available to residents of nursing homes and in institutional settings.

James L. Hodgson, associate professor of applied physiology, to do research at the Brookhaven National Laboratory in N.Y. to acquire an analytical technique which may be valuable in metabolic studies in humans.

Ronald A. Smith, associate professor of physical education, to complete research on the origins and rise of American college athletics and the creation of the National Collegiate Athletic Association.

College of Human Development

Frederick R. Eisele, associate professor of social policy, to expand expertise in social policy and community development into international areas. The focus is on policy for dependent elderly in less developed countries, particularly India.

Bernard G. Guernsey, Jr., professor of human development, to further his understanding of community psychology, administration of educational institutes/schools, and methods of establishing and running cooperatives or other self-supporting educational organizations.

Helen A. Guthrie, professor of nutrition, to continue research on the development and evaluation of alternative methods of assessing dietary intake and nutritional adequacy. Dr. Guthrie will also study factors influencing infant feeding practices in the Philippines and alternative strategies to encourage nutritionally and culturally appropriate practices.

Laura S. Slims, associate professor of nutrition in public health, to pursue in-depth study and research in the area of public policy, focusing on selected, current nutrition/health programs and issues.

Graham B. Spanier, professor of human development and sociology, to prepare a series of articles and essays on the changing American family, using demographic data collected by the U.S. Bureau of the Census in 1980.

College of the Liberal Arts

John B. Dalbor, professor of Spanish, to research a semantic and syntactic categorization of selected Spanish verbs. Included, among other properties, will be the surface syntactic environment of these verbs, such as what type of subjects precede them, what kind of complements and prepositions follow them, and the semantic or thematic meaning when they are reclassified.

Robert B. Eckhardt, associate professor of anthropology, to measure the role of genetic factors in human adaptation to hypoxia (oxygen shortage) at high altitude.

Robert S. Friedman, professor of political science, to study the role played by organized research units at American universities through extensive interviews with directors and administrators of such units; and to examine questions of the nature and quality of research, funding and administrative questions, and relationships between research units and regular university departments.

George M. Guthrie, professor of psychology, to work on an ongoing project in the Philippines dealing with maternal feeding patterns and malnutrition in infants and children. This research is an example of behavioral medicine or health psychology, a new emphasis in psychology which is concerned with changing lifestyles and habit patterns in ways that will prevent illness and promote physical well-being.

Henry W. Johnstone, Jr., professor of philosophy, to work at Bryn Mawr College with Professor Richard Hamilton, editor of the Bryn Mawr Commentaries. Professor Johnstone has been asked to contribute to this series a grammatical commentary on the Presocratic Philosophers.

Thomas J. Knight, professor of American studies and history, to work with the Organization for Economic Cooperation and Development team, with headquarters in Paris, to conduct a survey of technology assessment activities in member countries during the 1981-83 period. Dr. Knight, who has published one book on technology assessment and completed another, will work with the team to help summarize the research and prepare a report to member governments. After finishing his activities in Paris, Dr. Knight will begin writing a book on technology assessment in West Europe to complement his previous work on the United States and the developing countries.

Frank J. Landy, professor of psychology, to prepare a new graduate level course devoted to the cognitive and developmental roots of motivation and intentional behavior. He will also spend part of his time in an Australian university learning about the work settings, organizational climates, and styles of labor management relations in the Australian culture.

Joseph Paternost, professor of Slavic languages, to study obituary poetry which appears in the Slovene Language Press in the U.S. and Yugoslavia. A comparison of this poetry in the two countries will reveal important differences in the ethnic orientation of those Slovenes who remained in Yugoslavia as opposed to those who emigrated to the U.S.

work?

— Who are the faculty members responsible for providing the experiences of general education? and

— What strategies can the university use to re-examine the curriculum systematically?

Taking for his theme the role of general education in the land-grant tradition, Provost Eddy pointed out that the "three keys to land-grant education are found in (1) the nature of the public to be served; (2) the idea of higher learning; and (3) the overriding concern for informed citizenship."

Dr. Eddy noted, in connection with the first, that the original land-grant legislation does not contain the phrase, "sons and daughters of the working classes." Its author, Justin Smith Morrill, looking back in 1839, interpreted the new colleges' constituencies thus: "It was to be a liberal education for the industrial classes, and the professions also, and nothing less can be a legal compliance with the terms of the original act."

The use of the term "industrial classes" applied to "social no less than economic disparity," Dr. Eddy said. "Its use clearly established a special responsibility for the public education of American youth at all levels, including the collegiate, the primary and the secondary."

While classical education was not to be excluded, it was not to dominate. "The

Making a living vs. making a life

land-grant tradition came to represent a marriage of opportunity and quality such as the nation — and few other nations — had known before or would know later," Dr. Eddy said.

Noting that the proper preparation of free and active citizens has been a consistent concern of land-grant institutions, Dr. Eddy continued:

"In approaching general education, land-grant universities have attempted to tie together the purposes of 'making a living' and 'making a life.' The land-grant ideal clearly is the union of general and professional education not just in the same university but in the same classroom. The issue is not the end but the means: not why, but how. Thus it was claimed that all learning could be classified as liberal if it were taught as such. Thermodynamics, for example, could be the most liberating of studies if it were to be taught by a faculty member who respected learning in its broadest context. The haunting question, then: Does general education begin with the teacher or with the course content?"

Dr. Eddy summarized three diverse approaches made by land-grant universities to general education — CORE, SWEEP and SYNTHESIS. "CORE assumes that one can fill and keep contained a central cup of essential knowledge from which educated men and women shall drink. CORE is a mammoth dose of medicine which all healthy people must swallow gladly in order to preserve and promote life.

"SWEEP can be likened to an airplane ride over the landscape of knowledge with occasional dips in order to gain a closer view and, from time to time, stopovers at airports of special significance. SWEEP assumes that one ends the trip at least somewhat familiar with the topography of wisdom.

"SYNTHESIS is putting it all together — asking the right questions and encouraging at least some of the right answers. In our current parlance, SYNTHESIS is 'the bottom line.'"

A large measure of self-confidence plus a willingness to take chances has characterized those land-grant universities most successful in coping with general education, Dr. Eddy observed, concluding with several questions for the conferees.

General education . . . a beginning

"What then 120 years later do we mean by the 1982 version of 'a liberal and practical education of the industrial classes in the several pursuits and professions of life?' CORE? SWEEP? SYNTHESIS? What's here now? What comes next?"

Tracing the history of general education at Penn State itself was Dr. Lewis.

Noting that he arrived at Penn State only a couple of years after the publication in 1945 of *General Education in a Free Society*, sometimes known as the "Harvard redbook," Dr. Lewis recalled that document's impact on institutions of higher learning across the country.

At Penn State, President Milton Eisenhower in his inaugural address on Oct. 5, 1959, presented a list of goals similar to those in the "redbook" — "understanding of all the broad fields of knowledge . . . competence in communication . . . the ability to make critical judgments . . . an abiding commitment to the democratic way of life."

Efforts at implementing these goals were made by the Callenbach Committee, in the University Senate's Educational Policy Committee Report, and later by the Core College Committee. The first mandated University-wide requirements for general education (BDR II) resulted from a report by an ad hoc committee chaired by Richard Cunningham and Victor Dupuis. The general aims for baccalaureate degree programs were defined: General education should extend the student's horizons and complement the development of his expertise in a professional or academic discipline. . . . it is intended as an exploratory and enriching unifying base for the educational experience of all students enrolled in the university. . . . the student should be assisted to identify the limits of his own knowledge [and to develop] a type of intellectual discontent urgent enough to move him constantly to increase his understanding and wisdom."

Vested interests . . . have regularly slowed down . . . each attempt.

Lamenting the abandonment of a requirement for a course on technological concepts, Dr. Lewis pointed out that this "is rather typical of what has happened all too often to attempts to establish a common educational core at Penn State. Vested interests, professional demands, an inability to agree on definitions have regularly slowed down or even forced backward steps after each attempt."

Dr. Lewis concluded: "I believe that Penn State undergraduate education should be seen not as a series of discrete and individual programs aimed only at qualifying the student in a specific occupation — and here I speak not only of the professional colleges but of the Core Colleges where all too often the faculty tries to produce students in its own image . . . but as a process that prepares our students . . . as citizens with an understanding of the world around them and an ability to make the right decisions for the future of that society."

Required "general education" courses for college students can help unify a nation grown too specialized and fragmented, Dr. Gross told the delegates.

"General education is one of the most important issues in America today because our moral, intellectual, social and

cultural center has not held," Dr. Gross, continued.

"We have created a society whose citizens no longer hold anything in common. The moral dimensions of our society have grown dangerously polarized."

Dr. Gross said college teachers can no longer assume that students share a common body of knowledge, as they used to. Part of the blame lies in a "computerized, audio-visual culture" that seems to devalue reading and writing. It also rests with educators who dismissed "rigid" curriculums to placate protesting students of the sixties.

A general education "core," Dr. Gross said, should require courses in foreign languages and cultures — "so we can deal effectively with the foreign crises that will inevitably affect us."

It should also focus on technology, "so we understand its ethical, social and political implications . . . we have come to recognize the danger in leaving crucial decisions to specialists."

Because of economic pressures, he said, the emphasis on career education is greater today than ever before.

"Inevitably, the 'major' becomes critical for students who want direct preparation for a vocation. The broad considerations of general education seem vague and without value for a student looking for that first job."

The emphasis has shifted so much, however, that even those of us in the most specialized fields have become disturbed that our students will never go beyond their first job — that they will be trapped because we have trained rather than educated them."

Dr. Gross noted that employers, however, are now asking for "the liberally educated person who can adapt to the one element that will dominate all of our lives — change."

Since Harvard University instituted its general education reforms in 1978, he said, many colleges and universities are now doing likewise.

"The search for reform through general education has a special urgency that results from 20 years of fragmentation in education and society and that anticipates a period of technological complexity and international responsibility never confronted before," he concluded.

And on Saturday morning

Despite some of the worst weather of the winter, a large and obviously committed audience turned out for the final plenary session of the Conference on Saturday morning.

Summing up the deliberations of the eight panels which had been held on Friday afternoon and earlier the same morning — and adding some opinions and questions of their own — were Carol Cartwright, Conference co-chairperson and acting associate dean, CES; Jerry B. Covert, associate professor of biology; Hazleton, Caroline D. Eckhardt, associate professor of English and comparative literature; Charles L. Hosler, dean, Earth and Mineral Sciences; Robert E. Dunham, vice president for undergraduate studies; and Leo H. Takahashi, assistant professor of physics. Beaver, substituting for a snowbound Theodore E. Kiffer, director of General Education in Liberal Arts.

Dr. Covert, chairman of the Senate's BDR III Subcommittee, addressed the question of objectives and assessments. In

defining an educated person, he suggested three areas of necessary competency:

1) Skills for advancing learning — reading, writing, computing and reasoning;

2) Distributive studies, including the arts, humanities, sciences and social sciences; and

3) Integrated learning, an often neglected area and the one most difficult to achieve.

While most people would agree that these areas are inseparable, Dr. Covert said, reaching agreement on a curriculum to provide them is where the real fight begins. "And if agreement is reached on that the next problem is finding a way to get students to use the curriculum."

Stressing that faculty should provide an atmosphere of general education in every course they teach, Dr. Covert said that a task force is currently inquiring into types

Is general education to be viewed as a layer cake model?

of available tests to measure the outcomes of general education. Such tests would be given both freshmen and seniors, and he said he hoped testing could begin in the Spring.

Dr. Eckhardt, assigned the topic of "content and connections," had two proposals. The first was "redefining of general education as the responsibility of all of us, not of separate general education units and courses." As an example, she pointed to the Department of English, which cannot teach writing if writing does not count in other courses. In this context, she also deplored the use of machine-grade examinations.

Her second proposal was for the strengthening of international education in the curriculum, and she expressed her concern over the lack of language training at the University. Every course should include an international component, she urged.

In an ensuing discussion, Dr. Dunham suggested that if international studies are crucial to each discipline, it was incumbent upon the professional colleges to include language courses among their requirements.

"Dr. Robert Schmalz, professor of geology, speaking from the floor said that it was easier to teach specialized courses and if the University were going to involve all of its faculty in general education, incentives would be needed."

Dr. Dunham, in discussing articulation in the curriculum and the professions, called delegates' attention to the fact that high schools across the country are also reexamining general education in the context of their own missions.

"For colleges and universities to examine general education in isolation may be counterproductive," Dr. Dunham said.

"What is the relationship between the general education requirement and requirements for the majors?" Dr. Dunham asked. "Is general education to be viewed as a layer cake model forming the first two years after which we will add on requirements for the majors?" Dr. Dunham also questioned whether students regard general education as important. "It certainly has no relationship with major requirements or professional areas," he said, suggesting that intra-university articulation is as important as articulation with the high schools.

"Perhaps," he concluded, "the answer is jointly to agree on the goals of general education and then each segment in the high school, college major or professional school would design toward those goals, and be concerned about their outcomes."

All faculty members bear a responsibility for contributing to general education, even in highly specialized

(Continued on page 5)

(Continued from page 4)

programs. Dean Hosler said, in speaking on the faculty role and organization. Faculty must be well read and knowledgeable people. "I would prefer to think that the true scholar sees continuity in all nature," he stressed.

"How can the student take work seriously without seeing how it fits into the world at large?" Dean Hosler asked. "As we push back the frontiers of highly specialized areas of interest — and pursuing knowledge is certainly one of the major roles of the university in addition to general education — we must never lose sight of the fact that the overwhelming majority of our students will go on to apply this knowledge. . . . They can use the knowledge well only to the extent that it is put in the proper context, not just the technological context but in its place in history and the culture of man."

Dean Hosler also expressed the view that the University can go too far in the codification of the reward system, that what is needed is more flexibility to recognize wider variety of talents."

Dr. Kiffer's paper on organizational change called for a balance of efforts among faculty members and mutual respect regardless of missions.

If we view training for the professions as the most important undergraduate mission and hope students will somehow become generally educated just by spending four years in an academic community, we fail as an educational institution. Dr. Kiffer wrote. On the other hand, we also fail if we insist on disrupting departmental professional efforts by somehow insisting that all faculty in all departments become involved in general education offerings.

Faculty who do participate, however, should be adequately recognized for their efforts, Dr. Kiffer added.

Dr. Takahashi, commenting on the panel discussions in which he was involved, said that a recurring theme was that for the system to work, "consistent,

concerned, personal advising" was a necessity.

Dr. Cartwright delivered the last address. She informed conferees that by February edited transcripts of the

The true scholar sees continuity in all nature.

Conference, along with a 30-minute videotape of selected portions, will be made available to the Colleges and Campuses.

In the coming weeks, Dr. Cartwright said, "we will essentially be asking one major question, and that is, What is higher education? Is it the education of a person or the equipping of that person with specific skills, usually those wanted in the marketplace?"

This question has persisted through the ages, and when the universities would not provide the technical training individuals desired, on the grounds of exclusivity, other agencies stepped forward to take their place. In Great Britain, for example, the great scientific minds of the 20th century were educated not at the universities but by technical institutes. Non-job-oriented education has usually given way, Dr. Cartwright commented, because it simply could not meet the needs of rising business and technical fields.

Universities are often unwilling to yield to the demands for job training because it divests them of their role of higher education and scholarship.

But Dr. Cartwright continued, "Higher education has been, and still often is perceived as a means of getting ahead in society." Universities have accommodated to this view by offering status to those they technically trained — receiving, in

turn, credit and funding from state legislatures.

Attempts to recreate the ivory tower will fail, Dr. Cartwright believes. "We will have to come to grips with the marketplace or others will do it for us." But adapting to the demands of the marketplace need not mean capitulation. "We can develop a humanist with computer skills. . . .," she said. "We can develop a pre-school teacher who is fluent in French."

Dr. Cartwright foresaw a new synthesis — out of which the university provides services as they are needed but also pursues knowledge.

Dean Paulson

(Continued from page 1)

of every five jobs now depends on foreign trade.

American farms allocate one out of every three acres to producing grain for export. America's defenses are linked by security treaties to Europe with NATO; to Southeast Asia by SEATO; to Central and South America, by OAS.

There are few serious human problems which we face as a people that are not internationally connected," Dean Paulson said, citing examples ranging from crime and food supplies to the environment, the monetary system and the use of the seas.

"The price of international ignorance is national decline," Dean Paulson said, pointing out that there are currently more teachers of English in the USSR than there are Americans studying Russian in the U.S.

Dean Paulson concluded by propounding the following questions for the conferees to consider:

— Fewer than one out of five of Penn State's graduates takes a foreign language. Is it possible to widen this window on other cultures?

— Are we prepared for a predicted doubling of the number of foreign

students at Penn State?

— Are we treating foreign students only as sources of tuition revenue or as TAs and not as cross-cultural representatives who could enrich the curriculum?

How do we become more internationally-oriented on the campus? — If faculty development is fundamental to general education, what incentives do we have to urge an international obligation upon our faculty?

Special Lincoln program on Feb. 11

A concert by University musicians will reach a statewide audience when the Pennsylvania Public Television Network (PPTN) presents a special Lincoln commemorative program live from Eisenhower Auditorium on Thursday, Feb. 11, from 8 to 9 p.m.

The concert, which will be broadcast live simultaneously by all seven PPTN members, will feature Penn State's Symphony Orchestra, Symphonic Wind Ensemble and Glee Club.

The works to be performed are "Fanfare for the Common Man" and "Lincoln Portrait" by Aaron Copland, "Testament of Freedom" by Randall Thompson and "A Lincoln Address" by Vincent Persichetti.

Smith Toulson, associate professor of music, will conduct the entire concert, and Robert Trehy, professor of music, will narrate the two Lincoln pieces.

The program is being produced by William C. Miller, assistant director for the arts at WPX-TV. He explains that the concert will be open free to the public, offering area residents a rare opportunity to view a television program in production.

Television director for the production is Sandra G. Thomas.

Leaves of absence

(Continued from page 3)

Warren C. Robinson, professor of economics, to study the effects on population growth of the recent reduction of policy in developing countries. The priority policy to emphasize urban-industrial investments, but dissatisfaction with the results of this approach has led to the greater current focus on the rural-agricultural sector.

Daniel Walden, professor of American studies, to study technological influences as part of the Americanization of immigrants to the United States, as portrayed in the works of several ethnic writers (Saul Bellow, Joseph Heller, Richard Wright, Ralph Ellison, Pietro DiDonato, and Mario Puzo). This project could open a new way of looking at human experiences in society by tracing the paths by which technology has acted on ethnic authors and thus found its way into our culture by way of their writings.

Edward J. Walsh, associate professor of sociology, to focus on the development of the citizen protest in the wake of the TMI accident, completing the analysis of data obtained from a substantial research project.

College of Science

Charles E. Antle, professor of statistics, to conduct research in biostatistics and Bayesian methodology at Stanford University and Imperial College, London.

Gregory I. Grefyoff, associate professor of chemistry, to work at the Catholic University of Leuven, Belgium, in the general field of heterogeneous catalysis by zeolite supported metals. The second half of his leave will be spent in an industrial research laboratory also working in heterogeneous catalysis.

Jonathan Goldstone, associate professor of computer science, to work at the University of Southern California on the applications of formal language theory to database theory and on the applications of formal languages to software engineering.

Gordon A. Hamilton, professor of chemistry, to become more knowledgeable about metabolism and about the effects that various hormones (especially insulin) have on metabolism, working in the United Kingdom and Europe.

Lloyd M. Jackman, professor of chemistry, to gain experience in two new and important areas in nuclear magnetic resonance spectroscopy with a view to making these new techniques available in the Chemistry Department at Penn State.

Carl S. Keener, associate professor of biology, to work at the Harvard Herbarium preparing a description of all varieties of buttercups along the eastern coast of this country. The distribution of buttercups reflects the stress that man's activities place on the land, so this study has both practical and theoretical significance.

Bruce R. Kendall, professor of physics, to study the phenomena occurring on the surfaces of satellites in high-altitude orbits. Some of the results should be applicable to future Space Shuttle experiments.

Gerard Lallement, professor of mathematics, to conduct research — in Paris — on the algebraic theory of semigroups and its applications to computer science and linguistics.

Richard B. Mansfield, associate professor of mathematics, to do research in pure mathematics and logic to develop new methods in applied mathematics, especially numerical analysis, at the Courant Institute.

Thomas K. McCubbin, Jr., professor of physics, to work at the Pierre and Marie Curie University using what is probably the world's most advanced Fourier transform spectrometer. (A Fourier transform is a mathematical procedure, accomplished with a computer, by means of which the output of an optical instrument called a Michelson interferometer becomes a spectrum.)

Ganapati P. Patil, professor of mathematical statistics, to do research and writing in statistical ecology and distribution theory.

Allen T. Phillips, professor of biochemistry, to do research at Purdue University to learn many of the new techniques of molecular genetics.

Douglas H. Sampson, professor of astrophysics, to conduct research at the Los Alamos National Laboratory in the area of calculation of atomic data needed in the study of low density, high temperature plasmas (ionized gases) such as occur in astronomy and in fusion energy research.

William C. Waterhouse, professor of mathematics, to conduct research in the area of algebraic geometry at Harvard University.

Boris Weidelfer, professor of mathematics, to conduct research on several areas of abstract algebra at Harvard University.

University Libraries

Ronald L. Filippelli, associate professor of labor studies and head, Historical Collections and Labor Archives, to do research at the National Archives and several other repositories in the U.S. and Italy on the role played by the American Federation of Labor in the reconstruction of the post-war Italian labor movement. The context will be the role played by non-governmental institutions in the making and carrying out of American foreign policy.

Commonwealth Educational System

Harold W. Auran, associate professor of history at Hazelton, to conduct research for a book-length study entitled "The Culture of Work: Occupation and Values as Exemplified by the Anthracite Miner," a study which is part of a long-range research program of a comprehensive history of the anthracite coal region.

Peter J. Behrens, assistant professor of psychology at Allentown, to trace the influence of the doctoral program in Psychology at Leipzig University in Germany on the first American programs established in the late 19th century at Harvard and Johns Hopkins Universities.

Lawrence S. Cote, assistant director of Continuing Education at Radnor, to complete a substantial part of his doctoral program in Higher Education administration at Temple University.

George W. Franz, assistant professor of history at Delaware County, to prepare a book-length study entitled "Crossroads Communities: Mobility, Landholding, and Community Structure in the Pennsylvania Backcountry, 1720-1790." The major part of the work will be done as a visiting scholar at the Beutherian Mills-Hagley Foundation in Delaware.

Robert E. Ginsberg, professor of philosophy at Delaware County, to produce a book-length study, illustrated with photographs and reproductions, on the "Aesthetics of Ruins," using the phenomenological method of analysis balanced by the history of ideas.

Ernest A. Harrison, Jr., professor of chemistry at York, to rejoin the National Institutes of Health Medical Chemistry Section to further expand his medicinal chemistry horizons by participating in the program of organic synthesis and subsequent use of enantiomeric analogues and antagonists.

Gary L. Mullen, associate professor of mathematics at Shenango Valley, to continue research in polynomials and matrices at the Department of Mathematical Sciences at Clemson University.

Roy E. Myers, associate professor of mathematics at New Kensington, to expand his current work in computer graphics by working at the University of Pennsylvania, the University of Pittsburgh, St. Olaf College (Minnesota) and UCLA.

Sally A. Small, associate librarian at Berks, to complete her Ph.D. in Business Administration at Temple University. Mrs. Small will study the process of strategic management decision-making and the impact of the implementation of those decisions, applying this knowledge to problems associated with human resource management of libraries. She will also be able to teach courses and workshops in management.

Roger R. Zeller, associate professor of art education at Altoona, to travel and study ceramic forms and traditions over the past five years. Coupled with the recent establishment of a personal studio for ceramic production, the leave will provide Professor Zeller with the opportunity to develop further his ceramic creativity.

From the Trustee Docket

Conti and Book

(Continued from page 1)

Active in many civic and professional organizations, Mr. Conti is an advisory board member at Virginia Polytechnic Institute, Johnson and Wales College in Rhode Island and Fairleigh Dickinson in New Jersey. He also is a member of the Purdue University School of Consumer and Family Sciences Advisory Council.

He is a past president of the Pennsylvania Restaurant Association. Also past president of the Penn State Hotel and Restaurant Alumni Association, Mr. Conti has been a frequent guest lecturer in Penn State hotel and motel administration classes.

He has been a member of the Board of Trustees since 1974. He and his wife, Pat, have two sons, Walter Jr. and Michael.

Mr. Book is past president of the Penn State Alumni Association and also of the Greater Harrisburg Chamber of Commerce. He joined the Board of Trustees in 1977.

A 1954 graduate of Penn State, he is

past president of the Penn State Hotel and Restaurant Alumni Association. He serves on the board of trustees of the Harrisburg Area YMCA, and recently was appointed chairman of the Travel Industry Association of America.

Mr. Book is chairman of the Milton S. Hershey Medical Center Advisory Committee. He also serves on Penn State's Capitol Campus Advisory Board.

In 1981, Mr. Book was the College of Human Development's Alumni Fellow at Penn State. Each year, one outstanding alumnus is chosen from each college to return to campus and share his or her professional experiences with students through the Alumni Fellows program.

In 1974, Mr. Book was elected to the University's Alumni Council and appointed to the Penn State Fund Council. In 1975, he was appointed to the Alumni Council's executive board, and served as President of the Alumni Council from 1977 to 1979.

He and his wife, Inga, have three children, Sandra, Frederick and Edward Jr.

Private support up from last year

Private support to Penn State from all sources totaled \$6,815,764 for the six months of the fiscal year, July to Dec. 31, 1981, the Board of Trustees was told in a report from Lawrence G. Foster, president of the Penn State Fund Council.

This was a 28 percent increase over the same period in 1980, and represented a total of 20,692 gifts to the University.

"Especially encouraging," Mr. Foster told the Trustees, "was the 97 percent increase in gifts from corporations and businesses, which represented nearly \$3,320,000 of the total amount received by the University."

The newly expanded Fund Council, which includes 45 of Penn State's leading alumni, has embarked upon a creative new program to increase private giving to the University. Mr. Foster told the Trustees. The Council has been organized into three sub-committees, Alumni and Friends, Corporations and Foundations and Planned Giving, he said, and all are now actively engaged in a work plan developed in recent months.

These efforts are being coordinated with the University's Office of Gifts and Endowments and the individual fund raising efforts of the various colleges within the University, Mr. Foster said.

"One of the Council's major tasks is to convey to Penn State's nearly 230,000 alumni the pressing need for increasing

private giving to maintain academic excellence at the University," Mr. Foster said. "All too often we are misled by the notion that state support covers the major portion of our financial needs when it actually represents less than 28 percent," he said. "This is a concept we must change," he added.

"Penn State has research and educational programs of direct interest to corporations and businesses all over this nation," he said, "and our graduates are in thousands of key positions in these companies."

"We would like to develop a closer working relationship with many of these managements and explore areas of mutual interest. This is another of the Fund Council's priorities," Mr. Foster added. "We think it is good business for both the corporation and the University to work together toward mutual objectives."

Two graduate programs to be discontinued

The University will discontinue its graduate program in zoology and its Ph.D. program in linguistics.

Provost Eddy told the Trustees that the Head of the Department of Biology, the Dean of the College of Science, and the Graduate Council had recommended closure of the master's and doctoral programs in zoology.

"Enrollment in the zoology option has been declining for several years," Dr. Eddy said. "Students appear to be more interested in the interdisciplinary biology programs, such as ecology, plant physiology and plant genetics."

Students currently enrolled in zoology graduate programs will be permitted to complete their degrees, he added. The biology department will continue to offer the intermediate and advanced courses in zoology required by some of the other graduate majors within the University.

The closure of the Ph.D. program in linguistics had been recommended by the linguistics program faculty, the Liberal Arts Committee on Planning and Budget, the Dean of the College of the Liberal Arts and the Graduate Council, Dr. Eddy noted.

The master's program in linguistics will continue to be offered.

Under Graduate School policy, it will be possible for doctoral students to develop special interdisciplinary Ph.D. programs in linguistics-related areas, Provost Eddy said.

Committee on Educational Policy views research, graduate studies

In a discussion among members of the Committee on Educational Policy on the significance of research at the University, emphasis was placed on the critical nature of ties between research and graduate studies.

Dr. James Bartoo, dean of the Graduate School, noted that more cooperation is needed among Pennsylvania's colleges and universities with respect to facilities such as libraries and laboratories.

He also observed that funding for research and graduate study is "in a state of flux" on both the national and state levels and is expected to decrease, with

that during the past six years, this review process has shown Penn State to have "a half dozen programs that are the best in the nation, and another dozen that are in the nation's top two or three."

Penn State currently has about 6,300 graduate students. Of these, some 2,350 are supported on assistantships, about 1,200 are teaching assistants and the others are engaged in research or other activities.

"About 40 percent of the graduate students at University Park are supported on assistantships," Dean Bartoo said.

"Another 2 percent are supported on the

The following statement was made by University President John W. Oswald during his monthly report to the University Board of Trustees.

In September, 1981, Governor Thornburgh indicated that a combination of federal budget reductions and business tax cuts approved by Congress would have a serious impact on Pennsylvania's state budget this year. One major action was to request a one-percent across-the-board reduction in all state general funds appropriations for this fiscal year.

1981-82. According to the Governor, such action is "the fairest, most even-handed way in which we can adjust in the short run to federal budget reductions."

The Pennsylvania Legislature, in December 1981, passed the Report of the Committee of Conference on Senate Bill

No. 618, which approved the one-percent appropriations reduction. Every preferred and non-preferred appropriation, with the exception of subsidies to school districts, will be reduced by one-percent.

Penn State's appropriation reduction, therefore, will be \$1,338,000. This represents a difficult financial problem for the University, but we recognize the need for such action and appreciate the fact that the reductions were made in a fair and equitable manner.

We have concluded that an across-the-board reduction of all University general funds budgets is the most equitable way to comply with the State's action. Because we are making up part of the needed recycling amount from central sources, the across-the-board reduction of General Funds operating budgets will be 0.5 percent.

one exception: funding for defense-related basic and applied research.

"Penn State, because of its heavy emphases and traditional strengths in engineering, science, applied science and agriculture, has the opportunity to expand significantly in these areas, especially in the area of research," Dr. Bartoo noted.

In addition, the University will examine its internal policies to determine ways in which it might offset the expected funding reductions. In particular, he said, Penn State will focus on increasing opportunities for teaching assistants and research assistants.

"We also will continue our review of the University's some 120 graduate programs," Dr. Bartoo said, observing

University's work-study funds, while 1,200 graduate students have Guaranteed Student Loans totaling \$3.8 million and 75 have National Direct Student Loans totaling \$120,000."

Of Penn State's graduate students, 36 percent are women. Some 62 percent are Pennsylvania residents. About 22 percent are from other states than Pennsylvania, and about 16 percent are from foreign countries.

Following Dr. Bartoo's presentation, Dr. Samuel Smith, dean of the College of Agriculture, and Dr. Wilbur Meier, dean of the College of Engineering, commented on graduate programs in their colleges as part of the University's overall graduate studies effort.

1982 Distinguished Alumni named

Eight Penn State University graduates — all well known in their fields — have been named Distinguished Alumni of the University for 1982.

They join 241 other Penn State graduates who have received the Distinguished Alumni Award since it was established in 1951.

The award honors outstanding alumni whose personal lives, professional achievements and community service exemplify the objectives of their alma mater. It is the highest recognition bestowed on an individual by the University, and equals the honorary doctorate given by many institutions.

Penn State's Board of Trustees selected this year's recipients from among 81 nominees. The 1982 Distinguished Alumni are:

— Paul B. Barton Jr., '52, Reston, Va., geologist; U.S. Geological Survey National Center.

— George K. Davis '32, Gainesville, Fla., professor emeritus of nutrition, University of Florida.

— Franco Harris '72, Pittsburgh, humanitarian and pro football player, Pittsburgh Steelers.

— Owen E. Landon Jr., '51, Westport,

Conn., president, Landon Associates, Inc.

— Darlene D. Large '59, Leola, Pa., president and founder, HOINA Inc.

— William E. Leonard '36, Palm Desert, Calif., chairman, president and chief executive officer, The Parsons Corporation.

— George F. Page '52, Cocoa Beach, Fla., director of Space Shuttle Operations, Kennedy Space Center.

— Henry R. Smith Jr., '39, Pittsburgh, judge, Court of Common Pleas, Allegheny County.

Final plans approved for Wilkes-Barre project

Trustees approved final plans for the construction of two modular units to serve as classroom and laboratory facilities at the Wilkes-Barre Campus. They also approved plans for additions and alterations to the Commons Building there.

"These facilities are much-needed at our campus," said Director James H. Ryan. "There are 729 students using our existing accommodations, which were designed for approximately 500 students."

Ten Trustees elected to Executive Committee

Ten Trustees were elected to the Board's Executive Committee, which handles necessary business transactions in the intervals between regular meetings of the Board.

The ten are:

Quentin E. Wood, Oil City;
William K. Ulicher, Clearfield;
Roger A. Madigan, Towanda;

Obie Snider, Imle, Hershey;
Stanley G. Schaffer, Pittsburgh;
Helen D. Wise, Dover, Del.

Cecile M. Springer, Pittsburgh;
Barbara H. Franklin, Washington, D.C.; and
Howard O. Beaver Jr., Reading.

Walter J. Conti, Doylestown, the newly elected president of the Board of Trustees, will serve as an ex officio member of the Executive Committee. President Oswald also serves as an ex officio member.

Incumbents re-elected were: Patricia L. Rosdill, associate secretary; Mary Lou McCorkle and Grace T. Younginger, assistant secretaries; Robert A. Patterson, treasurer; and Richard H. Baker, assistant treasurer.

PS-23 legislation to head Senate agenda

A proposal to modify the section of PS-23 dealing with the evaluation of teaching effectiveness will highlight legislative action at the next meeting of the University Faculty Senate, Tuesday, Feb. 2, at 2:10 p.m. in Room 112 Kern Graduate Building.

The proposal to modify PS-23, from the Senate's Faculty Affairs Committee, was tabled during the Senate's last meeting, Dec. 15, because poor road conditions prevented Senators from nearly half the Commonwealth Campuses from attending the meeting.

Any proposal for revision to PS-23 passed by the Senate becomes a recommendation from that body to the President and must be acted upon by him before it becomes policy.

Also on the agenda for the Senate's Feb. 2 meeting is an informational report from the Faculty Affairs Committee on a recent Ombudsman Workshop.

The University's ombudsman program, overseen by the Faculty Affairs Committee, consists of 31 ombudsmen (see list). The ombudsmen are faculty members selected or elected for the purpose of conflict resolution; explicit details on the selection and responsibilities of ombudsmen may be found in University Policy Statement PS-76.

In another informational report, Marlowe D. Froke, general manager, Learning and Telecommunications Services, in the Commonwealth Educational System, will speak to Senators on "Instructional Materials Development and Alternate Instructional

System Design."

The Committee on Undergraduate Instruction will sponsor a forensic session on "Compulsory Physical Education." During the session, viewpoints will be presented by Committee member Robert Jennings Heinsohn, professor of mechanical engineering, and James G. Thompson, associate professor of physical education.

Presenting three reports will be the Committee on Committees and Roles, which will begin with an informational report on "Senate Membership."

The Committee's next two reports will call for legislative action. The first proposes modifications to the Senate's *Bylaws* regarding election to the Senate, absences and replacements (Article III, Sections 5 and 6). Essentially, the proposed modifications will put into writing what the Senate already practices.

The second report will propose modifications to the Senate's *Standing Rules*, Article III. This proposal is intended to make more consistent the standing rules as they apply to four University committees: the Joint Committee on Tenure, the Faculty Rights and Responsibilities Committee, the Promotion and Tenure Review Committee and the Faculty Advisory Committee to the President.

The proposed modifications would limit eligibility for membership on these committees to tenured professors.

In remaining business, the Senate will hear an informational report from the Committee on Admissions, Records and

Scheduling on the topic of "Special Admissions Program for High School Seniors at University Park."

It also will receive the Elections Commission's "Annual Faculty Census Report."

The University ombudsmen are:

Agriculture, Donald Cridge; Arts and Architecture, William Crocken; Business Administration, J.D. Hammond; Earth and Mineral Sciences, Richard Hogg; Education, William Rabinowitz; Engineering, Howard Kingsberry.

Health, Physical Education and Recreation, Ronald Smith; Human Development, Joseph Britton; Liberal Arts, Elton Atwater; Science, Paul Cutler; University Libraries, Cordelia Swinton. Allentown, Peter Behrens; Altoona, Valerie Stratton; Beaver, Gordon Johnston; Behrend, Richard Meier; Berks, Russell Reed; Delaware County, Peter Georgopoulos; DuBois, Harry Charleston.

Fayette, Paul Agate; Hazleton, A.V. Galanti; McKeesport, Robert Hauser; Mont Alto, Jerome Curry; New Kensington, Robert Carnahan; Oquoniz, Annette Carson; Schuylkill, Charles Cannon, Glenn Gerhard and Franklin Platts.

Shenango Valley, Leonard Rifornigato; Wilkes-Barre, Diane Hunt; Worthington Scranton, James Weiss; York, Ernest Harrison; Capitol, Irwin Richmond; Hershey, George Connor; Radnor, Vera Hopsodka.

Husband-wife team from London to visit, lecture

A literary scholar and an animal welfare advocate from London comprise a husband-wife team who will visit and lecture on campus Feb. 1-3.

Dr. Inga-Stina Ewbank, Hildred Carlile Professor of English at Bedford College of the University of London, will visit under auspices of the Department of English and the Institute for the Arts and Humanistic Studies. She will lecture on "Shakespeare, Ibsen, and the Language of Drama" at the English Department Colloquium on Tuesday, Feb. 2, at 8 p.m. in Room 112 Kern Graduate Building.

Her husband, Dr. Roger Ewbank, is director of the Universities' Federation for Animal Welfare in Great Britain. He will conduct a seminar on "Animal Welfare Concerns in Great Britain" for faculty members and graduate students in the departments of Dairy and Animal Science, Poultry Science and Veterinary Science on Tuesday, Feb. 2, at 11:10 a.m. in Room 301-B Agricultural Administration Building.

Dr. Inga-Stina Ewbank's scholarly publications range over the field of literature from the Renaissance through the 19th century. In Shakespearean scholarship, she has been concerned primarily with the poetry and the use of dramatic language. She is also the author of a definitive study of John Webster's *The Duchess of Malfi*.

Libraries asked to examine 'loot' of rare book thief

With the recovery by the FBI of some 2,000 pounds of rare books from a "mini-warehouse" in Bethlehem, Pa., Rare Books Librarian Charles Mann has been invited to look over the "loot" and see if any of the treasures bears a Penn State imprint.

The books are believed to have been stolen by James Shinn, who was apprehended in December at the Muhlenberg College Library. Suspected of removing rare books worth nearly \$500,000 from academic libraries across the country, Shinn was first arrested last June at Oberlin College and jumped his \$40,000 bail.

News of Shinn's arrest and the subsequent discovery of some 70 books in his motel room was circulated among university libraries everywhere. When Pattee's records were checked, the Library found that Shinn had registered there on Oct. 7, 1980, giving his address as the South Ridge Inn. His wife, Lola, registered at Pattee on Oct. 8.

According to Assistant Dean of Libraries Charles Ness, the Shinn's told the attendant who registered them that they would be in State College for six weeks.

"While we have no reason to believe

the Shinn's ripped us off, we will be curious to know when the stolen books are examined if any of them are ours," Dr. Stuart Foth, dean of Libraries, said. "Shinn did not register under any of his aliases in our Special Collections area, so if he took anything, it was from the open stacks. I don't believe he came back here after his first arrest since we were very alert to that possibility."

Except for the Rare Books Room and a caged area of the Arts Library, most of Pattee's stacks are open. Mr. Ness notes, "so it is possible for a determined person to steal materials. We have a Checkpoint security system in Pattee and our branches as a deterrent, but this does not prevent a thief from removing plates or other valuable parts of books."

When he was arrested at Oberlin, police found a device Shinn allegedly used to test books for electronic security strips and a razor to remove them. His motel room yielded five cans of shoe polish used to disguise marks made on leather bindings when library stamps were removed.

Rare Books reported no losses following the Shinn's stay at University Park, but, as Dean Foth points out,

with a collection numbering something over 1.6 million books, "there is no way we can do an inventory of the stacks."

Shinn, according to an article in *AB Bookman's Weekly*, is suspected of having stolen books from at least two Pennsylvania institutions, the University of Pennsylvania and the Lutheran Theological School, as well as Johns Hopkins, UCLA and other colleges from Hawaii to Florida. Among the books found in Bethlehem were volumes from the Universities of Michigan and Illinois. Thefts of books from these institutions had not previously been connected with Shinn.

Shinn was arrested the second time because an alert Muhlenberg librarian recognized him from pictures which had been circulated among the staff. An article in a local newspaper triggered the suspicions of the Bethlehem warehouse owner who had rented space to Shinn, leading to recovery of what the FBI estimates as more than a quarter million dollars worth of books. Shinn, now being held on \$100,000 bail, is plea bargaining with an offer to tell police the location of other warehouses where he claims to have cached books.

Ursula Oppens

Oppens to play classical program

The Artists Series will present pianist Ursula Oppens in concert as part of its *Pride of Pianists/Fine Arts Series* on Friday, Feb. 5, at 8:30 p.m. in Schwab Auditorium. The program will include works by Chopin, Schumann and Haydn.

Ms. Oppens has received many honors and prizes, including the first prize at the 1969 Busoni International Piano Competition, the 1970 Diploma d'Honneur of the Accademia Chigiana, the 1976 Avery Fisher Prize, and the 1979 Record Award for her recording of Frederic Rzewski's "The People United Will Never Be Defeated" (one of several works she has commissioned).

Ms. Oppens was born in New York into a musical family, but she studied economics and English literature at Radcliffe College before deciding to become a musician. She attended the Juilliard School of Music, studied piano with Rosina Lhevinne, Leonard Shure, Guido Agosti and Edith Oppens (her mother) and chamber music with Felix Galimir.

Tickets will go on sale at Eisenhower Auditorium box office, 9 a.m. to 4 p.m., weekdays, beginning Tuesday, Feb. 2. The HUB booth will be open the first day of the sale only. Phone orders on MasterCard/VISA will be accepted at 863-0255 on sale days.

Capitol Campus has been designated as the State's official data center under an Executive Order signed recently by Governor Richard L. Thornburgh. The Data Center at Capitol now is responsible for making accessible to the public and to all state agencies the population data and other statistical information gathered by the U.S. Bureau of the Census.

In establishing the Center at Capitol Campus, Pennsylvania became the 42nd state to set up a data center under the State Data Center Program, which was begun in 1978 by the U.S. Census Bureau.

The idea behind the program, according to Robert W. Surridge, director of the Center, is to make accessible the vast

amount of data that is collected by the federal census. This data, he said, can be used by researchers, by state and local government agencies, urban and regional planners, businesses, and others.

Under the agreement establishing the Data Center, the Census Bureau will provide Capitol's Center with census data and other statistical information. The State is providing initial funding for the program, which is being run on a cost recovery basis.

"Users of the Center's services pay for them at cost," Mr. Surridge explained. All State agencies are required to use the center as their source of census data,

under the Executive Order signed by the governor, he noted.

By having all State agencies use the Center as their primary census statistical resource, State government should reduce the possibility of costly and unnecessary duplication of data collection and processing by the different agencies. Businesses, local government, researchers, and others should benefit directly from the Center, Mr. Surridge said. By providing up-to-date and detailed information regarding census and other matters, the Center should lead to improved research, administration, planning, and decision making, he noted.

University Park Calendar

Jan. 28 —
Feb. 14

Special Events

Thursday, Jan. 28

Anthony Walls on "Compositional Technique and Compositional Thought in the String Quartets of Haydn," 1 p.m., Music Building recital hall.

Instructional Development Workshop,

"Communication Strategies that Help Motivate Students," 3:40-3 p.m., 305 HUB. Royal Shakespeare Company public lecture "Who's Afraid of the Sonnets?" 4 p.m., 105 Forum.

Kern Classics, *Support Your Local Sheriff*, 7 and 9 p.m., 112 Kern.

Friday, Jan. 29

Museum of Art lecture, 5 p.m. Tod Marder, Rutgers Univ., on "Bernini's Pantheon at Aricia."

Cinematheque, *The Man Who Fell to Earth*, 7 and 9:45 p.m., 121 Sparks. Also, Jan. 30 Interlandia folk dancing, 7:30 p.m., HUB Ballroom.

Commonplace Coffeehouse, 8 p.m., 102 Kern. In *The Mood...* "to Dance" winter ball, featuring the Dance Band of State College, 8-11 p.m., HUB Ballroom. Sponsored by the Penn State Ballroom Dance Club and Hgetel Union Ballroom.

Artists Series, ACTER/Actors from the Royal Shakespeare Company, *Shakespeare Lady: The Life and Times of Fanny Kemble*, 8:30 p.m., Schwab Auditorium.

Sports: Swimming (women) vs. Clarion, 6 p.m.; Gymnastics (men) vs. York, Canada, 8 p.m.; Ice Hockey vs. Bowling Green, 9:15 p.m.

Saturday, Jan. 30

Cross-Country Ski Workshop for Advanced Skiers, Shaver's Creek Environmental Center, 10:30 a.m., Stone Valley.

France-Cinema, *Kurosawa, Kagurusha*, 6:30 and 9 p.m., 112 Kern. Also Feb. 1.

Artists Series, ACTER/Actors from the Royal Shakespeare Company, *Love, Love, Nothing But Love*, 8:30 p.m., Schwab Auditorium.

Sports: Fencing (men) vs. Army and Wm. Patterson, 11 a.m.; Bowling vs. Howard, 1 p.m.; Basketball (women) vs. Seton Hall, 2 p.m.; Swimming (men) vs. Ohio State and Cleveland State, 2 p.m.; Volleyball (men) vs. Army, 2 p.m.; Wrestling vs. Navy, 8 p.m.; Ice Hockey vs. Bowling Green, 8 p.m.

Sunday, Jan. 31

Cross-Country Ski Workshop for Beginners, Shaver's Creek Environmental Center, 2 p.m., Stone Valley.

Sports: Swimming, Penn State Diving Invitational; Volleyball (men), Nittany Lion Invitational, 9 a.m.; Bowling vs. Temple, 1 p.m.; Wrestling vs. Maryland, 2 p.m.

Monday, Feb. 1

Deadline for Mary graduates to deliver theses to Graduate School and for departments to certify completion of required papers for March graduates.

First day to sign Spring NDSL and University Long Term Loans, 108 Shields, Through Feb. 10.

Sports: Basketball (men) vs. Bradley, 8:10 p.m.

Tuesday, Feb. 2

Red Cross Bloodmobile, 10 a.m.-4 p.m., HUB Ballroom. Also Feb. 3.

University Faculty Senate meeting, 2:10 p.m., 112 Kern.

Microcomputer Users Group meeting, 7:30 p.m., 189 Materials Research Lab.

English Department Colloquium, 8 p.m., 305 HUB. Inga-Stina Ewbank, Hildred Carlisle Professor, Univ. of London, on "Shakespeare, Ibsen, and the Language of Drama."

Wednesday, Feb. 3

Commons Noontime Concert, "Buffalo Chip Kids," Kern Lobby.

Colloquy speaker, John Cappelletti, 1973 Heisman trophy winner and fullback for the San Diego Chargers, 8 p.m., Schwab Auditorium.

Artists Series, Mazowsze Polish Dance Company, 8:30 p.m., Eisenhower Auditorium.

Sports: Swimming vs. Maryland, (women) 1 p.m., (men) 4 p.m.

Thursday, Feb. 4

Kern Classics, *The Producers*, 7 and 9 p.m., 112 Kern.

URTC, Mark Rozovsky, *Strider*, 8 p.m., Pavilion Theatre. Also Feb. 5, 6: 9:13-16:20.

Sports: Gymnastics (women) vs. Arizona State, 8 p.m.

Friday, Feb. 5

Cinematheque, *The Return of the Secaucus Seven*, 7 and 9:15 p.m., 121 Sparks. Also Feb. 6.

Interlandia folk dancing, 7:30 p.m., HUB Ballroom.

Commonplace Coffeehouse, 8 p.m., 102 Kern.

Artists Series, Ursula Oppens, pianist, 8:30 p.m., Schwab Auditorium.

Student Foundation for the Performing Arts, "Sojourner" by Germantown Theatre Guild, 8:30 p.m., HUB Ballroom.

Sports: Basketball (men) vs. Georgetown, 8:30 p.m.; Ice Hockey vs. Michigan-Dearborn, 9:15 p.m.

Saturday, Feb. 6

France-Cinema, *Trafalgar, The Wild Child*, 7 and 9 p.m., 112 Kern. Also Feb. 8.

Sports: Fencing (women) vs. Cornell, Indiana (PA), James Madison, Ohio State, 9 a.m.; (men) vs. Cornell, Ohio State, 11 a.m.; Wrestling vs. Cleveland State, 2 p.m.; Swimming (men) vs. Temple, 7 p.m.; Gymnastics (men) vs. Massachusetts, 8 p.m.; (women) vs. LSU, 8 p.m.; Ice Hockey vs. Michigan-Dearborn, 8 p.m.

Sunday, Feb. 7

GSA Council meeting, 7:15 p.m., 102 Kern.

Wednesday, Feb. 10

Deadline for signing Spring Term NDSL and University Long Term loans, 108 Shields.

Commons Noontime Concert, "Whetstone Run," Kern Lobby.

Sports: Swimming (men) vs. Bucknell, 7 p.m.

Interlandia folk dancing practice, 7:30 p.m., HUB Ballroom.

English Department Colloquium, 8 p.m., 305 HUB. Agha Shahid Ali, Cary Holladay and Brent Spencer will read from their stories and poems.

Musica da Camera concert, 8:30 p.m., Music Building recital hall.

Thursday, Feb. 11

Late drop deadline.

Kern Classics, *Arthur*, 7 and 9 p.m., 112 Kern.

American Nuclear Society lecture, 7:30 p.m., 101 Chambers. John F. Clarke, deputy associate director for fusion energy, Dept. of Energy, on "The United States Magnetic Fusion Energy Program."

Friday, Feb. 12

Cinematheque, *Kanal*, 7 and 9:15 p.m., 121 Sparks. Also Feb. 13.

Commonplace Coffeehouse, 8 p.m., 102 Kern.

Association of College Unions-International Region 4 Recreational Tournament, 9 a.m.-11 p.m., HUB Ballroom. Spectators invited. Also Feb. 13.

Saturday, Feb. 13

Artists Series, Frederica von Stade, mezzo soprano, 8:30 p.m., Eisenhower Auditorium.

Sports: Ice Hockey, PSU Nittany Lion Invitational. Also Feb. 14. Basketball (women) vs. George Washington, 2 p.m., and vs. Pittsburgh, 7:30 p.m.; Swimming (women) vs. West Virginia, 1 p.m.; Wrestling vs. Pittsburgh, 7:30 p.m.

Sunday, Feb. 14

Sports: Wrestling vs. West Virginia, 2 p.m.

Tina Baker, bassoonist, 3:30 p.m., Music Building recital hall.

Seminars

Thursday, Jan. 28

Chemistry, 12:45 p.m., 333 Whitmore. John T. Herron, Nat'l Bureau of Standards, on "The Chemistry of the Gaseous Intermediate."

Physics, 3:50 p.m., 445 Davey. J. Tucker, Univ. of Illinois, on "Quantum-Limited Response of Non-Linear Tunnel Junctions."

Agronomy, 3:55 p.m., 111 Tyson. Todd Campbell on "Hilling Competition Between Corn, Yellow Nutsedge, and

Velvetleaf," Doug Breda on "Interaction of Three Turfgrass Species."

Math, 4 p.m., 102 McAllister, Mihaly Makkai, McGill Univ., on "Logic and Category Theory."

Friday, Jan. 29

Analytical Chemistry, 11 a.m., 333 Whitmore. Kathy Perry on "Recent Developments in Capillary Columns for HPLC."

Marketing and Geography, 12:45 p.m., 201 Bus. Adm. David MacKay, associate professor of marketing and geography, Indiana Univ., on "Black Holes, Drift Effects and other Bizarre Phenomena: A Look at Probabilistic Multidimensional Scaling."

Geography, 4 p.m., 319 Walker. Don Leon, architecture, on "The Pennsylvania Courthouse Project."

Monday, Feb. 1

Entomology, 4 p.m., 204 Patterson. David Martin, director of research, Chelawn Corp., on "Principles of Professional Lawn Care and Pest Management."

MC3B, 4 p.m., 101 Althouse. Dr. Margaret Halleck, Los Alamos Nat'l Lab., on "Histone Modifications and their Relationship to Constitutive Heterochromatin Content in Cultured Peromyscus Cells."

Tuesday, Feb. 2

Biology, 11:10 a.m., 8 Mueller Lab, Steve Van Gorder and Doug Strange, Rodale Research Center, on "Small Scale Aquaculture."

Ag Greenhouse, 2:20 p.m., 301 Ag Adm. Les Nicolson on "Root and Foliage Diseases in the Greenhouse."

Water Pollution Control, 2:20 p.m., 271 Willard Bldg. Terry Krammes, director, Bureau of Community Environmental Control, PA DER, on "Pennsylvania's Drinking Water Program."

Health Planning and Administration, 3:30 p.m., 5:04 Human Dev. John Kim, health planning and administration, on "Physicians as Obstacles to Drug Product Selection by Pharmacists: The Agonies of Developing a Role Typology."

Geosciences, 3:45 p.m., 22 Deike. Charles Langston, geophysicist, on "Earthquake Plant Pathology, 3:55 p.m., 213 Buckhout. Steven Brosicous on "Prevost Classic #6."

Materials Science, 4 p.m., 112 Walker. T. Peters, "Phenanthrene Carbonization and Graphitization," K. Ewuk on "Hot Isostatic Pressing of Lead Zirconate Titanate."

Thursday, Feb. 4

Chemistry, 12:45 p.m., 333 Whitmore. Duward Shriver, Northwestern Univ., on "New Strategies to CO Activation."

Economics and Institute for Policy Research and Evaluation, 3 p.m., 124 Sparks.

Richard Rosenberg, economics, on "The Australian Price Controls Experience."

Physics, 3:50 p.m., 445 Davey. A. Heeger, Univ. of Pa., on "Semiconductors and Conducting Polymers, from Solitons to Storage Batteries."

Agronomy, 3:55 p.m., 111 Tyson. Michael Loll on "Characterization of a Polymerizing Soil Catalyst," and Gary Pedersen on "The Effect of Germplasm Source on Alfalfa Root Characteristics."

Friday, Feb. 5

Geography, 4 p.m., 319 Walker. Gary Fosmire, nutrition science, on "Zinc and Human Nutrition."

Monday, Feb. 8

Geosciences, 3:45 p.m., 22 Deike. Theodore Maxwell, Smithsonian Institution, on "The Geological Records of the Terrestrial Planets and Icy Moons."

Entomology, 4 p.m., 204 Patterson.

Billy Blair, USDA-SEA Extension, on "Integrated Pest Management in the Agroecosystem and Federal Funding and Policy for Integrated Pest Management."

Tuesday, Feb. 9

MC3B, 11 a.m., 101 Althouse. George R. Stark, Stanford Univ., on "Structure of Amplified DNA from Drug Resistant Mutant Cells."

Ag Greenhouse, 2:20 p.m., 301 Ag Adm. Richard Craig, horticulture, on "Experimental Design in Greenhouse Research."

Water Pollution Control, 2:20 p.m., 271 Willard. Dale E. Baker, agronomy, on "Monitoring Applications of Sewage Sludges on PA Soils."

Plant Pathology, 3:55 p.m., 213 Buckhout. E.J.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Pell, plant pathology, on "Air Pollution Research."

Wednesday, Feb. 10

Physiology, 4 p.m., 121 Noll. Seymour Alpen, Univ. of New Mexico, on "Optimal Time Response to Food Shortage and the Two-Reservoir Energy Model."

Thursday, Feb. 11

Chemistry, 12:45 p.m., 333 Whitmore. Thoma F. George, Univ. of Rochester, on "Laser-Induced Molecular Rate Processes in the Gas Phase and at a Solid Surface."

Physics, 3:50 p.m., 445 Davey. J. Dirk Poll, Univ. of Guelph, on "Recent Progress in Interaction Induced Spectroscopy."

Agronomy, 3:55 p.m., 111 Tyson. Mark Wellesley on "Methods for the Evaluation of Cold Hardiness in Crop Plants," S.L. Ramanakurachchi on "Potential for Double Cropping Soybeans in Central Pennsylvania."

Friday, Feb. 12

Analytical Chemistry, 11 a.m., 333 Whitmore. Prof. John Coetzee, Univ. of Pittsburgh, on "Ion-Selective Electrodes in Non-Aqueous Media."

Geography, 4 p.m., 319 Walker. Jack Sparks and John Kern, Resource Technologies Corp., on "The Federal Procurement Process."

Exhibits

HUB Art Gallery: Henry Blessing.

Kern Gallery: Dorothy Hock, paintings; Ren Hand, ceramics, through Jan. 29.

Shirley and Bruce Siegenthaler, clay and wood, opens Feb. 1.

Jane Kintler, weavings, opens Feb. 1.

Museum of Art: Museum Hours: 11 a.m.-4:30 p.m. Closed Mondays, Thurs, Sundays, 1:30 p.m.

Architectural Fantasy and Reality, Drawings from the Accademia Nazionale di San Lucio, Rome, through Jan. 31.

American Paintings: Before World War II, from the permanent collection, through Feb. 14.

Richard Hamwi, Works on Paper, opens Feb. 7.

David Van Dommelen, Stitches, opens Feb. 7.

Director's Choice, selected works from the Museum's collection, opens Feb. 14.

Pattie Library: Rare Books Room: The Academy of St. Luke, Rome: Architectural Treatises and Perspective Books.

Second Floor, East Patten: Jim Adams, ceramics.

East Corridor: James Abbot, photography, through Jan. 31; John Mahoney, drawings, opens Feb. 7.

Lending Services Gallery: Rebecca Postell, paintings.

Visual Arts Bldg., Zoller Gallery. Gallery Hours: 9 a.m.-5 p.m., Monday through Friday; Saturdays and Sundays, noon to 3 p.m.

School of Visual Arts Student Sculpture Show, through Feb. 14.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 863-1487 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m. February 4, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT MANAGER, HOUSING & FOOD SERVICES, HAZLETON CAMPUS Responsible to Manager, Housing and Food Services, Commonwealth College, for assisting in supervising the overall operation of the Housing & Food Service Unit. Associate degree in institutional management or equivalent; plus two years' related experience in food supervision.

Penn State Intercom

Penn State Intercom

Unit faculties to determine teaching evaluation format

Apparent contradictions in two legislative reports occupied the attention of members of the University Faculty Senate at a lengthy meeting held Feb. 2.

The first report involved a series of changes to the Senate's *Bylaws* and *Standing Rules*. The changes in the *Bylaws* (dealing with absences by senators and replacement procedures) must lie on the table for a month after submission, according to the Senate's *Constitution*.

In the case of the *Standing Rules*, the Committee on Committees and Rules (CCR) suggested changes in the membership of the University Standing

Joint Committee on Tenure, the Senate Committee on Faculty Rights and Responsibilities and the Faculty Advisory Committee to the President.

The principal source of confusion was CCR's proposed definition of the faculty members and administrators eligible for membership on these committees.

In April 1981, the Senate and the President had agreed on the balance of the faculty-administrative membership on the University Promotion and Tenure Review Committee. CCR in attempting to apply this definition to the three other committees found it was not easily

applicable because the Standing Joint Committee on Tenure and Faculty Rights and Responsibilities are required to have a specific number of administrative members.

President Oswald expressed his concern about the apparent exclusion of the College deans from membership on these two committees. The Senate was unable to agree on membership specifications, and the legislation was returned to committee for redrafting.

The second piece of legislation which troubled the senators involved modification to PS-23 in the area of

evaluating teaching effectiveness. This was not the first time that the Senate had viewed these changes; indeed, a "History of Legislative Action" was attached to the proposals.

The first item of business for the Senate was a vote on a motion made the previous October by Senator Sally Small to delete provisions in the legislation requiring all units to ask "a few standardized comprehensive questions on the overall quality of instruction."

Debate became so involved that at one point, having voted to delete all items

(Continued on page 5)

Robert Treahy, professor of music (left), will narrate Copland's "Lincoln Portrait" and Perichetti's "A Lincoln Address" in a commemorative program tonight (Thursday) at 8 p.m. in Eisenhower. The concert, to be heard over the Pennsylvania Public Television Network, will be conducted by Smith Toulson, associate professor of music (right).

University marshalling support to protect student aid sources

Speaking to the Senate on Feb. 2, President Oswald said that higher education and, in particular, student aid were likely to be targeted for severe cuts when the federal budget was presented Feb. 9.

Cuts as high as 60 percent are possible in student aid funds, the President said, adding that last year 80 percent of Penn State's students qualified for some level of student aid. Because student aid is "forward funded," the University is still functioning on a budget prepared during the Carter administration, so the real blow will fall next year.

Dr. Oswald announced that he was writing the parents of all Penn State's undergraduate students to inform them of what could lie ahead. He also noted that he had appointed a task force including members of the faculty, staff and student

body and chaired by Frederick M. Ciletti, special assistant to the President for government affairs. The Committee's charge is to develop strategies that Penn State might use as an institution and in cooperation with other institutions of higher education both within Pennsylvania and throughout the nation in confronting aid cuts.

The Pennsylvania Association of Colleges and Universities has already held a meeting, Dr. Oswald reported, to alert its membership.

Translating the effects of a 60 percent aid reduction to Penn State's student body, Dr. John F. Brugel, director of Student Aid, prepared a set of figures which Dr. Oswald presented to the Senate. According to Dr. Brugel:

— Pell Grants funding, which are

(Continued on page 5)

Six companies join new affiliates program

Eleven molecular biologists from the College of Science have organized an ongoing program which supports basic research by providing "information transfer" to industries for a set yearly fee.

"This is not a consulting relationship," emphasizes Dr. Stanley R. Person, professor of biophysics and molecular biology. Dr. Person directs the new Industry-University Cooperative Program in recombinant DNA.

Six companies participated in the first workshop, which was held Jan. 20 through 22. After necessary administrative costs are deducted, the fees will be distributed to the 11 "faculty associates" to use in their research programs; the money, however, will not be used to supplement faculty salaries.

"Because recombinant DNA technology is going to be more and more important industrially for the next 50 years, a new era has opened in terms of the relationship between universities and industry," Dr. Person observes. "What has happened in other areas of science such as physics and chemistry has now happened in molecular biology — the basic research has born fruit, and recombinant DNA technology can be employed to biologically produce a wide variety of molecules of commercial value. Some of the first molecules marketed may include insulin and a vaccine to protect cattle from hoof and mouth disease virus."

Five major information transfer mechanisms have been established for the program: 1) Seminars and workshops to review the current state of the art; 2) annual summer symposia featuring leading

Dr. Person

scientists; 3) once-yearly visits to industrial affiliates by one or more of the faculty members in the program; 4) visits by industry representatives to faculty associates' laboratories in connection with the campus-based workshops; and 5) a program office to handle relevant inquiries throughout the year.

"A number of major universities such as

Stanford and Cal Tech have programs similar to ours," Dr. Person says, "but as far as I know we are the only one to provide a continuing service throughout the year."

Faculty associates, in addition to Dr. Person, are Reginald A. Deering, professor of molecular and cell biology; Richard J. Frisque, assistant professor of microbiology; Ross C. Hardison, assistant professor of biochemistry; Ronald D. Porter, assistant professor of microbiology and molecular genetics; Robert A. Schlegel, assistant professor of molecular and cell biology; David I. Shalloway, assistant professor of molecular biology; Wallace C. Snipes, professor of biophysics; S. Edward Stevens, associate professor of microbiology and cell biology; William D. Taylor, professor of biophysics; and Chen-Pei David Tu, assistant professor of biochemistry and molecular biology. Additional Penn State faculty may wish to join the program as it grows, Dr. Person notes.

Industry affiliates are Amax, Inc.; Gibco, Inc.; Gulf Oil Corp.; Schering Corp.; Westinghouse Electric Corp.; and Wyeth Laboratories.

The College of Agriculture, in order to encourage more interaction between its faculty members and those in the College of Science, has also contracted for several services of the program.

Industries are attracted to the program

(Continued on page 4)

Affiliates help support basic research effort

At least eight other industrial affiliates programs (or variations on the theme) exist or are being organized at University Park.

The oldest is the Cooperative Program in Metallurgy, which was begun in the '30s, languished during World War II and then was reborn as the Steel Companies Fund in the '50s. Now under the direction of Dr. John H. Hoke, program chairman and professor of metallurgy, the program enrolls 14 companies in several metallurgical fields.

Penn State's largest program is the Cooperative Program in Coal Research. Organized in 1979 by Dr. William Spackman, professor of paleobotany, this dynamic program has attracted 30 companies.

Another successful venture is based in the College of Business Administration. The Corporate Associates Program, administered by Milton J. Bergstein, CBA's director of external relations, has 17 firms on its rolls.

Dr. Joseph Stach, professor of electrical engineering, administers a Microelectronics Affiliates Program which is starting up with a single

Penn Staters

Dr. Frederick R. Matson, emeritus professor of archaeology, has received the prestigious Pomerance Award of the Archaeological Institute of America (AIA) for scientific contributions to archaeology. The Pomerance is one of the two highest awards granted annually by the AIA in recognition of distinguished service to the discipline. It recognizes Dr. Matson's pioneering efforts in applying scientific analysis to the study of ancient ceramics. His work in joining ceramic science to cultural anthropology and traditional archaeological fieldwork has provided "an important technique for the understanding of the social, political and economic structure of antiquity," the award states.

Thomas F. Magner, professor of Slavic languages, has been awarded both a Fulbright Research Fellowship and an IREX grant to carry on research on urban dialects in Yugoslavia during the period January through June, 1983. Dr. Magner has published extensively on Yugoslav dialectology and sociolinguistics.

William R. Schmalstieg, professor and head of the Department of Slavic Languages, and member of the Institute for the Arts and Humanistic Studies, gave an invited lecture at a conference on the structure of ergative languages at the University of Hannover last month. During his stay in Germany, Professor Schmalstieg also gave invited lectures at the University of Münster and the University of Bielefeld. On his return to the United States, he lectured to the linguistics club of Yale University.

Dr. Toby N. Carlson, associate professor of meteorology, presented a talk on "Saharan Dust over the Atlantic" before a special working group on "Climate Fluctuations in the Sahel," meeting in Paris Jan. 27-28. The group was concerned not only with the meteorological causes of the current drought in the Sahara but also in arid regions in general.

Dr. James Canelos, research associate in the Office of the Dean of the College of Engineering, has received the 1982 Young Researcher Award from the Research and Theory Division of the Association for Educational Communications and Technology. The award, which carries a prize of \$500, recognizes Dr. Canelos' manuscript, "The Instructional Effectiveness of Three Content-Independent Imagery Learning Strategies on Different Learning Outcomes When Learners Received Visualized Instruction of Varying Stimulus Complexity," as the best report of a research project in 1982.

Dr. C. Gregory Knight, professor of geography, recently participated in a NATO Advanced Study Institute on Environment Impact Assessment held at Chateau Bonas, France. He discussed various aspects of research at Penn State related to the uses of coal and the impacts of these uses on the environment and on society.

He was also recently appointed to the editorial board of *Energy and Society*, a new journal issued by Sage Publications.

Dr. Roger Pennock Jr., associate professor of soils, has been named the Golden Key Outstanding Faculty Member of the University for 1981-1982. The honor was bestowed by the Penn State chapter of the Golden Key National Honor Society, a student organization. Dr. Pennock was selected from 10 nominees submitted by the student councils of each of the 10 Colleges. The award recognizes excellence in teaching and advising of students. He will receive a personal plaque and a certificate for department use, listing

Dr. Henry J. Hermanowicz, dean of the College of Education, has been appointed by Gov. Thornburgh to serve on the State's Advisory Committee on Block Grants. The Committee, composed of a select group of educators, will help the Pennsylvania Department of Education plan for the switch to block grant funding for education, mandated by the federal Education Consolidation and Improvement Act of August 1981.

The act, described by Dean Hermanowicz as "a prototype for President Reagan's strategies for his 'new federalism,'" puts into one block grant from the federal government 29 educational programs and areas previously funded separately.

Associate Provost Richard Chait has been named by the Association of Governing Boards (AGB) in Washington, D.C., as project director for a \$200,000 study of "The Role of Trustees in Academic Program and Personnel Planning." The grant was funded, in equal parts, by the Ford and Exxon foundations. It will be a two-year investigation from January '82 through December '83. The principal purposes of the project are to: 1) determine the appropriate roles and responsibilities for the academic affairs committee of a board; 2) to offer suggestions about how to improve the effectiveness of such committees; 3) to develop a self-assessment instrument for the committee; and 4) to recommend "model" policies and procedures for a board to follow in the areas of academic programs and personnel. All this will be done with special attention to the board's role in a time of retrenchment.

Lecturing in England, Dr. Peter Gould, professor of geography, discussed the structural analysis of rural communication networks at the Open University at Milton Keynes. At the University of Keele at Stoke, his topic was languages for structural analysis.

Dr. William L. Dunaway, professor of journalism, recently moderated a Newsroom Management Seminar in Seattle, Wash., for Allied Daily Newspapers, an association of daily newspapers in the Pacific Northwest. Dr. Dunaway also recently chaired a session on "Managing News for People" for the Pennsylvania Society of Newspaper Editors in Harrisburg.

Dr. Joseph Jordan, professor of chemistry, presented seminars on "Resource Development in Analytical Chemistry for the New Synfuel Technologies" at the University of Kentucky and the Colorado School of Mines. He also lectured on "Electrochemical Modelling of Biological Systems" at the University of Denver and Colorado State University.

Ralph L. Webb, professor of mechanical engineering, has been named a Fellow of the American Society of Mechanical Engineers.

Sidney E. Barnard, professor of food science Extension, has been named recipient of the 1981 Pennsylvania Dairyman's Association Cooperative Extension Service Award "for valuable noteworthy contributions to the State's dairy industry." The award consisted of a plaque and \$100.

Books shelf

Dr. Dan P. Silverman, associate professor of history, is author of *Reconstructing Europe After the Great War*, a new 360-page book published by Harvard University Press.

In his account of attempts to rebuild national and international financial and monetary systems after World War I, Dr. Silverman constructs a dramatic reinterpretation of Anglo-French-American financial and diplomatic history in the immediate postwar era.

He places the reparations issue in proper perspective as only one of many complex financial and monetary problems facing postwar Europe. He demonstrates that the war produced a crisis in financial and monetary theory as well as in fact. Traditional theory proved inadequate in dealing with the awesome tasks of balancing budgets, liquidating massive debts, halting inflation and stabilizing foreign exchange.

Setting his theoretical and empirical study in a comparative framework, and utilizing previously unused or underutilized financial and diplomatic archives, Dr. Silverman shows that previous work on postwar European financial reconstruction is seriously biased by its narrow Anglo-American perspective — which describes the French as intransigent, ignorant and incompetent.

As the wartime financial entente quickly disintegrated, Britain sought a new alignment with the United States alone. Acting together as creditors, the "Atlantic" nations would impose their superior economic orthodoxy on their less fortunate Continental friends and former enemies. Legitimately pursuing their own national interest, the French resisted all attempts to establish a system of Anglo-American financial and diplomatic hegemony. France rejected such orthodoxy and *laissez-faire* not out of ignorance, but because Anglo-American theories did not suit its unique situation and interests.

The story of financial reconstruction and diplomatic disintegration is told through the words and actions of Treasury officials, central bankers, financiers and politicians. The study describes how the British and French governments attempted to balance their budgets and manage their national debts.

Dr. Silverman demonstrates how the problems created by budget deficits and massive internal debts were intertwined with Inter-Allied debts and German reparations. In the process, the image of France is transformed from one of stubborn ignorance to one of unbending dedication to national interest.

Dr. Henry S. Albinski, professor of political science and director of Australian studies at the University, is the author of *The Australian-American Security Relationship: A Regional and International Perspective*, published jointly by the University of Queensland Press (St. Lucia) and St. Martin's Press (New York).

The book focuses on how, in the post-Vietnam era, Australia and the United States have perceived and pursued their respective security interests and, in turn, on the nature and practice of the relationship that has developed between them. The security theme is treated in a broad context, to determine how defense, diplomatic and economic resources and policies have been harnessed to serve security requirements. The Australian-American security relationship is assessed in global and in various Indo-Pacific settings.

The book concentrates on how the United States and Australian governments have dealt with security questions and with one another, and with the outcome. It is largely a narrative of the interweave between the Carter Administration and the Fraser government. The concluding chapter evaluates how the Australian-American security connection has been affected by the dynamics of the bilateral relationship.

Research for the book was capped by Dr. Albinski's appointment as a visiting fellow in the Strategic and Defense Studies Center at the Australian National University during 1978-79, and as a Senior Fulbright-Hays Scholar during the 1979 portion of his Australian visit. He conducted field research between 1978 and 1980 in Northeast and Southeast Asia, New Zealand and the South Pacific, Southern Africa and the United States. Aside from documentary sources, he

conducted hundreds of interviews with diplomats, ministers, legislators, agency administrators, intelligence and military officers, business executives, journalists and academics.

Florence A. Salinger, senior assistant librarian at Capitol Campus, is co-author, with Eileen Zagon, Capitol cataloger, of *Monograph Cataloging Notes*, published by Knowledge Industry Publications, Inc., White Plains, N.Y.

The book is designed as a manual for librarians who have responsibility for the descriptive cataloging of monographic works. It focuses on one aspect of that description — the notes included on a catalog card which augment the basic bibliographic information. As such, it includes a compilation of 788 examples of representative notes selected for their suitability in all types of libraries.

The compilation is intended as a decision-making aid for catalogers in determining the appropriateness of particular notes and in acquiring suggestions for their phrasing and punctuation. Since it is customary in cataloging procedure to observe standard rules as interpreted by the Library of Congress, the examples provide analogies with Library of Congress practice.

Dr. A.C. Lasaga, associate professor of geochemistry, is co-editor of a book, *Kinetics of Geochemical Processes*, issued by the Mineralogical Society of America as Volume 8 in its series, *Reviews in Mineralogy*. Of the eight chapters in the book, Dr. Lasaga is the author of four and the co-author of one. Described as a "reference textbook" designed for postgraduates, the volume is the first in its series to be concerned with processes. The other seven deal with different mineral groups.

Dr. Joseph H. Dahms, professor emeritus of medieval history, is the author of *Seven Medieval Historians*, published by Nelson-Hall, Inc. (New York).

In his book, Dr. Dahms brings to light the intellectual spirit of the Middle Ages as exemplified in the lives and works of seven historians. They are:

Procopius, a Byzantine lawyer and scholar whose Wars reported the campaigns against the Vandals and Ostrogoths; the Venerable Bede, the monk who compiled the *Ecclesiastical History of the English People*; Al-Tabari, who wrote the first universal history of Islam; Otto of Freising, a German bishop, historian and philosopher; Matthew Paris, who both wrote and illustrated *The Chronicle Majora*; John Froissart, a French priest, author of the *Chronicles of England, France and the Adjoining Countries*; and Ibn Khaldun, whose *Muqaddimah* analyzes the forces governing the rise and fall of civilizations.

Promotions

Faculty

Dana D. Anderson to assistant professor of psychology at Behrend College, effective March 1.
Robert Gillingham to assistant professor of English at Fayette, effective March 1.

Staff Exempt

Carla Holway to admissions counselor II in Undergraduate Admissions.

Staff Non-Exempt

Janet M. Borden to senior nutritional care technician at Hershey.
Gail F. Owens to senior research technician at Hershey.

Clerical

Donna S. Boozel to inpatient billing clerk at Hershey.
Sandra J. Butts to clerk, accounting A in Controller's Office.
Kharmen Dahmeh-Chami to secretary II in Libraries.

(Continued on page 1)

(Continued from page 2)

Susan A. Landucci to secretary B at Hershey.

Bonnie Jean Ryder to purchasing clerk in Business Services.

Betty S. Walker to procedures clerk in Registrar.

Technical Service

Dan C. Cox to mechanic, auto A in Physical Plant.

Robert J. Page to group leader, orchard worker and machine operator in Agriculture.

Gerald M. Robison to mixer-bakery in Housing and Food Services.

Gregory A. Summers to receiving clerk at Hershey.

Dr. Deno G. Thevaos, professor of education and psychology in the College of Education's Division of Counseling and Educational Psychology, retired Dec. 31 with emeritus status.

A Penn State faculty member since 1947, Dr. Thevaos received the Christian R. and Mary F. Lindback Award for Distinguished Teaching in 1966. He devoted the major part of his career to developing systems of instruction, producing one of the first completely videotaped courses to teach educational psychology to students in Continuing Education and at Commonwealth Campuses.

He also devised procedures for individualizing instruction in large classes through optional learning activities and student teaching assistants. Most recently, he authored *Educational Psychology for Professional Effectiveness*, being used for the first time this term as a correspondence course.

Dr. Thevaos has served the College and University in numerous capacities during his career. He was the acting head of the Department of Educational Psychology in 1970-71 and was active in the University Faculty Senate. Since 1976, he has been a member of the committee on scholarship selection for the Renaissance Scholarship Fund, which he also chaired for two years.

Dr. Thevaos, whose research has focused on the psychology of teaching and methods for preparing future teachers, earned his B.A. degree at Emory University. He holds the M.A. and D.Ed. degrees from Columbia University's Teachers College.

George H. Kane, group leader research machinist in the College of Engineering, retired Jan. 23 after serving since 1950.

Carolanne M. Kuas, a copy center operator in the College of Agriculture, retired Feb. 1 after service dating back to 1966.

Joseph C. Lynn, mechanical designer in the College of Engineering, retired Feb. 1. He had been employed since 1971.

Philip J. Payne, supervisor of night and weekend operations for the Office of Physical Plant, retired Jan. 14 after serving since 1969.

Rita E. Rudy, a general helper in Business Services since 1966, retired Feb. 1.

Nevin G. Snook, offset duplicator operations/repairer in the Controller's Office, retired Feb. 1. He had been at the University since 1972.

Harold S. Sones, coordinator-inspector with the Office of Physical Plant, retired Feb. 1. He joined the staff in 1965.

Mary A. Tomasello, a food preparer at the Beaver Campus since 1969, retired Jan. 21.

Obituaries

Thomas E. Wilcox of Wellsboro, a member of the Board of Trustees, died on Feb. 4.

Mr. Wilcox had only recently joined the Trustees, having been appointed to the Board by Governor Dick Thornburgh in 1981 for a three-year term.

Daniel C. Grissinger, a carpenter with the Office of Physical Plant from 1930 to 1960, died Jan. 21 at the age of 88.

Cecile P. Sindin, a member of the faculty from 1952 until her retirement in 1969 as assistant professor of home-community relationships, died Jan. 28 at the age of 78.

Word has been received of the death last September of M. Elizabeth Westgate, who was an associate professor of home economics at her retirement in 1953 and a member of the faculty for 31 years. She was 88.

Aaron Yoder, a maintenance worker with the Office of Physical Plant, died Nov. 2 at the age of 68. He was employed from 1964 to 1975.

Staff Vacancies

The following vacancies for positions classified as staff except or staff nonexempt have been listed with the University Employment Division for fill. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., Feb. 18, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

AREA REPRESENTATIVE, COMMONWEALTH EDUCATIONAL SYSTEM, NEW KENSINGTON CAMPUS Responsible for the functions of development, organization, operation and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two to three years of directly related experience or a master's degree or equivalent, plus one to two years of directly related experience.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, BERKS CAMPUS Responsible to the Dean of Student Affairs for the implementation and coordination of the Student Activities Program and for the job placement service; also, assisting with secondary school relations and financial-aid functions, and other general areas of Student Affairs at the Berks Campus. Master's degree in student personnel administration, counseling, or equivalent training, plus up to and including one year of effective experience.

LEAD SYSTEM DEVELOPER, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK Responsible to the Manager of the Systems Development Group in the Computer Center for providing technical leadership and coordination of the development of major enhancements of computer operating systems, major modifications of externally available system software, and the development of computer subsystems. Generates and researches proposals for new operating system enhancement projects. Provides leadership role in group review of design code in accordance with accepted programming productivity standards. Master's degree (or equivalent) in computer science or related discipline, plus four years' experience in system programming and system development on large IBM system. Demonstrable technical leadership ability.

SENIOR SYSTEM DEVELOPER, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK Responsible to the Manager of the Systems Development Group in the Computer Center for the development of major enhancements of computer operating systems, modification of externally available system software, and the development of computer subsystems. Generates and researches proposals for new operating system enhancement projects. Master's degree in computer science or equivalent, plus minimum of two years' effective experience in system programming and system development on large IBM system; or bachelor's degree (or equivalent), plus four years of effective experience.

DIRECTOR OF PHYSICAL PLANT-MEDICAL CENTER, COLLEGE OF MEDICINE, HERSHEY Responsible to the Associate Provost for Administration for the maintenance and efficient operation of the physical plant, including grounds, buildings and the mechanical and electrical systems, as well as the planning of construction of additions and renovations to the facilities and effective and efficient operation of the environmental services department. Bachelor's degree in mechanical or electrical engineering, plus four to six years of effective experience in the engineering field, which should include demonstrated experience in the planning and management of physical plant budgets and at least two years in a management capacity.

AREA REPRESENTATIVE, COMMONWEALTH EDUCATIONAL SYSTEMS, OGONTZ CAMPUS Responsible for the functions of development, organization, operation and administration of Continuing Education programs and services within an

assigned geographic district. Bachelor's degree or equivalent, plus two to three years of directly related experience or a master's degree or equivalent, plus one to two years of directly related experience.

ADMISSIONS COUNSELOR 1, OFFICE OF UNDERGRADUATE ADMISSIONS, UNIVERSITY PARK Responsible to the Associate or Assistant Director of Admissions for general assistance in handling of the more routine admissions matters in an assigned regional area. Participate in and administer admissions activities for freshmen, advanced standing, transfer, provisional, and nondegree students who are baccalaureate or associate degree candidates for University Park Campus and for assigned Commonwealth Campuses and Betrend College. Bachelor's degree (or equivalent), plus six to nine months of effective experience in educational administration. A record of participation in and contribution to extra-curricular or avocational or civic activity desirable.

PROGRAMMER-DOCUMENTOR, COLLEGE OF ENGINEERING, UNIVERSITY PARK Write scientific and engineering applications software for courses and specific research projects, using the time and editors. Modify existing programs and files. Document existing and new programs, software packages and computer laboratory facilities. Develop standardized development formats and procedures. Associate degree (or equivalent) in computer science or a related field, plus over one and up to and including two years of effective experience with programming is required, with course work in calculus and science or engineering preferred.

AREA REPRESENTATIVE, COMMONWEALTH EDUCATIONAL SYSTEM, MOKESPORT CAMPUS Responsible for the functions of development, organization, operation and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two to three years of related experience in business, industry or education.

PROGRAM ASSISTANT, COMMONWEALTH EDUCATIONAL SYSTEM, MOKESPORT CAMPUS Provides assistance to the Area Director in planning, implementing and conducting a continuing education program of the campus service area; responsible for supervising office personnel, seeing that local contacts and maintaining related records. Bachelor's degree, plus one to two years of related experience in performing administrative and supervisory tasks.

ADMINISTRATIVE AIDE, OFFICE OF STUDENT AID, UNIVERSITY PARK Develop and maintain a strong working knowledge of all federal, state and institutional sources of financial aid. Prepare correspondence for a broad range of financial aid programs and services. Assist Office of Student Aid staff with the awarding and adjusting of campus-based programs. Responsible for development of written procedures reflecting office policy for, and analysis of, the Financial Aid Forms (FAFs) for independent students. Assist students and parents, and other offices and agencies, with financial aid matters. Bachelor's degree or equivalent, plus over one year of effective experience in an area applicable to aid administration, are required.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, SCHUYLKILL CAMPUS Responsible to the Dean of Student Affairs for the direction and coordination of various functions within Student Affairs operations, including student activities, career development and placement programs and services, cultural programs and other programs pertaining to Student Affairs. Supervise staff employees, train and supervise students and other part-time employees as required. Master's degree, or its equivalent in counseling, student personnel or related field, plus over three months up to and including 12 months of effective experience.

ASSISTANT BUILDING SUPERINTENDENT, OFFICE OF STUDENT AFFAIRS, UNIVERSITY PARK Responsible to Building Superintendent for the supervision and maintenance of the Hetal Union Building physical facilities and equipment and providing technical support services for student activities during the night hours of the week: Monday, Tuesday, Wednesday, Thursday, Friday, 9:30 a.m. to 9:30 a.m.; Friday, Midnight to 9:30 a.m.; High school diploma with some trades training, plus one to two years of effective experience in maintenance of physical plant systems are required. Must have demonstrated ability to supervise, train and direct other employees.

INTERCOM is an internal communications medium published weekly during three terms of the class schedule and bi-weekly during the Summer Term for the faculty and staff of The Pennsylvania State University.

Calendar report

The Calendar Conversion Council has recommended appointment of a Standing Advisory Committee on the Summer Session.

The recommendation was among those for the development of a Summer Session in the new semester calendar forwarded by Council to President Oswald.

According to the Council recommendation, a Standing Advisory Committee should be established for the Summer Session. The Committee would be charged initially with the responsibility to search for and recommend a Summer Session director.

Council members, prior to approval of a final draft of recommendations, discussed a wide range of concerns, including the role of the Summer Session director, tuition, student population, and faculty compensation.

Among other recommendations of the report forwarded to President Oswald are:

- The Summer Session director should be appointed no later than July 1, 1983, and preferably by Jan. 1, 1983.

- All tuition for Summer Session courses will be on a per-credit basis.

- The Summer Session should offer a comprehensive program to support a variety of student populations, including freshmen.

- The existing budget process should be modified to establish separate academic budgets for Summer Session activities.

Council also approved the following four recommendations from its Communications Committee:

- Review and action on the request from the English Department for funding to implement the English 15 and 220 proposal should be expedited.

- Academic review and approval by the Colleges and the Faculty Senate of the "Basic Six" programs, Biology, Chemistry, English, Mathematics, Physics and Speech Communication, should be expedited.

- The Division of Undergraduate Studies should be asked to incorporate calendar material in its "Advising Notes."

- The Administrative Committee on Undergraduate Instruction should be requested to make information on the calendar conversion an integral part of the freshmen orientation and testing program, effective immediately.

On other business at its Feb. 3 meeting, Council:

- Reported that the Faculty Contracts Committee report has been reviewed and accepted by the Senate Faculty Affairs Committee, which is still considering the Sabbatical Leaves report.

- Urged that course and curriculum changes be submitted to the Senate Curricular Affairs Committee as soon as possible.

- Noted that the Instructional Workshop Study is in the final stages of development and will be distributed in the near future.

Interoffice envelopes should be recycled

Because recycling of interoffice envelopes at the University Park campus can save many dollars, departments and individuals are urged to send excess supplies of used envelopes to Mailing Service, Room 108 Business Services.

Every type of envelope which might conceivably be reused should be sent — letter size; 10 lined or unlined, manila or white; even those as large as 11- by 15-inches. These envelopes will then be routed to departments which have expressed a need for them. At present, the expressed need is far greater than the supply.

FLEX 83-C schedule preferred by Deans

Deans of the Colleges at University Park have indicated a preference for the FLEX 83-C schedule in meeting their program requirements under the new semester calendar. The schedule is being used in the Facilities/Faculty/Program Match project which currently is underway.

The basic configuration of FLEX 83-C is shown in the accompanying chart. The schedule provides for 41 minimum conflict class meeting patterns as opposed to more than 800 which characterize the present term calendar schedule.

FLEX 83-C provides for the following categories of meeting patterns:

- 1) Three-time-a-week, (or equivalent) sequences. Classes would meet Monday, Wednesday and Friday for 55 minutes.
- 2) Two-time-a-week, period-and-a-half

sequences, in which classes would meet Tuesday and Thursday for 80 minutes.

- 3) Two-time-a-week, single period sequences. Classes would meet Monday and Wednesday, or Tuesday and Thursday for 55 minutes.

- 4) Four-time-a-week, single period sequences, in which classes would meet Monday, Tuesday, Thursday and Friday for 55 minutes.

- 5) Five-time-a-week, single period sequences. Classes would meet Monday, Tuesday, Wednesday, Thursday and Friday for 55 minutes.

Tentative course lists for the 1983-84 academic year utilizing this schedule are to be submitted to the University Scheduling Office by Feb. 16.

Search opens for Delaware County post

A search has been opened for candidates for the position of associate director for academic affairs at the Delaware County Campus.

Dr. Deborah F. Hunter, assistant professor of speech communication at the Campus, will chair the Search Committee. Members are Dr. Thomas J. Knight, associate dean of the College of the Liberal Arts; Dr. Joseph M. Lambert, head of the Department of Computer Science; Richard A. Swavely, regional director for Continuing Education, Administrative Field Services; and Stephen Porter, associate professor of art.

Delaware County representatives are Dr. Michael A. Kersnick, associate professor of business administration; Dr. John R. Ousey Jr., assistant professor of environmental sciences; Dr. Priscilla Clement, assistant professor of history; and Harrison Butler, president of the Undergraduate Student Association.

The new associate director will be responsible to the Campus director for administering academic functions. Responsibilities will include working with the Colleges and departments of the University in providing leadership in the professional development of faculty, in initiating new and innovative programs and in Campus service to the community.

Candidates should have an earned doctorate and successful academic administration experience, as well as at least five years of experience involving full-time teaching and scholarly pursuits,

including preparation of proposals for external funding.

Applications and nominations should be sent by Feb. 15, 1982, to John D. Vairo, director, Delaware County Campus, 25 Yearsley Mill Road, Media, PA 19063.

Research support

(Continued from page 1)

company — but one that makes a very substantial contribution for information transfer. Dr. Richard E. Tressler, program chairman and professor of ceramic science and engineering, reports that, although no definite commitments have been made, 10 companies have expressed interest in a Ceramic Science and Engineering Affiliates Program, which he hopes will begin operations in Spring Term.

Three programs are just beginning to organize. The Polymer Science Affiliates Program is under the direction of Dr. Michael M. Coleman, program chairman and associate professor of polymer science. The Nondestructive Testing and Evaluation Program, directed by Clayton O. Ruud, senior research associate at the Materials Research Laboratory, is being organized under the auspices of Intercollege Research Programs. And Dr. Robert B. Beelman, associate professor of food science, is contacting companies in connection with a Cooperative Program in Mushroom Products Research.

Affiliates

(Continued from page 1)

for a number of reasons, according to Dr. Person. Among them:

- Some industries want the chance to evaluate new research findings; even if there's nothing in it for them, they're willing to pay something to find that out.

- While the basic research findings being presented at the seminar/workshops can be obtained from other sources — i.e., journals or professional meetings — the program makes them available quickly in a concentrated form tailored to the needs of member industries.

- Companies who don't want to employ recombinant DNA technology themselves can still keep an eye on what's going on in the field.

- Industries are always on the lookout for research personnel; students need jobs. The program provides a meeting place.

The program also has the potential of making an important contribution to research at the University. Dr. Person believes meaningful contacts between faculty members and representatives from industries could eventually lead to new research contracts.

"Seminars delivered by outside speakers, as well as the annual symposia, will be open to all interested faculty members and graduate students," Dr. Person says, adding that he believes the program will help illuminate areas of new curricular importance.

"In molecular biology," he explains, "we've concentrated our efforts on *E. coli*, to the exclusion of many other interesting organisms. At the January seminar, one of the speakers (Frank E. Young, Dean at the University of Rochester School of Medicine and Dentistry) emphasized the need today for much wider and broader training in bacterial physiology and ecology. More people are needed to study the molecular biology of yeast, and a wide variety of organisms, especially soil organisms. This is a deficiency in our program at Penn State, and it's the kind of insight that we should consider when we hire new faculty and revise our curricula. Dean Young especially noted the dearth of scientists in other important areas such as botany."

Dr. Person reports that a second group of six companies is being contacted for a May seminar, and the faculty associates hope to add another six companies by October.

"Twenty sounds like about the right number," he says, "but if we find we can provide adequate service to more we will. Regardless of the final number, the support of the six charter members will always be cherished by the faculty associates."

Pointing out that the MC3B Department has in the past few years added a number of young faculty members with training from such institutions as Yale, Harvard, Stanford, and Cal Tech, Dr. Person said, "We could never have started the program without these bright young people."

College of Science Dean Thomas Wartik noted:

"That major industrial concerns in significant numbers are so receptive to this new program means they both recognize the great potential of recombinant DNA technology and also that Penn State has a head start over most other institutions in having assembled a substantial group of faculty members with expertise in this important area."

"I was highly impressed with the first conference and am confident the succeeding ones will prove just as attractive to the industrial clients."

"Dr. Person and his colleagues deserve much credit for having taken these important initiatives."

PS-23 evaluation procedure established by Senate

(Continued from page 1)

referring to the preparation of standardized questions, senators then voted to accept a recommendation to appoint an ad hoc committee to develop the questions.

"You can't have meant that," Senate Chairman Nancy Tischler chided, and the vote was then reversed.

The most controversial provisions of the legislation, however, involved two items in Recommendation 1, which many senators termed contradictory.

Item 2 read: "The methods of evaluation to be used within a unit, as well as the manner in which the results are presented in the dossier, shall be specified by the faculty of that unit."

("Unit" was defined as "department.") Item 8 said: "The evaluation procedure specified by each unit must be approved by the appropriate dean (and by the Dean of the Commonwealth Campuses for those faculty assigned to any of the Commonwealth Campuses), whatever procedure a unit chooses to use must be designed by or selected by the faculty of that unit for evaluating teaching effectiveness for purposes of promotion and tenure."

A number of senators pointed out that item 8 would put into effect different evaluation procedures at different locations. However, in a close vote the Senate accepted both items 2 and 8.

Further debate focused on whether the legislation was so phrased as to maintain the confidentiality of the data in the evaluation surveys and on how soon results should be made available to faculty members who had been evaluated.

A figure of six weeks was suggested — and challenged by senators in administrative positions who felt this deadline would be extremely difficult to adhere to. This item was sent back to committee. An amendment was added to enhance confidentiality, and the rest of the recommendations were passed. The text appears below.

Any proposal for revisions to PS-23 passed by the Senate takes the form of a recommendation from that body to the President and must be acted upon by him before it becomes policy.

In other business, the Senate heard an appeal from Richard M. McClure of the Curricular Affairs Committee, which has become concerned because the anticipated flood of course changes in connection with calendar conversion has not yet begun to reach the Committee.

Professor McClure pointed out that if everyone waits until the final April

deadline, the Committee — even though it has been reorganized and enlarged to deal with the task — simply will not have the time it needs to give due consideration to the changes.

Graduate School Dean James B. Bartoo, noting that the Graduate School faces similar jams when the deadline for submission of dissertations occurs, pointed out that Curricular Affairs may have to reconcile itself "to taking a few short cuts, considering proposals on a *pro forma* rather than a substantive basis and catching up any mistakes next year."

Marlowe Froge, general manager, Learning and Telecommunications Services, presented an oral informational report on "Instructional Materials Development and Alternate Instructional Systems Design."

Another informational report, prepared by Manfred Kroger, vice-chairman of Faculty Affairs, dealt with a December Ombudsman seminar. Among the suggestions made by those attending were:

— "The gradual decline in ombudsman's case loads during the seven-year existence of the program at Penn State does not necessarily suggest the system is working; it could mean ombudsmen are no longer seen as positive contributors to conflict resolution.

— "To improve ombudsmanship and the grievance mechanism the following are recommended for ombudsmen:

Enhancement of status through perquisites; selection of the best qualified person; reduction in other work assignments; provision of better visibility; university-wide standardization; increase in term of office to four years with an annual opportunity for constituents to replace the incumbent; revision of the form "Petition for Review of a Complaint" and assistance to a complainant when filing the form; scheduling of annual meetings of current ombudsmen in the program.

— "The University may be served well by the creation of a new position, University Ombudsman, to serve all the constituencies in the system.

— "The ombudsman should use his/her exposure to complaints as an indicator of needed organizational correction. Hence, the ombudsman might act and be seen as an agent of change. The ombudsman's advisory role could be expanded to include activism."

The Senate had scheduled a forensic session on Compulsory Physical Education, but discussion had to be postponed because of the lateness of the hour.

Aid sources

(Continued from page 1)

awarded to the neediest categories of students, could be reduced by 29 percent from the current year level. This could mean a loss of \$3.7 million to Penn State students.

— Campus-based programs (National Direct Student Loan, Supplemental Educational Opportunity Grant, College Work Study) would be reduced by approximately 33 percent. This translates to a reduction of \$1.9 million and to total elimination of more than 2,000 awards.

— Early estimation of the impact of the Guaranteed Student Loan changes indicates approximately 41 percent of the current borrowers would be either totally eliminated from the program or have their loan reduced.

— Graduate students would be eliminated from the GSI regardless of their documented need.

Cautioning that these figures were not yet fact, Dr. Oswald said that while his intent was not to alarm the senators, he felt that they should be informed. He also expressed his continuing concern that higher education funds were being cut disproportionately in comparison to other areas of service.

Text of legislation

The following legislation, passed by the University Faculty Senate on Feb. 2, modifies section III of PS-23, dealing with the evaluation of teaching effectiveness.

In evaluating a candidate for promotion or tenure, the department committee should seek the views of senior members of the candidate's academic unit. In many cases, evaluations by expert peers in other institutions may provide essential helpful information.

(1) Evaluation of teaching effectiveness for purposes of promotion and tenure shall include both peer and student input.

(2) The methods of evaluation to be used within a unit, as well as the manner in which the results are presented in the dossier, shall be selected by the faculty of that unit.

(3) In the case of the College, "unit" is defined to mean the department or similar academic entity, for the University Libraries, "unit" is defined as the University Libraries.

(4) It is the responsibility of the unit to

provide clear documented evidence of a candidate's teaching effectiveness, including both peer and student evaluation.

(5) The evaluation procedure specified by each unit must be approved by the appropriate Dean (and by the Dean of the Commonwealth Campuses for those faculty assigned to any of the Commonwealth Campuses); whatever procedure a unit chooses to use must be designed by or selected by the faculty of that unit for evaluating teaching effectiveness for purposes of promotion and tenure.

(6) The process must be managed so that the candidate is not in a position to influence the student responses or the interpretation of the survey results.

(7) Such surveys shall belong to the unit which administers them and shall be summarized and interpreted as part of the promotion and tenure documentation. Such surveys shall not be used by the unit for any other purposes without the express permission of the candidate.

Funding Sources

For further information, call 865-1372

374-1 Extraordinary opportunity for research at the National Science Foundation (NSF) staff just learned that \$6 million, instead of Reagan's March proposal of \$3.7 million, has been appropriated for NSF's Economics Program. Since the program staff and the research community have been anticipating operations on the \$3.7 million level, the final appropriation of \$6 million appears and feels like a windfall, even though it is a decrease from the FY 1981 appropriation of \$8.1 million.

Due to the fiscal uncertainty that has permeated the entire budget process, there has been a startling decline in proposal submissions. At this writing, there have been only 17 proposals submitted to the Economics Program for a mid-February target date. Last year at this time 111 proposals had been submitted. NSF staff continue to encourage proposal submissions, not just to the Economic Program but to the other social and behavioral sciences programs. Staff caution that standards of scientific merit will not collapse even though there are so few proposal submissions. Instead, it may be easier to secure funds for budget items that are normally not funded when the competition is so keen. Investigators with specific project ideas are urged to review the NSF brochure, "Grants for Scientific Research" and to contact the appropriate program officers in the Division of Social and Economic Sciences. (Ref: OPF Reports 1/19/82)

375-1 The National Endowment for the Humanities 1982 Summer Seminars for College Teachers has an application deadline of April 1, 1982. NEH is offering 58 seminars in various disciplines of the humanities and humanistic social sciences. The programs are for 6 weeks and include a \$2,500 stipend to cover travel and other expenses. This is the largest federally-supported faculty development program and has had 10,000 participants since its inception in 1973. Preference is given to college teachers who have been teaching for at least 3 years and have not recently had the opportunity to work at a master's library. Director, location and topic information are available. (Ref: NEH Memorandum/Announcement/Seminar Descriptions)

From the Press

Sylvester Judd's New England. By Richard D. Hathaway. 362 pages. \$17.95.

Richard D. Hathaway, professor of English at SUNY-New Paltz, presents Sylvester Judd (1813-53) as a representative figure whose life and works illustrate the intellectual and religious tensions of Emerson's day. Judd, a convert from Congregationalism to Unitarianism, flirted next with transcendentalism, touching on most points in the New England compass during his intellectual and spiritual odyssey.

Professor Hathaway, who began his research at Harvard, located and examined the Judd Papers (now in Houghton Library) and then consulted scores of Judd's relatives, family friends and librarians to complete this book.

Fifth rabid skunk identified in Centre County

University Safety Officer Howard O. Triebold Jr. this week urged University students and faculty and staff members to update rabies vaccinations of family pets, keep pets on a leash and avoid wild animals.

His warning came after a skunk caught on the outskirts of campus was identified as a carrier of rabies. It is the fifth rabid skunk captured on or near campus since September.

"This is highly unusual. It's been several years since we saw any cases of rabies among wild animals here," Mr. Triebold said. "I don't want to frighten people, but I think extreme caution is warranted. We have a large skunk population on the outskirts of campus, and on occasion the animals even come onto campus."

Rabies, a virus disease, can infect all warm-blooded animals. Once it develops, it is nearly always fatal. Although vaccines are successful with domestic cats and dogs, there is no approved rabies vaccine for other animals.

"It is even dangerous to touch an

animal that has been killed along the road, since it may have been a carrier," Mr. Triebold noted.

The problem is not unique to Centre County or even Pennsylvania. An unusually large number of rabid skunks has been reported this year from a number of northeastern and northcentral states.

So far, the problem in Centre County has been limited to skunks. But Police Services officers urge people who see other animals that appear to be sick to call them. Those calls, and calls about skunks, should be made to Mr. Triebold or Police Services officers at 863-1111.

Most of the animals identified as rabies carriers to date have been in the area of Beaver Stadium and the University barns near the stadium. A special warning has been issued to people who walk or work in that area.

The most recent rabid skunk incident occurred in Patton Township near the Heritage Oaks apartment complex.

News in Brief

Panel to discuss U.S.-China relations

"U.S.-China Relations: A Decade after Nixon's China Trip" will be the subject of a panel discussion on Tuesday, Feb. 16, from 7:30 to 9 p.m. in Room 101 Kern Graduate Building.

Sponsored by the East Asian Studies Committee, the panel discussion will feature Dr. E. Tu Zen Sun, professor of Chinese history, who will examine Sino-U.S. relations in historical perspective; Dr. Henry S. Albinski, professor of political science, who will analyze the impact of U.S.-China rapprochement on Southeast Asia; Dr. Vernon V. Aspturian, Evan Pugh Professor of political science and director of the Slavic Center, who will discuss the impact of U.S.-China rapprochement on Sino-Soviet and U.S.-Soviet relations; and Dr. Parris H. Chang, professor of political science, who will analyze the major issues in contention between the two nations now and their relations in the years ahead.

The panel will be chaired by Dr. Thomas F. Magner, associate dean of research and graduate studies in the College of the Liberal Arts.

Two choirs to sing

A joint concert featuring the Penn State Chamber Choir and Concert Choir has been scheduled for 8:30 p.m. Wednesday, Feb. 17, in the Music Building recital hall.

The Chamber Choir will present the first half of the program, opening with "Salve Regina," a Gregorian chant. The Chamber Choir will then perform two later settings of "Salve Regina" — the first, by Josquin des Prez, will feature David Gatts on the sackbut, a Renaissance instrument. The women singers from the Chamber Choir will perform the second setting of the piece by Claudio Monteverdi, and continuo accompaniment will be provided by June Miller on the harpsichord.

Two motets by Monteverdi and the Stravinsky Mass will conclude the first portion of the concert. A double wind quintet composed of faculty and students — as well as soloists Chris Sperry, soprano; Janice Wilson, mezzo-soprano; Charles Claus and Ralph Lyon, tenors; and Richard Steinhart, bass — will accompany the Chamber Choir on the Stravinsky work.

As a part of a special tribute commemorating the 150th anniversary of Haydn's birth, the Concert Choir will perform the composer's "Lord Nelson Mass" for the second part of the program. Musica da Camera will accompany the singers, and soloists for the piece will be sopranos Paula Hefer and Jan Tsui-er, mezzo-soprano Karen Hafke, tenor Russell Wynn and bass Richard Steinhart.

Early registration set

Degree students who preregistered and wish to accept the schedule assigned as a result of preregistration for Spring Term may register early and avoid returning to regular registration immediately prior to Spring Term.

Early registration for Spring Term 1982 will be held from 8:30 a.m. to 4:30 p.m., Feb. 24, 25, 26 and March 1 and 2 in Room 112 Shields Building. In order to register early, a student must present evidence of fee payment, ID Card and Preregistration Schedule (Pink Slip). Students who register early will not be permitted to return to the regular registration in the Intramural Building.

New Mont Alto number

The Mont Alto Campus reports that it has a new network telephone number — 488-2199.

Robert Klein to appear Friday at Eisenhower

Comedian Robert Klein will perform in an Artists Series presentation in Eisenhower Auditorium on Friday, Feb. 12, at 8:30 p.m.

Known to television viewers for his work on numerous shows — including Johnny Carson's "The Tonight Show" and "Saturday Night Live" — Mr. Klein got his start on television when CBS replaced "The Glenn Campbell Show" with Mr. Klein's "Comedy Tonight."

He also has performed on Broadway, with his role in *They're Playing on Song* winning him a Tony-award nomination. His film credits include a starring role in Columbia Pictures' *Nobody's Perfect*.

Mr. Klein has recorded several albums, with his first two, "Child of the Fifties" and "Mind Over Matter," both receiving Grammy-award nominations.

Mr. Klein will bring to Penn State what has been described as "this precise memory for the most subtle details." It is this quality that enables him to depict with humor subjects ranging from luncheon food in the public school to the president of a major oil company.

Tickets are on sale at Eisenhower Auditorium box office weekdays from 9 a.m. to 4 p.m. Phone orders on Mastercard/Visa will be accepted at 863-0225 during sale hours.

Calendar data due

Individuals and organizations wishing to include items in INTERCOM's Spring Term Calendar should send or phone notices by Friday, Feb. 26, to Room 312 Old Main, 865-2501. The calendar will appear on Thursday, March 11.

Seigenthalers showing works in Kern show

Kern Commons Gallery is currently featuring a show of crafts by Dr. Bruce Seigenthaler, research professor of speech pathology and audiology at the University, and his wife, Shirley.

The Seigenthalers have collaborated in designing and producing objects combining clay, wood and weaving. Dr. Seigenthaler, who at one time studied to be a teacher of industrial arts, produces furniture and other wood objects. Mrs. Seigenthaler works in porcelain and stoneware.

Journalist to speak

Dr. Lynn Martin Haskin, assistant professor of journalism at Delaware County, will speak on "Sex-Typed Occupations: Assessment and Changes," Tuesday, Feb. 23, at 7:30 p.m. in Room 124 Sparks Building.

In her talk, sponsored by the Women's Studies Colloquium, Dr. Haskin will discuss the methodology known as multidisciplinary scaling, which determines how people feel about sex-typed occupations. She also will discuss how this scale can be applied to change such perceptions.

Water conserved

Several ruptures in a major water line on the north side of the University Park campus last month caused a water emergency which lasted several days. Occupants of buildings were requested to conserve water as much as possible, forcing a change in normal habits and lifestyles.

"We are pleased to report that the response to this request was very good and there was a perceptible decrease in the use of water during this period," Ralph E. Zilly, vice president for business, said. "We would like to thank everyone for their cooperation."

Mr. Zilly noted that the behavior of the University community during the emergency indicates that effective conservation of water is possible.

"Perhaps this recent experience with an emergency situation can become a more permanent mode of operation for everyone if we just give continual thought to water conservation," he added.

Housing referral service available

Faculty who have been granted leaves of absence and are interested in renting their houses during the period they will be away are reminded that there is a Housing Referral Service.

A division of the Faculty Women's Club, the service, for a nominal fee, may list houses for rent. Inquiries are handled at 865-1538.

March forum topics due

The University Committee Concerned with Women in International Development will hold a forum on "Research Methodology for the Study of Women in Development" on Friday, March 12, in the Keller Conference Center.

Task forces will discuss and devise methodological recommendations in such subject areas as: food production, population/family planning, nutrition, health, home economics, employment, intervention, education and family structure. Working sessions will open with a brief presentation by each task force member.

Persons interested in participating should submit a letter of intent by Saturday, Feb. 20, specifying their area of interest. Because participation will be selective, they should also include a brief description of their intended presentation.

The materials should be sent to Dr. Carolyn E. Sachs, assistant professor of rural sociology, Room 205 Weaver Building (865-0455).

United Way contributions from University rose

The University increased its contributions to the United Way agencies in Pennsylvania by 12 percent in 1981.

President Oswald announced that more than \$191,750 was raised throughout the Penn State system in its 1981 campaign.

"I've been involved with, and committed to, the United Way for many years, and this year's results are particularly gratifying to me," Dr. Oswald said. "They show that Penn State faculty and staff members have taken to heart the United Way's motto, which is 'People Caring.' My thanks go to everyone who participated and contributed."

For its 1981 campaign, Penn State has received a letter of commendation from the national United Way organization.

Among areas in which at least 45 percent of the faculty and/or staff members contributed in the campaign, were: advanced gifts (President's staff, deans, associate and assistant deans), under Irvin H. Koehl; College of Agriculture, under Robert J. Flipse; and College of Business Administration, under Eugene J. Kelley.

Also, the College of Earth and Mineral Sciences, under John J. Cahir; the College of Education, served by Henry J. Hermanowicz; the College of Health, Physical Education and Recreation, under Martha Adams; and the Office of the Senior Vice President for Administration, handled by John A. Hargleroad II.

Two A-V pick-up sites

Faculty and students can now schedule and pickup audio-visual equipment from Room 10 Henderson Human Development Building, as well as from AVS, Room 1 Willard Building.

The University Learning Services office in Human Development is open from 8 a.m. to 5 p.m., Monday through Friday; 6:30 to 10 p.m., Monday through Thursday; and 4 to 10 p.m., Sunday.

Equipment available for pickup includes 16mm and slide projectors, reel-to-reel and cassette tape recorders, screens and projector stands.

Professors exhibit

Two one-man exhibitions by Richard Hamwi and David Van Dommelen, faculty members in the School of Visual Arts, are on display at the Museum of Art now through March 28.

Mr. Hamwi's exhibition, "Works on Paper," includes pieces executed through collage, pen and ink and quill-pen. The artist, who derives his themes from nature and experience, states that "each piece, initially evolves from a feeling or a conceived image and an individual theme unfolds according to the nature of my thoughts and feelings during the process of realizing the image."

An instructor in the School of Visual Arts, Mr. Hamwi has had numerous solo and group exhibitions, and his work is in the permanent collection of the Smithsonian Institution's National Museum of American Art.

"Twenty-Five Years of Fiber Art," Mr. Van Dommelen's show, features a wide mixture of fiber works based on themes ranging from the natural world to family events. Notes in the Museum catalog accompanying the exhibition state that Mr. Van Dommelen "has developed a personal imagery and use of materials which have expanded the dimensions of fiber art."

Mr. Van Dommelen, whose work is in the permanent collections of Chicago's Marshall Field and Company and the Portland Art Museum in Portland, Me., is a professor of art education.

Nominations deadline

March 1 is the deadline for nominations for the Award for Outstanding Contribution to the University Libraries.

The award, consisting of a cash stipend and Nittany Lion statue, is given in recognition of the achievements or performance of any person holding an academic or staff appointment in the Libraries.

Nominees should meet one or more of the following guidelines: 1) professional contribution which has a significant influence on the Libraries' operations, 2) significant professional contribution which earns the respect of the University community for the Libraries, 3) significant contribution to the profession which reflects achievement in librarianship at Penn State, or 4) outstanding service to the Libraries as evidenced by continuing leadership and innovation.

Nomination forms are available at the following Library locations: Arts (E405 Pattee), Architecture (207 Eng. Uni. Cl.), Earth & Mineral Sciences (105 Deike), Engineering (325 Hammond), Information Desk (C102 Pattee), Life Sciences (E205 Pattee), Mathematics (110 McAllister), Physical Sciences (230 Davey), and all Commonwealth Campus Libraries. Nominations should reach Bruce Bonta, chairman of the Awards Jury, E108 Pattee, by March 1.

The Philosophical Imagination

Editor's note: This article is one in an ongoing series in which a faculty member describes work in progress.

By Donald Verene
Professor of Philosophy

What role does imagination play in human thought? What is the importance of imagination for philosophical thought?

These two problems have concerned me very much for the past ten years, but the roots of my interest in them go back to the early days of my education in philosophy and poetry. Because of my early training in the writing of poetry and my study at the same time of philosophy, I experienced in my own thought what Plato called "the ancient quarrel between philosophy and poetry." Is it through philosophy or through poetry that human thought is rightly led toward truth? This question in modern thought becomes a question about the nature of the imagination as a specific power of the mind.

The arts, the traditional loci of imaginative activity, have been separated in the modern world from the sciences and from philosophy. Since Descartes in the seventeenth century defined truth in terms of a fixed, step-by-step method, forms of imaginative activity such as art, myth, poetry, rhetoric, and history conceived as a literary activity have been assigned their own realm apart from science. Certain meanings can be explored in this realm, but the search for truth has been associated in modern thought with the sciences. The imagination is important for both the arts and the sciences; so the Cartesian split between thinking that is without strict method and thinking that is essentially methodological is particularly unfortunate.

This split has been the starting point of my own thinking for the past several years. Since Plato, philosophy in the Western tradition has been identified with reason. And, since the founding of modern philosophy with Descartes, this has meant the association of philosophy with reason based on method. Philosophers have derived their form of

thinking from more specific rationalistic and empirical forms of investigation or they have attempted to create a rationalistic science of their own. The best example of this latter alternative is Hegel. An exception to this has been existentialism, which has been interpreted the irrational senses of existence that systematic reason leaves out.

In the philosophical tradition of reason, and in the attention accorded the "irrational" by existential thought, the imagination is left out. The imagination is not explored as an original power of the mind. Modern philosophy regards the human imagination in two ways. The first is as a special faculty that lies between the senses that perceive objects and our faculty of understanding that forms concepts of the objects we perceive. The imagination forms an image of what we perceive with our senses and from this image we can form a concept abstractly in our minds of what we have seen. The other way in which philosophy regards the imagination is as going its own way, as having little to do with truth, clarity or concepts. Imagination is seen as building its own world of artistic and poetic forms. These forms and activity can be examined by philosophers of art but philosophical truth itself is not regarded as something that can be pursued through such forms.

My research and thought have led me to the possibility of a new rapprochement between the powers of the imagination (as found in the arts) and philosophy (as the attempt to gain a knowledge of the whole of things).

The key step in my work was my discovery of the little-known Italian humanist thinker, Giambattista Vico (1668-1744), whose major work is entitled *The New Science*. In a unique and unprecedented way, Vico holds that the most fundamental act of the human mind, individually and collectively, is culture is imagination. The imagination, or what Vico calls in Italian, *fantasia*, is the primary power of the mind whereby human beings make their world. Only through imagination can humans found their cultures, create their myths, and form themselves socially. For Vico it is the

Dr. Verene

metaphor, not the rational concept, that is at the basis of human society and thought. The metaphor, or what Vico calls the "imaginative universal" (*universale fantastico*), is the very basis of thought. Whenever the mind is deadlocked or fatigued with old forms of thought, it can find a new starting point, a revival, only by the power of the metaphor. The metaphor always gives the individual thinker or culture itself a new beginning point.

What if philosophy were to begin its account of human thought and society by seeing humans first as users of imagination and later as users of reason? What if human experience is seen as coming from certain basic acts of imagination or "imaginative universals" and only later as involving the rational formation of experience? And further, what if philosophy itself saw the power of imagination as the basis of its own power to understand the human world?

These questions were the subject of an exchange between Sir Isaiah Berlin and myself at a conference on Vico in 1976 in New York. My goal was to reform philosophical thought on the basis of Vico's notion of the imagination. Our exchange was published, and it was from the issues contained in it that I was led finally to write my book on Vico that

appeared last summer — Vico's *Science of Imagination* (Cornell University Press, 1981). Also deeply involved in my thesis was the work on rhetoric and poetics of the Italian humanist scholar, Ernesto Grassi, who made many helpful suggestions. Grassi's work shows how Vico can be connected to Renaissance humanism. I mention this because I think work in the humanities is never done alone, but is always an attempt to extend a basis of thought built by other scholars. One's own work must be viewed in the same way.

In my view of basing philosophy in the imagination, philosophy does not lose its interest in reason; rather philosophy itself takes on a new shape. Philosophy is given a new place to stand outside the dilemma of conceiving its task as rational science, or as the rejection of such, as is found in existentialism. The next major step in my own pursuit of this problem is the making of part of the philosophy of imagination that follows from Vico's seminal notion of the "imaginative universal."

Philosophy in many ages has been criticized for speaking about problems of concern only to other philosophers. My purpose is to direct philosophical inquiry back toward its ancient role of speaking directly to the problems of human life and culture.

College adds professional values and ethics course

Approximately 200 students this term are taking the forerunner of a course in professional values and ethical issues that soon will be required of all students in the College of Human Development.

It's the vanguard of a new core curriculum for Human Development — four three-credit courses aimed at providing a common learning experience for students enrolled in the College's eight professional majors.

"We believe it's important for people who will become practitioners, administrators and planners of human services to have a solid understanding of the issues of professional ethics and values that affect their work," says Theodore R. Vallance, professor of human development.

Dr. Vallance is project director of a grant to support the planning, implementation, evaluation and revision of a values and ethics component in the College's curriculum.

The National Endowment for the Humanities has awarded \$49,995 for the effort, which, in addition to faculty time, travel and expertise, involves assembling a wide variety of course materials including a detailed course outline, a 500-page reader and a 300-page casebook.

A set of about a dozen videotapes of lectures and/or role-played simulations also will be developed, along with about 150 slides of viewpoint transparencies.

Each year, about 650 second- or third-year students will take this course at University Park, according to Dr. Vallance,

and about 200 will enroll at the Commonwealth Campuses.

"Not all campuses have full faculties of library and faculty suited to teaching a humanities-professional course such as the one we've planned," Dr. Vallance says. "Thus, we want to develop a rich array of educational materials."

Faculty members of the Department of Philosophy are cooperating in the development of the course and will assist in teaching it after it has been approved by the Faculty Senate.

Six general problem areas will be addressed, including the rights of citizens to the means for a good life. Other issues will be the development and transition of rights and obligations over the life span, and relationships between professionals and their clients.

Still other areas are conflicts in allocating scarce human service resources between people as clients and other parts of society, and conflicts between professionals and other people and institutions.

The broad and fundamental question of justice itself will be addressed as well.

"This term, the course is being taught as an experimental variant of an established course, Human Development 401, Professional Issues in Human Development, without the planned visual aids and the specially prepared readings," Dr. Vallance notes.

He says it will take approximately nine months to assemble the materials and work out the logistics to offer the course

on a College-wide basis.

The new course, to be called Human Development 310, came from a recommendation by a special Committee on the College Core, which called for the addition of four required courses. Human Development 310 is the only one of the four requiring grant funds for its establishment. The others are:

— Introduction to Lifespan Human Development. This is aimed at teaching students about basic biological, sociological and psychological factors affecting human growth and development over the lifespan.

— Empirical Inquiry in Human Development. This course will introduce students to research methods appropriate to the various fields in human development.

— Community Systems Planning and Administration. This will teach concepts of community and major problems in planning and administering community systems of government and human services.

"Since the College's beginning in 1968, one operating principle has been that some kind of educational experience or core of learning should be common to all students," Dr. Vallance explains.

The reorganization of the College into eight major programs and the interdisciplinary work being encouraged between faculty in each program has both sharpened the perception of the need to provide such a core and afforded an opportunity to develop it.

Faculty/Staff Alerts

Benefits statement out

All regular full-time faculty and staff members who received a paycheck in September were mailed a personalized statement highlighting the major provisions of the comprehensive program of benefits which the University provides for them and their families. The information shown on the statements reflects data as of Jan. 1, 1982.

President Oswald requested that these statements again be provided to faculty and staff members to inform new employees about their benefits and to update information for all faculty and staff members.

The individual statements, which were mailed to office addresses, provide basic information on group life insurance, retirement, social security, accidental death and dismemberment insurance, disability benefits, worker's compensation, and health care coverage to include hospital/surgical, major medical, dental and vision. Also, an estimated dollar value of the benefits is provided on each statement. It should be noted that this estimated value does not include the significant cash value for use of athletic facilities, athletic event discounts, tuition reductions, and paid time off for sickness, death in family, jury duty, vacations and holidays.

Faculty or staff members who have questions about their statements should contact the Employee Benefits Division at 865-1473.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Feb. 11 — 28

Special Events

Thursday, Feb. 11

Late drop deadline.

Lincoln Celebration with the Penn State Wind Ensemble, Penn State Orchestra, and the Penn State Glee Club, 7:45 p.m., Eisenhower Auditorium.

Kern Classics, Arthur, 7 and 9 p.m., 112 Kern. American Nuclear Society lecture, "The Energy of Fusion Energy Program," 7:30 p.m., 101 Chambers. John F. Clarke, deputy associate director for fusion energy, Dept. of Energy, on "The United States Magnetic Fusion Energy Program."

Friday, Feb. 12

Association of College Unions-International Region 4 Recreational Tournament, 9 a.m.-11 p.m., HUB Ballroom. Spectators invited. Also Feb. 13.

Faculty Women's Club Pot-Luck Dinner and Social Hour, 6:30 p.m., Walnut Bldg. Reservations: 238-2713

Cine-mattheque, Kanal, 7 and 9:15 p.m., 121 Sparks. Also Feb. 13.

Commonplace Coffeehouse, 8 p.m., 102 Kern. Sports: Bowling, ACU Regional Championships. Also Feb. 13.

Saturday, Feb. 13

Chair-Caning Workshop, Shaver's Creek Environmental Center, 10 a.m.-4 p.m. Information: 865-1851.

Cross-Country Ski Workshop for Beginners, Shaver's Creek Environmental Center, 10:30 a.m., Stone Valley.

Artists Series, Frederica von Stade, mezzo soprano, 8:30 p.m., Eisenhower Auditorium.

Sports: Ice Hockey, PSU Nitany Lion

Invitational. Also Feb. 14. Basketball (women) vs. George Washington, 2 p.m., and vs. Pittsburgh, 7:30 p.m.; Swimming (women) vs. West Virginia, 1 p.m.; Wrestling vs. Pittsburgh, 7:30 p.m.

Sunday, Feb. 14

Recital, Trina Baker, bassoonist, 3:30 p.m., Music Bldg. Recital Hall.

Jazz Ensemble concert, 8:30 p.m., Music Bldg. Recital Hall.

Sports: Wrestling vs. West Virginia, 2 p.m.

Monday, Feb. 15

Sports: Basketball vs. South Carolina, (women) p.m., (men) 8:10 p.m.

France-Cinema, De Broca, Up to His Ears, 7 and 9 p.m., 112 Kern.

Tuesday, Feb. 16

Comps. Lunches, 12:15 p.m., 204 HUB. Wendell Harris on "A Victorian Looks at Contemporary Criticism."

HPER lecture, 7 p.m., HUB Gallery Lounge. Dr. Peter R. Cavanagh, biomechanics, on "The Biomechanics of Sport."

East Asian Studies Panel Discussion, U.S.-China Relations: A Decade after Nixon's China Trip, 7:30 p.m., 101 Kern.

Artists Series film, Singin' in the Rain, 8 p.m., Eisenhower Auditorium.

Wednesday, Feb. 17

Commons Nootone Concert, "Rustical Quality Strong Band, Kern Lobby.

Graduate Council meeting, 3 p.m., 101 Kern. Interlandia folk dancing practice, 7:30 p.m., 106 White.

Chamber and Concert Choir, 8:30 p.m., Music Bldg. Recital Hall.

Thursday, Feb. 18

Registration deadline for National Teacher Examinations to be administered Feb. 20. Information: 181 Chambers.

Alard Quartet Concert, 1 p.m., Music Bldg. Recital Hall.

Kern Classics, Day of the Dolphin, 7 and 9 p.m., 112 Kern.

Sports: Wrestling vs. Bloomsburg, 7:30 p.m.; Gymnastics (men) vs. Northern Illinois, 8 p.m.

Friday, Feb. 19

Deadline for graduate students to submit petitions to Records Office to graduate in absentia in March.

Cine-mattheque, Gimme Shelter, 7 and 9 p.m., 121 Sparks. Also Feb. 19.

Interlandia folk dancing, 7:30 p.m., HUB Ballroom.

Commonplace Coffeehouse, 8 p.m., 102 Kern. Artists Series, Royal Winnipeg Ballet with Orchestra, 8:30 p.m., Eisenhower Auditorium.

School of Music, Composition Recital, 8:30 p.m., Music Bldg. Recital Hall.

Sports: Ice hockey vs. Ohio Univ., 9:15 p.m.

Saturday, Feb. 20

France-Cinema, Lelouch, A Man and a Woman, 7 and 9 p.m., 112 Kern. Also Feb. 22.

Sports: Bowling vs. Villanova, 1 p.m.; Swimming vs. Rutgers (women) 1 p.m.; (men) 4 p.m.; Basketball (men) vs. Memphis State, 1:30 p.m., (women) vs. Rutgers, 7:30 p.m.; Ice Hockey vs. Ohio Univ., 8 p.m.

Sunday, Feb. 21

Cross-Country Ski Workshop for Beginners, Shaver's Creek Environmental Center, 2 p.m., Stone Valley.

Sports: Bowling vs. Lincoln, 1 p.m. Recital, Barb Lanza, violin, 3:30 p.m., Music Bldg. Recital Hall.

Monday, Feb. 22

Div. of Learning and Telecommunications seminar, 3 p.m., 8 Mitchell. P.J. O'Connell, executive producer, Public Affairs, on "Observation Documentary."

Sports: Basketball (men) vs. Westminster, 8:10 p.m.

Tuesday, Feb. 23

Senate Council meeting, 1:10 p.m., 101 Kern. Women's Studies Colloquium, 7:30 p.m., 124 Sparks. Dr. Lynn Martin Haskin, asst. prof. of journalism, Delaware County, on "Sex-Typed Occupations: Assessment and Changes."

Wednesday, Feb. 24

Classes end. Deadline for undergraduates to submit petitions to Registrar's Office to graduate in absentia in March.

Deadline for signing Winter Emergency Loans, 108 Shields.

Thursday, Feb. 25

Final Exams through March 1.

Friday, Feb. 26

Sports: Wrestling, Eastern Wrestling League Championships. Also Feb. 27.

Saturday, Feb. 27

Sports: Bowling vs. Drexel, 1 p.m.

Sunday, Feb. 28

Sports: Bowling (men) vs. Capitol Campus, 1 p.m.

Sports: Bowling vs. Drexel, 1 p.m.

Sports: Wrestling, Eastern Wrestling League Championships. Also Feb. 27.

Saturday, Feb. 27

Sports: Bowling vs. Drexel, 1 p.m.

Sunday, Feb. 28

Sports: Bowling (men) vs. Capitol Campus, 1 p.m.

Sports: Bowling vs. Drexel, 1 p.m.

Sports: Wrestling, Eastern Wrestling League Championships. Also Feb. 27.

Saturday, Feb. 27

Sports: Bowling vs. Drexel, 1 p.m.

Sunday, Feb. 28

Sports: Bowling (men) vs. Capitol Campus, 1 p.m.

Sports: Bowling vs. Drexel, 1 p.m.

Sports: Wrestling, Eastern Wrestling League Championships. Also Feb. 27.

Saturday, Feb. 27

Sports: Bowling vs. Drexel, 1 p.m.

At left, paper cord weaving by David B. Van Dommelen. Right, "Modifications" a drawing by Richard Hamwi — both at Museum of Art.

Ranamukarahechi on "Potential for Double Cropping Soybeans in Central Pennsylvania."

Acoustics, 4 p.m., 75 Willard. Jeane V. Singer, Audiological and Hearing Aid Services, Inc., on "Everything You Always Wanted to Know About Running a Small Business in an Acoustic Field."

Friday, Feb. 12

Analytical Chemistry, 11 a.m., 333 Whitmore. Prof. John Cortez, Univ. of Pittsburgh, on "Ion-Selective Electrodes in Non-Aqueous Media."

Geography, 4 p.m., 319 Walker. Jack Sparks and Jeff Kern, Resource Technologies Corp., on "The Federal Procurement Process."

Monday, Feb. 15

Geosciences, 3:45 p.m., 22 Deike. Dr. R.A. Wiebe, Dept. of Geology, Franklin and Marshall College, on "Magmas and Magma Mixing of the Naime Complex, Labrador."

Entomology, 4 p.m., 204 Patterson. Stephen K. Wikel, School of Medicine, Univ. of South Dakota, Vermillion, on "Host Immune Responses to Ectoparasite Infestation."

MCB, 4 p.m., 101 Althouse. Bruce C. Kline, Mayo Foundation, on "A General Look at Plasma DNA Replication."

Tuesday, Feb. 16

MCB, 11 a.m., 101 Althouse. Bruce C. Kline, Mayo Foundation, on "The Genetics of Plasmid F. Replication and Partitioning."

Biology, 11:10 a.m., 8 Mueller. Dr. Stanley Fowler, Rockefeller Univ., on "A Unique Cholesterol and Phospholipid Storage Disorder in Balb/C Mice."

Ag. Greenhouse, 2:20 p.m., 301 Ag. Adm. Panel discussion on "Extrapolation of Greenhouse Results to the Field."

Water Pollution Control, 2:20 p.m., 271 Willard. James Stratta, Air Pollution Engr., Div., U.S. Army Environmental Hygiene Agency, on "Nitritification Enhanced Through pH Control with RBC's."

Health Planning and Administration, 3:30 p.m., S-204 Human Dev. Jeff Kerr on "The Relationship Between Corporate Strategies and Executive Rewards."

Plant Pathology, 3:55 p.m., 213 Buckhout. Sheryl Horne on "Hartig-Classic #12."

Materials Science, 4 p.m., 112 Walker. Z. Mudamuri on "Coal Maceral Reactivities in Liquefaction; A. Safari on "Perforated PZT Composite."

Chemistry, 12:45 p.m., 333 Whitmore. Gregory Petsko, M.I.T., on "The Mechanistic Pathway of Ribonuclease-A at Atomic Resolution."

Adm. of Justice, 3:30 p.m., S-130 Human Dev. R. Richard Ritt, organizational behavior, on "Human Disservice Organizations."

Anthropology, 3:30 p.m., 107 Carpenter Building. John Mallory on "Craft Specialization at Copan, Honduras," and Elliot Abrams on "Excavation of an Elite Residential Group at Copan, Honduras."

Physics, 3:50 p.m., 445 Davey Lab. D. Lichtman, Univ. of Wisconsin, on "Surface Analysis Applied to Air Pollution."

Agromony, 3:55 p.m., 111 Tyson. John

Cardina on "Potential for Weed Control by Allelopathy;" Brian Carter on "Genesis of the Argillite Horizon."

Acoustics, 4 p.m., 351 Moore. Paul Zawadzki, speech communication, on "Speech Synthesis with Microcomputers."

Friday, Feb. 19

Geography, 4 p.m., 319 Walker. Ronald Eytan, geography, on "Remote Sensing of Urban Snow Scenes."

Monday, Feb. 22

Entomology, 4 p.m., 204 Patterson. George A. Husey, State Leader, PSU Extension Data Systems, on "Role of Computers in Agriculture in PA."

MCB, 4 p.m., 101 Althouse. Jeffrey Lemontt, Biology Div., Oak Ridge National Lab, on "Cloning in Yeast: Applications to Studies of DNA Repair and Mutagenesis."

Tuesday, Feb. 23

MCB, 11 a.m., 101 Althouse. Jeffrey Lemontt, Biology Div., Oak Ridge National Lab, on "Isolation of DNA Repair Genes."

Water Pollution Control, 2:20 p.m., 271 Willard. Richard G. Luthy, Civil Engr. Dept., Carnegie Mellon Univ., on "Removal of Organic Contaminants from Coal Conversion Wastewaters."

Plant Pathology, 3:55 p.m., 213 Buckhout. Laurie Movell on "Woronin-Classic #4."

Materials Science, 4 p.m., 112 Walker. K.L. Lin on "Interfacial Charge and Mass Transfer in the Liquid-Liquid Extraction of Metals;" J. Rapp on "The Mechanical Properties of Oxynitride Glass."

Exhibits

Chambers Gallery: 5th Annual Burk/Hartwick Glass Exhibition, through Feb. 25; Saturday Morning Art School Exhibition, Feb. 26 and 27.

HUB Art Gallery: Photo-Journalism Undergraduate Exhibition, The Gallery, through Feb. 24.

Henry Blessing, Architectural Photography, The Gallery, through Feb. 24.

PSU Ski Team Exhibition, Art Alley, through Feb. 24.

Kern Gallery: Shirley and Bruce Siegenthal, art and wood, through Feb. 25.

Jane Kintzer, weavings, through Feb. 26.

Museum of Art: American Paintings Before World War II, from the permanent collection, through Feb. 14.

Richard Hamwi, works on paper.

David Van Dommelen, 25 Years of Fiber Art: Director's Choice, selected works from the Museum's collection, opens Feb. 14.

Pattee Library: Rare Books Room: "The Last Experience" featuring the work of artist John Biggers.

Second Floor, East Pattee and Main Lobby: Roger Seich, pottery, and Janis Merzhon, weaving, through Feb. 16. Terry Johnson, recent work, opens Feb. 16.

East Corridor: John Mahoney, drawings. Lending Services Gallery: Rebecca Postell, paintings, through Feb. 18. Becky Mast, drawings, opens Feb. 18.

Penn State Intercom

Barash, Donkin, Wilkinson prize names asked

President Oswald has appointed a general committee chaired by Steve A. Garban, vice president and controller, to coordinate the solicitation of nominations for three all-University awards — the McKay Donkin Award, the John E. Wilkinson Award for Administrative Excellence, and the Barash Award for Human Service.

As in previous years, three subcommittees will screen nominations and develop recommendations for the respective awards. Members of the Wilkinson Award Subcommittee are: Rosemary Schraer, associate provost, chairperson; Dean James B. Baroo, Graduate School; Doris M. Seward, executive assistant to the President; and Ralph E. Zilly, vice president for business. Members of the Donkin Award Subcommittee are: Ray T. Fortunato, assistant vice president for personnel administration, chairperson; Dean Stuart Forth, University Libraries; and Caralynne Schengrund, associate professor of biological chemistry, Hershey.

For the Barash Award, the subcommittee members are: Henry L. Yeagley Jr., assistant vice president for the physical plant, chairperson; Martha Adams, assistant dean for resident instruction, Health, Physical Education and Recreation; State College rector William Leonard; James R. Palmer, president, C-COR; and students Mary Beth O'Brien and Richard S. Gorodetsky.

Nominations for the 1982 awards are encouraged from either organizations or individuals in both the University and the community and are to be sent to Mr. Garban, Room 408 Old Main, no later than March 19, 1982. The supporting information which accompanies nominations should be as brief as possible and must emphasize those qualifications and activities relevant to the particular award for which the individual is being nominated. A brief description of the qualifications for each award follows:

(Continued on page 5)

Course changes urgently needed

The Senate Committee on Curricular Affairs has made an urgent appeal to the Colleges to submit their new and revised courses and programs for the semester system convention.

Although the deadline for submission is April 23, to date, the Senate Office has received very little material, according to Committee Chairman Richard M. McClure, who points out that if everyone waits until the deadline, there will not be enough time for the committee to review and approve changes for inclusion in the 1983-84 catalogs.

The Committee particularly needs materials for the "basic six" courses, which affect all programs at the University, as soon as possible. Changes should be sent to the Senate Office in Birch Cottage.

Dr. Mahoney

Dr. Santen

Dr. Cross

Three to receive Faculty Scholar medals

Three members of the faculty will receive the Faculty Scholar Medal for 1981-82 at Winter Term Commencement on March 6.

They are Richard J. Santen, professor of medicine and chief of Endocrinology at Hershey, in the area of Life and Health Sciences; L. Eric Cross, professor of electrical engineering and associate director of the Materials Research Laboratory, in Physical Sciences and Engineering; and Michael Mahoney, professor of psychology, in Social and Behavioral Sciences.

The award was established in 1980 to recognize scholarly or creative excellence represented by a single contribution or a series of contributions around a coherent theme. The attainment for which the candidate is honored must have occurred during the three years preceding the nomination for the award.

The author of 110 papers dealing with fundamental aspects of reproductive endocrinology and medical treatment of breast cancer, Dr. Santen has done pioneering work in the development of hormonal therapy for patients with advanced breast cancer.

Breast cancer is the most common malignant neoplasm in women. The American Cancer Society estimates that there will be 111,000 new cases in 1981 and 37,100 deaths from this cancer in the United States; approximately one out of 11 women will develop breast cancer.

Lesions localized to the breast have an excellent prognosis (five-year survival of 85 percent), but lesions with distant spread (e.g., with metastases to the lung, bone or liver) carry a poor prognosis (five-year survival of 10 percent).

During the past 20 years it has been shown that surgical removal of the pituitary or adrenal glands promotes tumor regression in 40 to 60 percent of patients with advanced breast cancer. This improvement relates to a decrease in estrogen production in those patients who have estrogen sensitive tumors. Major surgery in patients with advanced malignant disease carries a high risk, however, and may require extended hospitalization.

In a series of basic studies, Dr. Santen focused on suppression of adrenal steroid production by chemical inhibitors and developed an effective non-toxic medical treatment program — "medical adrenalectomy" — for patients with advanced breast cancer. He then designed controlled clinical trials which showed that "medical adrenalectomy" is as effective as surgical adrenalectomy and leads to sustained remissions and improved quality of life in more than 50 percent of patients with advanced breast cancer.

A member of the faculty since 1971, Dr. Santen graduated from Holy Cross College and received his M.D. from the University of Michigan in 1965. His

postgraduate training in medicine and endocrinology was obtained at Cornell University, Michigan and the University of Washington.

Described by colleagues as providing "the nerve center for research on ferroelectrics in the United States," Professor Cross has developed one of the most important schools of research into ferroelectric and related materials in the world. Post graduate and doctoral students from many countries seek the opportunity to work with him, and he is recognized as one of the leading exponents of the theory and practice of electrostrictive materials and the wider application of thermodynamic theory to ferroelectric materials and their solid solutions.

Dr. Cross has also been hailed for his successful guidance of technology transfer to the industrial arena, where he has been a major force in the development of the first industrially practical electrostrictive devices.

A research manager for a leading optical system company indicated that "the development of deformable mirrors for our adaptive optics systems could not have been successful without Dr. Cross's continued and knowledgeable support over the past three years."

"We owe to his research and his guidance of our own work the development of both the electrostrictive materials and the associated actuator

(Continued on page 7)

Alumni Fellows to visit in Spring

Nine prominent Penn State graduates have been designated 1982 Alumni Fellows, one of the highest honors the University can bestow.

They will visit the University at various times as guests of the Alumni Association during the Spring Term to meet formally and informally with students, faculty members and administrators.

The 1982 Alumni Fellows and the Colleges they will visit are:

- Thomas J. Anderson Jr. of Medford, Mass., composer and professor of music at Tufts University and a 1951 graduate, College of Arts and Architecture;
- Peter M. Banks of Palo Alto, Calif., director of the Radio Science Center at Stanford University and a 1965 Ph.D., College of Science;
- Robert DeVitt Chapman of Greenbelt, Md., associate chief of the NASA Laboratory for Astronomy and

Solar Physics and a 1959 graduate who attended Behrend College for two years, Behrend College;

- Edward R. Hintz Jr. of New York City, president of Hintz and Hokman, Inc., and a 1959 graduate, College of Business Administration;
- Elizabeth S. Kelly of Alexandria, Va., senior planning and allocations consultant for the United Way of America in Alexandria and a 1969 graduate, College of Human Development;
- Howard G. Knuttgen of Boston, chairman of the Department of Health Sciences at Boston University and a 1953 recipient of a Penn State master's degree, College of Health, Physical Education and Recreation;

- Emiko Iwashita Kudo of Honolulu, Hawaii, former deputy superintendent of education for the Hawaii Department of

Student phonathon raises \$98,000

University alumni pledged approximately \$98,000 during the seventh annual Winter Phonathon, which ended Feb. 18.

For 20 nights, student volunteers representing their Colleges, honorary societies and service clubs kept as many as 26 telephone lines humming. The phones were supplied by the Office of Gifts and Endowments.

Last year, a comparable Phonathon raised some \$64,000.

"In looking at the figures, it's important to remember that the number of volunteers, the number of telephone lines available and the number of nights scheduled by a College affect the number of pledges," Cynthia Tift, assistant director of annual giving, says. "Some nights, two Colleges shared phone lines, based on the availability of callers and of

(Continued on page 7)

Penn Staters

The University's Institute for the Arts and Humanistic Studies has awarded research fellowships for summer and fall 1982 to nine faculty members, according to Dr. Stanley Weintraub, Institute director. The recipients and their projects are:

— Dr. John Bryant, assistant professor of English (Shenango Valley), research for a book in progress, "Comedy and the Rhetoric of Living in American Fiction."

— Thomas Getz, assistant professor of English (York), study of the interaction of portraiture and self-portraiture in literature; "The Self-Portrait in the Portrait."

— Dr. Harlan Hoffa, professor of art education, studies in the National Art Education Archives, relating art education to the performing arts.

— Dr. Augustus Kolich, assistant professor of English, research and study of manuscripts of unpublished and uncollected *Pateron* poems of William Carlos Williams.

— Dr. Helen Manfull, associate professor of theatre and film, research for a biography of musical comedy composer Lorenz Hart.

— Dr. Bruce Murphy, assistant professor of political science, a political study of the Lyndon Johnson-Albete Fortas relationship.

— Diane Pepe, assistant professor of art, creative work in drawing and painting.

— Dr. Judith Stephens, assistant professor of speech communication (Schuylkill), research and study on an aspect of the literary feminine stereotype — the demon-angel dichotomy — and its prominence in modern American drama.

— David Van Dommelen, professor of art education, creation of a series of tapestries based on traditional draft patterning, utilizing a multi-harness loom.

Two Behrend College faculty members, Dr. Dean Baldwin and Dr. Chester Wofford, both assistant professors of English, have been selected as recipients of National Endowment for the Humanities (NEH) fellowships. Dr. Baldwin will use his award to complete a biography on British author H.E. Bates. Dr. Wofford will study impressionism in turn-of-the-century American literature and its effect on human consciousness.

Dr. Stephen J. Fonash, professor of engineering sciences, has been invited lecturer at the International Workshop on the Physics of Semiconductor Devices. The workshop, held in New Delhi, India, was sponsored by UNESCO. Dr. Fonash spoke on "Barrier Formation and Transport in Heterojunctions and Schottky Barrier Type Structures."

Dr. Don N. Page, assistant professor of physics, presented a theoretical physics seminar at Columbia University Feb. 15. He discussed "Is Black Hole Evaporation Predictable?"

Dr. Wilbur Zelinsky, professor of geography, recently lectured at SUNY-Albany and Cornell University on "Oh Say, Can You See? The Impact of Nationalism on the American Landscape." He has also been named to the editorial board of *Discussion Papers in Geolinguistics*, a new journal.

Dr. Howard B. Palmer, professor of energy science and associate dean of the Graduate School, recently presented an invited paper at the NATO Conference on Soot in Combustion Systems held in Obernai, France. The paper, of which Dr. Palmer was a co-author, was entitled "Chemistry of Intermediate Species in the Rich Combustion of Benzene." Dr. Palmer also visited the University of Göttingen, West Germany, where he lectured on the spectroscopy and photon production in chemiluminescent, low-pressure flames.

Dr. Joseph M. Lambert, assistant dean of Commonwealth Campuses and continuing education in the College of Science, has been named associate professor of computer science and mathematics and head of the Department of Computer Science. He will continue to serve as assistant dean until a replacement is named.

Dr. Lambert has served as acting head of computer science since 1980 and assistant dean since 1979. A member of the mathematics faculty since 1970, he has taught at the York and Berks Campuses, as well as at University Park.

During the 1977-78 academic year, he was visiting associate professor of mathematics at the University of Tennessee.

A researcher in abstract approximation among other topics, he is referee for the *Journal of Approximation Theory* and for research proposals to the National Science Foundation and a reviewer for *Mathematical Reviews*.

A frequent contributor at professional meetings and to scholarly journals, he is the author of the chapter entitled, "The Theory of Nearest Deviators," in the book, *Approximation Theory III*, published by Academic Press in 1980.

Dr. Robert F. Custard, patent counsel of the University, has been elected to the Board of Trustees of the Society of University Patent Administrators (SUPA) to serve until 1984. He has also been reappointed as chairman of the SUPA Copyright Committee covering the areas of copyrights, computer programs, technical data, and trademarks.

Raymond J. Masters, lead research programmer in the Computation Center, is part of an architectural design team awarded a 1981 Certificate of Merit from *Progressive Architecture*, a professional magazine. The team received the award for its "Mid-town Zoning Proposal for Manhattan." The proposal, to become New York zoning law in March, requires that buildings allow specified amounts of daylight, as measured by computer, to reach street level.

Mr. Masters developed the principal component of the system, a new method of using computers to calculate the impact of buildings on the amount of daylight reaching city streets. The computer system can also evaluate proposed building projects before they are begun, thereby allowing architects to make needed adjustments.

Dr. L.A. Morley, professor of mining engineering, is now chairman of the Process Industries Department of the Institute Applications Society of the Institute of Electrical and Electronic Engineers. He is the first university faculty member ever elected to the position, which has always been held by members of industry. The Process Industries Department is the largest technical group in the Society. Dr. Morley also serves on the Society's Advisory Committee.

Dr. Philip S. Skell, Evan Pugh Professor of chemistry, presented a colloquium at the University of Colorado Feb. 27. He discussed "Excited State Free Radicals in Thermal Reactions."

Dr. Richard L. Barton, associate professor of speech communication, has been awarded a research and travel grant by the Canadian Government to investigate the way selected forms of nonfiction Canadian broadcast content reflect Canadian national identity. Dr. Barton will be in Canada from September to December 1982 for the project.

Dr. Craig F. Bohren, associate professor of meteorology, recently gave an invited lecture in the Department of Physics and Atmospheric Science at Drexel University. His topic was "Plasmons and Phonons in Small Crystals: Applications to Atmospheric Aerosols."

James W. Kelz, professor of education and director of the Rehabilitation Education Program, has been appointed to the State's Executive Planning Panel for the Office of Vocational Rehabilitation. The panel will address the challenge of providing services under the constraints of future funding services and will examine how services can more effectively meet the overall vocational rehabilitation needs of the severely handicapped.

Paul West, professor of English and comparative literature and Fellow, IAHS, recently served as fiction judge for the Creative Artists Program Services, New York City. Fifteen fellowships were awarded to fiction writers, as well as fellowships in poetry, film and other media.

John Cook, professor of art, has designed a medal issued this month by the Society of Medalists. Since 1930, the Society, which encourages fine medalic work, has issued two medals annually, each designed by a distinguished American sculptor. Mr. Cook's bronze medal, which uses a Latin couplet from Cicero's *Pro Placco*, "Ingenua Levitas et Erudita Vanitas," deals with the opposition of the dionysian and apollonian aspects of man's nature.

Dr. Richard E. Tressler, professor and chairman of the ceramic science and engineering program, is currently serving as a member of the Materials Research Advisory Committee, the body which reviews activities of the Division of Materials Research of the National Science Foundation.

Blaine R. Parkin, director of the Garfield Thomas Water Tunnel and professor of aerospace engineering, has been named a Fellow of the American Society of Mechanical Engineers.

A paper co-authored by Dr. David Lynn Passmore, associate professor of vocational education, has been honored as "the outstanding research paper for 1981" by the American Vocational Education Research Association. The paper — titled "Chances of Job Loss Among Teenagers and Young Adults" and written by Dr. Passmore and former graduate student Borden M. Emshoff — was presented at the Association's 1981 meeting.

Dr. Michael W. Ecker, assistant professor of mathematics at Worthington Scranton, has been appointed problem section editor of the American Mathematical Association of Two Year Colleges Review.

Dr. Raymond G. Ayoub, professor of mathematics at University Park, and Dr. Roy E. Myers, associate professor of mathematics at New Kensington, are the first winners of the new Teresa Cohen Mathematics Service Awards. The annual awards were established this year by the Department of Mathematics to honor faculty members who have contributed greatly to the department and its students. Selection is made by the combined mathematics policy committees from all of Penn State's campuses.

Dr. Cohen, professor emerita of mathematics, for whom the awards are named, has been teaching mathematics at the University for 62 years — the last 20 as an unpaid volunteer tutor. She officially "retired" in 1962 and celebrated her 90th birthday on Feb. 14.

Dr. Ayoub was cited for his long

history of generous service. A member of the mathematics faculty since 1952, he served as department head from 1968-71. He was instrumental in the 1960s in the establishment of a special sequence of courses designed for students in non-mathematical fields, and, more recently, developed a weekly workshop for graduate assistants in which he demonstrates teaching techniques.

Dr. Myers was honored for his innovative use of the microcomputer as a teaching tool. He uses the microcomputer's graphic capability as an "electronic blackboard," drawing pictorial representations of equations. His approach has been made available to other teachers through two "software" packages marketed by CONDUIT, a leading source of computer teaching aids. A member of the New Kensington faculty since 1968, Dr. Myers served as acting associate director of the campus from 1977 to 1978.

Bookshelf

Transportation is the title of a new book by John J. Coyle, professor and head of business logistics; Joseph L. Cavinato, associate professor of logistics; and Edward J. Bardi of the University of Toledo.

This basic transportation textbook, issued by West Publishing, St. Paul, Minn., also presents key managerial and financial facets important to the actual functioning of firms in the field. These include:

- Specific coverage of each mode of transportation (rail, motor, water, pipelines, air, urban and metropolitan) and their economics, primary operational features, managerial problems and current trends;

- Inter-city passenger movement options available today, along with the often misunderstood role of the travel agent;

- Special carrier forms such as shipper associations, shipper's agents, agricultural co-ops, express and courier services, as well as the lumber problem found at city terminals;

- International transportation, focusing on the liner and tramp ship industries, overseas airlines and the role of port authorities;

- The new role of the traffic manager;
- Planning and financing transportation systems in both private firm and public agency settings;

- The role of private carriage;
- Carrier organization and terminal managements and the various strategies employed by firms in quest of providing quality services while attaining adequate profits;

- National Transportation Policy and how it is formed and applied; and
- Transportation as it is shaped by and will affect the population and economic activity now and in the future.

A recently published book, *The Theory of Vibrational Spectroscopy and its Application to Polymeric Materials*, is the work of three authors, two of them members of Penn State's polymer science faculty.

The authors are Dr. Paul C. Painter, associate professor of polymer science; Dr. Michael M. Coleman, chairman of the University's polymer science program and associate professor; and Dr. J.L. Koenig, of Case Western Reserve.

The book, published by John Wiley, is described as the first integrated presentation of vibrational spectroscopy theory as applied to polymeric materials. Developments in vibrational spectroscopy, it is pointed out, are occurring at a rapid rate due to the impact of lasers, new detectors, interferometers and computers. To take advantage of these experimental developments, the spectroscopist must have a fundamental understanding of the vibrational processes in polymers, and that is provided by this book.

Partings

Although he had no specific plans for his retirement, Gerald R. Trostle knew one thing for certain: "I'm going to be busy," he stated. "And I won't get another 8 to 5 job. Thirty-five years of that is long enough." Jan. 1 marked his retirement as coordinator-inspector in Maintenance and Operations.

Helping to keep him busy will be his favorite pastimes of fishing and hunting turkeys during the two-week season in October. Mr. Trostle has shot a total of 19 turkeys and is an avid collector of such turkey-related objects as decanters and sketches, and is a member of the Wild Turkey Federation. He's also active in the Pine Grove Mills Men's Chorus.

Mr. Trostle joined the University in 1946 as a laborer in Landscape. In 1948, he became a chain and rod man for the survey crew and was later made an instrument man. Through assisting a man who worked with locks and keys, he became a hardware coordinator and was then promoted to supervisor of locksmiths. In 1960, Mr. Trostle transferred back to Landscape as a landscape maintenance foreman.

"I enjoyed my job in Landscape best," he noted, "because I really enjoyed landscaping — trees, shrubbery — that sort of thing."

Mr. Trostle became a coordinator-inspector in 1966. His responsibilities include estimating maintenance work, making technical analyses, inspecting work for quality and quantity and — an important aspect of his job — maintaining customer-University contact.

Mr. Trostle's wife, Miriam, is a part-time employee in Food and Housing in Human Development. One of the couple's daughters, Vicki, graduated from Penn State in 1973 with a B.S. from the College of Human Development.

Paul Rider feels that he's always worked with "a good bunch of people" who have given "a lot of help and on-the-job training." But it's not only his supervisors and co-workers who have given that necessary help. The practical skills and experience that Mr. Rider has imparted to University students and inmates from Rockview Correctional Institution during his 35-year career will be missed as he retires as an experimental and maintenance mechanic in Engineering.

He first helped to instruct students when he joined the Department of Industrial and Management Systems Engineering as a technician in the metal casting lab. He later worked in the metal joining lab of that same department where he assisted in teaching various manufacturing processes such as welding and forging. He also assisted in all other industrial labs, maintaining and preparing equipment.

During the early 1970s, he took part in the Forestry Program, a two-year program providing vocational training in a variety of subjects for Rockview inmates. In this program, he aided professors in teaching a ten-week, 60-hour course in welding and machine shop operation.

Mr. Rider joined the Penn State staff in 1947 as a mail clerk in West Halls and later in Nittany-Pollack residence halls. He transferred to the Department of Industrial and Management Systems Engineering in 1957, where he spent the next 25 years.

In his spare time, Mr. Rider plans to "putter around the house" and do a lot of camping at the Black Panther Camping Club in Coburn of which he is a member. He presently lives in State College with his wife, Virginia. They have one daughter, Dianne, and are the proud grandparents of one grandson, Greg.

If one word was used to describe Velva Markel as an employee, Jeanne Smith, dietician and facilities supervisor at Ritenour, contends it would be "dependable." "Velva has always been very dependable, very faithful," Mrs. Smith states. "With her being on the early shift, I never had to worry. I could always count on her being there."

After 22 years of service, Mrs. Markel, helper in the Health Center, eagerly awaited her Feb. 3 retirement. "I've worked so much during my life that I'm really looking forward to being home," she said.

Mrs. Markel was first employed at the University in 1960 as a counterwoman in Pollock Circle, later transferring to Johnston Hall. She began her job at Ritenour in 1967, remaining there for 15 years.

As a helper at the Health Center, Mrs. Markel "helped out where needed," but was primarily responsible for taking care of special diets given to patients on the early shift.

She and her husband, Robert, along with their two dogs, Peaches and Pepper, live in Pleasant Gap. Mr. Markel is also a Penn State employee who works in Vending for East Halls.

Working is one "hobby" that Leo K. Nearhoof, painter in Physical Plant, still intends to pursue during his retirement. "I don't know if you'd classify working as a hobby, but I won't stop just because I retired Feb. 1," he says. "I didn't intend to quit working. I only decided to retire a year earlier so I could enjoy life sooner."

Other hobbies that will add to that enjoyment will be hunting wild turkey and deer and trout fishing in local county streams. Mr. Nearhoof also plans some travelling "within the family" to a daughter in Maryland and a son living near Lancaster. Otherwise, he notes, "the only travelling I'll be doing will be around the woods and in the streams."

Mr. Nearhoof spent his 21 years of service as a painter in Physical Plant, "working outside in the summer, inside in the winter." Since 1961, his job took him all over the ever-changing campus. "With painting, I'd been in a good many of the buildings," he says, "but still in 21 years, there were a few surprisingly that I hadn't been in."

He and his wife, Verna, an attendant at White Hall, live in Port Matilda. They have four children — Shirley, Sharon, James and Janice — and are the grandparents of seven grandchildren.

George N. Emerick, an experimental and maintenance mechanic in the College of Agriculture, retired Feb. 1. He joined the staff in 1965.

Letty M. Mason, a janitorial worker in Physical Plant since 1969, will retire March 1.

Cheryl Lucas, a secretary in the Office of the University Registrar, left the University Jan. 1 after service beginning in 1970.

Josephine Rosenberg, assistant to the Dean of Student Affairs at Schuylkill, left the University Jan. 1. She had joined the staff in 1965.

Promotions

Staff Exempt

Jacqueline K. Greene to accountant-student loans in Controller's Office. Theresa Helmer to area representative-Continuing Education at Hershey. Janis Spalvins to architect in Physical Plant.

Susan G. Warren to financial aid coordinator-wage monitoring in Student Administrative Services. Gerald D. Wilson to assistant housekeeping supervisor in Housing and Food Services.

Clerical

Darla Franks to secretary C in Graduate School.

Patricia A. Harter to clerk typist A in Engineering.

Sabrina C. James to secretary C in Science.

Mary A. Kennedy to secretary B in Research and Graduate Studies.

Janice Ann Lovette to secretary C in Continuing Education.

Kaye L. Musser to clerk, stenographer A in Registrar.

Donna C. Nicely to secretary A in Engineering.

Janet L. Page to clerk, expeditor A in Business Services.

Donna L. Powell to inpatient billing clerk at Hershey.

Dianne L. Rossman to secretary B in Registrar's.

Jean M. Selva to secretary in Business Administration.

Elizabeth Worman to clerk typist B in Engineering.

Technical Service

Robert Bierly to maintenance worker, utility, in Physical Plant.

Timothy Bierly to maintenance worker, utility, in Physical Plant.

Frank A. Danko to maintenance worker in Physical Plant.

Joan H. Daugherty to meat cutter B in Housing and Food Services.

Thelma E. Fetterolf to janitorial worker in Physical Plant.

James H. Gummo to mechanic, experimental and maintenance A, in Agriculture.

Leroy M. Inhoff Jr. to machine operator in Housing and Food Services.

Richard Korman to carpenter A in

Physical Plant.

Raymond Lane to boiler operator in Physical Plant.

Lynne E. Perryman Jr. to meat cutter A in Housing and Food Services.

Ronnie Rogers to maintenance worker, utility, in Physical Plant.

Ronald E. Schaeffer to operating mechanic in Physical Plant.

Donna L. Shawley to offset duplicator operator in Controller's Office.

Kenneth Smith to maintenance worker, utility, in Physical Plant.

George A. Spicer to meat cutter B in Housing and Food Services.

Mary C. Watkins to group leader, janitorial, in ARL.

Carpooler

Jeanie Ghaner needs a ride from Continental Courts (Buffalo Run toward Bellefonte) to the University. She works from 8 a.m. to 5 p.m. at the Grange Bldg. and can be reached at either 355-1836 or 865-7679.

Obituaries

Dr. John C. Johnson, University research professor of acoustics and director of the Applied Research Laboratory from 1959 to 1981, died Feb. 20. He was 61 years old.

Dr. Johnson stepped down from directing the ARL last year to devote more time to program development and research. His research interests, on which he published numerous articles and reports, included ultrasonics, underwater acoustics, emission spectroscopy, noise control, seismology, high-temperature measurement, atmospheric acoustics, architectural acoustics and mass spectroscopy.

Under Dr. Johnson's ARL directorship, the Laboratory maintained leadership in technological developments for the U.S. Navy through acoustic systems and noise reduction techniques.

A 1942 graduate of Culver-Stockton College, Dr. Johnson received his M.A. degree and Ph.D. in physics from the University of Michigan. Prior to coming to Penn State in 1959, he was head of the Acoustics and Seismics Laboratory at Michigan from 1954 to 1959. From 1950 to 1954, he was a research physicist at Michigan.

George E. Bubb, a dining hall worker in Housing and Food Services from 1965 to 1975, died Feb. 3 at the age of 69.

Leo J. Carroll, a meat cutter with Housing and Food Services from 1964 to 1975, died Feb. 14 at the age of 67.

Harry C. Hess, a heating and ventilating mechanic at Mont Alto who retired last August on disability after serving since 1976, died Feb. 15.

Pearl A. Plummer, a counterwoman in Housing and Food Services in 1960-61 and a clerk in Student Affairs from 1961 until her retirement in 1978, died Feb. 4 at the age of 68.

Six faculty and staff members observe 25 years at the University

Observing 25 years of University employment are (from left to right): Barbara R. Kautz, research associate and technical editor in the Computation Center; Roy L. Henry, student parking and traffic regulations coordinator in the Office of Student Affairs; Dora G. Ream, administrative assistant at York Campus;

Leon Marshall, research aide in the College of Agriculture; Dorothy L. Borden, assistant professor of mathematics; and Merle W. Wilson, toolmaker in the machine shop of the College of Earth and Mineral Sciences.

News in Brief

Dartmouth sociologist to speak March 12

Dr. Elise Boulding, who holds the chair in sociology at Dartmouth College, will speak on "The Invisibility of Women in Development: Breaking the Perceptual Barriers" at noon Friday, March 12, in the HUB Assembly Room.

Dr. Boulding is the keynote speaker for the March 12 forum on "Research Methodology for the Study of Women in Development," sponsored by the University Committee Concerned with Women in International Development. The public is invited to attend her talk.

Author of *Women in the 20th Century* and *The Underside of History*, Dr. Boulding is noted for her strong position on the worth of women's contributions to society and the need to recognize women as full partners in world development.

Aside from Dr. Boulding's address, the forum will also feature a talk by Dr. Constantina Safilios-Rothschild, professor of human development at Penn State and author of *The Role of Women in Modernizing Agricultural Systems*. Her talk, "Hard Questions and Hard Data about Women in Development," will begin at 9 a.m. March 12 in Room 203 Keller Building.

During the one-day forum, task force members invited from various universities and international agencies will discuss and devise methodological recommendations for the study of women in development in such subject areas as: food production, population and family planning, home economics, employment, intervention, education and family structure. Working sessions, to be held in Keller Building, will open with a brief presentation by each task force member. Interested persons are invited to observe the proceedings.

Further information about the forum may be secured from Dr. Carolyn E. Sachs, assistant professor of rural sociology, in Room 205 Weaver Building (865-0455).

English Department fund will honor Henry Sams

The University's Department of English has established a memorial fund in honor of Dr. Henry W. Sams, who served as department head from 1959 to 1972.

Dr. Wendell V. Harris, the present department head, said the memorial fund will make it possible for the department to reward distinguished achievement by undergraduate majors and members of the English Honors Program. It also will be used to enrich the undergraduate programs.

Dr. Sams, who died on Aug. 21, 1981, was head of the English Department during the years of its greatest expansion and development. He also served as associate dean of the Graduate School until his retirement with emeritus rank in 1977.

"A fund of this kind serves to his colleagues, friends and students an appropriate way to remember a teacher who wrote in his journal, 'There is nothing sentimental about the love of English. The moment we abandon our literature will mark the beginning of our end,'" Dr. Harris said.

Contributions, payable to the Henry W. Sams Memorial Fund, may be sent to the Department of English, Room 117 Burrows Building.

Kern schedule changed

During the Winter Term break, Kern Cafeteria will alter its regular 7 a.m. to 6 p.m. schedule.

The Cafeteria will be closed March 6 and 7. From March 1-5 and March 8-10, service will be available from 7 a.m. to 2 p.m.

Studebaker Service Building — Ken Hedrich photo

Architectural photography shown at HUB

Eighty photographs of buildings designed by the world's leading architects comprise the exhibition "Hedrich-Blessing: Architectural Photography," on display in the HUB Gallery through Sunday, Feb. 28.

The architectural photography firm of Hedrich-Blessing, founded in 1930 by Ken Hedrich and Hank Blessing, has documented the work of such great 20th-century masters as Frank Lloyd Wright, Marcel Breuer, Buckminster Fuller, Eileen and Eero Saarinen, John Holabird, John Portman, John Root, Mies van der Rohe and Skidmore, Owings and Merrill.

Included in the exhibition are photographs of Chicago's "tall buildings"

by Dankmar Adler and Louis Sullivan, as well as Kerk's House of Tomorrow and Holabird's and Root's searchlight-surrounded Chrysler Pavilion, both from the Chicago Exposition of 1933, "A Century of Progress."

A special section is devoted to a group of photographs from Hedrich-Blessing's "Signature/Exhibition" collection — vintage, mural-sized enlargements of significant projects by the company's most renowned clients. These murals, some of which measure over 30 x 40 inches, have been approved and photographed by the architect and then returned for the firm's archives.

Nominations sought for alumni directorship

Applications and nominations are being sought for the position of Executive Director of The Penn State Alumni Association.

The Executive Director is responsible to the Senior Vice President for Administration and to the Executive Board of the Alumni Association for planning, developing and executing viable programs of mutual benefit to alumni and the University, and supervising the staff necessary to carry out these programs.

The Executive Director is also responsible for keeping alumni well informed about the University and its alumni; fostering the active interest, support and involvement of alumni and the Association in University affairs; and encouraging acceptance of the University's goals and recognition of its achievements.

As a major qualification, three to five years of successful executive-level or Alumni Association experience are required. Graduation from a four-year

college or university with a minimum of a bachelor's degree is also required, as well as proven initiative and managerial and communication skills.

A nine-member search committee has been appointed to consider candidates for the position. It is chaired by Donald M. Cook Jr., of Cherry Hill, N.J. The other members are: Edward R. Book, Hershey, Pa.; Phyllis W. Crabtree, State College, Pa.; Harry A. Dorian, Villanova, Pa.; Edward V. Ellis, associate dean, Human Development; Jay H. Feldstein, Pittsburgh, Pa.; Irvin H. Kochel, assistant vice president for administration; Robert J. Scannell, vice president and dean, Commonwealth Educational System; and Jerry R. Wettstone, Shiremanstown, Pa.

The deadline for applications and nominations is May 1. They should be sent to: Executive Director Search and Screen Committee, 203C Old Main, Dept. 1-7, The Pennsylvania State University, University Park, Pa.

Robeson Center hosting prints, etchings by John Biggers

Prints and etchings from artist-educator John Biggers will be displayed on campus at the Paul Robeson Cultural Center until March 19.

A 1954 graduate of the University and 1972 Distinguished Alumnus, Mr. Biggers painted the Burrows Building murals while studying for his doctorate at Penn State. His murals also grace such buildings as the United Transport Workers' Labor

Temple in Chicago, Texas Southern University's Science Building and the Houston Public Library.

A painter, sculptor, graphic artist and muralist, Mr. Biggers was chosen by the Danforth Foundation as one of the 10 best teachers in the U.S. in 1968, when he received its E. Harris Harbison Award for Distinguished Teaching.

Conference homecoming for Penn State Ph.D.s

For Dr. Herschel W. Leibowitz, Evan Pugh professor of psychology at the University, this week's conference on "Vision as a Factor in Military Aircraft Mishaps" at the U.S. Air Force School of Aerospace Medicine, Brooks Air Force Base, Texas, is something of a homecoming.

Among the invited participants are four of his former graduate students, all Penn State Ph.D.s: Dr. D.A. Owens (Ph.D. '76), a psychology faculty member at Franklin & Marshall College; Dr. R.T. Hennessey (Ph.D. '72), head of the Human Factors Committee, National Research Council; Dr. C. Johnson, (Ph.D. '75), a faculty member in the Department of Ophthalmology, University of California at Davis; and Dr. R.B. Post (Ph.D. '81), a post-doctoral fellow also at UC/Davis.

Dr. Leibowitz himself is presenting an invited lecture in collaboration with Dr. Post on "Implications of Gaze Stability Mechanisms for Air Safety." Other topics being addressed include individual differences in accommodation and convergence, visual factors in target detection and causes for visual misperceptions.

CWSP funds restricted

College Work Study and Graduate Work Study Program supervisors are reminded that Work Study students cannot be paid from CWSP funds during Winter Term break (Feb. 25 - March 10). If students work, they must be paid from departmental funds.

The last day to work for Winter Term is May 24, and the first day CWSP students may work Spring Term is March 11.

Funding Sources

For further information, call 865-1372.

(376-1) The National Science Foundation has several programs for which proposals may be submitted any time, but which require 6-9 months to process. These programs include: Division of Behavioral and Neural Sciences — anthropology, linguistics, memory and cognitive processes, neurobiology, psychology, sensory physiology and perception, and social and developmental psychology; Division of Environmental Biology — biology research resources, doctoral dissertation research, and ecosystems studies; and in other divisions — engineering research equipment, industry-university cooperative research projects, research in information science and technology, science in developing countries and U.S.-China/U.S.-East Asia and U.S.-New Zealand cooperative science programs (NZ travel only). Contact numbers are available for each program. (Ref. NSF Bulletin, February 1982)

Murphy puts national focus on extrajudicial behavior

Not often does a young scholar's first book spark a national debate — fanned by the *New York Times* and other giants of the American press.

But such was the case last week for Dr. Bruce A. Murphy, 30, assistant professor of political science at the University. The incredible revelations of his *The Brandeis/Frankfurter Connection: The Secret Political Activities of Two Supreme Court Justices* (482 pages, Oxford University Press, \$18.95) were heralded in David Margolick's page one story in the *Sunday Times* of Feb. 14. Wire stories by the Associated Press and United Press International followed on its heels, and last Thursday's *Newsweek* devoted its entire Justice section to the story.

Even so, the *Times* refused to dim the spotlight. Tuesday's issue carried an analysis of the relationship by Mr. Margolick, and the paper's judgment on the issue flowed forth in its lead editorial on Thursday. On Sunday, the *Times* carried a story on the reaction to the relationship by some of Frankfurter's former law clerks. In addition, *The Washington Post* began serializing the book.

The outstanding factual revelation was that Brandeis, who was 26 years older than Frankfurter and who served on the Supreme Court from 1916-39, paid

Frankfurter more than \$50,000 to further the justice's goals on public policy. But the larger issue Dr. Murphy explores via his case in point is that extrajudicial behavior by judges can jeopardize their impartiality.

Dr. Murphy's reaction to the tremendous publicity the book has received is mixed, he says.

"On the one hand, I'm extremely grateful for the attention to the issue," he says. "My purpose was to spark a debate; if I've done that, I've been successful."

"The potentially negative side is the narrowing of the issue by the wire services. The *New York Times* and *Newsweek* reporters did a marvelous job. They read the book and understood it. They checked out my sources and my background. But AP and UPI lost a lot of the subtleties and context in their versions. They focused on the \$50,000 Brandeis paid Frankfurter, which is just one part of one chapter in a nine-chapter book. I hope people will not be misled by that emphasis."

"My hope is that, when people read the book, they won't be interested in that revelation alone. The book raises questions about the extrajudicial role of the judiciary. The resolution of that issue depends ultimately on the readers."

What gets lost in the glare of the spotlight, Dr. Murphy adds, are the years of research preparatory to such a study. "I'm somewhat embarrassed to be singled out from a number of good scholars here and elsewhere who do significant research."

Dr. Murphy's own research started some six years ago, as a doctoral candidate at the University of Virginia. He became interested in the topic of extrajudicial behavior — "an area where there's not a lot of material or discussion."

For his book, the salient question was "how best to proceed." He began with an analysis of all Supreme Court justices, subsequently narrowing the field to 10, then to five, before focusing on Brandeis and Frankfurter.

Much of his work was conducted in the Library of Congress, where he was confronted with 250 boxes of Frankfurter materials, each box holding an estimated 1,100 letters or documents. He examined 60 different collections of papers — some indexed, some not — of the two justices, analyzed 40 different oral histories relating to them, and interviewed 20 key persons who knew or had worked for them.

One of the recurring problems in research of this sort is time and money.

"Without the support of the University, it would never have been possible to finish the research," Dr. Murphy says. He received a Research Initiation Grant, a grant from the Institute for the Arts and Humanistic Studies, in addition to "help and advice from Dean Magner's Office (associate dean for research and graduate studies, College of the Liberal Arts), which pointed out sources of financial support."

Where does he go from here?

"Generally, I want to pick another large topic concerning the Supreme Court and see if I can find a way of examining that issue. I am interested in examining the political activities of the court during the 1960s."

He says such a study would require another "five to seven years of very tedious, very difficult, but very exciting research before I can even start to put a book together."

"I'm still sort of finding my way in my discipline, and discovering who my audience is," he says. "I like writing for the general public, but with footnotes and references appropriate to a scholarly audience. I'm still not certain whether I'm a writer of articles or of books. The general public doesn't read articles — that's the problem."

Seven members of the Long family in front of the Knock Shrine in County Mayo, Ireland, are: (top, from left) Kevin and Dr. Thomas Long; and (bottom, from left) Mrs. Anna Marie Long, Patricia, Clare (in Patricia's arms), Mary Elizabeth and Paul.

Penn State family sets a Fulbright record

A Penn State family has the distinction of being the largest family on record ever to go abroad on a Fulbright award.

"When they heard there were nine of us, the Irish Scholarship Exchange administrators suggested we might be setting a record," says Dr. Thomas E. Long, professor of education, who returned this term from a Fulbright Lecturing/Research position at University College, Dublin, Ireland.

So when U.S. Rep. William F. Clinger sent Dr. Long a congratulatory note, the professor asked Rep. Clinger if he could help find out about the largest family angle. The Congressman's office then contacted the Council for International Exchange of Scholars in Washington, D.C., and learned that the Longs would indeed be the largest family to take a Fulbright award since the Council started keeping records in 1950.

Going to Ireland with Dr. Long and his wife, Anna Marie, were the couple's seven children: Patricia Ann, 22, a 1980 Penn State graduate; Timothy, 21, a Penn State junior; Michael, 20; Kevin, 19; Mary, 15; Paul, 12; and Clare Marie, 3.

While in Ireland, Dr. Long lectured on educational and adult psychology and counselor education at University College. He also conducted research on the effects of the industrialization of Ireland on segments of the Irish population.

"Our family visited every county in Ireland and developed a sense of Irish community life and education," says Dr. Long, whose ancestors immigrated from Ireland to Pennsylvania.

In fact, Dr. Long discovered a relationship to a former Archbishop of Dublin, Archbishop Cardinal Cullen. He and his family also traced other of the Long "roots."

"It was a great experience, and the best part of all was being able to share and enjoy it with our entire family," he says.

Pattee tour schedule

Tours of Pattee Library will be offered on Tuesday, March 9; Wednesday, March 10; Thursday, March 11; and Friday, March 12, at 9 a.m., 11 a.m., 1 p.m., and 3 p.m. An evening tour will be given Thursday, March 11, at 7 p.m. All tours will begin in the Main Lobby of Pattee.

Branch Libraries will offer tours on the same dates. Tours for undergraduate students will begin at 10 a.m.; graduate tours will begin at 2 p.m. The branch libraries are: Architecture Reading Room (207 Eng. Unit C), Earth and Mineral Sciences (105 Deike), Engineering (325 Hammond), Life Sciences (E210 Pattee), Mathematics (110 McAllister), and Physical Sciences (230 Davey).

Affirmative Action notice for veterans

The University is a government contractor subject to Section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, which requires government contractors to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

A "disabled veteran" is a person entitled to disability compensation under laws administered by the Veterans Administration for disability rated at 30 per cent or more, or a person whose discharge or release from active duty was for a disability incurred or aggravated in the line of duty.

If you are a disabled veteran covered by this definition and would like to be considered under the affirmative action program, please contact the Affirmative Action Office (863-0471/433-0471). The information requested is voluntary and will not be used to affect adversely the terms and conditions of your employment. It shall be kept confidential, except that (1) supervisors and managers may be informed regarding restrictions on work duties and necessary accommodations, and (2) first aid personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment, and (3) government officials investigating compliance with the Act shall be informed.

Women's Studies seeks Colloquium papers

The Women's Studies Colloquium is seeking papers for a special all-day colloquium April 6 on research projects relevant to women's studies. Persons interested in participating are urged to send a one-paragraph description of their project to Frieda S. Rozen, Room 901 Liberal Arts Tower, University Park, by March 12.

Awards

(Continued from page 1)

The McKay Donkin Award

The McKay Donkin Award was established in 1969 in honor of the late McKay Donkin, who served as vice president for finance and treasurer of the University from 1957 to 1968. The award, which consists of a \$500 stipend and a certificate, is presented to the full-time member of the faculty or staff or the retiree who has contributed most to the "economic, physical, mental or social welfare of the faculty" of the University. The contribution of the nominee should be for duties or services which are above and beyond his or her regularly assigned duties. Previous recipients are William G. Mather, Ernest B. McCoy, Samuel C. Blazer, Eugene Wettstone, Kenneth L. Holderman, Patricia Farrell, Lawrence Perez, Michael R. Lynch, Margaret B. Matson, Karl G. Stoeckelke, Robert S. Friedman and Charles W. Mann.

The John E. Wilkinson Award for Administrative Excellence

The John E. Wilkinson Award for Administrative Excellence was established in 1970 by friends of Mr. Wilkinson, a lifelong Centre County businessman. The award, which carries a stipend of \$500, is made annually to a member of the staff whose performance methods and achievements exemplify administrative excellence. Previous recipients are Paul M. Hulsehouse, John B. Pezzoni, Kenneth L. Holderman, Eleanor Ferguson, Harry D. Zook, Russell E. Larson, Wayne D. Lammie, David E. Stormer, Billy R. Baumgardner, James B. Bartoo and Charles L. Hosler.

The Barash Award for Human Service

The Barash Award for Human Service was created in 1975 by the family of the late Sy Barash. It is an annual award to a full-time member of the faculty, staff or student body at University Park who has contributed most, apart from regular duties, to human causes, public service activities, and organizations, or the welfare of fellow humans. This award carries a stipend of \$1,000. Previous recipients are Robert Welsh, Ronald Ross, Robert H. McCormick, Arnold Addison, Charles H. Nagney, Robert J. Flipse and H. LeRoy Marlow.

Engineering history intended to 'set the record straight'

It's Michael Bezilla's hope that his new book, *Engineering Education at Penn State*, will once and for all set the record straight.

The "characterization of Penn State as little more than a glorified 'cow college' for nearly the first hundred years of its existence is a false one," he writes. "From about 1890 until 1910, the engineering curriculums enrolled at least one-half of Penn State's undergraduate student body and over one-fourth until the onset of the Great Depression."

Engineering education was important in the context of land grant education from the earliest years, according to Dr. Bezilla. The misunderstanding of its role at Penn State arose from a variety of circumstances: the institution's first name, The Farmers' High School; the geographical isolation of the campus and a misreading of the words "land grant."

Published by Penn State's Press, the history originated as a commissioned project of the Penn State Engineering Society, the alumni body of the College of Engineering.

"But the book is not a puff piece," Dr. Bezilla points out. "I had no preconceptions; I didn't even know whether I would wind up with a short article or a book."

Dr. Bezilla is the author of an earlier book published by Penn State's Press, *Electric Traction on the Pennsylvania Railroad: 1895-1968*. Currently at work on a history of the entire University, he earned his M.A. and Ph.D. degrees in history from Penn State in 1975 and 1978, respectively.

"The College of Engineering's strength historically lay with instruction rather than research," Dr. Bezilla writes, noting its contribution to the Commonwealth's pool of technically trained personnel.

Pennsylvania's largest single academic source of professional engineers, since 1884, the College has awarded over 11,000 associate degrees, 23,000 baccalaureate degrees and 2,500 graduate degrees.

Battled by two wars, the Great Depression, the loss of its buildings through fire and inadequate support from the State legislature, the College has been lucky in its choice of leadership, according to Dr. Bezilla.

"The early deans were very strong personalities, strong dictators," Dr. Bezilla said in a recent interview. "I think

it's the nature of the profession. Engineers are more interested in results than in haggling over the processes through which they can be achieved. Because the deans were such dynamic individuals, they succeeded in putting engineering education at Penn State on a sound academic footing."

The first dean, Louis E. Reber (1895-1907), left a 50-page written memoir of his years at Penn State, which supplied much of the information Dr. Bezilla used on the early years of the School, from its organization in 1896 with three departments — Civil, Mechanical and Electrical Engineering.

A fire in 1918 gutted the College of Engineering's original building (above), located at College Avenue and South Allen; an early engineering laboratory (below).

Dean Reber, who left Penn State to direct extension activities at the University of Wisconsin, also played a key role in the development of State College. With his brother-in-law (and successor as dean, John Price Jackson) and two other alumni, he purchased a dilapidated hotel at the corner of South Allen and College and renovated it to provide the town's finest accommodations. He helped found the borough's first electric light company and bank and for a few years was co-owner of the first newspaper, the *State College Times*.

"The early deans were not particularly outgoing personalities; they were all

business," Dr. Bezilla reports. He writes:

"In characterizing Robert Sackett (1915-1937), his contemporaries invariably took note of his iron will and his rigid determination to do his job, regardless of the magnitude of the obstacles thrown in his path. His tenacity reflected itself in his demeanor."

But Dean Sackett was also an individual of varied accomplishments. A sailing enthusiast, he exhibited watercolor in several one-man shows.

Another dean portrayed as all business on the job was Harry Hammond (1937-1951), co-author of two national reports which influenced the direction of technical education for many years. He was followed by Eric Walker, his personal choice for the job.

"Dean Walker brought a refreshing change in personal style," Dr. Bezilla writes, recording a story told about Dr. Walker's first faculty meeting. Most of the staff filed in and sat in the back of the room, leaving the first six rows vacant. Dr. Walker looked around and then announced with a straight face that only those sitting in the first five rows would be eligible for salary increases next year.

"This lighter touch, while perhaps not so visible to students, was much appreciated by the teaching staff and fostered a spirit of camaraderie that had been lost during the upheavals of post-war expansion," Dr. Bezilla comments.

Dr. Walker helped upgrade engineering research at the University, and his administration saw the construction of the nuclear reactor and the founding of the associate degree program.

While most of the College's deans tended to keep strictly to business, Dr. Bezilla does take note of one unusual member of the faculty. He was Eugene C. Woodruff, a faculty member from 1913 to 1939, and a millionaire. A professor of engineering education because he loved it and accepted only a minimum salary, which he noted didn't even pay his income tax.

Dr. Bezilla's account of the College's history comes all the way down to 1981 and the present dean, Wilbur L. Meier. Fittingly, history repeats itself.

Dr. Meier, who came to Penn State last June from Purdue University, is the second engineering dean to do so. Sixty-six years earlier, Dean Sackett took the same route east.

Alumni fellows

(Continued from page 1)

Education and a 1950 recipient of a Penn State master's degree, College of Education;

— Stanley B. Lathan of Los Angeles, an independent film and television director and a 1967 graduate, College of the Liberal Arts;

— and Adolph J. Lena of Dunkirk, N.Y., chairman of the board and chief executive officer of the Al Tech Specialty Steel Co. and a 1948 graduate, College of Earth and Mineral Sciences.

The Alumni Fellows Program, now in its 10th year, is designed to allow the

University community to share the expertise and experience of selected alumni. Including the nine for this year, the program will have brought a total of 74 Fellows back to their alma mater.

While on campus for their three-to-five-day visits, the Fellows attend classes, offer seminars, give public lectures and hold informal discussion sessions with students.

They also are entertained by University President and Mrs. John W. Oswald, and are presented bronze plaques, designed by John Cook, professor of art.

The Alumni Fellows Program is sponsored by the Penn State Alumni Association and the academic colleges of the University.

which housed equipment, experiments or animals that couldn't be moved to another location or subjected to the lower temperatures.

The committee had projected a total cost avoidance of about \$90,000, but many members of the faculty and staff asked to use office space during the recess. While portable heaters were supplied in some instances, many requests required that an exception be granted for an entire building.

Comp Center offers workshops

The Computation Center is offering two workshops during the break between Winter and Spring Terms. The workshops, which are open to all faculty and staff members and graduate students, are:

Introduction to Interactive FORTRAN (4 days/March 2 — 5, 112 Walker Building) Basic computer concepts and techniques of programming will be studied. The workshop will be oriented toward those who have NO previous computer experience. The course will use the interactive, time-sharing VM/CMS system, and participants should be users of a P, U, or C account and be "joined" to VM/CMS. Advanced FORTRAN Techniques (3 days/March 2 — 4, 112 Buckhout Laboratory) This workshop will require previous programming experience and will describe a variety of convenient and efficient techniques which are beyond the scope of an introductory course.

Lectures will be given throughout each day, beginning at 9 a.m. and resuming at 1:30 p.m. after a lunch break. Sample programs will be studied, and practice problems will be assigned. Registrations will be accepted in Room

229 Computer Building. A charge of \$5 (cash, check or interdepartmental transfer) is payable in advance by each registrant.

Those registering for the introductory course should also request that they be joined to VM/CMS.

Faculty/Staff Alerts

Account statements issued to SERS members

Annual retirement account statements have been distributed to faculty and staff members who belong to the State Employees' Retirement System (SERS). These statements provide information about retirement accounts as of Dec. 31, 1981.

Some faculty and staff members who are age 50 or older have received statements containing projected retirement annuities. The State Employees' Retirement Board continues to work toward the goal of eventually providing this more detailed report for all members age 50 and older.

Faculty and staff members with questions about their retirement account statements should contact the Employee Benefits Division at 865-1473 (network: 475-1473).

Energy costs avoided over Holiday recess

Almost \$54,000 in energy costs were avoided by the University over Christmas through the Holiday Recess Program, the Executive Energy Conservation Committee has announced.

Temperatures for residence and dining halls and academic and administrative buildings were lowered to approximately 50 degrees Fahrenheit from Dec. 19 to Jan. 4.

About 175 of the University's 200 buildings were included in the cutback. Exceptions were granted to buildings

Dr. Eckhardt holds Merlin leaves at right, "Prose Brut," at left.

Medieval manuscripts reunited in Pattee

Two medieval manuscripts copied in the 15th century by an English scribe and later separated have been reunited after 500 years in the vault of Pattee's Rare Books Room.

Their identification depended, according to Dr. Caroline Eckhardt, on a blending of scholarship and serendipity. Dr. Eckhardt is an associate professor of English and comparative literature and director of the comparative literature program.

She has been studying one of the manuscripts for several years, and this spring will publish a book about her research, *The Prophetia Merlini of Geoffrey of Monmouth: A Fifteenth-Century English Commentary* (Medieval Academy of America, Cambridge, Mass.).

Consisting of five inscribed leaves and a sixth seemingly blank one, the first manuscript is a copy in English, with commentaries, of the prophecies of Merlin. These prophecies attributed to the legendary magician of King Arthur originally appeared in Latin in the 12th century as part of the *Historia Regum Britanniae* written by Geoffrey of Monmouth.

"Geoffrey's blending of history and fiction was the first systematic version of the Arthurian legend," Dr. Eckhardt explains, "and it was a 12th-century bestseller. Fusing two cultural streams—that of England's Norman conquerors and the native British Celts—Geoffrey made Arthur into an international hero on the

model of Charlemagne.

"Some 70 Latin copies of the prophecies of Merlin are known, as well as medieval translations into French, Icelandic and several other languages. This is apparently the only English prose translation extant, however, which is surprising in view of the work's popularity."

Rare Books Librarian Charles Mann purchased the Merlin leaves in the 1960s, along with two other unrelated manuscripts, to provide research materials for faculty members and graduate students. Dr. Eckhardt believes that the Merlin work was probably written during the third quarter of the 15th century, somewhere between London and Oxford, and that it was issued first as a pamphlet and then later was bound into a book. She has sought unsuccessfully to trace that book.

In the course of studying the manuscript, Dr. Eckhardt had the "blank" page exposed to ultraviolet light and made the incidental discovery of the signature of a "Thomas Widdowes." During a summer spent in research at the Bodleian Library in Oxford, she was able to track down Widdowes, who may have owned the manuscript at one time.

"He was a 17th-century schoolmaster," she says, "a royalist who always kept one jump ahead of the Cromwells."

One of Dr. Eckhardt's scholarly preoccupations was to attempt to find other manuscripts in the handwriting of the Merlin scribe, and she concentrated

much of her effort on examining copies of a popular 15th-century chronicle, *The English Prose Brut Chronicle*, of which 166 copies have survived. ("Brut" refers to Brutus, who was a pseudo-historical character, a legendary survivor of the Trojan wars and the supposed founder of Britain.)

"Because *The Prose Brut* contains a mixture of historical narrative and propaganda, not unlike the content of the Merlin prophecies, I thought the Merlin scribe might have been attracted to the material and copied it, too," Dr. Eckhardt explains.

Even though this avenue of approach eventually came to a dead end, Dr. Eckhardt will still count her summer at the Bodleian a great success. She had earlier formed the habit of handing out photocopies of the Merlin leaves to other medievalists and continued the practice at Oxford.

"It was a little like putting a message in a bottle and casting it on the waves," she observes. "I hoped someone to whom I'd given a photocopy would someday come across a manuscript by the Merlin scribe and recognize the handwriting."

And that's exactly what happened. Dr. Eckhardt gave two photocopies to Jeremy Griffiths, a young Oxford medieval scholar. Some two years passed, and one day Dr. Griffiths was asked by Sotheby Parke Bernet, the English auction house, to examine a manuscript of *The Prose*

Brut consigned to them for sale. When he saw it, something clicked, and he dug up Dr. Eckhardt's photocopies. The two manuscripts seemed to him to be in the same hand, and he so advised Sotheby—which carried a note to that effect in the official sale catalog.

Dr. Eckhardt heard the news of the find on a Thursday morning. The auction was scheduled for the next Tuesday.

Mr. Mann and Libraries Dean Stuart Forth were as excited by the news as Dr. Eckhardt, and it was agreed that the Libraries would contact a London agent and bid on the manuscript, using money contributed to the Libraries by private donors.

"I was thrilled," Dr. Eckhardt continues, "but I was also quite apprehensive. The Libraries' funds were limited, so there was no assurance we would get the manuscript. Over the weekend, my husband and I decided that we would make a donation to the Libraries to enable them to raise their bid. The Penn State Credit Union helped by giving us a loan."

"The manuscript was sold for exactly the amount we allotted. One more bid, and we would have lost it."

Penn State's *Prose Brut* consists of 99 leaves and is much more elaborately decorated than the Merlin manuscript, with inscribed initials in red, blue and gold. It was probably made for a wealthy patron.

"Unfortunately, the first page is badly faded," Dr. Eckhardt reports, "so although it contains a coat of arms, it cannot be distinguished. The handwriting in the two copies is quite similar. For example, the scribe had a distinctive way of making a P and a d, and both manuscripts employ the same unusual symbols for periods and other punctuation."

"I think it's exciting that the Libraries now own the only known English copy of the Merlin prophecies as well as a copy of the most popular 15th-century chronicle, and both from the same hand," Dr. Eckhardt adds.

Dean Forth noted "his great pleasure" in the Eckhardt's generosity in providing funds to help acquire the second manuscript.

The history of the manuscripts since they left the workshop of the Merlin scribe is unknown. Someone has gone through both of them and removed all references to the Pope—possibly after Henry VIII separated England from the Catholic Church about 1534.

Whatever their vicissitudes, they now repose next to one another in the Rare Books Room.

"Even though they were acquired at different times, I thought they ought to be together," Dr. Eckhardt observes. "We medievalists tend to become very emotional about our work!"

Medalists

(Continued from page 1)

fabrication technology for use in a new generation of extremely stable, high performance deformable mirrors... these same materials can be applied to present day systems to achieve a five times reduction in the cost of their subsystems. This represents a savings of millions of dollars and permits system pricing in a range within reach of the private astronomical community."

Dr. Cross holds B.Sc. and Ph.D. degrees from Leeds University. The author or co-author of 144 publications, he joined the staff of the University in 1964.

In the nine years since Dr. Mahoney's doctorate was conferred by Stanford University, he has amassed an impressive record of research and scholarly publications, authored four major books and co-authored six others, and inaugurated an important new journal, *Cognitive Therapy and Research*. His colleagues attest that Dr.

Mahoney's interest in the cognitive and behavioral processes of researchers is pioneering. His *Scientist as Subject: The Psychological Imperative* related philosophy and methodology to clinical investigation and has opened up a new area of research known as the psychology of science.

Dr. Mahoney's landmark book on *Cognition and Behavior Modification* and his program of research have helped to redirect the field of behavior therapy from a predominantly sensory orientation to one in which cognitive processes occupy a paramount role. This work underscored the predominant role played by faulty thought patterns in human distress and behavioral disorders.

Dr. Mahoney is also one of the leading researchers on self-regulatory processes. He has done important studies in clinical psychology and behavior therapy with his emphasis on self-change systems and the role of personal belief systems in psychological adjustment and well-being. The culmination of his work in this area is recounted in his book, *Self-Change:*

Strategies for Solving Personal Problems, published in 1979. His applied work has been extremely influential beyond the academic setting.

Dr. Mahoney joined the faculty in 1972. He earned his undergraduate degree at Arizona State University.

Phonathon

(Continued from page 1)

alumni phone numbers." On the average, OGE expects to collect about 75 percent of the actual money pledged. In the past, however, many alumni have exceeded their pledges, while some who did not pledge reconsidered and sent in contributions.

Pledges by College are:
Agriculture — 4 nights, 121 students calling, \$8,950, 390 pledges

Business Administration — 4 nights, 496 students calling, \$34,000, pledges not yet tallied

Earth & Mineral Sciences — 3 nights, 55 students calling, \$9,833, 351 pledges

Engineering — 4 nights, 65 students calling, \$7,168, 354 pledges

Health, Physical Education and Recreation — 3 nights, 38 students calling, \$6,461, 315 pledges

Human Development — 3 nights, 58 students calling, \$6,940, 398 pledges
Liberal Arts — 2 nights, 27 students calling, \$2,985, 161 pledges

Science — 3 nights, 39 students calling, \$7,382, 312 pledges

Renaissance Scholarships — 2 nights, 41 students calling, \$9,046, 407 pledges

Members of Alpha Phi Omega, Gamma Sigma Sigma, Parni Nous and Skull and Bones took two nights at the phones to raise funds for general University use. They collected \$7,551 and 361 pledges.

"We feel the Phonathons produce many benefits for the University," Mrs. Tift says. "They help expand the base of support among younger alumni and educate them to contribute to Penn State. At the same time, the students participating as callers are learning about the University's needs. And Phonathons also provide a mechanism for helping us keep our records up to date."

Regular, 'aerobic' exercise necessary for overall health

Having trouble sleeping at night? Feeling tired, depressed or tense during the day? You may not be getting enough exercise.

"Most people need to exercise for about 30 minutes every other day, or three times per week, to realize fully the benefits of an exercise program," says Dr. Dorothy V. Harris, professor of physical education.

A regular exercise program, she adds, can help you sleep better, increase your tolerance for day-to-day stress and give you more energy.

"The most important aspect of an exercise program is to raise the heart rate to at least 150 beats per minute and then maintain this level for between 20 and 30 minutes," Dr. Harris says.

To accomplish this, she recommends "aerobic" exercises such as jogging, swimming, bicycling, skiing, and ice and roller skating — "or any other activity that raises the heart rate and that can be maintained for 20 or 30 minutes."

"Aerobic" exercises, Dr. Harris explains, are so-called because they increase the body's use of oxygen, thereby strengthening the circulatory and respiratory systems.

"Calisthenics, weight-training and other similar exercises are good for improving muscle tone and flexibility but often do not increase the heart rate to the recommended level," Dr. Harris says.

A well-balanced exercise program should consist of both kinds of exercise, with calisthenics being especially important to help warm up the body before such aerobic activities as jogging and thus reduce the risk of tearing or straining muscles.

If you do not exercise regularly, you should take certain precautions before beginning an exercise program, Dr. Harris cautions.

"Depending on your age, previous lifestyle and general health, a physical examination may be highly advisable," she observes.

"If you're under 35 years of age, you should have a physical examination if you are considerably overweight, if you are a heavy smoker or if you have health-related problems," she says.

If you're over 35 years of age, she adds, you should have a physical examination before entering into an exercise program, regardless of your self-conceptions of your physical well-being.

"Because a variety of physical disorders, even in seemingly healthy persons, can appear in the 30s, persons in this age group and beyond should get regular physical examinations regardless of whether or not exercising is planned,

but especially if it is," Dr. Harris says.

No matter what your age, start out slowly on an exercise program.

"Don't try to accomplish too much too soon," Dr. Harris says. "There is no need to feel pain when exercising. What is important is to increase your heart beat to the recommended level, always stopping at the point at which pain is felt."

She also stresses that the beginner should not expect to be able to accomplish as much as a person who has been exercising for some time.

"In fact," she says, "exercise should always be an individual matter, with each person relying on his or her own body to determine the level of exertion."

The key to a successful exercise program is increasing the heart rate and keeping it there for about a half hour. Such measures as distance or speed vary from person to person, so what's important is to exercise at the pace that is best for you."

Equally important, Dr. Harris notes, is that exercise be enjoyable.

"Whatever form of exercise you choose, it must be enjoyable or you will find it difficult, if not impossible, to stick with it," she remarks.

In particular, she recommends that if you're beginning an exercise program, it might be wise to avoid competitive sports such as tennis, which require high levels of skill.

"If you're going to play tennis or another competitive game, you should do so only with persons of comparable skill levels. Otherwise, it is much too easy to become discouraged and quit," she explains.

On the other hand, it is a good idea to take exercise with another individual, such as a co-worker or friend.

"Because the benefits of exercise can best be realized by following a regular schedule, it is important to make a commitment to a regular exercise program, such as agreeing with a friend to exercise together at given times each week."

"Getting exercise should be like getting food or getting sleep — it should be a vital part of your life," she says.

In addition to regularly scheduled exercise sessions, Dr. Harris recommends building exercise into your normal schedule of activities.

"An effective way to do this that is often overlooked is to make a conscious effort to walk instead of driving whenever possible," she explains. "And when walking, you should do so at a pace quick enough to increase the heart rate."

Try using the stairs instead of riding

elevators or walking down the hall to talk with a colleague instead of picking up the telephone.

Observing that the University's many exercise facilities are open to faculty and staff members at a variety of times, Dr. Harris says persons interested in exercising before or after work, or during lunch hours, usually can do so. Hours for faculty and staff members can be obtained by calling the facilities, which are listed in the telephone directory.

Dr. Harris further observes that the College of Health, Physical Education and Recreation has supervised noontime programs for men and women.

The women's program, open to all faculty and staff members at no cost, consists of an exercise-activity program on Mondays, Wednesdays and Fridays. On Tuesdays and Thursdays, swimming is

offered. All activities are in White Building.

Women interested in this program should contact the Professional Physical Education Program Office at 863-0441. Medical clearance is required for all participants.

The men's program — directed by Dr. Karl G. Stoenefalke, acting dean of the College — is for persons with a medically defined problem. It is open only to persons over 40 years, and a fee is charged for testing (required of all participants) and services.

Men and women (who will be referred to the women's program) interested in this program should contact Dr. Stoenefalke at 865-2565.

Finally, in certain instances, evaluation of physical fitness and health can be accomplished by testing in Noll Laboratory.

Calendar

Feb. 25 —

Mar. 14

Special Events

Thursday, Feb. 25

Final Exams through March 1.

Computational Fluid Dynamics seminar, 4 p.m., 232 Hammond. T.R. Gouindan, aerospace engineering, on "A Space Marching Method for the Navier-Stokes Equations."

Friday, Feb. 26

Sports: Wrestling, Eastern Wrestling League Championships. Also Feb. 27.

Saturday, Feb. 27

Introduction to Backyard Beekeeping, 1-4 p.m., Shaver's Creek Environmental Center. Sports: Bowling vs. Drexel, 1 p.m.

Sunday, Feb. 28

Sports: Bowling (men) vs. Capitol Campus, 1 p.m.

Monday, Mar. 1

Sports: Basketball (women) vs. District of Columbia, 7:30 p.m.

Tuesday, Mar. 2

Computer Programming Workshop.

"Introduction to Interactive FORTRAN," 9 a.m., 112 Walker. Registration: 229 Computer Bldg.

Computer Programming Workshop.

"Advanced FORTRAN Techniques," 9 a.m., 112 Buckhout. Registration: 229 Computer Bldg.

Microcomputer Users Group meeting, 7:30 p.m., 189 Materials Research Lab.

Sports: Basketball (men) vs. Cleveland State, 8:10 p.m.

Saturday, Mar. 6

Winter Term Commencement, 10:30 a.m., Rec Hall.

Monday, Mar. 8

Pattee Library, Distribution of faculty spaces for Spring Term, 7:15 a.m., C106 Pattee.

Tuesday, Mar. 9

Registration for Spring Term, 8 a.m.-5 p.m., IM Bldg. Also Mar. 10.

Preregistration for Summer Term, 112 Shields, through Mar. 31.

HUB Craft Center, registration for craft classes, noon-5 p.m., 312 HUB, through Mar. 10.

Wednesday, Mar. 10

Concert of early music by the Nova Consort, instrumental and vocal ensemble, noon, Kern Lobby.

Sigma Delta Epsilon — Graduate Women in

Science, brown bag luncheon and lecture, noon, 101A Kern. Gretchen Cornell and Gwen Frazier on "Committee on Women and Development."

Shaver's Creek Environmental Center, "From Tree to Table — Maple Sugaring," 1-5 p.m., Stone Valley Recreation Area.

Thursday, Mar. 11

Chairs begin.

Chemistry Colloquium, 12:45 p.m., 333 Whitmore. Robert Ables, Brandeis Univ., on "Bioorganic Reaction Mechanisms."

Physics Colloquium, 3:50 p.m., 117 Osmond. M. Kruskal, Princeton Univ., on "Theory of Solitons."

HUB Craft Center, Open House, 7:30-9:30 p.m., 312 HUB.

Friday, Mar. 12

Research Methodology for the Study of Women in Development Forum, noon, HUB Assembly Room. Dr. Elise Boulding.

Dartmouth College, on "The Invisibility of Women in Development: Breaking the Perceptual Barriers."

Saturday, Mar. 13

Maple Sugar Training Session for Volunteers, 10 a.m.-3 p.m., Shaver's Creek Environmental Center.

Artists Series, Paul Gaulin Mime Company, Mirage, 8:30 p.m., Schwab Auditorium.

Exhibits

Chambers Gallery: Saturday Morning Art

School Exhibition, Feb. 26 and 27.

Magic Moments, work by profoundly disturbed children, opens Mar. 12.

HUB Art Gallery: Hedrich-Blessing: Architectural Photography, The Gallery, through Feb. 28.

Kern Gallery: Jane Kinzler, weavings, through Feb. 26.

Museum of Art: Richard Hamwi, Works on Paper.

David Van Dommelen, 25 years of Fiber Art. Director's Choice, selected works from the Museum's collection.

Pattee Library: Rare Books Room: "The Black Experience," featuring the work of artists John Biggers, through Mar. 1.

Second Floor, East Pattee and Main Lobby: Terry Johnson, recent work, through Mar. 12.

East Corridor: John Mahoney, drawings, through Mar. 1.

Carol Andrull, drawings and paintings, through Mar. 1.

Lending Services Gallery: Becky Mast, drawings.

Visual Arts Bldg., Zoller Gallery, "Paper & Image," innovative works on paper.

Penn State Intercom

Pennsylvanians lobby against student aid cuts

A Penn State delegation of six people joined in a March 3 lobbying effort in Washington, D.C., against the Reagan Administration's plan to cut \$3 billion in student aid funds from the federal budget.

The Penn Staters joined some 250 representatives from nearly 80 Pennsylvania institutions in the effort, organized by the Pennsylvania Association of Colleges and Universities (PACU).

PACU President James A. Ream said the group made the trip to "bring home the point to the Pennsylvania Congressional delegation that higher education is an investment in the State's future."

He said he felt the group made its point, noting that "the opposition [to these cuts] seems to be building very fast." The opposition, he added, includes "a large bloc from the President's own party."

The Penn State representatives were Frederick M. Ciletti, special assistant to the President for government affairs and chairman of President Oswald's Task Force on Federal Cuts in Higher Education and Student Aid; David R. Schuckers, director of governmental relations; John F. Brugel, director, Office of Student Aid; Arthur V. Ciervo, director of Public Information and Relations; Bill Cluck, president of Undergraduate Student Government Association; and Paul D. Bell, student member of the Board of Trustees.

John A. Pino

Rockefeller director to talk March 18

"Hunger: Food Policies and Agricultural Development" will be the topic of Dr. John A. Pino, director of Agriculture Services for The Rockefeller Foundation, on Thursday, March 18, at 3:35 p.m. in Room 112 Kern Building.

The public is invited to the talk, which is the second annual Gamma Sigma Delta Lecture, sponsored jointly by the national honor society and the College of Agriculture.

Dr. Pino has held his present post since 1970. He earned his B.S. in agriculture and Ph.D. in zoology at Rutgers University, where he was a member of the

Renee and Robert Friedman

6000 ORUs — and how they grew

Editor's note: This article is one in an ongoing series in which faculty members describe work in progress.

By Renee C. Friedman and Robert S. Friedman

Among the noteworthy changes in the academic landscape over the past three decades has been the rapid proliferation of organized research units. Developed in response to increased demand for the application of university-based research to the social, economic and technical problems of the nation, more than 6,000 such units have sprung up.

The ORU model has been promoted for a variety of purposes: stimulation of new research directions and styles, facilitation and encouragement for the conduct of research, assistance to educational programs, enhancement of individual rewards, and the resolution of special institutional problems.

As might be expected, these campus parvenues have not met with universal

acclaim or acceptance. Four identity crises plague these structures, which exist outside the traditional organizational framework of universities. The first is that they are not central to the definition of a university. Secondly, they lack universally agreed upon intellectual cores, and, as a concomitant, their nomenclature is not consistent from one campus to another. And lastly, they are marginal enterprises because of some of the features they encompass.

Like all complex organizations, universities have diffuse and sometimes conflicting goals and missions. One goal, however, is paramount and universal among the leading research universities: prestige maximizing. Departments are viewed as the chief prestige maximizing agencies of the university; therefore, conflict between them and ORUs is inevitable. Prestige is not an abstraction but rather the cornerstone of economically

(Continued on page 8)

Appropriation request made to legislators

President Oswald, accompanied by a team of senior administrators, is presenting the University's 1982-83 appropriation request to the State legislature this week.

The University is requesting a total State appropriation of \$148,468,000, up 12.1 percent from the 1981-82 appropriation of \$132,428,000 and including increases of \$14,122,000 for General University operations and \$1,918,000 for the College of Medicine.

Governor Thornburgh has recommended a base appropriation to the University of \$140,281,000, an increase of 5.9 percent from the 1981-82 appropriation. The Governor also recommends that the University receive an additional \$3.2 million for operation of the Elizabethtown Hospital for Children and Youth beginning in 1982-83. (The Governor is proposing the transfer of control and management of the facility to the Milton S. Hershey Medical Center.)

The Appropriations Committee hearings in the Senate were scheduled for Tuesday, March 9; those in the House are scheduled for today (March 11).

Attending the hearings with President Oswald are Dr. Edward D. Eddy, provost; Dr. Richard E. Grubb, senior vice president for administration; Robert A. Patterson, senior vice president for finance and operations; and Dr. Harry Prystowsky, provost and dean of the Milton S. Hershey Medical Center.

23 awarded research grants

Twenty-three faculty members have been awarded one-year Research Initiation grants from a fund approved by President Oswald. The grants, ranging from \$3,946 to \$5,000, are made to encourage and support research and other creative work.

Faculty members from all campuses who had accumulated no more than two years of service before September 1982 were eligible for the 1982-83 RIG grants.

"These funds are awarded to support lines of research that may lead to external sponsorship," says Dr. Richard G. Cunningham, vice president for research and graduate studies and the administrator of the program.

Reviewing and screening 81 proposals was a committee which included Robert S. Brubaker, professor and head of speech communication; Lawrence M. Cathles III, associate professor of geosciences; Gregory L. Geoffroy, associate professor of chemistry; Gerald E. McClearn, associate dean, Human Development; Eva J. Pell, associate professor of plant pathology; Harry D. Zook, acting director, Intercollege Research Programs; and Edward H. Klevans (chairman), associate dean, Engineering.

Faculty members awarded grants and the proposal titles are:

Donald A. Bryant, assistant professor of microbiology, Regulation of phycocyanin biosynthesis in cyanobacteria; Stephen Couch, assistant professor of sociology, Schuykill

(Continued on page 3)

Editor's note: Walter J. Conti, president of the Board of Trustees, is sharing the following letter and committee listings as part of a continuing effort to keep the University community informed of Trustee actions.

TO: All Members of the Board of Trustees

As President of the Board of Trustees, and after consultation with the President of the University, Dr. John W. Oswald, I am pleased to announce the 1982 Board of Trustees' committee assignments and organization as shown on the attached lists.

You will note that committee membership follows a slightly different alignment. In addition to the President of the Board of Trustees and the President of the University, the Vice President of the Board of Trustees will serve as an ex officio member of all standing and special committees and of all subcommittees; and every Trustee will serve on one of the three standing committees. Further, in the interest of keeping committee membership reasonably small, I am discontinuing the practice of appointing the chairperson and vice chairperson of each standing committee to membership on all other standing committees. The standing committees thus will be smaller in size and, as mentioned above, each member of the Board will belong to and concentrate on the various issues of one standing committee. It is my expectation that the smaller committees will provide greater flexibility, and will enable each committee member to channel his or her interest and expertise to a distinctive area of the University.

I, of course, emphasize that all members of the Board of Trustees are encouraged to continue to attend all standing committee meetings and to actively participate in the discussions.

Walter J. Conti, President

(Committee listings appear on page 3.)

Penn Staters

President Oswald will deliver the principal address at Lehigh University's 114th Commencement on Sunday afternoon, June 6, at 3 p.m. in the Stabler Athletic and Convocation Center. Dr. Oswald will also receive an Honorary Degree.

Dr. David M. Bressoud, assistant professor of mathematics, and Dr. Don N. Page, assistant professor of physics, are among the 88 outstanding young scientists from 50 universities selected to receive Sloan Foundation Fellowships for basic research.

According to the Foundation, the fellows, whose average age is 31, were selected from among nearly 400 highly qualified nominees on the basis of their exceptional promise to contribute to the advancement of knowledge in the early stages of their careers.

Dr. Bressoud, a specialist in number theory, joined the Penn State faculty in 1977, the same year he earned his doctorate at Temple University. He earned his bachelor's degree at Swarthmore College in 1971 and then served for two years as a secondary school mathematics teacher with the Peace Corps in Antigua, West Indies. During the academic year 1979-80, he was awarded membership in the Institute for Advanced Study at Princeton.

A specialist in quantum gravity, Dr. Page joined the Penn State faculty in 1979. Currently, he is on leave Spring Term as a visiting faculty member at the University of Texas, Austin. Prior to coming to Penn State, he held a NATO Postdoctoral Fellowship in Science and a Darwin College Research Fellowship at Cambridge University, England. A graduate of William Jewell College, Dr. Page earned his doctoral degree at the California Institute of Technology in 1977.

Dr. B. Lakshminarayana, professor of aerospace engineering and director of Computational Fluid Dynamics Studies, has been awarded the D. Eng. degree in mechanical engineering from the University of Liverpool. The award was made for "distinguished contribution to engineering," based on publications written by Dr. Lakshminarayana since he earned his Ph.D. This degree, the highest awarded by Liverpool, has no U.S. equivalent.

Dr. Lakshminarayana and Dr. Barnes W. McCormick, professor and head of Aerospace Engineering, have been elected Fellows of the American Institute of Aeronautics and Astronautics.

John S. Nichols, assistant professor of journalism, was one of ten Central American specialists invited by the U.S. Department of State to brief the new U.S. ambassador to Nicaragua, Anthony C.E. Quintano, in Washington last month (February). Dr. Nichols recently contributed a chapter on the Nicaraguan mass media to *World Encyclopedia of the Press*.

Dr. Loren D. Tukey, professor of pomology, presented the L.P. Batjer Memorial Lecture at the 77th annual meeting of the Washington State Horticultural Association at Wenatchee in December. In his keynote address, Dr. Tukey spoke on "Concepts on Managing Productivity in Apple Orchards."

Promotions

Staff Exempt

Erna I. Hamilton to associate housekeeping supervisor in Housing and Food Services.

Stephen R. Harkaway to supervisor, I.V. Additive Center, at Hershey.

Marilyn J. Koch to research support assistant at Hershey.

Gerald Luckovich to coordinator, Instruction Support Center, in Education. Norman E. Williams to programmer in management services.

Staff Non-Exempt

Pamela J. Crawshaw to senior staff nurse at Hershey.

Clerical

Ruth A. Barner to secretary B in Science.

Terril L. Barner to secretary C in Registrar.

Kristy K. Bloom to clerk typist A in Science.

Edward C. DuMond to office services clerk in Registrar.

Judy A. Fetterolf to clerk, registration A in Registrar.

D. Ellen Keith to receptionist-typist in Business Services.

Bonnie J. McGovern to secretary B in Intercollegiate Research Programs.

Jane J. Meyer to accounting clerk in Intercollegiate Research Programs.

Kristi Rehr to secretary C in Arts and Architecture.

Tamela Kuas Thal to records clerk in Education.

Tonia C. Tibbens to purchasing clerk in Business Services.

Sandra J. Williams to secretary A in Science.

Technical Service

Steven R. Beseker to helper-food production in Housing and Food Services.

James Friday to coal and ash equipment operator in Physical Plant.

Luella Goshnath to storeroom clerk C at Hershey.

Lawrence Hoover to power plant worker in Physical Plant.

Debbie J. Korman to food preparer B in Housing and Food Services.

Jerry McCloskey to maintenance worker general C in Physical Plant.

Carol K. Motter to escort service aide at Hershey.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

John L. Petriskey to boiler operator in Physical Plant.

William E. Smith to athletic equipment and facilities worker in Health, Physical Education and Recreation.

Ronald K. Stover to residence hall preventive maintenance worker in Housing and Food Services.

Daniel W. Walters to helper-food production in Housing and Food Services.

Lorna E. Neff to baker-utility in Housing and Food Services.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., March 18, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (P-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

FOOD AND BEVERAGE SERVICE SUPERVISOR, NITTANY LION INN, UNIVERSITY PARK — Interview, hire and supervise food and beverage personnel. Conduct and supervise training of assigned personnel. Responsible for accounting, processing and maintenance of personnel records, financial receipts and records related to operation of dining and banquet areas. Responsible for maintaining established standards of quality service in the daily operation of dining and beverage areas. Associate Degree (or equivalent) in food service or related field, plus over two and up to and including three years of effective experience in supervision of personnel in a similar and appropriate food service operation.

ADMINISTRATIVE AIDE, COLLEGE OF SCIENCE, UNIVERSITY PARK — Responsible to the Head and Assistant Head of the Department. Duties include supervision of department secretaries, working with budgets, extensive interactions with faculty, staff and graduate students, maintenance of confidential personnel files, and a wide variety of other responsibilities. High school education and two years of business or secretarial school or equivalent, plus two to four years of related experience.

ASSISTANT TO THE MANAGER, UNIVERSITY ARTS SERVICES, UNIVERSITY PARK — Responsible for ordering, selling and accounting for tickets. Prepare sales reports, cash receipts reports and deposit receipts. May be asked to interact with patrons and be knowledgeable regarding events presented in University auditoriums. Evening and weekend work necessary. Bachelor's degree (or equivalent), preferably in accounting or art administration, plus three to twelve months of effective experience in theatre and box office work; or Associate Degree (or equivalent), plus one to two years of effective experience. Computer experience desirable.

GRAPHICS PROGRAMMER, INTERCOLLEGE RESEARCH PROGRAMS, UNIVERSITY PARK — Support and develop the Computer Center's graphics services. Develop computer programs and documentation, provide consultation, training and seminars to users of computer graphics. Bachelor's degree or equivalent in computer science, plus two to three years of effective experience in interactive graphics.

AREA REPRESENTATIVE, COMMONWEALTH EDUCATIONAL SYSTEM, BERKLEIGH COLLEGE — Responsible for the functions of development, organization, operation and administration of Continuing Education programs and services within an assigned geographic district. Bachelor's degree or equivalent, plus two to three years of direct related experience or a master's degree or equivalent, plus one to two years of directly related experience. THIS IS A FIXED TERM 1 POSITION.

SECURITY OFFICER, DELAWARE COUNTY CAMPUS — Responsible to the Business Manager for the hiring, training, scheduling and supervision of security personnel and devices and implementing campus safety and security programs. Bachelor's degree, or its equivalent, in criminal justice, law enforcement, criminology or a closely related field, plus minimum of one year of effective law enforcement and safety experience.

ADMINISTRATIVE AIDE, COLLEGE OF EARTH AND MINERAL SCIENCES, UNIVERSITY PARK — MAINTENANCE SCHOOL — Maintain financial accounts, prepare teaching materials for faculty, maintain records, prepare reports, conduct placement surveys, counsel students and oversee physical plant operations. Requires two-year business degree or equivalent, with one to two years of effective experience, or high school education with two to four years of effective experience. POSITION FUNDED TO JUNE 30, 1982, WITH POSSIBLE REFUNDING.

SENIOR BENEFITS SPECIALIST, OFFICE OF PERSONNEL ADMINISTRATION, UNIVERSITY PARK — Duties include meeting with University employees, retirees and beneficiaries concerning the University's insurance and retirement programs. Prepare retirement estimates. Assist with planning and conducting pre-retirement counseling programs. Contact employee beneficiaries to arrange for settlement of life insurance proceeds. Verify the eligibility of employees registered for courses under the educational privileges policy. Bachelor's degree or equivalent in business administration, plus two to three years of directly related experience in areas of life insurance, health care benefits and retirement counseling.

SUPERVISOR, ENGINEERING MACHINE SHOP, COLLEGE OF ENGINEERING, UNIVERSITY PARK — Responsible to Coordinator, Engineering Facilities,

for the operation of the Engineering Machine Shop. Duties and responsibilities include developing cost estimates for proposed projects, reducing concepts to final designs, supervising and assigning work, maintaining inventory control of materials, tools and shop equipment. Direct the keeping of time records for Engineering Shop Services, and charging the budgets for projects and/or materials. Serve as Physical Plant contact for services in Hammond and Sackett Buildings. Serve as back-up for Physical Plant Coordinator and as Alternate Safety Officer. Associate degree in engineering or equivalent. Broad knowledge of machine shop practice, sheet metal fabrication, woodworking, and electrical and general shop maintenance required, plus three to four years of effective experience.

SENIOR SYSTEMS ANALYST, MANAGEMENT ENGINEERING, UNIVERSITY PARK — Responsible to a senior staff member for the design and implementation of innovative systems. Interact with customers in defining problem areas and formulating logical statements and devising solutions. Conduct studies of major systems problems, developing decisions using systems analysis techniques. Act as project leader for directing analyses, programming, implementation of data processing systems. Bachelor's degree or equivalent in industrial engineering or basic computer systems and systems planning, plus over four years and including seven years of effective experience in systems development and operations. Ability to communicate orally and in writing is required.

Seminars

Thursday, March 11
Ceramic Science, 11 a.m., 301 Steidle. Shelly Wiederhorn, National Bureau of Standards, on "Mechanical Reliability of Structural Ceramics."

Chemistry, 12:45 p.m., 333 Whitmore. Robert Abete, Brandeis Univ., on "Bioorganic Reaction Mechanisms."
Physics, 3:30 p.m., 117 Osmond. M. Kruskal, Princeton Univ., on "Theory of Solitons."

Monday, March 15
Physical Education, 3:30 p.m., 101 Kern. Robert Christina, physical education, on "A Twenty-Two Year Old Theory of Neuromotor Reaction Revisited."
Philosophy, 4 p.m., 75 Willard. Ernst Wollgast Orth, Univ. of Trier, Germany, on "Husserl's Concept of Reduction and Scientific Truth."

Wednesday, March 17
Physiology, 4 p.m., 121 Nell. Seymour Alper, Univ. of New Mexico, on "A Small Fish's Law Colorimeter for the Determination of Heat Loss in Animals."

Thursday, March 18
Chemistry, 12:45 p.m., 333 Whitmore. C.G. Etkin, Michigan State Univ., on "Triple Quadrupole Mass Spectrometry."
Physics, 3:30 p.m., 117 Osmond. T. Kinoshita, Cornell Univ., on "High Precision Tests of QED and Related Topics."
Computational Fluid Dynamics, 4 p.m., 232 Hammond. I.E. Carter, United Technologies Research Center, on "Analysis of Separately Boundary Layer Flows."
Philosophy, 4 p.m., 101 Kern. Merold Westphal, Hope College, Michigan, on "Hegel's Radical Idealism: Family and State as Ethical Community."

Tuesday, March 23
Computer Education, VM/CMS, 7:30 p.m., 108 Forum, also March 25, 30, April 1; Interactive Graphics, 7:30 p.m., 110 Computer Bldg., also March 25, 30, April 1, 6, 8, 13, 15.

Thursday, March 25
Chemistry, 12:45 p.m., 333 Whitmore. Peter C. Vohlhard, Univ. of California, Berkeley, on "Transition Metal Catalyzed Carbon-Carbon Bond Formation."
Economics, 3 p.m., 101 Kern. Bennett T. McCallum, Carnegie-Mellon Univ., on "Recent Developments in Macro and Micro Economics."

Carpoolers

John McClelland is looking for a ride or would like to share the driving from the Houtzdale-Philipsburg area to the University. He works from 8 a.m. to 5 p.m. in Electrical Engineering East. He can be reached at either 865-7667 or 876-7800.

Beth Mussner needs a ride from Bellefonte (Continental Courts) to the University. She can be reached at 865-1102 or 355-7302 and works from 8 a.m. to 5 p.m. in White Bldg.

Joanne Preaster is looking for riders and/or drivers for a carpool from Lewistown to the University. Her working hours are from 8 a.m. to 5 p.m. and she can be reached at 865-2536 or (717) 543-SS17.

Obituaries

Blair D. McGinnis, a poultry worker in the College of Agriculture, died Feb. 24. He was 45 and had been employed by the University since 1972.

Edgar Udine, an assistant in entomology Extension in the College of Agriculture, died Feb. 17 at the age of 80. He joined the staff in 1944, retiring in 1967.

Ammonia likely Creamery blast cause

University safety officials have established a probable cause for an explosion on Monday, March 1, at the University Creamery.

"It appears that the explosion was caused by the rapid expansion of ammonia vapors after liquid ammonia became trapped in the refrigerant compartment of an ice cream processing tank," says Howard O. Triebold Jr., manager of safety.

The 600-gallon tank had been used that morning for the processing of ice cream, and Creamery employees were cleaning it when the explosion took place.

Two Creamery employees were injured in the explosion. Harry D. Russler, helper-general, was admitted to Centre Community Hospital with first-degree burns to his face and arms and ammonia inhalation. At press time, he remained hospitalized in good condition. Howard Moore, delivery driver, received treatment at the same hospital for ammonia inhalation.

Liquid ammonia is used as a refrigerant in the lining of tanks in which ice cream is processed. That morning, employees had been draining ammonia from the system feeding this tank and others so that maintenance could be done to the ammonia lines.

University safety officers think some ammonia may have become trapped in the lining of this particular tank. When Creamery employees started to clean the tank with hot water, the ammonia vapors expanded rapidly, causing the rupture of the vessel.

WPSX seeks funds in 16-day drive

WPSX-TV, Channel 3, the University's public television station, is seeking financial support from viewers during a 16-day on-air fundraising effort which began March 6. The drive is one of two the station conducts each year, coinciding with similar efforts by public television stations around the country.

WPSX-TV's financial goal for the event, "Festival 82," is \$100,000. The station will use the funds to cover the costs for both program acquisition and production.

According to WPSX-TV program director Susan H. Steinmeyer, some program acquisition costs have gone up by at least 25 percent. "American Playhouse," for example, cost the local station \$28,885 last year but will be \$39,372 for the 1982-83 season. In addition to rising costs, the station faces a loss in revenue of between \$114,000 and \$173,000 due to federal budget cuts in appropriations for public television.

Personnel from the University Libraries, Penn State's Open Learning program, and the Shaver's Creek Environmental Center will be among the volunteers taking telephone pledges during "Festival 82." Contributions can be pledged any evening by calling 863-2800 or by mailing a check (made payable to WPSX-PSU) to "Festival 82," Wagner Annex, University Park.

Kozak awards established

Penn State's Alpha Tau Chapter of Phi Delta Kappa, professional educational fraternity, has established the Andrew V. Kozak Awards, honoring Dr. Kozak, who was an associate professor of education at the University from 1958 until his retirement in 1976.

One to three awards, ranging from \$1,500 to \$4,500 annually, will be made to Penn State graduate students in any aspect of education. Nominations, which should be from Phi Delta Kappa members, close March 30. Further information is available from Dr. Gordon C. Godbey, Room 301 Ricketts, to whom nominations should be sent.

Organization of the Board of Trustees

President: Walter J. Conti
Vice President: Edward R. Book
Secretary: John W. Oswald
Treasurer: Robert A. Patterson
Associate Secretary: Patricia L. Rosdil
Assistant Secretary: Mary Lou McCorkle
Assistant Secretary: Grace T. Younginger
Assistant Treasurer: Richard H. Baker

Quentin E. Wood

The President of the Board is chairperson of the Executive Committee, and the President of the University is the recording secretary of the Executive Committee.

Trustee Liaison with Athletic Department - Quentin E. Wood

Trustee Representative at Meetings of the Alumni Association Executive Board - Howard O. Beaver, Jr.

23 new faculty receive research initiation grants

(Continued from page 1)

Campus, and J. Stephen Kroll-Smith, instructor of sociology, Hazleton Campus, Community and disaster in Centralia, Pennsylvania; Stephanie Doores, assistant professor of food science, Risk/benefit assessment of a novel foodborne organism;

Robert B. Duckworth, assistant professor of medicine, Hershey, The development and pathophysiology of brainstem auditory evoked responses in newborn dog pups; Roger P. Gaumond, assistant professor of bioengineering, Neurophysiological response measures based on Markov chain neural models; Bernard Gordon III, assistant professor of polymer science, Heat stable thermoplastic elastomers and polymers;

John T. Harwood, associate professor of English, The rhetorical world of Restoration science; Christopher K. Hertzog, assistant professor of human development, Components of adult intellectual change; Paul R. Howell,

associate professor of metallurgy, Reaustenization and the partitioning of manganese between austenite and ferrite during intercritical annealing of dual phase steels;

Stephen R. Karl, assistant professor of surgery and pediatrics, Hershey, Ventilation by high-frequency oscillation in newborn children and lambs; Ronald S. Kensinger, assistant professor of animal nutrition-physiology, Bovine placental lactogen: purification and an investigation of its physiological function in the dairy cow; Anil K. Kulkarni, assistant professor of mechanical engineering, A theory for defluiddized regions around a horizontal tube immersed in a fluidized bed; Robert T. McGrath, assistant professor of nuclear engineering, Redeposition of the sputtered surface in tokamak limiters; James E. O'Brien, assistant professor of mechanical engineering, Photometrically measured local heat transfer in a corrugated duct; Kurt H. Parkum, assistant professor of health care and organizational behavior, Capitol, Hospital support mechanisms for

patient satisfaction;

David L. Questad, assistant professor of engineering science and mechanics, Viscoelasticity in highly deformed polymers; Sudhir K. Sastry, assistant professor of agricultural engineering, Heat transfer during the freezing of foods: an approximate solution approach; Alan W. Scaroni, assistant professor of fuel science, Improving the coking behavior of marginal coking coals; John B. Stea, associate professor of physical education, How to improve the flexibility of memory for motor skills in the elderly;

Gordon L. Shulman, assistant professor of psychology, Ability to attend to different aspects of a complex display is mediated by attending to frequency channels; John E. Smith, associate professor of human nutrition, The regulation of serum vitamin A transport by genetic factors; Robert F. Wideman, assistant professor of poultry science, Radioimmunoassay of avian parathyroid hormone.

Funding Sources

For further information, call 865-1372

(377-1) The National Science Foundation supports a Small College Faculty Research Opportunity Awards program whereby a faculty member with limited research opportunities may arrange to work with an investigator at another institution (or another campus location - same institution) where that investigator holds or is applying for an NSF research grant. The grantees may request supplemental funding to cover the additional costs. Supplemental funds require a brief proposal, describing the research, its budget and a biographical sketch. Each NSF research directorate handles the supplemental funds requests for its programs. Additional information is available. (Ref. NSF Grants for Scientific and Engineering Research, NSF 81-79) (File 1697-6)

Behrend sets up economic research institute

Behrend College will establish a research center which will focus on topics related to the economic development of northwestern Pennsylvania, Behrend Dean John M. Lilley has announced.

The center, to be known as the Economic Research Institute for Erie (ERIE), will undertake activities that are of value to the community and region, consistent with the academic mission of the College, and within the areas of expertise encompassed by Penn State-Behrend faculty members.

Two major research missions are envisioned for ERIE. The first is the collection, analysis, interpretation and dissemination of data and information on the regional economy. When and where appropriate, sponsored research projects aimed at evaluating particular projects related to the region's economy will be undertaken.

ERIE's second major mission is the development of economic models which will provide the Erie region's business and industrial communities with timely and useful information. These models will enable the Institute to forecast regional economic activity and to assess the impact of a variety of actions, such as layoffs, expansions, tax rate changes, energy costs, etc.

Dr. Barry R. Weller, an associate professor of economics at Behrend, will serve as director of the Institute. Dr. Weller's specialty is in the area of economic forecasting.

An Advisory Committee will be formed, including the director, dean, associate dean, and the head of the division of social and behavioral sciences from Behrend, and approximately 10 representative community leaders.

University Park Calendar

Spring Term 1982

Thursday, March 11

Classes begin.
Continuing Education registration, 10 a.m.-4 p.m., 101 Kern.
GSA Workshop, "Resume Writing," 7 p.m., 102 Kern.
Kern Classics, *One Flew Over the Cuckoo's Nest*, 7 and 9 p.m., 112 Kern.
HUB Craft Center, Open House, 7:30-9:30 p.m., 312 HUB.
Penn State Dames meeting, 7:30 p.m., 101 Kern.
Piano recital by Harry Hannigan, Bucknell Univ., 8:30 p.m., Music Bldg. Recital Hall.

Friday, March 12

Cooperative Art Assoc., print sale, 10 a.m.-4 p.m., Kern Lobby. Also March 13.
University Committee Concerned with Women in International Development forum. Dr. Elise Boulding, author and holder of the chair in sociology, Dartmouth College, on "The Invisibility of Women in Development: Breaking the Perceptual Barriers," noon, HUB Assembly Room. Dr. Constantia Safilios-Rothschild, human development, on "Hard Questions and Hard Data about Women in Development," 9 a.m.-203 Keller.
Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Eugene Borza, history, on "Modern Perceptions of Ancient Greece."
Commonplace Theatre, *One Flew Over the Cuckoo's Nest*, 7 and 9 p.m., 112 Kern. Also March 14.
GSA Coffeehouse, 8 p.m., 102 Kern.

Saturday, March 13

Shaver's Creek Environmental Center, Maple Sugar Training Session for Volunteers, 10 a.m.-3 p.m.
France Cinema, Fassbinder, *The Marriage of Maria Braun*, 7 and 9 p.m., 112 Kern. Also March 15.
Artists Series, Paul Gauguin Mime Company, *Mirage*, 8:30 p.m., Eisenhower Auditorium.
Sports: gymnastics (men) vs. Chicago-Illinois; fencing (women), Eastern All-American Championships, also March 14.

Week of March 15

Monday, March 15

Fixed date for meetings involving Commonwealth Campus faculty. Also March 16 and 17.
HUB Craft Center, Spring Term first session classes begin, 112 HUB.
English Colloquium, 8 p.m., 101 Kern. Teveter Todorov on "Self and Other: An Historical Perspective."
IAHS lecture, 8 p.m., Rare Books Room, Pattee. N.G.L. Hammond, prof. emeritus of Greek, Bristol Univ., on "The Great Macedonians."
Recital, Randolph Kelly, principal violinist, Pittsburgh Symphony, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, March 16

Lutheran Council for Campus Ministry, "Bach's Lunch," featuring Kay Putman, noon, Eisenhower Chapel.
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.
Roland Fleischer, art history, on "Emblematic References in Colonial Painting."
Open rehearsal, Pittsburgh Symphony Chamber Orchestra and student soloists, 3:50-3 p.m., Eisenhower Auditorium.
GSA Council meeting, 7:15 p.m., 101 Kern.
Rehearsal, Pittsburgh Symphony Opera Orchestra and Penn State Symphony, 7:30-10 p.m., Eisenhower Auditorium.
Penn State Chapter of the America Society for Metals meeting, 7:30 p.m., 301 Steidle. Dr. G.J.W. Kor, U.S. Steel Research Laboratory, on "Electromagnetic Stirring of Freezing Low Carbon Steels."
IAHS lecture, 8 p.m., 124 Sparks. Dr. Ulrich Weinzierl on "Österreichische Literatur im Exil (Austrian Literature in Exile)."

Wednesday, March 17

Rehearsal, Pittsburgh Symphony Chamber Orchestra and student soloists, 10 a.m.-noon, Eisenhower Auditorium.
Faculty Women's Club, lecture and brown bag lunch, 11:45 a.m., Faculty Club. Joseph McCurdy, agricultural engineering extension, on "Ways to Save Energy in the Home."
Master class, bassoon, Leonard Scharrow, 1 p.m., place to be announced.
Master class, oboe, Eldon Gatwood, 3 p.m., place to be announced.
History of Photography lecture, 4 p.m., 230 Arts Bldg. Larry Schaaf, Johns Hopkins Univ., on "Paul Martin, Victorian Pioneer, and His Influence on Amateur Photography and Wood Engraving."
Rehearsal, Pittsburgh Symphony Orchestra, 7:30-10 p.m., Eisenhower Auditorium.
GSA Irish Social, 8 p.m., 102 Kern.

Thursday, March 18

Summer Employment Day, 9 a.m.-4:30 p.m., HUB Ballroom.
Rehearsal, Pittsburgh Symphony Orchestra Chamber Orchestra and student soloists, 10 a.m.-noon, Eisenhower Auditorium.
Commons Videotape Series, *Sneak Previews*, noon, Kern Lobby. Also March 25, April 1, 8, 15, 22, 29, May 6.
STS/Three Cultures Dialogue, 12:20 p.m., 101 Kern. Theodore R. Vallance, human development, on "Program Implications of Long and Short Range Policies in Mental Health Services."
Concert, Pittsburgh Symphony players, 12:30 p.m., Music Bldg. Recital Hall.
IAHS/History Dept. lecture, 1:30 p.m., 112 Kern. John Lukacs on "The Historical Problem of Hitler."
Gauguin Sigma Delta lecture, 3:55 p.m., 117 Osmond. T. Kinoshita, Cornell Univ., on "High Precision Tests of QED and Related Topics."
Kern Classics, *Harry and Tonto*, 7 and 9 p.m., 112 Kern.
New German Cinema, Wenders, *The American Friend*, 7 and 9 p.m., HUB Assembly Room. Also March 19.
Museum of Art film, *The Light of Experience*, 7 p.m., First Floor Gallery.

Friday, March 19

Board of Trustees meeting, The Milton S. Hensley Medical Center. Also March 20.
Commons Noontime Concert, "State College Suzuki Program," Kern Lobby.
Master class, brass quintet, Pittsburgh Symphony players, 2 p.m., Music Bldg. Recital Hall.
Master class, percussion, Pittsburgh Symphony players, 3 p.m., 1 Music Bldg.
Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Rafiqul Huda Chaunbury, Bangladesh Institute of Development Studies, Dacca, on "Population Pressure, Land Tenure Patterns, and Population Growth in Rural Bangladesh."
Master class, organ, Leonard Raver, 4 p.m., Music Bldg. Recital Hall.
IAHS workshop, Leonard Raver, organist, 4:50-3 p.m., Music Bldg. Recital Hall.
Commonplace Theatre, *Time Bandits*, 7 and 9 p.m., 112 Kern. Also March 21.
GSA Coffeehouse, 8 p.m., 102 Kern.
Artists Series, Pittsburgh Symphony Orchestra, Michael Tilson-Thomas conducting with Oscar Shumsky, violin soloist, 8:30 p.m., Eisenhower Auditorium. Also March 20.

Saturday, March 20

Artists Series, Pittsburgh Symphony Orchestra
Gallery Talk, 10:30 a.m., Eisenhower Auditorium.
Master class, flute, Pittsburgh Symphony principal flutist Bernard Goldberg, 1:30 p.m., Music Bldg. Recital Hall.
France Cinema, Herzog, *Nosferatu*, 7 and 9 p.m., 112 Kern.

Sunday, March 21

Sports: volleyball (men) vs. George Mason, 2 p.m.

Week of March 22

Monday, March 22

Late registration deadline.
Add deadline.
IAHS lecture, 7:30 p.m., 101 Kern. J. Thomas Rimer, Washington Univ., St. Louis, on "Europe as Art Object: Three Japanese Painters in Paris."
Anne Waller, guitar, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, March 23

Recital Hall, 10:30 a.m., Museum of Art, Nicholas I. Gianopoulos, architectural engineer and chairman, Keast and Hood Co., Phila., on "Architectural Presentation: Case Studies."
Lutheran Council for Campus Ministry, "Bach's Lunch," featuring Allen Fogelsanger, noon, Eisenhower Chapel.
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB. J. Thomas Rimer, Dept. of Chinese and Japanese, Washington Univ., on "Bao's Frog: Haiku in London, Paris, and New York."
IAHS lecture and recital, 1 p.m., Music Bldg. Recital Hall. Antoine Ture, French composer, with violin/piano duo, Adele Auriol and Bernard Fauchet.
GSA election meeting, 7:15 p.m., 101 Kern.

Wednesday, March 24

Deadline for May graduates to pay theses fees at Bursar's Office and to activate diploma cards in Records Office.
Commons Noontime Chess Challenge.
"Challenge the Masters," Kern Lobby.
English Colloquium, 8 p.m., 101 Kern. Gerald Graff on "The Politics of Literary Theory."
IAHS concert by Penn State faculty, 8:30 p.m., Music Bldg. Recital Hall. World premiere of Tisne's work performed by Steven Smith.

Thursday, March 25

Kern Classics, *Lords of Flatbush*, 7 and 9 p.m., 112 Kern.

New German Cinema, Herzog, *Heart of Glass*, 7 and 9 p.m., HUB Assembly Room.
Opera workshop performance, 8 p.m., Pavilion Theatre.

Friday, March 26

History of Photography lecture, 3:30 p.m., 101 Kern. Robert Sobieszek, George Eastman House, Rochester, on "Photographic Portraiture: Faces and the Human Soul."
Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Thomas Hubka, prof. of architecture, University of Oregon, on "Maine Farmers: The Connected Farm Architecture of Northern New England."
Vergil Celebration, 4 p.m., 112 Kern. Lecture by Allen Mandelbaum, CUNY Graduate Center.
Commonplace Theatre, *For Your Eyes Only*, 7 and 9 p.m., 112 Kern. Also March 28.
E.W. Mueller Memorial lecture, 8 p.m., 117 Osmond. Sir N.F. Mott, Nobel laureate in physics, Cambridge Univ., on "Conduction in Non-Crystalline Materials: Solved and Unsolved Problems."
GSA Coffeehouse, 8 p.m., 102 Kern.
Sports: softball, Lady Lion Invitational. Also March 27.

Saturday, March 27

Vergil Celebration, 4 p.m., 101 Kern. Elizabeth Block, Dept. of Classics, Univ. of Pa., Mellon Fellow, Harvard Univ., on "Vergil's Audiences."
France Cinema, Bergman, *Life of the Marionettes*, 7 and 9:15 p.m., 112 Kern.
Sports: lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Ohio State, 2 p.m.

Week of March 29

Monday, March 29

Pass/Fail
Keith Ward, pianist, 8:30 p.m., Music Bldg. Recital Hall.

Tuesday, March 30

Pass/Fail
Lutheran Council for Campus Ministry, "Bach's Lunch," featuring Anita Bealer, noon, Eisenhower Auditorium.
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.
Emily Groszholz, philosophy, on "Angels Language and the Imagination: Rilke and Baudelaire."
STS/Three Cultures Dialogue, 12:20 p.m., 101 Kern. Paul O. Woolley, Jr., health planning and administration, on "Utilitarian vs. Social Egalitarian Health Care Policies."
Artists Series, *The Sound of Music*, 8 p.m., Schwab Auditorium.

Wednesday, March 31

Drop deadline.
Preregistration deadline for Summer 1982.
Course Repeat deadline.
Commons concert, noon, Kern Lobby.
GSA Tax Workshop, 7 p.m., 101 Kern.
Artists Series, Emyln Williams as Charles Dickens, 8:30 p.m., Schwab Auditorium.
Sports: baseball vs. Bloomsburg (DH), 1:30 p.m.; volleyball (men) vs. Pittsburgh, 7 p.m.

Thursday, April 1

Commons Erikson Gallery Print Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 1.
Kern Classics, *Hot Rock*, 7 and 9 p.m., 112 Kern.
New German Cinema, Hauff, *Knife in the Head*, 7 and 9 p.m., HUB Assembly Room. Also April 2.
Museum of Art film, *The Fallacies of Hope*, 7 p.m., First Floor Gallery.
Sports: lacrosse (women) vs. Towson State, 3:30 p.m.

Friday, April 2
Shaver's Creek Environmental Center, Baltimore/National Aquarium Eco-Tour, departure 7 a.m., Rec Hall. Registration: 238-5872. Bog Sucker Snooping, 6 p.m. Outdoor School parking lot. Also April 13.

Geography Dept. Coffee Hour, 3:40 p.m., 119 Walker. Peter Haggert, prof. of geography, Univ. of Bristol, on "Geography Looks at Epidemics."

Commonsplace Theatre, *The French Lieutenant's Woman*, 7 and 9:15 p.m., 112 Kern. Also April 3.

GSA Coffeehouse, 8 p.m., 102 Kern.

Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium. Also April 4.

Sports: tennis (women) vs. Brown, 2 p.m.

Saturday, April 3
Deadline for May graduates to deliver doctoral theses to committees.

France-Cinema, *Kurys, Peppermint Soda*, 7 and 9 p.m., 112 Kern. Also April 5.

Sports: baseball vs. Rutgers (DH), 1 p.m.; lacrosse (men) vs. Ohio State, 2 p.m.; volleyball (men) vs. Rutgers-Newark, 7 p.m.

Sunday, April 4
Sports: baseball vs. Mansfield (DH), 1 p.m.

Week of April 5

Monday, April 5
HUB Craft Center, registration for second session classes, noon, 9 p.m., 312 HUB.

London Bus tours begin, 1:30 p.m., HUB Main Entrance, 2:30 p.m., Shields Bldg.

Sports: lacrosse (women) vs. Ohio Univ., 3 p.m.

Tuesday, April 6
Commons Easter Plant Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 7.

Lutheran Council for Campus Ministry, "Bach's Lunch," featuring Eric Retter, noon, Eisenhower Chapel.

Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.

Giles Constable, Dumbarton Oaks, on "Religious Continuity of the High and Late Middle Ages," 2:10 p.m., 112 Kern.

Sports: softball vs. West Chester, 2:30 p.m.

IAHS lecture, 3:30 p.m., Rare Books Room.

Pattie, Giles Constable, Dumbarton Oaks, on "Transitions in Religious Life and Institutions in the Twelfth Century," Graduate School lecture, 7:30 p.m., 112 Kern.

Kingley Davis on "Demographic Foundations of the New Sex Roles,"

Wednesday, April 7
Sports: lacrosse (men) vs. Towson State, 3 p.m.

Artists Series, Cecile Licad, pianist, 8:30 p.m., Schwab.

Thursday, April 8
Sports: baseball vs. Lock Haven (DH), 1:30 p.m.

New German Cinema, *I Love You, I Kill You*, 7 and 9 p.m., HUB Assembly Room. Also April 9.

Penn State Dames meeting, 7:30 p.m., 101 Kern.

Friday, April 9
Geography Dept. Coffee Hour, 3:40 p.m., 119 Walker Bldg. Marc Treib, prof. of architecture, Univ. of California-Berkeley, on "Mapping Experience."

GSA Coffeehouse, 8 p.m., 112 Kern.

Saturday, April 10
Deadline for final oral doctoral examinations for May graduates.

Deadline for May graduate to deliver master's thesis on paper to advising.

Sports: tennis (men) vs. East Stroudsburg, Mercyhurst, and Rochester. Also April 11.

Sunday, April 11
Sports: baseball vs. Howard (DH), 1 p.m.

Week of April 12

Monday, April 12
Fixed date for meetings involving Commonwealth Campus faculty. Also April 13.

Deadline for May graduate to submit camera-ready thesis manuscript to Thesis Office.

History of Photography lecture, 3:30 p.m., 101 Kern. Felicity Ashbee, London, England, on "Photography in 19th Century Russia: William Carrick and His World."

IAHS film on Polish Jewry, *Image Before My Eyes*, 7:30 p.m., 101 Chambers.

College of Science, Priestley Lecture Series, 8 p.m., S-5 Omond. Daniel E. Koshland, Jr., Univ. of California-Berkeley, on "The Chemistry of Sensing and Regulation." Also April 13, 14 and 15.

Tuesday, April 13
Comp. Lit. Luncheon, 12:15 p.m., 101 Kern.

Tim Bahi, Comparative Literature Program, Cornell Univ., on "European Romanticism."

Sports: volleyball (men) vs. East Stroudsburg, 7 p.m.

GSA Council meeting, 7:15 p.m., 101 Kern.

HUB Craft Center, Open House and registration for second session classes, 7:30-9:30 p.m., 312 HUB.

Artists Series, *Tales of Hoffman*, 8 p.m., Eisenhower Auditorium.

Wednesday, April 14
Commons Concert, noon, Kern Lobby.

Sports: softball vs. Clarion, 2:30 p.m.

Un-Common Theatre, Student Preview, *Play It Again Sam*, 8 p.m., 112 Kern.

English Colloquium, 8 p.m., 101 Kern.

Timothy Bahti on "Auerbach Today,"

Thursday, April 15
New German Cinema, Fassbinder, *Satan's Brew*, 7 and 9 p.m., HUB Assembly Room. Also April 16.

Museum of Art Film, *The Hero as Artist*, 7 p.m., First Floor Gallery.

Un-Common Theatre, *Play It Again Sam*, 8 p.m., 112 Kern. Also April 16 and 18.

Friday, April 16
STS Three Cultures Dialogue, 12:20 p.m., 101 Kern. Frederick R. Eisole, social planning, on "The Issue of Aging: Integrating Short and Long Range Planning."

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Wilbur Zelensky, geography, on "Oh, Say Can You See? — The Impact of Nationalism on the American Landscape."

Artists Series, The Chinese Magic Circus of Taiwan, 8:30 p.m., Eisenhower Auditorium.

IAHS concert, Otto Luenning, American composer, 8:30 p.m., Music Bldg. Recital Hall.

Saturday, April 17
Shaver's Creek Environmental Center, Volunteer Training for Spring Ventures, 1-4 p.m.

Sports: baseball vs. St. John's (DH), 1 p.m.; track and field (men), Memorial Invitations — Fairleigh Dickinson, George Mason and Slippery Rock, 1 p.m.; lacrosse (men) vs. Rutgers, 7:15 p.m.; lacrosse (women) vs. Rutgers, 1 p.m.; tennis (men) vs. Bloomsburg, Colgate and West Virginia. Also April 18.

Un-Common Dinner Theatre, *Play It Again Sam*, dinner, 6:30 p.m.; performance, 8 p.m., 102 Kern.

Sunday, April 18
HUB Craft Center, second session classes begin.

Shaver's Creek Environmental Center, Bird Breakfast, 7 a.m.; Wildflower Walk, 2 p.m.

Week of April 19

Monday, April 19
Commons Secretaries' Week Plant Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 20.

IAHS/Spanish Communication lecture, 4 p.m., 112 Kern. Lloyd Bizer, Univ. of Wisconsin-Madison, on "Miraculous Rhetoric: Hume and the 18th Century Dispute Concerning Miracles."

France-Cinema, Clement, *Forbidden Games*, 7 and 9 p.m., 112 Kern.

History of Photography lecture, 8 p.m., 101 Kern. John Taylor, Stourbridge College, England, on "Turn of the Century Style Movements: Linked Ring Brotherhood."

Tuesday, April 20
Gallery Talk, 10:30 a.m., Museum of Art. John Putz, Museum of Modern Art, on "Cubism in American Photography — 1910-1930."

Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.

Athol R. Jennings, Headmaster, Waterford-Kamhlaha United World College, Swaziland, on "Alan Paton's *Ah, But Your Land is Beautiful*."

Dance workshop, student choreography presented, 5:45 p.m., White Bldg. Dance Theatre.

History of Photography lecture, 8 p.m., 101 Kern. John Taylor, Stourbridge College, England, on "Photography and Propaganda during the First World War."

Artists Series, *All That Jazz*, 8 p.m., Schwab.

Wednesday, April 21
Commons Concert, noon, Kern Lobby.

Graduate Council meeting, 3 p.m., 101 Kern.

Kern Classics, *Mao to Mozart*, 7 and 9 p.m., 112 Kern. Also April 22.

English Colloquium, 8 p.m., 101 Kern.

Goffrey Bocca on "The Serious Business of Humorous Writing."

Thursday, April 22
Sports: softball vs. West Virginia, 2:30 p.m.; tennis (men) vs. Maryland, 2:45 p.m.

New German Cinema, Schlöndorff, *Young Torres*, 7 and 9 p.m., HUB Assembly Room. Also April 23.

IAHS lecture, Dora de Pedery-Hunt, Canadian medalist, on her work, 8 p.m., Zoller Gallery.

Friday, April 23
Fourth Annual Slavic Folk Festival, 9 a.m.-10 p.m., Robeson Cultural Center. Also April 24, 9 a.m.-5 p.m.

Commonsplace Theatre, *Arthur*, 7 and 9 p.m., 112 Kern. Also April 25.

Faculty Women's Club Newcomer Program, Wine Tasting Party for Couples, 7:30 p.m., Living Center. Human Development. Guest speaker: Robert Beelman, food science. GSA Coffeehouse, 8 p.m., 102 Kern.

Saturday, April 24
Sports: tennis (women) vs. Princeton, 9:30 a.m.; lacrosse (women) vs. West Chester, 2 p.m.; golf (men), Nittany Lion Invitational, also April 25.

Artists Series, The Prince Street Players in *The Wizard of Oz*, 10:30 a.m. and 2:30 p.m., Schwab.

EMEX '82 — The Earth and Man Exposition, biennial open house, 1-5 p.m., College of Earth and Mineral Sciences.

France-Cinema, *Roeg, Walkabout*, 7 p.m.; *Weir, Picnic at Hanging Rock*, 9 p.m., 112 Kern.

Week of April 26

Monday, April 26
Deadline for May graduates to deliver thesis to Graduate School and for departments to certify to Graduate School completion of required papers for May graduates.

Faculty Women's Club, Spring luncheon, 11:45 a.m., Nittany Lion Inn.

Tuesday, April 27
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.

Barton Browning, German, on "Kulturspreit: English Attacks at the Court of Heinrich Julius von Braunschweig."

Sports: tennis (women) vs. Maryland, 2 p.m.; lacrosse (women) vs. Ursinus, 3:30 p.m.

Wednesday, April 28
Commons Concert, noon, Kern Lobby.

Thursday, April 29
Kern Classics, *Lolita*, 6 and 9 p.m., 112 Kern.

New German Cinema, *Handke, The Left Handed Woman*, 7 and 9:15 p.m., HUB Assembly Room. Also April 30.

Museum of Art Film, *Heroic Materialism*, 7 p.m., First Floor Gallery.

Orchestrals Dance Group, 8:30 p.m., White Bldg. Dance Theatre. Also April 30.

Friday, April 30
Shaver's Creek Environmental Center, A Whale of a Weekend, through May 2. Departure 1 or 4 p.m., Rec Hall. Registration: 238-5872.

Commonsplace Theatre, *Le Cag, Aux Folles*, 7 p.m.; *Tess*, 8:30 p.m., 112 Kern.

Artists Series, The Gregg Smith Ensemble, 8 p.m., Schwab.

Sports: golf (men), Alumni Tournament. Also May 1.

Saturday, May 1
Sports: track and field (men), Nittany Lion Relays, noon; Blue-White football game, 2 p.m.; lacrosse (men) vs. Montclair State, 8 p.m.; tennis (men) vs. Bowling Green, Mercyhurst and Ohio. Also May 2.

Orchestrals Dance Group, 2:30 and 8:30 p.m., White Bldg. Dance Theatre.

France-Cinema, Fassbinder, *Li'l Marleen*, 7 and 9 p.m., 112 Kern. Also May 3.

Week of May 3

Monday, May 3
First day to sign Summer Term NDSL and University Long Term Loans, 108 Shields.

Sports: baseball vs. Juniata, 3 p.m.

Tuesday, May 4
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.

Alphonsio Linch, philosophy, on "Black Gods."

University Faculty Senate meeting, 2:10 p.m., 112 Kern.

Sports: tennis (men) vs. Bucknell, 2:30 p.m.

Wednesday, May 5
Late drop deadline.

Commons Concert, noon, Kern Lobby.

Sports: baseball vs. Indiana Pa. (DH), 1:30 p.m.; lacrosse (women) vs. Princeton, 3:30 p.m.

IAHS lecture, 8 p.m., 101 Kern. Erich S. Gruen, Univ. of California, Berkeley, on "Augustus and Alexander: Ideology of Empire."

Thursday, May 6
HUB Craft Center sale, 10 a.m.-4 p.m., Fisher Plaza. Also May 7.

Kern Classics, *Sleuth*, 7 and 9 p.m., 112 Kern.

New German Cinema, Herzog, *Swarg*, 7 and 9 p.m., HUB Assembly Room. Also May 7.

Assoc. of Ancient Historians Annual meeting, sponsored by IAHS, through May 9.

Friday, May 7
Last day for signing Spring Term NDSL and University Long Term Loans, 108 Shields.

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. John Opie, prof. of history, Duquesne Univ., on "The Aesthetics of Arid Lands."

Commonsplace Theatre, *Stripes*, 7 and 9 p.m., 112 Kern. Also May 9.

GSA Coffeehouse, 8 p.m., 102 Kern.

Sports: volleyball (men), NCAA Championships. Also May 8.

Saturday, May 8
Shaver's Creek Environmental Center, Earth-Sky Workshop conducted by Joseph Cornell, 4 p.m. Registration: 238-5872.

France-Cinema, Herzog, *Aguirre, the Wrath of God*, 7 and 9 p.m., 112 Kern.

Archaeological Institute of America lecture by Calin Edmonson, 8 p.m., 101 Kern.

Sunday, May 9
Honors Convocation, 2 p.m., Eisenhower Auditorium.

Penn State University Dancers Annual Mother's Day performance, 3 p.m., 132-133 White Bldg.

Week of May 10

Monday, May 10
Sports: golf (men), NCAA District II Playoffs at Totters; baseball vs. Gettysburg, 1:30 p.m.

Tuesday, May 11
IAHS lecture, 12:45 p.m., 318 Willard. Francois Suard, Univ. of Lille, France, on "Chretien de Troyes' Eric et Enid" (in French).

GSA Council meeting, 7:15 p.m., 101 Kern.

Wednesday, May 12
Commons Concert, noon, Kern Lobby.

Thursday, May 13
Fixed date for meetings involving Commonwealth Campus faculty. Also May 14.

Friday, May 14
Deadline for graduate students to submit petition to Records Office to graduate in absentia in May.

STS Three Cultures Dialogue, 12:20 p.m., 101 Kern. Talks by Donald H. Ford, human development, and Marlene Wadsworth, family studies.

Sports: track and field (men), Penn State Open, 3 p.m.; golf (men), Lady Lion Invitational, through May 16.

Commonsplace Theatre, *Altered States*, 7 and 9 p.m., 112 Kern. Also May 16.

GSA Coffeehouse, 8 p.m., 102 Kern.

Saturday, May 15
France-Cinema, De Broca, *Practice Makes Perfect*, 7 and 9 p.m., 112 Kern. Also May 17.

Week of May 17

Wednesday, May 19
Spring Term classes end, 9:55 p.m.

Last day for signing Spring Term Emergency Loans, 108 Shields.

Graduate Council meeting, 3 p.m., 101 Kern.

Thursday, May 20
Final examinations, through Monday, May 24.

Kern Classics, *The Eagle Has Landed*, 7 and 9 p.m., 112 Kern.

Friday, May 21
Commonsplace Theatre, *Annie Hall*, 7 and 9:15 p.m., 112 Kern. Also May 22.

Week of May 24

Tuesday, May 25
University Faculty Senate meeting, 2:10 p.m., 112 Kern.

Thursday, May 27
Board of Trustees meeting, Keller Bldg. Also May 27.

Saturday, May 29
Spring Term Commencement, 10:30 a.m., Beaver Stadium.

The importance of physical activity as a means of enhancing the quality of human life is as old as Greek civilization (the Olympic Ideal) and as wide as the planet (from the jogging and racketball culture of modern America to the ritualistic calisthenics of China to the swimming and tennis mania of Australia). One cannot really question the place of physical education in the university setting — it belongs.

However, how one deals with physical education courses in the university curriculum is open to question.

The Penn State catalog states the purpose of Ph Ed 005 to be "... to develop physical and recreational skills," but just what value these "skills" have in the academic program seems to be either assumed or ignored. I believe that there is a difference between the life enhancement effect of physical activity and the actual importance of "skills."

If the courses are to be graded on the actual skill level of the students at the end of the term, then these courses are like any other in the university and should be treated the same way in terms of credits and grade points. However, I don't think skills are that rigorously graded. The usual grading system seems to be based on "improvement" or "participation" or "relative skill," whatever these are. This sham of skill evaluation makes the present system grade inflationary.

This ambiguous grading situation is a direct result of the confusion of the purpose of these required Ph Ed courses. We require the courses because we value physical activity but we really don't want to flunk anybody just because of a lack of proficiency at some "silly" game. At the same time, we really don't think 3 credits of "A" in Ph Ed 005 under the present system should balance out 3 credits of "F" in History 21.

There are two ways around this situation: We could say we really do value, not just activity, but skills in physical activities and rigorously grade the skill level of the students in the required Ph Ed courses. Or we could say that what we value is some kind of physical activity for all students and make the required physical education courses strictly pass-fail courses.

I think the rigorous skill grading option makes sense for Plato's Academy and that the pass-fail option makes sense for Penn State.

Leo H. Takahashi,
Assistant Professor of Physics,
Beaver Campus

What bothers me as an advisor is the difficulty students have in scheduling their physical education classes. I've seen advisers who were willing, for example, to take a tennis class at any time it was scheduled to be rejected twice in a row. If I were a student, I'd be very provoked about it.

I think if we are going to require phys. ed., then courses should be more readily available. If the program can't be adequately staffed, perhaps it should be made a lesser requirement.

Because of the difficulty in scheduling, some students are forced to take physical education classes in which they aren't interested, and I think that's a strong argument for allowing them to take phys. ed. pass-fail. Moreover, if students wind up in classes they're not interested in, what good does it do them?

I'm concerned that with the changeover to the semester system, the scheduling problem for phys. ed. is going to be even more difficult.

June Miller,
Associate Professor of Music

A number of universities do not require that their students take physical education. At Penn State, it is not only compulsory, but under BDR III, it can no longer be taken pass-fail. In connection with the Faculty Senate forensics session on physical education this month, INTERCOM asked several faculty members to comment on the topic.

Should P.E. be required? The answer depends upon two things: what a university degree is supposed to represent and what a grade point average is supposed to measure. If you take the attitude that the university is to produce well-rounded individuals prepared to meet the challenges of the real world (a charter usually associated with high school education), then you can argue that physical education is part of that training. A slight extension of this type of reasoning leads to the conclusion that P.E. should be required of all graduate students as well. I think that requiring phys. ed. at the B.S. or the Ph.D. level is ridiculous. Such essential skills as writing and speech should be and are required at both the undergraduate and the graduate levels. I can't imagine, however, that a prospective employer would choose an employee based on level of proficiency in badminton. From the student's point of view, I can see where a computer science major might not want his or her inability to make contact with the birdie averaged in with laboriously developed skills in numerical analysis.

In short, I am against having physical education as a required course, and I am strongly against having it included in the GPA even as an elective course.

These comments come from an avid physical fitness and sports enthusiast. The athletic facilities available to students here at University Park are outstanding. The P.E. courses offered represent excellent opportunities to develop skills at new sports, to enhance proficiency at more familiar sports and just to have fun. Judging by the sizable memberships boasted by organizations such as the squash or rugby clubs and by the enormous number of participants in the intramural sports program, it is clear that none of the sports facilities here on campus suffers from neglect. Though course enrollment is sure to decline if mandatory phys. ed. is eliminated, I don't believe that any of the courses presently offered in the physical education department would disappear entirely due to lack of enrollment.

Robert T. McGrath,
Assistant Professor of Nuclear Engineering

In 1908, Penn State mandated a two-year physical education requirement for all freshman and sophomore men. By the academic year 1914-15, physical education for all students, both men and women, was required for two years. It becomes clear that required physical education at Penn State has enjoyed a long and successful tradition. To argue for continuance of a physical education requirement based solely on history and tradition is, in my opinion, illogical and unsound. When one considers, however, the excellence of the Basic Physical Education Program at Penn State — excellence that has been demonstrated repeatedly — as well as the signals being sent from all sectors of our society pointing to the need for physical education instruction at all levels of education, then I believe these are factors that must not be ignored.

Our nation's principal health agency — the Public Health Service — has recognized physical education as an essential element of preventive health care. A recent Surgeon General's Report supports the inclusion of physical

education instruction at all levels of education that promotes lifetime habits of vigorous exercise. On January 18, 1982, the United States Department of Education's Office of Post Secondary Education resolved to push for, at the university level, instruction in physical education not only for its obvious physiological benefits, but for its contributions to stress management.

The quality of life should be important to all of us. It's clear that physical education can contribute to the improvement of the overall quality of one's life. In fact, the University's plan for the '80s strongly supports placing a higher value on the quality of life in the decade ahead and lists a variety of health-related areas as vehicles to carry out this commitment.

Recently, the University sponsored a Conference on General Education. I found it interesting that even though representation from the College of HPER in the program was absent, two of the panel discussions underscored the need to include instruction in physical education as part of a baccalaureate education.

Learning lifetime sports provides students with positive outlets in a society very much concerned about what its citizens do in their leisure time. We must educate individuals not for a brief portion of their lives, but for a lifetime. I feel that instruction in physical education can make meaningful contributions to that end.

In conclusion, based on the proven excellence of the Basic Instruction Program and the demonstrated need for this type of instruction, I support the continuance of Physical Education 005 as part of the Baccalaureate Degree Requirements.

James G. Thompson, Acting Head,
Associate Professor of Physical Education

I'm not only very much in favor of the continuance of compulsory physical education at Penn State for undergraduates, but I'd like to see it for professors, too. I think too many professors are out of shape, and I've heard a number of faculty members lament that they wish they'd discovered the advantages of regular exercise much earlier in life.

Having compulsory physical education forces students to establish a regular daily or every-other-day regimen of exercise. Students often complain that they don't have time to exercise, but if they become used to scheduling some activity regularly, after they leave school, they're more likely to keep it up.

Another reason for compulsory phys. ed. is that it makes people learn new sports. Sometimes we're afraid to try something new because we think we'll appear foolish. But in a situation where everyone is a novice, no one has to feel embarrassed. I think team sports are especially good for students because they encourage cooperative effort, and the benefits of this kind of cooperation go far beyond any college phys. ed. class. American industry, for example, has recently started to use a team approach in which workers compete — in a cooperative way — after seeing the success of such efforts in Japan and Sweden.

Although I am strongly in favor of

compulsory physical education, I think students should be allowed to take these courses pass-fail if they wish. Certainly, they should get academic credit for them. They are putting in a considerable amount of time and effort, and they are gaining something in terms of their own lives both at this moment and in the long-term. That's what any academic course is about.

Murry R. Nelson,
Assistant Professor of Education

I think physical education should be compulsory because we are supposed to be educating people in all areas, and knowing something about your body and how to keep in shape is important and something that people will use the rest of their lives.

Anything worth requiring is worth grading, but I personally feel that physical education should be taken pass-fail. It's still possible to show your disapproval with pass-fail grading — i.e., an "F" requires that a student retakes the course. The criteria for pass-fail grades should be both objective and subjective. Students should be required to have a knowledge of the sport and be able to produce that knowledge on an exam. More subjective criteria would be attendance, attitude and improvement. Pass-fail grades in required phys. ed. courses won't damage a student's grade point average, but they insure, first, that students will show up for class and then that they perform both by written examination and actual participation in the sport.

I've talked to many people who took physical education classes grudgingly in college, but find that now, 10 to 15 years after graduation, they're still carrying on the sport. Their courses were valuable, something they could use for the rest of their lives.

Athletics are certainly an important part of my life. I'm a weight-lifter and faculty advisor to the Penn State Barbell Club, so perhaps that may bias my opinion.

Robert A. Schlegel,
Assistant Professor
of Molecular and Cell Biology

I assume that Penn State has always followed the Greek tradition of educating the whole person. Allowing for obvious exceptions, then, physical education ought to be required for the same reasons that humanities courses are required for engineering students and science for theatre majors: it's good for them. I'm sure studies would bear out my suspicions that, overall, "physically educated" people are healthier and happier than people not "physically educated." Further, education is mostly a sedentary business which tends to reinforce the artificial separation of mind from body; physical education can help correct that.

As for giving credit for physical education, why not? If a rose is a rose and so on, then a credit is a credit is a credit; this last has echoed across faculty senate meetings rooms for years. Penn State grants credit for reading books, and yet many more academic problems must be faced during a well-played game of golf or squash or ping-pong than while reading a Harlequin Romance. Of course, it's possible to overdo it; the ancient Spartans, for example, granted so many credits for phys. ed. that they exhausted the entire society. Students at Oral Roberts U. may soon follow. By requiring only a few credits of phys. ed., Penn State is hardly in danger of visiting a race of Nittany Lions upon an unsuspecting world. Sound minds in sound bodies is a sound concept, and those who learn it deserve credit.

Chester Wollford,
Assistant Professor of
English, Behrend College

Japanese poetry, art subject of two talks

Dr. Thomas J. Rimer will present two public lectures at University Park as a participant in the Distinguished Lecturer Series of the Association of Asian Studies' Northeast Asia Council.

Dr. Rimer is professor of Japanese language and literature and chairman of the Department of Chinese and Japanese at Washington University in St. Louis.

He will give an illustrated talk on "Europe as Art Object: Three Japanese Painters in Paris" on Monday, March 22, at 7:30 p.m. in Room 101 Kern Building.

His topic will be "Basho's Frog: Haiku in London, Paris and New York" at the Comparative Literature Luncheon on Tuesday, March 23, at 1 p.m. in Room 204 HUB.

The author, editor or translator of seven books, Dr. Rimer graduated from Princeton University and earned his M.A. and Ph.D. at Columbia.

His visit to Penn State is supported by the Japan-United States Friendship Commission, the Institute for the Arts and Humanistic Studies and the Department of Art History.

German scholar to address philosophy colloquium

Ernst Wolfgang Orth, dean of the University of Trier, Germany, will speak on "Husserl's Concept of Reduction and Scientific Truth" Monday, March 15, at 4 p.m. in Room 75 Willard Building. The colloquium is sponsored by the Department of Philosophy.

Professor Orth, a specialist in Neo-Kantian philosophy, also is vice president of the German Society for Phenomenology.

His most recent book is entitled *Reference, Meaning, and Object: Philosophy of Language of Husserl and Heidegger*. Professor Orth has written many articles and books on Husserl and on the history of ideas (concept of ideology). He is editor of *Phänomenologische Forschungen*.

Photography events begin

The 1982 History of Photography Events have been scheduled from March 17 through April 20 at University Park. In conjunction with the talks, an exhibit entitled "History of Photography — A World-Wide Inquiry" will be on display in the Rare Books Room of Pattee Library from April 13-24.

Larry Schaaf of Johns Hopkins University will present the first talk, "Paul Martin, Victorian Pioneer, and His Influence on Amateur Photography and Wood Engraving," Wednesday, March 17, at 4 p.m. in Room 230 Arts Building. Mr. Schaaf, the author of a book on Paul Martin, has conducted extensive research on early photography in England and has written numerous articles. He is currently completing his doctoral dissertation at Johns Hopkins.

Summer job openings can be explored March 18

The Student Employment Office of the Office of Student Aid is sponsoring Summer Employment Day Thursday, March 18, from 9 a.m. to 4:30 p.m. in the HUB Ballroom.

Approximately 50 employers representing summer camps and other recreational facilities will be available to interview students interested in summer work opportunities. Information and applications will be available also from more than 100 other employers who cannot attend the session.

Faculty and staff members are encouraged to inform students about this opportunity to explore summer job prospects.

Pittsburgh residency is next week

Michael Tilson Thomas

Orchestra to give two concerts during stay

The tenth annual residency of the Pittsburgh Symphony Orchestra will include concerts on Friday, March 19, and Saturday, March 20, at 8:30 p.m. in Eisenhower Auditorium. Michael Tilson Thomas will be the guest conductor and Oscar Shumsky the violin soloist.

The concerts will feature Brahms' Academic Festival Overture, op. 80, Beethoven's Concerto for Violin and Orchestra in D major, op. 61, and Tchaikovsky's Symphony No. 2 in C minor, op. 17, "Little Russian."

At the age of 36, Michael Tilson Thomas is already a conductor of international reputation. He has an eight-year music directorship of a major American orchestra to his credit; he conducted six years of concerts on a network television series; and his unusually diverse repertory includes more than a score of world premieres.

Oscar Shumsky made his debut at the age of nine with Leopold Stokowski and the Philadelphia Orchestra, performing Mozart's A major Violin Concerto. He received his education at the Curtis Institute of Music under the guidance of Leopold Auer and Efrem Zimbalist and was later appointed to the faculty.

In addition to performing, Mr. Shumsky has been a faculty member at the Juilliard School of Music since 1953. He has conducted leading ensembles in the United States and in Canada, where he was the Music Director of the Stratford Festival. Among his latest recordings are the complete Mozart Violin and Piano Sonatas, as well as the Bach Solo Sonatas and Partitas.

Tickets for the concerts will be on sale at Eisenhower Auditorium box office from Tuesday, March 16, 9 a.m. to 4 p.m. Phone orders on Visa/MC will be accepted at 863-0255.

Leonard Raver master class is open to the public

Leonard Raver, a member of the faculty of the Juilliard School and a former Penn State faculty member, will present a master class for organ from 4 to 5:30 p.m. Friday, March 19, in the Music Building recital hall.

Dr. Raver, who is coming to the area to perform a dedicatory recital at St. Andrew's Episcopal Church, has performed with many major orchestras in this country and abroad and recorded with the New York Philharmonic Orchestra under the direction of Leonard Bernstein.

The master class is open to the public for observation. Participation is being arranged by the School of Music, which is sponsoring the visit along with the Institute for the Arts and Humanistic Studies.

Oscar Shumsky

Faculty and students will interact with players

Open rehearsals, master classes, performances with student soloists and a one-to-one rehearsal with the Penn State Symphony will highlight this year's residency by the Pittsburgh Symphony.

The orchestra will arrive on campus Tuesday, March 16, and will spend the week working with students and faculty, as well as preparing for several concerts that will be presented at week's end as part of the Artists Series.

Student soloists chosen in School of Music competitions will perform with the Symphony's chamber orchestra in sessions scheduled from 3 to 5:30 p.m. Tuesday and from 10 a.m. to noon Wednesday and Thursday in Eisenhower Auditorium.

On Tuesday the opera orchestra will rehearse with the Penn State Symphony in a reading of Tchaikovsky's Symphony No. 5 beginning at 7:30 p.m. For this rehearsal Penn State players will sit side-by-side with their professional counterparts.

The full Pittsburgh Symphony will rehearse beginning at 7:30 p.m. Wednesday. Scheduled for playing is the Concerto for String Quartet and Orchestra by Ezra Laderman, which was commissioned for the Alard Quartet. That group will play with the orchestra during the rehearsal. Also scheduled are several pieces featuring student soloists.

Master classes in brass quintet, percussion and flute will be held Friday at 2 and 3 p.m. and Saturday at 1:30 p.m., respectively.

A special concert of string bass, viola and cello will be presented by Pittsburgh players at 12:30 p.m. Thursday in the Music Building recital hall.

On Thursday evening — at a time not yet determined — guest conductor Michael Tilson Thomas will present a talk.

According to Maureen Carr, director of the School of Music, additional master classes may be scheduled for the residency. She suggests that persons wishing to know specific details about any of the events should contact the School at 865-0431.

Violist to present special March 15 recital

Randolph Kelly, principal violist with the Pittsburgh Symphony Orchestra, will present a special public recital Monday, March 15, at 8:30 p.m. in the Music Building recital hall.

Mr. Kelly, whose training was at the Curtis Institute, will perform works by Boccherini, Bach, Paganini and Brahms.

Mini-festival features Tisne compositions

A mini-festival featuring the music of French composer Antoine Tisne will be held March 23 and 24. M. Tisne, along with violinist Adele Aurioi and pianist Bernard Fauchet of the Aurioi-Fauchet Duo, will be at University Park for the event.

The festival will feature a Common Hour lecture/recital by M. Tisne and the two French musicians Tuesday, March 23, at 1 p.m. in the Music Building recital hall.

University music faculty will perform works by M. Tisne Wednesday, March 24, at 8:30 p.m. in the Music Building recital hall. Highlighting this part of the festival will be the world premiere performance of the composer's "Boreale" by pianist Steven Smith, an associate professor of music. This composition was commissioned for Mr. Smith by the Institute for the Arts and Humanistic Studies.

Other performers on the program will be Smith Toulson, clarinetist and an associate professor of music; Suzanne Roy, soprano and an assistant professor; and Raymond Page, violist and associate professor of music. Mr. Toulson will play "Mantatlan Song"; Ms. Roy will be featured in "Two Songs" based on poems by Rainer Maria Rilke; and Mr. Page will perform the composer's Sonata.

M. Tisne, a graduate of the Paris Conservatory with first prizes in harmony, counterpoint, fugue and composition, is currently the Chief Inspector of Music of the French Ministry of Cultural Affairs. The Aurioi-Fauchet Duo is making its second appearance at the University in two years.

The Tisne Mini-Festival is being sponsored by the Institute for the Arts and Humanistic Studies and the School of Music.

Two guitarists to play Scarlatti, Villa-Lobos

Guitarist Anne Waller, an instructor of music, will present a recital Monday, March 22, at 8:30 p.m. in the Music Building recital hall.

Ms. Waller will perform solo guitar compositions by Scarlatti, Villa-Lobos and Granados. She will be joined in several works by Mark Maxwell, a part-time instructor in guitar at the University.

Both Ms. Waller and Mr. Maxwell received their M. Mus. degrees from Southern Methodist University, where they were students of Robert Guthrie.

Bucknell pianist will offer music by State composers

New music by Pennsylvania composers will be featured in a concert by pianist Barry Hannigan, a member of the music faculty at Bucknell University, tonight (Thursday) at 8:30 p.m. in the Music Building recital hall.

Mr. Hannigan will play William Duckworth's "The Time-Curve Preludes"; the Eighth Piano Sonata, opus 41 by Vincent Persichetti; Twelve Bagatelles by George Rochberg; "Makrosomos," Vol. 2, Part 2 by George Crumb and "Music of Twelve Centers" by Larry Nelson.

A graduate of Colorado College, Mr. Hannigan received his M. Mus. degree from the University of Colorado and his D.M.A. in piano performance and literature from the Eastman School of Music, where he studied with David Burge.

Accounting principles enlivened in record-setting TV class

When G.K. Nelson began his television career in 1957, the top-rated show was "I Love Lucy." Today, Lucy is in her umpteenth rerun, but Dr. Nelson still goes on live every Monday and Friday morning.

"I may not have had the ratings," he says, "but then Lucille Ball didn't give pop quizzes, either."

Dr. Nelson, a professor of accounting, teaches Accounting 101 on closed circuit

television. Since his first TV class, more than 35,000 students have mastered the intricacies of debits and credits through his instruction.

That's estimated to be more than half of all Penn State students who have taken a basic accounting course since the University opened its doors in 1859.

Both Dr. Nelson's 25 years of TV teaching and the longevity of Accounting 101 on television are believed to be

records in the field of instructional television.

He was surprised on the air Feb. 22 by a committee of well-wishers on the anniversary of his 25 years on television. Those present included Dr. Eugene J. Kelley, dean of the College of Business Administration; Dr. Robert D. Pashek, associate dean; Dr. William J. Schrader, head of the Department of Accounting and Management Information Systems; Leslie P. Greenhill, director emeritus of the University Division of Instructional Services; and several of Dr. Nelson's graduate students.

The surprise party in Studio A of Mitchell Instructional Services Building was followed by a reception in an adjacent studio.

Dr. Nelson says that TV instruction is well-received by most students.

"I've polled the students a number of times over the years to see if they preferred that the course be taught in a large lecture hall rather than on television," he says. "Each time, about 85 percent of the students reported they favored TV."

Accounting 101 is an introductory course, drawing students from a wide variety of majors, and this leads to a heavy demand for the course each year. More than 600 undergraduates signed up for Winter Term alone.

Students view Dr. Nelson from television monitors set up in 18 different classrooms in Boucke Building. Dr. Nelson broadcasts from a TV studio several blocks away. Through a microphone hookup in each classroom, he

can easily call on individual students and take questions from them as well.

"I wouldn't teach on television if the students wouldn't talk directly to me," says Dr. Nelson, who was named 1981 Accountant of the Year in Education by Beta Alpha Psi, the national professional accounting society.

TV teaching requires some "show biz" to keep the students interested, he believes.

Thus, while Dr. Nelson is lecturing, the question, "Would you buy a used car from this man?," may appear on the screen. Frequently there will be screen "credits" such as "Dr. Nelson's wardrobe by the Salvation Army."

He has been the victim of carefully planned "insurrections" in which the studio camera crew mutinies and ties him up at his desk. He has even been known to take a pie in the face.

"I have to credit some of the gimmicks to the director and camera crew," he notes. "They're broadcasting students and have the creative flair. I'm just an old bean counter."

The names of the hypothetical firms he and his students "audit" are familiar to generations of Penn State students. Standards include Hy O. Silver, the loan arranger, and the septic tank manufacturing firm of Hoo Flung Lung.

"I ask the students to come up with names occasionally," he says, "but most don't pass the censor!"

While the gimmicks are used to catch the attention of viewers, Dr. Nelson points out that the course is a serious study of basic accounting principles.

Professor Nelson gets ready for his 25th year on the air.

ORUs

(Continued from page 1)

rational behavior for institutions. The preeminent universities attract the renowned scholars, the intellectually outstanding graduate and undergraduate students, and the funding that assures supremacy. ORUs are perceived as decline, either because of what they do, whom they hire or how they operate.

With funding from the National Science Foundation, we were able to visit selected ORUs in their native habitats and collect survey data from a broad spectrum of ORUs currently alive and well and living in 78 leading research universities and their medical schools. Before starting our project, we had to formulate our own definition of an ORU so that we would be examining the same kinds of organizations across the academic tier.

Secondary sources were unreliable and individual university telephone directories confusing. We wanted to eliminate ORUs that exist primarily in the minds of their investors and those that live and die at the will of a department. Also, we wished to delete ORUs that facilitate the research of others — museums, computer centers, electron microscopy labs — but are not themselves recipients of research contracts and grants. Lastly, we had to be certain that the nominee was of that university and not just at it.

We enlisted the cooperation and assistance of core university and medical school administrators in refining our ORU lists and also asked them to complete a brief survey form about institutional policy in regard to ORUs and their professional staffs. In addition, ORU directors, department chairpersons and postdoctoral scientists and fellows were sampled. We conducted more than 200 interviews and scored almost 1,800 questionnaires.

In consultation with the project advisory committee, the decision was made to collect, analyze and report data separately for the core universities and the medical schools since they operate in different ways.

Some highlights of our findings are: — Not all research universities have

created ORUs. Institutional size, complexity, degree of specialization and diversity in mission contribute to the growth and proliferation of these organizations.

— ORUs are not a 20th century invention but trace their origins to the agricultural experiment stations begun in the latter half of the 19th century. They set the parameters — utilitarian, problem-focused, housed apart from resident instruction and accountable to a sponsor. The notion of interdisciplinarity and multidisciplinary, as well as the specific linkage between a professor and a team of researchers, is a post-World War II phenomenon.

— Successful ORUs require initial and continuing support from three sources — sponsor(s), university administration and interested faculty. In the medical schools, endorsement or at least acquiescence of the relevant department chairpersons is vital. Any of the concerned parties may begin the establishment process, but ORUs created by administrative fiat without the real consent of faculty and ORUs required by their sponsors to engage in non-rewarding academic activities will not survive long.

The most widely heralded *raison d'être* for ORUs — encouragement of interdisciplinarity and multidisciplinary — has scant basis in fact. Only about one-third of the ORU directors sampled reported faculty interactions with more than one department. The notion of faculty and staff from different disciplines working together on a single project is also not borne out by the data. Only 28 percent of the ORU directors sampled thought that was a good description of their research mode of operation. (It should be added that medical school departments tend to be multidisciplinary in character and make extensive use of joint or split appointments.)

— There are notable differences in leadership styles between ORU directors and department chairpersons despite similar professional backgrounds.

Department chairpersons are *de jure* oriented, and as part of the representative process serve at the pleasure of those who elected them to office. ORU directors are *de facto* oriented, presiding not over a society of

equals but rather a hierarchy where participatory decision-making is rarely the norm. Even the title connotes the greater authority of the director, but then the stakes are greater. Departments do not die because of poor leadership; ORUs do.

— In research universities, the pressure to generate external funding is comparable in departments and ORUs. The greatest single external funding agent for ORUs and departments has been the federal government.

— In percentage terms, ORUs receive twice as much state and industrial funding for research and development as do departments, thus affirming the task orientation of ORUs. Aside from agriculture, engineering and the social sciences are the chief beneficiaries from the ORU mode.

— Clinical medical departments are dependent upon patient and hospital fees to close the gap between yearly appropriated institutional funds and outlays. Few medical schools provide hard-line budget support for most faculty positions. Freestanding ORUs are seen as widening the division between bench scientists and clinicians. The absence of physician-researchers from clinical responsibilities affects their departments financially.

— ORUs may be funded many ways: endowments, line-item appropriations, retention of overhead, institutional support, multiyear grants and contracts, and short term grants and contracts. Each of these funding methods carries assets and liabilities.

— Public universities are more prone to formalize the procedures for the establishment of ORUs. Evaluation of ORUs is spotty. Although many administrators state that ORUs are evaluated, systematic surveillance appears to be neglected. The reality is that the sponsors determine the life cycles of most ORUs.

— The status of professional staff within ORUs remains unresolved. Salary and fringe benefits tend to be similar for faculty and professional staff with equivalent experience. But in addition to the denial of tenure and sabbatical leave, professional staff do not participate in decision-making bodies. Some universities

are instituting procedures for rolling tenure, but implementation and frequency of application remain unknown quantities.

— Conflict between departments and ORUs stems from the following charges: the applied nature of the research effort in ORUs, territorial aggression, warping of department programs by overstaffing in narrow areas of intellectual pursuit, prerequisites for ORU faculty not shared with other department members and impermissibly behavior.

We stated earlier that conflict was inherent in science organizations. Academic is highly individualistic, competitive enterprise and not a team sport. The disappearance of ORUs would not put a damper on internal strife; it would only transfer the conflict to another forum. Certain measures alleviate or mitigate the conflict between departments and ORUs. Sharing the wealth — instrumentation, staff expertise and summer employment — helps. So does good citizenship — teaching large enrollment classes, making clinical rounds in the medical school and participating in department chores. Obviously boundary lines must be observed and training opportunities extended to graduate students and postdoctoral scientists. Finally, it's important that ORU directors consult and communicate with the relevant academic departments. But most importantly, because academic is a prestige game, the ORU director must have valid scholarly credentials.

Renée Friedman is a project associate at the Center for the Study of Higher Education. Robert Friedman is a professor of political science and director of the Center for Science Policy.

Ag lecturer

faculty from 1947 to 1955.

After joining the Rockefeller Foundation, he served in various capacities in Mexico before becoming director of that country's National Livestock Research Center.

He is the author of a number of publications dealing with poultry and swine production, as well as with world food needs.

Joseph J. Mansfield

Development vice president appointed

Joseph J. Mansfield, director of development for capital campaigns and major gifts at Columbia University, has been named vice president for development at the University.

Mr. Mansfield's appointment, effective May 1, was approved by the Board of Trustees.

"We are extremely pleased that an individual of Mr. Mansfield's impressive qualifications will be responsible for planning, directing and coordinating private fund raising activities at Penn State," President Oswald said.

He noted that *A Perspective on the '80s* contains 15 separate references to the need for increased private support.

In January 1981, the Trustees authorized the establishment of a position for a vice president for development, in recognition

of that need. A search committee chaired by Dean Eugene J. Kelley of the College of Business Administration conducted the search which led to the appointment of Mr. Mansfield.

The new vice president will report to Dr. Richard E. Grubb, senior vice president for administration.

At Columbia since 1977, Mr. Mansfield, 44, is director of all university-wide efforts there for the raising of capital funds. He has been senior planner for Columbia's forthcoming \$400 million capital campaign and recently directed a \$25 million campaign for a new residence hall.

Before going to Columbia, he was executive director of development for New York Infirmary from 1974 to 1977. He was director of development at Pace University from 1970 to 1974.

Mr. Mansfield is a 1959 graduate of Fordham University with a bachelor's degree in psychology. He earned the master of arts degree in guidance and student personnel administration from Teachers College of Columbia University in 1960.

Mr. Mansfield is a member of the national advisory board of the Fordham University Alumni Federation and is a past president of the Fordham College Alumni Association. In 1969, he received the Fordham College Encaenia Award for Outstanding Achievement in Education.

Mr. Mansfield's wife, the former Deborah Bowden of Chestnut Hill in Philadelphia, received her bachelor of science degree in education from Penn State in 1965.

University asks 12.1 percent appropriation increase

Increased costs for everything from instructional materials to salaries to employee benefits form the basis of President Oswald's request for a 12.1 percent increase in the 1982-83 State appropriation to the University.

"In the face of continued inflation and financial stringency, the continued aid and support of the Commonwealth, combined with the University's effective management of its human and financial resources, will enable it to meet these challenges," Dr. Oswald said during hearings before the Senate and House Appropriations committees in Harrisburg earlier this month.

The University is requesting a State appropriation of \$148,468,000, up 12.1 percent over the 1981-82 appropriation of \$132,428,000. The request includes increases of \$14,122,000 for general University operations exclusive of Medicine, and \$1,918,000 for the College of Medicine.

Penn State's estimated expenditures for the current year, 1981-82, total \$498,418,000, of which the State provided \$132,428,000 (26.6 percent). The general funds budget supports the basic educational programs of teaching, research and public service throughout the State. Ninety percent of it comes from State appropriations and student tuition charges.

Governor Thornburgh recommends a base appropriation to the University of \$140,281,000, an increase of 5.9 percent from the 1981-82 appropriation. The Governor also recommends that the University receive an additional \$3.2 million for operation of the Elizabethtown Hospital for Children and Youth beginning in 1982-83. (The Governor is proposing the transfer of control and management of the facility to Penn State for operation by the Hershey Medical Center.)

"Penn State is most appreciative that

the Governor and the members of the General Assembly have given higher education a high priority in the allocation of the State's resources in these times of fiscal austerity, especially considering the many competing needs for the limited public funds available," Dr. Oswald said.

"The increased appropriations provided for higher education by the Governor and the Legislature over the last several years recognize the many important contributions that our colleges and universities make to the social, cultural, technological and economic growth of the Commonwealth."

The impact of Penn State, he said, can be measured by several observations: In 1980-81, approximately \$64 million of sponsored research funds were generated by faculty members; Penn State has some 209,000 living alumni, with 125,000 alumni living in Pennsylvania; and the University employs 11,701 people on a full-time basis.

In addition, the University's enrollment is at an all-time high for the current academic year, for Fall Term, 57,194 students were enrolled in resident instruction courses and 6,606 enrolled in continuing education credit courses.

To accommodate the heavy flow of copy INTERCOM has received, an issue will be published April 1.

Recalling Penn State's mission of serving the Commonwealth as Pennsylvania's land-grant University, Dr. Oswald said the University's appropriations request is designed to cope with two key problems: declining purchasing power and rising costs.

"While State appropriations have increased almost every year since 1972-73, the value of the appropriation in terms of

(Continued on page 7)

Shenango Valley director named

Dr. Vincent De Sanctis, of Southern Illinois University at Edwardsville, has been named director of the Shenango Valley Campus at Sharon, effective June 15.

During the past eight months, Dr. Charles R. Bursey, associate professor of biology at Shenango Valley, has been serving as acting director.

"We are pleased that Dr. De Sanctis has decided to join the Penn State system," President Oswald said. "His extensive experience and interest in lifelong education made him the outstanding candidate in our national search for a director for the Campus."

Before joining Southern Illinois, Dr. De Sanctis was dean for community education at Williamsport Area Community College, serving as chief administrator for all evening courses, off-campus courses, summer sessions and other programs. In that post, he also administered all CETA, business and

Vincent De Sanctis

industry programs and apprenticeship courses.

He was affiliated with Montclair State College in New Jersey before going to Williamsport and from 1970 to 1972 was director of the Adult Education Resource Center there.

Chief among his professional interests are illiteracy among adults and mid-life career change. In recent years, he has

Three Alumni Fellows will visit

Three members of the Class of '59 will initiate this spring's Alumni Fellows Program.

Visiting University Park will be Edward R. Hintz, president of Hintz and Holman, Inc., and Elizabeth S. Kelly, senior planning and allocations consultant for the United Way of America. Dr. Robert DeWitt Chapman, associate chief of the NASA Laboratory for Astronomy and Solar Physics, will visit Behrend College.

A guest of the College of Business Administration from March 29 through 31, Mr. Hintz is a private investment adviser. While earning an M.B.A. degree from

Harvard University, he co-authored a book, *Creative Collective Bargaining*, published by Prentice-Hall. He has had extensive business experience as a security analyst and portfolio manager with various companies.

Active in Penn State affairs, Mr. Hintz is a member of the College of Business Administration Alumni Board.

Ms. Kelly, who received her B.S. in family studies, will be a guest of the College of Human Development March 28 through April 1.

She joined the United Way of America

Dr. Annette S. Ezell, professor of nursing at the University of Utah, has been named head of the Department of Nursing.

Dr. Ezell also directs the doctoral program in nursing educational administration at Utah and is an adjunct associate professor in the university's college of medicine. She has served as associate dean of academic affairs and associate dean of graduate studies at Utah.

Before coming to Utah, she was on the faculty of the College of Health Sciences, Medical Sciences and College of Nursing at the University of Nevada, Reno.

Dr. Ezell received her bachelor of science degree in nursing from the University of Nevada and her master's degree in zoology and mammalian physiology from the same institution. Her doctor of education degree in public administration and organizational behavior was earned at Brigham Young University.

The author of many professional papers and reports, Dr. Ezell has created a national doctoral program in nursing higher education administration funded for \$1 million by the Department of Human Resources, Division of Nursing.

Dr. Edwin L. Herr, professor of education and head of the Division of Counseling and Educational Psychology, is president-elect of the 41,000-member American Personnel and Guidance Association. He will assume the presidency in July 1983.

The author of 12 books and more than 200 articles on counseling and career guidance, Dr. Herr has served since 1976 as the elected U.S. representative to the eight-member executive council of the International Round Table for the Advancement of Counseling. He has also served as president of the National Vocational Guidance Association and the Association for Counselor Education and Supervision.

Two Human Development faculty members, assistant professor Ann C. Crouter and associate professor James Garbarino, are among the 10 finalists selected for the 1982 Mitchell Prize competition. Their submission dealt with the need for business enterprises to consider the social as well as the physical impact of their operations.

The finalists have until late summer to expand their summaries into 7,500-word papers. Judges will distribute a total of \$100,000 in prize money. Dr. Garbarino was a Mitchell Prize recipient in 1979.

In addition, *Successful Schools and Competent Students*, a recently published book written by Dr. Garbarino, has won an "Outstanding Academic Book of 1981" award from *Choice*, the national library journal. The 176-page book examines the importance of the school in shaping social development at all educational levels. It was published by Lexington Books.

Norman Freed, associate professor of physics and associate dean, College of Science, has recently returned from a lecture tour of India and Japan. While in India, he presented in Madras an invited plenary address at the International Conference on Medium Energy Physics and Nuclear Structure, a public lecture at Presidency College, and a series of joint seminars at MATSCE, the Institute of Mathematical Sciences, and the Department of Nuclear Physics of the University of Madras. He also presented colloquia at the Tata Institute of Fundamental Research in Bombay, the Saha Institute of Nuclear Physics in Calcutta, and the Department of Nuclear Physics of the University of Delhi. In Japan, he presented colloquia at the Institute for Nuclear Study and the Laboratory for Nuclear Science at Tohoku University in Sendai. All talks dealt with various aspects of high energy electromagnetic interactions with atomic nuclei. The trip

was supported by the National Science Foundation, University Grants Commission (India), Japan Society for the Promotion of Science, and the host institutions.

Dr. Freed was also recently elected chairman of the Executive Committee for Nuclear Theory at the Bates Linear Accelerator Laboratory at the Massachusetts Institute of Technology. The Bates Laboratory, a national facility, is one of the largest in the world devoted to high energy nuclear physics research.

Dr. Robert Lima, professor of Spanish and comparative literature, gave two public lectures and a poetry reading in Philadelphia under the auspices of the Pennsylvania Humanities Council's Invitational Humanist Program. He is a fellow of the Council this year. At Temple University, Dr. Lima spoke at the invitation of the Department of Spanish and Portuguese, and read his poetry manuscript, "The Rites of Stone," at the Department of English poetry colloquium. At the University of Pennsylvania, he spoke on "La historia infame del Demonio y como se personifico" at La Casa Hispanica.

Dr. Etu Zen Sun, professor of Chinese history, has been elected to the Council of Conferences of the Association for Asian Studies (AAS) for a three-year term beginning in April. As the candidate receiving the highest number of votes, she was also elected to a concurrent term of office on the AAS board of directors.

Dr. Emilia E. Martinez-Brawley has been appointed to the editorial board of *Social Development Issues*, a journal published by the University of Iowa.

Dr. Gordon C. Godbey, professor of education, has been elected president of the Pennsylvania Association for Adult and Continuing Education. Dr. Godbey becomes the fifth president of the organization, which resulted from a merger of the Pennsylvania Adult Education Association and the Pennsylvania Association for Public Continuing and Adult Education.

Dean Henry J. Hermanowicz of the College of Education has been named to the editorial board of the *Journal of Economic Education* published by the Joint Council on Economic Education.

Bookshelf

Dr. Austin J. Jaffe, associate professor of business administration, is co-author of a book, *Real Estate Investment Decision Making*, published this month by Prentice-Hall. The other author is Dr. C.F. Simons of the University of Georgia.

The 547-page text relies heavily on the "equity valuation model," which the authors call "the foundation of the real estate investment process." The model permits a systematic analysis of real estate investment decisions.

The book is designed for students who have had introductory courses in real estate principles, financial management and economics. A basic understanding of high school algebra is required.

Promotions

Faculty

William C. Urichio to assistant professor of film in the College of Arts and Architecture.

Staff Expert

Clyde E. Adams to operations supervisor in Intercollegiate Research Programs.
Edith C. Bender to manager, Systems Engineering in Management Engineering.
Kathleen M. Nagy to staff development instructor at Hershey.
Gary C. Schultz to assistant director in Management Engineering.
Richard K. Tyson to building superintendent in Student Affairs.

Dr. John O. Almqvist, professor of dairy physiology, received the Wolf Foundation Prize on March 21 in Israel at a ceremony in the Knesset, the nation's parliament.

Dr. Almqvist, who was honored for his work in artificial insemination for livestock improvement, shared the \$100,000 award, often referred to as the "Nobel Prize" of agriculture, with Dr. Henry A. Lardy of the University of Wisconsin and Dr. Glenn W. Salisbury of the University of Illinois.

While in Israel, Dr. Almqvist is delivering several lectures on his research.

"More than \$31 million is being saved annually in the United States through use of Dr. Almqvist's technique of adding antibiotics to bull semen, a practice now adopted worldwide," said Dean Samuel H. Smith of the College of Agriculture. "The total savings around the world is estimated to be \$580 million."

A member of the faculty since 1944, Dr. Almqvist earned a B.S. at Cornell, a master's degree at Purdue and his doctorate at Penn State. Dr. Salisbury, with whom he shared the award, was one of his teachers at Cornell and the person responsible for interesting him in animal science research.

Ross L. Whitcraft to producer-director in Continuing Education.

Staff Non-Exempt

Isabel A. Carson to administrative assistant in Intercollegiate Research Programs.

Debra Chalfant to licensed practical nurse/Meds at Hershey.

Peggy L. Cisney to licensed practical nurse/Meds at Hershey.

Juliann T. Horney to licensed practical nurse/Meds at Hershey.

Debra J. Jones to medical technologist at Hershey.

Margaret M. Weeter to respiratory therapy technician 1 at Hershey.

Clerical

Diane Beresford to clerk, records A at Delaware County.

Kathleen E. Bryant to secretary B in Libraries.

Judith A. Hicks to clerk, typist A in Agriculture.

Phyllis A. McGarvey to technical secretary C in Applied Research Laboratory.

Technical Service

Theodore F. Grove, Jr. to maintenance worker area landscape in Physical Plant.
Elizabeth T. Payne to helper, Health Center in Health Services.

Ronnie Rogers to maintenance worker area landscape in Physical Plant.

James Stem to fuel and car wash attendant in Business Services.

Joseph Lee Veney to maintenance worker utility at Ogontz.

Obituaries

Ora H. Beatty, a member of the staff from 1921 to 1962, died March 6. She was 86. At her retirement, she was a supervisor with Housing and Food Services.

Elmer E. Grenoble died March 10 at the age of 60. He joined the staff in 1949 as a janitor and from 1966 until his retirement in June, 1981, was a painter.

Bertha H. Lucas died March 10 at the age of 87. She joined the staff in 1946 and was a mailing room supervisor for the Alumni Association when she retired in 1960.

Calendar report

The Calendar Conversion Council has approved a recommendation providing for an official graduation date at the end of the Fall Semester, although there will be no commencement exercises.

The proposal, which will be forwarded to President Oswald, recommends that students completing degree requirements at the end of Fall Semester be awarded their degrees at that time and that an official graduation date be established.

Under the recommendation, Fall Semester graduates could pick up their diplomas after the official graduation date or have them mailed. Graduates also could choose to participate in the Spring Semester Commencement exercises.

Council, at its March 16 meeting, also discussed the Facilities/Faculty/Program Match underway at University Park. Warren R. Haffner, University registrar, said early indications are that there will be 10 percent fewer sections under the semester calendar.

Council members discussed possible alternatives if the FFP match indicates problems in the proposed semester class schedule. Council's FFP Match Committee was asked to examine alternatives and make recommendations to the full Council.

Council Chairman James B. Bartoo reported he will appoint a subcommittee to develop a definition for the "extended summer session" which will accommodate students who do practicum or internships during the summer.

At its Feb. 25 meeting, the Calendar Conversion Council reported that a faculty instructional workload report, providing a multi-faceted look at instructional workload, is being circulated within the University community.

Three measures of faculty instructional workload are included in the report, which covers fall, winter, and spring, 1980-81. They are:

- Assignments showing the number of classroom sections taught, individual instruction students supervised, classroom preparations required, and class contact and class preparation hours reported;

- Student Credit Hour showing classroom and individual instruction yield and

- Section Credit Value describing workload as the credit value of sections taught; measure of average class meeting size also is included.

Copies of the report also have been distributed to members of the Calendar Conversion Council Communication Committee, Council of Academic Deans, Council of Commonwealth Campus Directors, Provost's Advisory Committee and the President's Budget Task Force.

In a memo accompanying the report, Graduate School Dean James B. Bartoo, chairman of the Calendar Conversion Council, said questions, comments and suggestions are needed and will be welcomed.

After the Council receives reviews and responses, Dean Bartoo said the instructional workload measures for 1980-81 will be revised, if appropriate.

"Reports of faculty instructional workload measures for 1981-82 and 1982-83 will be produced based on any revision. As a result, the University will have a faculty instructional workload data base against which any future changes in faculty instructional workload can be measured."

In other business, Council reviewed principal recommendations of a Graduate Assistant Stipend Study and forwarded the report to President Oswald.

Computer and learning needs addressed by Faculty Senate

The University Faculty Senate at its March meeting approved the establishment of a Learning Assistance Center (LAC) and passed recommendations urging "continuing, comprehensive planning for academic computer needs" and "access to computer systems in instruction and research" as a privilege for all faculty members.

The Senate also approved the establishment of a new Standing Committee on Computer and Information Systems.

The LAC will be available to all undergraduate students, especially those served under the Developmental Year Program and the Basic Skills Program. According to the recommendation drafted by the Committee on Undergraduate Instruction and passed by the Senate, "other agencies providing 'learning support' for undergraduate students at the University Park Campus should be encouraged to become part of those learning support activities of the Learning Assistance Center as those agencies feel is appropriate."

The LAC, if implemented, will be placed under the Office of the Vice President for Undergraduate Studies, Dr. Robert E. Dunham, "and will operate for a specific period of five years with extensive evaluation during that time."

Learning centers are already operating in various forms at most of the Commonwealth Campuses, according to Murry Nelson, chairman of the Subcommittee on Basic Skills. At University Park, however, as many as 12 uncoordinated agencies offer learning support to undergraduates.

In response to questions, Dr. Dunham noted that Developmental Year credit courses for EOP students and veterans would be continued after the establishment of the LAC.

He added that the LAC might offer a variety of non-credit workshops on such topics as how to study or how to take notes.

He also assured senators that as long as funding was available for the Basic Skills Program, it was his intent to see that it was distributed to all campuses of the University.

The Senate accepted without debate the first recommendation from its Special Committee on Computer and Information Systems. It said: "Continuing, comprehensive planning for academic computer needs should be initiated as soon as possible and should include rational financial planning for instruction and research. Close faculty involvement and faculty leadership must be a major part of this effort in order to accurately perceive the opportunities in both areas."

The second recommendation, which specified various academic computing needs not currently being adequately met, ran into opposition. Senators voiced concern that they were being asked to approve the establishment of such concrete services as seminars, newsletters and a Computer Services Bureau.

Senate Chairman Nancy Tischler finally ruled that this recommendation should be sent to the Academic and Fiscal Planning Committee for costing.

Senators then passed two other recommendations from the special committee, which was chaired by Thomas E. Daubert. They read:

(1) "Access to computer systems in instruction and research should be the privilege of all faculty of the University without exception and should be an attainable goal. An allocation procedure should be devised such that a reasonable amount of computer access is guaranteed. However, during periods of limitation principles of equity and common sense

must prevail."

(2) "It is recommended that the University Faculty Senate establish a Standing Committee on Computer and Information Systems to provide advice and consultation to the administration and to consider Senate actions to ensure an active faculty role in academic computing."

The area of academic computing was also dealt with in an informational report from the Senate Committee on Undergraduate Instruction, which had considered a recommendation from Chairman Tischler that a computer literacy requirement be established under BDR III.

The Committee first rejected the term "computer literacy" as "an ill-defined buzzword," pointing out that it was unclear whether it applied to computer skills, computer theory or the role of the computer in a technological society.

The Committee noted that the baccalaureate degree requirements should introduce students to basic skills, and computer skills are essentially derivative.

The members also emphatically rejected the idea that if the Senate were to approve the general idea of computer "literacy" within the BDR that "this requirement could be filled by some sort of watered-down descriptive course as 'The Computer in Modern Society'."

In conclusion, the Committee noted that what is needed is not expanded requirements but expanded computer facilities and that "the inclusion of computer skills in the baccalaureate degree is the responsibility of each departmental faculty."

The Senate also:

— Received an informational report on the 1980-81 Educational Opportunity Program. Since EOP came into existence in 1969, 4,500 students have been admitted, and almost a third of them have graduated. In 1981, 366 students were admitted — 144 at University Park and 222 at Campuses. In 1980, there were 134 at University Park and 185 at the Campuses.

— Reviewed a fact sheet from the External Affairs Committee describing the impact of cuts in Federal student aid funds. Chairman Arthur O. Lewis, Jr., suggested that senators write their congressmen to inform them of their concern.

— Heard a report from M. Frank Mallette, chairman of the Committee on Faculty Affairs, which concurred with a recommendation from Vice President Richard G. Cunningham to Provost Eddy that research faculty who teach or supervise thesis be awarded temporary professorial titles. Dr. Cunningham, vice president for research and graduate studies, also recommended that a new research rank equivalent to professor be established and that the title to designate the new rank should be Senior Scientist, followed by a description of the individual's area, such as Senior Scientist — Acoustics Research. The Committee also approved this proposal.

— Received a Basic Skills Report (see chart) which included the category of "Reading" for the first time.

— Passed two changes in its *Bylaws* permitting replacement of senators who are away on leave for more than four months (specifying June, July and August) and excluding that if a senator does not complete his or her term, the voting unit will either elect, or select from a list of alternates, a replacement to fill the unexpired term.

The Senate concluded its session with a brief forensic discussion on compulsory physical education.

INTERCOM is an internal communications medium published for the faculty and staff of The Pennsylvania State University.

Computation Center offering Spring seminars

The Computer Center is offering a series of seminars on seven different topics during the Spring Term. There is no charge, and the seminars are open to the University community. To register, call Carolyn Kresen at 863-0422.

VM/CMS (3 sessions)

Introductory sessions on VM/CMS (Virtual Machine/Conversational Monitor System) will be given on the evenings of March 25, 30 and April 1 in Room 108 Forum. All sessions will start at 7:30 p.m.

VM/CMS is an interactive, time-sharing system that provides extensive computing facilities in such a way that each user appears to own and operate his or her own personal computer. Each computer user has over a million bytes of main and secondary storage, and can use a wide variety of programming languages, including APL, BASIC, FORTRAN, and PL/I.

In order to gain the most from these seminars, participants will be expected to have at least a working knowledge of some programming language. They should also have use of a P, U, or C account with a VM/CMS user identification (available in Room 229 Computer Building).

Interactive Graphics (7 sessions)

These seminars are intended to acquaint programmers with the Evans and Sutherland Multi-Picture System. Familiarity with FORTRAN is a prerequisite, and the group will be limited to 15 people and will be held in Room 110 Computer Building. Participants should have the use of a P, U, or C account (available in 229 Computer Building). All sessions begin at 7:30 p.m. and will be held March 25, 30, April 1, 6, 8, 13 and 15.

Topics to be covered include:

programming on the PDP-11/45 and use of DEC utilities (editor, monitor console routine, peripheral-interchange program, etc.); general graphics techniques, theories and algorithms; graphics on the Multi-Picture System; modes of picture generation, display and update; and application programming techniques for interactive computer graphics.

BASIC (4 sessions)

These sessions will describe the BASIC programming language using the system that was developed by the University of Waterloo and which runs under the VM/CMS system.

No knowledge of VM/CMS is required but participants should have prior programming experience and the use of a P, U, or C account with a VM/CMS user identification (available in 229 Computer Building). The seminars will be held in Room 112 Walker April 6, 8, 13 and 15. All sessions will start at 7:30 p.m.

1980 CENSPAC (Census Data Retrieval Program) (3 sessions)

The use of the CENSPAC data analysis program, developed by the U.S. Bureau of Census for the purpose of manipulating census data, will be described.

Participants will be expected to have an understanding of census data structure. These seminars will be restricted to computer techniques such as tape and disk manipulation. They will be held in Room 110 Computer Building April 20, 22 and 27. All sessions will start at 7:30 p.m.

Features of the New FORTRAN Standard (2 sessions)

Differences between the old FORTRAN language and the new standard language

will be described. Participants should have previous programming experience. These sessions will be held at 7:30 p.m. in Room 112 Walker on April 27 and 29.

VM/CMS EXEC2 Procedures and XEDIT Macros (2 sessions)

The VM/CMS system allows EXEC procedures and MACROS to be written in the high level EXEC2 language. System and editor commands and procedures may be defined and executed stand-alone, or as an intelligent interactive interface to higher level computer languages. Participants will be expected to have programming experience and at least a knowledge of the VM/CMS system equal to having attended the earlier seminars on VM/CMS.

The seminars will begin at 7:30 p.m. in Room 112 Walker Building on the evenings of April 20 and 22.

APL (6 sessions)

A series of six seminars on APL Programming Language (APL) will be given on the evenings of April 27, 29, May 4, 6, 11 and 13 in Room 108 Forum. All sessions will start at 7:30 p.m.

APL is a highly interactive programming language; the seminars will not assume or require any previous computer experience.

APL is considerably different from other programming languages (BASIC, FORTRAN, PL/I, etc.), and much discussion has centered around the language and its use. Many claims have been made that it greatly increases programming productivity.

Participants should have the use of a P, U, or C account together with a VM/CMS user identification (available in Room 229 Computer Building).

News in Brief

Dr. Wise honored for educational contributions

Dr. Helen D. Wise, University Trustee, was one of two people honored at the 34th annual citation luncheon of the All Pennsylvania College Alumni Association of Washington, D.C.

Also cited this year was the Rev. Henry J. McNulty, chancellor of Duquesne University.

The luncheons, which honor graduates and presidents of Pennsylvania's post-secondary institutions, are given each year for people who have made outstanding contributions to education and the preservation of American ideals.

Dr. Wise, of Dover, Del., is executive director of the Delaware State Education Association. She is a former president of the National Education Association and for many years taught in the State College schools. She also was a state representative in Pennsylvania.

As a Penn State Trustee, she helped to establish the Renaissance Fund and served on its board of directors.

Dr. Wise — who holds Penn State bachelor's, master's and doctoral degrees — was president of the Pennsylvania State Education Association in 1969.

Vergil conference features seven speakers

To commemorate the 2,000th anniversary of the death of the great Latin poet, Vergil, the University is holding a conference on Friday and Saturday, March 26 and 27.

Vergil lived from 70 to 19 B.C. The anniversary calculation is based on the fact that there was no year zero. Speakers include Allen Mandelbaum of the CUNY Graduate Center, winner of the National Book Award for his translation of *The Aeneid*, and Elizabeth Block of the Department of Classics at the University of Pennsylvania.

Dr. Mandelbaum will speak on "Vergil at the Gates of Speech and Silence" Friday at 4 p.m. in Room 112 Kern. Dr. Block's topic is "Vergil and his Readers," and she will talk on Saturday at 4 p.m. in Room 101 Kern.

Five University faculty members will also present papers on Saturday, all in Room 101 Kern. John Adams, assistant professor of classics, will discuss "Vergil and Cornelius Gallus" at 10 a.m. Dr. Gerard J. Braut, professor of French, will speak on "Vergil and Twelfth-Century French Literature" at 10:45 a.m. "Dante's Vergil: Symbolic Levels" will be the subject of Alfred A. Triolo, associate professor of Spanish and Italian, at 11:30 a.m.

After lunch, at 2 p.m., Robert W. Carrubba, professor of classics and associate dean of the Graduate School, will discuss "Horace's Propemtion to Vergil (*Odes* 1, 3)." He will be followed by Ralph W. Condee, professor emeritus of English literature and humanities, who will talk at 2:45 p.m. on "Homer/Vergil—Vergil/Milton? Perhaps."

Thomas F. Magner, Liberal Arts associate dean for research and graduate study, will open the conference.

Curator to speak

Mary Panzer, guest curator of a photographic exhibit, "Philadelphia Natural Photography, 1865-1906, at the Yale University Art Gallery, will present the second lecture in the History of Photography Events Friday, March 26, at 3:30 p.m. in Room 101 Kern.

Her topic is "Turn-of-the-Century Naturalistic Photography: Philadelphia School."

Sir Nevill Mott

Nobel Laureate will deliver Mueller Lecture

Sir Nevill Mott, 1977 Nobel Laureate in Physics, will present the fourth annual E.W. Mueller Memorial Lecture Friday, March 26, at 8 p.m. in Room 117 Osmond Laboratory.

The lecture, entitled "Conduction in Non-crystalline Materials: Solved and Unsolved Problems," is sponsored by the Department of Physics.

Sir Nevill was Cavendish Professor of Physics and director of the Cavendish Laboratory at Britain's Cambridge University at the time of his retirement in 1971. It was at Cambridge that he did the research for which he shared the Nobel Prize. This research, on electronic properties of non-crystalline materials, underlies advances in computer memories and other electronic devices.

An associate of many of the early giants of modern physics, Sir Nevill studied in Lord Rutherford's laboratory as an undergraduate and later under Niels Bohr in Copenhagen and Max Born in Göttingen. He was on the physics faculty at Manchester University with W.L. Bragg, on the mathematics faculty at Cambridge and in 1933 was elected to the chair of theoretical physics at the University of Bristol. He joined the Cavendish Laboratory in 1954.

The Mueller Lectures honor the memory of Dr. Erwin W. Mueller, who was an Evan Pugh professor of physics. Dr. Mueller was the inventor of the field ion microscope, which enabled him to be the first person to "see" an atom.

PSU freshmen's grades top national average

This year's freshman class at University Park had high school grades well above the average for U.S. college freshmen, an American Council on Education (ACE) study shows.

Some 64 percent of the University Park freshmen had high school grade point averages of A- or better. Only 27 percent of the national sample did.

Last year, 63 percent of the University Park freshmen had averages that high.

The study is done annually and is conducted by the Cooperative Institutional Research Program of the ACE. This year about 192,248 college freshmen from 368 institutions, including nearly 1,600 students at University Park, were asked to participate.

Only first-time, full-time college freshmen at public institutions were included. Nationally, the response rate was about 75 percent. At University Park, it was about 45 percent.

Among other findings, according to Penn State's Office of Planning and Budget, were that:

- Over the past two years, freshmen borrowing through Federal Guaranteed Student Loans has increased dramatically at University Park. In 1979, 24 percent of the freshmen there borrowed \$500 or more. In 1981, 49 percent did so.

- Also, 36 percent of the 1981 University Park students borrowed \$2,000 or more.

Seventeen percent of the national sample borrowed that much.

- Seventy-four percent of the 1981 University Park freshmen said they chose Penn State for its academic reputation. Nationally, only about 57 percent of college freshmen said they chose their schools for that reason.

- Twenty-eight percent of the University Park freshmen planned to major in engineering. Fourteen percent planned to major in business.

German film series bringing key works

A New German Cinema Series, featuring key films from Germany's most influential directors, is being sponsored during Spring Term by the Student Film Organization and the Film Faculty from the Department of Theatre and Film. Most of the films in the series will be receiving their first Central Pennsylvania screening.

"The West German cinema is the most acclaimed in the world today," says Dr. William C. Uricchio, assistant professor of film. "In setting up the series, we have tried to select representative works by a variety of directors, and we will distribute program notes on each film."

Two films by Werner Herzog will be shown. Tonight (Thursday) and tomorrow, *Heart of Glass* will be screened at 7 and 9 p.m. *Sirozki* is scheduled on May 6.

Rainer Werner Fassbinder is represented by *Satan's Brew* on April 15 and 16 and by *The Third Generation* on May 13 and 14.

Reinhard Hauff's *Knife in the Hand* will play April 1; Uwe Brandner's *I Love You, I Kill You* on April 8 and 9; Volker Schlöndorff's *Young Törless* on April 22; and Peter Handke's *The Left Handed Woman* on April 29 and 30.

The films are subtitled in English. *Knife in Hand*, *Young Törless* and *Sirozki* will be shown in Room 112 Chambers. The others can be seen in the HUB Assembly Room. Consulting the INTERCOM calendar for screening times.

Rev. Coffin visiting

The Rev. William Sloane Coffin Jr., well-known peace activist and senior minister of the Riverside Church in New York City, will present two programs at the University today (Thursday).

He will conduct a worship and prayer service on the nuclear proliferation and peace issues at 4 p.m. in the Music Building rectal hall. At 8 p.m. in Schwab Auditorium, he will discuss how the peace issue relates to the Judeo-Christian faith.

Dr. Coffin, 58, is a graduate of Yale University and the Yale Divinity School. His visit is sponsored by the Office of Religious Affairs.

IDP series focusing on communication

The Instructional Development Program 1981-82 integrated workshop series, "Communication: The Faculty-Student Connection," continues with three Spring Term seminars. The term's theme focuses on the impact of environmental factors on the communication process.

The first of the informal sessions, which will provide general background materials, will be offered at three different times in Room 305 HUB March 30 from 9:30 to 11 a.m., March 31, 1-2:30 p.m. and April 1, 3-4:30 p.m.

The second seminar, "Utilizing Large Classroom Environments," will be held April 13 from 3 to 4:30 p.m. and April 14 from 9:30 to 11 a.m. The final sessions, describing the interface between environment and motivation, are scheduled for April 28 from 9:30 to 11 a.m. and April 29 from 3 to 4:30 p.m.

The sessions are designed to include a good deal of faculty participation. In addition, the IDP prepared supplementary

materials which are distributed to seminar participants or are available on request from the IDP. For additional information and/or reservations, call the IDP at 863-2599.

Williams to appear as Dickens March 31

The Artists Series will present "Emlyn Williams as Dickens" Wednesday, March 31, at 8:30 p.m. in Schwab Auditorium.

Emlyn Williams, the Welsh actor who bears an uncanny resemblance to novelist Charles Dickens, will present an array of Dickens' characters in a one-man show that is marking its 30th anniversary this year.

Currently on an American tour that included a sell-out season on Broadway, Mr. Williams first performed as Charles Dickens in 1951. Since then, he has taken Dickens — and his other one-man show, "Dylan Thomas Growing Up" — on tour throughout the world.

Tickets are on sale at Eisenhower Auditorium box office weekdays from 9 a.m. to 4 p.m., beginning today (March 25). The HUB booth will be open on March 25 only. Telephone orders will be accepted on MasterCard or Visa at 865-0255.

Piano recital Monday

A piano recital will be presented by Keith Ward, instructor in music, Monday, March 29, at 8:30 p.m. in the Music Building rectal hall.

Mr. Ward will play the Mozart Fantasy, K. 475; Six Short Piano Pieces (opus 19) by Arnold Schoenberg; Sonata No. 4, opus 30 by Scriabin; and Brahms' Variations and Fugue on a Theme by Handel, opus 24.

Names sought for Hetzel, Walker awards

Nominations of outstanding seniors at the University are being sought for the Erik A. Walker Award and the Ralph Dorn Hetzel Memorial Award.

The Walker Award recognizes a senior whose activities and achievements have enhanced Penn State's reputation. It is presented at Spring Term commencement, although the winner may have graduated the preceding Summer, Fall or Winter term.

The Hetzel Award recognizes outstanding seniors who have demonstrated responsible leadership in their college careers and potential for future public service.

Nomination forms, which are due in the Office of the Vice President for Student Affairs by April 2, are available in the deans' offices of the Colleges.

Shenango Valley

(Continued from page 1)
written extensively on those topics, and has held a number of federal and state grants to conduct research in those areas.

Dr. De Sanctis currently is assistant professor of education and chair of the Organization and Leadership faculty in the Ed.D. Program at Southern Illinois. He joined that university in 1978.

He completed his doctorate in educational administration and supervision at Rutgers University in 1970. He holds a bachelor's degree in social studies from William Peterson College and a master's degree, also in social studies, from Montclair State.

Chairman of the national Commission on Adult Basic Education in 1974, he is a member of the editorial boards of two journals, *Adult Literacy and Basic Education* and *Setting the Pace*.

Health Education faculty cited for research output

The Health Education faculty in the College of Health, Physical Education and Recreation at the University has received high marks for research productivity, according to a national study.

Funded by the University of Toledo, the study was conducted by James Price of that university and Mohammed Forouzesh of the University of Illinois. The researchers assessed those faculty members and institutions which have had the deepest impact in the field of Health Education from 1970-79. The measures were the quantity of publication in selected journals and presentations at national conventions.

In the category "Colleges and Universities Whose Professors Have Published Most Often in Health Education Journals," Penn State ranked fifth with 40 publications. Ahead of it were the University of Maryland, 58; Ohio State University, 54; University of Illinois, 51; and Johns Hopkins University, 44.

In the category "Authors Who Have Published Most Often in Health Education Journals 1970-79," Dr. Richard St. Pierre, head of the Department of Health Education at Penn State, ranked 12th with nine publications. The leaders in the group had 13 publications.

It should be noted that, in both categories, the figures do not reflect the totality of publications. They reflect only the articles published in what the researchers determined to be the three major health education journals currently available.

Search committee seeks nominations for CES deanship

The Advisory Search Committee for the Associate Dean of Academic Affairs for the Commonwealth Educational System has been appointed by Dr. Robert Scannell, vice president and dean, to assist him in identifying candidates.

The members from the Commonwealth Campuses are Sara Lou Whildin, associate librarian, Delaware County, chairperson; Harold Auzand, associate professor of history, Hazleton; Annette Caruso, assistant professor of health education, Ogontz; John Furlow, associate director for academic affairs, Dubois; Vernon Shockley, director, Mont Alto; Mark Smith, chairman, Council of Branch Campus Student Governments; and August Simonsen, assistant professor of environmental science, McKeesport.

Other committee members are: Robert Carrubba, associate dean of the Graduate School; George Biewler, associate professor of electrical engineering, University Park; Frank Montgomery, assistant director, Division of Administration and Field Services; G. Kenneth Nelson, faculty director, Associate Degree Program, Business Administration; and Helen Snyder, associate professor of educational psychology, University Park.

The announcement of the search has been advertised nationally. Members of Penn State's faculty and staff interested in submitting nominations or applying for the position should do so by April 8. Applications and letters of nomination should be directed to Dr. Robert J. Scannell, Vice President and Dean, Commonwealth Educational System, 111 Old Main Building, University Park, PA 16802.

Computer science senior Virginia Chrupalyk shows a visitor the "Joe Paterno computer."

Pitt alumnus gives computer to Penn State in tribute to Paterno's coaching philosophy

At Penn State's Computation Center, the big gray box is known informally as "the Joe Paterno computer."

The IBM System/370 Model 158 is now carrying approximately 10 percent of the University's instructional load — because a Pitt alumnus conceived a profound respect for Paterno's coaching philosophy.

The alumnus, George J. Prussin, is president of the Sha-Lit Leasing Associates and an agent for both Pitt's and Penn State's football teams.

One morning last fall, Penn State's Department of Purchasing received a letter from Mr. Prussin announcing his intent to donate a computer to Penn State "for use by its college students." Mr. Prussin wrote:

"... even though Penn State is Pitt's biggest rival, I have a close feeling toward them because their coach, Joe Paterno, is

truly dedicated to the students in that he wants more than a winning football team — he makes sure every player on his squad knows that he is not at Penn State just to play football. He instills personal pride and the knowledge that football is not the only way of life into all of his players. . . ."

"Previously, our largest computer had been serving the needs of something like 12,000 students every term," says Dr. Donald T. Laird, director of the Computation Center. "This load continues to grow as more and more students are given course assignments requiring computer time."

"Now we will be able to free about 10 percent of the capacity of our main computer. We are hopeful that 'the Joe Paterno computer' will support as many as 150 students simultaneously."

GRAPHIC ARTS COORDINATOR, UNIVERSITY ARTS SERVICES, UNIVERSITY PARK — Responsible to the Director, Artists Service for all graphics used in promotion of Artists Series exhibitions. Conceive, design, and execute displays, brochures, posters, banners, and the like. Reviews graphics for advertisements. Supervises and instructs students and other part-time graphic employees as required. Bachelor's degree, or equivalent in art plus one to two years of effective experience in applied graphic and printing arts.

DIRECTOR OF PAUL ROBESON CULTURAL CENTER, OFFICE OF STUDENT AFFAIRS, UNIVERSITY PARK — Responsible for initiating and developing programs and activities which will aid in the adjustment of minority students to University life and also promote mutual understanding and cooperation by providing a forum where students, staff and faculty of all ethnic groups can meet and interrelate. The Director also provides general supervision and direction of the center and coordinates activities with other campus academic and student organizations. Master's degree or equivalent in higher education student personnel administration or related area, plus one to two years of effective experience in student personnel administration, or bachelor's degree plus two to three years of effective experience. Individual with knowledge of student personnel services and general business administration procedures is preferred. Demonstrated ability to supervise, train and direct professional and clerical employees is required.

DIRECTOR OF OPERATIONS, DAIRY HERD IMPROVEMENT PROGRAM, COLLEGE OF AGRICULTURE, UNIVERSITY PARK — Responsible to the Associate Dean of Administrative Services and to the Pennsylvania Dairy Herd Improvement

Association's (DHIA) Board of Directors for providing overall effective and efficient leadership and direction of the total DHIA Program in the major areas of Office Services, Field Services, Laboratory Services, Record Processing and Special Services. Insure that the mission of the Dairy Herd Improvement Program through The Pennsylvania State University is carried out. Delegate responsibilities to subordinates to achieve efficient operations. Interface with Management Services on all data processing needs of the DHIA. Assist county, district and state organizations in their efforts to increase the effective use of DHIA records and aid the flow of information to the National Cooperative Dairy Herd Improvement Program. Responsible to ensure that the Genetic Milk Testing Laboratory is meeting the needs of the DHIA. A bachelor's degree or equivalent in agriculture, preferably in dairy science, plus more than seven (7) and up to and including ten (10) years of effective management and supervisory experience in a large multi-faceted auxiliary enterprise or business, are required.

Affirmative Action notice for the handicapped

The Pennsylvania State University is a government contractor subject to Section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals.

If you have a physical or mental impairment, a record of having had such an impairment, or are regarded as having an impairment that substantially limits your ability to secure, retain or advance in employment, we would like to include you under the Affirmative Action Compliance Program.

It will assist us in proper placement and appropriate accommodations if you tell us about (a) any special methods, skills, or procedures which qualify you for jobs that you might not otherwise be able to do because of your impairment, so that you may be considered for any position of that kind, and (b) possible accommodation which could be made which would enable you to perform the job properly and safely.

We will also aid in "identifying" individuals requiring assistance in the interest of life safety for the development and execution of emergency evacuation in all buildings of the Pennsylvania State University, Main Campus and Commonwealth Campuses. Compliance shall be on an individual, voluntary basis.

Submission of this information is voluntary and refusal to provide it will not subject you to discharge or disciplinary treatment. Information obtained concerning individuals shall be kept confidential, except that (1) supervisors and managers may be informed regarding restrictions on the work duties of handicapped individuals, and regarding necessary accommodations, (2) first aid and safety personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment, and (3) government officials investigating compliance with the Act shall be informed.

The Affirmative Action Office is responsible for the coordination of compliance with the requirements of Section 503. If you are a handicapped individual and would like to be considered under the affirmative action program, please contact the Affirmative Action Office (814/863-0471 or 433-0471).

Tying contest open to Penn State staff

Penn State secretaries might like to test their skills in the "World's Fastest Typist Contest," which is being held before and during Professional Secretaries Week, April 18-24.

Secretaries can enter right at their own typewriters, and the top scorer from each community wins a three-day trip to the type-off finals in Baltimore. More than \$6,000 in cash and prizes will be awarded.

Information can be had by writing Staff Builders, Dept. PA-212, 122 East 42nd St., New York, N.Y. 10168.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., April 1, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with *Fair Employment Practices (FES-1)* and in compliance with the University's *Affirmative Action Compliance Program*, without regard to race, color, religion, national origin, handicap (as provided by law, sex, or status as a disabled or Vietnam era veteran).

DIRECTOR OF PUBLIC RELATIONS, COLLEGE OF MEDICINE, HERSHEY — Responsible to the Provost and Dean, through the Associate Provost and Dean, for the conduct of the Medical Center public relations functions, to include the administration of budget(s) and staff required to gather, process and disseminate Medical Center information and news. Bachelor's degree in journalism or English or a related field or equivalency plus four to five years of effective experience.

ASSISTANT DIRECTOR, PSYCHOLOGY CLINIC, COLLEGE OF THE LIBERAL ARTS, UNIVERSITY PARK — Coordinate counseling services of the Psychology Clinic with Centre County Office of Mental Health-Mental Retardation, supervise clinical work of advanced graduate students, provide liaison with agencies providing clerkships for Psychology graduate students, provide professional assistance to Community Living Arrangement staff, teach graduate course in clinical assessment, implement record-keeping and evaluative procedures employed by the Clinic. Doctorate in clinical psychology from a program approved by the American Psychological Association plus a completed APA approved internship year. Fixed Term appointment for one year beginning July 1, 1982. Possibility exists for position to be renewed after review of first year's experience.

ACCOUNTANT, PROFESSIONAL REIMBURSEMENT, COLLEGE OF MEDICINE, HERSHEY — Responsible to the Manager of Professional Reimbursement for the management of all professional reimbursement functions, monitoring and interpretation of all pertinent regulations and legislation and maintenance of controls on third-party accounts receivables. A bachelor's degree in accounting, business administration or equivalency, plus two to four years of hospital accounting experience with emphasis on cost and budgetary reports and control.

From the Trustee Docket

July 1-Dec. 31 gifts up 27.8 percent over '81

During the second half of 1981, private giving to the University increased by 27.8 percent over the same period of 1980.

Dr. Richard E. Grubb, senior vice president for administration, informed the Trustees that private contributions for the period July 1 to Dec. 31 totaled \$6,815,765 — up from \$5,329,687 during the same period in 1980.

Corporate giving comprised the largest slice of the total — some \$3.3 million, he said. That was a 96.7 percent increase over the \$1.69 million given by corporations during the last half of 1980.

"In view of proposed and actual cutbacks in public funding agencies, we're especially pleased by this doubling in corporate giving," Dr. Grubb said.

He also noted that the number of gifts from alumni and friends increased from 17,651 in the last half of 1980 to 18,386 in the same period of 1981. Total giving by alumni and friends amounted to \$1,491,151 during the last half of 1981.

"We're reaching more and more alumni and friends with our message that their gifts — no matter what the amount — are important and do make a difference," Dr. Grubb said.

In addition, foundations and organizations gave more than \$1.7 million during the last half of 1981. Deferred giving, primarily bequests, added an additional \$200,251.

Most gifts — more than 95 percent — are used for special purposes specified by the donor. Student aid and enrichment of educational programs are two major areas that receive support. Undesignated contributions are allocated to a limited number of special projects.

Escalating costs force room and board fee rise

An increase in student room and board charges, effective with the 1982 Fall Term, was approved by the Board.

"We have done our best to keep charges to a minimum, but escalating costs have forced us to increase them 11.6 percent," Dr. Oswald told the Trustees.

"As you know, the residence and dining halls do not receive State funds. They are a self-sufficient operation, and must break even. Although we are constantly looking for ways to cut costs, it is inevitable that students will have to pay some of the difference as the costs of goods and services rise."

Dr. Oswald noted that increases of at least 11 percent are expected for 1982-83 in many residence and dining hall expenses. For example, he said, University Housing and Food Services expects to pay 20 percent more for fuel oil, 25 percent more for gas and 19 percent more for electricity at the University Park Campus in 1982-83.

Comparable increases in those and other categories are expected at other Penn State campuses.

Under the new rates, an undergraduate double room will cost \$758 per term, an increase of \$79 over the present rates. The rate for an academic year of three terms will be \$2,274. The cost of a single room with board will increase from \$729 to \$815 per term.

Included in the \$79 increase are \$32 for the room, \$43 for meals and \$4 for the counseling fee included in overall residence hall costs.

Room and board for graduate students will increase from \$680 to \$763 per term for double rooms and from \$730 to \$820 for singles. Graduate students who do not use campus dining halls will pay \$367 for double rooms and \$422 for singles.

Rooms for graduate students electing to use food coupons will be \$442 for a double and \$492 for a single.

Rates for Atherton Hall apartments for graduate students at University Park have

increased to \$502 for a single with shared bath, \$532 for a single with bath and \$696 for a double-size with bath.

Meade Heights housing will increase to \$390 for a four-person house and \$430 for a three-person house.

Family housing apartments, charged on a monthly basis, have the following new rates: Eastview Terrace, one bedroom — \$175, two bedroom — \$198; Graduate Circle, one bedroom — \$184, two bedroom — \$208; Capitol Campus, one bedroom — \$215, two bedroom — \$228.

Apartments at University Manor at the Milton S. Hershey Medical Center will increase by an average of 8.5 percent.

Other apartments in the Penn State system have increased at varying rates.

Alumni support fund raising, recruitment

The Penn State University Alumni Association's newest experiment — a corps of students called Lion Ambassadors — is "the most exciting new project we have undertaken in many years," Association President Richard A. Zimmerman of Hershey, said in his annual report to the Board.

"Lion Ambassadors is designed to personalize college life for the students and also to inculcate the understanding that their involvement with Penn State does not end with graduation," Mr. Zimmerman said.

Selected competitively, the 61 Lion Ambassadors lead guided tours of campus, host and help to counsel prospective students and assist Penn State's minority recruiting officers in Pittsburgh and Philadelphia. They also travel to various Penn State clubs to update alumni on University activities, and work in fund-raising phoneathons.

The project, Mr. Zimmerman said, is only one example of the Alumni Association's increased support for University fund-raising and student recruitment goals in 1981.

The Association also concentrated on strengthening its constituent societies — alumni groups in the various academic colleges and on several of the Penn State campuses.

"An alumni society began functioning at the McKeesport Campus, bringing to six the number of Campuses that now have formal societies," Mr. Zimmerman observed, adding that Berks Campus is working very hard at becoming the seventh.

Mr. Zimmerman said the parent Alumni Association will hold a professional development conference for more than 200 directors of the college constituent societies on April 16. Next year, it will do likewise for directors of the campus societies.

Other activities of the Association that he cited were:

— Through its more than 130 Penn State clubs, the Association increased its efforts to help identify outstanding prospective students for Penn State.

"We now have more than 300 alumni volunteers who have received training from the Admissions office and are helping in this endeavor, especially outside of Pennsylvania where Admissions office recruiters cannot travel so easily," Mr. Zimmerman said.

— The Association worked with the Undergraduate Student Government on a summer jobs project for students. Members wrote to 13,700 selected alumni, asking if their businesses might provide summer jobs to Penn State students.

— More than 350 people participated in the Association's second Alumnae Day conference on current issues affecting women.

— The Association increased its membership by more than 4,000 in 1981. Nearly one-fourth of all living alumni are members.

"It should also be noted that during

Winter Term commencement two weeks ago, the total number of Penn State alumni went over the 250,000 mark," Mr. Zimmerman told the Trustees. "That means that one in every 1,000 Americans is a Penn State alumnus or alumna."

Geography professorship, fellows fund established

A professorship in geography and a new faculty fellows fund will be established at the University through a bequest to be made by friends of the University.

A full-time professor of geography who has excelled in teaching and research will be chosen by the president of the University to fill the professorship. Recommendations will be made by the dean of the College of Earth and Mineral Sciences.

For the faculty fellows fund, professors or associate professors in the College of Earth and Mineral Sciences who are under 50 years of age and have excelled in teaching and research will be selected.

The faculty fellow will be appointed to a five-year, non-renewable term by the president of the University. Candidates will be recommended by the dean of the College of Earth and Mineral Sciences.

In both cases, candidates should be people with the potential to make outstanding contributions in their fields.

Business option added to Spanish, German majors

New options to prepare students for careers in international business have been added to the majors in Spanish and German. They parallel a highly successful program in business and French instituted six years ago.

"We see this as an ideal marriage between the liberal arts and professional training," Provost Eddy told Trustees. "Although language enrollments have been declining at most universities, the need for business professionals with solid language training is becoming more and more apparent."

He noted that the Modern Language Association conducted a survey a few years ago among U.S. business and industry representatives. Nearly 70 percent of the respondents said they use, or expect to use in the future, people with foreign language skills.

"One year after the program in French and business was instituted at Penn State, enrollments in the Department of French had increased by 15 percent. They've gone even higher since then," Dr. Eddy said. "Graduates of that program have been highly successful in finding jobs with IBM, Xerox and other corporations that do business abroad."

Penn State's French-business program was one of the first of its kind. More recently, a number of similar programs have been established at other universities.

Dr. Eddy said the U.S. business community came under fire for its lack of language proficiency two years ago, after the release of a report prepared by the President's Commission on Foreign Language and International Studies. The commission found "scandalous incompetence" in foreign languages among U.S. citizens.

Students who enroll in the business options at Penn State will complete required business and management courses, in addition to language courses that emphasize speaking, writing and translating skills.

No new University funds were required for the options, Dr. Eddy said. They become effective immediately.

Dam, gravesite, stadium construction plans okayed

Trustees have approved final plans for several construction projects. They also approved the obtaining of bids and awarding of contracts for the projects.

One job involves raising the height of the Shaver Creek Dam and its spillway walls by two feet. This is in response to a study done by Berger Associates, dam consultants.

Following an inspection by the U.S. Army Corps of Engineers in April 1979, it was determined that the Shaver Creek Dam at the University's Stone Valley Recreation Area needed alterations to bring it into compliance with the requirements of the 1978 National Dam Inspection Program.

The planned construction will do that, according to Ralph E. Zilly, vice president for business. The work is expected to cost approximately \$75,000.

Also, the Trustees approved plans for a 650-square foot block building to be built beneath the stands at Beaver Stadium. The building will be used as a safety services facility during football games and other events at the stadium.

It will feature a radio communications room, briefing area and public area. It will replace several temporary construction trailers that have been used by University, State College Borough and Pennsylvania State Police personnel for years. The cost is expected to be approximately \$30,000.

Another project is to accentuate the gravesite at University Park of Dr. George W. Atherton, often said to be one of the University's greatest presidents.

Dr. Atherton is buried beside Schwab Auditorium. The proposed memorial will feature a granite wall and bench, sculpture relief and lettering and new landscaping around the gravesite.

The design has been contributed to the University by the architectural firm of Marcel Breuer Associates. Herbert Beckhard, a partner in the firm, is a Distinguished Alumnus of the University. The construction will cost an estimated \$54,200 from undesignated funds given to the University. No tuition or tax dollars will be used.

President Atherton, whose Penn State tenure began 100 years ago and ended in 1906 after 24 years on the job, is regarded by many as Penn State's "second founder" since the school experienced its first substantial growth during his term.

The Trustees also okayed construction of two gazebos on campus as part of a campus beautification effort, to be built from private gifts given to Penn State for that purpose. One will be on the grounds of the University House used for formal receptions and other gatherings. A second one will be on the lawn of the Hetzel Union Building near Atherton Residence Hall.

Three architectural firms selected for projects

Three architectural firms were approved by Trustees for planned construction projects.

The approval followed recommendations to the Trustees by the University's Architect/Engineer Selection Sub-committee.

The firm of Dagitt-Saylor of Philadelphia was chosen to design the proposed Agricultural Arena to be located along Fox Hollow Road adjacent to the Department of Agriculture's Meat Animal Evaluation Center near Beaver Stadium.

The arena is planned as a facility that will host student resident instruction activities in the College of Agriculture, such as the annual horticulture show and various animal shows. It also will be available for some use by the general agricultural community in Pennsylvania.

The firm of John C. Haas, Associates, was approved to design demonstration units for student apartment housing on campus. A preliminary option would be for 36 individual apartments to house a total of 144 students. Four students would live in each apartment. Each living unit would contain four bedrooms, a living room, bath and kitchen-dining area.

The design is for model residence hall units that could begin to replace the

(Continued on page 7)

(Continued from page 6)

Nittany Residence Hall units, designated as "temporary" since World War II.

Last September, the Trustees applied for \$3.48 million in low-interest federal loan funds to build student apartments. The request was denied. It was decided, however, to proceed with design work in the event that the University should, at some future time, find construction financially feasible.

Williams/Trebleck/Whitehead of Pittsburgh is the firm approved to design a planned 40,000 square-foot multi-use building that will be shared by the University Libraries, the Theater Arts Production Studio, the Combustion Lab and the Mine Safety Lab.

The structure is planned for a site at the corner of Bigler Road and Hastings road on campus. It will serve as storage and work space for the four units of the University that will share it. The present Theater Arts Production Studio, located in the Nittany Residence Hall area, is scheduled to be razed.

87 percent of Hershey's freshmen from State

Eighty-seven percent of the first-year students in Penn State's College of Medicine (class of 1985) are Pennsylvania residents.

A significant number will practice medicine in the Commonwealth after they graduate and complete their program in graduate medical education, Hershey Provost and Dean Harry Prystowsky told the Trustees.

"About 50 percent of these students — members of the class of 1985 — came from communities of less than 20,000 people," Dr. Prystowsky noted. "They represent 30 Pennsylvania counties."

Traditionally, he said, the Penn State College of Medicine has drawn much of its student population from small towns. Those students tend to return to small communities to practice medicine, and many choose to be primary care practitioners.

The class of 1985 included 77 men and 21 women. Most majored in chemistry, biology and other science-related fields as undergraduates. Ten percent, however, were not science majors. Dr. Prystowsky said.

The students hold undergraduate degrees from 55 colleges and universities. Four have pursued graduate study.

Dr. Prystowsky also noted that 44 percent of the resident physicians at the Medical Center are training for careers in primary patient care (family medicine, general medicine and pediatrics). Twenty percent are graduates of Penn State's College of Medicine.

Bikers to share mall

A mall at University Park Campus will be turned into a shared bikeway and sidewalk.

The mall extends from College Avenue near Pugh Street past the Henderson Human Development and McAllister buildings.

"This is the result of a survey of bicycle traffic on campus conducted by University Police Services," explained Ralph E. Zilly, vice president for business. "We concluded that no separate bikeway needed to be built on campus."

The shared bikeway/sidewalk will be clearly marked, he noted. Bicycle traffic through the rest of campus will continue to use campus roads and parking areas.

Book to serve on presidential search body

The Trustees named Edward R. Book of Hershey to the University's Trustee Presidential Selection Committee.

The committee is one of two guiding the search for a successor to President Oswald.

The action was taken at the request of

Walter J. Conti of Doylestown, the president of the Board of Trustees, who also serves on the committee. Mr. Conti said he thought it important that all major officers of the Board serve on the committee.

Three Behrend faculty give royalties to College

A Natural Sciences and Engineering Grant-in-Aid has been established to encourage enrollment in the natural sciences and engineering curriculum at Behrend College.

Funding will be contributed annually by associate professors of mathematics Roland E. Larson and Robert P. Hostetler, and mathematics instructor David E. Heyd.

The three, all at the Behrend College, are donating part of the royalties from a calculus text they co-authored. Any student planning to graduate from the College with a degree in natural sciences and engineering is eligible for the grants.

All grants will be awarded for one year only by the scholarship committee of the College. Candidates will be named by the Division of Natural Sciences and Engineering.

MacKenzie fund honors CBA doctoral student

The Ossian R. MacKenzie Doctoral Award Fund has been established to honor the doctoral student who shows promise as an outstanding teacher in business administration.

Family, friends and colleagues of the late Dr. MacKenzie contributed the initial principal of the fund as a memorial to the former dean of the College of Business Administration.

Schuylkill activity center project advances

The Trustees authorized the University to obtain bids and award contracts for construction of a Student-Community Activity Center at the Schuylkill Campus.

The action came after approval of the final plans for the project, which were prepared by the architectural firm of Levkulic and Bosak.

The center will contain a 260-seat auditorium-lecture room, a bookstore, food service/student lounge area and activities room. It is expected to cost approximately \$1 million. A successful fund drive in the Schuylkill Campus service area raised more than \$680,000 toward the project, according to Dr. Wayne D. Lammie, campus director.

If bids can be received and awarded on schedule, construction could be completed by 1983 the Trustees were told.

Five options added to Capitol math major

The major in mathematics science at Capitol Campus has been revised to include five options of study.

Provost Eddy told the Board the options previously were informal "areas of interest," but now are formal areas of concentrated study within the major.

They are actuarial science, computer methods, management science/operations research, mathematics and secondary education in mathematical sciences.

"These options are designed to help fill the demand for qualified people in specialized areas," Dr. Eddy said. "As such, they will require specific mathematical science courses and other courses closely related to the field of study."

In describing the five, Dr. Eddy observed that:

— the actuarial science option prepares students to work in the insurance industry;

— the computer methods and the management science/operations options

both prepare students to apply mathematical science to problems involving the computer and to management problems;

— the mathematics option gives students the background required for graduate study; and

— the secondary education mathematical science option trains students to teach in secondary schools.

Christoffers Scholarship for varsity players

The William F. and Katherine W. Christoffers Scholarship has been created to provide financial assistance to outstanding members of the varsity football squad.

The fund principal was donated by Mr. and Mrs. Christoffers of State College. Mr. Christoffers, a 1943 Penn State graduate, is vice president emeritus for fiscal affairs at the University.

Appropriation

(Continued from page 1)

purchasing power per student has declined significantly," he said.

"Inflation has increased by 92 percent during this period, while our appropriation has increased by only 60 percent," Dr. Oswald explained. "At the same time, our enrollment has increased by more than 20 percent. In effect, we have received no additional funds to support increased enrollment."

In "real dollars," he added, the University is operating with a per-student appropriation that has actually declined by almost 27 percent, from \$1,512 to \$1,109.

"If additional resources are not provided for 1982-83, it is clear that once again it will be necessary to increase tuition rates beyond the 5 percent included on the income side of our budget," President Oswald said.

For 1981-82, the President noted, Penn State received a per-student appropriation of \$2,147 (in today's dollars), which is \$739 less than the average appropriation per student for all other publicly supported four-year institutions in Pennsylvania.

"As the Joint State Government Commission clearly indicates in its 1981 report (commonly known as 'The Snyder Report'), Penn State offers the most cost-effective educational programs of any State-owned or State-related institution in the Commonwealth," Dr. Oswald said.

To offset the problems of inflation, Dr. Oswald observed, the University is stressing effective management.

Since 1971-72, he said, more than \$25.6 million has been "pulled back" from operating budgets and reallocated to areas of greater need.

"All existing academic programs and non-academic activities have been affected," he said. "We are determined to continue such examination and to reduce expenditures wherever possible through effective management."

"We must protect the quality of our educational program, however, and many of our units are extended to their outer limits or beyond in their responsibility to provide education of genuine quality," Dr. Oswald pointed out.

To help preserve the quality of academic programs, the President commented, nearly two-thirds of the budget reallocations have been made from non-academic units.

Nonetheless, he observed that "unavoidable" cost increases include those for fuel, utilities and other supplies and services, as well as growing retirement and Social Security costs, group insurance coverage, and essential salary and wage adjustments for employees.

Dr. Oswald further observed that the University cannot avoid costs for library books and materials, instruction and research equipment and the increased cost

of maintenance of the University's physical facilities.

He also stressed the impact of cuts in Federal aid.

"Because Federal financial aid is forward funded, the impact of the cuts already in place and those further cuts proposed will be felt during 1982-83," he explained.

Termining the reductions "a matter of the gravest concern," Dr. Oswald noted that "higher education accepts that it must do its part to help bring about national economic recovery, but the most recent Federal budget proposals would again cut financial aid to students by approximately 50 percent from the already reduced levels established by Congress last summer."

"On the brighter side," he continued, "I note that the Governor's budget includes a 9 percent increase in scholarship funds for PHEAA. This is most encouraging and I urge your support of this recommendation."

Another area of concern to President Oswald is the University's tuition rate. "Since 1972-73, tuition charges have risen sharply by 116 percent — higher than the 92 percent increase in the general rate of inflation and considerably higher than the 60 percent increase in State appropriations during the same period," he observed.

Tuition for College of Medicine students has risen even more sharply. Tuition for Pennsylvania residents has increased by 483 percent since 1971-72 (from \$1,000 to \$5,829 per year). Non-resident students pay \$9,105.

"I urge that the Legislature concur in the Governor's recommendation for increased support for medical education," he continued, noting that "such support is critical if we are to continue to meet the health care needs of the Commonwealth."

Penn State, he said, has made many valuable contributions to the Commonwealth, including recent achievements in medicine. He also mentioned that Penn State researchers have recorded successes in the areas of agriculture, natural resources, earth and mineral sciences, engineering, education, business and the arts.

But, he added, new challenges face Pennsylvania today.

"Food production, energy, the environment and health represent major problem areas for which Penn State's research programs seek solutions."

"Through its many research activities, the University is in a strong position to contribute toward solutions of many of today's challenges," Dr. Oswald said.

Alumni

(Continued from page 1)

In 1978 after serving as executive director of the Syracuse Clubs Club, Inc., and as a director of community relations for a hospital.

Ms. Kelly holds an M.P.A. degree from Syracuse University's Maxwell School of Citizenship and Public Affairs, where she was a Richard King Mellon Fellow. She has returned to campus before, lecturing and conducting workshops at the University's Alumnae Days in 1979 and 1981.

Dr. Chapman, a physicist major, attended Behrend for two years. His visit there is scheduled for April 5 through 8.

He earned his doctorate in astronomy at Harvard and has held a variety of high level positions at NASA's Goddard Space Flight Center, where he assisted with research for the Space Shuttle and is currently acting head of the Stellar and Cosmic Astronomy Branch.

Dr. Chapman, too, is active in Penn State and Behrend College affairs. He is a member of the board of directors of the College of Science Alumni Society and of the Society's executive committee. He was the speaker at Behrend's 1974 Graduation Ceremony.

University Park Calendar

March 25 — April 4 Special Events

Thursday, March 25

Office of Religious Affairs, The Rev. William Skoane Coffin, Jr., sr. minister, Riverside Church, N.Y.C., worship and prayer service on the nuclear proliferation and peace issue, 4 p.m., Music Bldg. recital hall. Discussion of how the peace issue relates to the Judeo-Christian faith, 8 p.m., Schwab.

Kern Classics, *Lords of Flatbush*, 7 and 9 p.m., 112 Kern.

New German Cinema, Herzog, *Heart of Glass*, 7 and 9 p.m., HUB Assembly Room.

Opera workshop performance, 8 p.m., Pavilion Theatre.

Friday, March 26

History of Photography lecture, 3:30 p.m.,

101 Kern. Mary Farnes, on "Turn-of-the-Century Naturalistic Photography: Philadelphia School."

Vergil Celebration, 3:30 p.m., 112 Kern. Dean Thomas F. Magner, Liberal Arts, "Introduction," 4 p.m., Allen Mandelbaum, CUNY Graduate Center, on "Vergil at the Gates of Speech and Silence."

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Thomas Hubka, prof. of architecture, Univ. of Oregon, on "Maine Farmers: The Connected Farm Architecture of Northern New England."

Commonplace Theatre, *For Your Eyes Only*, 7 and 9 p.m., 112 Kern. Also March 28.

Cinemateque, *Carnal Knowledge*, 7 and 9 p.m., 121 Sparks. Also March 27.

E.W. Miller Memorial lecture, 8 p.m., 117 Osmond. Sir N.F. Mott, Nobel laureate in physics, Cambridge Univ., on "Conduction in Non-Crystalline Materials: Solved and Unsolved Problems."

GSA Coffeehouse, 8 p.m., 102 Kern. Sports: softball, Lady Lion Invitational. Also March 27.

Saturday, March 27

Vergil Celebration, 10 a.m., 101 Kern. John Adams, classics, on "Vergil and Cornelius Gallus," 10:45 a.m., Gerard J. Brault, French, on "Vergil and Twelfth-Century French Literature," 11:30 a.m., Alfred A. Triolo, Italian, on "Dante's Vergil: Symbolic Levels," 2 p.m., Robert W. Carubba, classics, on "Horace's Propempticon to Vergil (*Odes* I, 3)," 2:45 p.m., Ralph Condee, English literature and humanities emeritus, on "Homer/Vergil's Vergil/Milton? Perhaps," 4 p.m., Elizabeth Block, Dept. of Classics, Univ. of Pa., on "Vergil and His Readers."

France-Cinema, Bergman, *Life of the Marionettes*, 7 and 9:15 p.m., 112 Kern.

Sports: lacrosse (men) vs. Syracuse, 2 p.m.; volleyball (men) vs. Ohio State, 2 p.m.

Sunday, March 28

Penn State Symphony Orchestra Young Artists' Concert, 3 p.m., Schwab.

Nursing Consultation Center, Brig. Gen. Hazel W. Johnson, chief, U.S. Army Nurse Corps, on "Update on the Corps," 5:45 p.m., Nursing Consultation Center, Human Development East.

Monday, March 29

Pass/Fail Keith Ward, pianist, 8:30 p.m., Music Bldg. recital hall.

Tuesday, March 30

Pass/Fail Instructional Development Program Workshop, "The Environment Communicates," 9:30-11 a.m., 305 HUB. Also March 31, 1:20-3:00 p.m., April 1, 3:40-5:00 p.m.

Lutheran Center for Campus Ministry, "Bach's Lunch," featuring Anita Bealer, noon, Eisenhower Auditorium.

Comp. Lit. Luncheon, 12:15 p.m., 204 HUB. Emily Groschold, philosophy, on "Angels, Language and the Imagination: Rilke and Baudelaire."

STS/Three Cultures Dialogue, 12:20 p.m., 101 Kern. Paul O. Woolley, Jr., health planning and administration, on "Utilitarian vs. Social Equilibrium Health Care Policies."

Amuse Series, *The Sound of Music*, 8 p.m., Schwab.

Monday, March 29

Div. Learning and Telecommunications Services, 3 p.m., 8 Mitchell, Bruce Adams, WPSX, on "Teaching America to Sing," a

"Secrets of the Gila" from Glenn Zweygard's Zoller show.

Wednesday, March 31

Drop deadline. Preregistration deadline for Summer 1982. Pass/Fail.

Course Repeat deadline. Commons concert, noon, Kern Lobby.

GSA Tax Workshop, 7 p.m., 101 Kern. Artists Series, Emlyn Williams as Charles Dickens, 8:30 p.m., Schwab Auditorium.

Sports: baseball vs. Bloomsburg (DH), 1:30 p.m.; volleyball (men) vs. Pittsburgh, 7 p.m.

Thursday, April 1

Commons Erikson Gallery Print Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 2.

Linguistics Symposium, 8 p.m., Keller. Maurice Gross, Univ. of Paris, on "Building Lexicons-Grammars for Romance Languages."

Kern Classics, *Hot Rock*, 7 and 9 p.m., 112 Kern. New German Cinema, Hauff, *Knife in the Head*, 7 and 9 p.m., HUB Assembly Room.

Museum of Art film, *The Fallacies of Hope*, 7 p.m., First Floor Gallery.

Sports: lacrosse (women) vs. Towson State, 3:30 p.m.

Friday, April 2

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Peter Haggitt, Univ. of Bristol, on "A Geographer Looks at Epidemics."

Linguistics Symposium, 6 p.m., Keller. James Harris, M.I.T., on "Theories of Phonological Representation and Nasal Consonants in Spanish."

Commonplace Theatre, *The French Lieutenant's Woman*, 7 and 9:15 p.m., 112 Kern. Also April 3.

Cinemateque, Sunday, *Bloody Sunday*, 7 and 9:15 p.m., 121 Sparks. Also April 3.

GSA Coffeehouse, 8 p.m., 102 Kern. Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium. Also April 4.

Sports: tennis (women) vs. Brown, 2 p.m.

Saturday, April 3

Deadline for May graduates to deliver doctoral theses to committees.

France-Cinema, Kury, *Peppermint Soda*, 7 and 9 p.m., 112 Kern. Also April 5.

Sports: baseball vs. Rutgers (DH), 1 p.m.; lacrosse (men) vs. Ohio State, 2 p.m.; volleyball (men) vs. Rutgers-Newark, 7 p.m.

Sunday, April 4

Penn State Glee Club and Queen's Choral, Rutgers Univ., concert, 3 p.m., Music Bldg. recital hall.

Sports: baseball vs. Mansfield (DH), 1 p.m.

Seminars

Thursday, March 25 Chemistry, 12:45 p.m., 333 Whitmore. Peter C. Vollhardt, UC-Berkeley, on "Transition Metal Catalyzed Carbon-Carbon Bond Formation."

Economics, 3 p.m., 101 Kern. Bennett T. McCallum, Carnegie-Mellon Univ., on "Recent Developments in Macro and Monetary Economics."

Philosophy, 4 p.m., 267 Willard. Henry W. Johnstone, Jr., philosophy, on "Anagnorisis and Truth."

Aerospace Engineering, 4 p.m., 232 Hammond. David Quam, Univ. of Dayton, on "Bionic Control in a Flight Simulator."

Ecology, 4 p.m., 8 Mueller. Stephen J. Beckerman, anthropology, on "Indigenous Agriculture in Amazonia: The Disadvantages of Interropping."

Monday, March 29

Div. Learning and Telecommunications Services, 3 p.m., 8 Mitchell, Bruce Adams, WPSX, on "Teaching America to Sing," a

one-camera documentary production of the 1980 Fred Waring Choral Workshop.

Entomology, 3:40 p.m., 204 Patterson. Stephen K. Wikel, School of Medicine, Univ. of South Dakota, on "Host Immune Responses to Ectoparasite Infestations."

MC38, 4 p.m., 101 Althouse. Dr. Michael Rosenblatt, Endocrine Unit, Mass. General Hospital, on "The Parathyroid Hormone: A Functional Map of the Hormone Molecule from Intracellular Transport to Receptor Interaction."

Tuesday, March 30 Geosciences, 3:45 p.m., 22 Deike. Gerard Demaison, Chevron Overseas Petroleum, on "Petroleum Source Beds: Environment of Deposition and Stratigraphy."

Plant Pathology, 3:45 p.m., 213 Buckhout. Alagacone Sankantha on "Tozzetti - Classic -9."

Thursday, April 1 Anthropology, 3:30 p.m., 107 Carpenter. Michele Hayward on "Linkage of Colonial Mexican Parish Records."

Physics, 3:50 p.m., 117 Osmond. M. Dresden, SUNY, on "H.A. Kramers and Quantum Theory."

Chambers Gallery: Junied Undergraduate Photo Show.

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Jacob Lawrence, opens April 4.

Kern Gallery: Ruth Kemper, recent watercolors, through March 28.

Lynette King, ceramics, through March 31. Marcelle Lapow Toor, painting on paper, through April 1.

Slavic Arts and Artifacts, opens April 5.

Museum of Art: Richard Hamwi, Works on Paper, through March 28.

David van Dommelen, Twenty-Five Years of Fiber Art, through March 28.

Photographs from the Museum's Collection. Director's Choice, Selected works from the Museum's Collection.

Sculpture and Sculptural Objects from the Museum's Collection, opens April 4.

Pattee Library: Rare Books Room: Vergil: 200 Years, through April 5.

East Corridor Gallery: Prints from the collection of the Arts Library, through April 6; Ed Leos, photographs, "Dorothy Roberts and her Poetry," opens April 6.

Main Lobby and Second Floor, East Pattee: A Tribute to Natalie Wood.

Lending Services Lobby: Judy Stern, portraits, West Pattee Lobby: Allyson Lush, paintings, prints and drawings.

Paul Robeson Cultural Center: "Twenty-Five Approaches to Contemporary Printmaking."

Visual Arts Bldg., Zoller Gallery: Glenn Zweygard, Alfred University, sculpture, through April 4.

Theatre students Randy Miles, Tim Lora and Susan Martinelli appear in scene from "Archy and Mehitabel."

Opera workshop to offer three productions

Trial by Jury, a Gilbert and Sullivan spoof on justice; *Archy and Mehitabel*, tales from the lives and loves of a cockroach and his female friend; and *La Serva Padrona*, a farcical saga of reconciliation and reunion between lovers, will be presented today (Thursday) through Saturday in the Pavilion Theatre at 8 p.m.

The three, one-act operas are a joint venture of the School of Music and the University Resident Theatre Company, and they represent the output of this year's opera workshop.

Bruce Trinkley, an associate professor of

music, directs the workshop and the music for these productions.

MFA candidate Rob Garber is directing *Trial by Jury*. For *Archy and Mehitabel*, which has been transformed into a jazz-style opera, Laurie Boyd, assistant professor of theatre, is serving as director.

Helen Manfull, associate professor of theatre, is stage director for Pergolesi's 18th-century comedy.

Tickets for the three operas can be purchased at the Playhouse box office. For information and reservations, call 865-1884.

Honors criteria changes before Senate

A proposal to change the criteria for graduation with honors and for Dean's List will be presented for legislative action at the University Faculty Senate's meeting Tuesday, April 6, in Room 112 Kern Graduate Building.

The Committee on Undergraduate Instruction will present the proposal, which contains two recommendations.

The first, addressing the standards for graduation with various levels of distinction, states that rule B8-30 (on page 33 of the 1981-82 Penn State Student Handbook) be replaced with the following:

"The top 12 percent of the baccalaureate degree candidates from any college shall be eligible to graduate with distinction if they have achieved at least a GPA of 3.5. The 12 percent should be divided into 2 percent With Highest Distinction, 4 percent With High Distinction, and 6 percent With Distinction."

The rule for associate degree candidates would be identical.

At present, various levels of distinction are determined solely by GPA levels; the proposed legislation would have the effect of varying the GPA level required for a particular level of Distinction from commencement to commencement.

The second of the Committee's recommendations deals with student selection to the Dean's List, as stated in the *Academic Administrative Policies and*

Procedures Manual No. 1G-8, which governs the selection. The Committee recommends that the policy be changed to list the following criteria:

"A. Undergraduate students must earn a term (semester) grade point average of 3.5 or higher while enrolled for a full-time credit load (8 or more credits per term — 12 or more credits per semester).

"B. Pass-Fail courses and Audit courses are not included in the determination of grade point averages or credit load.

"C. No more than 15 percent of the students in any college may be placed on the Dean's List. Each college and the Division of Undergraduate Studies (DUS) may decide its minimum GPA for the Dean's List, but the college GPA cannot be lower than the University-wide GPA of 3.5.

"D. Provisional students and non-degree students shall be grouped for the purpose of this rule."

Criteria "A" and "B" are essentially the same as under the present policy, with the major change being in the introduction of "C."

The Committee also will present a proposal to change student policy 34-89, on the course drop rule, to make it conform to the semester calendar.

The Committee on Admissions, Records and Scheduling will present a legislative report calling for action on a plan for

implementation of 800-level course legislation.

On May 6, 1980, the Senate approved legislation that allows for 800-level courses to be applied toward baccalaureate degree requirements. That legislation, proposed by the Committee on Curricular Affairs, was never implemented. The current proposal outlines a means of implementing the previous legislation; details will be presented at the meeting.

"Physical Plant Planning," an informational report to be presented by the Committee on Academic and Physical Planning, will focus on how problems with the University physical plant affect faculty, student and staff morale.

The report is based on the results of a survey sent to some 500 members of the University community. Of the 236 questionnaires returned, 108 were from campuses other than University Park.

Details of the survey, which will be presented by the Committee, indicate that the majority of Penn States have positive to very positive attitudes toward the University's physical plant. Some problem areas, however, were reported, primarily as the result of budgetary restrictions.

In another informational report, the Committee on Research will review the Climate for Research at the Commonwealth Campuses."

The report is part of a study begun in 1979-80 as one of a series of examinations of the "research climate" in various subdivisions of the University.

Also on Tuesday's agenda will be two legislative reports from the Committee on Committees and Rules.

The first deals with "Changes in Sequencing of Elections and Committee Selection," the second, with "Vacancy in the Office of the Chairman-Elect — *Bylaws*, Article I, Section 1 (d)."

Both pertain to the Senate's internal organizational structure.

Food and Drug head to talk at Commencement

Dr. Arthur H. Hayes Jr., U.S. commissioner of the Food and Drug Administration, will speak at Spring Term commencement exercises at University Park on Saturday, May 29.

"We are delighted that Dr. Hayes will share his experiences with us at graduation," President Oswald said. "He distinguished himself as a member of our faculty and, although at the FDA for only one year, is rapidly acquiring a reputation for being a decisive and fair public servant."

Dr. Hayes

"He is a man of integrity, strong leadership skills and a high degree of professionalism."

Dr. Hayes was professor of medicine and pharmacology and chief of clinical pharmacology at the Milton S. Eshelby Medical Center before going to Washington. He is also a 1950 graduate of Penn State.

He will address approximately 4,400 bachelor's, master's and doctoral degree recipients at Beaver Stadium. The ceremony will begin at 10:30 a.m.

Dr. Hayes was appointed head of the FDA in April of last year by Richard S. Schweiker, secretary of Health and Human Services. Dr. Hayes is in charge of approximately 7,300 staff members involved in field inspections, research, public information and decisions on the safety of a wide variety of products in the United States.

At Hershey, he directed the Medical Center's hypertension clinic and served on the editorial boards of five professional journals. Formerly chief of the cardiac pacemaker clinic at New York Hospital and affiliated with Cornell University's Medical College, he has been a visiting faculty member at several universities over the years, including the People's Republic of China's Academy of Medical Science.

His research has been largely on the use of drugs to treat hypertension and heart disease. While a student, Dr. Hayes was both a Rhodes Scholar and Danforth Fellow.

Dr. Hayes believes that one of the FDA's biggest challenges in the next few years will be to remain a leader in innovative research and to maintain its scientific expertise. The agency also, according to Dr. Hayes, must create a climate that allows for a free exchange of information among consumer groups, industry and the government.

News in Brief

Three medievalists to visit next week

In commemoration of the 800th anniversary of Saint Francis of Assisi's birth, the Medieval Studies Program, with the help of the Institute for Arts and Humanistic Studies, the School of Music and the Department of History is bringing three prominent medievalists to Penn

Questions welcomed

Any member of the University community with any kind of question or concern about the new academic calendar is urged to contact the Calendar Conversion Council at 304 Old Main (865-0491). Members of the Council are always available to discuss issues and questions.

State to speak about various aspects of monasticism and religious life during the Middle Ages.

Penn Staters

Dr. Karen Linn Bierman, assistant professor of psychology, has been awarded a \$150,000 research grant by the William T. Grant Foundation Scholars Program in Mental Health of Children.

Dr. Bierman will use the grant, to be distributed over a five-year period beginning July 1, for a research project titled "Promoting Adaptive Adjustment in High-Risk Aggressive Boys: Assessment, Intervention and Long-Term Follow-up."

The Grant Foundation's Scholars Program in Mental Health of Children is new this year. Dr. Bierman is one of five researchers selected in national competition to receive grants and the designation as a "faculty scholar" of the foundation. The program is designed to fund promising young scholars working in the area of stress factors and coping skills for problem children.

Dr. Bierman joined the faculty in July 1981, after receiving an M.A. and Ph.D. in child-clinical psychology from the University of Denver. She earned her B.A. in psychology and human biology at Stanford University.

R. Thomas Berner, assistant professor of journalism, is one of nine fellows recognized for excellence in the teaching of writing and editing by judges representing the Modern Media Institute, the American Society of Newspaper Editors, the Associated Press Managing Editors and the National Conference of Editorial Writers. Professor Berner will participate in a five-day seminar at the Modern Media Institute's Writing Center.

Dr. Kathryn M. Moore, associate professor of education and research associate in the Center for the Study of Higher Education, was installed as president-elect of the Association for the Study of Higher Education at its annual conference last month. Included in her duties will be planning and supervising the three-day annual conference next year. During this year's conference, Dr. William E. Toombs, professor of education and director of the Center, joined the Association's board of directors.

Dr. Robert A. Schlegel, assistant professor of molecular and cell biology, recently presented a series of invited seminars dealing with his current research. He discussed "Merocyanine 540: A Fluorescent Probe of Membrane Phase State and Lipid Bilayer Asymmetry" at the Helicon Foundation, La Jolla, California, and spoke about "Merocyanine 540 as a Probe of Hematopoietic Cell Surfaces" at the Los Alamos National Laboratories, Los Alamos, New Mexico. Dr. Schlegel also visited the University of New Mexico, where he lectured on "Introduction of Macromolecules into Mammalian Cells via Red Cell-Mediated Microinjection."

Sigmund S. Birkenmayer, professor of Slavic languages, has been re-elected president of the Association for the Advancement of Polish Studies, an organization founded in 1973 for the purpose of promoting all forms of Polish studies in the United States and Canada.

Dr. James M. Slick, an assistant director in the Career Development and Placement Center, has been named to the board of the DISCOVER Foundation, developers of computer-based career guidance systems.

Bookshelf

Blue Mountain, a book of poems by John Balaban, has been published by Unicorn Press of Greensboro, N.C.

An early book of poetry by Professor Balaban, *After Our War*, won the 1974 Lamont Selection of the Academy of American Poets and was nominated for the National Book Award in 1975. The landscapes in *Blue Mountain*,

according to Professor Balaban, are set largely in the western United States—in Texas, New Mexico, Colorado, Wyoming, Utah and Kansas. The last section of the book is about the Black Sea in Romania, where the poet was a Senior Fulbright Lecturer in 1976-77, and in Bulgaria, where he has been a guest of the Union of Bulgarian Writers.

Individual poems from the book appeared earlier in *The Southern Review*, *Harvard Magazine*, *The American Scholar*, *The Nation*, *Prairie Schooner*, *New Letters*, *Poetry Now*, and *The Southern Review*.

Professor Balaban is the author also of *Letters from Across the Sea*, a book of poetry published bilingually in Romania in 1979, and the translator and editor of two books, *Vietnamese Folk Poetry* (Unicorn Press, 1974) and *Ca Dao Vietnam* (Unicorn Press, 1980).

A Penn State graduate, Professor Balaban earned a master's degree at Harvard. He is currently on sabbatical leave at the Helene Wurlitzer Foundation in Taos, New Mexico.

Dr. K. Warner Schaie, professor of human development, is co-author, with Dr. James Gewirtz, of *Adult Development and Aging*, a 448-page text published by Little, Brown and Company of Boston.

Designed as an introduction to the psychology of adulthood, the book provides an analysis of the fundamental facts and theories of biological, intellectual, personality and social development in the adult years.

In addition to covering standard topics of the discipline, the text offers in-depth treatment of issues often skirted in other works, such as motivation, mental health and death and dying.

Dr. Schaie and Dr. Gewirtz have also edited a 400-page book, *Readings in Adult Development and Aging*, published by Little, Brown, which focuses on 13 central themes in adult development.

Dr. Schaie came to Penn State in January from the University of Southern California, where he was director of the Gerontology Research Institute. He is the author of six previous books.

Dr. Daniel Katkin, program head of administration of justice and professor of law, is the author of a new book, *The Nature of Criminal Law*, published by Brooks/Cole Company.

The 329-page text is designed to raise fundamental questions about the nature of law and its relationship to power and morality. Included are essays, cases and other materials to illustrate the substance of the criminal laws in the United States today. The problem of punishment is

discussed and an overview of criminal procedures is presented.

Dr. Katkin believes his book is unique because it does not treat criminal law as a set of definitions to be memorized, but rather as a cluster of ideas, principles and questions about the human condition.

"Ongoing change in many areas of criminal law is inevitable," he says.

"Focusing only on the law that is tends to discourage thinking about the law that ought to be."

In many respects, he says, *The Nature of Criminal Law* deals as much with philosophy as with traditional materials on the law.

Robert Gannon, associate professor of English, is the author of *Half Mile Up without an Engine: The Essentials, the Experiment of Salpines and Soaring*, a new 196-page book published by Prentice-Hall.

Last September, Professor Gannon co-piloted a sailplane that broke the world's out-and-return distance record. It soared for 1,000.03 km. along the Appalachian spine, from central Pennsylvania nearly to Tennessee and back.

The book is designed for the beginner who wants to learn the theory and techniques of soaring.

Dr. Deane K. Smith, professor of mineralogy, is co-editor of a book published recently by Plenum Press.

Entitled *Advances in X-ray Analysis*, the book includes 56 papers given at the 1980 Denver Conference on the Applications of X-ray Analysis. Dr. Smith is also co-author of three of the papers in the book.

Promotions

Staff Non-Exempt

Linda K. Bair to licensed practical nurse/Meds at Hershey.

Kim M. Balog to licensed practical nurse/Meds at Hershey.

Ferne O. Hepler to licensed practical nurse/Meds at Hershey.

Anna M. Martin to licensed practical nurse/Meds at Hershey.

Martha L. Richardson to senior research technician at Hershey.

Beverly Seerge to licensed practical nurse/Meds at Hershey.

Marian Shay to licensed practical nurse/Meds at Hershey.

Linda S. Wolf to licensed practical nurse/Meds at Hershey.

Clerical

Brenda Dalecki to secretary C in Human Development.

Rebecca E. Maurer to inpatient billing clerk at Hershey.

Technical Service

Harvey Hoffman to maintenance worker utility in Physical Plant.

Charles A. Poretto to operator, Engineering Copy Center in Engineering.

Obituaries

Charles W. Brouse, shop superintendent in the College of Science from 1958 to 1958, died March 10 at the age of 97. He came to the University in 1939 as a machinist in Physical Plant and later worked as a mechanic.

Willis C. Dillen, a utility man with Housing and Food Services from 1954 to 1969, died March 10 at the age of 78.

John D. Bassett, a research associate at the Applied Research Laboratory from 1965 to 1981, died March 14 at the age of 65.

Constance S. Fleck, a statistical clerk in the College of Agriculture from 1965 to 1981, died March 17 at the age of 60.

Paul W. Jackson, an electronic technician in the College of Science from 1950 to 1970, died March 20. He was 76.

Faculty/Staff Alerts

The Office of Personnel Administration would like to remind faculty and staff members of the University policy regarding the placement of help wanted advertising.

The Manager of the Employment Division is responsible for reviewing the wording of all help wanted advertisements, so that such advertisements are in compliance with State and Federal legislation and a standard of public relations is maintained (See PS-33, Help Wanted Advertising in the University Policy Manual).

Anyone wishing to place classified advertisements for faculty or staff vacancies should contact Robert L. Kidder, manager, Employment Division, 865-1387 (Network number 475-1387) before taking any formal action.

A fact sheet on proposed cuts in student aid

Editor's note: The University's Task Force on Federal Cuts in Higher Education and Student Aid has issued the following information sheet. Members of the University community are urged to make use of the information in communicating with their federal congressional delegation.

- Eighty percent of Penn State's 54,500 students receive some form of financial aid, enabling them to attend college.

- President Reagan's 1983 budget proposals, now under consideration by Congress, call for additional severe reductions for the current fiscal year and further cuts for fiscal '83 in the following programs:

- 1. Basic Educational Opportunity Grants (BEOG — now known as Pell Grants) provide assistance to students on the basis of financial need. The grants would be cut by 45 percent by the 1983-84 academic year. Students would lose their eligibility for the program if their adjusted family income rose approximately \$15,000 to \$18,000, compared to a current maximum of \$26,000. Students with family incomes as low as \$10,000 might find themselves ineligible if they attend a very low-cost school.

- 2. Supplemental Educational Opportunity Grants (SEOG) are administered through colleges and universities for students with the greatest financial need. These grants, currently totaling \$370 million, would be eliminated.

- 3. National Direct Student Loan (NDSL) provides low-interest loans (up to \$1,250 annually) for low-income students. Currently

funded at \$186 million, no new funding would be provided.

- 4. College Work Study Program (CWSP) allows students to earn a part of their financial aid through approved jobs at their colleges. The program, currently funded at \$550 million, would be reduced to \$400 million.

- In total, the Reagan budget proposals would cut Pell grants by one-third and trim all federal aid for student scholarships by \$636 million, or about 60 percent.

- According to the American Council on Education, Pennsylvania could lose \$88 million in awards for 116,500 students. Only two other states, New York and California, would suffer more severe losses.

Impact at Penn State

- At Penn State, students currently receive \$1,600 federal financial aid awards, totaling \$44.8 million. Under Fiscal '82 proposals, this would be cut to some 39,360 awards totaling \$64.2 million for fall, 1982, and to 33,960 awards totaling \$59.4 million for fall, 1983.

- For the 1982-83 academic year at Penn State, the proposals would mean these losses: Pell Grants, 4,100 awards, \$3.7 million; SEOG, 995 awards, \$66,000; College Work Study, 1,150 students, \$1.3 million.

- For the 1983-84 academic year, losses under the budget proposals would be: Pell Grants, 6,600 awards, \$5.9 million; SEOG, 2,900 awards, \$2.5 million; College Work Study, 914 students, \$1 million; National

Direct Student Loan, 1,230 borrowers, \$1.2 million.

Cuts in Guaranteed Loans

- In addition, further cutbacks would be made in the Guaranteed Student Loan program (GSL), which affects thousands of students from middle-income families. Not a grant program, it allows students to obtain long-term, low-interest loans, insured by the Federal Government, through banks and lending institutions. Once available to all students, regardless of family income, it would now be restricted to those showing documented need. Moreover, borrowers would have to pay, two years after repayment starts, market interest rates instead of the current 9 percent for the life of the loan. And the initial cost of getting a loan would double — from 5 to 10 percent.

- The Pennsylvania Higher Education Assistance Agency estimates that, under President Reagan's proposals, 41 percent of students currently receiving such loans would be eliminated from the program, or have their loans reduced. This amounts to \$262 million in loans, affecting 118,000 students.

- At Penn State, the Reagan proposal would mean a loss of 5,900 GSL borrowers and \$14.6 million in the 1982-83 academic year. A similar loss of 9,900 borrowers and \$14.6 million is projected for the 1983-84 academic year.

(Continued on page 7)

Partings

John S. Boyle, a faculty member since 1949, will retire April 1 as professor emeritus of plant pathology.

Dr. Boyle's major research at Penn State has focused on virus diseases of fruit and vegetable crops. He pioneered work in the experimental transmission of viruses from woody to herbaceous plants. This led to a better understanding of the chemical and physical properties of viruses infecting cherry, peach and apple trees.

Most recently, he showed that tobacco mosaic virus can induce two completely different diseases in tomato and pepper plants.

Dr. Boyle has had extensive international experience in dealing with crop production problems related to diseases. He was a Fulbright lecturer at Assiut University in Upper Egypt, and also worked in Uruguay, Ireland and Sri Lanka.

A past president of the Northeast Division of the American

Phytopathological Society, Dr. Boyle is a graduate of Wichita State University. His master's degree was conferred by the University of Iowa and his doctorate, by the University of Wisconsin in Madison. During World War II he was an officer in the U.S. Navy.

Lester P. Nichols, professor of plant pathology Extension, will retire April 1 with 34 years of service.

A native of Cranston, R.I., Professor Nichols received his B.S. from the University of Rhode Island in 1942 with a major in botany and horticulture. He earned his M.S. in plant pathology in 1947 from the University of Delaware.

His first 13 years as Extension specialist were spent conducting educational programs in all areas of plant disease control in southwestern Pennsylvania. Since 1961, he has placed major emphasis statewide on diseases of ornamentals and nursery crops and has paid particular attention to disease resistance of flowering crabapples, a project he hopes to continue working on after retirement.

As the month of February drew to a close, so did the careers of four Housing and Food Services employees. They are Phyllis H. Aley, food service worker; Myrtle Getz, associate housekeeping supervisor; Edna M. Meyer, food service worker; and Dorothy M. Singer, residence hall worker.

Mrs. Aley began her 21 years of service as a food service worker in Johnston Dining Hall and transferred to her most recent position in Findlay in 1968.

Of her job, she says: "I'm going to miss it terribly for a while, but I'll get adjusted to it. I met a lot of nice people on the job, some that I'll never forget. In all the years that I've been here, I've thoroughly enjoyed it or else I wouldn't have stayed this long."

Retirement plans for Mrs. Aley include "finishing some projects" at her Jacksonville home and helping a sister who is ill. Eventually, she and her husband, Leon, intend to travel to California to visit one of their two sons. They also plan to take several bus tours. Mrs. Aley belongs to the Marion Grange and is secretary of the Ladies Aide of the Marion Auxiliary.

"I'll miss the fellowship of both my associates and the students," notes Myrtle Getz of her 24 years at the University. "Most of the students were really like a family and looked upon me as a second mother. They came and talked over their problems. It's the little things that you do for them that they appreciate."

Mrs. Getz began at Penn State in 1958 as a residence hall worker and in 1961 was promoted to assistant supervisor. She attained the position of associate housekeeping supervisor when the title was created three years ago. She was

responsible for the dorm area in East Halls known as "Quad 1, Front 6" where she coordinated help and laid out work with the head supervisor and two assistant supervisors.

Mrs. Getz keeps busy at the Mt. Nittany Methodist Church. Whether it's serving bowling banquets or working at a church bazaar, she says, "We work the whole year long to be prepared for each upcoming event." She is also a member of the Women's Auxiliary of the Bellefonte Moose and the State College Senior Citizens Club.

In the near future she's planning a trip to Oklahoma to see her daughter and three grandchildren.

Edna Meyer's retirement will mark a major change in her lifestyle after 33 years. "I've always worked the early shift," she notes, "which runs from about 4:40 a.m. to 2:40 p.m. I had to get up at 4 a.m. to go to work and even earlier in the winter. I plan just to enjoy my retirement after getting up that early for so long."

Although she has no definite plans for her newly acquired spare time, Ms. Meyer says she has "lots of catching up to do at home." She'll possibly fill the time doing crafts or perhaps travel to the New England or Western states.

A food service worker, Ms. Meyer started in 1949 at Nittany Dining Hall and later worked at Pollock Dining Hall where she spent the remainder of her employment.

Since 1953, Dorothy M. Singer helped to keep clean various women's dormitories — McElwain, Simmons, Hamilton. However, from 1961 until her retirement, she worked in Milfin Hall, a men's dorm.

"I loved to work at the boys' residence hall," she says. "They seem to respect you more."

Mrs. Singer's 29-year career matches that of her husband, James, who retired last year as a maintenance mechanic in Housing and Food Services — giving the Singers a total of 58 years at Penn State.

Retirement will provide an opportunity to travel for Mr. and Mrs. Singer. Visiting a niece in Colorado and travelling to Cincinnati to see one of their sons in the Air Force are among their plans.

The Singers, who reside at Petersburg R.D. 1, have four children and seven grandchildren.

Lettie K. De Lauter, graduation coordinator in the Office of University Registrar, retired Feb. 1 after working for the University since Dec. 1, 1947.

Noting that she worked in the same office during her entire Penn State career, Mrs. De Lauter says she had been in her most recent position for about 14 years.

As graduation coordinator, she was responsible for having the Commencement programs printed, for ordering all diplomas and for keeping all of the statistics regarding each graduation.

Mrs. De Lauter's is a Penn State family — her father, Martin K. Knutsen, was on the faculty from 1919 to his death in 1943, and her son, Joseph H., is a 1976 graduate. In addition, brother Martin H. Jr. graduated in 1943.

Included in her retirement plans are traveling to see relatives in California, Michigan and New York, as well as "lots of relaxing and working around the house."

"I never disliked anything they asked me to do on the job," says Thelma Miller. "I enjoyed everything that I did. Waitress work was always interesting to me as a little girl and fascinating to me as a teenager."

Mrs. Miller retired March 3 after serving as a food service worker in Redifer Dining Hall. "I was there for all of my 24 years," she notes. "I liked the work so I stayed there."

Mrs. Miller has some definite plans for her retirement. "First I'm going to take a month's rest. Then, I'm going to do some

Professor Nichols

Professor Boyle

Left: Myrtle Getz; right: Phyllis Aley

gardening and pursue the rest of my hobbies."

Her other hobbies include crocheting, in particular, making pineapple doilies.

"Right now," Mrs. Miller says, "the larger and more intricate they are the better." She also likes to cook and bake, especially homemade bread for her husband, Alton, a retired teacher.

Mr. and Mrs. Miller have no plans to travel and intend to enjoy their retirement, mainly at their Beech Creek home. "We're not going to move around too much," comments Mrs. Miller. "All of a sudden we might go and visit some relatives, but we really have no plans to move outside of Pennsylvania."

Mary Jo Bjalme will be able to mark her retirement time by the seasons. "My husband and I go west in the summer and south in the winter," she says. "After I retire, we'll go to Florida. Around July, we'll go to Wisconsin and probably even farther west this year because there's no hurry to get back. We just like to travel."

Mrs. Bjalme first worked at the University from 1955 to 1957 in the Lion's Den at the HUB. She returned in 1963 as a records clerk in the Health Center and later in the Division of Counseling, predecessor to the Division of Undergraduate Studies. In 1971 she transferred to the College of Education where she handled undergraduate student records. She also worked with advisors to review student qualifications to meet requirements for teaching certification.

"I did have quite a bit of contact with the students, more so than my other jobs, and I really enjoyed working with them," commented Mrs. Bjalme. "All in all, I have mixed emotions about leaving. I worked in Education for 11 years and you can't have been somewhere that long and not have mixed feelings."

Mrs. Bjalme and her husband, Torsten, reside in Centre Hall. Mr. Bjalme retired last year as supervisor of technical services in the College of Earth and Mineral Sciences. The couple has five sons.

Nellie G. Boyle, a secretary in the College of Human Development, retires April 1 after 15 years of employment.

Charles J. Dusch, a vehicle maintenance mechanic at Capitol Campus, retired Feb. 27. His employment began in December 1969.

George W. Lattimer, a security investigations specialist with University Safety, is retiring April 1 after serving since 1969.

Sophia M. Roan, an accounting clerk with Housing and Food Services, retires April 1 after serving extending back to 1965.

Marina Tinkoff-Utechin, a senior assistant librarian and a member of the staff since 1971, will retire May 20.

Betty L. Watson, a serials record clerk in the Libraries, retires April 1. She joined the staff in 1969.

Janet A. Hurtack, a secretary in the College of Engineering since 1969, left the University Feb. 10.

James A. Polito, operations supervisor in Intercollege Research Programs, left the University Feb. 23 after having served since 1968.

Geraldine D. Stine, assistant dining hall supervisor in Housing and Food Services, is leaving the University April 1 after serving since 1965.

Benjamin A. Bronstein, director of public relations at Hershey since 1966, left the University Jan. 1.

Christy Meek, residence hall utility worker with Housing and Food Services since 1962, left the University Feb. 6.

Nancy D. Webster, a secretary at Capitol Campus since 1971, left the University Jan. 16.

INTERCOM is an internal communications medium published for the faculty and staff of The Pennsylvania State University.

The Lowenfeld Lectures: Viktor Lowenfeld on Art Education and Therapy. John A. Michael, Editor. Foreword by Laura H. Chapman. 420 pages. 47 figures. \$24.50.

The Lowenfeld Lectures contain edited transcripts of his 1958 lectures and discussions on art education and art therapy. The spontaneity and freshness of the lectures is retained in the transcripts by Dr. Michael, a professor of art

education at Miami University. The original recordings were made by Ellen D. Abell — like Dr. Michael, a former student of Dr. Lowenfeld's.

The implications of the tragedy at Jonestown are important to all Americans as a basis for evaluating social and educational policy, the contributors to this volume argue.

In his preface, Dr. Levi, a sociologist from the University of Texas-San Antonio, writes that his aim has been "to present a balance of perspectives: from general theories to concrete cases; from psychology to theology to sociology to law to philosophy; from sectarian actions to societal reactions; from anticult theorists to procult theorists (who view Jonestown as an aberration). This conceptually comprehensive and integrated analysis will leave the reader not with any easy answers but with several well-formulated concerns."

Establishing a link between phenomenology and hermeneutics as seen by philosophers (notably Heidegger and Husserl) and as applied by students of religion (notably Eliade and van der Leeuw) is the pioneering aim of this book. No other existing work ties together the cross-disciplinary strands in a way that is useful for religious studies.

Professors Brenneman and Yarian are on the faculty of the University of Vermont, and Professor Olson teaches at Boston University.

Dr. Wakeley, an assistant professor of wildlife ecology at the University, notes in his Preface that he developed this selection of readings "in response to my own need for an ecologically oriented text appropriate for upper-level undergraduate students in a wildlife-management curriculum. It is intended to fill the gap between available management-oriented texts that cover a range of topics from law enforcement to habitat analysis, and general texts in population biology that draw most heavily from studies of invertebrate groups."

The book is divided into two sections. In the first, under "Characteristics of Wildlife Populations," there are discussions of natality, mortality, dispersal, age and sex composition, and population growth and fluctuation.

The second section deals with "Factors Affecting Population Characteristics"; and topics include weather, predation and exploitation, interspecific and intraspecific competition, behavior and physiological stress.

An annotated edition in modern notation of a collection of some 150 chansons, this book presents "the most important representative work" in Renaissance French secular music. The introduction and critical notes explain 16th-century usages. Concordances and musical facts are provided, as well as English translations of the lyrics. Facsimile plates from the 1572 edition and from the recently rediscovered 1560 *Livre de Meslanges* are included.

The chansons, in from five to eight parts, are by both important and lesser known Flemish and French composers of the late 15th- and mid-16th-centuries. Few of the *Mellange* compositions are available in modern editions. Many of the chansons formed the basis of music for guitar, lute, harpsichord, organ and string consort, and these compositions are found in French, Flemish, Spanish, Italian, German and probably English and Hungarian sources. Major poets, notably Marot, Ronsard and Petrarch, are among the Lyricists.

The author is professor of music at the City University of New York.

Even though its best known modern spokesman, Martin Luther King, is dead, messianic Christian rhetoric still characterizes black oratory both from the pulpit and on the hustings, according to Dr. Moses.

The author — a Brown University Ph.D. who has taught at Iowa and Southern Methodist — views black messianism as “a powerful and, in many respects, a beautiful myth, permeating the thinking of both white and black Americans since the late 18th century.” After tracing its “roots,” he follows the mythic black hero as messiah in the works of writers ranging from Booker T. Washington to Ralph Ellison.

Dr. Moses concludes that even with its excesses, the American traditions of "evangelical reform, perfectionism, and the social gospel" offer more promise than today's widespread "narcissistic anarchism."

This book is a scholar-critic's "commentary on T.S. Eliot's poetry . . . after reading it over most of a lifetime." A professor of English at the University of Minnesota, Dr. Unger shows, in the words of one critic, "the way in which diverse strands of influence converge in specific Eliot poems. . . ."

(Continued on page 7)

Gentileschi was one of the great Italian painters of the 17th century, preeminent among Caravaggio's Roman "followers." The book describes the events that shaped

his career — the trial of a fellow painter, Agostino Tassi, for the rape of Orazio's daughter Artemisia (an artist herself); a call to France by Queen Marie de' Medici; his invitation to visit England, where he became an official court painter under Charles I. The book also includes a lengthy Catalogue Raisonné and photographs of the artist's works.

Dr. Bissell, a member of the faculty of the University of Michigan, offers the first comprehensive examination of Gentileschi's art, showing his response to changing artistic tastes and to sociocultural influences and considering his style in relation to subject matter, didactic function, scale, medium, physical location and patronage.

Van-poolers applaud "togetherness" for commuters

They don't look much like an experiment — 14 men and women from the Phillipsburg-Osceola Mills area who come to work in a brown-and-beige van with curtains in the rear.

But, with the help of the University, these people are conducting an experiment in van-pooling — cooperative transportation for the many Penn State employees who must commute to work.

Taking a cue from several private firms in Centre County, as well as the county government in Bellefonte, a University subcommittee looked at several van-pooling systems around the country before deciding to audition one in the Office of Physical Plant, according to Jerry A. Boyles, manager of Personnel and Training for OPP.

A departmental survey uncovered plenty of interest in van-pooling, and 14 participants were chosen for the prototype employee-operated van-pool.

"We wanted to start with the Phillipsburg area to see if the van-pool could provide economical, dependable transportation for employees who live in the same area," Mr. Boyles says. "Another factor was putting together a group who lived in as much of a straight line as possible, minimizing incidental mileage and time loss."

"The rates are based on the actual miles that the van travels," Mr. Boyles continues. "Everyone pays the same amount, whether they're the first or last off the bus. We found that, this way, we could offer rates as cheap as — and in some cases, cheaper than — employees were paying for their carpools."

"And it beats driving yourself 30 miles to work."

Under the Penn State system, he explains, "the University acquired a van, and literally turned it over to the pool. They're responsible for maintenance, gas and cleanliness." Van payments, insurance, registration and all other costs are included in a weekly fee.

"The van is paid for at no cost to the University," Mr. Boyles stresses. "We front the capital, so it costs the University no more than the use of the money. The van, which is very well equipped, can be traded in after three years."

For little more than \$11 each week, riders are driven to and from work by one of their number elected as driver. The driver keeps the van at his home, and is responsible for collecting fees and securing maintenance and gas. In return, he or she rides for free.

The fees are collected by the driver, recorded and turned over (minus gas expenses) to Dorothy J. Lyons, personnel and training specialist with the Office of Physical Plant. Ms. Lyons, who assists and advises the group, deposits the money with Fleet Services.

After van payments and other costs are subtracted, a growing contingency account remains with Fleet Services to meet major repair bills, buy new tires or other expenses.

Ms. Lyons says that, except for the receipts and mileage records that the driver turns in, the vanpool is autonomous.

"All the costs for running the pool go back to them, so they're interested in saving any expenses they can," she points out. "When they were calculating the route, several people agreed to walk a couple of blocks to pick-up points to cut the van's mileage. And they shop around for the best gasoline prices."

"They've set up their own procedures and rules, and they seem to work very

well. They've established a no-smoking rule in the van, and they even bought their own curtains."

One fringe benefit of the experiment is the camaraderie and friendship the riders share. Ms. Lyons says that "it really surprised us. We thought that when you throw 15 people together, you might have a lot of problems. But everyone gets along very well; we've had no problems."

Andrew Felix, who drives the approximately 66.5-mile round trip every day, says "They're all nice passengers; I used to drive a school bus, and this has that all skinned. I couldn't be better."

Helen Wilks says that the best part of the van pool is that "we don't drive; we just sit back and relax."

"The price is very reasonable; I couldn't drive myself for that, and it saves wear and tear on our car all winter," says Mary Imperial.

"We're very appreciative of the University for giving us this opportunity," says Don Oswalt. "This is a good group of people, and there are lots more

interested in riding vans. If someone's off for a week, the van's open for substitutions. It's not just for us; it's for everyone."

"Some of us sing, some of us talk and some snore," says Michael Temo of the trip home, "and the next thing you know, we're home. This experiment is very much a success; we recommend it for everyone."

The experiment was expanded when, shortly before Thanksgiving, a second vanpool started up in Munson (in the Phillipsburg-Clearfield area). Under the auspices of Housing and Food Services, employees from Pattee Library, Shields Building, Mineral Industries Building and other locations are testing the vanpooling waters.

"Employees' reactions seem to be very positive so far," says coordinator Linda L. Kopp, personnel assistant for Housing and Food Services. "We picked up some guidelines from the other vanpool, but otherwise it's theirs to work out for themselves."

Participants in the Office of Physical Plant's experimental vanpool are left to right: Sophie Miller, Edward Koern, John Kopchik, Lucille Coleman, Michael Dancho, Lenora Dobish, Michael Temo, Mary Imperial, Betty Felix, John Sharpless, Helen Wilks, Chester Warnovik, Harold Dean, Andrew Felix.

12,000 job applicants interview yearly in Employment Division

Almost most visitors to University Park head for Rec Hall, Eisenhower Auditorium or the HUB, a significant number of campus guests visit a lesser known building: Willard.

Willard is where the University's Employment Division is located, and according to division manager Robert L. Kidder, it is a busy place.

"During a typical year," Mr. Kidder says, "our employment specialists interview more than 12,000 job applicants and process more than 8,000 University employee bids for vacant positions."

The Employment Division, he explains, is responsible for assisting all of the University's Colleges and administrative units in filling all levels of staff exempt, staff non-exempt, clerical and technical service position vacancies — a total of some 2,200 full-time vacancies per year. A large portion of these are filled from within.

"The University is committed to giving its employees opportunities for promotion," Mr. Kidder notes, "and we have an active and healthy record of promotion from within."

The Division handles the University's internal position vacancy announcement programs and also coordinates external

recruitment, applicant interviewing and pre-employment background and reference checks. It maintains applicant and employee records, offers counseling to employees about employment matters and assists with development of personnel-related policies.

When requested, the Division coordinates recruitment activities for academic and executive search committees, lending its expertise in matters of advertising, recruiting resources and affirmative action.

On an annual basis, Mr. Kidder observes, the Division will receive — and process — more than 7,000 pieces of incoming correspondence and receive more than 20,000 incoming telephone calls related to University employment.

"During the course of a year," he notes, "we calculate that we have a total of about 48,000 contacts from employment seekers and employee bidders."

An important aspect of the Division's operation, Mr. Kidder says, is its assistance to administrative officers in assuring compliance with State and federal laws and regulations related to employment, equal opportunity and affirmative action.

Another major function is related to the

University's unemployment compensation program.

"The Division provides assistance to employees who qualify for unemployment compensation, but it also assures that payment is not made for unwarranted claims," Mr. Kidder comments. "A great deal of time and effort is spent processing claim forms, attending hearings and meeting with faculty and staff members to

explain the provisions of the unemployment compensation laws."

Calling the Division's work "varied, complex and demanding," Mr. Kidder says that he and his staff are dedicated "to trying to match the right persons to the positions we have open, and to being fair to outside applicants and our employees who are seeking to advance themselves."

Correspondence course wins top award

"Community Noise Fundamentals," a non-credit correspondence course created at the University, has won a top honor from the National University Continuing Education Association.

The independent study, non-credit version of the course — which also is offered for credit — was honored by the Association's Division of Independent Study for having "one of the best study guides and training manuals produced during the past calendar year."

Paul D. Michael, professor of environmental acoustics, served as senior author.

"Perhaps the most significant aspect of the course," says Dr. Michael, "is that 55

of the 75 persons enrolled in it are being sponsored by the Environmental Protection Agency."

EPA's Office of Noise Abatement and Control, he adds, contracted with Penn State to develop the course several years ago.

Serving as co-authors of the 260-page manual and training guide were six other researchers: Gordon R. Bienvenue, research associate in audiology; J.H. Prout, associate professor of engineering research; R.L. Kerlin, research associate in acoustics; W.J. Achor, professor at Western Maryland College; and two former Penn State students, D.M. Dejoy and A.H. Kohut.

Kingsley Davis lecture sponsored by Graduate School

Dr. Kingsley Davis, senior research fellow at the Hoover Institution and Distinguished Professor of Sociology at the University of Southern California, will speak on "Demographic Foundations of the New Sex Roles" Tuesday, April 6, at 7:30 p.m. in Room 112 Kern.

The lecture is sponsored by The Graduate School.

Dr. Davis, a member of the National Academy of Sciences, taught at Penn State from 1936-42 and also served as acting head of the newborn Department of Sociology.

Widely known for his studies of population problems in all parts of the world, Dr. Davis coined the phrase "zero population growth." His research interests have encompassed the history and theory of international migration, world urbanization, population growth and economic development and population policy.

He has been one of the chief exponents of the use of incentives in fertility control policies and has served as a consultant on population policies and demographic information in India, Nepal, Bahrain and Latin American countries.

Dr. Davis's books include *The Population of India and Pakistan*, *World Urbanization* (two volumes), and *Cities: Their Origin, Growth and Human Impact*. He is editor of *Studies in Population and Urban Demography*, which now includes some 18 volumes.

After graduating from the University of Texas, Dr. Davis earned his Ph.D. at Harvard. He subsequently taught at Penn State, Princeton, Columbia and the University of California at Berkeley. He is Emeritus Ford Professor of Sociology and Comparative Studies at Berkeley.

Dr. Davis's Graduate School lecture is part of a two-day visit to the University on April 5-6. Sponsoring his visit are the Population Issues Research Group, the Division of Individual and Family Studies, the Department of Sociology, the Department of Rural Sociology and the Graduate School.

Dr. Davis will spend much of his time meeting informally with graduate students and faculty members from sponsoring academic units. He will present a graduate seminar on "Demography and Welfare Under Conditions of Growing Scarcity" Tuesday, April 6, at 11 a.m. in Room 112 Kern.

Rutgers' chorus will sing with Glee Club

The Queen's Choral of Rutgers University will travel to University Park to join the Penn State Glee Club for a concert Sunday, April 4, at 3 p.m. in the Music Building recital hall.

Highlighting the program will be the *Requiem* by Gabriel Faure, with featured baritone soloist Joj Westa, the University's chamber orchestra Musica da Camera and other assisting artists from the School of Music. In addition to the *Requiem*, several other choral works will be performed by both groups.

The Penn State Glee Club is directed by Bruce Trinklein, an associate professor of music. Frederic Ford conducts the Queen's Choral.

White Golf Shop open

The White Golf Shop is now open, and applications are available for season memberships. More information can be obtained at 865-6231.

Late April opening possible for HUB Terrace Room bookstore

Although the sign outside still proclaims, "The Terrace Room," conversion of the former cafeteria into the Penn State Bookstore has progressed to the point where a late April opening is possible.

The spacious, well lighted new facility will house the textbook division now located in McAllister Building and the two bookstore units already in the HUB.

Entrance to the bookstore will be through the two staircases which led to The Terrace Room. Visitors will enter a lobby which will contain a bank and a convenience store, selling magazines, newspapers, notebooks and the like.

The new bookstore will have a much larger textbook area than the one currently in use at McAllister, so general reading books will not have to be packed away at the beginning of each term to accommodate the heavy volume of textbook business.

The east side of the former Terrace Room will be devoted to the trade book section, according to Elizabeth K. Wilson,

promotion specialist. Input will be sought from faculty members to determine the kind of supplementary reading materials the bookstore should carry. The bookstore also hopes to devote space to displaying books written by University faculty members and to those published by Penn State's Press. The establishment of a good special order department is another goal, Ms. Wilson points out.

The general section of the store will house general student and office supplies — the contents of the current ground floor HUB store. Alongside will be Penn State clothing souvenirs and an area for class ring promotion. Special materials for arts students and engineers will be available in the western end of the facility, along with photographic supplies.

By the end of this month, books and supplies should actually start moving into the store, Ms. Wilson says, adding that space allocations are flexible, and bookstore managers will welcome suggestions from customers.

Women's Studies to hold colloquium

Women in literature and career-psychology topics will be explored by members of the University's faculty and staff and by graduate students in a Women's Studies Colloquium on Tuesday, April 6, in Room 225 HUB.

The day-long colloquium, sponsored by the Women's Studies Program, will begin at 9:30 a.m. with a keynote address by Thereza Halliday-Levy on "Women in Brazilian Cultural Life." Ms. Halliday-Levy is a behavioral sciences instructor at the Federal Rural University of Pernambuco, Brazil. She is on leave this year to pursue her doctorate in public community at the University of Maryland.

Dr. Linda K. Rambler, senior assistant librarian in research and standards at Pattee Library, will speak at noon on "Research Resources for Women's Studies." Interested persons are invited to bring their own lunch; if they wish to have lunch provided for them, they may call Freida S. Rozen, instructor in labor studies, at 865-5425.

A morning session, devoted to literary topics, will begin at 10 a.m. and end at noon. An afternoon session, on career-psychology topics, will be held from 1 to 3 p.m. The public is invited to attend any or all of the presentations.

Speakers for the morning session, in order of appearance, are:

— Bianca Rauch, graduate student in religious studies, on "Fredrika Bremer (1801-65, Sweden's first novelist and feminist): Her Years Visiting American Literary Figures."

— Dr. Judith L. Stephens, assistant professor of speech communication at Shuylkill, on "Why Marry?: The New Woman of 1918."

— Dr. Nancy M. Tischler, professor of English and humanities at Capitol, on Dorothy L. Sayers.

— Dr. Margaret M. Cote, assistant professor of English at Hazleton, on "The Ingenue in the Novels of John Fowles."

The afternoon session includes: — Wendy S. Becker and Dawn Taylor, graduate students in psychology, on "Women's Friendships: A Developmental Perspective."

— Anna D. Weitz, graduate student in counselor education, on "Life-span Issues in Women's Career Development."

— Pat Dunkelberger, staff assistant to the associate dean for the Commonwealth Educational System, College of the Liberal Arts, on "The Non-Traditional Woman Student and the University."

— Dr. Susan F. Weis, associate professor of home economics education, on "Turning Homemaking Skills to Profit: Elements Influencing Home-Based Entrepreneurship."

AV Services has new films, videotapes

Audio Visual Services has recently acquired a number of films and videotapes in response to requests from faculty members in such disciplines as art, architecture, American studies, journalism, comparative literature, women's studies and labor studies. These materials are not listed in Audio Visual Services' subject area catalogs or in the Alphabetical Listing of Films and Videocassettes because their circulation is restricted to instructional programs within the Penn State system.

Titles and order numbers follow: "The Bridge that Spanned the World" (MVC5-0983), "Doctor, I Want..." (MVC5-1005), "From Both Ends of the Stethoscope" (MVC5-0993), "Growing Up Remale" (C-50563), "The Jolo Serpent-Handlers" (C-50567), "Killing Us Softly: Advertising's Image of Women" (C-33337), "The Laryngeal Image During Phonation" (MVC5-1001), "The Legacy: Children of the Holocaust Survivors"

(C-33319), "Looking for Renaissance Rome" (C-33329), "Memories of Berlin: The Twilight of Weimar Culture" (C-60301), "Men's Lives" (C-40351), "The Odyssey Tapes" (MVC5-0995), "Palladio, The Architect and His Influence in America" (C-50560), "A Panel on the Human Voice" (MVC5-1002), "The Police Tapes" (MVC5-0996), "Post Partum Physical Assessment" (MVC5-0997), "The Regulatory Mechanism of Voice in Singing" (MVC5-1003), "Six O'Clock and All's Well" (C-50559), "They Are Their Own Gifts" (C-50566), "Vocal Cord Vibration" (MVC5-1000), "We're Moving Up! The Hispanic Migration" (MVC5-0992), "The Willmar 8" (C-50554), "With Babies and Banners: Story of the Women's Emergency Brigade" (C-40352), and "Word Is Out" (C-50562).

To obtain more information about these films and tapes, call 863-3103.

To schedule them for classroom use, call 865-6314.

'Negro Renaissance' art show features Bearden, Lawrence

Beginning Sunday, April 4 and continuing through April 30, selected prints of the works of Romare Bearden and Jacob Lawrence will be exhibited at the HUB Gallery.

Romare Bearden and Jacob Lawrence are distinctly American artists, who are products of the "Negro Renaissance" — that period of intellectual and cultural ferment of the 1930s in Harlem.

Both painters are masters of design and the use of color. Bearden collages are charged with the spirit of improvisation — the creator taking the materials at hand and making something new and fresh. Lawrence, though a thoroughly trained artist, is concerned with simplification that is frequently seen in the works of non-professionals. He seems to be interested not in perfect form but in perfect distortion. His work is tough and unsentimental, but with intense color.

The exhibit is sponsored by the annual Black Arts Festival, and the public is invited to attend an opening reception on April 4 at 3 p.m. in the HUB Gallery Lounge.

Medievalists visit

Professor Constable

(Continued from page 1) medieval historian, will be the principal lecturer during Medieval Studies Week, April 6-8. Professor Constable, who has spent most of his academic career at Harvard, has also been an overseas fellow at Churchill College, Cambridge University.

He will deliver three lectures during his stay at Penn State, the first one at the Comparative Literature Luncheon on Tuesday, April 6, at 12:15 p.m. in Room 204 HUB. His topic will be "Religious Continuity of the High and Middle Ages." At 3:30 p.m. that same afternoon, he will speak on "Transitions in Religious Life and Institutions in the Twelfth Century" in the Rare Books Room.

On Wednesday, April 7, at the Medieval Studies Banquet in the Maple Room, Professor Constable will speak on the "Impact of the Middle Ages." This dinner, which is open to the public, will feature authentic medieval food appropriate to the season. Reservations for the banquet may be made by calling 865-5481 before Monday, April 5. "The Music for a Chury Office of Saint Benedict" will be the topic of Ruth Steiner, of the School of Music at the Catholic University of America. An authority in the field of medieval liturgical music, Professor Steiner will talk on Thursday, April 8, at 1 p.m. in the Music Building recital hall.

Religious institutions in the East is the field of John Meyendorff, of Saint Vladimir's Orthodox Seminary and professor of Byzantine Studies at Fordham University. His talk on "Monastic Revival in Byzantium" is scheduled for April 20, at 4 p.m. in Room 124 Sparks. Professor Meyendorff is the author of numerous articles and books, the most recent of which is *Byzantium and the Rise of Russia*.

Jellicoe to give first Bracken Lecture Friday

Sir Geoffrey Jellicoe, an internationally prominent landscape architect, will become the University's first Bracken Lecturer on Friday, April 2, at 7:30 p.m. in Schwab Auditorium. He will speak on "Towards a Landscape of Humanism." The Bracken Lecture is part of the John R. Bracken Program Enrichment Fund, inaugurated by the Department of Landscape Architecture in honor of Dr. Bracken, who headed the department from 1926 until his retirement in 1957. He died at the age of 87 in 1979.

The fund, which includes a large gift from the Bracken estate, will provide not only for the annual Bracken Lecture, but also for other special activities "designed to enhance the academic quality of the professional degree program(s) of the Department of Landscape Architecture." Dr. Bracken received a B.S. degree from Penn State in 1914 in what was known then as "landscape gardening." He returned to the University in 1924 as the first Extension specialist in landscape architecture and became head of the department in 1926. He later earned master's and doctoral degrees at the University of Michigan.

Two-semester writing proposal advanced

A proposal for a two-semester writing requirement by the Department of English has been sent to the Curricular Affairs Committee of the University Faculty Senate.

The proposal, which is expected to provide a more intensive writing experience for students, recommends that one course in writing be taken in the freshman year and that another course be taken in the second half of the sophomore year or later.

After consideration by the Curricular Affairs Committee, the recommendation will again be reviewed by the President and the Provost.

Dancers to premiere two works at concert

The Contemporary Dance Company will present concerts on Friday and Saturday, April 2 and 3, at 8:30 p.m. in Eisenhower Auditorium. Two new works and four pieces from the company's repertoire, ranging in style from classic modern dance to absurd theatrics, comprise the program.

Co-directors Patricia Heigel-Tanner and Paula Donahoe, assistant professors of physical education, are joined by three guest choreographers — Laurie Boyd, assistant professor of theatre arts, and Peggy Moses and Kathy Short, of the College of Health, Physical Education and Recreation.

Tickets for the performance are on sale at the Eisenhower Box Office and will also be available at the door.

Robeson print show features 24 artists

The prints of 24 artists who live and work from one coast of the United States to the other, are on exhibit at the Paul Robeson Cultural Center's Gallery through April 21 under the title of "25 Approaches To Contemporary Printmaking."

The artists all have been connected and influenced by the Printmaking Workshop founded in New York City by Bob Blackburn in 1949. The Workshop has served as a continued source of support for the artistic community of the city, maintaining the environment necessary for the artist-printmaker.

Student aid cuts

(Continued from page 2)

No Loans For Graduate Students

Graduate students would no longer be eligible for the GSL program. Some 600,000 graduate students — over half of graduate enrollments — now depend on the GSL to finance their education. A majority of them may be unable to continue their education if the GSL recommendations are adopted.

At Penn State, approximately 1,100 graduate students currently receive GSL loans totaling \$3.85 million. The percentage of students borrowing under the GSL program ranges from seven percent in the College of Science to 47 percent in the College of Business Administration.

At The Milton S. Hensley Medical Center, 74 percent of the medical students are receiving GSL loans totaling \$1.47 million.

Without a strong federal role in assisting promising students to further their studies, the supply of students may diminish in quantity and quality. Many graduate schools already

are facing a diminishing pool of qualified applicants.

Student aid cuts of the magnitude proposed in the Reagan budget would force many students to drop out of school, while prospective students may find that college is no longer an attainable goal.

The Economic Impact

Higher education institutions may be faced with declining enrollments and retention problems, all of which have a direct impact on the state's economy.

For every \$1 "invested" — from all public and private sources — higher education institutions returned \$1.70 to Pennsylvania's economy in 1979-80. The net contribution was \$1.7 billion. With nearly 102,000 faculty and staff employees, higher education as an employer ranks 13th in the state — well ahead of some industries traditionally regarded as dominant sectors in Pennsylvania's economy.

Spending related to higher education creates an additional 74,876 jobs statewide. The number of higher education-related jobs thus totals 177,432 — accounting for one of

every 27 persons employed in Pennsylvania.

Higher education generates payrolls of nearly \$2.5 billion, most of which is poured back into the state's economy.

Reagan budget proposals would undoubtedly have a direct negative economic impact on every community in which a Penn State campus is located.

Higher Education's Position

The position of the Pennsylvania Association of Colleges and Universities is that further budget cuts would deny educational opportunities to thousands of people from low- and middle-income families. Its members, including Penn State, are therefore opposed to the cuts for student aid proposed in the Federal budget.

Higher education wants student aid to remain at the Omnibus Reconciliation Act agreement levels, included in this year's budget. It should be noted that, in the current Federal budget, student aid was cut by 12 percent, while most other federal programs were reduced only 4 percent.

Prizewinning pianist to perform April 7

Pianist Cecile Licad will perform the final performance in the Artists Series Young Prizewinners series. She will perform Wednesday, April 7, at 8:30 p.m. in

Schwab Auditorium.

The 19-year-old pianist won the Leventritt Foundation's Gold Medal Award in January 1981, the first time in 70 years this coveted prize was given.

Since then, she has appeared with the New York Philharmonic, the Boston, Chicago and Cincinnati Symphonies, the Cleveland Orchestra and the Los Angeles Philharmonic, as well as with a number of other orchestras both in this country and abroad.

Born in Manila, she studied at the Curtis Institute with Rudolf Serkin.

For her appearance at Penn State, she will present works by Ravel, Beethoven and Chopin. Tickets go on sale Monday, April 5, at the Eisenhower Auditorium box office, 9 a.m. to 4 p.m. The HUB Booth will be open the first day of the sale. Phone orders on MasterCard/Visa will be accepted at 863-0255.

Cholesterol metabolism is lecture subject

Dr. DeWitt S. Goodman, professor of preventive medicine at Columbia University, will present a lecture in the HUB Auditorium on Monday, April 5, at 7:30 p.m.

Dr. Goodman, who also serves as director of the Division of Metabolism and Nutrition at Columbia-Presbyterian Medical Center, will speak on "Cholesterol Metabolism in Man."

The public is invited to attend the lecture and a reception to follow.

Dr. Goodman will be visiting the University for two days, April 5 and 6, under auspices of the Wellcome Visiting Professorship in Basic Medical Sciences, sponsored by the Burroughs Wellcome Fund.

In addition to presenting his lecture, Dr. Goodman will conduct informal workshops with students and faculty members in human and animal nutrition programs. The workshops — on "Vitamin A," "Cholesterol" and "Grantmanship" — also are open to other interested persons, who may contact the Nutrition Office at 863-0772 for additional information.

A nationally known researcher in Vitamin A and lipids, Dr. Goodman is on the board of directors of the American Heart Association. He has published scholarly articles in an extensive array of professional and scientific journals and he is on the editorial boards of a number of journals.

Donkas Farkas, assistant professor of linguistics and French, "Subjective Complements in Romanian"; and Dr. Pierre Cintas, assistant professor of French at Ogoniz, "Formal Representations of Some Values of the French Present Tense."

Sculptor exhibits

An exhibition by Glenn Zweygardt, an associate professor of sculpture in the New York State College of Ceramics at Alfred University, is on display in the Zeller Gallery through April 4.

Mr. Zweygardt works with mixed media, combining porcelain enamel and steel, stainless steel and granite and steel and ceramic in his works.

Press books

(Continued from page 4)

Eliot said: "The poet's mind is in fact a receptacle for seizing and storing up numberless feelings, phrases, images, which remain there until all the particles which can unite to form a new compound are present together."

In Professor Ungar's words: "What we have . . . is a dynamics of correspondence by which a variety of sources becomes both a confluence and an influence." He goes on to demonstrate how extensive some of Eliot's roots are in his immediate past and also how deeply these roots go back through our entire literary heritage. The book ends with a plea to avoid treating the study of literature as a "system of ideas which is considered conclusive and exhaustive."

The Rejected: Psychological Consequences of Parental Rejection. By John J. Evoy. 259 pages, \$18.75.

The first comprehensive work on the psychological aftermaths of parental rejection, this book was prompted by the author's conclusion, after three decades of clinical practice, that "the experiences and behaviors of the rejected . . . seemed to be the most frequently reported clinical phenomena." Dr. Evoy further concluded that there is an "integral panoply" of feelings and behaviors that characterize only the rejected, and the book identifies this behavioral and affective array.

An emeritus professor at Gonzaga University, the author has designed the book for use by professional colleagues, but because of the widespread concern about the damage caused by parental rejection, he writes in language that can be understood by laypersons. After establishing the norms of parental rejection, both active and passive, the book examines various elements in a rejected individual's feelings and behaviors.

Bus tours starting

The London Double Decker Tour bus will begin its 1982 schedule Monday, April 5, offering guided tours of central campus. Tours are conducted weekdays throughout the spring and summer.

The 1:30 p.m. tour departs from the HUB, and tickets can be purchased at the HUB desk this year, for the first time, the 2:30 p.m. tour will depart from Shields for the convenience of prospective students and their families visiting campus. Tickets for the second run can be purchased at the Admissions Office.

Members of the faculty, staff and student body, as well as campus visitors, are invited to take the tour, which includes commentary by trained University guides. Special tours can be arranged through the Campus Relations Office, Room 301 Old Main (865-2501).

University Park Calendar

April 11 Special Events

Thursday, April 1

Commons Erikson Gallery Print Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 2, Linguistics Symposium, 8 p.m., Keller, Maurice Gross, Univ. of Paris, on "Building Lexicon-Grammars for Romance Languages." Kern Classics, Hot Rock, 7 and 9 p.m., 112 Kern. New German Cinema, Hauff, *Knife in the Hand*, 7 and 9 p.m., HUB Assembly Room. Museum of Art film, *The Fallacies of Hope*, 7 p.m., First Floor Gallery. Sports: lacrosse (women) vs. Towson State, 3:30 p.m.

Friday, April 2

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Peter Haggert, Univ. of Bristol, on "A Geographer Looks at Epidemics." Linguistics Symposium, 6 p.m., Keller, James Harris, M.I.T., on "Theories of Phonological Representation and Nasal Consonants in Spanish." Bracken lecture, 7:30 p.m., Schwab. Sir Geoffrey Jellicoe, landscape architect, on "Towards a Landscape of Humanism." Commonsplace Theatre, *The French Lieutenant's Woman*, 7 and 9:35 p.m., 112 Kern. Also April 3. Cinematheque, Sunday, *Bloody Sunday*, 7 and 9:15 p.m., 121 Sparks. Also April 3. GSA Coffeehouse, 8 p.m., 102 Kern. Contemporary Dance Company, 8:30 p.m., Eisenhower Auditorium. Also April 3. Sports: tennis (women) vs. Brown, 2 p.m.

Saturday, April 3

Deadline for May graduates to deliver doctoral theses to committees. France-Cinema, Kury's, *Peppermint Soda*, 7 and 9 p.m., 112 Kern. Also April 5. Sports: baseball vs. Rutgers (DH), 1 p.m.; lacrosse (men) vs. Ohio State, 2 p.m.; volleyball (men) vs. Rutgers-Newark, 7 p.m.

Sunday, April 4

Penn State Glee Club and Queen's Choral, Rutgers Univ., concert, 3 p.m., Music Bldg. recital hall.

Sports: baseball vs. Mansfield (DH), 1 p.m.

Monday, April 5

HUB Craft Center, registration for second session classes, noon-5 p.m., 312 HUB. Nutrition workshop on Lipoprotein and Cholesterol Metabolism, 9:30-11 a.m., 223 Henderson Human Development. Moderator: DeWitt S. Goodman, Columbia Univ.

Second Brazilian Film Fest, *Ganga Zumba*, 12:30 p.m., Kern Auditorium; *Gaijin: A Brazilian Odyssey*, 8 p.m., Eisenhower Auditorium. London Bus tours begin, 1:30 p.m., HUB Main Entrance, 2:30 p.m., Shields Bldg.

Sports: lacrosse (women) vs. Ohio Univ., 3 p.m.

Nutrition, Burroughs Wellcome lecture in the Basic Medicine Series, 7:30-9 p.m., HUB Auditorium. DeWitt S. Goodman, Columbia Univ., on "Cholesterol Metabolism in Man."

Tuesday, April 6

Commons Easter Plant Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 7. Nutrition lecture, 9:35-11 a.m., 108 Henderson Human Development. DeWitt S. Goodman, Columbia Univ., on "Successful Grantsmanship and the Current State of Federal Funding for Basic Science Research"; 2:35-5 p.m., "Vitamin A and Retinoids - Recent Advances." Women's Studies Colloquium, 10 a.m.-3 p.m., 225 HUB. Speakers: Anna Weitz, Susan Welch, Nancy Tischler, Margaret Cote, Pat Dunsdabarger, Judith Steiner, Wendy Becker, Dawn Taylor, Linda Rambler and Bianca Rauch.

Graduate School lecture, 11 a.m., 112 Kern. Kingsley Davis, Hoover Inst. and Univ. of Southern California, on "Demography and Welfare Under Conditions of Growing Scarcity."

Lutheran Council for Campus Ministry, "Bach's Lunch," featuring Eric Retter, noon, Eisenhower Chapel.

Comp. Lit. Luncheon, 12:15 p.m., 204 HUB. Giles Constable, Dumbarton Oaks, on "Religious Continuity of the High and Late Middle Ages."

University Faculty Senate meeting, 2:10 p.m., 112 Kern.

Two award-winning films will highlight the second Brazilian Film Fest next week

Two new films, *Pixote*, honored by the New York and Los Angeles Film Critics as the Best Foreign Film of this year, and *Gaijin*. A Brazilian *Odyssey*, winner of France's prestigious Georges Sadoul Prize for the Best First Feature, will highlight the second Brazilian Film Fest sponsored by Audio Visual Services.

Gaijin (which means "foreigner") will open the Festival Monday, April 5, at 8 p.m. in Eisenhower Auditorium. Describing the life of the Japanese immigrants who came to work on Brazilian coffee plantations at the turn of the century, the film was directed by Tizuka Yamasaki, who drew on the experiences of her grandmother who immigrated to Brazil in 1908.

Pixote (which is pronounced "Pee-shoot") and roughly translates as "Peewee" records the unsentimental education of a nine-year-old street boy of Sao Paulo as he learns how to snatch purses, roll drunks, deal in drugs and finally murder. Directed by Hector Babenco, *Pixote* will be shown Tuesday, April 6, at 8 p.m. in Eisenhower.

Also included in the Brazilian Film Fest is Carlos Diegues' important film, *Ganga Zumba*, a depiction of the first American slave revolt, which occurred in Brazil in 1641. It will be shown April 5 at 12:30.

Sports: softball vs. West Chester, 2:30 p.m.

Nutrition workshop on Vitamin A Metabolism, 3:15-4:30 p.m., 108 Henderson Human Development. Moderator: DeWitt S. Goodman, Columbia Univ.

Medieval Studies lecture, 3:30 p.m., Rare Books Room, Pattee. Giles Constable, Dumbarton Oaks, on "Transitions in Religious Life and Institutions in the Twelfth Century."

Graduate School lecture, 7:30 p.m., 112 Kern.

Kingsley Davis on "Demographic Foundations of the New Sex Roles."

Microcomputer Users Group meeting, 7:30 p.m., 189 Materials Research Lab. Second Brazilian Film Fest, *Pixote*, 8 p.m., Eisenhower Auditorium.

Wednesday, April 7

Sports: lacrosse (men) vs. Towson State, 3 p.m. Medieval Studies Banquet, 5:30 p.m., Maple Room. Speaker, Giles Constable, on "Impact of the Middle Ages." Reservations: 865-5481. Artists Series, Cecile Licad, pianist, 8:30 p.m., Schwab.

Thursday, April 8

Medieval Studies lecture, 1 p.m., Music Bldg. recital hall. Ruth Steiner, Catholic Univ., on "The Music for a Cluny Office of Saint Benedict."

Sports: baseball vs. Lock Haven (DH), 1:30 p.m. Kern Classics, *My Fair Lady*, 8 p.m., 112 Kern. New German Cinema, Brandler, *I Love You, I Kill You*, 7 and 9 p.m., HUB Assembly Room. Also April 9.

Penn State Dames meeting, 7:30 p.m., 101 Kern.

Friday, April 9

Geography Dept. Coffee Hour, 3:40 p.m., 119 Walker. Marc Treib, prof. of architecture, UC-Berkeley, on "Mapping Experience." Cinematheque, *Yojimbo*, 7 and 9:15 p.m., 121 Sparks. Also April 10. GSA Coffeehouse, 8 p.m., 112 Kern. Shaver's Creek Environmental Center, Gordon Bok Concert, 8 p.m., Faculty Club.

Saturday, April 10

Deadline for final oral doctoral examinations for May graduates.

Deadline for May graduates to deliver master's theses or papers to advisers.

Sports: tennis (men) vs. East Stroudsburg, Mercersburg and Rochester. Also April 11.

Sunday, April 11

Sports: baseball vs. Howard (DH), 1 p.m.

"Gaijin: A Brazilian Odyssey"

p.m. in Kern Auditorium.

Admission to the films is free. Co-sponsors of the Festival are the Black Studies Program, Department of Political Science, Latin American Studies, International Students Association, the Student Film Organization and the Telecommunications Project of the Americas.

Seminars

Thursday, April 1

Anthropology, 3:30 p.m., 107 Carpenter. Michele Hayward on "Linkage of Colonial Mexican Parish Records."

Physics, 3:30 p.m., 117 Osmond. M. Dwyden, SUNY, on "H.A. Kramers and Quantum Theory."

Math, 4 p.m., 102 McAllister. Joseph J. Kohn, Princeton Univ., on "The Tangential Cauchy-Riemann Equations."

Friday, April 2

Industrial and Management Systems Engineering, 4 p.m., 216 Hammond. Thomas Armstrong, Univ. of Michigan, on "Cumulative Trauma Disorders in Manual Work."

Monday, April 5

Entomology, 3:40 p.m., 204 Patterson. Ian Weatherall, Albany International. Needham Heights, MA., on "Problems and Strategies in the Development of Sex Pheromones as Control Agents against Pest Species."

MCBI, 4 p.m., 101 Althouse. Dr. Ann Kennedy, Lab. of Radiobiology, Harvard Univ., on "Factors Affecting the Induction of Malignant Transformation *in vitro* by Radiation."

Tuesday, April 6

Materials Science, 9:45 a.m., 301 Steidle. Dr.

Philosophy, 4 p.m., 101 Kern. Frank Kirkland on "Coherence and Correspondence: Concept of Truth in Kant and Hegel."

Exhibits

Chambers Gallery: Juried Undergraduate Photo Show.

HUB Gallery: Prints by Romare Bearden and Jacob Lawrence, opens April 4.

Kern Gallery: Slavic Arts and Antiquities, opens April 5. Constantine Kermes, paintings and prints, opens April 5.

Museum of Art: Photographs from the Museum's Collection.

Director's Choice, Selected works from the Museum's Collection. Sculpture and Sculptural Objects from the Museum's Collection, opens April 4.

Pattee Library: Rare Books Room: Vergil: 200 Years, through April 5; Goethe: The Fortunes of Faust.

East Corridor Gallery: Prints from the collection of the Arts Library, through April 6; Ed Leos, photographs, "Dorothy Roberts and her Poetry," opens April 6.

Main Lobby and Second Floor, East Pattee: A Tribute to Natalie Wood, through April 6; Morgan Paine, paintings, opens April 9. Lending Services Lobby: Judy Stern, portraits, through April 9; David Vaughan, photographs by the sea, opens April 9.

West Pattee Lobby: Allyson Lush, paintings, prints and drawings.

Paul Robeson Cultural Center: "Twenty Five Approaches to Contemporary Printmaking."

Visual Arts Bldg., Zoller Gallery: Glenn Zweygard, Alfred University, sculpture, through April 4; Dave Harmon and Paul Flexner, paintings, opens April 7.

Bruce Murphy

Physiologist, director visit

Returning to University Park next week as Alumni Fellows are Howard G. Knuttgen of Boston and Stanley B. Lathan of Los Angeles.

Dr. Knuttgen, professor of physiology and chairman of the Department of Health Sciences at Boston University, received his master's degree at Penn State in 1953. A guest of the College of Health, Physical Education and Recreation, he will be on campus April 12 through 16.

Mr. Lathan, a 1967 alumnus, is a film and television director. As a guest of the College of the Liberal Arts, he will visit from April 13 through 16.

Dr. Knuttgen, who earned his doctorate at Ohio State, is an internationally-known exercise physiologist. He is currently the U.S. delegate to the International Federation of Sports Medicine and also serves as a member of the executive board of the Pan American Confederation of Sports Medicine.

One of the nation's foremost independent film and television directors, Mr. Lathan won an Emmy in 1970 for his work with "Black Journal," a magazine-format television program.

He also was the grand prize winner at the 1980 American Film Festival for his *The Sky is Grey*.

Mr. Lathan has directed eight concerts at Wolf Trap for PBS and segments of several long-running television series.

Nobel Laureate arrives April 12

Dr. Eugene P. Wigner, the 1963 Nobel Laureate in physics, will deliver two talks at University Park on Monday, April 12.

He will deliver a seminar at 3 p.m. in Room 445 Davey Lab at 3 p.m. on "The Principle of Determinism and its Relationship to the Quantum Mechanical Measurement Process." A reception at 2:30 p.m. will precede the seminar.

"The History of Nuclear Power: The Early Days" will be Dr. Wigner's topic at 7:30 p.m. the same evening, and he will speak in Room 112 Walter Building.

Dr. Wigner is Thomas D. Jones Emeritus Professor of Mathematical Physics at Princeton University. The holder of 21 honorary degrees, he has received the Atoms for Peace Award, the National Medal of Science and the Albert Einstein Award.

His visit is being sponsored by the Department of Physics, the American Nuclear Society and the Department of Nuclear Engineering.

Walt Rostow is Elliott speaker

Walt Whitman Rostow, national security affairs adviser to two U.S. presidents, will deliver the 1982 William Elliott lecture Wednesday, April 14, at 9:45 a.m. in Keller Auditorium.

Dr. Rostow's address, titled "A Prescription for the American Economy," will open the eighth annual William Elliott Invitational Conference, Wednesday and Thursday, April 14 and 15, in the College of Business Administration.

On Thursday, April 15, at 9 a.m., Gene P. Altschuler, principal of the management consulting department of Peat, Marwick, Mitchell & Company, will lead a discussion among conference participants.

The William Elliott Conference annually attracts senior executives of the insurance industry, its trade and professional associations and leading academicians in the field, according to CBA Dean Eugene J. Kelley.

Dr. Rostow is the Rev G. Baker Jr. Professor of Political Economy at the University of Texas, where he has been a faculty member for 13 years.

Before that, he served as special assistant for national security affairs to

President Johnson from 1966 to 1969. He was deputy special assistant for national security affairs to President Kennedy in 1961.

The recipient of the Order of the British Empire, the Legion of Merit and the Presidential Medal of Freedom, Dr. Rostow received his bachelor's and doctoral degrees from Yale University and attended Oxford University as a Rhodes Scholar.

Dr. Rostow is the author of 22 books or monographs, including *The Division of Europe after World War II: 1946*, which has just been published.

Dr. Rostow will lead a seminar session of conference participants from 2 p.m. until 4:30 p.m., Wednesday afternoon, following his public lecture.

Mr. Altschuler is in charge of his firm's Electronic Data Processing Advance Technology Group.

The annual spring conference at Penn State's College of Business Administration is named for William Elliott, consultant and former chairman of the Executive Committee of Philadelphia Life Insurance Company.

Murphy chosen for Honors talk

Bruce Allen Murphy, author of *The Brandeis-Frankfurter Connection: The Secret Political Activities of Two Supreme Court Justices*, will give the keynote address at the 1982 Honors Convocation Sunday, May 9, at 2 p.m. in Eisenhower Auditorium.

During the convocation, some 300 undergraduate students and four faculty members representing all Penn State campuses will be cited for academic excellence.

Dr. Murphy, 30, an assistant professor of political science at Penn State, will speak on "Penn State and the Ivy League Syndrome."

Dr. Murphy's book was published on Feb. 22 by Oxford University Press. It astounded the nation with evidence that Justice Louis D. Brandeis paid more than \$50,000 over a 22-year period to Felix Frankfurter, then a Harvard law professor, to further the Justice's public policy goals.

Heralded by *The New York Times*, *Newsweek*, *The Washington Post* and other major publications, the book has sparked a national debate on the ethics of extrajudicial behavior by Justices.

Dr. Murphy graduated summa cum laude in political science from the University of Massachusetts in 1973. He came to Penn State in 1978 after earning a doctorate at Virginia.

Faculty asked to return surveys

In keeping with the concern expressed for advising in *A Perspective on the '80s*, the Division of Undergraduate Studies is conducting an analysis of the University's undergraduate academic advising program.

The purpose of the analysis is to develop a comprehensive, objective and quantifiable description of the undergraduate academic advising program as it exists throughout the University.

Five constituencies in the University are being asked to provide survey data about academic advising for undergraduate students: faculty, college deans, Commonwealth Campus academic officers, selected department heads and selected students. Participation by faculty members is essential to the completeness of the analysis.

Faculty surveys were mailed during the first week in April. Faculty members are asked to return their completed surveys by April 15.

Biochemist to give Priestley Lectures

Dr. Daniel E. Koshland, Jr., professor of biochemistry at the University of California, Berkeley, will present the 1982 series of Priestley Lectures April 12, 13, 14 and 15 at 8 p.m. in Room 5 S Osmond Laboratory.

The lectures, entitled "The Chemistry of Sensing and Regulation," are sponsored by the Mu Chapter of Phi Lambda Upsilon chemistry honorary and the College of Science. Specific topics are: "The Receptors and Information Output," "Function of the Processing System," "The Detector and the Behavioral Output" and "The Potentialities and Limits of Signal Amplification."

Dr. Koshland is an authority on enzyme and protein structure. A member of the National Academy of Sciences, he is chairman of the Academy Forum, a committee of NAS which helps develop policy on issues posing dilemmas at the interface between science and societal problems. He is also a member of the American Academy of Arts and Sciences and served on its Council from 1975 to 1979.

Dr. Koshland, a Berkeley alumnus, earned his doctorate at the University of Chicago in 1949.

R.G. Forman

R.A. Zimmerman

Alumni boards to attend conference

Richard A. Zimmerman, president and chief operating officer of Hershey Food Corporation and president of the Penn State Alumni Association, will address a special conference for alumni at University Park on Friday, April 16.

Mr. Zimmerman, a 1953 Penn State graduate, will speak at a dinner meeting for members of the University's 10 college alumni societies' boards of directors.

Also speaking during the conference will be Dr. Robert G. Forman, executive director of the University of Michigan Alumni Association and former chairman of the board of CASE (Council for Advancement and Support of Education).

The conference will enable members of the college alumni societies' boards of

(Continued on page 2)

Penn Staters

Dr. Andrea M. Mastro, assistant professor of microbiology and cell biology, has received a Research Career Development Award from the National Cancer Institute of the National Institutes of Health. The five-year award will help support her research on the effects of tumor-promoting substances on lymphocytes, a type of white blood cell.

Dr. Mastro earned her M.S. in zoology (1968) and her Ph.D. in biology (1971) at Penn State after receiving a B.A. in biology at Carlow College. She did postdoctoral work at The Imperial Cancer Research Fund Laboratory in London and was a Damon Runyon Foundation Postdoctoral Fellow at the University of Wisconsin. She returned to the University in 1975 as a research associate, assuming her current position in 1979.

Dr. Gerard J. Brault, professor of French and Fellow, IAHS, delivered invited lectures at the University of Wisconsin on the topics, "The Impact of the Discovery of America on Renaissance France" and "How to Read a Chanson de Geste." He spoke also at the University of North Carolina-Chapel Hill on "Heraldry and Hunting: Two Ancillary Sciences in the Middle Ages."

The British Broadcasting Corporation's production of *Going Gently*, a novel by Robert C.S. Downs, professor of English, has been named "Best Television Film of 1981" by the British Academy of Film and Television Arts. Professor Downs is director of the writing program.

Dr. James S. Sims, assistant professor of chemistry at Mont Alto, is one of 30 scientists selected nationwide to participate in a 10-week Summer Faculty Fellowship at the Goddard Space Flight Center.

The fellowships are sponsored jointly by NASA and the American Society for Engineering Education. Recipients receive a weekly stipend and travel expenses while working at the Center on basic research problems connected with space flight. Dr. Sims' research deals with the measurement of energy transfer in the scattering of electrons off of hydrogen and helium atoms.

Dr. David L. Pearson, associate professor of biology, recently gave an invited lecture to the Entomological Society of Peru in Lima. He discussed "Insect Community Structure Studies in Tropical Forests."

Provost Edward D. Eddy will deliver a paper on "Academic Planning for Strength and Security" at the annual conference of the Chief Academic Officers of the Eastern States.

Paul West, professor of English and comparative literature and Fellow, IAHS, was recently Distinguished Visiting Writer in Residence at Wichita State University and gave readings there from his fiction. He also gave a reading at the Kendall College of Arts and Sciences at the University of Tulsa.

Dr. Gordon F. De Jong, professor of sociology and associate director of the Population Issues Research Center, presented lectures on "Micro-level Migration Theory: A New Model" at Florida State University and on "Childless But Not Choices: Longterm Consequences for Life Satisfaction" at the East-West Center, Honolulu, Hawaii.

Dr. Eugene N. Borza, professor of ancient history, gave a faculty seminar at the University of Texas at Austin on the subject of 19th century philhellenism and modern images of ancient Greece.

Dr. Christine M. Gregg, assistant professor of biology, recently gave an invited lecture to the Department of Pharmacology at Columbia University. She discussed "In Vitro Techniques for the Study of Vasopressin Release."

Dr. Peter Gould, professor of geography, presented a series of seminars at the Geographic Research Institute at the University of Lisbon during term break. His topic was contemporary methods of geographic research.

Dr. Joseph Jordan, professor of chemistry, recently chaired a review panel which evaluated graduate programs in chemistry at the City University of New York.

Bookshelf

Associate Provost Richard P. Chait is co-author with Andrew T. Ford of Allegheny College of *Beyond Traditional Tenure: Guide to Sound Policies and Practices* (Jossey-Bass, Inc.)

The authors begin by considering the probable future of conventional tenure systems. Several variations of term contracts, the chief alternative to tenure, are evaluated in relation to their impact on faculty turnover, program innovation, faculty morale and performance, academic freedom and curriculum flexibility.

Dr. Chait and Dr. Ford devote three chapters to modifications of classical tenure, including non tenure tracks, extended probation periods, waiving the "up or out" rule, tenure quotas, and evaluation of tenured faculty. They also discuss the various types of non-tenure-track appointments, suggesting ways to make such appointments of benefit both to faculty members and their institutions.

The authors then turn to the policies and practices basic to effective personnel administration. Using case studies from institutions that have developed sound tenure practices, they identify such common elements as use of explicit evaluation procedures, recognition that evaluations are competitive, and reliance on peer review.

Translating personnel policy into action, the authors discuss useful strategies for salary administration and merit pay programs, along with non-financial incentives.

The final chapter outlines a general framework for auditing the effectiveness of any academic personnel system.

Faculty/Staff Alerts

W-4E renewal

The Controller's Office reminds employees who filed a Withholding Exemption Certificate — Form W-4E — for 1981 that this certificate will expire April 30, 1982, for taxpayers on a calendar-year basis. The exemption claimed on Form W-4E must be renewed annually.

Employees who qualify and wish to continue their exemption, and employees applying for the first time, must file a new Form W-4E for 1982. They claim the exemption from withholding if they had no income tax liability for 1981 and if they anticipate no income tax liability for 1982. Forms are available from the Payroll Department, Room 301 Shields Building.

In general, the elimination of the withholding applies only to employees working part-time. The principal advantage is that it will eliminate the need to file an income tax return at the end of the year to obtain a refund of money withheld.

Unemployment eligibility

When, on occasion, the Office of Personnel Administration receives inquiries about the Pennsylvania Unemployment Compensation Law as it applies to the University, the questions raised usually concern coverage and employee eligibility to receive unemployment compensation benefits.

In responding, Personnel Administration staff explain that Unemployment Compensation is like an insurance plan designed to afford eligible employees limited protection against loss of wages while out of work through no fault of their own.

This job insurance, however, does not protect employees against wage loss if they are absent from work through illness or if they are not working by their own choice.

The State Office of Employment Security — not the University — determines the eligibility of persons to receive benefits. Payments are made only to persons who qualify. Payments are not based on need.

It is important to note that employers pay the total cost of providing unemployment insurance for their employees. Employees do not pay any of this cost. Insurance against unemployment is entirely separate from the insurance commonly termed "Social Security," which provides another cushion against complete loss of earnings to individuals and dependents because of retirement or death. Employees, together with employers, help to pay for this latter form of insurance.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p. m., April 15, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment Practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, sex (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT DIRECTOR FOR ENGINEERING AND PROJECTS, COLLEGE OF MEDICINE, HERSHEY — Responsible to the Director, Physical Plant, Medical Center, for engineering functions as required for the operation of the physical plant. Duties include all project coordinating, including information acquisition, design, estimating, bidding, purchasing and construction. A bachelor's degree in engineering, business, or a related field, plus four to five years of effective experience in the area of facility engineering design, construction, maintenance, operation, and/or management.

TEAM PHYSICIAN, COLLEGE OF HEALTH, PHYSICAL EDUCATION AND RECREATION, UNIVERSITY PARK — Responsible to the Athletic Director and the Dean of the College of Health, Physical Education and Recreation for providing medical care to intercollegiate athletes of the University, and for supervising the athletic trainers regarding their role in the medical delivery system to the intercollegiate athlete. A doctor of medicine degree, or its equivalent, from an accredited school of osteopathy, and a license to practice medicine in the Commonwealth of Pennsylvania, plus four to five years of experience in sports medicine or a related field.

VISUALS/PHOTOGRAPHIC EDITOR, COLLEGE OF AGRICULTURE, UNIVERSITY PARK — Responsible to the Assistant Director of Agricultural Communications for photography to be utilized as photojournalism in newspapers, magazines, exhibits, slide and filmstrip presentations, motion pictures and publications. Work with specialists and fellow communicators in learning and sharing creative and imaginative visual skills to produce visuals for various professional, public and student audiences. Participate in training activities (workshops, conferences, seminars and meetings) related to visuals that are conducted for Extension workers, related professional groups, and public audiences such as visiting foreign specialists and 4-H youths. Bachelor's degree (or equivalent) plus one to two years of effective experience in photographic film shop, or visual applications in commercial or educational work that can be applied to Extension activities and objectives.

PERSONNEL INFORMATION ASSISTANT, OFFICE OF PERSONNEL ADMINISTRATION, UNIVERSITY PARK — Responsible to Coordinator-Personnel Systems for preparing computer programs, documenting procedures and providing general support for personnel projects, research, data retrieval and reporting. Bachelor's degree (or equivalent) in business administration, data processing or related area, and six to nine months of effective experience in programming or associated degree (or equivalent) in data processing or related area, with one to two years of effective experience in programming activities.

ASSISTANT DEAN OF STUDENT AFFAIRS, BEHREND COLLEGE — Responsible to the Dean of Student Affairs for administration and coordination of the various functions within the Student Affairs operation. The Behrend College, primarily in the areas of Residential Life and Academic Standards. Living in a residence hall apartment is required. Acts for the Dean of Student Affairs as assigned. Master's degree or equivalent in college student personnel services or related field, plus two to four years of effective experience.

Capability Week

Because Penn State has taken such an active role in enhancing educational opportunities for the handicapped, I am very happy to proclaim the week of April 5 through April 9 "Capability Week."

The name has been chosen deliberately to call attention to the strengths and capabilities of the physically handicapped individuals living in our University community and to stress that physical disabilities need not exclude one from a rich and active life. "Capability Week" is being sponsored by ABLED — the Association of Barrier-Free Living, Environment and Design — and I urge members of the faculty, staff and student body to broaden their perspectives by participating in this week's activities.

President John W. Oswald

Student wins Goddard award

A Penn State junior, Stephanie Anne Gajjar, has won the Dr. Robert H. Goddard Scholarship presented by the National Space Club.

She accepted the award, which consists of a \$3,500 grant, certificate and plaque, at the Club's annual dinner last month in Washington, D.C. Among the honored guests were the astronauts aboard the first two Space Shuttle missions.

Only one Goddard Scholarship is awarded annually. Miss Gajjar was chosen for the award from more than 100 candidates from 42 states.

According to the Club, the scholarship was established "to stimulate the interest of talented students in the opportunity to advance scientific knowledge through space research and exploration."

A member of the University Scholars Program, Miss Gajjar is majoring in both physics and the engineering science and mechanics honors curriculum.

Altoona to install solar heating system

A grant from the Governor's Energy Council for Energy Conservation Measures will help build the first non-experimental solar heating system at Penn State.

Plans for the system's installation in the Adler Building, a physical education facility at the Altoona Campus, have been announced by the Executive Energy Committee.

The active hot water solar heating system will use solar collectors to heat a liquid transfer medium, which will be pumped to a heat exchanger. Energy culled from the exchanger will be used to heat a swimming pool partially and supply hot water for locker room showers.

The solar system is one of several energy improvements for the Adler Building made possible by the matching funds grant from the Governor's Energy Council.

Construction for the new system is scheduled to begin in July of this year and to be completed in September.

Alumni conference

(Continued from page 1)

directors — who are all volunteers — to exchange information and ideas. It is being organized by Heather R. Gilbert, assistant executive director of the Alumni Association.

Dr. Richard E. Grubb, senior vice president for administration at Penn State, also will address the conference, which is expected to draw some 150 participants.

Photography linked to Cubist style

"Cubism and American Photography 1910-1930" is the title of a talk to be presented by John Pultz, Newhall Fellow at the Museum of Modern Art in New York. Tuesday, April 20, at 10:30 a.m. in the Museum of Art.

Mr. Pultz is one of two curators of an exhibition with the same title now touring the country. He and fellow curator Catherine B. Scallen maintain that the work of such photographers as Alfred Stieglitz, Paul Strand, Edward Weston and Walker Evans did not represent a stylistic return to the 19th century photography that was made for non-artistic purposes.

"While it is true that formally and technically the 19th century documentary and vernacular photograph is close to the 20th century modernist notion of what a photograph should look like, it is not the prototype. The prototype was found in Cubism," the two curators state in the catalog for the exhibition.

Mr. Pultz and Ms. Scallen believe that Cubism provided for photography a style "related to but not imitative of modern painting." They conclude: "... the lessons from Cubism led to a photographic style so well attuned to the modern that in successive decades it was considered the inherent art style for photography."

Circus features acrobats, magic

The Chinese Magic Circus of Taiwan will perform at Eisenhower Auditorium on Friday, April 16, at 8:30 p.m. as an Artists Series Special Event.

The performance by this 17-member company includes virtuoso acrobatics, Kung Fu, brilliantly costumed traditional dancing and magic.

Most of the acts in this circus reflect a cultural tradition going back many centuries in Chinese history. In one of the most remarkable feats of the show, an acrobat places four bottles on a table, balances a series of chairs on the bottle necks, climbs to the top chair and executes a vertical one-handed handstand.

In still another feat of daring, an acrobat jumps through a burning circle that holds a dozen knives pointed at his body — blindfolded.

Tickets for the Chinese Magic Circus of Taiwan will be on sale at Eisenhower box office beginning Tuesday, April 13, from 9 a.m. to 4 p.m. The HUB Booth will be open on April 13 only. Phone orders will be accepted on MasterCard/VISA at 863-0255.

Easter Buffet at Inn

The Nittany Lion Inn is featuring a special Easter Buffet from 12 noon to 2:30 p.m. and from 6 to 8 p.m. on Sunday, April 11.

The menu includes Roast Top Round of Beef, Seafod Newburg, Baked Ham with Brandy Sauce, Chicken Coq au Vin, and Kielbasa and Sauerkraut. There will be a wide array of salads, cheeses and desserts.

The dinner is available for \$9.50 for adults and \$4.95 for children under 12 years of age. A dress code will be in effect.

Woody Allen hit to be staged at Kern

Play It Again, Sam, the hit Broadway comedy by Woody Allen, will be presented next week by the University Resident Theatre Company and Kern Theatre.

The drama, which focuses on a neurotic film critic's efforts to overcome the breakup of his marriage by seducing beautiful young women, will be performed at the Kern Theatre April 15 through 18, Thursday through Sunday, at 8 p.m. On April 14, there will be a

Dr. Deihl (left) and Dr. Udow

Symphonic Band to play April 18

The Symphonic Blue Band under the direction of Dr. Ned C. Deihl, professor of music education, will present its annual spring concert Sunday, April 18, at 3:30 p.m. in Eisenhower Auditorium.

Featured with the 85-member ensemble will be Michael Udow, assistant professor of music and principal percussionist with the Santa Fe Opera. He will perform solo timpani in Julius Tausch's *March and Polonaise*, followed by a virtuoso display of mallet keyboard in ragtime style.

The band will present Giannini's *Symphony No. 3* for Band, Malcolm Arnold's "Four Scottish Dances," Tchaikovsky's *1812 Overture*, a medley by Marvin Hamlisch and various concert marches.

Fenner, Luening concert Friday

"Compositions by Burt Fenner and Otto Luening will be performed by School of Music faculty in a Friday, April 16, concert at 8:30 p.m. in the Music Building recital hall.

Three of Mr. Fenner's works comprise the first half of the program. Bassoonist Georgia Peeples, trombonist David Gatts, pianist Michael Udow and cellist Leonard Feldman will perform his "Study for Timpani and Low Instruments."

Soprano Suzanne Roy and pianist Steven Smith will be featured in "Eleven Voodoo Songs," and Tustin Susan Kieck, clarinetist Smith Toulson, French hornist Christopher Callahan and Ms. Peeples will play "Strange Loops."

Mr. Luening's *Sonata for Trombone and Piano*, with Mr. Gatts and pianist Robert Baisley, will open the second half of the concert. Ms. Peeples and pianist Keith Ward will perform the composer's *Sonata for Bassoon and Piano*, and violinists Joanne Zagst and Donald Hopkins, violist Raymond Page and Mr. Feldman will play the final number, the String Quartet No. 3.

Mr. Fenner is a professor of music at the University. He studied with Mr. Luening, a retired music faculty member at Columbia University.

student preview and on April 17, a dinner-performance, both also at 8 p.m.

Tickets are \$3 for the Thursday, Friday and Sunday performances, \$1 for the Wednesday preview, and \$8.50 for the Saturday combination dinner and show. They may be purchased at the Main Desk in the Kern Graduate Building from 9 a.m. to 11 p.m., Monday through Saturday, and from noon to 11 p.m. on Sunday. Information and reservations are available at 865-1878.

'Visions of a New Decade' provides the theme for this year's Black Arts Festival

"Visions of a New Decade" is the theme selected for this year's Black Arts Festival.

Keynote speaker Sonja Haynes Stone will address the topic in her talk, "The Implications of the Reagan Presidency for the Education of Blacks" Thursday, April 15, at 8 p.m. in the HUB Gallery Lounge.

An instructor in education and Afro-American studies at the University of North Carolina, Dr. Stone is a graduate of Sarah Lawrence College with a doctorate from Northwestern.

The Philadelphia-based jazz group, Pieces of a Dream, will present a concert Saturday, April 17, at 8 p.m. in Eisenhower Auditorium. The Amazing Josini, a magician and ventriloquist, will join them as the opening act.

The widely-acclaimed play, *For Colored Girls Who Have Considered Suicide When the Rainbow Is Enuf*, will be presented by Daedalus Productions Monday, April 19, at 8 p.m. in the Robeson Center.

"Reaganomics and the Survival of Black

Students in the '80s" is the topic of a panel discussion Tuesday, April 20, at 8 p.m. in Robeson. Dr. Harold Cheatham, a visiting faculty member from the U.S. Coast Guard Academy, will moderate.

Participants include Dr. Howard R. Hall III, assistant professor of psychology; Dr. Louis Anderson, a staff clinical psychologist; Dr. Edward V. Ellis, associate dean, Human Development; and Dr. Laurie M. Gunter, professor of nursing and human development.

Dr. Cheatham will moderate a second panel discussion on the same topic on Wednesday, April 21, at 8 p.m. in the cultural center. Black Studies Program Director Dr. James B. Stewart will join the group to discuss the economic impact of Reaganomics.

Eugene E. Harris of U.S. Steel, will look at the transition from campus to working world in this panel discussion.

Persons desiring more information about the Black Arts Festival may contact the Robeson center at 865-3776.

Naiads swim show offering 12 routines

The Naiads Synchronized Swimming Club, sponsored by the College of Health, Physical Education and Recreation, will present their annual performance Thursday through Saturday, April 15, 16 and 17.

This year's show, "Aqua Alternatives," will begin at 8 p.m. each evening at the Natatorium. Twelve swimming routines have been choreographed to music from the entertainment world, ranging from Broadway, television and the movies to classical works. The 25 swimmers will appear under the lights in duets and in small and large group numbers.

Tickets are available at the Athletic Ticket Office in Rec Hall or can be obtained at the door on performance nights, beginning at 7:30 p.m.

N.O.W. leader to talk

Jane Wells-Schooley, vice president of N.O.W. (National Organization for Women), will speak Wednesday, April 14, at 8 p.m. in the HUB Ballroom.

Her appearance is sponsored by Colloquy as part of its "Women in Power" series.

Ms. Wells-Schooley holds two Penn State degrees, a 1969 B.A. in English and a 1973 M.A. in speech communication. Elected to her N.O.W. post in 1979, she is responsible for legislative lobbying on all issues apart from the E.R.A. campaign.

South African poet examines Reagan policy

Dennis Brutus, an exiled South African poet, will look at "The Reagan Administration and South Africa" Monday, April 12, at 12:45 p.m. in Room 111 Mueller Building.

His lecture, which is the first in the Spring Lecture Series of the Black Studies Program, will be part of a class in Social Science 110.

Professor of African literature at Northwestern University, Mr. Brutus is a leading critic of South Africa's apartheid system of racial segregation and is president of the South African Non-Racial Olympic Committee, a group which promotes international sports boycotts of that country.

CUNY professor visits

Dr. Barry J. Luby, professor of Spanish at John Jay College of Criminal Justice (CUNY), will speak on "The Existential Conflict in Unamuno and Modern Thought" Monday, April 12, at 7:30 p.m. in Room 101 Kern Building.

Three talks end photography events

Two speakers from Great Britain will present the final lectures in this year's History of Photography Events.

A Londoner, Felicity Ashbee, will discuss "Photography in 19th Century Russia: William Carrick and His World" on Monday, April 12, at 3:30 p.m. in Room 101 Kern. Her talk is being co-sponsored by the Departments of Slavic Languages and Art History.

John Taylor, senior lecturer in the history of art at Stourbridge College and part-time lecturer at Woolverhampton Polytechnic, will make two presentations.

He will talk on "Turn-of-the-Century Movements: The Linked Ring Brotherhood" on Monday, April 19, in Room 101 Kern. This talk is being co-sponsored by the Department of Art History.

The next day (Tuesday), his topic will be "Photography and Propaganda During the First World War." This talk is scheduled at 8 p.m. in Room 101 Kern.

Ms. Ashbee is the grandniece of William Carrick, a Scottish lumber tradesman who settled in Russia in the 19th century.

Mr. Taylor is the official purchaser of photographs for the West Midlands Art Association. He will be on campus for a month as a Visiting Fellow of the Institute for the Arts and Humanistic Studies.

Piano recital April 14

Pianist Steven Glaser, an instructor in music, will perform works by Mozart, Brahms, Debussy, Chopin, Liszt and Paganini Wednesday, April 14, at 8:30 p.m. in the Music Building recital hall.

Mr. Glaser, who joined the University music faculty this past fall, received his B. Mus. degree with honors from the University of Michigan and his M. Mus. degree from Julliard.

He has given concerts in Alice Tully Hall and Carnegie Recital Hall in New York, made a concert tour of Israel and is currently giving a series of recitals in the New York metropolitan area.

University Park Calendar

April 8 — 23 Special Events

Thursday, April 8

Registrations are being accepted for after-school art classes sponsored by Art Education, School of Visual Arts. Information available from Kristi Rehm, at 863-5879.
Medieval Studies Lecture, 1 p.m., Music Bldg. recital hall. Ruth Steiner, Catholic Univ. — "The Music for a Cluny Office of Saint Benedict."

Sports: baseball vs. Lock Haven (DH), 1:30 p.m. Kern Classics, *My Fair Lady*, 8 p.m., 112 Kern. New German Cinema, *Brandtner, I Love You, I Kill You*, 7 and 9 p.m., HUB Assembly Room. Also April 9.

Penn State Dances meeting, 7:30 p.m., 101 Kern.

Friday, April 9

Geography Dept. Coffee Hour, 3:40 p.m., 119 Walker. Marc Treib, prof. of architecture, UC-Berkeley, on "Mapping Experience." Cinematheque, *Yojimbo*, 7 and 9:15 p.m., 121 Sparks. Also April 10.
GSA Coffeehouse, 8 p.m., 112 Kern. Shaver's Creek Environmental Center, Gordon Bok Concert, 8 p.m., Faculty Club.

Saturday, April 10

Deadline for final oral doctoral examinations for May graduates.
Deadline for May graduates to deliver master's theses or papers to advisors.
Sports: tennis (men) vs. East Stroudsburg, Mercyhurst and Rochester. Also April 11.

Sunday, April 11

Nittany Lion Inn, special Easter Buffet, 12-2:30 p.m., 40 m.
Sports: baseball vs. Howard (DH), 1 p.m.

Monday, April 12

Fixed date for meetings involving Commonwealth Campus faculty. Also April 13.
Deadline for May graduates to submit camera-ready theses manuscripts to Thesis Office.

Black Studies Program Lecture, 12:45 p.m., 111 Mueller. Dennis Brutus, exiled South African poet, on "The Reagan Administration and South Africa."
History of Photography Lecture, 3:30 p.m., 101 Kern. Felicity Ashbee, London, England, on "Photography in 19th Century Russia: William Carrick and His World."

Science-Engineering Lecture, 7:30 p.m., 112 Walker. Eugene P. Wigner, Nobel Laureate, on "The History of Nuclear Power: The Early Days."

IAHS film on Polish Jewry, *Image Before My Eyes*, 7:30 p.m., 101 Chambers.

Unamuno Lecture, 7:30 p.m., 101 Kern. Dr. Barry J. Luby, John Jay College of Criminal Justice, CUNY, on "The Existential Conflict in Unamuno and Modern Thought."

College of Science, Priestley Lecture Series, 8 p.m., S-5 Osmond. Daniel E. Koshland, Jr., Univ. of California-Berkeley, on "The Chemistry of Sensing and Regulation." Also April 13, 14 and 15.

Tuesday, April 13

Comp. Lit. Luncheon, 12:15 p.m., 101 Kern.
Timothy Bahr, Commonwealth Literature, Cornell Univ., on "European Romanticism." Instructional Development Workshop, "Utilizing Large Classroom Environments," 3-4:30 p.m., 305 HUB. Also April 14, 9:30-11 a.m.

Registration for children's basic movement skills classes, 3:45 p.m., White lobby.

Sports: volleyball (men) vs. East Stroudsburg, 7 p.m.

CSA Council meeting, 7:15 p.m., 101 Kern. APPLE Users Group meeting, 7:30 p.m., 189 Materials Research Lab.

HUB Craft Center, open house and registration for second session classes, 7:30-9:30 p.m., 312 HUB.

Artists Series, *Notes of Hoffmann*, 8 p.m., Eisenhower.

Wednesday, April 14

William Elliott Lecture, 9:45 a.m., Keller Auditorium. Wall Whitman Rostow, Rex C. Baker Jr. Professor, Univ. of Texas, on "A Prescription for the American Economy." Commons Concert, noon, Kern Lobby.

Sports: softball vs. Clarion, 2:30 p.m. Un-Common Theatre, Student Preview, *Play It Again Sam*, 8 p.m., 112 Kern.

English Colloquium, 8 p.m., 101 Kern. Timothy Bahr, Cornell Univ., on "Auerbach Today." Steven Glasser, pianist, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 15

New German Cinema, Fassbinder, *Satan's Brew*, 7 and 9 p.m., HUB Assembly Room. Also April 16.

Museum of Art film, *The Hero as Artist*, 7 p.m., 112 Kern.

Un-Common Theatre, *Play It Again Sam*, 8 p.m., 112 Kern. Also April 16 and 18.

Naiads Synchronized Swimming performance, 8 p.m., Natatorium. Also April 16, 17.

Black Cultural Arts Festival Keynote Address, 8 p.m., HUB Gallery Lounge. Sonja Haynes Stone, Univ. of North Carolina, on "The Reagan Presidency and the Education of Blacks."

Friday, April 16

STS/Three Cultures Dialogue, 12:20 p.m., 101 Kern. Frederick R. Eisele, social planning, on "The Issue of Aging: Integrating Short- and Long-Range Planning."

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. Wilbur Zelensky, geography, on "Oh, Say Can You See? — The Impact of Nationalism on the American Landscape."

121 Sparks. Also April 17.
Artists Series, The Chinese Magic Circus of Taiwan, 8:30 p.m., Eisenhower.

IAHS concert, 8:30 p.m., Music Bldg. recital hall. Compositions by Burt Fenner and Otto Luening performed by School of Music faculty.

Saturday, April 17

Sports: baseball vs. St. John's (DH), 1 p.m.; track and field (men), Memorial Invitations — Fairleigh Dickinson, George Mason and Slippery Rock, 1 p.m.; lacrosse (men) vs. Rutgers, 7:15 p.m.; lacrosse (women) vs. Rutgers, 1 p.m.; tennis (men) vs. Bloomsburg, Colgate and West Virginia. Also April 18.

Un-Common Dinner Theatre, *Play It Again Sam*, dinner, 6:30 p.m.; performance, 8 p.m., 102 Kern.

Sunday, April 18

HUB Craft Center, second session classes begin. Shaver's Creek Environmental Center, Bird Breakfast, 7 a.m.; Wildflower Walk, 2 p.m. Symphonic Blue Band Spring Concert, 3:30 p.m., Eisenhower. Michael Udow, music, soloist.

Monday, April 19

Commons Secretaries' Week Plant Sale, 10 a.m.-4 p.m., Kern Lobby. Also April 20.

IAHS/Spans Communication Lecture, 4 p.m., 112 Kern. Lloyd Bitoul, Univ. of Wisconsin-Madison, on "Miraculous Rhetoric: Hume and the 18th Century Dispute Concerning Miracles."

France-Cinema, Clement, *Forbidden Games*, 7 and 9 p.m., 112 Kern.

Black Arts Festival, 8 p.m., Robeson Center. Dardelus Productions, "For Colored Girls Who Have Considered Suicide When the Rainbow Is Enuf."

History of Photography Lecture, 8 p.m., 101 Kern. John Taylor, Stourbridge College, England, on "Turn of the Century Style Movements: Linked Ring Brotherhood."

Tuesday, April 20

Gallery Talk, 10:30 a.m., Museum of Art. John Pultz, Museum of Modern Art, on "Cubism in American Photography — 1910-1930."

Comp. Lit. Luncheon, 12:15 p.m., 204 HUB. Athol R. Jennings, headmaster, Waterford Kamhlaba United World College, Swaziland, on "Alan Paton's *Ah, But Your Land Is Beautiful*."

Sports: softball vs. Lock Haven, 2:30 p.m. Dance Workshop, student choreography presented, 5:45 p.m., White Bldg. Theatre.

Medieval Studies Lecture, 4 p.m., 124 Sparks. John Meyendorff, Fordham Univ., on "Monastic Revival in Byzantium."

History of Photography Lecture, 8 p.m., 101 Kern. John Taylor, Stourbridge College, England, on "Photography and Propaganda during the First World War."

Artists Series, *All That Jazz*, 8 p.m., Schwab.

Wednesday, April 21

Commons Concert, noon, Kern Lobby. Graduate Council meeting, 3 p.m., 101 Kern. Kern Classics, *Mao in Mozart*, 7 and 9 p.m., 112 Kern. Also April 22.

English Colloquium, 8 p.m., 101 Kern. Geoffrey Bock, visiting professor, English, on "The Serious Business of Humorous Writing."

Thursday, April 22

Sports: softball vs. West Virginia, 2:30 p.m.; tennis (men) vs. Maryland, 2:45 p.m. New German Cinema, Schlöndorff, *Young Törless*, 7 and 9 p.m., HUB Assembly Room.

IAHS Lecture, Dora de Pedry-Hunt, Canadian medalist, on her work, 8 p.m., Zoller Gallery.

Friday, April 23

Fourth Annual Slavic Folk Festival, 9 a.m.-10 p.m., Robeson Cultural Center. Also April 24, 9 a.m.-5 p.m.

Civil Engineering Open House, 1-5 p.m., Kunkle Lounge, Hammond. Also April 24, 3-5 p.m.

Commonplace Theatre, *Arthur*, 7 and 9 p.m., 112 Kern. Also April 25.

Cinematheque, *Paving Stripes*, 7 and 9 p.m., 121 Sparks. Also April 24.

Seminars

Thursday, April 8

Chemistry, 12:45 p.m., 333 Whitmore. Andre Drieding, Univ. of Zurich, on "A Computer-Fit Model for Chemical Structures."

Anthropology, 3:30 p.m., 107 Carpenter. John H. Relfelhof, SUNY, on "Social Class and the Genetic Structure of Island Population."

Physics, 3:50 p.m., 117 Osmond. J. Krumhals, Cornell Univ., on "Non-Linear Behavior, the Old and the New in Physics."

Philosophy, 4 p.m., 101 Kern. Frank Kirkland, Univ. of Oklahoma, on "Coherence and Correspondence: Concepts of Truth in Kant and Hegel."

Monday, April 12

Physics-Nuclear Engineering, 3 p.m., 445 Davey. Eugene P. Wigner, Nobel Laureate, on "The Principle of Determinism and its Relationship to the Quantum Mechanical Measurement Process."

Entomology, 4 p.m., 204 Patterson. Robert Snetsinger, entomology, on "The Hazards of Thinking Like an Insect."

MC3B, 4 p.m., 101 Althouse. William E. Rawls, Dept. of Pathology, McMaster Univ., on "The Association of Herpes Simplex Virus Type 2 and Cervical Cancer; An Epidemiologic Model of the Role of Viruses and Cancer."

Tuesday, April 13

Metallurgy, 9:45 a.m., 301 Steidle. P.R. Howell, metallurgy, on "An Introduction to Analytical Electron Microscopy."

Solid Waste Management, 2:20 p.m., 128 Sackett. G. Gross, Loss, Inc., on "Instrumentation for the Identification of Hazardous Waste."

Plant Pathology, 3:45 p.m., 213 Buckhout. Barbara Illman on "Berkeley — Classic — 8."

Thursday, April 15

Chemistry, 12:45 p.m., 333 Whitmore. Gary M. Hietje, Indiana Univ., on "Correlation Based Time-Resolved Chemistry."

Economics, 3 p.m., 101 Kern. Richard E. Caves, Harvard Univ., on "The Interaction of Market Structure and Market Growth."

Physics, 3:50 p.m., 117 Osmond. D. Kleppner, M.I.T., on "The Rydberg Atom."

Friday, April 16

Metallurgy, 4 p.m., 301 Steidle. M.G. Burke, U.S. Steel Research Lab., on "Application of Analytical Electron Microscopy to the Study of Stress Corrosion Cracking."

Monday, April 19

Entomology, 4 p.m., 204 Patterson. Herbert Cole, plant pathology, on "Ag Fumes —"

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Education and Research for Agriculture in the 1980s."

MC3B, 4 p.m., 101 Althouse. Daniel Nebert, Nat'l Inst. of Child Health and Human Development, on "Genetic Differences in the Enzymes that Metabolize Drugs."

Chemical Carcinogens, and Other Environmental Pollutants."

Tuesday, April 20

Metallurgy, 9:45 a.m., 301 Steidle. C.G. Pantano, ceramic science, on "Surface Techniques in Materials Science."

MC3B, 11 a.m., 101 Althouse. Daniel Nebert, Nat'l Inst. of Health Care and Human Development, on "The Ah Locus: Regulated Induction of Multiple Enzymes Which Metabolize Drugs, Chemical Carcinogens, and Other Environmental Pollutants."

Solid Waste Management, 2:20 p.m., 128 Sackett. W. Duffy on "Design for National Renovation Landfill."

Geosciences, 3:45 p.m., 22 Deike. M.L. Crawford, Bryn Mawr, on "Fluid Inclusions in Metamorphic Rocks."

Plant Pathology, 3:45 p.m., 213 Buckhout. Oran Geddes, on "Pathogenicity of *Drechslera arghillii* in Sorghum."

Computation Center, VM/CMS Exec 2, 7:30 p.m., 112 Walker. Also April 22.

Computation Center, CENSAP, 7:30 p.m., 110 Computer Bldg. Also April 22, 27.

Thursday, April 22

Chemistry, 12:45 p.m., 333 Whitmore. Philip Brooks, Rice Univ., on "Studies with Molecular Beams."

Physics, 3:50 p.m., 117 Osmond. L. Smarr, Univ. of Illinois, on "Numerical Relativity."

Exhibits

HUB Gallery: Prints by Romare Bearden and Jacob Lawrence.

Chambers Gallery: Juried Undergraduate Photo Show, through April 11. Papermaking Show, opens April 14.

Kern Gallery: Slavic Arts and Artifacts. Constantine Kermes, paintings and prints.

Museum of Art: Photographs from the Museum's Collection, through April 18. Director's Choice, Selected Works from the Museum's Collection.

Sculpture and Sculptural Objects from the Museum's Collection.

Dora de Pedry-Hunt, medals and sculpture, opens April 21.

Pattee Library: Rare Books Room: Goethe: The Fortunes of Faust.

History of Photography — A World-Wide Inquiry, April 13-24.

East Corridor Gallery: Ed Leos, photographs, "Dorothy Roberts and her Poetry."

Main Lobby and Second Floor, East: Morgan Payne, paintings.

Lending Services Lobby: David Vaughan, photographs by the sea.

West Patio Lobby: Allison Lush, paintings, prints and drawings, through April 16.

Paul Robeson Cultural Center: "Twenty-five Approaches to Contemporary Printmaking," through April 18.

Visual Arts Bldg., Zoller Gallery: David Harmon, Paul Flexner, paintings, through April 18.

Susan Smith, photographs, opens April 21.

Penn State gets \$9.6 million contract to help Swaziland

Penn State has been awarded a five-year, \$9.6 million contract to help farmers in the African nation of Swaziland increase their agricultural output.

Funding will be provided by the U.S. Agency for International Development, a unit of the U.S. State Department. The project, which begins immediately, will be administered by the College of Agriculture.

Dozens of faculty members from Penn State and Tennessee State University, which is associated with Penn State in the project, will travel to Swaziland over the next five years. Their goal is to help the nation improve its agricultural research and extension efforts. In addition, a number of college-educated Swazi agriculturalists will come to Penn State to earn their master's degrees.

"The University is extremely pleased to be awarded the contract to help Swazi farmers," President Oswald said. "Our ultimate goal is to help a developing young nation learn to feed itself, to move from the subsistence level to one in which

every Swazi citizen will be assured sufficient food and nutrition.

"The project is enormous in scope and is, in fact, Penn State's largest effort to date in the arena of international agriculture," Dr. Oswald continued. "Our being selected from among 30 universities to carry out this work reflects quite favorably on the quality of Penn State's College of Agriculture."

Dr. Oswald added that Dr. Samuel Smith, dean of the College of Agriculture, and Dr. Robert McAlexander, assistant dean and director of international agricultural programs, were instrumental in securing the contract.

Swaziland is bounded by Mozambique on the East and by South Africa on its other borders. A former British protectorate, its roughly 530,000 people are governed by King Sobhuza. About 75 percent of the working population of the country, which comprises 6,704 square miles, is employed in agriculture. Cattle is the main source of wealth, and the principal crops are sugar, citrus fruits,

cotton, rice and maize.

Dr. Dean Jansma, professor of agricultural economics, will serve as Penn State's project manager. Dr. Thomas King, associate dean for agricultural extension, will manage the project in Swaziland and has already left to take up his post.

"The project will involve nearly 40 Penn State faculty members from the College of Agriculture," Dr. Jansma said. "Eight positions, in which various faculty members will rotate, will be filled for the full five years in Swaziland. We'll also have 30 short-term people who will go there for a month or two to work on special tasks."

One of the short-term experts, Dr. C. Terry Morrow, associate professor of agricultural engineering, will leave soon for three weeks. He will inspect the Swazi computer facilities needed for the project.

"The project is basically two-fold," Dr. Jansma explains. "The first part is technical assistance, in which our faculty experts will help to redirect Swaziland's

agricultural extension research programs to focus on the needs of the small farmer."

"Swazi agriculture, he says, has two tiers. One is the large corporate farm run by foreign owners. The other is the community of small farmers. Swazi natives farm communal land, but each is given about 16 acres to farm for himself. The Penn State project is devoted to helping the small farmer increase productivity.

"The second part of the project," Dr. Jansma adds, "is called 'participant training,' in which we bring Swazi agricultural researchers and administrators here to earn master's degrees so they will be able to assume leadership positions in their nation's agricultural community when they return."

Among the Penn States who will be working in Swaziland in long-term positions are horticulturist Doyle W. Grenoble, agricultural economist Roland Freund, and agricultural communicator Glenn Bengtson.

Honors criteria altered; drops, CWC research climate debated

While approving an editorial change in a legislative report on course drops at their April 6 meeting, members of the University Faculty Senate indicated considerable disquiet about the principle of allowing eighth-week drops.

In other actions, senators accepted half of a proposal by the Committee on Undergraduate Instruction, voting to change criteria for graduation with honors, but not those used for Dean's List.

A third topic engendering considerable discussion was an informational report on the climate for research at the Commonwealth Campuses.

No alteration in the present rule on course drops — beyond the editorial change necessary to accommodate the rule to a longer time period under the new calendar — was recommended in the legislation proposed by Undergraduate Instruction. A number of senators, however, rose to express concern about

the increasing number of students taking advantage of an eighth-week escape hatch.

William H. Park (mechanical engineering) asked, "Where in business would you be allowed to give up responsibility when 80 percent of your project period has passed?"

Norman Knaub (Albion) pointed out that at a time of serious shortfall in University resources extra class sessions must be scheduled for students taking courses the second time around. Course drops, he said, allow students to bail themselves out of trouble, often after making only a half-hearted attempt. "They waste their own time and the University's," he commented.

The vote on acceptance of the editorial change was close, and Chairman Nancy Tischler indicated that a re-examination of the principle might be appropriate.

The report of the Committee on

(Continued on page 2)

Dr. Lena

Mrs. Kudo

Educator, steel officer next Alumni Fellows

Emiko I. Kudo of Honolulu, former deputy superintendent of education for the Hawaii Department of Education, and Adolph J. Lena of Dunkirk, N.Y., chairman of the board and chief executive officer of Al Tech Specialty Steel Corp., will visit University Park next week as Alumni Fellows.

Mrs. Kudo, a 1950 master's degree graduate in vocational education, will be a guest of the College of Education April 27-30. A member of Hawaii's Department of Education for 30 years, she restructured the state's vocational-technical education program. She also pioneered a Career Education Program and served as the state coordinator of career education of industry-education-labor. In addition, she founded the Hawaiian Vocational Education Foundation for Youth, which she began in 1973 with her own funds.

Dr. Lena, a 1948 recipient of a Penn State bachelor's degree, will visit the College of Earth and Mineral Sciences from April 27 to May 2.

After earning master's and doctoral degrees at Carnegie-Mellon, he joined Allegheny Ludlum Steel Corp. in 1952 as a research metallurgist, rising to vice president of the company.

He twice received Allegheny Ludlum's Frank Lounsbury Award for outstanding research achievements. An Honorary Fellow of the American Society of Metals, Dr. Lena has served the society as national secretary and as a trustee. He is a member of the board of directors of the American Iron and Steel Institute

Civil engineers mark centennial

The Department of Civil Engineering will celebrate the centennial of its founding Friday, April 23, and Saturday, April 24, with a series of activities which include an open house, concrete canoe races, a chicken barbecue at Stone Valley and a banquet.

The engineering program at Penn State began officially in September 1881 with civil engineering, and the first bachelor of science degree in this area was awarded in 1894. Since then, the department has granted approximately 4,800 degrees in civil, sanitary, highway, structural and environmental engineering.

The public can view displays of books, photos and equipment associated with the department in Kunkle Lounge on Friday from 1 to 5 p.m. and on Saturday from 3 to 5 p.m.

The second annual concrete canoe races, sponsored by the Penn State Student Chapter of the American Society of Civil Engineers, will begin at Stone Valley Saturday at 10:30 a.m., following a flotation test at 9:30 a.m.

Teams of students from 16 colleges and universities, including Penn State, will compete in the races with canoes of their own design and construction.

The activities at Stone Valley will conclude with a chicken barbecue at 1 p.m. A centennial banquet will be held at Gatsby's at 7:30 p.m.

Alumni and guests may make reservations for the barbecue and banquet by contacting the Civil Engineering Department.

Blue-White kickoff changed to 1 p.m.

The starting time for the Blue-White Football Game on May 1 at Beaver Stadium has been moved back from 2 p.m. to 1 p.m.

Earth and Mineral Sciences open doors for biennial open house on April 24, 25

Two unique university laboratories and a recently acquired oil painting are just three of the highlights of EMEX 82 — the 1982 Earth and Man Exposition, an open house in the College of Earth and Mineral Sciences.

The biennial open house, sponsored by the Earth and Mineral Sciences Student Council under the chairmanship of Diane Nork, a geosciences senior, will be held Saturday and Sunday, April 24 and 25, from 1 to 5 p.m. Visitors may pick up programs and begin self-guided tours in the lobby of Deike, Steidle or Walker.

The two unique laboratories, which will be opened to the public for the first time, are the oil drilling rig floor simulator facility and the mine electrical laboratory. The former enables students to become familiar with safe techniques of drilling for oil or gas without leaving campus, and the latter has the most complete collection

of model mine power equipment in the country.

The painting, "Coal Miners in a Lift," was done by Henry Varum Poor in 1948 as a preliminary study for the mineral industries section of Old Main's "Land Grant Frescoes." It can be seen in the Earth and Mineral Sciences Art Gallery and Museum in Steidle Building.

Other highlights of EMEX 82 will include demonstrations of the latest in weather forecasting and research facilities, gem polishing, computerized mapmaking, the electron microprobe analyzer, and scanning electron microscope.

Highly specialized facilities that will be open include laboratories devoted to instruction and research in rock mechanics and mine ventilation, data-collection on eastern earthquakes, and various aspects of metallurgy, fuel science, ceramic science, and polymer science.

Penn Staters

Two faculty members from the College of Science have been awarded 1982 John Simon Guggenheim Memorial Foundation Fellowships.

Dr. George E. Andrews, Evan Pugh Professor of Mathematics, and Dr. Gregory L. Geoffroy, associate professor of chemistry, are among 277 scientists, scholars and artists chosen from 3,200 applicants nationwide in the foundation's 58th annual competition.

Dr. Andrews, an internationally recognized number theorist, plans to spend a portion of his fellowship working with R.J. Baxter of the Australian National University in Canberra on interactions between physics and combinatorics. He will devote the remaining part to studies involving Ramanujan's "lost" notebook and symbolic manipulation computer languages.

Dr. Geoffroy, a past recipient of a Sloan Fellowship and a Dreyfus Teacher-Scholar Award, plans to work on carbon monoxide reduction by transition metals supported on zeolite catalysts in the laboratories of J.B. Uytterhoeven and Peter A. Jacobs in Belgium. Later he will visit an industrial research facility to study heterogeneous catalysis.

Dr. Graham B. Spanier, professor of human development and sociology, has been named the 1982 recipient of the Outstanding Young Alumnus Recognition Award from Iowa State University. The award is given to an individual under 35 years of age "for distinctive achievement which has honored Iowa State University." Dr. Spanier, who also serves as associate dean for resident instruction in Human Development, earned both his B.S. (1969) and M.S. (1971) in sociology from Iowa State.

Dr. Gerard J. Brault, professor of French and Fellow, IAHs, has been elected a Corresponding Fellow of the Real Academia de Buenas Letras (Royal Academy of Belles Lettres) of Barcelona, Spain. The Academy was founded in 1729 to promote literary and historical research and confers the title of Corresponding Fellow on a small number of distinguished foreign scholars. Internationally known for his publications concerning medieval French language and literature, Professor Brault also edited the first French translation (1527) of the Spanish classic *La Celestina* and is the author of several studies of the latter work and of Spanish loan-words in French during the sixteenth century. The French *Song of Roland*, an epic poem he edited in 1976, is set largely in Spain.

Dr. Roger P. Ware, professor of mathematics, presented an invited colloquium at the University of Toronto entitled "On the Galois Group of the Pythagorean Closure of a Formally Real Field."

Dr. Philip S. Skell, Evan Pugh Professor of Chemistry, presented an invited colloquium at Harvard University. He discussed "Excited States in Thermal Chain Reactions: Succinimides and Carbohydrates."

Members of the Alard Quartet presented a concert at Carnegie Hall on April 6. They will perform in New York again on May 25 in Merkin Auditorium. The Quartet has been invited to return to New Zealand this summer for a nine-week residency at the University of Canterbury. The four associate professors comprising the Quartet are Joanne Zagat Feldman and Donald Hopkins, violins; Raymond Page, viola; and Leonard Feldman, cello.

Lester P. Nichols, who retired April 1 as professor of plant pathology Extension, has received emeritus rank.

Dr. Joseph O. Prewitt-Diaz, assistant professor of education, and Dr. Michael A. Smyer, assistant professor of human development, are among 50 American professionals chosen for Class III of the W.K. Kellogg Foundation's National Fellowship Program.

The program, begun in 1980, is aimed at helping the nation expand its pool of capable leaders. It is structured to increase individuals' skills and insights into areas outside their chosen discipline so they can deal more creatively and effectively with society's problems.

Kellogg National Fellows receive a three-year grant of up to \$30,000 to pursue a professionally broadening self-designed plan of study. Class III Fellows are expected to examine broad issues relating to family life, community and international interdependence.

Dr. Prewitt-Diaz came to Penn State in 1979 after serving on the faculty of the University of Connecticut where he earned his doctorate in curriculum and instruction. His research interests include bilingual education, and he is co-chairman of the Pennsylvania Association of Bilingual Education.

Dr. Smyer came to the University in 1977. He received his doctorate in psychology from Duke University, where he also served as a part-time assistant to the president of the university. He is associate director of the Gerontology Center.

Dr. John Dawson, associate professor of mathematics at York, has been named to a committee that will oversee publication of an English edition of the collected works of Kurt Godel, one of the great mathematical logicians of this century. The committee is chaired by Professor Solomon Feferman of Stanford University, the president of the Association for Symbolic Logic. The other members are Professor Jean van Heijenoort of Harvard and Professor Gregory Moore of the University of Toronto.

Dr. Dawson has also been granted a membership for the coming year at the Institute for Advanced Study in Princeton, N.J., which will support him while he catalogue's Godel's unpublished papers. Including manuscripts, correspondence and transcripts, the *Nachlass* (German for what's "left after") fill 10 file drawers and 57 packing boxes at the Institute.

"Retrospective: 25 Years of Fiber Art" by David Van Dommelen, professor of art education, is on display at the Arrowmont School of Crafts' Gallery in Gatlinburg, Tenn., through June 1. The show originated at the University's Museum of Art.

Obituaries

Harold F. Graves, professor emeritus of English composition, died March 30 at the age of 84. A member of the faculty from 1922 until 1936, Dr. Graves was the author or co-author of four books. He earned his M.A. and Ph.D. at Penn State.

Dr. Agnes R. McElwee, professor of English composition at her retirement in 1970, died April 4. She joined the faculty of the College of the Liberal Arts in 1944, having earned M.Ed. and Ph.D. degrees at Penn State. Dr. McElwee received the Christian R. and Mary F. Lindback award for distinguished teaching in 1970.

Brenda L. Nee, an admitting clerk at the Hershey Medical Center since 1980, died April 3. She was 22.

Clarence Sprankle, an inventory clerk with Housing and Food Services at his retirement in 1970, died March 31 at the age of 75. He joined the staff in 1950, serving first as a social director with Student Affairs and then as a post office supervisor.

Senate

(Continued from page 1)

Undergraduate Instruction suggesting changes in honors criteria noted that "the qualitative value associated with Graduation with Distinction or 'being on' the Dean's List has been somewhat decreased by the large percentage of students who can achieve this honor."

The Senate accepted the following recommendation: "The top 12 percent of the baccalaureate degree candidates from any college shall be eligible to graduate with distinction if they have achieved at least a GPA of 3.5. The 12 percent should be divided into 2 percent With Highest Distinction, 4 percent With High Distinction and 6 percent With Distinction."

The same provisions will apply to associate degree candidates.

The Committee also proposed that Dean's List be limited to full-time students with a 3.5 GPA and that no more than 15 percent of the students in any college be placed on the Dean's List. (In Spring Term '81, for example, Engineering was the only college with less than 15 percent of its students on Dean's List—14.6 percent. Education had the most—31.4 percent.)

Several senators suggested that it was unnecessary to tamper with Dean's List criteria and that comparisons among colleges were valid since students throughout the University system take a number of identical basic courses. The question of variations in the difficulty of programs, these senators held, had been addressed by the section already passed. Their argument prevailed, and the second section was voted down.

In presenting suggestions to enhance the climate of research at the Commonwealth Campuses, the Committee on Research in its report said that while "the amount of research activity . . . cannot . . . be a constant per faculty throughout the University . . . we do support the concept that all should attempt to become involved."

They recommended that Campus directors and department heads adjust schedules and teaching loads; departments try to generate support for all faculty; constraints on obtaining sabbatical leaves be addressed; assistance be made available in preparation of research proposals; and Campus library facilities be examined.

Dr. Robert J. Scannell, vice president and dean, Commonwealth Educational System, in a statement amplifying the Committee report, pointed out that much of the data on which it was based had been gathered prior to CES's formation and changes are in progress. While the research environment and activity at the Campuses is not comparable to University Park, it is not a "wasteland," he emphasized.

Specifically, he mentioned that:

—This year, 110 grants were made to Campus faculty members through the Faculty Scholarship Support Fund, and advisory boards at several Campuses have begun to devote locally generated funds to implementing Campus research proposals;

—Campus faculty members have competed for and obtained grants from the Institute for the Arts and Humanistic Studies and through the Research Initiation Grant program;

—Several grants proposals for outside funding are in preparation.

Dr. Scannell also reported that an intense, one-day seminar had been held to discuss, with the assistance of active Campus researchers, the CES research environment. As an outgrowth of the meeting, a research liaison person has been designated for each Campus to work on problems and a follow-up conference will be held in late May.

Discussing the question of sabbaticals, Dr. Scannell took note of the perception that Campus applications are generally rejected.

"In fact," he said, "only 15 applications were submitted this year. Of those 15, 12 were endorsed by the College, Department and my office. Of those 12,

10 were granted. The problem is not so much one of a high rejection rate, but one of a low application rate."

Adding that CES applications are quite often "more poorly written" and thus not competitive, he promised a "high priority" on finding ways to deal with this situation before the next round of applications.

The Senate passed three other pieces of legislation. It accepted a report from its Subcommittee on 800-Level Courses specifying admission policies for students wishing to transfer from associate degree to baccalaureate degree candidacy and the methods to be used to evaluate previously earned credits.

It agreed to proposals from Committees and Rules to speed up reporting of elections to Senate membership and of Senate officers to allow adequate time for preparing committee assignments.

It passed a recommendation from the Special Committee on Computer and Information Systems — held over from last month for costing estimates — describing various academic computing needs. Among these were a seminar program, newsletters and a Computer Services Bureau.

A letter may vote was cast by Caroline Eckhardt (English), who pointed out that the legislation was presented on an illegible overlay and that senators had no idea of what they had voted on.

Staff Vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

ASSISTANT MANAGER, HOUSING AND FOOD SERVICES, MONT ALTO CAMPUS — Responsible to the Manager, Housing and Food Services, for assisting in the overall operation of the Housing and Food Service units. Associate degree or equivalent in institutional management, plus one to two years' effective experience in food supervision.

SENIOR NUTRITIONAL CARE TECHNICIAN, COLLEGE OF MEDICINE, HERSHEY — Responsible to the Manager, Patient Nutritional Care, for the operation of the diet office and a Clinical Dietician while providing nutritional care to patients. Obtain diet preferences and information for individualized nutritional care plan. Maintain daily communication on patients' nutritional status with Clinical Dietitians and Nutritional Care Technicians. Associate degree in food and nutrition or equivalency and one to two years' effective experience.

COORDINATOR, EDUCATIONAL OPPORTUNITIES PROGRAM, WILKES-BARRE CAMPUS — Responsible for recruitment of new E.O.P. students. Provide for appropriate support services for students including counseling in areas of student aid, academic matters, personal adjustment, orientation programs. Arrange tutorial assistance as needed. Additionally, involved in the administration of the Campus Learning Support Center policies. Bachelor's degree in Student Affairs. Bachelor's degree in a field reasonably related to Educational Opportunities Program or developmental education, or equivalent organized outside study or training, plus one year and up to and including two years of effective experience.

ADMINISTRATIVE AIDE, COLLEGE OF ENGINEERING, UNIVERSITY PARK — Responsible to Department Head for routine administrative functions, particularly those pertaining to recruitment and maintenance of various reports, records, and controls. Assist in preparation of personnel and financial information. Prepare materials for proposals, questionnaires, publicity, brochures, minutes, reports and statistical data. Coordinate arrangements for distinguished visitors and visiting committees. Keep staff informed of personnel policies. Respond to inquiries from prospective graduate and undergraduate students. Maintain student and faculty computerized data base. Serve as liaison with department's technical service employees. Handle matters relating to utilization of building space, physical plant actions, parking, key control and safety. Associate degree in business administration or equivalent, plus one to two years of effective administrative experience required.

News in Brief

Free health screening available April 29, 30

The Department of Nursing, the College of Human Development and selected health agencies will sponsor a Health Fair Thursday and Friday, April 29 and 30, from 10 a.m. to 4 p.m. at the Nursing Consultation Center.

Dr. Laurie Gunter, professor of nursing and human development, explains that the fair's purpose is to provide free health screenings, promote health and prevent disease by motivating people to learn more about health and how life-style relates to health.

This will be the first health fair held in the Centre County area for several years, and it is open to all residents.

In addition to health screenings, the fair also will feature exhibits, lectures, films and student projects. Free screening tests will be provided for blood pressure, anemia, blood sugar, blood type and Rh factor, height and weight, visual acuity and hearing.

Cancer risks, heart problems, nutritional problems, marriage relations and prenatal concerns will also be assessed, Dr. Gunter notes.

Volunteer health professionals will be available to review test results, call attention to potential risk areas and answer questions on health-related topics.

Persons wishing more information about the Health Fair may call Mrs. Mae Judd at 863-0245 between 9 a.m. and noon or between 1 and 4 p.m.

Johns Hopkins historian to present colloquium

Dr. Robert Forster, professor of modern European history at Johns Hopkins University, will speak at a Department of History Colloquium slated for 3:30 p.m. Thursday, April 29, in the Memorial Lounge, Eisenhower Chapel. His topic is the Annales school of history. Interested persons are invited to attend.

Dr. Forster is the brother of the late Kent Forster, head of Penn State's history department from 1970-80. A prolific scholar, his books include *The Nobility of Toulouse in the 18th Century: A Social and Economic Study*, *The House of Savoy-Turkey: Versailles and Burgundy, 1700-1830*, *Peasants, Nobles and Rural Revolution in France, and Merchants, Landlords, Magistrates: The Depon Family in 18th Century France*.

Dr. Forster earned his B.A. at Swarthmore College, his M.A. at Harvard University and his Ph.D. at Johns Hopkins.

Roman mausoleum to be discussed by Dr. Adams

"The Mausoleum of Augustus as a Work of Religion and Propaganda" will be the topic of a lecture by Dr. John P. Adams, assistant professor of classics, Tuesday, April 27, at 8 p.m. in Room 101 Kern Building.

The talk is being sponsored by the Central Pennsylvania Society of the Archaeological Institute of America.

Challenge of U.S.-German relations is lecture topic

"German-American Relations: A Continuing Challenge" will be discussed in a public lecture on Monday, May 3, at 4 p.m. in Room 101 Kern Building by Dr. Gerhard Wettig.

Dr. Wettig is director of the Foreign Policy Research Department in the Federal Institute for Eastern and International Studies, based in Cologne, West Germany. His talk is being sponsored by the Departments of Political Science and German.

Mr. Dickenson

Park Service head to talk

Russell E. Dickenson, director of the National Park Service, will speak on "The National Park Service: Future Perspectives" Monday, April 26, at 2:15 p.m. in Room 112 Kern Building.

His talk is sponsored by the Department of Recreation and Parks.

Mr. Dickenson, a National Park Service career professional since 1946, has been director since May 1980. He manages the 333 park areas that make up the National Park Service.

A graduate of Northern Arizona University, he has served throughout the park system, beginning as a ranger. His managerial responsibilities have included the directorship of NPS's Pacific Northwest Region, the deputy directorship of the NPS, and the directorship of the NPS's National Capital Region.

He has received the Department of the Interior's highest honor, its Distinguished Service Award. Other honors include the Cornelius Amory Pugsley Gold Medal Award of the American Economic and Historic Preservation Society and the National Society for Park Resources Award.

Women's Studies seminar focuses on Freud

Dr. Judith Van Herik, assistant professor of religious studies, will speak on "Freud on Femininity and Faith" at the Women's Studies Colloquium slated for Tuesday, April 27, at 7:30 p.m. in Room 124 Sparks Building. The public is invited to attend.

Discussant for Dr. Van Herik's talk will be Dr. Isabel Knight, associate professor of history.

Dr. Van Herik, whose specialty is psychology and religion, earned all her degrees from the University of Chicago. She currently is writing a book on Freud's theories of gender as they apply to his concept of religion.

Graphics staff mount exhibit of their work

The staff of the University Graphics Services will mount a one-day exhibit of their artwork Tuesday, April 27, from 10 a.m. to 4 p.m. in the lobby of Keller Building. This display is part of the monthly staff development meetings of the Division of Learning and Telecommunications Services.

Each artist will show examples of work done for the University, as well as a selection from his or her personal portfolio. A small exhibit of standard work performed by University Graphics will be on display also.

Members of the faculty and staff are invited to look in on the show to get some idea of the capabilities of Graphics Services. Staff members will be available to answer questions.

Delaware County hosts Immigration Conference

To commemorate the tricentennial of the founding of Pennsylvania, an interdisciplinary conference on Immigration and its Impact on Pennsylvania will be held Friday and Saturday, May 7 and 8, at the Delaware County Campus.

Nine sessions have been scheduled, according to conference chairman George W. Franz, assistant professor of history at the Campus. Sessions topics are: Colonial Pennsylvania, Western Pennsylvania at the Turn of the Century, The Nineteenth Century, Immigration and the Coal Industry, Immigration in Two Regions, Immigrants and the Schools, The Impact of Immigration, Ethnic Survival in the Twentieth Century and Immigration in Post-Revolutionary Pennsylvania.

Papers will be presented by faculty members from the University of Pennsylvania, West Chester State College, Temple University, Carnegie-Mellon University, the University of Pittsburgh, California State College, Holy Family College, LaSalle College and the State University of New York at Brockport.

Penn State faculty participants include John Fentz, Kenneth Thiigen, Theodore Kiffer, Wilbur Zelinsky and Roy Buck, all of University Park, and Michael Barendse, Worthington Scranton; Stephen Couch, Schuylkill; Lita Schwartz and Natalie Isser, Ogontz; Stephen J. Cimbal, Delaware County; and Catherine Hebert and Robert Arbuckle, New Kensington.

Additional information about the conference may be had by contacting Dr. Franz at (215) 565-3300, Network: 361-2011.

The conference is being sponsored by the Pennsylvania Studies Committee of the College of the Liberal Arts, The Commonwealth Educational System, and the Colloquium for Social Philosophy of the University of Pennsylvania in cooperation with the Balch Institute for Ethnic Studies.

Pianist joins Alard for Wednesday program

Pianist Sylvia Glickman will join the Alard String Quartet for a concert on Wednesday, April 28, at 8:30 p.m. in the Music Building recital hall.

The program will include Mozart's Piano Quartet in G Minor, K. 478; Bartok's Quartet No. 5; and the Brahms Piano Quintet in F Minor, opus 34.

Ms. Glickman is pianist-in-residence, director of chamber music and an associate professor at Haverford College. A graduate of Juillard, where she won the Loeb Memorial Prize and Concerto Competition, she was a Fulbright Scholar in London and was awarded Licentiate status at the Royal Academy of Music.

The members of the Alard Quartet, all of whom are associate professors of music, are Joanne Zagst Feldman, Donald Hopkins, Raymond Page and Leonard Feldman.

Ms. Glickman and the Alard made the first recording of the Bartok Piano Quintet for Leonarda Records.

Swedish professor to visit next week

Dr. Ferenc Marton, professor of education at the University of Goteborg, Sweden, and founder of a research center, will visit University Park April 28-30.

He will present a seminar on the topic, "Learning as Conceptualized by Faculty and Learning as Experienced by Students." Arrangements for the seminar, which is sponsored by the Departments of Psychology and Educational Psychology and the Center for the Study of Higher Education, had not been completed when INTERCOM went to press. Persons wishing to attend should contact the Center at 865-6346.

Mr. Smith

Gregg Smith Singers to perform in Schwab

The Gregg Smith Singers, the most recorded chorus in America, will be the final event in the Artists Series Fine Arts program on Friday, April 30, at 8:30 p.m. in Schwab Auditorium.

The group, which has won three "Grammy" awards, is known for what Mr. Smith calls "multidimensional sound." The effect is one of live stereo music as the singers move from the stage to balcony to main floor, using a different arrangement for each piece they perform.

The Friday evening program will include works by both American and British composers, a Contemporary Choral Theatre composition, songs by Bela Bartok and Igor Stravinsky and folksongs arranged by Gregg Smith.

Tickets go on sale Tuesday, April 27, at Eisenhower Auditorium from 9 a.m. to 4 p.m. The HUB Booth will be open on Tuesday only. MasterCard/Visa will be accepted at 863-0255.

Ground Zero Week sponsors convocation

A Convocation on the Economic Impact of the Arms Race will take place tonight (Thursday) in the main hall of the Assembly Hall as the final event of Ground Zero Week.

Participants include Paul Murphy, staff researcher of the Council on Economic Priorities; Dr. James Stewart, assistant professor of economics and director of the Black Studies Program; and Dr. Marvin E. Rosen, professor of economics.

Ground Zero Week has been devoted to discussions of the impact of nuclear arms and nuclear war. It is sponsored by Eco-Action, Colloquy and the Individual and Family Studies Undergraduate Student Organization.

Three musical groups to give joint concert

The University Choir, the Symphony Orchestra and the Symphonic Wind Ensemble will present a joint concert Saturday, May 1, at 8:30 p.m. in Eisenhower Auditorium.

The Wind Ensemble will accompany the Choir on Bruckner's Mass in E Minor, and the singers will be joined by the Symphony in Poulenc's "Gloria."

The University Choir is conducted by Raymond Brown, professor of music. Associate professor Smith Toulson conducts both the Wind Ensemble and the Symphony players.

Trombonist featured with Wind Ensemble

Trombonist David Gatts will be the featured soloist for a concert by the Penn State Symphonic Wind Ensemble Friday, April 23, at 8:30 p.m. in the Music Building recital hall.

Mr. Gatts, an instructor in the School of Music, will perform Hans Ecklund's Concerto for Trombone and Wind Ensemble. Smith Toulson, associate professor of music, will conduct the program.

University Park Calendar

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

April 22 — May 2

Special Events

Thursday, April 22
Sports: softball vs. West Virginia, 2:30 p.m.; tennis (men) vs. Maryland, 2:45 p.m.; New German Cinema, Schlondorff, Young Torres, 7 and 9 p.m., HUB Assembly Room.
URTC, *As You Like It*, 8 p.m., Playhouse Theatre. Also April 23, 24, 27-May 1, 4-8.
Ground Zero Week Convocation on the Economic Impact of the Arms Race, 8 p.m., HUB Assembly Hall.
IAHS Lecture, Dora de Pedery-Hunt, Canadian medalist, on her work, 8 p.m., Zoller Gallery.

Friday, April 23
Fourth Annual Slavic Folk Festival, 9 a.m.-10 p.m., Robeson Cultural Center. Also April 24, 9 a.m.-5 p.m.
Civil Engineering Open House, 1-5 p.m., Kunkle Lounge, Hammond. Also April 24, 3-5 p.m.
Commonplace Theatre, *Arthur*, 7 and 9 p.m., 112 Kern. Also April 24.
Cinemahèque, *PuTTY SUppeR*, 7 and 9 p.m., 121 Sparks. Also April 24.
Faculty Women's Club Newcomers Program, Wine Tasting Party for Couples, 7:30 p.m., Living Center, Human Development. Guest speaker: Robert Beelman, food science.
GSA Colloquium, 8 p.m., 102 Kern.
Penn State Symphonic Wind Ensemble concert with trombonist David Gatts, 8:30 p.m., Music Bldg. recital hall.

Saturday, April 24
Sports: tennis (women) vs. Princeton, 9:30 a.m.; lacrosse (women) vs. West Chester, 2 p.m.; golf (men), Nittany Lion Invitational, also April 25.
Artists Series, The Prince Street Players in *The Wizard of Oz*, 10:30 a.m. and 2:30 p.m., EMEX 827.
LIFE CENTER hosts annual symposium, biennial open house, 1-5 p.m., College of Earth and Mineral Sciences. Also April 25.
France-Cinema, *Rog, Mollabaut*, 7 p.m.; *Weir, Picnic at Hanging Rock*, 9 p.m., 112 Kern.
GSA Colloquium, 8 p.m., 102 Kern.

Monday, April 26
Deadline for May graduates to deliver thesis to Graduate School and for departments to certify to Graduate School completion of required papers for May graduates.
Faculty Women's Club, Spring luncheon, 11:45 a.m., Nittany Lion Inn.
Recreation and Parks Lecture, Russell E. Dickson, director, National Park Service, on "The National Park Service: Future Perspectives," 2:15 p.m., 112 Kern.

Tuesday, April 27
Division of Learning and Telecommunications exhibition of work performed, 10 a.m.-4 p.m., Keller lobby.
Comp. Lit. Luncheon, 12:15 p.m., 204 HUB.
Barton Browning, German, on "Kulturreport: English Artists at the Court of Heinrich Julius von Braunschweig," at the Heinrich Julius von Braunschweig.
Sports: tennis (women) vs. Maryland, 2 p.m.; lacrosse (women) vs. Ursinus, 3:30 p.m.; University Readers, *The Laughing Man* by J.D. Salinger, 7:30 p.m., HUB Reading Room. Also April 28.
Women's Studies Colloquium, 7:30 p.m., 124 Sparks. Judith Van Herik, religious studies, on "Freud on Femininity and Faith."
Archaeology slide lecture, 8 p.m., 101 Kern.
John P. Adams, classicist, on "The Mausoleum of Augustus as a Work of Religion and Propaganda."

Wednesday, April 28
Common Concert, noon, Kern Lobby.
Instructional Development Workshop, "Utilizing the Environment to Increase Motivation," 9:30-11 a.m., 305 HUB. Also April 29, 3-4:30 p.m.
Alard String Quartet with pianist Sylvia Glickman, 8:30 p.m., Music Bldg. recital hall.

Thursday, April 29
Nursing/Human Development, "Health Fair," 10 a.m.-4 p.m., Nursing Consultation Center. Also April 30.
New German Cinema, *Handke, The Left Handed Woman*, 7 and 9:15 p.m., HUB Assembly Room. Also April 30.
Museum of Art film, *Heroic Materialism*, 7

Rose Mary Witham watches Prof. Kapitanoff cut "potica," a Slovenian nut-filled bread. Smaller cake is cream cheese "pashka," taller, a "kulich"; Czech "kolachky" at rear.

Slavic Folk Festival has it all!

All Slavic cultures celebrate spring with colorful festivals and rituals, and the Fourth Annual Penn State Slavic Folk Festival will recreate that spirit on Friday, April 23, and Saturday, April 24.
"Last year's festival was cited by the Pennsylvania State Senate for its contribution to the Commonwealth's artistic and cultural life, and for its efforts in honoring the cultural contributions of Pennsylvania's large Slavic American population," says Lorraine T. Kapitanoff, assistant professor of Russian and festival coordinator.
"We plan an even more extensive festival this year."

The festival is cosponsored by the University's Department of Slavic Languages and the Kappa Kappa chapter of Dobro Slovo, the national Slavic studies honor society. It will take place in the Robeson Cultural Center of the Walnut Building from 9 a.m. to 10 p.m. Friday and from 9 a.m. to 5 p.m. Saturday. All events are free to the public.

The special events for Friday, April 23, are:

- morning: children's entertainment, including a puppet show, story telling, clowns and jugglers;
- afternoon: a variety show featuring the Penn State Ukrainian Club, the Penn State Slavic Dance Ensemble, and individual instrumental and vocal performers;
- evening: performances by the Penn State International Dancers and the

Interlandia Folk Dance Club; music for listening and dancing by the Dubois-based Tom Duda Orchestra with Johnny Y and a polka and waltz contest.

The special events for Saturday, April 24, will center on folk dancing. Featured performers will include a Ukrainian group from Sharon, Pa., and the Czechoslovakian-Moravian Club Dancers from Endicott, N.Y.

In addition, colorful arts and crafts from the major Slavic peoples will be on display, and the arts of pysanky — Ukrainian Easter egg decoration — and of icon painting will be demonstrated.
Visitors will not go hungry. Slovenian pastries will be available at the ethnic snack bar for breakfast and mid-morning snacks. Pashka and kulich — the Slavic equivalent of bagels and cream cheese — also will be available. Lunch and dinner dishes will include golubki (Polish cabbage rolls) and borshi and piroshki, which are small stuffed pastries.

The Penn State Slavic Folk Festival was originated in 1979 by Prof. Kapitanoff, who has served as coordinator ever since, and Dr. Thomas Magner, professor of Slavic languages and associate dean for research and graduate study in the College of the Liberal Arts.

The festival board is composed of faculty members in the Department of Slavic Languages: Sigmund Birkenmayer, James Gebhard, Linda Ivanits, Joseph Paternost and department head William Schmalstieg.

k.m., First Floor Gallery.
Kern Classics, *Lolita*, 8 p.m., 112 Kern.
Orchestra Dance Group, 8:30 p.m., White Bldg. Dance Theatre. Also April 30.

Friday, April 30
Sports: golf (men), Alumni Tournament. Also May 1.
Commonplace Theatre, *La Cage Aux Folles*, 7 p.m.; *Tess*, 8:30 p.m., 112 Kern.
Cinemahèque, *Breathless*, 7 and 9 p.m., 121 Sparks. Also May 1.
German Dept., AATG meeting, lieder concert, 8 p.m., Eisenhower Chapel memorial lounge.
Artists Series, The Gregg Smith Singers, 8:30 p.m., Schwab.

Saturday, May 1
Dairy Exposition "Show Day," 8 a.m., Dairy Barns.
German Dept., AATG meeting, 10 a.m., 101 Kern. Rio Preiner on "Marginalia on Goethe," 10:20 a.m., 101 Kern; Gene Pearson, Moravian College, on "Sophie Maerz: Last German Poet of the Goethe Age," 11:15 a.m., Lafayette College, on "Goethe and das serbische Volkslied," and Ursula Meyer, Goethe House, on "Liedermacher in Deutschland," 11:15 a.m., 208 Willard; Stanley Townsend, prof. emeritus, German, on "Goethe ohne Heiligenstein," 12:30 p.m., Penn State

Room, Nittany Lion Inn; Film, "Goethe heute," 2 p.m., 124 Sparks; Drama, "Urfurst," produced by students of German, 3 p.m., 301 HUB.
Sports: track and field (men), Nittany Lion Relays, 12 p.m.; lacrosse (men) vs. Montclair State, 8 p.m.; tennis (men) vs.

Bowling Green, Mercyhurst and Ohio, also May 2.
Blue-White Football Game, 1 p.m., Beaver Stadium.
Orchestra Dance Group, 2:20 and 8:30 p.m., White Bldg. Dance Theatre.
France-Cinema, Fassbinder, *Lili Marleen*, 7 and 9 p.m., 112 Kern. Also May 3.
University Choir, Symphony Orchestra and Symphonic Wind Ensemble concert, 8:30 p.m., Eisenhower.

Seminars

Thursday, April 22
Chemistry, 12:45 p.m., 333 Whitmore. Philip Brooks, Rice Univ., on "Studies with Molecular Beams."
Physics, 3:50 p.m., 117 Osmond. L. Smar, Univ. of Illinois, on "Numerical Relativity."
Philosophy, 4 p.m., 165 Willard. Emily Groszolt, philosophy, on "Leibniz's Conception of Truth and Scientific Method."

Monday, April 26
Learning and Telecommunications, 3 p.m., 8 Mitchell. Douglas Carter and Ross Whitcraft, WPSX, on "Classroom Instructional Television Sampler."
MC3B, 3:30 p.m., 101 Althouse. Lawrence Rosenberg, Montefiore Hospital Medical Center, on "The Role of Proteoglycans in Limb Development and Endochondral Ossification."
Entomology, 3:40 p.m., 204 Patterson. Donald Stallard, Diamond Shamrock Corp., on "Overview of Diamond Shamrock Pesticide Development."

Tuesday, April 27
Metallurgy, 9:45 a.m., 301 Steidle. F.J. Arrigada on "Characterization and Roasting Behavior of Sulfidic Pyrite and Gold Concentrates"; H.S. Kim on "Anodic Dissolution of Iron-Cobalt Alloys in Aqueous Ammoniacal Solutions"; B.M. Warnes on "Electrical Conductivity and Seebeck Coefficients in Pure and Doped Alpha-Fe₂O₃ as a Function of Temperature."
Solid Waste Management, 2:20 p.m., 128 Sackett. J.A. Lynch, forest hydrology, on "Acid Precipitation — State Monitoring Program."

Plant Pathology, 3:45 p.m., 213 Buckhout. Priscilla Parish on "DeBary — Classic #11." Genetics, 3:55 p.m., 101 Althouse. Lynne D. Jeffers on "Comparison of Reproductive Histories of Two Groups of Women in the Cayman Islands."
Engineering Science and Mechanics, 4 p.m., 242 Hammond. Jeffrey Lannin, physics, on "Raman Scattering of Thin Films."
Computation Center, New FORTRAN, 7:30 p.m., 112 Walker. Also April 29.
Computation Center, APL, 7:30 p.m., 108 Forum. Also April 29.

Thursday, April 29
Chemistry, 12:45 p.m., 333 Whitmore. John R. Stille, Colorado State Univ., on "Organic Synthesis via Organopalladium Catalysis."
Anthropology, 3:30 p.m., 107 Carpenter. Eliza Abrams on "Excavations of an Elite Residence, Copan, Honduras."
History, 3:30 p.m., Eisenhower Chapel memorial lounge. Robert Foster, Johns Hopkins Univ., on the Annals school of history.
Physics, 3:50 p.m., 117 Osmond. J. Panitz, Sandia Lab., on "Molecular Imaging in High Electric Fields."

General Education conferees to reconvene May 7

The third phase of the Penn State Conference on General Education will begin at University Park on Friday, May 7, and continue on Saturday, May 8.

Featured speakers will be Harlan Cleveland, director of the Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota, and Jerry Gaff, director of the Center for General Education of the Association of American Colleges.

The conference is co-sponsored by the Office of the President, the Office of the Provost and the University Faculty Senate.

The conference, a special forum to explore the basic academic principles of general education, began with a two-day meeting last January. During February, March and April, more than 60 continuing

programs dealing with the conference issues have been conducted by delegates from the Colleges at University Park and Hershey and at the Commonwealth

publication in the *Journal of General Education*.

Dr. Cleveland, whose appearance as keynote at the January conference, had to

The entire Conference program appears on page 7. All faculty members, academic administrators and students, as an integral part of the University's general education component, are invited to attend any of the conference sessions.

Campuses, Capitol Campus and Behrend College.

Building upon the continuing programs, faculty and staff members and students submitted more than 40 white papers and proposals for consideration by the conference steering committee. These materials were used to develop the program for the May sessions. Some of the papers also will be considered for

be canceled as the result of a blizzard, will discuss "Shouldn't We Also Be Educating for Wisdom?" at 8:30 p.m. in the Music Building recital hall. He will be introduced by President Oswald.

Dr. Cleveland's distinguished career has included service as an assistant secretary for international organizational affairs in the Department of State and as United States ambassador to NATO. He has been

dean of the Maxwell Graduate School of Citizenship and Public Affairs at Syracuse University, president of the University of Hawaii and director of the international affairs program at the Aspen Institute for Humanistic Studies in Princeton.

He is the author of several books, among them, *Ethics and Bigness*, *The Future Executive* and *The Third Try at World Order*.

In his present assignment, and previously as director of Project on General Education Models, Dr. Gaff advises colleges and universities on the development of new directions for strengthening the undergraduate curriculum. He also established a clearinghouse of information and resources on general education. He has

Crider, Park on Senate ballot

The Nominating Committee of the University Faculty Senate has presented its slate of electoral candidates for 1982-83. The report will be presented at the May 4 meeting, which begins at 2:10 p.m. in Room 112 Kern Building.

Candidates for chairman-elect of the Senate are Donald M. Crider, associate professor of rural sociology, and William H. Park, professor of mechanical engineering.

For secretary, the nominees are Paul R. Shellenberger, professor of dairy science, and Eugene R. Slaski, associate professor of history at Allentown.

From the following list, one candidate is to be elected to the Faculty Advisory Committee with a term to expire in 1985: Herbert Cole Jr., professor of plant pathology; Jerry B. Covert, associate professor of biology at Hazleton; Caroline D. Eckhardt, associate professor of English and comparative literature; and Robert Jennings Heinsohn, professor of mechanical engineering.

Two regular candidates and one alternate for three-year terms on the Faculty Rights and Responsibilities Committee were named from University Park. They are Arthur K. Anderson Jr., associate professor of architecture; Ernest L. Bergman, professor of plant nutrition; J. Russell Ezzell, head and associate professor of finance; Theodore E. Kiffer, director of the General Education Program; Robert O'Connor, associate professor of political science; and Robert F. Schnalz, professor of geology.

From campuses other than University Park, one person is to be elected as an alternate for a three-year term. Candidates are Albert J. Miles, assistant professor of English at Ogonitz; August H. Simonsen, assistant professor of environmental sciences at McKeesport; Robert T. Tauber, assistant professor of education at Behrend College; William A. Welsh Jr., associate professor of engineering at Capitol; and T.D. Wilkinson III, associate professor of engineering at Mont Alto.

Two deans, one a regular and one an alternate for three-year terms, will be chosen. Candidates are Theodore L. Cross, Capitol; Evan G. Pattishall Jr., Human Development; and Samuel H. Smith, Agriculture.

(Continued on page 3)

From left: Mrs. Frisbey, Mimi Barash Coppersmith, Prof. Bland, President Oswald, Dr. Barkman.

Frisbey, Bland, Barkman win awards

It was the students themselves who supplied the most enthusiastic nominating letter for Ardeth Frisbey, assistant director of International Student Affairs and the 1982 recipient of the John E. Wilkinson Award for Administrative Excellence.

"She is known and remembered with respect and love in at least 100 countries in the world," they wrote. "We cannot think of any other nominee who can be evaluated more highly. If there is, Penn State must be truly fortunate to have so many 'hidden angels.'"

Mrs. Frisbey's association with Penn State's foreign students began in 1963—and typically, she started out working as a volunteer. She came to University Park from Michigan State University, where she earned her B.S. in chemistry and had been engaged in horticultural research.

After formally joining the staff in 1964 as an administrative aide, Mrs. Frisbey took on the responsibility of seeing that the documents which international students must have—in respect to immigration, finances, visas and the like—were in good order.

At the time, there were approximately 300 international students; today their number has grown to between 1,600 and 1,700.

"Our office interfaces with all of the offices on campus concerned with student affairs," Mrs. Frisbey notes. "We work with the Bursar, for example, in billing sponsored students. We deal constantly with various embassies and consulates to help students get their passports

(Continued on page 7)

"I've never assumed that people aren't supposed to have a sense of civic responsibility," says this year's winner of the Barash Award for Human Service.

"You make time to fulfill your obligations, however you perceive them," Richard E. Bland continues.

An associate professor of engineering research and a member of the faculty since 1951, Mr. Bland earned his B.A. at Hiram College and his M.S. at the University of Michigan. At ARL, his professional interests have included work in underwater acoustics, noise and vibration control and hydrodynamics.

Outside of ARL, Mr. Bland is probably best known for his work in fire

(Continued on page 6)

Superlatives come naturally to persons who work closely with Dr. Oscar C. Barkman, executive secretary of the University Faculty Senate and winner of this year's McKay Donkin Award.

The award recognizes exceptional contributions to the "economic, physical, mental or social welfare of the faculty."

"He is a rare person in this large system—an enabler," is the way five recent and present Senate leaders describe Dr. Barkman, and they add:

"Beyond this, Dr. Barkman's a healer. Students, angry with rules or confused by procedures, come to his office. . . His gentle good humor, avuncular tone, and knowledge of the system can untangle the

(Continued on page 6)

A Statement

The *Collegian* and the *Centre Daily Times* both report that a self-appointed faculty group plans to launch a petition drive asking for postponement of the on-schedule calendar conversion. The same group is reported as planning to establish an information clearinghouse on the semester calendar.

While any faculty member or group of faculty members has the right to engage in activities within their time and resources, the University Faculty Senate is the appropriately organized faculty group delegated responsibility by the University Trustees for such matters as curricula. The Faculty Senate discussed, in a forensic

session, the proposed calendar conversion in November of 1980 and has been kept

A chronology of calendar changes and discussions during the last 25 years will appear in the next issue of INTERCOM.

fully informed of all calendar events since that time. Many committees of the Senate are engaged in calendar change activities.

A study of the chronology of the term calendar since its introduction demonstrates that it was modified within a year of its adoption and has been a

Penn Staters

Dr. Allan Rodgers, professor of geography, has been awarded his second Fulbright Grant for research in Italy. He has also been appointed as a Distinguished Visiting Professor at both the Institute of Economic Geography and the Institute of Urban Studies of the University of Rome. While on sabbatical leave in Italy next winter and spring, he will be engaged in collaborative research with Italian scholars on "Transport Axes, Accessibility and the Diffusion of Economic Development in the Northwestern Margin of the Italian South."

Charles W. Mann Jr., librarian, Special Collections, and professor of English, presented an invited lecture at the Yale Center for British Art. His topic was "The Jury Photographs for the Great Exhibition of 1851."

Kenneth R. Beittel, professor of art education and Fellow, IAHS, was one of 25 potters invited to participate in a national exhibition entitled "Continuity and Change: Three Generations of American Potters," at the Southern Alleghenies Museum of Art, March 27 to May 16. This exhibition was made possible by grants from The National Endowment for the Arts and from The Pennsylvania Council on the Arts. Exhibitors were asked to choose an "important teacher" and a "student doing significant work," and pieces by them were included in the show. In Dr. Beittel's case, the teacher is Manji Inoue of Arita, Japan; the student is Dr. Larry Jordan of Florence, S.C.

Dr. Henry P. Sims Jr., professor of organizational behavior, and **Dr. Laura S. Sims**, associate professor of human nutrition in public health, have accepted visiting faculty appointments at Stanford University for the 1982-83 academic year. Henry Sims will be a scholar in residence at Stanford's graduate school of business, while Laura Sims will be a visiting professor in the medical school.

Dr. Dorothy V. Harris, professor of physical education and director of the Center for Women and Sport, will receive a 1982 Distinguished Alumni Award from the University of North Carolina on May 15.

Raniero Corbelli, professor and head of architecture, has been awarded the 1981 National Institute for Architectural Education (NIAE) Special Grant for Faculty Research. The \$10,000 grant will support his research on the educational systems in architecture in this country and Great Britain, which he began during a recent sabbatical leave.

Professor Corbelli's proposal was selected by a panel of architects from among 39 entries representing 29 institutions of higher education in this country and abroad.

A Penn State monograph on "State Legislation Affecting Community and Junior Colleges, 1980" has been honored by the National Council of Colleges and Universities as "the best and most significant 1981 research publication in the field." It was written by S.V. Martorana, professor of education, and James K. Bromall, a graduate assistant in the Center for the Study of Higher Education.

Robert Ginsberg, professor of philosophy at Delaware College, has been named a Lilly Fellow at the University of Pennsylvania, where he will attend a postdoctoral seminar on photography. He will exhibit his nature photography at the 1982 meeting of the American Society for Aesthetics in Banff, Alberta, Canada. In May, he will visit Lincoln University as program evaluator to assess courses in philosophy and religion.

Peirce Lewis, professor of geography, delivered an invited lecture to the Department of Architecture at Massachusetts Institute of Technology. He discussed "The Importance of Ordinary Things," arguing that apparently insignificant common artifacts can shed light on vernacular history which conventional documentary materials cannot. Professor Lewis also visited the University of Miami in Coral Gables, where he lectured on his continuing research on "The New American City."

Dr. Lewis has been appointed by the Association of American Geographers to serve as a member of its Visiting Geographical Scientist program, through which nationally known geographers visit small campuses with limited geographic offerings. Under VGS sponsorship, Dr. Lewis spoke to the Department of History at York College, the Department of Art at Franklin and Marshall College, and the Departments of Geography at Millersville State College and at Central Connecticut State College in New Britain.

Dr. Craig F. Bohren, associate professor of meteorology, and **Dr. Turgay Ertekin**, assistant professor of petroleum and natural gas engineering, have received the 1982 Matthew J. and Anne C. Wilson Outstanding Teaching Awards of the College of Earth and Mineral Sciences. Now in their 14th year, these \$1,000 awards are made possible by the Matthew J. and Anne C. Wilson Trust Fund.

Dr. Bohren has a B.S. in mechanical engineering from San Jose State University; and an M.S. in nuclear engineering and a Ph.D. in physics from the University of Arizona. After post-doctoral research at University College, Cardiff, Wales, he joined the Penn State faculty in 1980. A consulting editor of *Weatherwise*, he co-authored a soon-to-be-published book, *Absorption and Scattering of Light by Small Particles*. He teaches courses in radiative transfer, bioclimatology and elementary meteorology.

Dr. Ertekin has a B.Sc. and an M.Sc., both in petroleum engineering, from the Middle East Technical University, Ankara, Turkey, and a Ph.D. in petroleum and natural gas engineering from Penn State, where he was named to the faculty in 1978. His research interests include development of mathematical models for reservoir engineering, development and application of enhanced oil recovery techniques and in-place degasification of coal seams. He is co-author of a book, *Gas-Well Testing: Theory, Practice, and Regulations*, and of a dozen journal articles. He is helping to organize and will lecture at the NATO Advanced Study Institute on Heavy Oil Recovery to be held in Ankara this summer and has lectured at two conferences in Caracas, Venezuela.

Two books by Dr. Stanley Rosen, professor of philosophy, have just been issued in paper-back editions by the Yale University Press. They are *Nihilism* and G.W.F. Hegel: *An Introduction to the Science of Wisdom*. Both were originally published by Yale, the first in 1969, the second in 1974.

Dr. Geoffrey Godbey, professor of recreation and parks, delivered the Shell Oil lecture at the University of Salford, Salford, England. His topic was "The Future of Leisure in North America."

Joseph L. Cavinato, associate professor of business logistics, is the author and editor of *Transportation-Logistics Dictionary*, published by Traffic Services Corp., Washington, D.C. Dr. Cavinato has expanded the second edition of this dictionary by some 14 percent, and it now includes approximately 5,800 regular entries.

Dr. Donald J. Willower, professor of education in the Division of Education Policy Studies, has been appointed to the editorial board of the *Journal of Educational Administration* and re-appointed to a second term on the editorial board of *Educational Administration Quarterly*.

Dr. Z.T. Bieniawski, professor of mineral engineering and director of the Mining and Mineral Resources Research Institute, was an invited lecturer last month at the University of Wisconsin. Under the auspices of the Department of Engineering and Applied Science, he discussed "Support Systems for Underground Excavations."

R. Thomas Berner, assistant professor of journalism, is the author of *Editing* (Holt, Rinehart and Winston). The 244-page textbook is one of the first written from the viewpoint of an editor using computerized news delivery and editing systems. The textbook also includes photographs by Professor Berner.

Dr. H.L. Barnes, professor of geochemistry and director of the Ore Deposits Research Section, gave an invited lecture, "Dewatering of Sedimentary Basins and the Origin of Mississippi Valley-Type Ore Deposits," to the Department of Earth and Planetary Sciences at the Massachusetts Institute of Technology.

During a recent visit to Japan, he spoke to the Mining Society of Japan in Tokyo on "Implications of Geothermal Systems to Hydrothermal Ore Formation," and at the International Symposium on Hydrothermal Reactions in Machida, on "Experimental Determination of Rates of Hydrothermal Reactions."

Twenty pieces from Richard Hamwi's show, "Works on Paper," recently on display at the Museum of Art, are being exhibited at Vassar College's Print Room Gallery through June 6. Mr. Hamwi is an instructor in the School of Visual Arts.

Dr. C.A. Wegner, assistant professor of astronomy, presented a colloquium to the Department of Physics and Astronomy at the University of Montreal on "White Dwarfs with Carbon in Their Atmospheres."

Edward S. Beck, counselor and affiliate instructor of psychology and social science at Capitol Campus, was named president-elect for 1982-83 of the American Mental Health Counselors Association (AMHCA), a division of the 40,000-member American Personnel and Guidance Association.

Richard Z. Hindle, assistant professor of labor studies, was elected to a two-year term as president of the University and College Labor Education Association at its annual meeting in Boston. The Association is made up of labor educators from 44 universities and colleges.

Appointments

Charles Lupton, executive director of the Office of Gifts and Endowments, has been appointed special assistant to the senior vice president for administration. Dr. Richard E. Grubb, effective May 1.

"Mr. Lupton's major responsibility will be to expand and intensify his already outstanding efforts of identifying and working with major individual donors to the University," says President Oswald. Mr. Lupton will work in close cooperation with the vice president for development.

"During Mr. Lupton's 19 years of service on behalf of Penn State," Dr. Oswald continues, "private contributions to the University have increased from \$1.8 million annually to \$11.5 million and the number of gifts has increased from approximately 10,000 to around 50,000 yearly. This great growth is due in large part to Mr. Lupton's exceptional efforts and dedication."

A 1940 alumnus of the University, Mr. Lupton joined Penn State in 1963 as director of the Development Fund. He was named executive director of the Penn State Foundation the following year, with responsibility for fund raising activities.

Dr. Gary L. Mullen, associate professor of mathematics at Shenango Valley, has been named assistant dean for Commonwealth

Mr. Lupton

Dean Mullen

Campus and Continuing Education in the College of Science.

A member of the Campus's faculty since 1975, Dr. Mullen received his B.S. in mathematics from Allegheny College in 1969. He earned his M.A. and Ph.D. degrees in the same field from Penn State in 1970 and 1974, respectively.

Dr. Mullen has published some 20 articles and papers in the area of algebra and number theory in European and American professional journals.

He succeeds Dr. Joseph M. Lambert, who has been named head of the Department of Computer Science.

Promotions

Faculty

Rafiq Dossani to assistant professor of finance in Business Administration.

Staff Exempt

Nadine B. Albany to assistant extension agent in Agriculture.
Phoebe R. Bittler to assistant extension agent in Agriculture.
Claudia M. Cross to assistant extension agent in Agriculture.
Kelly M. Grotzinger to research support assistant at Hershey.

Susan J. Hansen to assistant dining hall supervisor in Housing and Food Services.
Naomi V. McCamley to administrative aide in Business Administration.
Robert L. McDowell Jr. to senior engineering aide in Applied Research Lab.
Edward E. Minshall to head, publications and public information in Continuing Education.

Thomas A. Moore to systems analyst in Management Services.
Deborah L. Nanni to applications programmer/analyst in Management Services.

William M. Peck to senior engineering (Continued on page 3)

Staff Non-Exempt

Rita Brinkman to senior staff nurse at Hershey.
Debra P. Fehr to senior staff nurse at Hershey.
Gloria S. Forti to licensed practical nurse/meds at Hershey.
Cindy L. Helms to licensed practical nurse/meds at Hershey.

Clerical

Carol L. Bitner to senior security clerk in Applied Research Laboratory.
Nancy Christy to secretary B at McKeesport.
Susan W. Deaven to secretary 8 at Hershey.
Julia S. Gibbonney to clerk, medical records A in Health Services.
Donna J. Neideigh to senior accounting clerk in Controller's Office.
Karen J. Packer to secretary B in Agriculture.

Technical Service

Dennis M. Bauer to dining hall worker A in Housing and Food Services.
Neil B. Kimerer Jr. to utilities analyst in Physical Plant.
Richard L. Krout to group leader, greenhouse technician in Agriculture.
Philip C. Lucas to maintenance mechanic (Food Services Equipment) in Housing and Food Services.
David N. McCloskey to instrument maker-helper in Science.
Thomas Shutt to maintenance worker utility in Physical Plant.
Scott Smith to maintenance worker utility in Physical Plant.
William J. Wasko Jr. to community service officer at McKeesport.
Mildred I. Zimmerman to escort service aide at Hershey.

Retirement

Wayne Bechdel, associate dean for continuing education in the College of Arts and Architecture, retired March 31 after more than 30 years with the University.
Beginning as director of personnel records in Personnel Administration, he held a variety of positions, serving as area representative in continuing education and director of the Conference Center.
In 1969, he was named assistant dean for continuing education and public service in the College of Arts and Architecture and was appointed associate dean in 1981.
As director of the Conference Center, he was involved in the planning of the J. Orvis Keller Conference facility. During his tenure, the number of conferences and participants tripled at University Park.
Dean Bechdel was instrumental in the initial planning and operation of three award-winning conferences sponsored by the College of Arts and Architecture. The Zoning Game won a creativity award from the National University Extension

Association (NUEA). Region II NUEA Conference Awards were presented to Financial Management for Arts Organizations and to SuperMud: A Three Day Conference.

The latter conference, Dean Bechdel notes, began as Pottery East-Pottery West in 1967 with 35 participants. The 1979 SuperMud drew 2,300 persons, including Joan Mondale.

Dean Bechdel has himself received two awards. NUEA presented him with the Stanley C. Robinson Distinguished Service Award in 1980, and this month he was named a Fellow of Extension in recognition of distinguished achievements in extension education by the National University Continuing Education Association.

Carpoolers

Neda Wilson needs a ride from Hilltop Park to Wagner Building, where she works from 8 a.m. to 5 p.m. She can be reached at either 865-3467 or 238-3643.

Obituaries

J. Stanley Cobb, an associate professor of agronomy at his retirement in 1957, died April 16 at the age of 91. He came to Penn State as an instructor in 1919.
Ralph F. Harbach, an administrative aide in the College of Engineering since 1969, died April 17. He was 66.

Statement

(Continued from page 1)
subject of discussion and dissatisfaction on many occasions in the last two decades.
In the September, 1980, letter to the University community, as well as in prior discussions, President Oswald acknowledged his own calendar preference. He also stated on a number of occasions that not all members of the University community would agree with his calendar preference. All members of the University community were encouraged "to consider and discuss widely the prospect of a calendar conversion." A number of individuals and groups responded to that invitation and offered their views on the calendar question. As was to be expected, some favored the semester calendar; others preferred to stay on the term calendar. The records demonstrate the diversity of opinion that could have been predicted.
The University Council and the deans of the colleges reported differences of opinion about the calendar conversion. Most of the deans noted that their faculties were divided on the issue. No college dean suggested that a semester calendar was impossible at Penn State nor did any college dean predict damage to the instructional or research role of the University.

As chairman of the Calendar Conversion Council, I can state that nothing has occurred in the last year to suggest a need for reconsideration of the decision to change to an early semester calendar in the fall of 1983. Members of the Calendar Conversion Council and of its Communications Committee consistently and regularly report that the conversion process is on schedule and that no insurmountable problems have emerged. The view that the calendar change is doing damage to the University may be a sincerely held opinion, but no evidence in support of that view has been offered.

James B. Bartoo, Chairman
Calendar Conversion Council

Ralph Zilly, vice president of business, congratulates William Urban, McElwain Dining Hall, on completing 20 years of service without using a sick day. Mr. Urban was honored by the McElwain employees and William McKinnon, assistant vice-president, Housing and Food Services. Mr. Urban, right, was presented a letter from President Oswald congratulating him on his outstanding achievement.

Senate

(Continued from page 1)
Members of the Nominating Committee are Priscilla Allison, Arthur K. Anderson Jr., Peter Bennett, John Cahir, Herbert Cole Jr., Caroline Eckhardt, Herberta Lundegren, Frederick Lampe, Benjamin Lane, Alphonse Leure-duFree, Louisia Marshall, Patricia Overdeer (chairman), William H. Park and William A. Welsh Jr.
The following nominating report will be submitted by the Committee on Committees and Rules:
For the Standing Joint Committee on Tenure, one regular and one alternate candidate to be elected to two-year terms. Candidates are: Raymond A. Ayoub, Science; Chauncey A. Morehouse, Health, Physical Education and Recreation; Lee W. Saperstein, Earth and Mineral Sciences; and Sara L. Whildin, Delaware County.
For the University Promotion and Tenure Review Committee, three persons to be elected to two-year terms. Candidates are: Joseph H. Britton, Human Development; George H. Conner, Medicine; Anthony V. Galanti, Hazleton; Charles G. Haas, Science; George R. Hudson, Education; Herberta M. Lundegren, Health, Physical Education and Recreation; and Carolyn W. Sherif, Liberal Arts.
Several legislative reports are on the Senate docket.
Committees and Rules has proposed changes in the *Standing Rules*, moving the Senate meeting time from 2:10 to 1:10 p.m. for the greater convenience of Senators from outside University Park. Senators will be notified in advance of the year's scheduled meetings to facilitate planning.
A legislative report from the Special Committee on Grade Adjudication rejects a formal appeal procedure. Instead the Committee recommends that:
"The faculty of each college and campus shall establish a college/campus-wide mechanism for discussion and possible resolution when a student and a faculty member are involved in a disagreement over grades which has not been resolved by other means."
The Committee suggests faculty members consult the model developed by the College of the Liberal Arts' Good Offices Panel.
To deal with cases where clearly unprofessional action has been taken by a faculty member, the Committee recommends a codification for the present *ad hoc* procedures.
Under unfinished legislative business, Senators will vote on a change in the *Bylaws* enabling the Senate Council to

select nominees for election to the post of Senate Chairman-Elect in the event of a vacancy occurring in that office.
Two other reports will be presented to the Senate. Faculty Affairs is offering recommendations on sabbatical leave policy. Undergraduate Instruction suggests that, since no sizeable body of opinion has supported changes in physical education, further discussion of compulsory courses requirements in this curriculum await a general discussion of baccalaureate degree requirements.

Staff Vacancies

There are positions in certain work units that, because of the large number of such positions, frequently are still available after employees in the work unit have been considered. They are listed below and will not be listed on an individual vacancy basis. Application for such positions may be made at any time, and you are welcome to make your interests known now to the Employment Division for future consideration when such vacancies occur. These positions are:

POSITION TITLE	LOCATION
Assistant Food Supervisors	Housing and Food Services
Computer Operators	Intercollege
Shifts: 8 a.m. to 4:30 p.m. 4:30 p.m. to 1 a.m. Midnight to 8 a.m.	Research Programs
Programmers	Management Services
Research Aides	Agriculture
Cardiology Technicians	Hershey
Clinical Laboratory Assistants	Hershey
Clinical Laboratory Technologists (HEW)	Hershey
Critical Care Monitoring Technicians (Jr. & Sr. Levels)	Hershey
Cyto-Technicians	Hershey
Licensed Practical Nurses	Hershey
Medical Technologists (ELA, MLT, CLT, HEW)	Hershey
Nuclear Medical Technicians	Hershey
Perfusionists	Hershey
Pharmacists	Hershey
Physical Therapists	Hershey
Physician's Assistants	Hershey
Psychiatric Assistants	Hershey
Radiology Technicians	Hershey
Research Technicians (Jr. & Sr. Levels)	Hershey
Respiratory Therapy Technicians	Hershey
Staff Nurses	Hershey

Health Service honors Ritenour staff nurse

The University Health Service, in cooperation with the staff of Ritenour Health Center, will honor Jacqueline Mulfinger for her years of service on Thursday, May 6 — National Nurse Recognition Day.
Mrs. Mulfinger, a staff nurse, joined Ritenour in 1965. Since 1972, she has run the East Halls Clinic, located in Johnston Hall. She is a graduate of State College High School and the Metropolitan Hospital School of Nursing.

News in Brief

Dr. Smith

Yale scholar to give Dotterer Lecture

Dr. John E. Smith, Clark Professor of Philosophy at Yale University, will present the Department of Philosophy's 13th Annual Dotterer Lecture Thursday, May 6, at 7:30 p.m. in Room 101 Kern Building. Dr. Smith's topic is "Being and Willing."

A specialist in American philosophy and the philosophy of religion, Dr. Smith is a former chairman of the Yale philosophy department and former director of the National Humanities Institute at Yale.

He is the author of a number of influential books, including: *The Spirit of American Philosophy, Reason and God, Religion and Empiricism, Experience and God, Themes in American Philosophy, Contemporary American Philosophy, The Analogy of Experience and Purpose and Thought: The Meaning of Pragmatism.*

Dr. Smith, who serves on the editorial boards of five journals, has held a number of distinguished lectureships. Among them: Dudley Lecturer, Harvard; Hoover Lecturer, University of Chicago Divinity School; Suarez Lecturer, Fordham; Public Lecturer, Kings College, University of London; Winston Churchill Lecturer, University of Bristol; and Warfield Lecturer, Princeton Theological Seminary.

Dr. Smith is a past-president of the American Philosophical Association, the American Theological Society, the Metaphysical Society of America and the Hegel Society of America.

He earned his B.A. and Ph.D. from Columbia University and a B.D. from the Union Theological Seminary. He has received an honorary LL.D. from the University of Notre Dame and has been named an honorary alumnus of the Harvard Divinity School.

The Dotterer Lecture Series was established by Penn State's Department of Philosophy to honor the late Ray H. Dotterer, who served as head from 1938 to 1947.

Augustan era to be discussed by Dr. Gruen

Dr. Erich S. Gruen, professor of ancient history at the University of California at Berkeley, will speak on "Augustus and the Ideology of War and Peace" Wednesday, May 5, at 8 p.m. in Room 101 Kern.

A distinguished historian on ancient Rome, Dr. Gruen is known for his series of studies on the uses of the Roman court system as weapons of politics during the late Roman Republic. His studies on Roman foreign policy, with special reference to the wars against the Macedonians, have also drawn acclaim.

The lecture is sponsored by the Department of History and the Institute for the Arts and Humanistic Studies.

Cooperative research opportunities are available for faculty with Kennametal

Three executives of Kennametal, a leading powder metallurgy and tooling system company, recently visited University Park, seeking to strengthen the company's ties with Penn State through cooperative research programs.

The visit was made under the auspices of the Office of Industrial Research and Innovation, which was organized two years ago to help University faculty members establish research and instructional ventures with industry.

Meeting with engineers and scientists in the Materials Research Laboratory and in the Colleges of Engineering, Earth and Mineral Sciences, and Science, David Arnold, Kennametal vice president and director of technology, invited faculty members to visit his company's facilities in Latrobe or Greensburg.

With plants in Pennsylvania and North Carolina, Kennametal spends about \$10 million each year on research and development. Its products include mining and construction bits and other cutting tools made from niobium, tantalum,

tungsten, titanium carbide and other materials.

Kennametal's research interests lie in ceramic coatings, rapid solidification, coatings diffusion, surface reactions, phase diagram study, substitutions for cobalt, computer-integrated manufacturing, robotic machining and techniques for recording tool wear during machining.

Anyone interested in learning about some of the specific discussions may contact the following faculty members: T.S. Tsong, Bruce Knox, Edward Klevans, Richard Tressler, Joseph Sommer, John Hoke, George Simkovich, Paul Howell, Wilbur Meier, James Biggers, Norman Macmillan, Russell Messier, Clayton Ruud, or Karl Spear.

Faculty members who might be interested in visiting Kennametal's facilities, preparatory to discussing cooperative research ventures, may contact John Davis or James Lundy of the Office of Industrial Research and Innovation at 865-9519.

Prevention of nuclear war will be topic addressed by sociobiologist in May 4 talk

Sociobiologist David Barash, author of the best-selling *The Whisperings Within*, will speak on "Preventing Nuclear War: Revising the Neanderthal Mentality" Tuesday, May 4, at 7:30 p.m. in Kern Building auditorium.

"Dr. Barash is coming to Penn State to release a major new statement on human evolution and the threat of nuclear war," says Dr. Gerald Phillips, professor of speech communication and coordinator of Dr. Barash's visit.

"Dr. Barash believes that humans have now reached the point in their evolution, where aggressive tendencies must be controlled and even reversed in order to prevent nuclear destruction of the species," Dr. Phillips continues.

"He will discuss how our language polarizes us and how our urgency to win leads us to ways of thinking and talking that make it impossible for us to confront our desperate peril. He will also discuss

hopeful signs in Europe of the possibility of modification."

After the talk, the audience is invited to a reception for Dr. Barash in the Kern Assembly Room. The reception is being sponsored by the Central Pennsylvania Chapter of the World Future Society.

Dr. Barash earned his Ph.D. at the University of Wisconsin. He is now professor of zoology and psychology at the University of Washington in Seattle. He is the author of many articles and several books on sociobiology, including the forthcoming second edition of the text *Sociobiology and Behavior*.

His visit is being sponsored by the Department of Speech Communication, the Ecology Program, the Office of the Liberal Arts Associate Dean for Research and Graduate Study and the University Scholars Program. Additional support for his speech has been received from a number of local and religious groups.

Two instructors to present guitar recital

Guitarist Anne Waller, an instructor of music, will present a recital Tuesday, May 4, at 8:30 p.m. in the Music Building recital hall. Ms. Waller will be assisted for part of her performance by Mark Maxwell, a guitarist and lutenist who is a part-time instructor.

Ms. Waller will perform Fernando Sor's Introduction and Variations on "Malbruno s'en va-en guerre," two sonatas by Domenico Scarlatti, and Enrique Granados' "Valse Poetico." Mr. Maxwell will join Ms. Waller in

William Lawes' Suite for Two Guitars, Sor's "Souvenir de Russie" and "Micro Piezas" by Leo Brower.

The two musicians performed in the Dallas-Fort Worth area in March, giving concerts at North Texas State University, Texas Christian University and Eastfield Junior College. Ms. Waller has just returned from New York City, where she was a performer with the Segovia Master Class sponsored by the Metropolitan Museum of Art and the Spanish Institute.

Experiential learning advocate to talk

Dr. Morris T. Keeton, president of the Council for the Advancement of Experiential Learning (CAEL), will present a public talk, "Effective Uses of Experiential Learning in Instruction," Thursday, May 6, at 2:15 p.m. in Room 402 Keller Building.

His visit is being sponsored by the College of the Liberal Arts, the Center for the Study of Higher Education and the Commonwealth Educational System.

Thursday morning, Dr. Keeton will meet with members of the faculty and staff and administrators who want to learn more about CAEL's activities and programs. Persons wishing to schedule appointments should contact Dr. Carl Lindsay at 865-7679.

Experiential learning is based on the premise that individuals should receive credit and recognition for learning acquired outside formal channels.

The Council for the Advancement of Experiential Learning is an association of colleges, universities, service agencies, corporations and individuals. It is supported by membership fees and grants from the Kellogg Foundation, the Lilly Endowment, the Fund for the Improvement of Postsecondary Education, the Babcock Foundation and the Ford Foundation.

Dr. Keeton, who received B.A. and M.A. degrees in philosophy from Southern Methodist University and M.A. and Ph.D. degrees in philosophy from Harvard University, taught at SMU and Antioch College, serving for one year as acting president of the latter institution.

The author of three books, he has been associated also with the American Friends Service Committee, the American Association for Higher Education, and the American Philosophical Association.

German Department marks Goethe anniversary

The Department of German has planned a number of special events in honor of the 150th anniversary of the death of Johann Wolfgang Goethe in connection with its hosting of the April 30-May 1 meeting of the Central Pennsylvania Chapter of the American Association of Teachers of German.

An exhibit, "Goethe in the Allison/Shelley Collection," has been prepared by Librarian Charles W. Mann Jr. in Patten's Rare Books Room.

Pianist Phyllis Triolo and soprano Barbara Hess will present a lieder recital Friday, April 30, at 8 p.m. in Eisenhower Chapel's Memorial Lounge.

On Saturday, Dr. Rie Preiser, professor of German, will deliver the principal address: "Marginalien zu Goethe," at 10:20 a.m. in Room 101 Kern Building.

Dr. Stanley Townsend, professor emeritus of German, will be the luncheon speaker, discussing "Goethe ohne Heiligenschein." The meeting will conclude with a production by German Department students of Goethe's *Urfurst*, at 3 p.m. in Room 301 HUB.

"As You Like It" on stage at Playhouse

One of America's leading scenic designers, William Joseph Eckart, has designed the sets for the production of *As You Like It* currently running at the Playhouse Theatre.

Shakespeare's comedy about love and lovers will be on view Saturday, May 1, and Tuesday through Saturday, May 4, with curtain times at 8 p.m.

The play is being directed by Robert E. Leonard, who rejoined the theatre arts faculty last fall as artistic director of the University Resident Theatre Company and the Pennsylvania Festival Theatre.

Mr. Eckart is currently a professor and head of the design program at Southern Methodist University. He has designed scenery, costumes and lighting for more than 40 Broadway productions, including such hits as *Damn Yankees*, *Li'l Abner*, *Out Upon a Mattress*, *Theme and Of Mice and Men*.

Penn State theatre-goers have previously admired Mr. Leonard's directing efforts in such plays as *Born Yesterday*, *The Sunshine Boys*, *On Golden Pond* and *The Last Meeting of the Knights of the White Magnolia*.

For ticket information and reservations, patrons should call the URTC box office at 865-1884.

Women in Law panel sponsored by Colloquy

Colloquy will sponsor a panel discussion on "Women in the Law" Monday, May 3, at 8 p.m. in the HUB assembly room.

Panelists include Ann Steinberg, treasurer of the District of Columbia Bar Association; Dr. Marina Angel, a faculty member at the Temple University School of Law; and Judge Lynne Abraham of the Court of Common Pleas in Pennsylvania.

Governor hails Festival

Last weekend's Fourth Annual Penn State Slavic Folk Festival didn't go unnoticed by Gov. Dick Thornburgh.

In a letter to festival organizer Prof. Lorraine Kapitanoff, the Governor commended "the Department of Slavic Languages at Penn State and the members of the Kappa Kappa chapter of Dobro Slovo for your outstanding efforts to preserve the values of the Slavic heritage."

Three trustees to be elected by alumni

Balloting has begun for three alumni positions on the University's Board of Trustees.

Ten graduates of Penn State have been nominated for three-year terms by their fellow alumni for the positions, according to Dr. Richard E. Grubb, senior vice president for administration. They are:

- Edward R. Book of Hershey, class of 1954, chairman of the board and chief executive officer of the Hershey Entertainment & Resort Company;
- Mimi Barash Coppersmith of State College, class of 1953, president of Barash Advertising and Morgan Signs and publisher of *Town & Gown* and *Where & When* magazines;

- Glenn W. Gamble of Bernardsville, N.J., class of 1951, director of career development at Rutgers University;
- Kenneth L. Holderman of State College, class of 1931, vice president emeritus for Commonwealth Campuses at Penn State;

- Alan S. Krug of State College, class of 1955, president of A'SK Associates;
- Robert D. McCarthy of Aaronsburg, class of 1954, professor of food science in the College of Agriculture at Penn State;

- Frank J. Muraca of Dunmore, class of 1975, trial attorney in the Scranton law firm of Geroulo, Kutha, Zipay & Muraca and business manager of the borough of Dunmore;

- Barry Lee Myers of State College, class of 1967, associate professor of business law at Penn State and general counsel of Accu-Weather, Inc.;

- Ronald J. Salešky of Miami, Fla., class of 1968, a manager for the Florida Power and Light Company; and

- M. Maxwell Smith of Lancaster, class of 1936, retired Penn State extension agent for Lancaster County.

Clause to aid faculty inventors

More university inventions from federally supported research should reach the market now that the government has adopted a uniform Patent Rights clause.

According to Robert F. Custard, University patent counsel, all government grants and contracts will contain a standard clause giving universities the right to retain ownership of inventions from projects supported by federal agencies.

"This should smooth the path for faculty inventors," explains Dr. Custard. "In the past, patent ownership during lengthy processing was often uncertain. Ownership depended on a patchwork quilt of regulations since each agency had its own policy."

In 1980, Public Law 96-517 mandated a uniform policy, now defined by regulations. Implementation of these regulations, evaluation of effect on innovation and an information clearinghouse function have been assigned to the Department of Commerce.

Dr. Custard notes that patent licensing on a limited-term, exclusive basis is permitted, which should improve university-industry technology transfer and provide incentive for industry to risk development of university-generated inventions. Often, substantial private investment is required to perfect an invention for the market.

The new regulations should also stimulate university-industry cooperative programs and especially aid pharmaceutical and medical developments, where patent rights are so critical.

Detailed information on the new policy is available from Dr. Custard or the Office of Sponsored Programs.

When sociologist Kingsley Davis visited University Park on April 6 to deliver a Graduate School lecture, Warren Robinson, director of the Population Issues Research Center, arranged a reunion. Dr. Davis was a Penn State faculty member from 1934-42, and at that time his secretary was Irene P. Glenn. Mrs. Glenn, who retired in 1975 after almost 40 years of service as a secretary in Liberal Arts, came back to campus and posed for this photograph with her former boss. She said that while he was minus a little of the curly hair she remembered, once she heard his voice, she would have known him at once.

Intensive Spanish plan to be started in June

A new Summer Intensive Spanish Program for persons wishing to learn the language in eight weeks will be offered June 14 through Aug. 11 at University Park.

Using a "total immersion theory," three full-time instructors, plus four or five native speakers, will work with groups of two or three students.

Three one-hour classes will be held each morning, according to Dr. Earl Fitz, assistant professor of Portuguese, Spanish and comparative literature. Dr. Fitz is in charge of the program.

"We hope students also will eat lunch together and converse in Spanish before embarking on their afternoon activities," Dr. Fitz says, noting that activities, which will include shopping trips, museum visits and talks, will allow students to put their Spanish to practical use.

The program is designed to meet the needs of persons working in such areas as business, the social services, the courts, hospitals and police departments, and also of Penn State students and members of the faculty and staff.

Since this is the pilot year for the program, enrollment will be limited to 24 persons. Dr. Fitz says. Anyone interested should contact Dr. Fitz in care of the Department of Spanish, Italian and Portuguese, N-352 Burrows Building, 865-4252.

Volunteers needed for orientation program

University faculty members and administrators can volunteer now to take part in next September's UPclose, part of Penn State's freshman orientation program.

In UPclose, groups of 10 to 15 new students meet with a faculty leader for a program or activity of the faculty leader's choosing. Last year, one faculty member took a group of students jogging; others

planned hikes or picnics, and some offered tours of their labs.

"The point is to give new students a chance to meet and talk to faculty members and administrators. It's a way of helping to introduce them to campus," says Diane Pulakos, coordinator of the program.

This year, UPclose will be conducted from Sept. 1 to 15. Faculty leaders can choose any time during that period for the activity they plan. They can also ask that their group be restricted to fewer than 10 people.

For more information, contact Ms. Pulakos, Room 135 Boucke Building, 863-2020.

Surplus Sales Store open on Fridays

Members of the University community are reminded that a campus Surplus Sales Store is open each Friday from 9 a.m. to 3:30 p.m.

The store offers for sale limited quantities of obsolete equipment and supplies no longer of use to the University. Items available include old furniture, office equipment, electronic equipment and a limited number of vehicles. All items are sold on an "as is" cash basis.

The surplus warehouse is located off Bigler Road near the Air National Guard installation.

Illich to offer STS, Graduate lecture

Ivan Illich will deliver the Graduate School/Science, Technology and Society lecture Monday, May 3, at 4 p.m. in Room 112 Kern Building.

Currently teaching medieval history in Germany, Professor Illich is the author of *Celebration of Awareness, Deschooling Society, Tools for Conviviality, Medical Necessity (Limits to Medicine), Energy and Equity, Disabling, The Right to Useful Unemployment and Vernacular Gender.*

Faculty/Staff Alerts

Holiday schedules

The University officially recognizes Memorial Day on the last Monday in May. A holiday, except Christmas, falling on a Sunday is officially recognized by the University the following Monday. July 4th this year falls on a Sunday. Therefore, the University holidays will be:

Memorial Day — Monday, May 31
Independence Day — Monday, July 5

Review your deductions

Regular University faculty and staff members are urged to review periodically the deductions being taken for their health care coverage (hospital/surgical/major medical, dental and vision) to be certain that they are paying for the correct coverage.

A change in family status may affect your cost and your coverage. For example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage, if you haven't taken steps to indicate the change in coverage desired.

Consideration should be given to changing coverage if any of the following circumstances arises:

1. You get married.
2. You get divorced (or separated and no longer wish to provide spouse dependent coverage).
3. You become the parent of a first child (note: a baby is covered automatically for 31 days following birth, however, to provide for coverage beyond that time for a child, a coverage form must be completed).

4. Your only dependent child reaches age 19 (or 23 in the case of a full-time student).

5. Your only dependent child gets married.

6. Your spouse begins or ceases working for the University as a regular employee.

7. Your only dependent child begins or ceases working for the University as a regular employee.

8. Your spouse enters military service.

9. Your only dependent child enters military service.

10. Your spouse dies.

11. Your only dependent child dies. If you feel a change should be made, call, write, or visit the Employee Benefits Division, Room 133 Willard Building, 865-1473.

Faculty or staff members located away from University Park may receive assistance by contacting the appropriate Business Manager or Regional Personnel Officer.

The University has no way of knowing whether a change should be made, so it is the responsibility of the individual faculty or staff member to keep his or her records up to date. No refunds for overpayment will be made unless it can be shown that the University was in error.

Faculty and staff members with children are reminded that dependent children are covered under the University's health insurance program until the age of 19, unless they are full-time students. Those who are full-time students continue to be covered until age 23.

Therefore, it may be desirable to seek other health insurance coverage in advance for dependent children approaching age 19 or 23, as applicable.

The University's insurance carrier does offer a hospital/surgical/medical plan to which the group insurance program may be converted. Information and application forms for this conversion coverage may be obtained from the Employee Benefits Division, Room 113 Willard Building (865-1473). Information about other, independent coverage can be obtained from commercial agencies or salespersons.

Claire Bloom

Itzhak Perlman

Series offers stars of music, theatre and dance

Violinist Itzhak Perlman will open the Artists Series 1982-83 season with an appearance Sept. 14 in Eisenhower Auditorium.

This year, subscribers to one of the four series — Music, Theatre/Dance, Schwab Concert and Schwab Theatre — will be given priority for tickets to three Special Events: a production of the Tony Award-winning musical, *Annie*; the first U.S. tour of *A Festival of the Nile*, with a company of 40 Egyptian singers, dancers and musicians; and a performance by The Washington Ballet of the holiday classic *The Nutcracker*.

In addition, subscribers to either the Music or Theatre/Dance series receive a 25 percent discount off of the price of individual tickets; and subscribers to both Music and Theatre/Dance receive a 30 percent discount — or 12 events for the price of eight. Schwab Concert, Schwab Theatre and The Lively Arts for Young Audiences series will also feature discounts.

Perlman's appearance is part of the Music Series, which also includes the Italian string ensemble *I Musici* with violinist Pina Carmirelli, on Oct. 9; the Prague Symphony Orchestra with musical director conductor, Jiri Belohlavek, Nov. 5; pianist Ruth Laredo, Jan. 28; the Vienna Choir Boys, March 18; and the Texas Opera Theater production of Donizetti's *The Daughter of the Regiment*, April 15. All Music Series performances are set for Eisenhower Auditorium.

The musical double feature *A Day in Hollywood/A Night in the Ukraine* will begin the six-performance Theatre/Dance Series on Oct. 24. The other five offerings are the modern, pop and classical rhythms of Twyla Tharp Dance, on Jan. 14; The New Vic Theatre of London rendition of *Canterbury Tales*, on Feb. 4; the folk music and dance of the Ballet Folclórico Nacional de Mexico, on March 12; the Pennsylvania Ballet (with orchestra), on March 25; and Moscow Gold-medal winners, the Polish

Mime Ballet Theatre production of *Hamlet*, on April 23. All Theatre/Dance performances will be held in Eisenhower Auditorium.

Schwab Auditorium will host the remaining two series — Schwab Concert and Schwab Theatre. The Concert Series will begin on Oct. 22 with pianist and harpsichordist Rosalyn Tureck, internationally acclaimed as the first lady of Bach. Other offerings include the clarinet and string quartet Tashi, with guest artists, Toby Appel on viola and Theodore Arm on violin, on Oct. 29; the Smithsonian Jazz Repertory Ensemble, on Nov. 12 (to be held in Eisenhower Auditorium with unreserved seating); the Medieval and Renaissance musical sounds of The Folger Consort, on Jan. 21; an appearance by Swedish baritone Hakan Hagegard, Feb. 12; and "Music from Marlboro" featuring outstanding young performers from Rudolf Serkin's Marlboro Music Festival, on April 29.

The fourth series, Schwab Theatre, will open on Oct. 17 with Claire Bloom starring in *These Are Women*, a portrait of Shakespeare's heroines: Lady Macbeth, Juliet and Viola from *Twelfth Night*. On Jan. 7, the Compagnie Philippe Genty (Theatre d'animation et de marionnettes) will entertain with pieces featuring marionettes, puppets and Black Light figures. On April 9, "An Evening with Queen Victoria," with Prunella Scales, (tenor Ian Partridge and pianist Richard Burnett, portrays Victoria from her solitary childhood to her death as Queen Empress.

The Lively Arts for Young Audiences programs will be continued by the Artists Series during the 1982-83 season. This year, the Smithsonian Jazz Repertory Ensemble will give a youth concert at Eisenhower Auditorium on Nov. 12. Disney Saturdays will be held at Schwab Auditorium and will feature a variety of films. Disney's *101 Dalmatians* and the Academy Award-winning *Red Balloon* will

be shown on Jan. 8; and Disney's *Many Adventures of Winnie the Pooh* and *Ugly Duckling*, with the Academy Award-winning *Golden Fish* will be shown on Jan. 22. The Pennsylvania Ballet will give a special performance with commentary for young people in Eisenhower Auditorium on March 26.

The Artists Series will begin sales to new subscribers on Tuesday, May 4. Subscription order forms are available at the Eisenhower Auditorium Ticket Center, the Artists Series office in Pine Cottage, and at the Artists Series booth across from the main HUB desk. Further information may be obtained by telephoning 865-1871, weekdays, 9 a.m. to noon and 1 p.m. to 4 p.m.

Bland

(Continued from page 1)

prevention; but he has been involved with a number of other organizations, serving on State College's Zoning and Hearing Board, the Borough Parking Authority, the Traffic Commission and the School Board. He was also president of the Ambulance Club.

His activities in fire prevention began in 1943 when he first rode on a fire truck in Hiram, Ohio. Since then, he has run the gamut from serving as chairman of the National Commission on Fire Prevention and Control — a post to which he was appointed by President Nixon — to his present duties as a firefighter with State College's Alpha Fire Company.

The report drafted by the national commission, "America Burning," resulted in legislation establishing the Fire Prevention and Control Administration in the Department of Commerce.

Mr. Bland was also appointed to the Governor's Commission on Fire Prevention and Control in Pennsylvania, and at the moment is helping to finish up a report for the State on possible strategies for fire control.

On a local level, he makes himself available to share information with fire companies. "I've been known to dash off for the evening to talk to a group," he notes.

"When an individual says he isn't going to get involved because one person can't make a difference, that's a cop-out," Mr. Bland continues. "The thing about the fire business that makes it such a challenge is that this is an area where something can be done. We have the technical knowledge to reduce the number of fires and resulting loss of life by at least 50 percent. The arguments against doing do are economic and social."

Although the media pay the most attention to fires in public buildings such as hotels, schools and nursing homes, Mr. Bland points out that by far the greatest problem is in one- and two-family residences.

That's where you run into the 'man's home is his castle' argument," he says.

"You can't go into a private home and tell people what to do, and I'm not even sure you should."

"But persons who argue that the government should have no regulatory role probably wouldn't be in favor of having their local government abolish its fire department and cease training firefighters."

Legislation and public safety laws hold the key to solving the problem of reducing fires, Mr. Bland holds.

"A state building code could save vast sums of money," he adds, "but political reality is very difficult to achieve. We have the tools to predict that each day a certain number of people will die in home fires, but society has to decide if that is too many or not enough."

"You can impact on the problem, but the other side is a political decision. Why doesn't the Borough of State College, for example, have a sprinkler ordinance? It's not a lack of technology; it's what society will support."

Barkman

(Continued from page 1)

Gordian knot for the troubled students. "He is also a problem solver and interpreter for journalists, faculty, families and administrators."

The subject of these encomiums is celebrating his tenth year with the Senate. He earned M.Ed. and Ph.D. degrees at the University in secondary education and educational administration, respectively, and served as a teacher, high school principal and supervising principal before taking up his post in Birch Cottage.

While putting in long hours working with the Senate's officers and committees, Dr. Barkman still manages to make time to assist as many as a dozen other faculty members each day.

"It may be a two-minute question-and-answer conversation," he notes, "or perhaps I see that someone is going to Germany on leave; and I remember that someone else has just come back from Munich with research findings which might be useful to the departing scholar. I'll try to put them in touch with each other."

This willingness — indeed pleasure — in going the extra mile is characteristic of Dr. Barkman's relationships with the University community, not only at University Park but also at all of Penn State's campuses. He visits them regularly with the Senate officers.

He is always available to help interpret student rules to faculty advisors or to sit down with interested parties to explain personnel benefits of which they may not be aware.

"I'll help someone take advantage of their medical benefits, for example," he notes, "then he or she has information to pass on to colleagues. Academic support is an add-on to the job. I try to relieve senators of all the 'Mickey Mouse' stuff, can."

"Part of my job is to help give everybody the opportunity to use their full potential. A good administrator creates an environment where faculty members can do their best work. I try to pull things to myself, to make myself a sort of buffer or scapegoat, if you will, to allow people to work things out."

"I'm always amazed at the tremendous scope of knowledge in this University. It's a joy to sit in front of this big console and push buttons."

The Senate leadership respond to Dr. Barkman's conception of his job in this statement:

"Our's is a remarkably smooth-running and efficiently organized Senate — in large measure because of Oscar Barkman's unstinting devotion to this organization. But beyond this, Penn State — including the whole Commonwealth Educational System — is a more pleasant, humane system because Oscar Barkman brings to it a spirit of gentle, thoughtful, individual concern. We need more such folk to weave us into a real community."

General Education Conference program Frisbey

Friday, May 7

12:30 p.m. Registration, Lobby,
Music Building recital hall

1:30 p.m. Opening Session, Music Building
recital hall

Convener: Nancy M. Tischler, Chairman,
University Faculty Senate

Welcoming Remarks: John W. Oswald, President

Introduction: Edward D. Eddy, University Provost

Presenter: Jerry Gaff, Director,
Center for General
Education, American
Association of Colleges,
Washington, D.C.

Topic: "Developing Structures for
Renewing General Education"

3:00 p.m. Concurrent Panels

Strategies for Internationalizing General Education

Building upon January's panel on "developing an international view in general education," this panel will discuss proposals for raising international awareness throughout the curriculum and for strengthening requirements for foreign language study.

Keller Conference Center, Room 115

Moderator: William J. Duiker

Panelists: Peter J. Behrens, John D. Daniels, William H. Gotsolik, Craig Millar

Enhancing an Awareness of General Education

This panel will consider strategies for improving faculty and student understanding of general education goals and programs, and steps for enhancing student-faculty interaction.

Keller Conference Center, Room 204

Moderator: Philip C. Jacobson

Panelists: Paul Axt, Christopher Hopwood, Hope Pelsynski, Phillip E. Stebbins

Identifying the Qualities and Skills Which Generally Educated Persons Should Possess

The panel will discuss the qualities and skills which define college graduates and which enhance personal and professional development.

Keller Conference Center, Room 305

Moderator: Jacob B. Baumann

Panelists: Donald H. Ford, Louise Garraux, Gayle L. Smith, James G. Thompson

The Role of Science and Technology in Preparing an Informed Citizenry

The panel will present their perceptions of the role of general education in developing an understanding of scientific and technological principles.

Keller Conference Center, Room 312-314

Moderator: Richard L. McCarl

Panelists: Z.T. Bieniawski, Herbert Cole, Robert J. Heinsohn, Robert B. Mitchell

Special Approaches to General Education

The panelists will describe experiences and proposals for promoting general education through special orientation, interdisciplinary and coordinated courses.

Keller Conference Center, Room 402-403

Moderator: Robert D. Arbuckle

Panelists: Robert Colucci, Zachary Irwin, Ronald J. Harshbarger, Judith L. Stephens

Concurrent Panels

1. Examining the Collegiate Environment Which Supports General Education

The panel will explore the relationship between the curriculum and the total campus environment and consider measures for enhancing this relationship.

Keller Conference Center, Room 204

Moderator: Raymond O. Murphy

Panelists: Daniel Bollag, Patricia Farrell, Kim Hammond,
M. Lee Upcraft

2. Exploring the Liberating Component of General Studies

The panel will explore definitions of liberal and general education and the development of a program which better fits the educated individual to deal with the contemporary uncertainties of personal and professional life.

Keller Conference Center, Room 305

Moderator: William Toombs

Panelists: Joseph C. Flay, R. Dorn Hetzel, Ernest B. Lowrie, G.P. Patil

3. Matching Values and Rewards

The panel will discuss the responsibilities of faculty, their preparation for delivering a general education, and the reflection of academic values within the reward system.

Keller Conference Center, Room 312-314

Moderator: Kenneth P. Mortimer

Panelists: James B. Bartoo, Shirley Marchaloni, John D. Martz, Mark D. Shaw

4. Qualifications and Expectations of the College Graduate

The panelists will present their views on the educational objectives necessary for job satisfaction, career advancement, and life-long learning. Panelists will consider the integration of general education as it affects professional development.

Keller Conference Center, Room 402-403

Moderator: Gene M. Love

Panelists: John D. Connor, H. LeRoy Marlow, Marian U. Coppersmith, William Merrill

extended, renew their exemptions from military service or satisfy their tax obligations.

"I see my job as trying to make life here as easy as possible for these students, so they can concentrate on their academic problems."

Undaunted by the growing stacks of paperwork confronting her, Mrs. Frisbey also makes an effort to get to know the students. Recently when a young man was hospitalized after being injured by a baseball which broke his cheekbone, she visited him in the hospital on a Saturday afternoon.

"Students need to know somebody cares and understands their problems," she says simply.

Students point out that Mrs. Frisbey takes the trouble to learn their full names and to remember them. "She pronounces names correctly and precisely," one student wrote. "Her ability to remember almost everything concerning each and every student has created a deep feeling of respect within each person with whom she comes in contact."

Mrs. Frisbey and her husband, Norman, an undergraduate studies advisor with DUS, have travelled extensively and spent three years in Iran during the sixties. Characteristically, Mrs. Frisbey mastered Persian during her stay.

Over the years, she has seen not only a growth in the number of international students at Penn State but also a change in their expectations. "They're interested in broader kinds of activities now," she explains. "Where formerly they concentrated exclusively on academics, many of them now want more intercultural exchanges."

Responding to this need, Mrs. Frisbey is her office's permanent liaison with the State College Hospitality Council. "Getting to know international students as people is truly rewarding," she says. "If you like people, you will like them no matter what their culture."

"Americans who don't get involved with people from other countries are missing a lot."

Conference

had appointments at Hobart and William Smith Colleges, the University of the Pacific, the University of California at Berkeley and the University of Leyden. Among his numerous publications are three books.

Penn State Day at Hershey is May 15

Performing arts groups such as the Penn State Blue Band, the Jazz Band and the Glee Club will be among the main attractions at the first annual Penn State Day at Hershey Park next month.

Penn State Day at Hershey Park will be sponsored by the Lion Ambassadors and the Penn State Alumni Association. It is scheduled for Saturday, May 15, from 10:30 a.m. to 10 p.m.

Special programs sponsored by Penn State groups will be performed throughout the day, and the park's amusement rides and facilities will be open. According to Lion Ambassador Bruce Kent, chairman of the event, all Penn State students, faculty members, staff and alumni will receive reduced admission rates. Alumni and faculty and staff members will be charged \$9.25 with the coupon in this issue of INTERCOM. Students will pay \$8.75 and must present their student ID cards. Other special rates are: children under four years will be admitted free, and people 62 and over will be charged \$6.

Tickets will be available at the park at a special gate for Penn Staters.

University Park Calendar

April 29 — May 9 Special Events

Thursday, April 29

Nursing/Human Development, "Health Fair," 10 a.m.-4 p.m., Nursing Consultation Center. Also April 30.

New German Cinema, Handke, *The Left Hand Woman*, 7 and 9:15 p.m., HUB Assembly Room. Also April 30.

Museum of Art film, *Heretic Materialism*, 7 p.m., First Floor Gallery.

Kern Classics, *Lolita*, 8 p.m., 112 Kern.

Orchestra Dance Group, 8:30 p.m., White Bldg. Dance Theatre. Also April 30.

Friday, April 30

Sports: golf (men), Alumni Tournament. Also May 1.

Commonsplace Theatre, *La Cage Aux Folles*, 7 p.m.; Tess, 8:30 p.m., 112 Kern.

Cinematheque, *Brotherless*, 7 and 9 p.m., 121 Sparks. Also May 1.

German Dept. AATG meeting, leader concert, 8 p.m., Eisenhower Chapel Memorial Lounge.

Artists Series, The Gregg Smith Singers, 8:30 p.m., Schwab.

Saturday, May 1

Dairy Exposition "Show Day," 8 a.m., Dairy Barns.

German Dept. AATG meeting, 10 a.m., 101 Kern. Rio Prentiss on "Marginalien zu Goethe," 10:20 a.m., 101 Kern. Gene Pearson, Moravian College, on "Sophie Marceau: Lost German Poet of the Goethe Age," Radio Public, Lafayette College, on "Goethe und das serbische Volkslied," and Ursula Meyer, Goethe House, on "Liedermaker in Deutschland," 11:15 a.m., 208 Willard; Stanley Townsend, prof. emeritus, German, on "Goethe ohne Hegelschen," 12:30 p.m., Penn State Room.

Nittany Lion Inn film, "Goethe heute," 2 p.m., 124 Sparks; Drama, "Urfahrt," produced by students of German, 3 p.m., 301 HUB.

Sports: recital and field (men), Nittany Lion Relays, 12 p.m.; lacrosse (men) vs. Montclair State, 8 p.m.; tennis (men) vs. Bowling Green, Mercyhurst and Ohio, also May 2.

Blue-White Football Game, 1 p.m., Beaver Stadium.

Orchestra Dance Group, 2:20 and 8:30 p.m., White Bldg. Dance Theatre

URTC, *As You Like It*, 8 p.m., Playhouse. Also May 4-8.

France-Cinema, Fassbinder, *Li Marleen*, 7 and 9 p.m., 112 Kern. Also May 7.

University Choir, Symphony Orchestra and Symphonic Wind Ensemble concert, 8:30 p.m., Eisenhower.

Monday, May 3

First day to sign Summer Term NDSL and University Long Term Loans, 108 Shields.

Yugoslav Film Festival, noon, HUB Assembly Room. Animated and fine arts films sponsored by Yugoslav Press and Cultural Center and IAHS.

Sports: baseball vs. Juniata, 3 p.m. Public lecture, 4 p.m., 101 Kern. Gerhard Wieting, Federal Institute for Eastern and Western Studies, Cologne, West Germany, on "German-American Relations: A Continuing Challenge."

Visiting STS Scholar and Graduate School Lecture, 4 p.m., 112 Kern. Ivan Illich, theologian, historian and educator. Topic to be announced.

Interdisciplinary Symposium on Value, 7:30 p.m., 101 Kern. Nancy F. McKenzie, philosophy, on "Beyond Professional Ethics: Formulating a Productive Ethic."

Black Studies Program lecture, 7:30 p.m., Robeson Cultural Center conference room.

Robert Holmes, Atlanta Univ., on "The Reagan Presidency and Black America — A Political Scientist's Perspective," and K.C. Morrison, Syracuse Univ., on "The Reagan Presidency and Black Africa — A Political Scientist's Perspective."

University Readers, *Any Reasonable Offer* by Kurt Vonnegut, 7:30 p.m., HUB Reading Room.

Also May 4

Colloquy panel discussion on "Women in the Law," 8 p.m., HUB Assembly Room. Ann Steinberg, D.C. Bar Association treasurer; Marina Angel, Temple Univ.; and Judge

Corin (Thomas McNally) greets Touchstone (Jeff Kramer), Aliens (Mona Niemiec), and Ganymede (Lawr Means) in URTC's production of "As You Like It" now at Playhouse. See story page 4.

Lynne Abraham, Court of Common Pleas.

Tuesday, May 4

Comp. Lit. Luncheon, 12:15 p.m., 204 HUB. Alphonsio Lingis, philosophy, on "Black Gods."

IAHS lecture, 12:45 p.m., 228 Sackett, Francois Suard, Univ. of Lille, France, on "Chretien de Troyes' *Erec et Enide* (in French)." University Faculty Senate meeting, 2:10 p.m., 112 Kern.

Sports: tennis (men) vs. Bucknell, 2:30 p.m. Phi Kappa Phi, annual initiation, 5:30 p.m., HUB Ballroom. Address by Provost Edward D. Eddy.

David Barash, Univ. of Washington, on "Preventing Nuclear War: Reversing the Neanderthal Mentality," 7:30 p.m., Kern Auditorium.

Recital, Anne Waller, guitarist, with Mark Maxwell, 8:30 p.m., Music Bldg. recital hall.

Wednesday, May 5

Late drop deadline.

Commons Center, noon, Kern Lobby. Yugoslav Film Festival, noon, HUB Assembly Room. Documentary and fine arts films sponsored by Yugoslav Press and Cultural Center and IAHS.

Sports: baseball vs. Indiana, Pa. (DH), 1:30 p.m.; lacrosse (women) vs. Princeton, 3:30 p.m.

David Barash, Univ. of Washington, on "Sociobiology and Communication," 2 p.m., 210 Sparks.

IAHS lecture, 8 p.m., 101 Kern. Erich S. Gruen, Univ. of California, Berkeley, on "Augustus and Alexander: Ideology of Empire."

Thursday, May 6

HUB Craft Center sale, 10 a.m.-4 p.m., Fisher Plaza. Also May 7.

Public lecture, Morris T. Keeton, Council for the Advancement of Experiential Learning, on "Effective Uses of Experiential Learning in Instruction," 2:15 p.m., 402 Keller.

Kern Classics, *Sleuth*, 7 and 9 p.m., 112 Kern. New German Cinema, Herzog, *Sirozok*, 7 and 9 p.m., HUB Assembly Room.

Philosophy/13th Annual Dostoevsky Lecture, 7:30 p.m., 101 Kern. John E. Smith, Clark Professor of Philosophy, Yale Univ., on "Being and Willing."

Friday, May 7

Last day for signing Spring Term NDSL and University Long Term Loans, 108 Shields.

General Education Conference. Opening Session, 1:30 p.m., Music Bldg. recital hall. Speaker, Jerry Gaff, director, Center for General Education.

American Assn. of Colleges, on "Developing Structures for Renewing General Education." Concurrent Panels, 3:30 p.m. Keynote address, 8:30 p.m., Music Bldg. recital hall. Harlan Cleveland, director, Hubert H. Humphrey Institute of Public Affairs, Univ. of Minnesota, on "Shouldn't We Also Be Educating for Wisdom?"

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. John Opie, Duquesne Univ., on "The Aesthetics of Land Arnds."

Cinematheque, *Gates of Heaven*, 7 and 9 p.m., 121 Sparks. Also May 8.

Commonsplace Theatre, *Stripes*, 7 and 9 p.m., 112 Kern. Also May 9.

CSA Coffeehouse, 8 p.m., 102 Kern.

Sports: volleyball (men), NCAA Championships, also May 8.

Saturday, May 8

General Education Conference. Concurrent Panels, 9 a.m. Plenary session, Keller Conference Center Auditorium, 11 a.m. Presentations: "The Re-Vison of General Education," Provost Edward D. Eddy; "Recommendations for the Future," Theodore L. Gross, provost and dean, Capital Campus; "The Next Steps," President John W. Oswald.

France-Cinema, Herzog, *Aguirre, the Wrath of God*, 7 and 9 p.m., 112 Kern.

Archaeological Institute of America lecture, 8 p.m., 101 Kern. Speaker: Calin Edmonson.

Sunday, May 9

Honors Convocation, 2 p.m., Eisenhower. Speaker, Bruce Murphy, political science, on "Penit State and the Ivy League Syndrome."

Penn State International Dancers performance, 3 p.m., 132-133 White.

Seminars

Thursday, April 29

Chemistry, 12:45 p.m., 333 Whitmore. John K. Stille, Colorado State Univ., on "Organic Synthesis via Organopalladium Catalysis."

Anthropology, 3:30 p.m., 107 Carpenter. Elliot Abrams on "Excavations of an Elite Residence, Copan, Honduras."

History, 3:30 p.m., Eisenhower Chapel Memorial Lounge. Robert Forster, Johns Hopkins Univ., on the Annals school of history.

Physics, 3:50 p.m., 117 Osmond. J. Panitz, Sandia Lab., on "Molecular Imaging in High Energy Fields."

Monday, May 3

Teaching and student awards to be presented

Four faculty members will receive 1982 AMOCO Foundation Outstanding Teaching Awards of \$1,000 each at the Sunday, May 9, Honors Day Convocation. The program will begin at 2 p.m. in Eisenhower Auditorium.

To be honored are: David E. Butt, associate professor of speech communication at University Park; Richard M. Lerner, professor of child development at University Park; Patricia Rizzolo, assistant professor of English at Ogontz; and August H. Simonsen,

All faculty are invited to participate in the Honors Convocation as members of the academic procession. Faculty in academic regalia should report to the Green Room of Eisenhower Auditorium by 1:30 p.m. Seating in the front rows of the auditorium will be reserved for those in the procession. After the recession, faculty are invited to visit with students in the college award distribution area. Faculty and staff not wishing to be members of the procession are invited to attend the program in the audience.

assistant professor of environmental sciences at McKeesport.

AMOCO recipients, Provost Edward D. Eddy explains, are chosen from a group nominated by faculty members and students recommended as finalists by a University committee including faculty members and students and chaired by Dr. Robert E. Dunham, vice president for undergraduate studies.

During the convocation, some 300 undergraduate students from all of the University's campuses will be cited for academic excellence.

The keynote address will be delivered by Dr. Bruce Allen Murphy, assistant professor of political science. His topic will be "Penn State and the Ivy League Syndrome."

"I feel very strongly that one must be an active scholar to be an effective teacher," Richard M. Lerner says.

A professor of child development, Dr. Lerner has been a member of the faculty since 1976. Prior to that, he earned B.A. and M.A. degrees at Hunter College, his Ph.D. at City University of New York and then taught at Eastern Michigan University.

The author or co-author of six books, 18

University, Zimbabwe agree on linkage

President Oswald and Walter Kamba, principal and vice-chancellor of the University of Zimbabwe, together signed a Memorandum of Understanding between the two institutions during Professor Kamba's visit to University Park on April 30.

The memorandum states in part: "In recognition of the mutuality of interest and the mutual advantages to be derived from a sharing of resources and, specifically, from the exchange of students, academic staff, and administrative staff between our two institutions, we affirm herewith our intent to encourage the development of specific linkages between our two universities."

Among the specific professional linkages described in the document are staff and student exchanges, long-term and short-term research projects, colloquia and seminars.

Administrative personnel such as librarians, registrars, deans, data processing technicians and others will be encouraged to participate in the relationship, with specific linkages and activities to be developed by the appropriate offices of both institutions.

The contact between Penn State and the University of Zimbabwe was begun last November during Provost Eddy's visit to the young nation. At that time, he met with Professor Kamba and the deans of the university for a discussion of various forms of cooperation. Dr. Eddy also conferred with the American ambassador to Zimbabwe and other embassy officials.

Dr. Eddy noted that exchanges between the universities would be a two-way street. The memorandum says: "Penn State students and faculty members . . . can derive essential professional enrichment from sustained contact with the University of Zimbabwe in its unique political, geographical and economic environment."

In a brief talk after the signing of the agreement, Dr. Oswald noted Penn State's strong commitment to both international programs and international students.

Professor Kamba then described the process of reconciliation now going on in

President Oswald and Professor Kamba sign agreement.

Zimbabwe as the result of the establishment of a truly national government by Prime Minister Robert Mugabe.

"Of course, we have problems," Professor Kamba said, "but there is no doubt of our determination to succeed."

Pointing out how crucial this success is to the future not only of his own country but also to that of all of southern Africa, Professor Kamba called for tolerance and "positive action such as this Memorandum of Understanding" on the part of the United States.

Professor Kamba accepted the position of principal and vice chancellor in 1980. He was the first black in Zimbabwe to take his articles in law (at the University of Capetown) and holds a master's degree in law from Yale University.

From 1969 to 1980, he was a senior lecturer in law and dean of the law faculty at the University of Dundee in Scotland. He will receive an honorary degree from that university this week.

The University of Zimbabwe was established by Royal Charter in 1955, and opened its doors in 1957 with 68 students, 60 of whom were white.

"The University of Rhodesia, as it was then known, was never an integral part of the life of the country before

independence," Professor Kamba recalled. "It was a non-racial institution trying to

carry on in a society ordered on the basis of race. The hostile social, political and economic environment distorted the role of the university. The relationship between the university and the regime was at best a working misunderstanding."

Professor Kamba said that when he became principal and vice chancellor his first concern was how to make the university an effective element in the national development of Zimbabwe.

A second concern was to insure that the university would grow rapidly in the number of its students and add disciplines to meet Zimbabwe's need for trained manpower and research.

And finally, he was determined to find ways to forge closer links between the university and the government without destroying the academic integrity of the former.

To achieve his first goal, Professor Kamba believes a radical change is necessary in the orientation of the university's staff, many of whom are white expatriates without a long-term commitment to the institution.

"It is essential that we develop our own indigenous staff," Professor Kamba said, "and we believe that the agreement we have signed with Penn State will further this effort by helping us establish staff

(Continued on page 6)

Patricia Rizzolo not only takes a keen interest in the progress of her own students at Ogontz but, as director of the Campus's Reading and Writing Center, has also influenced the work habits of thousands of other undergraduates.

Hired in 1975 to set up a basic skills program at Ogontz, Dr. Rizzolo holds B.S., M.A. and Ph.D. degrees in English

David Butt's teaching career got off to an early start.

"I remember tutoring a kid in elementary school and liking it," the associate professor of speech communication recalls.

His first venture as a professional actually began a number of years later — in a sixth-grade classroom — after he had

August H. Simonsen doesn't think he's an anomaly at the McKeesport Campus.

"Most of our faculty members are glad to offer students help outside the classroom," he reports. "I'm sure that a majority of Penn State's faculty willingly reach out to students."

Dr. Simonsen, an assistant professor of environmental sciences, does feel, however, that instructors at a Commonwealth Campus have a definite

Penn Staters

Dr. Theodore L. Gross, provost and dean of The Capitol Campus, chaired the session in contemporary American Literature at the Salzburg Seminar in American Studies, April 18-May 1, in Salzburg, Austria. Joined by an international faculty and student body of 200, Dr. Gross delivered lectures on the work of Saul Bellow and Ralph Ellison. In Paris, on May 2, he addressed the alumni and alumnae of the Salzburg Seminar on aspects of contemporary American literature.

Dr. Gross recently served as General Editor of *America in Literature*, a two-volume interdisciplinary anthology that traces the national culture from its roots to the present day, and wrote the section dealing with nineteenth-century America.

The purpose of the Salzburg Seminar is the study, at the highest level, of contemporary problems of world-wide scope, as well as of significant aspects of American society. It provides a unique forum for the frank exchange of ideas and informed opinion. It offers to non-Americans practical, as well as theoretical, insights into developments in the United States at the same time as it familiarizes American participants with the ideas of those from other countries.

Dr. Rodrigue Morteel, professor of obstetrics and gynecology and director of gynecologic oncology at the Hershey Medical Center, has been granted a one-year leave of absence to allow him to serve as a visiting professor at the University of Paris XI. Dr. Morteel was commissioned by the French government to pilot a program integrating clinical and basic research at the University of Paris.

Dr. Barbara J. Smith, assistant dean of Libraries and head, Division of Commonwealth Campus Libraries, has been named a Senior Fellow at UCLA's Graduate School of Library and Information Science, where she will participate in seminars and programs on academic research library management. The fellowships are awarded jointly by UCLA and the Council on Library Resources.

Dr. Richard E. Tressler, professor and chairman of the Ceramic Science and Engineering program, has received the 1981 Karl Schwartzwalder Professional Achievement in Ceramic Engineering Award of the American Ceramic Society. A Fellow of the Society, Dr. Tressler is secretary-elect of its basic science division and vice chairman of its Ceramic Educational Council. He also serves as chairman of the Society's editorial advisory board and as a member of its publications committee.

Baritone Robert Trehy, professor of music and Fellow, IAH, has performed in Rodgers and Hammerstein concerts with the Nashville; Calgary, Canada; Pittsburgh; and Madison, Wis., Symphonies.

Dr. E. Willard Miller, professor of geography emeritus and associate dean for resident instruction emeritus, and Ruby M. Miller, former map librarian at Pattee, are the authors of a five-volume bibliography titled *Asia: A Bibliography on the Third World; The Far East: A Bibliography on the Third World; Southeast Asia: A Bibliography on the Third World; Southern Asia: A Bibliography on the Third World; and the Middle East: A Bibliography on the Third World*, published by Vance Bibliographies. The bibliographies contain more than 4,500 references dealing with government and politics, foreign relations, military and rural development, natural resources, and social problems in these regions. These volumes are of particular interest to Asian specialists.

Dr. Helen A. Guthrie, professor of nutrition and head of the Nutrition Program in the College of Human Development, will receive an honorary doctor of science degree on June 10 from the University of Western Ontario in London, Ontario, Canada, where she will address the Convocation.

Dr. Guthrie, who received her B.S. in home economics from Western Ontario, is being honored as "an authority on infant nutrition and . . . a prominent nutrition educator whose views have been sought by both industry and government." She serves on the board of directors of Nabisco Brands and in 1978 received the Borden Award for outstanding work in nutrition education and research, presented by the American Home Economics Association. She has also served on the Food and Nutrition Board of the National Research Council and is currently a member of the council's Recommended Dietary Allowances Committee. She is a former president of the Society of Nutrition. Her text, *Introductory Nutrition*, is now entering its fifth edition, and she has authored numerous scholarly publications.

Dr. Guthrie received her M.S. in nutrition and biochemistry from Michigan State University and was awarded the 1980 Outstanding Alumni Award from that institution's College of Human Ecology. Her Ph.D. in physiology was earned at the University of Hawaii. She has been a Penn State faculty member since 1949.

Dr. Harold L. Lovell, professor of mineral engineering, was the invited guest of the Water Research Commission of the Republic of South Africa at the 11th conference of the International Association of Water Pollution Research and Control at Capetown and Pretoria, South Africa, March 28-April 7. Representing the U.S. Environmental Protection Agency and the U.S. coal community, he also presented a paper on "Coal Mine Drainage Control in the United States: An Overview."

Dr. Charles D. Ameringer, professor of Latin American history, presented an invited paper, "Honduras and Costa Rica in the Central American Crisis," at a Symposium, "The United States and Central America," on April 20 at the Graduate Center of the City University of New York. The Symposium was sponsored by the National Committee on American Foreign Policy. Among the speakers were Senator Robert C. Byrd, Senate Minority Leader; Congressman Michael D. Barnes, chairman of the House Sub-Committee on Inter-American Affairs; and prominent representatives from the region and distinguished American academic specialists.

A retrospective exhibit of paintings by David Milby, associate professor of art at Ogontz, will open May 8 at the Campus. Twelve mural-size paintings, accomplished with the aid of a Guggenheim Fellowship, are among the works to be displayed.

Most of Professor Milby's works reflect an interest in various forms of abstraction or semi-abstraction, often on a mural-size scale. Many are concerned with personal history and family genealogy, a theme that has intrigued him since high school and became entwined with his artistic pursuits when, in 1974, he inherited a large collection of old family photographs and records.

Sheldon R. Gelman, professor of social welfare and director of the social welfare major, has been elected a vice-president of the American Association on Mental Deficiency representing the Social Work Division. He will assume office in June at the 106th Annual Meeting of the Association in Boston.

Dr. Maureen A. Carr, director of the School of Music, has been elected to the board of the Music Theory Society of New York State and to the Undergraduate Commission of the National Association of Schools of Music (NASM).

Robert A. Patterson, senior vice president for finance and operations and treasurer of the University, has been appointed by Governor Thornburgh to a nine-member commission being created to study revitalization of the State's rail network.

He is one of four members named to the commission by the Governor. Five additional members will be named later.

The commission was created by the State Legislature in Act 144, approved by the Governor in December. In particular, its members will study the feasibility of developing a high-speed rail passenger system in Pennsylvania. They will also examine other questions related to restoring the State's rail freight and passenger service.

Bookshelf

Dr. Robert D. Hume, professor of English, is co-editor of *Vice-Chamberlain Coke's Theatrical Papers, 1706-1715*, published by Southern Illinois University Press. His collaborator was Professor Judith Milhous of the University of Iowa.

The Coke papers are an immense addition to knowledge of the florid period of London theatre history in which Vanbrugh opened the Haymarket theatre, Italian opera came to England, and the Triumvirate management of Wilks, Cibber and Booth took over at Drury Lane.

The papers provide a wealth of information about the operation of early 18th century theatres. The documents include rough drafts of orders by the Lord Chamberlain regulating the theatre; complaints against management by actors, singers and dancers; costume and sundries bills; performers' contracts; orchestra rosters; salary lists; tradesmen's bills; financial estimates for the opera; lists of daily receipts; complaints by angry Italian castrati about breach of contract; and the only extant daily box-office reports for opera in London before the 1730s.

Two major clusters of documents are of special interest. They concern Vanbrugh's disastrous plunge into Italian opera at the Haymarket in the spring of 1708, and the ferocious row of 1713-15 which saw Booth replace Doggett in the Triumvirate. Coke's theatrical papers have been known to theatre historians for more than 150 years, but until this volume have remained largely unused — mainly because they have been dispersed through the years at auctions.

The editors started their work with the 82 Coke documents which came to the Harvard Theatre Collection in 1928; all were unordered, and many were unsigned and undated. They also located eight other items from special collections at Harvard. Eventually they were able to round up another 71 items — mostly letters — from libraries and private collections in the United States and Great Britain.

Carpooler

Linda Smeltzer needs a ride from the Rud-Cor Tractor Park in Centre Hall to the University (Pattee Library area). She works from 7 a.m. to 3:30 p.m. and can be reached at either 865-1755 (7 a.m.-3:30 a.m.) or 364-9673 (after 4:30).

Mr. Patterson joined Penn State in 1980. Before that, he was secretary and treasurer of the Long Island Railroad Company for six years. He served the railroad for 13 years prior to that as director of research and assistant to the president.

During that period, he was also associate professor of finance in the Graduate School of Business of New York University. He has taught courses in transportation economics at Hofstra University.

Before joining the railroad, Mr. Patterson was assistant treasurer and statistician-analyst at Eastern Airlines, with responsibility for financial, operating, and traffic analysis, stockholder relations and tax accounting.

He holds a bachelor's degree from Grove City College and a master of business administration degree from New York University. In 1980, he was awarded an honorary doctorate by Grove City College, which he serves as a trustee.

Appointed to the commission last week with Mr. Patterson were: Donald Bryan of Harrisburg, State deputy secretary for local and area transportation in the Transportation Department; Everett W. Croyle of Enola, State legislative director of the United Transportation Union (formerly the Brotherhood of Railroad Trainmen); and Robert A. Gleason, a Johnstown insurance broker.

Promotions

Staff Non-Exempt

Bernadette Ann Bobby to data specialist in Education.

Clerical

Barbara Grant Faunce to accounting clerk at Ogontz.

Anna Mae Heger to accounting clerk at Ogontz.

Ruth A. O'Brien to clerk, Insurance A at Hershey.

Technical Service

Charles A. Foote to laundry worker/truck driver at Hershey.

William Houston to maintenance worker (general) B at Capitol.

Harrison E. Rodkey to painter and facilities maintenance worker at Capitol.

Retirements

Elaine M. Detwiler, secretary in the College of Agriculture, April 15, 1963, to March 19, 1982.

John G. Doll, maintenance worker, utility, Office of Physical Plant, Sept. 16, 1965, to May 1, 1982.

Genevra S. Feagle, physician, University Health Services, May 1, 1966, to May 1, 1982.

Samuel B. Feagle, physician, College of Health, Physical Education and Recreation, Sept. 1, 1965, to May 1, 1982.

Marshall Harpster, group leader, guard, Applied Research Laboratory, May 11, 1967, to Jan. 31, 1973, and May 1, 1974, to April 1, 1982.

Grace M. Hosterman, food service worker, Housing and Food Services, Sept. 25, 1966, to May 14, 1982.

Ivy E. Lytle, residence hall worker, Housing and Food Services, Aug. 29, 1966, to May 29, 1982.

INTERCOM is an internal communications medium published for the faculty and staff of The Pennsylvania State University.

(Stories continued from page 1)

Lerner

book chapters and some 70 scholarly articles. Dr. Lerner, with his wife, Jacqueline, an assistant professor of human development, administers a \$300,954 grant from the Charles D. and Catherine T. MacArthur Foundation.

The grant was made to enhance the archival and future contributions of the New York Longitudinal Study, the oldest human temperament project in existence. The Lerner has directed it since 1980.

During his tenure at Penn State, Dr. Lerner has taught no fewer than five different undergraduate courses and four graduate courses. A College of Human Development administrator who regularly interviews students wishing to transfer into Individual and Family Studies reports:

"I cannot tell you how many times, term after term, I learned that perhaps the

single greatest influence in such transfers was that an undecided student took IFS 129 with Richard Lerner, and was so attracted to the professor, the field, the department, and a future career path that he or she transferred into the major before the term was over."

"It's often argued that a good teacher can't be a good researcher," Dr. Lerner says. "I would argue, however, that a good teacher must be an active researcher. To be fully committed to research and scholarship, one must have a deep and enduring enthusiasm for the subject matter — to be a 'proselitizing' for one's scholarship. This kind of enthusiasm is essential to convince agencies to fund research proposals and journal editors to publish the results."

In his classroom lectures, Dr. Lerner tries to convey his excitement about his work. He never relies on notes, believing that his subject matter should be so "intrinsically ingrained" that he needs no "script."

Pointing out that scientists must often

communicate the findings of their research to audiences not specifically trained in their area of specialization, Dr. Lerner says: "Addressing an audience with diverse backgrounds and differing levels of expectations is part of being a scientist; it's also part of being a teacher. The skills one needs to communicate are the same, whether they are applied in a journal article, a professional presentation or in the classroom."

Looking back on his own student years, Dr. Lerner recalls that his best teachers were the most productive scholars. "They influenced me," he says, "because they really cared about their work; they were able to convey that their work mattered, that it was a very important way to spend one's professional life."

"Now in my own introductory IFS course, I strive not only for intellectual exchanges but also see my role as a 10-week 'commercial' — not just for my department or college but also for the disciplines that contribute to human development. I am telling a prospective

major that this is surely a worthwhile field to which to devote one's life.

"A major research university has a duty to create a level of intellectual excitement among its undergraduates that will lead them either to become active scholars or intelligent 'consumers' of the information generated through others' research and scholarship."

Because of his belief in the linkage between effective teaching and research productivity, Dr. Lerner seeks out academically promising undergraduate students and invites them to take independent study programs with him. At present, he is training nine such students, as researchers on his projects. Previous students have been accepted into such graduate schools as Harvard, Penn, Texas, Cornell and Oklahoma.

Summing up, he says: "The role prescription for being a superb scientist and a superb teacher are the same. That's what I'm striving for. I have years to go to attain this goal, but I'm trying very hard."

Rizzolo

and English literature from Temple University.

"At first I was concerned primarily with teaching basic skills in composition," says Dr. Rizzolo, an assistant professor of English, "but my interests broadened as more and more faculty members reported problems with their students' reading comprehension. I also recognized that students who were poor writers tended to be poor readers."

Dr. Rizzolo responded first by upgrading her own skills, taking post-graduate study to obtain a second master's degree in the psychology of reading. She developed a new course, Improving Reading and Study Skills, which, beginning with three students, has mushroomed until it is offered as often as six times a term.

"As a 'sweetener,' we tell students that

the course will help them become better test-takers," Dr. Rizzolo explains. "They respond better to that than to a course they are told will help them to improve their reading skills. We've even had 12th-term students from University Park enroll to brush up for the Graduate Record Examinations."

Ogontz's Reading and Writing Center averages between 100 to 250 student contact hours a week and has been hailed as a model by the Middle States Accrediting Association.

Dr. Rizzolo, who is still deeply involved with English composition and in developing students' abilities to write standard English prose, points out that an ever-increasing number of students enter college poorly prepared to read a textbook or write clearly.

"I can't tell you how many times I hear students say that they've never read a book clear through," she says. "In

English 4, we are covering material on commas that students should have had in elementary school."

In her own courses, Dr. Rizzolo emphasizes standards and expects students to meet course objectives, but she is never rigid.

"To help students achieve," she explains, "you have to meet them on their own level. If I say we'll cover 20 pages a day, and then in class see by their faces that they aren't picking up on what I'm saying, I prefer to slow down and have them learn rather than try to barrel through a set quantity of material. It's the quality of the learning process that's important."

"I'm more interested in how a student thinks than in right or wrong answers. The student should be able to explain the thinking process that helped him arrive at an answer. Sometimes that explanation shocks a student, but it's a tremendous

learning device.

"Academic disciplines are interconnected. If a student learns to think more critically in my English class, he will perform better in other areas, too."

The AMOCO award is not the first pedagogical prize Dr. Rizzolo has captured. Last year, she won the Ogontz Outstanding Teaching Award.

She has served as a consultant on basic language skills programs at Dickinson, Houghton and Franklin and Marshall colleges, as well as at Lincoln University. One of her tenets is that students need to be made to write in courses other than those offered by the Department of English.

"Students often resent being graded on their writing style in a political science or history course," she says.

"My response to that attitude is to ask them what language they think the course is being taught in."

Butt

maired in education at SUNY-Fredonia. Coming to Penn State in 1962 to work on a master's degree, he became a teaching assistant in speech.

"I enjoyed it so much I shifted my career goals to the college level," Dr. Butt continues, "and went on to get my D.Ed. in speech communication." He joined the faculty in 1969 as an assistant professor.

Colleagues point to Dr. Butt's ability to win praise as an outstanding teacher at all levels. He has successfully taught beginning college students with academic deficiencies in the Developmental Year Program. At the same time, he helped develop and now carries the major responsibility for the communication component of the College of Business Administration's MBA Program.

CBA was so pleased with Dr. Butt's contributions that he was asked to design and teach an undergraduate honors course for Business Administration

students. Dr. Butt took on that challenge and then put to work the experience he had gained in redesigning Sp.Com. 352, Speech Communication in Organizations. The degree of his success is indicated by the fact that this spring 213 students preregistered for the 90 slots available in Sp.Com. 352.

Dr. Butt teaches extensively for the Speech Communication department in its Continuing Education activities. He has been on the faculty of the Governor's School for the Arts, which is held during the summer at Bucknell University. He has conducted workshops at State and regional professional meetings and worked with elementary and secondary teachers as a consultant for the Pennsylvania Comprehensive Reading and Language Arts Program. At one time, he even organized a local nursery school to help very young children develop communication skills.

How does he maintain his enthusiasm in the face of such a heavy teaching schedule?

"I like what I'm teaching, and I believe in the importance of communication skills," Dr. Butt explains. "Students are learning at two levels — they develop critical, personal survival skills and they gain marketable techniques to help them in business and professional settings."

"My approach is to try to be very clear myself about my content objectives. I try to teach so that students feel they are discovering the material for themselves."

"And, of course, the bottom line is to make it personal — even when there are anywhere from 30 to 50 students in the class. Students have different levels of sophistication, motivation and readiness. It matters to me to find out why they're there and to try to build from that point."

To keep close tabs on what his students are doing, Dr. Butt uses case study exams rather than multiple choice questions, and he assigns papers.

He has passed on his ideas about teaching to countless students through LA 460, in which he works with undergraduate teaching interns.

"These are students," he explains, "who are interested in personal training and management development. They learn to see teaching as a decision-making process, as management training."

Dr. Butt has several research projects in progress. During the past six years, he has been taping and analyzing the contributions visiting executives in the MBA Program have made to the pedagogical content. He has also been studying children's conversations and stories to try to develop new ways to teach story-making with respect to the development of form. Next fall, he wants to start a project analyzing the methods teaching assistants employ in developing informal support networks.

Returning to his teaching philosophy, he told an interviewer: "Undergraduates need individual attention. They need to sense that what they are learning will make a difference in their personal lives as well as in preparing for a career or profession. In my teaching, I try to provide this extra personal touch."

Simonsen

advantage in their contacts with undergraduates.

"At University Park, when you're teaching 450 students," Dr. Simonsen continues, "it's pretty hard to say, 'Come see me after class.' At McKeesport, I have perhaps 35 to 40 students in a course, and it's more usual to have 20. Students who come to McKeesport with less than the best preparation can really be helped to succeed — provided they have the determination. Our Commonwealth Campus faculty has the opportunity to meet student needs on an individual basis."

Dr. Simonsen joined the faculty in 1970. He holds B.S. and M.A. degrees in education from Concordia College, Penn

State granted him an M.Ed. in 1969 and a D.Ed. in 1977, both in earth sciences. At McKeesport, his wide-ranging pedagogical responsibilities include teaching courses in geology, meteorology, geography and earth sciences.

"It's not quite as hard as it sounds," he says, "since my area of concentration at the master's level was in geology and my doctoral research was in paleontology."

"I like what I'm doing," he continues, "and I believe that it's essential to good teaching. Beyond that, you must develop ways to convey your interest in your field, or you aren't going to be able to interest the students. If you come to class looking like you're teaching the world's worst subject, you can hardly expect your students to become zealous in their pursuit of geology."

Because most Pennsylvania students

have no exposure to the earth sciences after the eighth grade, Dr. Simonsen feels it is his job to make them aware of the importance of the environment in their lives.

"So many people are relatively ignorant about earth science phenomena," he says. "They may have a little contact with biology or the physical sciences in high school, but rarely with geology, meteorology and the other earth sciences. I'm proud that a number of students have switched their majors after taking my courses because they were turned on by the subject."

Dr. Simonsen's presentations were described by one student thus: "His enthusiasm for his subject matter is so contagious he almost seems to make the rocks and fossils speak to his classes."

Dr. Simonsen has two previous teaching

awards to his credit. In 1972, he was presented an Excellence in Teaching Award on the recommendation of the Campus's students, and in 1980 received the Outstanding Teaching Award sponsored by the McKeesport Advisory Board. One of the citations noted: "He seems to sustain a near peak performance at all times and yet seems to improve each year."

"I believe in treating students with dignity," Dr. Simonsen says. "If you respect them, they will respect you. Our students at McKeesport are proceeding along a path in their educational careers. Perhaps some day, they'll venture farther along it than I have, but right now they are learning with me."

"I don't think of myself as 'the sagacious one', standing up in front of the

(Continued on page 6)

Della M. Roy receives award

Women and cement usually don't mix, but the combination works extremely well at Penn State.

The prime reason is Dr. Della M. Roy, professor of materials science in the Materials Research Lab and a pioneer in the chemistry of cement.

This week in Cincinnati, Dr. Roy will receive the John Jeppson Medal and Award from the American Ceramic Society "in recognition of her many scholarly contributions to ceramics as research scientist, teacher and leading authority on the basic chemistry of cement."

Dr. Roy, who came to Penn State in 1947, has published more than 140 technical papers and patents. She chaired the first Gordon Research Conference on cement and also founded and serves as editor-in-chief of the journal *Cement and Concrete Research*.

Dr. Roy's research team has a high proportion of women scientists and engineers: Dr. Elizabeth White, a civil engineer; Dr. Christine Langston, a solid state scientist; Joan Mishara, a visiting research associate from the Smithsonian Institute; Lillian Wakely, a geologically trained research assistant; Darlene Wolfe-Confar, senior research technologist; and Mariannella Perez, a graduate student in solid state science.

The proven abilities of Dr. Roy and her associates attract nearly \$1 million per year from research funding agencies. These include the U.S. Department of Energy, the National Science Foundation, the U.S. Bureau of Mines and a variety of private firms.

In recent years, she and her colleagues have focused on improving the properties of cement for radioactive waste management.

This research takes two directions. The first deals with how cement can be improved for sealing off radioactive waste repository sites. The second involves "optimizing" properties of cement which is then mixed with high and low level radioactive wastes. These cement composites currently are being used by a number of small industrial firms to solidify low level wastes for storage.

Her research takes still other directions. One concerns the effectiveness of reinforcing cement with fine glass fibers instead of steel rods for stronger, cheaper building materials.

Another involves using common industrial pollutants such as fly ash from coal or coal slag to make cement. This process shows promise because it saves the huge amounts of energy that are required to make cement under standard manufacturing procedures.

Dr. Roy and her colleagues are looking backward as well — to the ancient cements of Greek and Roman times. This allows them to study the long-term performance of cement and to apply that knowledge to their current research.

Dr. Roy earned her B.S. in chemistry from the University of Oregon in 1947. She earned her M.S. in mineralogy and chemistry in 1949 and her Ph.D. in mineralogy and ceramic science in 1952, both from Penn State.

Penn State Singers to perform May 12

Wednesday, May 12, will mark the first public concert of the Penn State Singers since being accepted as a permanent organization in Associated Student Activities.

The Singers, under the direction of their founder and adviser-director Raymond Brown, will perform at 8:30 p.m. in Room 112 Kern Graduate Building. A public reception will follow the concert.

There is no charge for admission and the public is invited to attend.

Dr. Anderson

Dr. Banks

Two Alumni Fellows will visit

Thomas J. Anderson Jr. of Medford, Maine, chairman of the music department at Tufts University, and Peter M. Banks of Stanford, Calif., professor of electrical engineering and director of the Radio Science Center at Stanford University, will visit University Park as Alumni Fellows May 9 through May 13.

Dr. Anderson, a 1951 recipient of a Penn State M.E.D., will be a guest of the College of Arts and Architecture.

Considered one of America's foremost black composers, Dr. Anderson will deliver a public lecture Monday, May 10, at 2:20 p.m. in the Robeson Cultural Center. He will speak on "Racial and Ethnic Directions in American Music Based on a Report Coordinated by T.J. Anderson for the College Music Society." The report will be released later this spring.

He also will speak during the School of Music Common Hour, from 1 to 2 p.m., on Tuesday, May 11, in the Music Building recital hall.

A group of School of Music faculty members and students will perform four of Mr. Anderson's works on Tuesday evening, May 11, at 8:30 p.m. in the Music Building recital hall. The public is invited to attend.

Before assuming his present position at Tufts, Dr. Anderson served on the faculties of Tennessee State University, Langston University and West Virginia State University.

He also was composer-in-residence with the Atlanta Symphony Orchestra and was co-director with Wendell Whalum of the Afro-American Music Workshop at Morehouse College. The workshop presented the premiere of Scott Joplin's opera, *Treemonisha*, orchestrated by Dr. Anderson and William Bolcom.

Included in Dr. Anderson's works for orchestra are some 10 compositions, including those commissioned by the

Nashville Symphony, the Atlanta Symphony and the Berkshire Music Center and Fromm Foundation.

Dr. Anderson, a native of Coatesville, Pa., received his bachelor's degree from West Virginia State College and his Ph.D. from the University of Iowa. He studied composition with Scott Huston, Philip Bezanon and Darius Milhaud.

Dr. Banks, a 1965 recipient of a Penn State Ph.D. in physics, will be the guest of the College of Science.

Appointed to his present position as head of Stanford's renowned Radio Science Center in 1981, Dr. Banks had previously been head of the department and professor of physics at Utah State University.

He received the 1981 Space Science Award from the American Institute of Aeronautics and Astronautics, and in 1978 he was the recipient of the Appleton Prize from the Royal Society in England.

As head of the Radio Science Center, Dr. Banks oversees research in radio science, especially in the areas of meteoritics, aeronomy, upper atmosphere physics and ionosphere research.

Currently a member of the NASA Space Science Advisory Committee and president of the Upper Atmosphere Research Corporation, Dr. Banks has served on many professional committees and organizations. In 1977-79, he was chairman of the NASA Science Definition Group for the Upper Atmosphere Satellite Program.

He also has been a consultant to numerous agencies and firms and was a visiting scientist on two different occasions at Germany's Max Planck Institute.

Dr. Banks, a native of San Diego who received his M.S. degree from Stanford, earned his Penn State Ph.D. while participating in a NASA Traineeship.

involved to general overall mission and objectives of the campus. Provide all instruction to employees to insure completion of jobs; assist in lay-outs. Make up employee work schedules; assign jobs in accordance with work orders; organize and schedule work crew. Maintain check of work in progress; evaluate employees' work performance. Administer Union-University Agreement. Equivalent of a high school education and competency in janitorial field, two to four years' effective experience in janitorial and custodial operations, plus demonstrated leadership ability required.

FINANCIAL AID AND ADMISSIONS COUNSELOR, CAPITOL CAMPUS — Responsible to the Director of Admissions for the coordination and interpretation of financial aid programs available to Capitol Campus students. Master's degree or equivalent in counseling, student personnel services, or a closely related field, plus up to one year of effective experience. Must have the ability to work with students, faculty, staff within the University and state and federal agencies.

SUPPLY ASSISTANT, PENN STATE BOOKSTORE, UNIVERSITY PARK — Select merchandise for sale and prepare orders for approval by supervisor. Maintain appropriate records, set prices for materials and merchandise materials effectively. Train and supervise assigned full-time and part-time clerical personnel. Assist supervisor in purchase of merchandise for distribution to the Bookstore System. High school education or equivalent and one to two years of effective experience are required.

Bibliographies input due soon

Members of the faculty and staff who wish their publications and professional activities listed in the University's annual bibliographies should send this information to their department heads, research deans or intercollegiate research unit directors.

Detailed instructions for the submission of these listings were given in a May 1 memo from Dr. Richard G. Cunningham, vice president for research and graduate studies. Copies of this memo are available from department heads and research deans.

Commonwealth Campus faculty members should send their listings to the respective department head at University Park, with an informational copy to their campus director and Commonwealth Campus dean.

Contributions should be in the department head's hands in sufficient time to reach the Office of the Vice President for Research and Graduate Studies by July 31.

The bibliography is printed in two publications, "Research Publications and Professional Activities" and "University Publications, Reports to Agencies, and Reviews."

To be included are books, research papers and articles substantive and/or final reports sent to state and federal agencies, informational material (articles and reports printed in non-refereed journals), and novels, short stories, musical compositions, exhibits of fine arts reviews, inventions, patents and any other activity that meets recognized standards of excellence in its field.

Additional information is included in the May 1 memo.

Funding Sources

For further information, call 865-1375

(376-1) The Resource Information Service (RIS) provides information to faculty and staff to support project funding for instruction, research, continuing education and for fellowships. RIS is the liaison between Penn State and the Office of Federal Programs (OFF) Washington, D.C. OFF provides Penn State with continuous monitoring of public and private agency programs. RIS reviews information from numerous sources including the Federal Register and the Commerce Business Daily and receives direct agency mailings. RIS makes information distributions to faculty and staff to promote an awareness of public and private programs, responds to faculty/staff inquiries about programs and program contacts, and through a Preliminary Proposal Outline (PPO) mechanism, helps locate project support funds with the assistance of OFF and Penn State's Office of Gifts and Endowments. For detailed information about available RIS assistance, contact M.R. Kohler, 5 Old Main, 814-865-0715.

(379-1) Travel grants to international meetings for humanists have a July 1 deadline date for travel between November and March and a March 1 deadline for travel between July and November. Call David Arenz, ACCLS, (212-888-1759) for forms and guidelines. (Ref. OFF July Deadlines)

(379-2) The NSF Development in Science Education Program (DISE) has a tentative July 1 deadline for projects in the area of technology in science education — 10th, 11th, and 12th grades and introductory college levels. Call the DISE office at (202-282-7910). (Ref. OFF July Deadlines)

(379-3) The Behavioral Sciences Research Program of ADAMH/NIMH has a July 1 deadline for projects of basic and applied research on psychological and psychosocial factors that influence behavioral development and modification. For information call Dr. Dayton Neal at (301-443-3942). (Ref. OFF July Deadlines)

News in Brief

Ritenour schedules blood pressure checks

May is National High Blood Pressure Month, and Ritenour Health Center, in cooperation with the American Heart Association, the Nutrition Information and Resource Center and the Nutrition Counseling Center, is sponsoring a blood pressure screening and education program. It will be held May 12 and 19 in Ritenour's lobby.

The program is aimed at members of the faculty, staff and student body.

"We've scheduled this program over the lunch hour to attract faculty and staff attention," Dr. John Hargreider, director of the Health Center, said. "Every one of us probably knows someone who has high blood pressure because it's such a common condition. And when we help people who have high blood pressure to keep it under control, we are helping them to reduce the risk of early death or disability."

Registration for the two-part screening program will be held between 11:30 a.m. and 1:30 p.m. May 12 at the Health Center.

Other events at Ritenour during the month of May include: a "computerized nutrition" program that will enable visitors to use a personal computer to examine and compare the nutritional value of snacks on May 12 and 19 from 11:30 a.m. to 1:30 p.m.; "Sodium in Your Diet," May 12 from 12 noon to 12:30 p.m.; and "How to Take Your Own Blood Pressure," May 19 from 12:10 to 12:50 p.m.

Panel to discuss

'Major Powers in Asia'

"Major Powers in Asia" will be the subject of a panel discussion featuring American, Chinese and Soviet diplomats tonight (Thursday) at 7:30 p.m. in Room 102 Forum.

Panel moderator, Parris Chang, professor of political science, points out that this is one of the very rare occasions when the representatives of the three major powers will sit together in an academic setting to discuss and debate on some of the controversial issues affecting their bilateral relations as well as the triangular relationship.

Mr. Pratt, whose diplomatic assignments include France and Taiwan, is currently deputy director, Office of Regional Affairs, Bureau of East Asia and the Pacific, Department of State.

Mr. Li is political officer at the Chinese Embassy in Washington. He studied American literature at Nanking University as an undergraduate in the 1950s and went to Norway to do graduate work at Oslo University. He joined the Chinese diplomatic service in 1960 and was in charge of Scandinavian affairs in the Chinese Foreign Ministry for many years. An adviser on West European affairs to the People's Republic of China Mission at the United Nations in 1972, he was transferred to Washington in 1979.

Mr. Arkharov is political counselor in charge of Asia at the Soviet Embassy in Washington. He had three tours of duty in China during the 1950s, 1960s and the 1970s and speaks fluent Chinese.

The panel is sponsored jointly by the East Asian Studies Society, the International Council, University Scholars Program and East Asian Studies Committee.

First Behrend Phonathon raises almost \$13,600

In its first telephone campaign ever, Penn State-Behrend Phonathon '82 has raised \$13,592 in pledges.

According to Ben E. Hancock, Jr., director of University relations, the more than 6,000 calls made to Penn State

alumni during a two-week period in late March and early April resulted in 960 pledges to The Behrend College Annual Fund.

The goal of Phonathon '82 was \$5,000.

Purpose of the campaign was to raise funds for three areas: instructional and research equipment, scholarships, and general unrestricted support of programs.

Some 100 volunteers were involved in the effort, including students, members of the faculty and staff, and representatives from the Penn State Club of Erie County.

Ancient historians meet here this weekend

More than 110 historians of ancient Greece, Rome and the Near East will gather at the University May 7-8 for the annual meeting of the Association of Ancient Historians.

The AAH has not met at Penn State since 1972, having held its annual convocations at such universities as Michigan, Colorado, Harvard and Stanford, according to Dr. Eugene Borza, professor of ancient history and organizer of the event.

Further information may be obtained by calling Dr. Borza at 865-1367.

Dr. Murphy to speak for Law and Justice Week

Dr. Bruce A. Murphy, assistant professor of political science, will speak on "The Frankfurter-Brandeis Connection: The Extra Judicial Activities of Two Supreme Court Justices" tonight (Thursday) at 8 p.m. at S. 209 Henderson Human Development Building.

Dr. Murphy's lecture, based on his recent book on that subject, is part of Law and Justice Week activities at the University.

The week's final lecture will be given tomorrow night (Friday) by Dr. William Chambliss, professor of sociology at the University of Delaware. He will discuss "Watergate and Other Organized Crime" at 8 p.m. in the HUB Assembly Hall.

Dr. Chambliss is widely known as a proponent of conflict theory in sociology and, in particular, the sociology of law. He has edited or written nine books, most recently *Organizing Crime*, a study co-authored with Alan Block.

The Law and Justice Week lectures are being coordinated by the Justice Action group, a student interest organization comprised primarily of undergraduates with majors in administration of justice in the College of Human Development.

Yale dean to lecture

Cesar Pelli, dean of the School of Architecture at Yale University, will present a public lecture Tuesday, May 11, at 7:30 p.m. in Room 10 Sparks as part of the lecture series of the Department of Architecture.

Mr. Pelli's New Haven-based architectural firm of Cesar Pelli and Associates was chosen for the prestigious commission of designing an extension to the Museum of Modern Art in New York. Among his other important commissions are the Pacific Design Center in Los Angeles and the American Embassy in Tokyo.

Concert Band to play

The Nitany Lion Concert Band will present a program on Fisher Plaza Wednesday, May 12, at 7 p.m. A surprise guest conductor will make a special appearance.

Selections to be heard during the evening include "American Variations" by Bilk, "Corsican Litany" by Nellybel, "Chant and Jubilo" by McBeth, "Parade of the Tall Ships" by Chattaway, and "Selections from Barnum." The flute section will be featured in "Flute Stand" by Hartzell.

The band is directed by Richard Bundy, graduate assistant to the Bile Band.

Symphony Orchestra to perform Saturday

Five works have been selected for a concert by the Penn State Symphony Orchestra Saturday, May 8, at 8:30 p.m. in Eisenhower Auditorium.

The Symphony will perform Sibelius's "Finlandia," Bizet's "L'Arlesienne, Suite No. 2," and accompany guest soloist Susan Klick in Mozart's Concerto for Flute. Also on the program are Kennan's "Night Soliloquy" and Tchaikovsky's "Marche Slave."

University and graduate students from all areas of study at the University make up the Symphony, which is conducted by Smith Toulson, associate professor of music.

Limited spaces available for Shakespeare Festival

A limited number of spaces are available for the trip to the Stratford, Ontario, Shakespeare Festival, sponsored annually by the Department of English.

This year, participants will leave for Stratford early Friday morning, July 23, and return Monday evening, July 26.

The \$97 price includes transportation in University vans, accommodations for three nights, and tickets to the following

Faculty/Staff Alerts

Fixed-Term 1 benefits

Faculty or staff members on Fixed-Term 1 appointments may continue certain University benefit programs for the period between appointments, provided they have a firm commitment of re-employment on a Fixed-Term or Standing Appointment basis to begin within no more than three months from the end of the last appointment.

A faculty or staff member may continue the benefit coverage by paying the full rates, including the University's and the faculty or staff member's share of the cost of the group life insurance and hospital/surgical/major medical, and dental and vision coverage, and, if applicable, the voluntary accidental death and dismemberment insurance. However, after three years of continuous Fixed-Term 1 service (of nine months or more each year), and a commitment of re-employment for the next academic year, the benefits are provided at the regular rates (the amount that is normally deducted from the faculty or staff member's salary).

Any Fixed-Term 1 faculty or staff member interested in continuing benefit coverage (including dependent coverage) should contact his or her Personnel Representative or Business Manager to complete the necessary form for coverage. This must be completed prior to the expiration of the current Fixed-Term 1 appointment.

Christmas-New Year's holiday schedule set

In order to assist University faculty and staff in personal plans for the Christmas/New Year's holiday period this year, this announcement is being made now by the Office of Personnel Administration.

Christmas Day 1982 and New Year's Day 1983 fall on Saturdays. The official University holidays, therefore, will be Thursday, Friday and Saturday, Dec. 23, 24, 25; Monday, Tuesday and Wednesday, Dec. 27, 28, 29 and Saturday, Jan. 1. University policies provide, however, that if a holiday falls on an employee's regularly scheduled day off, the employee receives another day off with pay to be used at another time. Thus, employees

plays: *Julius Caesar* on July 23; *The Merry Wives of Windsor* on July 24 and *The Tempest* on July 25.

In addition, tickets are available for a Saturday afternoon performance of *Midsummer Night's Dream* (\$7) and for a Sunday matinee of *The Mikado* (\$16). These tickets must be ordered when reserving space for the trip.

Reservations should be accompanied by a \$20 deposit. Persons wishing to make the trip should contact Dr. Judd Arnold at 865-9445, or at 238-2062 after 7 p.m.

Mother's Day concert is Sunday in Schwab

The annual Mother's Day concert of the Penn State Glee Club and Women's Chorus will be presented Sunday, May 9, at 3 p.m. in Schwab Auditorium.

Among the Glee Club's offerings will be a medley from H.M.S. *Pinafore*, "Hallelujah, Amen" from Handel's *Julius Macabreus*, and with guest artist Janice Wilson, the "Alto Rhapsody" by Brahms.

Included in the Women's Chorus' program will be several selections from Rodgers and Hammerstein's *The King and I* and "Salut Printemps" by Debussy.

Both groups are directed by Bruce Trinklein, an associate professor of music. Joel Westa serves as assistant director of the Glee Club and Brenda Harsch is assistant director of the women's chorus group.

who normally work Saturdays will receive two compensatory days off for the Saturday holidays.

Thursday and Friday, Dec. 30 and 31, 1982, are not University holidays, and offices ordinarily would be open those days. However, in order to provide the maximum energy savings, University offices and facilities, except for essential services, will be closed these two days as well. Thus, the University's offices will be closed from the end of normal operations on Wednesday, Dec. 22, 1982, until Monday, Jan. 3, 1983.

The compensatory days earned for the Saturday holidays will be used for the work absences caused on the Dec. 30 and 31 days because of University offices and facilities not being open. Those days closed, however, will not be official University holidays for premium pay purposes. Employees in essential services who qualify for the compensatory days but who must work Dec. 30 and 31 still will have their compensatory days off for use at a later time, so they will not have lost anything.

Those who normally are scheduled off on Thursdays or Fridays and who must work either or both of those days will be compensated in accordance with applicable University policy.

This special holiday schedule will not increase the number of holidays granted. It will, however, provide a generally more desirable and efficient application of the time off. The schedule will not affect the Milton S. Hershey Medical Center. Normal holiday scheduling practices will continue there.

According to the Office of the Controller, biweekly paychecks will be dated and available on Wednesday, Dec. 22, covering the payroll period Nov. 28 through Dec. 31. Automatic payroll deposits for biweekly checks also will be made Dec. 22. Monthly paychecks will be dated Dec. 31 and will not be negotiable until then, the normal end-of-the-month payday. However, again this year as a convenience to employees, the monthly paychecks will be available for Dec. 22 distribution on Wednesday, Dec. 22. Automatic payroll deposits for monthly checks, however, will not be made until Dec. 31.

Questions regarding the above holiday schedule information should be directed to the appropriate college or department personnel representative, or business officer at facilities away from University Park.

Fact and Fantasy in Coal Economics

Editor's note: This article is one in an ongoing series in which faculty members describe work in progress.

By Richard L. Gordon,

Professor of Mineral Economics
Discussions of coal seem invariably to go to extremes. The more familiar expositions talk of the ample supplies and the prospects of coal retaining prominence in U.S. energy supply. The alternative view is one of a backward industry producing a dirty fuel by socially undesirable methods. A natural inclination is to suspect that the truth lies in between extremes, and work on coal economics has involved continued efforts to find the realities underneath the various excesses of rhetoric.

My research on U.S. coal began in the late sixties as the natural extension of prior work I had done on European coal policies. The initial motivation was a simple recognition that coal was the least adequately understood of U.S. energy resources. The work has persisted because my initial studies made clear the existence of important problems requiring analysis and regular reappraisal. Support was provided by Resources for the Future, the National Science Foundation, the Bureau of Mines, and the Electric Power Research Institute.

The primary need was to clarify the role of coal in U.S. energy markets and create an understanding of the achievements and prospects of the industry. However, numerous government policies have been imposed to affect (usually adversely) the attractiveness of producing and consuming coal. Considerable work was required to appraise both the wisdom of these policies and their effects.

Since energy problems obviously are of great interest, it is fortunate for researchers that great amounts of information are available; moreover, this material consists largely of undigested facts badly in need of systematic appraisal. The most obvious sources are the many government statistical publications devoted to energy. In addition, the government has issued numerous studies on the history and prospects of energy and upon the public policies that should be applied to alter developments. Other studies emerge from the fuel producing industries, major fuel consumers, and the numerous research firms available to provide studies to interested parties.

To understand the appraisal process in

coal, it is desirable to skip ahead immediately to a fuller view of the conclusions coal analysis has produced. Aside from the intrinsic interest of these conclusions, they help to suggest what counts in coal research.

Since World War II, the distribution of coal use among customer types and regions has changed radically. The Northeast quarter of the United States remains the main center of coal use, but markets in the South and West have become a larger part of the total. Not only has there been greater growth in these regions but rising natural gas prices have encouraged coal use where gas would have been used. The nature of coal use has also radically changed, with a narrowing of the types of markets served. In 1947 coal was used as a heat source by manufacturing firms, households, and the railroads. The last market vanished; household use has become a few million tons, and manufacturing use also has declined. Therefore, about 79 percent of coal use in 1981 was by electric utilities. Most of the rest of U.S. coal consumption was by industry with about half used to make coke for iron making.

Judicious viewing of portions of the large amounts of data provided by the federal government's energy statistics program can help a researcher sense important historical trends. For example, because of the extremely long lead times in completing coal mines and the electric power plants that are the most likely coal users, indicators of future developments are provided by various surveys conducted of plans to build new mines and powerplants. In the latter case, the tracking I have done of these estimates over the past several years alerted me to growing tendencies to slow capacity addition — largely it appears in recognition of the prospects that demand growth would be much slower than either the historical trend or the rates the industry had been forecasting.

The process of legislating and implementing controls on the production and use of coal generates substantial information — principally through the numerous appraisals of the impacts made for both the government and affected industries.

It also has been extremely helpful to supplement examination of written material with conversations with a range of people in government, the coal industry and leading coal consuming companies. Such discussions produce insights into the complexities of the

Dr. Gordon

problem that often are absent from the formal record.

Analysis of government policies is yet another major element in my research. With National Science Foundation funding, an extensive effort was made to measure as effectively as the available data allowed the impact of the 1969 Coal Mine Health and Safety Act on accident rates and costs in coal mining. The results raised considerable doubts about whether the gains were sufficient to justify the expenses. The project also involved a case study on western strip mine reclamation involving a mine quite similar to most of those in the Northern Great Plains. The work suggested that the conclusions of prior studies made of reclamation in Appalachia probably applied in the West. The readily measurable damages such as lost recreation have values far less than the costs of reclamation. Thus, the case for reclamation essentially rests on the belief that the less tangible benefits of restoring land to its prior condition are worth the expense (wherever the land may be and what it looks like).

More modest but more conclusive analyses were conducted on the efforts to regulate conversion to coal and to restrict leasing of federal coal lands. In work completed in early 1979 within a few months of the passage of the National Energy Act, it was possible to conclude that the fuel shifting policies proposed were unlikely to produce much effect. The leasing analysis suggested that fears over monopoly and underpayments to the federal government for coal leases were unjustified but nevertheless driving

policies. In fact, the greatest threat to competition was that leasing limits hindered the entry of new firms which needed leases to permit operation.

A further research need is to combine these and other appraisals of the wisdom and impacts of public policies into the overview of coal prospects. In fact, the synthesis produces a major research conclusion that while political rhetoric talks of encouraging coal use, practice has involved increasing the difficulty of coal use.

For the past two years, my research has moved into problems critical to coal but arising in the general regulation of electric power by public utility commissions. Work on coal had indicated growing problems in completing electric power plants and examination of the problems made clear that a major influence was the unwillingness of public utility commissions to raise rates to reflect the rising costs of electricity production. This has produced a detour into the area of electric power regulation leading to a book appearing in 1982 on *Reforming the Regulation of Electric Utilities*. It argues that the public utility concept has outlived its usefulness and that deregulation would produce socially preferable results. It is also suggested that simultaneously with deregulation there should be reform of the type of nuclear, air pollution, and siting regulation that compounds that industry's difficulties.

At present, I am moving back into viewing coal developments. A variety of work I have done for the Electric Power Research Institute led to starting examination of historic production and consumption trends and suggested need for further examination of these trends and their implications for future developments. It becomes increasingly apparent that existing forecasts inadequately draw upon the historical record and miss its implication.

Earlier work suggested that the difficulties of the seventies were something less than the coming of Armageddon feared by many politicians and journalists. Conversely, the declines of oil prices in 1981 and 1982 probably do not press our return to the Eden enjoyed in the sixties. Moreover, declining public interest in an issue only means that its severest impacts have receded. The remaining problems may not be pressing, but they can still be costly and worthy of reform. The inadequate reforms of good times may be as serious a problem as the overactions in crises.

Zimbabwe

(Continued from page 1)
development programs."

The university also must find means to expand opportunities for Zimbabwean students. Before independence, the university had slightly more than 1,800 students; this year, some 3,000 are enrolled. But as educational opportunities are expanded at the elementary and secondary school levels, the number of students who will be ready to enter the university will grow; and within six years, facilities must be found to accommodate a student body of 10,000.

"Our needs are of an enormous size compared to our resources," Professor Kamba said simply.

In respect to expanding the curriculum, Professor Kamba was more cautious. The university now has faculties in agriculture, arts, commerce and law, education, engineering, medicine, science and social studies. It hopes to add veterinary science this year and perhaps mining engineering at a later date.

In considering the relationship between university and government, Professor Kamba said that the government accepts the fact that for the university to be run effectively, it must enjoy a substantial

degree of autonomy and academic freedom.

But he observed that the English model of a university with its emphasis on the pursuit of knowledge for its own sake is a luxury a developing country cannot afford, especially a country that has only one university.

"It is essential that the university be seen to contribute to the needs of the country, and if a proper balance is established, then the government will accept and support it," he said.

"It is also accepted that the effectiveness of our contribution to national development depends on the quality of our graduates; otherwise we will be perpetually condemned to depend on outside expertise."

"But relevance does not necessarily mean a drop in academic standards," Professor Kamba emphasized. "At present our entrance standards are higher than those of any other African university, including those in South Africa."

Professor Kamba stressed the importance of developing a relationship between the needs of the country and the disciplines represented in the university and noted that students should be encouraged to enter disciplines to meet these needs.

"This can only be done, however," he concluded, "if we have accurate information. Then the entire educational system could cooperate to inform students about their country's needs to give them a basis on which to make the proper choices. Since most of our students are supported by state grants, they could also be guided into necessary academic decisions if the number of grants available for study in various fields were controlled."

Simonsen

(Continued from page 3)
class doing out wisdom. As the student reflects and we discuss problems, I can learn something, too."

Obviously, Dr. Simonsen's approach brings results. The campus had about a dozen students in the earth sciences when he started teaching; today, there are more than 40.

"I try to involve my students in research," he observes. "Last year, for example, as part of an independent study project, one of my geology honors students co-authored a paper with me. The paper, 'Microfossils in Sediments from the Wymys Gap Limestone (Mississippian) in Southwestern

Pennsylvania,' was presented at a meeting of the Pennsylvania Academy of Sciences."

"My own research involves collecting and studying fossils at various sites, most recently in Kansas."

A University Faculty Senator, Dr. Simonsen is active in community work in McKeesport. And he doesn't intend to rest on his teaching laurels.

"We're getting into computer-assisted instruction at McKeesport," he says, "looking into programs that will help students in need of remediation and also into those that can provide extra stimuli for our honors program candidates."

Lecture to focus on Athens' monuments

Colin N. Edmonson, of the American School of Classical Studies in Athens, will speak on "Old Sites in New Pollution: The Preservation of Ancient Monuments in Modern Athens" Monday, May 10, at 8 p.m. in Room 101 Kern Building.

He will discuss the deterioration of the major monuments from urbanization and pollution. In recent years, the Greek government has begun a serious effort to halt the erosion of the Acropolis, including the Parthenon.

Editor's note: The following chronology describes calendar changes and discussions during the past 25 years.

October, 1957 —

Incoming President Walker stressed the need to change the calendar to achieve year-round operation.

February, 1960 —

Senate voted calendar authority to the administration noting that excellence is possible under any calendar system.

October, 1960 —

System Walker announced the four term system effective in the summer of 1961; the fall term began about October 1 and the spring term ended in late May.

January, 1961 —

Collegian survey of faculty reported even division between semester and term advocates.

January, 1961 —

Collegian poll reported 55 percent of students were opposed to the term calendar and 71 percent thought the quality of education would probably go down.

June, 1961 —

Senate formally adopted the "Basic Calendar Policy" of the new term system; all examinations were to be held in regularly scheduled class periods; there was no examination period as such.

June, 1962 —

A final examination period of three days was added to each term. The spring term ended in mid-June.

December, 1964 —

Senate discussion on problems of the class schedule.

April, 1965 —

Senate report on class schedule problems.

September, 1967 —

The Senate considered a letter from the chairman of the Committee on Resident Instruction suggesting calendar modifications.

October, 1967 —

Senate subcommittee met to discuss calendar problems under the term system.

November, 1967 —

Further discussion of problems on the calendar.

August, 1968 —

Senate reviewed calendar options.

December, 1968 —

Senate reviewed calendar options.

March, 1969 —

Senate considered a semester calendar.

May, 1969 —

Senate considered a semester calendar.

June, 1969 —

Senate considered a semester calendar.

July, 1969 —

Senate considered a semester calendar.

February, 1970 —

Extension of Thanksgiving recess discussed by the Senate.

November, 1970 —

Senate considered making a calendar study.

July, 1972 —

Revision in term calendar suggested to complete the academic year before mid-June.

October, 1972 —

President Oswald, in suggesting changes in the calendar, noted for the Senate's information that the Board of Trustees, in its governance documents of June, 1970, delegated the responsibility for setting the University calendar to the President. The proposed calendar shifted the academic year to begin around Labor Day. The issue was considered by the Committee on Academic Affairs of the Senate. The Committee endorsed the basic principle of three terms occurring between Labor Day

and the beginning of June, insisted on an examination period, acknowledged the "many demonstrable problems" of beginning the winter term before the winter recess but recognized that a three term calendar required such action, did not support a spring recess, was prepared to accept orientation occurring within rather than prior to each term, and could not support a summer of two five-week sessions. The calendar as proposed was approved by voice vote.

October, 1972 —

The new term calendar for the period Summer, 1973, through Summer, 1976, was announced; arrival date in the fall was typically the Tuesday after Labor Day, the winter term was split by the December recess and spring term commencement was typically the last day or so in May.

March, 1973 —

The President's Commission on the Academic Calendar was appointed jointly with the concurrence of the Faculty Senate and after consultation with the Council of Academic Deans.

December, 1973 —

First meeting of the President's Commission on the Academic Calendar.

August, 1974 —

Capitol Campus calendar different from the rest of the University was approved; the Capitol Campus calendar ended the fall term in mid-December and began the winter term in early January.

October, 1974 —

Experimental summer term calendar for 1975 approved; a standard six week session was superimposed in the middle of the ten-week term.

February, 1975 —

The President's Commission on the Academic Calendar submitted a final report; the report was in two parts with ten members favoring an early semester calendar and seven members favoring a modified term calendar.

May, 1975 —

President Oswald extended the existing term calendar through 1976-77 with a lengthened exam period which had the effect of requiring orientation and registration prior to Labor Day in 1976.

April, 1976 —

Modified term calendars for the period from the Fall, 1976, through the Fall term, 1983, announced by President Oswald.

April, 1978 —

Ad Hoc Committee appointed by Provost Eddy to consider a change from the term to the semester calendar.

July, 1978 —

The Provost's Ad Hoc Committee reported disagreement as to the preferred calendar type; the committee reported that the "early semester calendar with an extended mid-winter recess would be the most effective in saving money. No change was made in the calendar.

January, 1980 —

List of calendar issues prepared at the request of Provost Eddy.

February, 1980 —

Subcommittee of the President's Staff reported a list of issues to be considered in changing to a semester calendar.

July, 1980 —

Calendar issues material provided to the University Faculty Senate; calendar type definitions provided.

A Calendar Chronology

September, 1980 —

President Oswald advised the University community that he was inclined to return Penn State to a semester calendar; all interested individuals and groups were asked to share their thoughts with him by December 1, 1980. That procedure was discussed with and concurred in by the Faculty Advisory Committee and the Council of Academic Deans.

November, 1980 —

Senate Forensic Session on the early semester calendar proposal; ten standing committees of the Senate reported on calendar change discussions.

— The Academic and Physical Planning Committee reported that "no insurmountable obstacles have been identified; solutions can be visualized for all problems known to us"; the Committee on Admissions, Records and Scheduling noted advantages and disadvantages in admissions, commented on scheduling and registration, suggested a six-day examination period in each semester, and noted potential cost savings from the reduction in activities such as registration and scheduling.

— The Committee on Commonwealth Campuses and Continuing Education reported that the impact on continuing education would be minimal and listed liabilities and benefits both academic and nonacademic for the Commonwealth Campuses; the Committee on Curricular Affairs took no position on the proposed calendar change and noted such matters as the opportunity to review programs and the fact that the period of transition will make heavy demands on the Curricular Affairs Committees at all levels.

— The Committee on Faculty Affairs noted such matters as workload, research, contractual change possibilities, sabbaticals, and P5-23 procedural changes but took no stand one way or the other; the Committee on Intra-University Relations reported that the Committee generally tended to favor the proposed change.

— The Committee on Libraries concluded that there is a rich potential for "providing an enriched educational experience for students via a semester system" but suggested budget problems were possible in the Library; the Committee on Research concluded that "impediments to research could be serious" and that with regard to research "the Committee finds few positive elements."

— The Committee on Student Affairs, Awards, and Scholarships characterized its report as serving "neither as an advocate for, nor against, the proposed calendar change" but identified issues and recommended attention to specific concerns; the Committee on Undergraduate Instruction noted faculty concerns on instructional workload and contractual arrangements as well as questions about repackaging of courses, length of student residence and special programs.

— A door handout from the President responded to issues which had been raised. Specifics included assurances that tuition would not increase and that faculty salaries would not change because of the calendar, the statement that program restructuring could favorably affect faculty-instructional workload, and assurance of continued transfer policies for Commonwealth Campus students and presentation of sample calendars and class schedules.

— The President called attention to the fact regarding the calendar "that each of the assumptions on which that calendar is

drawn would be affirmed or changed in the decision making only if the conversion to the early semester calendar is made" and also noted that "the specifics of a class schedule would be a topic for decision making in the normal process if the calendar conversion decision is made."

— Following the Committee reports, 23 senators of 206 and 2 non-senators made various comments about the proposed calendar change.

December, 1980 —

The University Council and the deans of each of the colleges reported on the results of calendar discussions.

March, 1981 —

The changeover to the early semester calendar was announced in a special issue of INTERCOM; details of the first five year calendars were included; the Calendar Conversion Council was appointed.

April, 1981 —

The Calendar Conversion Council held its first meeting.

May, 1981 —

Calendar Conversion Council requested program review and revision material from the colleges.

May, 1981 —

Sabbatical Leave Committee of the Calendar Conversion Council was appointed.

July, 1981 —

Standing Summer Session Committee was appointed; Faculty Contracts Committee was appointed; report from Sabbatical Leave Committee was received; analysis of the "Basic Six" semester programs was received.

September, 1981 —

Class Schedule Principles were adopted by the Calendar Conversion Council; Facilities/Faculty/Program Match proposal was adopted by the Calendar Conversion Council.

October, 1981 —

Preliminary report of the Class Schedule Committee was received by the Calendar Conversion Council.

November, 1981 —

Staff and Clerical "Contracts" Committee was appointed by the Calendar Conversion Council; Sabbatical Leave Committee recommendations were approved by the Calendar Conversion Council; Council approved appointment of a Communications Committee.

December, 1981 —

Report of the Faculty Contracts Committee was approved by the Calendar Conversion Council; three class schedule options were distributed to the colleges at University Park for their priority determination.

February, 1982 —

The report of the Standing Summer Session Committee together with the Principal Recommendations for the New Summer Session were approved by the Council to forward to the President; four recommendations from the first meeting of the Communications Committee were approved by the Calendar Conversion Council. The recommendations dealt with expediting various procedures.

February, 1982 —

The Instructional Workload Study was distributed to the Calendar Conversion Council; the Graduate Assistant Stipend Study was received by the Council, and the Principal Recommendations concerning it were approved by the Calendar Conversion Council.

March, 1982 —

Procedures for degree conferral at the end of the fall semester were recommended by the Council; a Committee was appointed to develop definitions for the extended summer session; the chairman of the Communications Committee announced that subcommittees were at work on a semester newsletter and a semester transition handbook.

University Park Calendar

May 6 - 16 Special Events

Thursday, May 6

HUB Craft Center sale, 10 a.m.-4 p.m., Fisher Plaza. Also May 7.

Public lecture, Morris T. Keeton, Council for the Advancement of Experiential Learning, on "Effective Uses of Experiential Learning in Instruction," 2:15 p.m., 402 Keller.

Kern Classics, *Slouth*, 7 and 9 p.m., 112 Kern. New German Cinema, Herzog, *Stroszek*, 7 and 9 p.m., HUB Assembly Room.

Philosophy/13th Annual Doffter Lecture, 7:30 p.m., 101 Kern. John E. Smith, Clark Professor of Philosophy, Yale Univ., on "Being and Willing."

Panel discussion, "Major Powers in Asia," featuring American, Chinese and Soviet diplomats, 7:30 p.m., 102 Forum. Panel moderator: Parris Chang, political science. Assoc. of Ancient Historians Annual meeting, sponsored by IAHIS, through May 9. For information, call Dr. Eugene Borza, 863-0046.

Law and Justice Week lecture, 8 p.m., S. 209 Henderson Human Development. Bruce A. Murphy, political science, on "The Frankfurt-Brandeis Connection: The Extra Judicial Activities of Two Supreme Court Justices."

Penn State Thespians, *Bye Bye Birdie*, 8 p.m., Schwab. Also May 7, 8, May 9, 2 p.m.

Friday, May 7

Last day for signing Spring Term NDLS and University Long Term Loans, 108 Shields.

General Education Conference, Opening Session, 1:30 p.m., Music Bldg. recital hall.

Speaker, Jerry Gaff, director, Center for General Education, American Assn. of Colleges, on "Developing Structures for Renewing General Education." Concurrent Panels, 3:30 p.m., Keller Conference Center.

Keynote address, 8:30 p.m., Music Bldg. recital hall. Harlan Cleveland, director, Hubert H. Humphrey Institute of Public Affairs, Univ. of Minnesota, on "Shouldn't We Also Be Educating for Wisdom?"

Yugoslav Cultural lecture, 2:30 p.m., Rare Books Room. Pattee, Budimir Loncar, Yugoslav Ambassador, on "American-Yugoslav Relations."

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. John Opie, Duquesne Univ., on "The Aesthetics of Arid Lands."

Cinematheque, *Gates of Heaven*, 7 and 9 p.m., 121 Sparks. Also May 8.

Commonplace Theatre, *Stripes*, 7 and 9 p.m., 112 Kern. Also May 9.

Law and Justice Week lecture, 8 p.m., HUB Assembly Hall. William Chamblis, Univ. of Delaware, on "Watergate and Other Organized Crime."

GSA Coffeehouse, 8 p.m., 102 Kern. Sports: volleyball (men), NCAA Championships, also May 8.

Saturday, May 8

General Education Conference, Concurrent Panels, 9 a.m., Keller Conference Center. Plenary session, Keller Conference Center Auditorium, 11 a.m. Presentations: "The Revision of General Education," Provost Edward D. Eddy; "Recommendations for the Future," Theodore L. Gross, provost and dean, Capitol Campus; "The Next Steps," President John W. Oswald.

Symphonic Cinema, Herzog, *Aguirre, the Wrath of God*, 7 and 9 p.m., 112 Kern.

Penn State Symphony Orchestra concert, 8:30 p.m., Eisenhower.

Sunday, May 9

Honors Convocation, 2 p.m., Eisenhower. Speaker, Bruce Murphy, political science, on "Penn State and the Ivy League Syndrome."

Penn State International Dances performance, 3 p.m., 132-133 White.

Glee Club and Women's Chorus Mother's Day concert, 3 p.m., Schwab.

Monday, May 10

Sports: golf (men), NCAA District II Playoffs at Totters; baseball vs. Gettysburg, 1:30 p.m. Public Lecture, 2:20 p.m., Robeson Cultural Center. Alumni Fellow Thomas J. Anderson Jr., Tufts Univ., on "Racial and Ethnic Directions in American Music Based on a

Yugoslav Ambassador to speak

Ambassador Loncar

Yugoslav Ambassador Budimir Loncar will speak on "American-Yugoslav Relations" Friday, May 7, at 2:30 p.m. in the Rare Books Room of Pattee Library. A question and answer session will follow.

His talk is sponsored by the Department

Report Coordinated and Edited by T.J. Anderson for the College Music Society."

IAHS Lecture, 8 p.m., 101 Kern. Colin N. Edmonson, American School of Classical Studies in Athens, on "Old Sites in New Pollution: The Preservation of Ancient Monuments in Modern Athens."

Women's Studies, 8 p.m., Eisenhower. Shirley Chisholm on "Women in Power."

Tuesday, May 11

School of Music Common Hour, 1 p.m., Music Bldg. recital hall. Speaker: Alumni Fellow T.J. Anderson Jr.

APPLE MUG meeting, 7 p.m., beginners; 7:30 p.m., group meeting, 189 Materials Research lab.

Department of Architecture lecture, Cesar Pelli, professor and head of architecture, Yale Univ., 7:30 p.m., 10 Sparks.

GSA Council meeting, 7:15 p.m., 101 Kern. School of Music concert, featuring the work of Alumni Fellow T.J. Anderson, 8:30 p.m., Music Bldg. recital hall.

Wednesday, May 12

Ritenour Health Center, Blood Pressure Screening and Education program, Ritenour lobby. Registration: 11:30 a.m.-1:30 p.m.

Also May 19. Computerized Nutrition program, 11:30 a.m.-1:30 p.m., "Sodium in Your Diet," noon-12:30 p.m., May 12.

"How to Take Your Own Blood Pressure," 12:10-12:50 p.m., May 19.

Nittany Lion Concert Band concert, 7 p.m., Fisher Plaza.

Women's Studies, Sara Waddington, special assistant to former President Carter, 8 p.m., Schwab.

Symphonic Wind Ensemble Chamber Music concert, 8:30 p.m., Music Bldg. recital hall.

Penn State Singers concert, 8:30 p.m., 112 Kern.

Thursday, May 13

Fixed date for meetings involving Commonwealth Campus faculty. Also May 14.

New German Cinema, Fassbinder, *The Third Generation*, 7 and 9 p.m., HUB Assembly Room. Also May 14.

Museum of Art film, *Grandeur and Obscurity*, 7 p.m., First Floor Gallery.

University Readers, *Size 12 Boot*, 7:30 p.m., 112 Kern.

Black Studies Program lecture, 7:30 p.m., Robeson Cultural Center conference room. Joseph Brooks, Emergency Land Fund, Atlanta, Ga., on "The Status of Blacks in the Rural South: Saga of a Declining Resource Base."

of Slavic Languages and the Slavic Language and Area Center. The public is invited to attend.

Mr. Loncar, 57, was appointed Ambassador of the Socialist Federal Republic of Yugoslavia to the United States on Nov. 28, 1979.

In 1949, he joined the Yugoslav Federal Secretariat for Foreign Affairs. He served as consul in New York from 1950-56. From 1956-64, he was director of the Analysis and Planning Group and from 1964-65 served as adviser to the Federal secretary.

Mr. Loncar has held successive tenures as ambassador to the Republic of Indonesia (1965-69); as adviser to the Federal Secretary with ambassadorial rank (1969-73); as ambassador to the Federal Republic of Germany (1973-77); and as undersecretary for political affairs (1977-79).

He has participated in 17 sessions of the U.N. General Assembly, and as a Yugoslav delegation member, has attended many gatherings of non-aligned countries.

A 1941 participant in the National Liberation War, he served in the Yugoslav Armed Forces until 1949 and is currently a reserve colonel.

Friday, May 14

Deadline for graduate students to submit petitions to Records Office to graduate in absentia in May.

STS/Three Cultures Dialogue, 12:20 p.m., 101 Kern. Talks by Donald H. Ford, human development, and Marlene Wadsworth, family studies.

Sports: track and field (men), Penn State Open, 3 p.m.; golf (women), Lady Lion Invitational, through May 16.

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. George Macinco, Central Washington Univ., on "Reclamation of Mined Land."

Commonplace Theatre, *Altered States*, 7 and 9 p.m., 112 Kern. Also May 16.

GSA Coffeehouse, 8 p.m., 102 Kern. Cinematheque, *The Lady from Shanghai*, 7 and 9 p.m., 121 Sparks. Also May 15.

Saturday, May 15

France-Cinema, De Broca, *Practice Makes Perfect*, 7 and 9 p.m., 112 Kern. Also May 17.

Seminars

Thursday, May 6

Chemistry, 12:45 p.m., 333 Whitmore. Dietmar Seyferth, MIT, on "Aspects of Transition Metal Sulfur Chemistry."

Economics, 3 p.m., 101 Kern. James Tobin, Yale Univ., on "An Unapologetic Keynesian View of Current Macroeconomic Policy."

Ecology, 4 p.m., 8 Mueller Lab. Robert Singer, Colgate Univ., on "Effects of Acidic Precipitation on Aquatic Food Chains."

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

Friday, May 7

German, 4 p.m., S-328 Burrows. Karl S. Guthke, Harvard Univ., on "Fontane's Craft of Fiction: Art or Artifice."

Monday, May 10

MC3B, 4 p.m., 101 Altohouse. John Mullet, Rockefeller Univ., on "The Synthesis and Assembly of Chloroplast Chlorophyll-Protein Complexes."

Entomology, 4 p.m., 204 Patterson. Robert M. Peters, biology, on "The Genetics of Behavior in the Parasitic Wasp, *Brachymeria hebetor*."

Tuesday, May 11

Metalurgy, 9:45 a.m., 301 Steidle. K.P. Moll on "Microstructural Development in the Ni-Zr System"; S. Kaja on "Low Temperature Diffusion in Electrodes"; B. Amos-Forsen on "Dissolution Mechanisms of Nickeliferous Latrites."

Solid Waste Management, 2:30 p.m., 128 Sackett. D.W. Gilbert on "Development of an Industrial Hazardous Waste Program."

Plant Pathology, 3:45 p.m., 213 Buckhout. S.P. Pennypacker on "Epidemiology Research." German, 8 p.m., 124 Sparks. Ingeborg Henel, Yale Univ., on "Die Grenzen der Deutbarkeit von Kalkas Werk."

Geosciences, 3:45 p.m., 22 Deike. Muri Mangham, Univ. of Hawaii, on "Velocity Structure across the Samal Ophiolite, Oman."

Thursday, May 13

Chemistry, 12:45 p.m., 333 Whitmore. William R. Heinemann, Univ. of Cincinnati, on "Thin-Layer Spectroelectrochemistry of Inorganic and Biological Systems."

Philosophy, 3:30 p.m., 101 Kern. Alphonso Lingis, philosophy, on "Passive Action"; Richard Cohen, philosophy, on "The Privilege of Reason and Play: Levinas and Derrida."

Physics, 3:50 p.m., 117 Osmond. K. Johnson, MIT, on "Current Status of the Bag Model of Hadronic Structure."

Friday, May 14

Engineering Science and Mechanics, 4 p.m., 215 Hammond. M.R. Louthan, Virginia Polytechnic Inst., on "Environmental Degradation of Materials."

Exhibits

Chambers Gallery: Undergraduate School of Visual Arts Show.

Kern Gallery: Robert Milnes, ceramics, and Roger Pollok, clay.

Museum of Art: Director's Choice, Selected Works from the Museum's Collection. Sculpture and Sculptural Objects from the Museum's Collection.

Dora de Pedry-Hunt, medals and sculpture.

Pattee Library: Rare Books Room: 100 Years of Diplomatic Cooperation Between Yugoslavia and the United States, through May 17; Goethe: The Fortunes of Faust.

East Corridor Gallery: Lois Johnson, prints. Main Lobby and Second Floor: Ed: Sandra Braund, Dean Enross, Linda Rossman, recent works.

Lending Services Lobby: Heather Bentz, recent work.

Visual Arts Bldg., Zoller Gallery: Undergraduate Student Exhibition.

Senate debates grade changes, sabbaticals

Compared with past years, a light docket awaited the University Faculty Senate at the first of its two May meetings, a week ago last Tuesday.

There was no shortage of debate, however, as senators discussed a controversial report on grade adjudication and another on sabbatical leaves.

The topic of calendar conversion opened the session, eliciting a statement from Dr. Robert Schmalz, professor of geology.

"As a member of the Senate, I feel increasingly strongly that it is time for us to stop criticizing the proposed semester plan when there was ample opportunity to do so long ago," Dr. Schmalz said. "I am particularly sorry to see a small but rather intelligent and respected group of the faculty investing substantial amounts of their time and effort in this criticism when their efforts are unlikely to do more than cause confusion in an already chaotic transition and represent an investment of creative thought and personal effort which would be more profitably applied in making a new calendar as effective as possible."

To argue that problems arising from the conversion are insurmountable is "patent nonsense," Dr. Schmalz continued, noting that "most of the outstanding research and instructional institutions in the country are on semester calendars and have been for years."

He concluded: "I think we should and hope we will devote our talents, imagination, and creativity to the challenge of the conversion in the next year, seeking ways to exploit the change to make our courses and our curricula and our research programs more effective, more efficient and more stimulating. . . ."

The Senate considered three legislative

(Continued on page 5)

A serious moment at the Conference on General Education finds Provost Eddy, President Oswald and Dr. Tischler attending to Dr. Gaff.

Group to provide input on general ed

Delegates to the Conference on General Education held last Friday and Saturday at University Park heard five addresses, in addition to participating in a series of panel discussions.

Serving as co-chairs of the conference were President Oswald, Provost Eddy and Dr. Nancy M. Tischler, chairman of the University Faculty Senate.

Theodore L. Gross, provost and dean of the Capitol Campus, acted as chair of the Subcommittee on the Plenary Session. Carol A. Cartwright, acting associate dean for academic affairs of the Commonwealth Educational System, was chair of the Subcommittee on Continuing Programs.

Following are accounts of the talks presented by Dr. Oswald, by conference keynote Harlan Cleveland and introductory speaker Jerry Gaff, and by Dr. Eddy and Dr. Gross.

Concluding the two days of meetings of the Conference on General Education, President Oswald announced "to bring together the best ideas and recommendations of the conference" after reviewing the materials that have been developed.

The group will present a set of recommendations to Dr. Oswald, Provost Eddy and the chairman of the University Faculty Senate reflecting the conference's outcomes.

Chairman of the group will be Robert W. Carruba, associate dean of the Graduate School. Members include Robert E. Dunham, vice president for undergraduate studies; Theodore E. Kiffer, director, Liberal Arts General Education Program; Jerry B. Covert, associate professor of biology at Hazleton; Robert F. Schmalz, professor of geology; M. Lee Upcraft, director of residential life; G. Gregory Lozier, associate director, Planning and Research Group; Herberta M. Lundegren, professor of physical education and recreation; and Kim Hammond, student representative.

Dr. Oswald observed that when the initial planning for the conference began, there were "skeptics who believed that Penn State had already spent too much time in the past 10 years reassessing and revising the University's baccalaureate degree requirements. Others felt that we would have nothing new to add to the national general education debate which resurfaces every couple of decades. Yet I

was convinced that the academic foundations of the baccalaureate education are inherently worthy of periodic introspection and debate," Dr. Oswald continued, "and I believed that a great university must occasionally step back to explore its basic purposes. . . . I have been pleased to observe that this we have done over the past five months."

Recalling to his audience his remarks of last January, in which he used the reference words "breadth" and "depth" (a statement referred to the previous evening by keynote speaker Harlan Cleveland), Dr. Oswald said that the conference has addressed both these issues in its discussions.

"We have been broad in our discussion and treated many facets of general education — definition, requirements, curricular inter-relationships, faculty and student roles and perceptions, process, and change. At the same time, the conference has been organized through its several phases to deal with each of these facets in considerable depth and to focus on concerns of most importance and interest to us as individuals."

Dr. Oswald hailed the contributions of

(Continued on page 4)

McCammion and Schwartz win Lindback Awards

Dr. Mary McCammion, associate professor of mathematics at University Park, and Dr. Lila L. Schwartz, professor of educational psychology at Ogontz, will receive the 1982 Christian R. and Mary F. Lindback Awards for Distinguished Teaching.

President Oswald will present the awards, each of which includes a \$1,000 check and a plaque, at Spring Term commencement exercises on Saturday, May 29.

Teaching award recipients most often win

plaudits for their classroom demeanor, and Mary McCammion has had her share of enthusiastic student evaluations.

But this year's co-winner of the Christian R. and Mary F. Lindback Award for Distinguished Teaching also plays an important behind-the-scenes role in the lives of Penn State undergraduates.

"If I had to state one goal that I have for the rest of my time at Penn State," Dr. McCammion says, "it would be to get students into mathematics courses for which they are prepared."

An associate professor of mathematics, Dr. McCammion dates her concern about student placements back some 20 years to when she became director of undergraduate studies for the mathematics department.

"At first," she recalls, "I was primarily involved in keeping track of our majors, seeing that they didn't reach the last term of their senior year without having fulfilled all of their requirements. Then I started a file on the math courses taken by majors and realized we ought to be trying to steer unqualified students out of the program."

"This led me, in turn, to DUS and the

University's pre-registration testing and counseling programs, and I began to examine the scholastic backgrounds of some of the math students who weren't majors. For the last 10 years, I have been going over the math scores made by entering freshmen. If I find a student who seems completely unqualified — for example, someone taking calculus who has never had trigonometry — I notify the course instructor and try to get the student out. Most of this work, however, is done in the background using computers. I don't have much contact with students."

Students, surprisingly, are often reluctant to withdraw from a course for which they don't have the necessary prerequisites. Dr. McCammion has found. Recently, a woman who was taking college algebra pass-fail and not putting in too much effort, decided that she wanted to go on to calculus.

"I had a hard time trying to convince her that she would be wasting her time and ours," Dr. McCammion observes. "Mathematics, more than almost any other discipline, is built from a structure,

Dr. Schwartz

Penn Staters

President John W. Oswald will receive an honorary Doctor of Science degree June 11 at the Commencement Exercises of the Jefferson Medical College and the College of Graduate Studies of Thomas Jefferson University.

Dr. Oswald, a plant pathologist, achieved international recognition as a scientist at the University of California where his research concerned the fundamentals of the serology of plant viruses and virus diseases. He discovered a previously unknown disease of cereals, the barley yellow dwarf.

This will be the second time this spring that President Oswald will be recognized for his educational leadership. He will receive an honorary degree on June 6 from Lehigh University, where he will also deliver the Commencement address.

Under the auspices of the American Participants Program of the U.S. International Communication Agency of the Department of State, Dr. Frederick E. Fisher is making a three-week tour of South America. Dr. Fisher is an associate professor of community development and associate to the associate dean for Continuing Education and Commonwealth Campuses in the College of Human Development.

Dr. Fisher will meet with businessmen, academics and government officials in Chile and Brazil, and, tentatively, in Argentina, depending on the status of the international crisis. He will present lectures on "Private Enterprise and Public Responsibilities," "Public Administration and Accountability," "Training Executives in the Public Sector" and "Administration of Public Finances."

Paintings by Richard Mayhew, associate professor of art, have been included in two recent shows in New York City galleries. One work was part of a figurative group show held last month to mark the golden anniversary of the Midtown Galleries. Mr. Mayhew is also exhibiting at The Equitable Gallery as part of its "Black Achievement in the Arts" show. In a foreword to the catalog for the latter show, Mr. Mayhew's painting is described as "essentially abstract, falling within the mainstream American tradition . . . relating in sure ways to landscape." Among the other well known black artists in the show are painter Romare Bearden and photographers Gordon Parks and James Van DerZee.

Dr. Wilbur Zelensky, professor of geography, has been awarded an Earhart Foundation research fellowship for the next year to assist him in the preparation of a book, *The Role of Cultural Symbols in the Origin and Maintenance of American Nationalism*.

Dr. Raymond G. Ayoub, professor of mathematics, in a series of four invited lectures at Allegheny College, discussed various topics in the theory of numbers. The lectures were part of a program instituted by Allegheny's Department of Mathematics to bring outstanding mathematicians to the college each year.

A one-man exhibition of sculpture by Kevin O'Toole, preparator at the Museum of Art, was on display at the Gross-McClellan Gallery in Philadelphia from March 26 through April 12. Mr. O'Toole, a 1978 M.F.A. graduate of the University, works with wood, cast bronze and cast resin materials.

Howard F. Kingsbury, associate professor of architectural engineering, was granted the 1982 Award of Merit by the international standards-writing organization, the American Society for Testing Materials (ASTM). Professor Kingsbury was cited for "distinguished service and dedication to the cause of voluntary standards in acoustics" and for his leadership role in ASTM Committee E-33 on Environmental Acoustics.

Dr. Eugene J. Kelley, dean of the College of Business Administration, was presented May 11 as the incoming president of the American Marketing Association (AMA) at the 65th Annual Marketing Conference of the AMA May 9-12 in New York City. Dean Kelley will assume the 1982-83 AMA presidency July 1. The organization has a membership of 40,000 marketing practitioners, educators and students.

Dean Kelley also presented a paper to conference participants and chaired a major session during the three-day proceedings. He spoke on "The Japan-U.S. Connection: Complements, Contracts and Convergence."

Dean Kelley's goals for the AMA for 1982-83 include beginning a period of close cooperation between the professional marketing associations of the United States and Japan.

Dr. William H. Neff, associate professor of biology, is the 1982 winner of the C.I. Noll Award for excellence in undergraduate teaching in the College of Science. The award is granted by the College of Science Student Council.

For the past 10 years, Dr. Neff, who is coordinator for Commonwealth Campus faculty in biology, has consistently received high evaluations in two large enrollment courses, Human Anatomy and Comparative Vertebrate Anatomy. Ninety-six percent of the students who took the former course in the last rating period put it in the superior/good category.

Dr. Neff earned all three of his degrees at Penn State. He joined the faculty in 1959 as an instructor in anatomy and physiology at the McKeesport Campus. In 1965, he moved to University Park.

The Noll Award is named in honor of Dr. C.I. Noll, professor emeritus of chemistry and dean emeritus of the College of Science.

Dr. Stephen J. Beckerman, assistant professor of anthropology, was awarded an NSF grant to attend the Fourth International Congress of Archaeozoology, held in London during April. Dr. Beckerman presented a paper entitled, "A Quantitative Assessment of the Dietary Contribution of Fish and Game to the Subsistence of Amazonian Tribal Peoples."

John B. Frantz, associate professor of American history, presented lectures at Millersville State College on "Religion in Pennsylvania: Unity in Diversity," and at West Chester State College on "Religion in Colonial Pennsylvania: Model for a Nation." Both lectures were part of the sponsoring institutions' observance of the 300th anniversary of the founding of Pennsylvania.

Bookshelf

Dr. Judith Van Herik, assistant professor of religious studies, is the author of *Freud on Femininity and Faith*, a 232-page book published by the University of California Press.

Dr. Van Herik offers a new interpretation of Freud's writings that examines the centrality of his theory of gender to his thought. It discovers links between his negative evaluation of femininity, his critical thought as a whole, and his criticism of religious belief.

The book shows how gender measures value in Freud's thinking, specifically in two of his books on religion - *The Future of an Illusion* and *Moses and Monotheism*. Dr. Van Herik delineates relationships within Freud's theories that previously have gone unremarked. Her approach ties together his presupposition of the primacy of fathers, his claims about the dangers of wish-fulfilling illusions, his accounts of the asymmetrical development of masculinity and femininity and his psychology of religion.

The work will be of interest to students of Freud, religion, the psychology of religion and feminist social theory.

Dr. Eugene Borza, professor of ancient history, is co-editor of two recently published special studies of ancient Macedonia.

Macedonia and Greece in Late Classical and Early Hellenistic Times, co-edited with Dr. Beryl Barr-Sharra of New York, was published by the National Gallery of Art as part of its continuing series, *Studies in the History of Art*.

The second volume, *Philip II, Alexander the Great and the Macedonian Heritage*, is an outgrowth of an Alexander the Great symposium held at the Art Institute of Chicago. It has been published by University Press of America.

Dr. Borza prepared papers for both volumes.

Dr. Peter Gould, professor of geography, together with a Swedish colleague, Professor Gunnar Olsson of NORDFLAN, Stockholm, has written and edited a new book, *A Search for Common Ground*, published in April 1982 by Pion Limited of London, England.

The book examines newly emerging perspectives in geography, with many of the viewpoints informed by trends in contemporary philosophy. Geographers from nine nations contributed to the volume; many of them were participants in a conference arranged by Professor Gould at Bellagio, Italy, in the summer of 1980.

Retirement

Chester P. McMin, Clinton County Extension director, retired April 20 with 36 years of service.

After nine years in Clarion and Venango counties, Mr. McMin, a 1939 Penn State graduate, was assigned to Clinton County and assisted growers there in converting from tobacco to vegetable production.

He has also worked with farmers to increase milk production, promoted enrollment in the State Alfalfa Growing Program and provided information on soybean production and estate planning.

He received a Distinguished Service Award from the National Agricultural Agents in 1966.

Carpooler

Paul Rodland of Warriors Mark seeks to share driving or to ride on an 8 a.m. to 4:30 p.m. schedule at East Halls. Home phone is 632-3437.

Obituaries

George L. Lockard, a carpenter with the Office of Physical Plant from 1939 to 1965, died May 4 at the age of 63.

Warren N. Underwood, a professor of civil engineering at his retirement in 1965, died May 3. He was 81. He joined the faculty in 1955.

Students to receive Hetzel and Walker awards this month

Stephen L. Salyards of Rochester, N.Y., Joel C. Wilkinson of Cresco and Melanie A. Miller of Allentown are the 1982 recipients of the University's two most prestigious annual student awards.

Mr. Salyards and Mr. Wilkinson will receive the Ralph Dorn Hetzel Memorial Award recognizing outstanding seniors who have demonstrated responsible leadership and potential for future public service.

Established in honor of the late president of Penn State, the Hetzel Award cites outstanding academic achievement and leadership in University or other public activities.

Ms. Miller will receive the Eric A. Walker Award, established by the President Emeritus of the University, to honor a graduating senior whose activities and achievements have enhanced the reputation of the University.

Mr. Salyards, a geosciences student, maintained a 3.91 GPA. As a member and later a vice president of Alpha Phi Omega national service fraternity, he served as scoutmaster of a fraternity-sponsored Boy Scout troop of mentally retarded boys and chaired the annual First Aid Meet, a first aid skills competition sponsored by the fraternity for local Boy Scout troops.

Mr. Wilkinson, a recreation and parks major, has a 3.98 GPA. He served as president of the Health, Physical Education and Recreation Student Council, special student services division coordinator of the University's Parks and Recreation Society, vice president of the Lakonians honor society and membership chairman of the Mortar Board senior honor society.

He also served as assistant scoutmaster of a State College Boy Scout troop and counselor and instructor at the University's Shaver's Creek Environmental Center. He led outdoor activities for community groups and learning-disabled secondary school students.

Ms. Miller, a nuclear engineering student, has been president of the Penn State student chapter of the Society of Women Engineers for the past two years. Under her leadership, the chapter grew from 90 to 440 members and hosted a regional conference at which it was recognized as one of the top four student chapters in the nation.

Ms. Miller was elected regional representative to the Society's 1982 national conference. While president, she initiated recruitment and orientation programs for high school students on engineering at Penn State.

Material due for Summer Term calendar

Individuals and organizations wishing information about Summer Term activities to appear in the INTERCOM calendar should forward this information at once to Calendar Editor, Room 312 Old Main, 865-7517.

Lindback awards

(Continued from page 1)

and the student must follow a certain progression."

Teaching mathematics presents special problems, Dr. McCammon believes.

When a mathematician puts an equation on the board, he or she sees a certain beauty and logic. But to the students seeing that equation for the first time, the logic may not be so obvious; indeed, to them it may be little more than a mass of jumbled symbols.

"Basically, mathematical ideas are very hard," Dr. McCammon says, "and since they often have no practical application, students can't see how they're used."

Another complicating factor is described by the fashionable term, "math anxiety."

"Students who can't understand the math they're taught in school are often stigmatized as 'stupid,'" Dr. McCammon continues. "Sometimes they're just been badly taught, but in any case they develop a hang-up about their ability to learn the subject. We see a number of these students at Penn State."

A partial solution to student math problems, in Dr. McCammon's view, would be the establishment of a mathematics learning center.

"I feel very strongly that the mathematics department needs an assigned space where students know they can go for help," she says. "I used to believe that students and their parents paid some attention to the profiles that are developed from Penn State's pre-registration tests, but, unfortunately, in many cases, they don't. The math department must assume this responsibility."

"Last term, I used the computer to find the algebra scores of all the entering students in Math S. I had to send out 75 letters telling students they were not ready for the course. I want to be able to do this for all freshmen and sophomores. When we make the switch to the semester system with 14-week courses, this kind of screening will become even more important."

Another function of a learning center

would be to provide students with assistance for minor mathematical comprehension problems.

"At present, individual faculty members and graduate students help informally," Dr. McCammon explains, "but students would be more apt to seek assistance if they knew there was a specific place to which they could come and that it was open and staffed at stated hours."

Colleagues point out that Dr. McCammon's screening programs are conducted on a purely voluntary basis — over and beyond her regularly assigned teaching duties. She also coordinates the beginning algebra and trig courses which are taught by teaching assistants and part-time instructors.

Dr. McCammon, who was born in England, graduated from the University of London, doing her undergraduate work at Royal Holloway College and her doctoral research at Imperial College of Science and Technology.

After graduation, she recalls, most of the students used to go abroad, so she decided to join them, travelling to MIT in Cambridge to do research. She was working there in 1954 when a member of Penn State's math faculty passed through and interviewed her.

"I remember that Orrin Frink, who was then head of the department, wrapped the appointment up in a three-line letter," she says.

Commenting on her Lindback prize, Dr. McCammon concludes:

"I've never felt that I was an easy teacher. I do think I am reasonable and that I can communicate with students, but I've never tried to be popular. I'm really pleased by the award because it makes me feel that students must appreciate this kind of approach."

When Lita L. Schwartz isn't actually teaching about teaching at an Ogontz classroom, she can often be found pondering or writing about pedagogical theories and techniques.

A professor of educational psychology, Dr. Schwartz is the author of several textbooks, among them *American Education: A Problem-centered Approach*; *Educational Psychology: Focus on the Learner*; and *The Exceptional Child: A Primer*. The last was recently expanded

and will appear next winter under the title, *The Exceptional Student*.

Dr. Schwartz is also co-editor of a book of readings on life-span development and has written a number of articles for professional journals, many of them dealing with creativity and innovative approaches to teaching.

Colleagues and students alike testify to her ability to translate her theories into practice. As a result of her efforts, students in Ed Psych 14 take a required field work practicum which allows them to serve as teacher aides in local schools one morning a week.

"I try to make my courses very practical," Dr. Schwartz explains, "even when I am dealing with theories, and I take my students on field trips to expose them to differing school practices in the Philadelphia area."

"This year, for example, in Special Ed 105, I was able to take advantage of a program the Ogontz Campus is conducting for the Montgomery County Intermediate Unit, providing enrichment classes for pre-adolescent youngsters who are specially gifted."

"I asked my students to act as big brothers and sisters to the children when they were brought onto campus for the program, and at first I don't know who was more terrified about interacting — our students or the little ones. But after the first couple of weeks, the shyness on both sides disappeared, and now the children come straight off the bus and head for 'their' Ogontz students with big grins."

Dr. Schwartz believes that her students should have an opportunity to see both the positive and the negative in a teaching situation.

"If they have a placement which is less than ideal," she explains, "they can learn what they don't want to do as well as what does work."

When she teaches Cultural Foundations of Education, Dr. Schwartz has class members attend local school board meetings and report on them as well as on other local and national educational news. These assignments follow logically from her approach to the course, which she reoriented from a straight historical presentation to a problem-centered mode.

One of Dr. Schwartz's newer ventures is History 15B, the History of Immigration,

which she teaches with Natalie K. Isser, associate professor of history at Ogontz. The course developed out of research the two faculty members had done on the effect of school and elementary textbooks on children whose parents came to the United States during the great immigration period of the 1920s.

A Vasar graduate, Dr. Schwartz took her M.Ed. at Temple University and her Ph.D. at Bryn Mawr. She first visited Penn State on a date from Vasar and subsequently married her escort, Melvin Schwartz, class of '49.

"Then when I was in graduate school at Bryn Mawr," she recalls, "I was looking around for some part-time teaching, and a vacancy occurred on the Ogontz faculty because someone had been injured. My first job was as a kind of 'circuit rider,' teaching psychology to nurses at Philadelphia area hospitals. I became a full-time faculty member in 1966."

Currently chairman of the Ogontz Faculty Senate, Dr. Schwartz has been active in professional organizations and is currently a member of the editorial boards of *Journal of Creative Behavior* and *Improving College and University Teaching*. She also serves as a reviewer for *Gifted Child Quarterly* and was an associate editor of a special issue on cults, published by *Marriage & Family Review*. She has integrated her findings on religious cults into her Psychology 2 classes.

Of her approach to students, Dr. Schwartz says:

"These are the young people who 20 to 30 years hence as mature adults will rule our society. It is very important to give them as many competencies and strengths as we can. For my part, I am particularly concerned about the prospective teachers who will educate the next generation of students, and I feel an obligation to see that they are as well prepared as possible."

"It's so important to understand the backgrounds of our students, because that are our future. We must constantly try to do as much as we can with them and for them."

"I do like the fact that I'm teaching at a small campus, where I can get to know my students well and where they feel comfortable about coming to see me with their problems."

Two Penn Staters to ride shuttle

Two astronauts who are Penn State graduates are scheduled to ride on space shuttle missions in 1983.

They are Air Force Lt. Col. Gulon S. Bluford, Jr., who received his bachelor's degree in aerospace engineering in 1964, and Paul J. Weitz, who earned his bachelor's degree in aeronautical engineering in 1954.

Dr. Bluford, 39, will become America's first black astronaut when he participates in a three-day flight in July of next year. A former resident of Philadelphia, he was enrolled in the Air Force R.O.T.C. program at Penn State and earned his commission as a second lieutenant in 1964. The following year, he won his pilot wings and was assigned to Vietnam, where he flew 14 combat missions.

He earned a master's degree with distinction and his doctorate, both in aerospace engineering, from the Air Force Institute of Technology in 1974 and 1978, respectively.

Before being named as an astronaut candidate by NASA in 1978, Col. Bluford was assigned to the Air Force Flight Dynamics Laboratory at Wright-Patterson Air Force Base, Ohio, as a staff development engineer. He has written and presented several scientific papers in the area of computational fluid dynamics.

He holds numerous military distinctions.

Paul J. Weitz, pilot on the first manned Skylab II mission in 1973, is a native of Erie. He is scheduled to be commander of the first flight of the shuttle orbiter

Challenger in January, 1983.

Mr. Weitz, 49, received a Navy commission as an ensign through Penn State's Naval R.O.T.C. program. He earned a master's degree in aeronautical engineering from the U.S. Navy Postgraduate School in 1964.

He has been awarded the NASA Distinguished Service Medal, the Navy Distinguished Service Medal, Astronaut Wings, Air Medal (five awards), and the Commendation Medal for combat flights in Vietnam.

He also is the recipient of the Los Angeles Chamber of Commerce Kitty Hawk Award, the Robert J. Collier Trophy for 1973, the AIAA Haley Astronautics Award for 1974, the Federation Aeronautique Internationale's V.M. Komarov Diploma for 1973, the Dr. Robert H. Goddard Memorial Trophy for 1975 and the Harmon International Aviation Trophy for Astronauts in 1974.

Mr. Weitz was named a Penn State Alumni Fellow in 1973 and a Distinguished Alumnus of the University in 1974.

The Skylab II mission team of Mr. Weitz, Charles Conrad Jr. and Joseph P. Kerwin logged 672 hours and 49 minutes aboard the space workshop, setting what was then a world record for a single space mission. Mr. Weitz also logged two hours and 11 minutes in extravehicular activities.

Mr. Weitz retired as a captain from the U.S. Navy in 1976 but remains with NASA as a civilian astronaut.

Celebrating their 25th year with Penn State are: Above, left, Stephen B. Spencer, professor of dairy science Extension; right, Paul M. Reber, associate Extension agent, Montgomery County. Below, left, Lewis S. Joden, experimental and research mechanic A, Agricultural Engineering; right, Joan Kofstinger, accounting clerk, Liberal Arts.

A report from the Conference on General Education

(Continued from page 1)

the delegates and conference leadership said:

"At the opening of this conference, I stated that 'we do not want to confound this conference with a plan for general education at Penn State.' Conference organizers emphasized that specific curricular reform was not intended by design. We also noted that directions may emerge from the conference that might suggest changes in the structure, content, or delivery of, or the faculty reward structure for, general education at Penn State."

Noting that this was not a legislative conference, Dr. Oswald applauded the freedom of exchange which had taken place: "There have been points of unanimity in agreeing that general education of some type is important," he pointed out. "But of course there has not been total agreement; there are differing forms of basic education for various majors, for core courses, for interdisciplinary presentations. But overall we have been sensitized to the issues, we have verbalized the issues (I am sure!); we have come to focus on the issues, sharpening our understanding of differences and agreements."

The conference, the President concluded, had far exceeded his fondest hopes, and "I, for one, feel even more strongly about our commitment to general education and to its continuing importance at Penn State in the quality years to come."

Harlan Cleveland

Identifying himself as "a card-carrying generalist," Harlan Cleveland urged the delegates to the General Education Conference to be "passionately curious" about the interconnections between fields of knowledge.

But while pointing out that breadth is the indispensable quality of leadership, he noted that "the leader as manager is very likely to be unsuccessful unless he has once been an expert himself."

"The leadership is us."

"I do not wish to imply that specialization and disciplinary expertise are less worthy than integrated thought or that expertise is passe," continued Dr. Cleveland, who is director of the Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota.

Prior to that, he enjoyed a distinguished career in international affairs in the Department of State and as U.S. ambassador to NATO. He was also dean of the Maxwell Graduate School of Citizenship and Public Affairs at Syracuse University and president of the University of Hawaii.

"A world of coordinators would be as much of a mess as a world of experts," Dr. Cleveland observed. "Obviously what we need is to stir them together in a stew of social theory and action, which means that these actors on the stage of society have to learn to live with each other in a symbiosis of mutual respect and mutual dependency. But in that mutual relationship, the leading edge, the front line of attack on the world's problems must belong to the integrators, those whose function it is to say where to go and when and why."

Because integrative thinking is hard and unfamiliar work, many people would prefer to leave it to those with a taste for leadership. This, however, is no longer possible, Dr. Cleveland said, because "the leadership is us."

"In the world of our classical ancestors, in China, Greece, Persia and Rome, and in the world of our founding fathers,

general education, the liberal arts, was leadership education. It still is. The difference is that the leadership used to be the few and now it is us, the many."

Dr. Cleveland described the vertical society which once prevailed — featuring recommendations up and orders down. He continued:

"Modernization made the vertical society obsolete. Man as manager had to learn to manage the complexity that man as scientist, engineer and educator were making psychologically possible. The traditional modes of leadership simply didn't work very well. Nobody could be fully in charge of anything; it was all too complex, and so the horizontal society was born."

"Modernization made the vertical society obsolete."

The division of labor became the key to managing complexity and thus the training of specialists was essential. The result has posed a dilemma for society.

"When leadership is the province of an aristocracy of achievement measured literally in millions, the participants in decision-making comprise no longer a club but a crowd." "How," Dr. Cleveland asked, "do you get everyone in on the act and still get some action?"

Today, major shifts in societal direction, Dr. Cleveland said, "are formed in inchoate consensus by the people at large."

Using such examples as the decisions to end the war in Vietnam, to fire a president, to equalize opportunity for women or to consider a freeze in the deployment of nuclear weapons, Dr. Cleveland pointed out "that the people always seem to get there first."

"The people always seem to get there first."

There have been only a very few exceptions to this mass decision-making in recent times, according to Dr. Cleveland, among them the personal leadership exhibited by such men as Sadat, Churchill, Tito and Roosevelt.

"If nobody is in charge, then all of us are partly in charge," Dr. Cleveland said. "This means that in some degree, we have to try to understand all of it, to relate our part to the whole, to integrate the knowledge we accumulate, to get past the facts to help fashion the theories."

Making sense of the facts is particularly complicated in this era because the world is entering what Dr. Cleveland called "the great theory crisis of the 1980s." Meaningful distinctions are breaking down, he explained, the distinctions between the public and private sectors, the distinctions between domestic and international spheres.

With Proposition 13 and Proposition 2½, the people have said that they don't want the government to get any bigger at the same time they are asking for somebody to do the jobs that used to be done by government — create full employment, control inflation, contain new technologies.

Society is groping for a usable economic theory to replace Keynesian economics; it has created nuclear weaponry too fearsome to be used; it faces an extraordinary gap in the theory of thinking about the nature of "the most important resource in our economy, which is information."

"These days, if something needs fixing, it is always our turn," Dr. Cleveland commented.

"But there are really people willing to take on the personal responsibility for whatever goes wrong? It means doing the

integrated thinking, getting it all together, getting everyone in on the act and still getting some action."

Dr. Cleveland concluded by naming four individuals who, in his view, illustrated the upbeat, can-do spirit of generalist leadership. They were Jean Monnet, Paul Hoffman, Barbara Ward and Hubert Humphrey.

"Each in their time asked not only the value question, why, but the action question, why not," Dr. Cleveland said. "They learned enough about all subjects to use their expertise without being mesmerized by the experts. They acted as if everything were interrelated to everything else."

Jerry Gaff

Even though the difficulties in changing a curriculum have been acknowledged to be worse than those involved in moving a cemetery, Penn State has four essential ingredients for success in place, Jerry Gaff told delegates attending the opening session of the Conference on General Education last Friday.

These ingredients are strong administrative support, solid faculty leadership with widespread involvement, student participation and carefully orchestrated procedures to coalesce conflicting points of view.

Dr. Gaff is director of the Center for General Education of the American Association of Colleges.

Noting that the subject of general education is enjoying national prominence at this time, Dr. Gaff defined the imperatives which point to structures for renewing the curriculum.

They include:

- Stressing anew the liberal arts and sciences, not because they are the body of knowledge that every educated person must have, or because a need exists to find ways to utilize under-occupied liberal arts faculty, but because at their best the liberal arts represent the kind of knowledge students must have to surmount the unknown problems the future holds.

- Developing distinctiveness. While every college claims to be unique, this is seldom reflected in the curriculum.

- Teaching skills. Dr. Gaff noted the erosion of standards as indicated by the fact that military training manuals must continually be simplified to help recruits understand them. Nor is teaching basic skills enough, Dr. Gaff contended.

"Each of them has a high need and a low demand. They have no natural constituency."

Students must have computer literacy, gain some understanding of statistics and learn to think critically.

- Providing genuine breadth. A fragmented curriculum can only lead to atomized knowledge, Dr. Gaff said, suggesting that courses be certified and screened by college-wide committees.

- Making the integration of knowledge the responsibility of the faculty rather than expecting students to integrate anything the faculty can't or won't.

- Developing global perspectives. A strong international dimension must be implanted into the core of general education, Dr. Gaff said.

- Using the power of the non-classroom. Referring to the educational impact of the "hidden" curriculum, Dr. Gaff suggested that universities require varied kinds of learning experiences. All students should be expected to take independent study and to have a component of experiential work, along with a residential or quasi-residential experience.

- Developing a shared philosophy of education. Faculty should reaffirm the principle of educating specialists with a broad general background and assume "corporate responsibility" for higher academic standards.

Dr. Gaff acknowledged the difficulties involved in accomplishing these imperatives:

- "Each of them has a high need and a low demand," he pointed out, "and they have no natural constituency."

- "Who speaks for general education?" he continued. "I hope each of you will respond 'I do' and counsel your colleagues to do likewise. Unless you are all firmly behind curricular reforms, this conference cannot achieve its full potential."

Dr. Gaff concluded by urging his audience to establish expectations and standards for all students, maintaining a proper balance between competing educational priorities such as graduate and undergraduate education and teaching and research."

Edward D. Eddy

Two clear, though formidable, tasks confront Penn State in respect to general education, Provost Eddy told delegates meeting on Saturday morning.

"We must first determine whether or not general education truly is as central to the goals of the University as is specialization," Dr. Eddy said.

And second, the University "must recognize the nature of our influence on public school curricula and ask ourselves if we are satisfied with that influence."

"We must recognize the nature of our influence on public school curricula and ask ourselves if we are satisfied with that influence."

Turning to the issue of specialization, Dr. Eddy pointed out that America is a country obsessed with science and technology.

"Technology is necessarily reductionist," he said. "It reduces all objects and processes to their smallest components to serve the interests of precision, efficiency, speed. The intellectual extensions of such thinking are obvious..."

Connections between and within disciplines have eroded to the point, Dr. Eddy observed, where "we are literally in danger of forgetting how to communicate with each other..."

"We can fly in supersonic luxury to places where other cultures flourish — and yet understand little about those cultures."

"Our nation has the awesome capacity of destroying the world with the push of a button — and yet we know little about the resolution of human conflict or the prevention of little wars."

Penn State has the obligation to contribute to the alleviation of these problems, Dr. Eddy told the delegates. As the capstone of the Commonwealth's educational system, "It has the power of persuasion and requirement."

"It also has a special obligation and a special opportunity to provide leadership in the re-vision of general education and not just on our own campuses but up and down and throughout the state."

But the reintegration of the curriculum is hindered by the nature of academic preparation itself, Dr. Eddy maintained, because "specialization is expected and rewarded."

He offered, as one example, "the message we send the engineering student. 'You may study French, but you will be

(Continued on next page)

(Continued from preceding page)

rewarded for your performance in physics."

"I am not suggesting that excellence in physics is not absolutely essential to the engineer," he said, "but is excellence in, say, history, or a foreign language, plus an understanding of the connections among the disciplines, any less essential to the human being and the citizen who resides within the engineer? And in a real way, might not the performance of the engineer as engineer be improved by a deeper understanding of the human dimensions which affect our technology?"

Asserting that universities reinforce fragmentation by rewarding individuals, in part, on the basis of the narrowness of their scholarship, Dr. Eddy called for "the encouragement and reward of activities enhancing general education at its scholarly best, at least to the degree that we currently reward specialization at its scholarly best."

In discussing the role Penn State can play in enhancing general education in the Commonwealth, the Provost cited the education it provides public school teachers and the graduate training it offers to administrators. "Our curriculum, in influencing these individuals, influences, in turn, the public school curricula they create," Dr. Eddy said.

"We are literally in danger of forgetting how to communicate with each other."

"Their educational values are formed in our classrooms. Thus, our current students already have been influenced heavily by Penn State long before they arrive here. And their educational deficiencies and achievements are, we have to admit, our deficiencies and achievements once remedied," Penn State influences public school curricula even more directly through the requirements it establishes for admission. Dr. Eddy suggested that high schools might do a better job teaching mathematics and foreign languages if their students had to master these areas to gain entrance to Penn State.

"When we exercise a positive influence on the public schools, we perform two services," Dr. Eddy remarked.

"First, we enhance the quality of education for all citizens of the Commonwealth . . . and this, surely, is a land-grant obligation.

"Second, to the degree we assist the public schools to develop in their college-bound students the knowledge and the intellectual habits on which we can build at the university level, we enhance the education of our own graduates. And we do what we should have been doing as a university all along."

Theodore L. Gross

Enhancing the practice of common learning will not be accomplished by changing degree requirements; it will be brought about through fuller participation by the entire faculty in general education.

The University will also need to match its reward structure to its beliefs, continued Dr. Theodore Gross, provost and dean of Capitol Campus. Dr. Gross spoke to the delegates at the final session of the conference.

Summing up some of the specific conference recommendations, Dr. Gross noted:

— The College of Agriculture has developed a list of goals and objectives essential for its majors, including technical knowledge, communication skills,

personal values, problem solving abilities and leadership traits.

— The College of Science has sought to define the scientific principles essential for an informed citizenry and to view the role of science in a society marked by uncertainty and change.

— Students and the staff of Student Affairs have designed specific programs and activities to create an environment supportive of general education in the classroom.

"If . . . the faculty find no way of rewarding a superior teacher of general education, then the common learning that integrates and binds all our disciplines will be neglected or assumed."

— The College of Health, Physical Education and Recreation has suggested a place for the study of physical fitness, health, disease and exercise within the academic context of general education.

— The College of Engineering has stressed the need for a greater knowledge of foreign languages and cultures and is considering a basic course to determine where engineering and design fit into the general scheme of life and societies.

— Senior faculty should be encouraged to participate in general education to give the entire enterprise the highest status.

— Departmental course credit should be removed from the teaching of general education to avoid any parochial allegiance to a discipline.

— A pamphlet should be produced defining the skills and content of general education expected of students entering Penn State, as well as what should be expected of graduates.

— Ways should be explored to measure the effects of a Penn State education — specifically its general education component — on a graduate's later life.

Once these and other recommendations are implemented and take root, Dr. Gross said, "they will condition the climate of our opinion, the value system of Penn State, and in turn, its reward system. The value system of a university is reflected in its reward system, is it not? If all that really matters for promotion and tenure is published work in a discipline and the faculty find no way of rewarding a superior teacher of general education, then the common learning that integrates and binds all our disciplines will be neglected or assumed. Only junior faculty will teach general education, and its low status in the hierarchy of values will be communicated to the students.

"But if we find a way to acknowledge a superior teacher, young or old, who perhaps publishes infrequently; if we agree that the publication of an article on general education will enhance a candidate's academic record; if we reward curricular reform when it is genuinely creative — if good work in the service of general education is honored, then all of us, and especially the students we serve, will be the beneficiaries. After all, it is we who create the hierarchy of values at Penn State; it is we who set the terms of the education we offer."

Stating his belief that renewed concern for general education will return faculty members to essentials, Dr. Gross continued:

"In valuing the teaching of general education, we value a central dimension of our decision to be, first and last, teachers. We value ourselves. We return to our roots."

Senate

(Continued from page 1)

reports, first passing a proposal to move the time of its meetings from 2:10 p.m. to 1:10 p.m. for the greater convenience of senators attending from Campuses outside University Park.

Also passed was a change in the Bylaws to provide a mechanism for filling a vacancy in the office of the Senate chairman-elect. Under the new measure, Senate Council, within 30 days of the vacancy occurring, will present the names of two nominees to the Senate, and a special election will be conducted.

Three recommendations were presented by the Special Committee on Grade Adjudication, and senators quickly agreed on the first two.

Recommendation 1 deals with the correction of grades because of arithmetic or transcription errors, and, for clarification, the Special Committee recommended the substitution of the word "calculate" for "determine." Also accepted was the sentence: "No grade change can be made more than one year after the end of the term (semester) in which the course was taken."

The second recommendation, as passed, states: "The faculty of each college and campus shall establish a college/campus-wide committee of students and faculty for discussion and possible resolution when a student and a faculty member are involved in a disagreement over grades which has not been resolved by other means."

Finally the Special Committee proposed that in the rare cases where the faculty of the department/division offering a course determine that a grade has not been assigned in conformity with Policy 47-20, the Administrative Council on Undergraduate Instruction, in consultation with the Senate's Academic and Athletic Standards Committee, develop a policy reflecting the following principles:

"A. The group that initially determines that a grade has not been assigned in conformity with Policy 47-20 shall be the faculty (or their designated sub-set) of the department/division offering the course.

"B. The decision of the faculty of the department/division must have the concurrence of the department/division head and the dean of the college.

"C. The changed grade shall be recorded by the University Registrar solely on the instructions of the Committee on Academic and Athletic Standards after they have reviewed and agreed with the grade change decision of the department/division faculty and the concurrences of the department/division head and the dean of the college."

Policy 47-20 states: "Grades shall be assigned to individual students solely on the basis of the instructor's judgment as to a student's scholastic achievement as set forth in Policy 47-60 [Definition of Grades]."

Dr. Schmalz objected strongly to the legislation, basing his concern on the rights of the faculty.

"I would hate to see my grade challenged because I took into consideration blots of ink on a map or graded a student in geology on the English he used in a theme," Dr. Schmalz said, adding:

"Yet we propose that a student need only challenge my grade to have a committee appointed and have me accused or convicted *de facto*. We must have the right to defend our judgment against the challenge by any student."

Irwin Feller, professor of economics, pointed out that while the climate of academic freedom is now tranquil, "it is not inconceivable that at some future time ideological splits could emerge in a department, and the appeal rights of students could be used to impose harm on a colleague. The legislation opens the potential for factionalism and ways to impinge on a faculty member's freedom in the classroom," Dr. Feller concluded.

Taking another view, Robert Jennings Heinsch, professor of mechanical engineering, endorsed the recommendation, saying that it permitted only department colleagues to initiate actions, and that accountability to colleagues upholds the standards of the profession.

J. Paul McRoberts, assistant professor of English at Beaver, reported a case where a student had undeservedly received a "C" grade from a part-time instructor and had had no recourse. Ogontz Campus Director Robert A. Bernoff stated his view that a lot was being read into the legislation that simply wasn't there.

The legislation, which was presented by former Senate Chairman George Franz, was passed.

The slate of nominees for Senate officers and committees was presented, and one nomination, that of Peter Bennett for chairman-elect, was added from the floor.

The Senate also considered at length a report from the Committee on Faculty Affairs regarding sabbatical leave policy. The report was informational, but there was some discussion as to whether the Senate should "recommend it strongly" or merely accept it.

The report suggests that more sabbatical leaves be awarded, encompassing a wider variety of scholarly activities; that sabbaticals not be contingent on residence requirements; that travel funds be made available to defray a part of the cost of a sabbatical; that, in the interest of faster turn-arounds, academic deans and campus directors be empowered to make the decisions on leaves; and that special leaves be available for untenured faculty.

Dr. Arthur Lewis, associate dean in the College of the Liberal Arts, eventually put an end to the discussion, calling the report a "wish book" and saying that several of its provisions would leave the University open to legal action.

The Senate then voted simply to accept the report.

800 outstanding students to visit as PSU Scholars

The Penn State Scholars Program will host some 800 high school students for a visit to the University Park Campus this summer.

The students have been nominated for the program by their high school principals and guidance counselors in recognition of their achievements as the top academic students in the junior class of their respective schools.

They will visit University Park for one of two sessions. The first is June 28 and 29; the second is June 30 and July 1.

The Scholars Program was initiated in 1978 to recognize and encourage academic scholarship. It provides an opportunity for top students in and near Pennsylvania to meet with Penn State faculty members and students and to become acquainted with the campus and the academic programs that are offered.

Accompanied by their parents, the students also receive information about financial aid and career resource programs, and they have an opportunity to get a taste of student life.

During their visit, the students may choose to compete for more than 30 Penn State four-year scholarships. Last year, about 100 students were offered full or partial tuition scholarships. Each year, approximately one-third of the 800 participants in the Penn State Scholars Program subsequently enroll at the University.

Women athletes neglected by Scots, visitor says

Athletics for women in Scotland may never be the same after Nanette Mutrie completes her doctorate in physical education at Penn State.

Ms. Mutrie is the first woman from the United Kingdom awarded a Fulbright Scholarship to study physical education in the United States. She's currently on a two-year educational leave from Glasgow University, where she's a lecturer (associate professor) in physical education.

"There are two things I hope to do upon my return," she says. "One is to promote exercise and sport as viable pursuits for women.

"In the U.S., there's much more encouragement at all levels for women to do something. In Scotland, there's a lot more hesitation. There simply aren't enough athletic programs for women. Scottish society is heavily oriented toward male involvement.

"I'd also like to see much more attention paid to the elite female athlete," Ms. Mutrie says. "In Scotland, most of the funding for sports goes to men. I want to share the expertise I gain at Penn State with female athletes, in terms of counseling and dealing with competitive anxiety, as well as organizing training programs. In fact, I'd like to see the establishment of a research center for women in sport."

The faculty and resources in the College of Health, Physical Education and Recreation will prepare her to do exactly that, she says.

"I'm not here by accident," she notes. "Penn State has an excellent reputation in the United Kingdom for physical education. In fact, a recent article in the *British Journal of Physical Education* rated Penn State as the top university in the U.S. for graduate study in physical education.

"My adviser, Dr. Dorothy Harris (professor of physical education and director of Penn State's Center for Women in Sport), is well-known the world over for her work in women's sports."

Ms. Mutrie received her bachelor's degree in physical education in Edinburgh in 1973. After teaching in high school and elementary schools for several years, she joined the faculty at Glasgow University. She received her master's in education from Glasgow last year, and also holds an advanced diploma in education.

But her desire to do more advanced work in physical education was hampered by the absence of a structured graduate program in her homeland.

"You can get a Ph.D. in physical education in Scotland, but it consists primarily of doing research and writing a dissertation," Ms. Mutrie says. "There is

no coursework, so it's rather difficult to get the tools needed to do the research."

Realizing she had to study in America, Ms. Mutrie applied to the United Kingdom-United States Educational Commission for a Fulbright Scholarship. Starting the application procedure in November 1980, she and 59 other United Kingdom scholars made the first cut. After further interviews, she and nine others from a variety of disciplines were awarded their Fulbrights last summer.

At Penn State, Ms. Mutrie is concentrating on the psychology of sport — particularly as it applies to women. "I'm trying to get a broad background in a number of areas as well, not only psychology," she says. "I would like a solid knowledge base in all aspects of physical education."

She'll also be teaching physical education classes during her stay, a role to which she brings a degree of proficiency. In 1980-81, Ms. Mutrie was ranked as the number five female squash player in Scotland. In addition, she has played in four international squash matches with the Scottish national women's team.

For the past four seasons, she has coached both Glasgow University's women's volleyball team as well as the Scottish intercollegiate women's all-star volleyball team.

Student leaders from 13 states to discuss higher education

Student leaders from 125 east coast colleges and universities in 13 states will gather at the University this month to get a national perspective on the future of higher education.

The first annual Atlantic Regional Conference is scheduled for May 14-16. It will ask such questions as: Can higher education legitimately be separated from national defense? Are west coast firms draining the technology of the east? Can states meet the demands of education under New Federalism?

"We want to establish the intellectual basis for change and action," says coordinator Marybeth Hunter, a senior political science major at Penn State. "Instead of addressing specific issues, we'll deal with the broad philosophical questions that determine those issues."

Nationally-known authorities in education, economics, government and other fields will serve on various panels.

NBC News economic correspondent Irving R. Levine, United States Student Association president Janice Fine, and Americans for Common Sense head George Cunningham will be among the panelists who will discuss "Exploding the Ivory Tower Myth of Higher Education."

They will consider such questions as: Is higher education cost-effective for national and state economies?

Robert Clodius, president of the National Association of State Universities and Land Grant Colleges, and Robert Klitgaard, special assistant to the president of Harvard University, will join other panelists to discuss "The East-West Brain Drain."

The session will look at the flow of eastern college graduates to western firms, and the future of the liberal arts in high-technology times.

Thomas P. Melady, assistant secretary for post-secondary education with the Department of Education, and former National Education Association president Dr. Helen Wise will take part in a panel on "Education Under the Trend of New Federalism."

They'll consider the state's commitment to higher education and the roles of the federal government and corporate structure under the New Federalism.

Dr. Schraer to give Phi Beta Kappa talk

Dr. Rosemary Schraer, associate provost and professor of biochemistry, will deliver the Phi Beta Kappa address at the annual initiation and banquet, to be held Saturday, May 15, at 6:30 p.m. at the Sheraton Penn State. The title of her address is "Look Well to This Day."

Each year, Lambda Chapter of Penn State initiates approximately 80 juniors and seniors into membership in the nation's oldest honorary society.

Officers of Lambda Chapter, recently elected for 1982-83, are Alfred A. Triolo, president; Martha Kollin and Roland Good, co-secretaries; M. Thomas Pigott, treasurer; and Catherine Carter, historian. Elected to serve on the Executive Committee were Vilma R. Hunt and William R. Schnaaleig.

Reservations for the banquet may be made by calling Janet Beaulieu, 865-7533.

Penn State to host composition and rhetoric meeting

Several national experts will speak at a Penn State Conference on Rhetoric and Composition, to be held at University Park July 5-9.

Conference topics include the history of rhetoric, research in composition, grammar and linguistics, style and technical writing. Interested persons are invited to propose papers, demonstrations or workshops on these and other subjects related to rhetoric and composition.

Among the guest speakers are:

— Edward P.J. Corbett, professor of English at Ohio State University. He is a former editor of *College Composition and Communication* and the author of *Classical Rhetoric for the Modern Student*.

— Joseph M. Williams, professor of English at the University of Chicago. He is the author of *Style: Ten Lessons in Clarity and Grace*.

— James L. Kinneavy, associate professor of English and education and director of composition at the University of Texas at Austin. He is the author of *A Theory of Discourse*.

Other featured speakers will include Donald Daiker, Miami University, co-author of *Sentence Combining and the Teaching of Writing*; Richard Larson, City University of New York, editor of *College Composition and Communication*; and Marilyn Sternglass, Indiana University, author of the forthcoming *Reading, Writing, and Resourcing*.

Persons seeking further information should write or call: Professor Betsy Brown, Department of English, Room S-34 Burrowes Building, The Pennsylvania State University, University Park, Pa. 16802; (814) 863-3066.

The conference is a Continuing Education service of the College of the Liberal Arts.

Independent study moved to Mitchell

The Independent Study by Correspondence office, formerly located in Room 3 Shields Building, has moved to Room 128 Mitchell Building.

Sculptor Roger Pollak is showing his "gene-splicing" series at Kern Galleries. Here he is working on "A Gnu Man," a combination of half-man, half wildebeest. A former geologist, Mr. Pollak turned to sculpture as a career six years ago.

Foreign nationals with non-immigrant visas may need special Canadian papers

Foreign nationals employed by Penn State while on nonimmigrant visas and wishing to visit Canada should telephone the Canadian Consulate to check on visa requirements at least two weeks before their proposed departure.

The Office of Personnel Administration advises that in most cases the foreign national need only present a valid passport and a form I-94 issued by the U.S. government indicating that the foreign national is eligible to return to the United States without jeopardizing his or her visa.

However, foreign nationals from some countries — The People's Republic of China is one — must have special

Canadian visas for admission. The Canadian Consulate will not provide a complete list of those countries requiring the special visas since the list is continually changing.

To obtain this visa, the foreign national must appear in person at the Canadian Government Office of Tourism in Philadelphia with a passport and two passport photographs. The visa, if it is to be issued, will be provided within 72 hours.

The Consulate's telephone number is 215-561-1750. Calls will be accepted between 8:30 a.m. and 3:30 p.m., Mondays through Fridays, except on holidays.

Faculty/Staff Alerts

Consult policy PS-2 before hiring minors

Supervisors are reminded that under the law an employment certificate (sometimes called "working papers") is required before any minor begins working for the University. A minor is anyone under age 18 who has not graduated from high school, or who has not been declared by the high school as having attained maximum academic potential in lieu of graduation.

It should also be noted that the minimum age for University employment is age 16.

The employment certificate is issued by the minor's high school for a specific job. If the minor changes jobs within the University, a new certificate is required. Employment certificates are maintained on file by the Employment Division, or appropriate business or personnel office at facilities away from University Park. When a minor ceases employment, the Employment Division, or appropriate business or personnel office, must be notified so that the certificate can be returned to the issuing high school.

Supervisors hiring minors should review University policy PS-2, Employment of Minors, before committing employment to a minor.

HUB lot closed to parking on May 27

The HUB parking lot, Brown F, will be closed to faculty, staff, and visitors on Thursday, May 27, to accommodate the Delegate Election of Trustees. Faculty and staff members with Brown F parking stickers should park in a designated open faculty/staff area in accordance with University parking rules and regulations. The closest open areas are Blue D at the Milton S. Eisenhower Auditorium, and Blue B and Blue G at Pollock and South Halls.

Don't use PANET for personal business

The University has been able to offset ever increasing costs for long distance telephone calls by utilizing the less costly PANET service (sometimes referred to as the "network" or "wide area") whenever possible. Instead of regular telephone company long distance trunk lines.

Faculty and staff members are reminded that even though the charges on PANET are less, departments nevertheless are billed directly for every second of time-of-call, just as they are if regular long distance lines are used. A department does not receive a flat monthly billing. Each call results in a direct department billing indicating time, date and length of call, number called and cost. Therefore, a PANET call should be treated as any other

long distance call, and such calls are to be made strictly for University business. Unauthorized use of University lines for personal long distance calls is a misuse of appropriated funds.

Everyone's cooperation is needed, if the University is to keep its costs for telephone service to the minimum possible.

Keep resumes current

During the years they spend at the University, some employees acquire new skills or knowledge as the result of taking courses, participating in training programs or through individual study. They may also gain experience in another field through outside activities.

When employees apply for promotion to another job, it is important that this new information be in their files, the Employment Division points out. However, unless employees provide such information about themselves, their files cannot be brought up to date.

The Employment Division urges that all employees periodically consider whether they can add to the information currently in their files. Persons who wish to do so should request a biographical data form from the Employment Division, Room 117 Willard Building, 865-1387 (Network 475-1387), or submit a revised resume.

Job insurance explained

According to the Office of Personnel Administration, most inquiries it receives concerning the Pennsylvania Unemployment Compensation Law as it applies to the University regard what the law covers and employee eligibility to receive unemployment compensation benefits.

Office specialists note that unemployment compensation is "like an insurance plan designed to afford eligible employees limited protection against loss of wages while out of work through no fault of their own."

This job insurance, however, does not protect employees against wage loss if they are absent from work through illness or if they are not working by their own choice.

The State Office of Employment Security — not the University — determines the eligibility of persons to receive benefits. Payments are made only to persons who qualify. Payments are not based on need.

It is important to note that employers pay the total cost of providing unemployment insurance for their employees. Employees do not pay any of this cost. Insurance against unemployment is entirely separate from the insurance commonly termed "Social Security," which provides another cushion against complete loss of earnings to individuals and dependents because of retirement or death. Employees, together with employers, help to pay for this latter form of insurance.

education. Listeners are invited to bring lawn chairs or blankets and picnic dinners to enjoy an evening of music under spring skies.

Just in case, however, the raindate will be Tuesday, May 18.

Outdoor evening band concert is May 17

The Concert White Band will present its annual "Concert in the Park" on Monday, May 17, at 7 p.m. at the Fisher Plaza outside Kern Graduate Building.

The band is under the direction of Darhyl S. Ramsey, assistant director of bands and assistant professor of music

Early registration set for next week

Early registration for the 1982 Summer Term will be held from 8:30 a.m. to 4:30 p.m. May 17-21 in Room 112 Shields Building.

To register early, a student must present evidence of fee payment, an ID card and a preregistration schedule (pink slip).

An assistant professor of art at the University, Kenneth R. Graves, hopes to be this summer in "a position to photograph what I didn't expect," since he has received a \$4,000 grant from the Pennsylvania Council on the Arts to photograph popular tourist places in Pennsylvania. The above photo, "Michelin Man," was taken by Professor Graves in California. This will be his first opportunity to explore Pennsylvania attractions.

Staff Vacancies

The following vacancies for positions classified as staff except as noted are open for applications. The announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (network line 475-1387). Applications for these staff vacancies will be accepted until 5 p.m., May 20, 1982. DO NOT CONTACT THE AREA THAT HAS THE VACANCY.

Applications for staff vacancies are considered in accordance with Fair Employment practices (PS-1) and in compliance with the University's Affirmative Action Compliance Program, without regard to race, color, religion, national origin, handicap (as provided by law), sex, or status as a disabled or Vietnam era veteran.

SERVICE DESK COORDINATOR, OFFICE OF PHYSICAL PLANT, UNIVERSITY PARK Responsible to Scheduler-Planner, Service Desk for the coordination of activities of the Service Desk on nights and holidays. Operates Central Control System during critical alarm situations; makes emergency call-outs of employees; coordinates their work; ensures proper emergency response. Receives and handles customer complaints. High school education or equivalent, plus at least one year of experience in building construction and/or building maintenance. Normally will work the following hours: Thursday, 12 midnight to 8 a.m. Friday, 12 midnight to 8 a.m. Saturday, Saturday, 8 p.m. to 8 a.m. Sunday, Sunday, 8 p.m. to 8 a.m. Monday.

ASSISTANT DIRECTOR OF NURSING, (OR COMPLEX), COLLEGE OF MEDICINE, HERSHEY Responsible to the Assistant Hospital Director/Director of Nursing Services for assisting with the administration of the Department of Nursing Services within assigned patient care areas including the planning, organizing, staffing, coordinating, and evaluating activities necessary for continuation and supervision of nursing care. A bachelor of science degree in nursing or equivalent, plus four to five years of effective experience and licensed to practice as a registered nurse by the Pennsylvania State Board of Nurse Examiners.

BUYER, OFFICE OF BUSINESS SERVICES, UNIVERSITY PARK Responsible to the Director of Purchasing Services for the efficient and effective procurement of required items. Evaluate specifications, giving consideration to quality, cost and delivery requirements; solicit quotations; interview vendors, expedite

deliveries, handle adjustments, and perform all necessary related purchasing service functions. Bachelor's degree or equivalent, preferably in business administration or a related field, plus two to three years' effective experience.

Background in procurement of air conditioning and refrigeration, electronics and communications, plumbing equipment and supplies, printing and related items is preferred. Achievement of Certified Purchasing Manager helpful.

Names sought for Research Staff Pool

The University annually receives grants for projects designed to fulfill specific research responsibilities.

Often the research grant or project is of relatively short or temporary duration. In most instances, University project administrators must react quickly in making selections of support staff personnel for their projects. Therefore, it is desirable to have an available pool of faculty and staff members who are interested in applying for such research support staff positions.

This announcement is made so that qualified individuals may make their interests known. The types of temporary research support staff positions typically available are: Senior Project Associate, Project Associate, Project Assistant, Senior Research Technologist, Research Technologist and Research Technician.

The types of discipline backgrounds required vary depending on the projects involved. They may include physics, engineering, agriculture, mathematics or chemistry, but are not limited to these areas.

If you apply, your name will be placed in the pool of candidates that will be considered as such opportunities arise. An announcement similar to this will be made each six months.

If you feel that you are interested in and have background related to typical University research projects, you may apply now or in the future for such temporary research support staff positions by calling the University's Employment Division, 865-1387 (network 475-1387).

Concert Choir will perform on Monday

The Penn State Concert Choir, under the direction of Timothy Shetler, will present a varied program of works for smaller choir on Monday, May 17, at 8:30 p.m. in the Music Building recital hall.

Selections include: "Christus Factus Est" by Anton Bruckner; "Nun Danket Alle Gott" by Johann Pachelbel; the "Alleluia" from Johann Sebastian Bach's Motet No. VI, "Praise the Lord All Ye

Nations"; "O Hülfe Christ, Gottes Sohn," the conclusion to "The Passion According to Saint John" by Heinrich Schutz; and three pieces by Benjamin Britten — "A Hymn to the Virgin," "Jubilate Deo" and "Festival Te Deum".

Faculty conductor of the Concert Choir, which was formed in the fall of 1981, is D. Douglas Miller, associate professor of music.

University Park Calendar

May 13 — 23

Special Events

Thursday, May 13

Fixed date for meetings involving Commonwealth Campus faculty. Also May 14.

New German Cinema, Fassbinder, *The Third Generation*, 7 and 9 p.m., HUB Assembly Room. Also May 14.

Museum of Art film, *Grandeur and Obscurity*, 7 p.m., First Floor Gallery.
University Readers, *Size 12 Boot, Size 10 War*, 7:30 p.m., 112 Kern.

Black Studies Program lecture, 7:30 p.m., Robeson Cultural Center conference room.
Joseph Brooks, Emergency Land Fund, Atlanta, Ga., on "The Status of Blacks in the Rural South: Soga of a Declining Resource Base."

Penn Statesman Stage Band jazz concert, 8:30 p.m., HUB Assembly Room.

Friday, May 14

Deadline for graduate students to submit petitions to Records Office to graduate in absentia in May.

STS/Three Cultures Dialogue, 12:20 p.m., 101 Kern. Talks by Donald H. Ford, human development, and Marlene Wardworth, family studies.

Sports: track and field (men), Penn State Open, 3 p.m.; golf (women), Lady Lion Invitational, through May 16.

Geography Dept. Coffee Hour, 3:40 p.m., 319 Walker. George Macenko, Central Washington Univ., on "Reclamation of Mined Land."

Commonsplace Theatre, *Altered States*, 7 and 9 p.m., 112 Kern. Also May 16.
GSA Coffeehouse, 8 p.m., 102 Kern.
Cinemathèque, *The Lady from Shanghai*, 7 and 9 p.m., 121 Sparks. Also May 15.

Saturday, May 15

France-Cinema, De Broca, *Practice Makes Perfect*, 7 and 9 p.m., 112 Kern. Also May 17.
Penn State Percussion Ensemble concert, 8:30 p.m., Music Bldg. recital hall.

Monday, May 17

Early registration, through May 21.
Concert White Band, "Concert in the Park," 7 p.m., Fisher Plaza.

University Readers, *The Last Question*, 7:30 p.m., HUB Reading Room. Also May 18.
Penn State Concert Choir concert, 8:30 p.m., Music Bldg. recital hall.

Wednesday, May 19

Spring Term classes end, 9:55 p.m.
Last day for signing Spring Term Emergency Loans, 108 Shields.
Graduate Council meeting, 3 p.m., 101 Kern.
University Readers, *Birth of the Prophet*, 7:30 p.m., Kern Auditorium.

Thursday, May 20

Final examinations, through Monday, May 24.
Kern Classics, *The Eagle Has Landed*, 7 and 9 p.m., 112 Kern.

Friday, May 21

Commonsplace Theatre, *Annie Hall*, 7 and 9:15 p.m., 112 Kern. Also May 22.

Seminars

Thursday, May 13

Materials Science and Engineering, 11 a.m., 301

Steidle, Herbert Richter, Fraunhofer Inst. on "Experimental Investigation into Environmentally Assisted Crack Growth in Glass."

Chemistry, 12:45 p.m., 333 Whitmore. William R. Heineman, Univ. of Cincinnati, on "Thin-Layer Spectroelectrochemistry of Inorganic and Biological Systems."

Philosophy, 3:30 p.m., 101 Kern. Alphonso Lingis, philosophy, on "Passive Action"; Richard Cohen, philosophy, on "The Privilege of Reason and Play: Levinas and Derrida."

Anthropology, 3:30 p.m., 107 Carpenter. Roscoe Stanton on "Chromosome Evolution in Primates."

Physics, 3:50 p.m., 117 Osmond. K. Johnson, MIT, on "Current Status of the Bag Model of Hadronic Structure."

Industrial Engineering, 4 p.m., 216 Hammond. Jonathan Plaut, Eltra Corp. and Allied Electronic Components, on "Product Quality: A Multi-Disciplinary Approach."

Friday, May 14

Engineering Science and Mechanics, 4 p.m., 215 Hammond. M.R. Louthan, Virginia Polytechnic Inst., on "Environmental Degradation of Materials."

Monday, May 17

Div. of Learning and Telecommunications Services meeting, 3 p.m., 8 Mitchell. Ann Shields, Katie O'Toole and Sandra Thomas, WFSX, on "What's in the News?"

MC3B, 4 p.m., 101 Althouse. Edward L. Kuff, Nat'l. Cancer Inst., NIH, on "Retiterated Endogenous Retroviral Genes: Functional and Evolutionary Considerations."

Entomology, 4 p.m., 204 Patterson. Jee Choe on "Community Ecology of Ectoparasites on Alaskan Seabirds," and Ralph Richardson on "Taxonomy and Distribution of the Hoplopleurid Lice of the Australasian Region (Anoplura: Hoplopleuridae)."

Tuesday, May 18

Metallurgy, 9:45 a.m., 301 Steidle. P.A.A. Khan

A daily calendar of events is available around the clock at 863-1100. For the latest information on College of Arts and Architecture events, telephone 863-1200.

on "Laser Welding of Nickel-Chromium-Molybdenum Containing Steels"; F. Chermant on "Effect of Point Defects on the Dissolution of Sulfides"; H. Wei on "Electrical Conductivity of a Dispersed Phase System (C-Si)"; and T.R. Parayal on "Mechanisms of Recrystallization in Duplex Stainless Steels."

Biology/Ecology, 11:10 a.m., 213 Buckhout. James Porter, Univ. of Georgia, on "Competition and Catastrophe: Principles of Organization in a Tropical Marine Community."

Plant Pathology, 3:45 p.m., 213 Buckhout. Priscilla Parish on "DeBary - Classic - 11"; Geosciences, 3:45 p.m., 22 Deike. S.C. Solomon, M.I.T., on "Tectonic Evolution of the Terrestrial Planets."

Exhibits

Chambers Gallery: Undergraduate School of Visual Arts Show.

Kern Gallery: Robert Milnes, ceramics, and Roger Pollok, clay.

Museum of Art: Director's Choice, Selected Works from the Museum's Collection. Sculpture and Sculptural Objects from the Museum's Collection.

Dorra de Pedry-Hunt, medals and sculpture.

Pattee Library: Rare Books Room: Goethe: The Fortunes of Faust.

East Corridor Gallery: Lois Johnson, prints, through May 20.

Main Lobby and Second Floor, East: Sandra Braund, Dean Enarros, Linda Rossman, recent works, through May 20; Jo Ward, poetry, opens May 21.

Lending Services Lobby: Heather Bentz, recent work.

Visual Arts Bldg., Zoller Gallery: Undergraduate Student Exhibition.

Ceramic sculpture by Robert Milnes is exhibited in Kern Galleries through May 28.

Arts Roundup

URTC Festival Theatre to mark 'Silver Summer'

URTC's Festival Theatre will observe its "Silver Summer" — its 25th consecutive season of professional summer theatre — with four productions that include drama, comedy and music.

The Silver Summer season will open in the Pavilion Theatre on June 24 with *Life with Father*, the Lindsey-Crouse comedy which chronicles the Day family's struggle to get Father Day baptized. Considered a classic of American comedy, it will run at the Pavilion Theatre June 24-27 and 29, and July 4 and 6-11.

Babes in Arms, a musical comedy by Richard Rodgers and Lorenz Hart, will open at the Playhouse July 1. Screen fans will remember the film version of *Babes*, which starred Mickey Rooney and Judy Garland. The show, about a troupe of young people attempting to produce summer stock theatre, will run at the Playhouse July 1-4, 6-11 and 13-18.
Dr. Hugh Leonard's 1978 winner of the Tony Award for best play, opens at the Pavilion Theatre on July 22. The comic story about a young man's need to come to terms with his father and with himself, it will be performed July 22-25 and 27, and Aug. 1 and 3-8.

Concluding the Silver Summer will be *South Pacific*, Rodgers and Hammerstein's ever-popular tale of love on a tropical island during World War II. It will be staged at the Playhouse July 29-Aug. 1, and Aug. 3-8 and 10-15.

Certain time is 8 p.m. every day except Sundays, when it is 7:30 p.m. Season subscriptions only are on sale at the Playhouse Box Office Monday through Saturday from 11:30 a.m. to 6 p.m. Subscriptions also may be charged to VISA or MasterCard by telephoning the box office during the same hours at 865-1884.

Single tickets will go on sale June 2; the box office will be closed from May 14 through May 24.

A campaign to raise funds to help underwrite the Silver Summer season is currently underway. Persons interested in contributing to, or learning more about, the campaign should contact Nancy H. Miller at 863-2142.

'Pop, pop, fizz, fizz Wow, what a concert it is'

The Penn State Percussion Ensemble will present a concert Saturday, May 15, at 8:30 p.m. in the Music Building recital hall. The group will perform under the direction of Dr. Michael Udow, assistant professor of music.

The ensemble will begin the program with J. Kent Williams' "African Sketches" in three movements, a composition that uses traditional West African rhythms. Following "Renaissance Suite," arranged by Wayne Duesterbeck, the group will play "Percussion Music" in four movements by Michael Colgrass, who received the Pulitzer Prize for his

percussion and orchestra piece "Deja Vu."
